Form 10-Q
May 08, 2013

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number: 1-16463

Peabody Energy Corporation
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of incorporation or
organization)

13-4004153
(I.R.S. Employer Identification No.)

701 Market Street, St. Louis, Missouri
(Address of principal executive offices)
(314) 342-3400

63101-1826
(Zip Code)

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

There were 269,629,245 shares of the registrant's common stock (par value of \$0.01 per share) outstanding at May 3, 2013.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(1) Basis of Presentation

The condensed consolidated financial statements include the accounts of Peabody Energy Corporation (the Company) and its affiliates. Interests in subsidiaries controlled by the Company are consolidated with any outside shareholder interests reflected as noncontrolling interests, except when the Company has an undivided interest in an unincorporated joint venture. In those cases, the Company includes its proportionate share in the assets, liabilities, revenues and expenses of the jointly controlled entities within each applicable line item of the unaudited condensed consolidated financial statements. All intercompany transactions, profits and balances have been eliminated in consolidation.

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States (U.S. GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements and should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's 2012 Annual Report on Form 10-K. In the opinion of management, these financial statements reflect all normal, recurring adjustments necessary for a fair presentation. Balance sheet information presented herein as of December 31, 2012 has been derived from the Company's audited consolidated balance sheet at that date. The results of operations for the three months ended March 31, 2013 are not necessarily indicative of the results that may be expected for future quarters or for the year ending December 31, 2013.

The Company classifies items within discontinued operations in the unaudited condensed consolidated financial statements when the operations and cash flows of a particular component of the Company have been (or will be) eliminated from the ongoing operations of the Company as a result of a disposal (by sale or otherwise) and the Company will no longer have any significant continuing involvement in the operation of that component.

(2) Newly Adopted Accounting Standards

Balance Sheet Offsetting

In December 2011, the Financial Accounting Standards Board (FASB) issued accounting guidance, which was further clarified in January 2013, requiring additional information intended to help reconcile existing differences in balance sheet offsetting requirements under U.S. GAAP and International Financial Reporting Standards. While this standard leaves existing guidance surrounding the offsetting of financial assets and liabilities unchanged, it requires several additional disclosures, including gross and net information about instruments and transactions eligible for offset in the balance sheet and instruments and transactions subject to a master netting arrangement or a similar agreement. The guidance applies to the Company's derivatives, which include both non-coal trading derivative financial instruments held for risk management purposes and derivative contracts associated with the Company's trading and brokerage activities. The guidance became effective for the Company for interim and annual reporting periods beginning on or after January 1, 2013. While the adoption of this guidance impacted the Company's disclosures, it did not affect the Company's results of operations, financial condition or cash flows.

Non-Coal Trading Derivatives. The Company's non-coal trading derivative financial instruments are transacted in over-the-counter (OTC) markets with financial institutions under International Swaps and Derivatives Association (ISDA) Master Agreements. Those agreements contain symmetrical default provisions which allow for the net settlement of amounts owed by either counterparty in the event of default or contract termination. The Company offsets its non-coal trading asset and liability derivative positions on a counterparty-by-counterparty basis in the condensed consolidated balance sheets, with the fair values of those respective derivatives reflected in "Other current assets," "Investments and other assets," "Accounts payable and accrued expenses" and "Other noncurrent liabilities." Though the symmetrical default provisions associated with the Company's non-coal trading derivatives exist at the overall counterparty level across its foreign currency, diesel fuel and explosives hedging strategy derivative contract portfolios, it is the Company's accounting policy to apply counterparty offsetting separately within those derivative contract portfolios for presentation in the condensed consolidated balance sheets because that application is more consistent with the fact that the Company generally net settles its non-coal trading derivatives with each counterparty

by derivative contract portfolio on a routine basis.

6

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Coal Trading Derivatives. The Company's coal trading assets and liabilities include financial instruments, such as swaps, futures and options, cleared through various commodities exchanges, which involve the daily net settlement of closed positions. The Company is required to post cash collateral, known as variation margin, on exchange-cleared positions that are in a net liability position and entitled to receive variation margin when in a net asset position. The Company also transacts in coal trading financial swaps and options through OTC markets with financial institutions and other non-financial trading entities under ISDA Master Agreements, which contain symmetrical default provisions. Certain of the Company's coal trading agreements with OTC counterparties also contain credit support provisions that may periodically require the Company to post, or entitle the Company to receive, variation margin. Physical coal and freight-related purchase and sale contracts included in the Company's coal trading assets and liabilities are executed pursuant to master purchase and sale agreements that also contain symmetrical default provisions and allow for the netting and setoff of receivables and payables that arise during the same time period. The Company offsets its coal trading asset and liability derivative positions, and variation margin related to those positions, on a counterparty-by-counterparty basis in the condensed consolidated balance sheets, with the fair values of those respective derivatives reflected in "Assets from coal trading activities, net" and "Liabilities from coal trading activities, net."

Refer to Note 6. "Derivatives and Fair Value Measurements" and Note 7. "Coal Trading" herein for the additional quantitative disclosures related to this guidance.

Accumulated Other Comprehensive Income

In June 2011, the FASB issued accounting guidance, which was finalized in February 2013, that introduced new disclosure requirements requesting that entities provide additional information about reclassification adjustments out of accumulated other comprehensive income, including changes in accumulated other comprehensive income balances by component and significant reclassification items. The new disclosure requirements became effective for interim and annual reporting periods beginning after December 15, 2012 (January 1, 2013 for the Company). While the adoption of this guidance impacted the Company's disclosures, it did not affect the Company's results of operations, financial condition or cash flows. Refer to Note 12. "Accumulated Other Comprehensive Income" herein for the additional disclosures related to this guidance.

(3) Discontinued Operations

Discontinued operations include certain non-strategic former Midwestern U.S. and Australian Mining segment assets held for sale which the Company has committed to divest, former Midwestern U.S. Mining segment assets that have ceased production and other previously divested operations.

Results from discontinued operations were as follows during the three months ended March 31, 2013 and 2012:

| | Three Months Ended March 31, | |
|--|------------------------------|---------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Total revenues | \$32.1 | \$66.5 |
| Loss from discontinued operations before income taxes | \$(16.6) | \$(9.1) |
| Income tax benefit | 7.5 | 4.4 |
| Loss from discontinued operations, net of income taxes | \$(9.1) | \$(4.7) |

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Assets and liabilities classified as discontinued operations included in the Company's condensed consolidated balance sheets were as follows:

| | March 31, 2013 | December 31, 2012 |
|---|-----------------------|----------------------|
| | (Dollars in millions) | |
| Assets: | | |
| Other current assets | \$31.2 | \$37.5 |
| Investments and other assets | 142.3 | 140.8 |
| Total assets classified as discontinued operations | \$173.5 | \$178.3 |
| Liabilities: | | |
| Accounts payable and accrued expenses | \$29.3 | \$33.3 |
| Other noncurrent liabilities | 40.0 | 27.1 |
| Total liabilities classified as discontinued operations | \$69.3 | \$60.4 |

(4) Investments

The Company's short-term investments are defined as those investments with original maturities of greater than three months and up to one year included in "Other current assets" in the condensed consolidated balance sheets. Long-term investments are defined as those investments with original maturities greater than one year included in "Investments and other assets" in the condensed consolidated balance sheets.

The Company classifies its investments in debt securities as either held-to-maturity or available-for-sale at the time of purchase and periodically reevaluates such designations. Such investments are classified as held-to-maturity when the Company has the intent and ability to hold the securities to maturity.

Investments in debt securities not classified as held-to-maturity and investments in marketable equity securities are classified as available-for-sale. Available-for-sale securities are carried at fair value, with unrealized gains and losses, net of income taxes, reported in "Accumulated other comprehensive income" in the condensed consolidated balance sheets. Realized gains and losses, determined on a specific identification method, are included in "Interest income" in the unaudited condensed consolidated statements of income.

Investments in available-for-sale securities at March 31, 2013 were as follows:

| Available-for-sale securities | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |
|-------------------------------|-----------------------|------------------------------|-------------------------------|------------|

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Investments in available-for-sale securities at December 31, 2012 were as follows:

| Available-for-sale securities | Amortized Cost | Gross Unrealized Gains (Dollars in millions) | Gross Unrealized Losses | Fair Value |
|-------------------------------|-------------------|---|-------------------------------|------------|
| Current: | | | | |
| U.S. corporate bonds | \$4.1 | \$— | \$— | \$4.1 |
| Noncurrent: | | | | |
| Marketable equity securities | 32.4 | — | — | 32.4 |
| Federal government securities | 32.0 | 0.2 | — | 32.2 |
| U.S. corporate bonds | 19.5 | 0.2 | — | 19.7 |
| Total | \$88.0 | \$0.4 | \$— | \$88.4 |

The Company's investments in marketable equity securities consist of an investment in Winsway Coking Coal Holdings Limited (Winsway).

Contractual maturities for available-for-sale investments in debt securities at March 31, 2013 were as shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

| Contractual maturities for available-for-sale securities | Cost (Dollars in millions) | Fair Value |
|--|-------------------------------|------------|
| Due in one year or less | \$3.9 | \$3.9 |
| Due in one to five years | 43.3 | 43.6 |
| Total | \$47.2 | \$47.5 |

Proceeds from sales and maturities of debt securities shown in the tables above amounted to \$12.9 million and \$1.7 million for the three months ended March 31, 2013 and 2012, respectively. The Company realized net gains of less than \$0.1 million during the three months ended March 31, 2013 associated with those sales and maturities. There were no gains or losses on the sales for the three months ended March 31, 2012. Purchases of debt securities amounted to \$4.6 million for the three months ended March 31, 2013. No purchases of debt securities occurred for the three months ended March 31, 2012.

In addition to the securities described above, the Company held investments in debt securities related to the Company's pro-rata share of funding in the Newcastle Coal Infrastructure Group (NCIG). These debt securities were recorded at cost, which approximated fair value and were denominated in U.S. dollars. During the three months ended March 31, 2012, the Company sold \$1.4 million of the debt securities related to NCIG, with no realized gains or losses on the sale. The Company did not hold any NCIG securities during 2013.

At each reporting date, the Company performs separate evaluations of debt and equity securities to determine if any unrealized losses are other-than-temporary. In December 2012, the Company performed its quarterly evaluation of debt and equity securities for impairment. The Company concluded that its investment in Winsway equity securities was other-than-temporarily impaired and, as such, recognized a \$35.5 million impairment loss on the investment in the quarter ended December 31, 2012, resetting the Company's cost basis in the investment. The fair market value of those securities again decreased during the three months ended March 31, 2013 and the Company assessed the securities for impairment as of that date. As a result of that analysis, the Company deemed the unrealized losses incurred during the three months ended March 31, 2013 associated with its investment in Winsway equity securities to be temporary and the changes in market value thereto during that period to be generally consistent with the trends of equity securities across the coal mining industry. The Company has the ability to hold the securities until recovery and has no current intention to divest the securities. Accordingly, the Company did not recognize other-than-temporary

losses on its investments in debt and equity securities during the three months ended March 31, 2013.

In November 2012, the Company purchased \$4.8 million of time deposits denominated in Chinese Renminbi with six month maturities. These investments are classified as held-to-maturity investments which are recorded at amortized cost, which approximates fair value, and are included in "Other current assets" in the condensed consolidated balance sheets at March 31, 2013 and December 31, 2012.

| Saleable coal | 283.9 | 226.5 |
| Total | \$ 566.0 | \$ 548.4 |

(6) Derivatives and Fair Value Measurements

Risk Management — Non-Coal Trading Activities

The Company is exposed to various types of risk in the normal course of business, including foreign currency exchange rate risk for non-U.S. dollar expenditures and balances, price risk on commodities utilized in the Company's mining operations and interest rate risk on long-term debt. The Company predominantly manages commodity price risk (excluding coal trading activities) related to the sale of coal through the use of long-term, fixed-price contracts, rather than through the use of derivative instruments. In order to manage its exposure related to price risk on certain commodities used in production, as well as for foreign currency exchange rate and interest rate risk, the Company utilizes derivative financial instruments. These risks are actively monitored in an effort to ensure compliance with the risk management policies of the Company.

Foreign Currency Hedges. The Company is exposed to foreign currency exchange rate risk, primarily on Australian dollar expenditures made in its Australian Mining segment. This risk is managed through the use of forward contracts and options that the Company designates as cash flow hedges, with the objective of reducing the variability of cash flows associated with forecasted foreign currency expenditures.

Diesel Fuel and Explosives Hedges. The Company is exposed to commodity price risk associated with diesel fuel and explosives utilized in production in the U.S. and Australia. This risk is managed through the use of derivatives, primarily swaps, and to a lesser extent through the use of cost pass-through contracts. The Company generally designates the swap contracts as cash flow hedges, with the objective of reducing the variability of cash flows associated with forecasted diesel fuel and explosives purchases.

Interest Rate Swaps. The Company is exposed to interest rate risk on its fixed rate and variable rate long-term debt. From time to time, the Company manages the interest rate risk associated with the fair value of its fixed rate borrowings using fixed-to-floating interest rate swaps to effectively convert a portion of the underlying cash flows on the debt into variable rate cash flows. The Company designates these swaps as fair value hedges, with the objective of hedging against adverse changes in the fair value of the fixed rate debt that results from market interest rate changes. In addition, from time to time, interest rate risk associated with the Company's variable rate borrowings is managed using floating-to-fixed interest rate swaps. The Company designates these swaps as cash flow hedges, with the objective of reducing the variability of cash flows associated with market interest rate changes. As of March 31, 2013, the Company had no interest rate swaps in place.

Notional Amounts and Fair Value. The following summarizes the Company's foreign currency and commodity positions at March 31, 2013:

| | Notional Amount by Year of Maturity | | | | |
|---|-------------------------------------|------------------|----------------|--|---------|
| | Total | 2013 | 2014 | 2015 | 2016 |
| Foreign Currency | | | | | |
| A\$:US\$ hedge contracts (A\$ millions) | \$4,466.1 | \$1,510.5 | \$1,688.5 | \$1,097.1 | \$170.0 |
| Commodity Contracts | | | | | |
| Diesel fuel hedge contracts (million gallons) | 194.4 | 76.7 | 73.4 | 44.3 | — |
| U.S. explosives hedge contracts (million MMBtu) | 3.1 | 1.9 | 1.2 | — | — |
| | Account Classification by | | | | |
| | Cash Flow Hedge | Fair Value Hedge | Economic Hedge | Fair Value Asset (Liability) (Dollars in millions) | |
| Foreign Currency | | | | | |
| A\$:US\$ hedge contracts (A\$ millions) | \$4,466.1 | \$— | \$— | \$240.5 | |
| Commodity Contracts | | | | | |
| Diesel fuel hedge contracts (million gallons) | 194.4 | — | — | 6.0 | |
| U.S. explosives hedge contracts (million MMBtu) | 3.1 | — | — | (3.0) | |

Based on the net fair value of the Company's non-coal trading positions held in "Accumulated other comprehensive income" at March 31, 2013, unrealized gains to be reclassified from comprehensive income to earnings over the next 12 months associated with the Company's foreign currency and diesel fuel hedge programs are expected to be approximately \$205 million and \$8 million, respectively. The unrealized losses to be realized under the explosives hedge program are expected to be approximately \$2 million. As these unrealized gains and losses are associated with derivative instruments that represent hedges of forecasted transactions, the amounts reclassified to earnings will partially offset the realized transactions.

Hedge Ineffectiveness. The Company assesses, both at inception and at least quarterly thereafter, whether the derivatives used in hedging activities are highly effective at offsetting the changes in the anticipated cash flows of the hedged item. The effective portion of the change in the fair value is recorded in "Accumulated other comprehensive income" until the hedged transaction impacts reported earnings, at which time any gain or loss is reclassified to earnings. To the extent that periodic changes in the fair value of derivatives deemed highly effective exceeds such changes in the hedged item, the ineffective portion of the periodic non-cash changes are recorded in earnings in the period of the change. If the hedge ceases to qualify for hedge accounting, the Company prospectively recognizes changes in the fair value of the instrument in earnings in the period of the change.

A measure of ineffectiveness is inherent in hedging future diesel fuel purchases with derivative positions based on refined petroleum products as a result of location and/or product differences.

The Company's derivative positions for the hedging of future explosives purchases are based on natural gas, which is the primary price component of explosives. However, a small measure of ineffectiveness exists as the contractual purchase price includes manufacturing fees that are subject to periodic adjustments. In addition, other fees, such as transportation surcharges, can result in ineffectiveness, but have historically changed infrequently and comprise a small portion of the total explosives cost.

The Company's derivative positions for the hedging of forecasted foreign currency expenditures contain a small measure of ineffectiveness due to timing differences between the hedge settlement and the purchase transaction, which

could differ by less than a day and up to a maximum of 30 days.

See Note 7. "Coal Trading" for information on balance sheet offsetting related to the Company's coal trading activities.
Fair Value Measurements

The Company uses a three-level fair value hierarchy that categorizes assets and liabilities measured at fair value based on the observability of the inputs utilized in the valuation. These levels include: Level 1 - inputs are quoted prices in active markets for the identical assets or liabilities; Level 2 - inputs are other than quoted prices included in Level 1 that are directly or indirectly observable through market-corroborated inputs; and Level 3 - inputs are unobservable, or observable but cannot be market-corroborated, requiring the Company to make assumptions about pricing by market participants.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Financial Instruments Measured on a Recurring Basis. The following tables set forth the hierarchy of the Company's net financial asset positions for which fair value is measured on a recurring basis:

| | March 31, 2013 | | | |
|---|-----------------------|---------|---------|---------|
| | Level 1 | Level 2 | Level 3 | Total |
| | (Dollars in millions) | | | |
| Investments in debt and equity securities | \$59.0 | \$10.9 | \$— | \$69.9 |
| Commodity swap contracts | — | 3.0 | — | 3.0 |
| Foreign currency forward contracts | — | 240.5 | — | 240.5 |
| Total net financial assets | \$59.0 | \$254.4 | \$— | \$313.4 |
| | December 31, 2012 | | | |
| | Level 1 | Level 2 | Level 3 | Total |
| | (Dollars in millions) | | | |
| Investments in debt and equity securities | \$75.4 | \$13.0 | \$— | \$88.4 |
| Commodity swap contracts | — | 4.0 | — | 4.0 |
| Foreign currency forward contracts | — | 286.9 | — | 286.9 |
| Total net financial assets | \$75.4 | \$303.9 | \$— | \$379.3 |

For Level 1 and 2 financial assets and liabilities, the Company utilizes both direct and indirect observable price quotes, including interest rate yield curves, exchange indices, broker quotes, published indices and other market quotes. Below is a summary of the Company's valuation techniques for Level 1 and 2 financial assets and liabilities: Investments in debt and equity securities: corporate bonds and U.S. government treasury instruments and marketable equity securities are valued based on quoted prices in active markets (Level 1) and U.S. government agency securities are valued based on derived prices in active markets (Level 2).

Commodity swap contracts — diesel fuel and explosives: valued based on a valuation that is corroborated by the use of market-based pricing (Level 2).

Foreign currency forward and option contracts: valued utilizing inputs obtained in quoted public markets (Level 2).

The Company did not have any transfers between levels during the three months ended March 31, 2013 or 2012 for its non-coal trading positions. The Company's policy is to value transfers between levels using the beginning of period valuation.

Other Financial Instruments. The following methods and assumptions were used by the Company in estimating fair values for other financial instruments as of March 31, 2013 and December 31, 2012:

Cash and cash equivalents, accounts receivable, including those within the Company's accounts receivable securitization program, and accounts payable and accrued expenses have carrying values which approximate fair value due to the short maturity or the liquid nature of these instruments.

Held-to-maturity investments in time deposits denominated in Chinese Renminbi of \$4.8 million have carrying values based on amortized cost which approximates fair value due to the short maturity of these investments.

Long-term debt fair value estimates are based on observed prices for securities with an active trading market when available (Level 2), and otherwise on estimated borrowing rates to discount the cash flows to their present value (Level 3). The carrying amounts of the 7.875% Senior Notes due December 2026 and the Convertible Junior Subordinated Debentures due 2066 (the Debentures) are net of the respective unamortized note discounts.

The carrying amounts and estimated fair values of the Company's debt are summarized as follows:

| March 31, 2013 | | December 31, 2012 | |
|-----------------------|----------------------|-------------------|----------------------|
| Carrying Amount | Estimated Fair Value | Carrying Amount | Estimated Fair Value |
| (Dollars in millions) | | | |

| | | | | |
|----------------|-----------|-----------|-----------|-----------|
| Long-term debt | \$6,145.7 | \$6,385.0 | \$6,252.9 | \$6,583.9 |
|----------------|-----------|-----------|-----------|-----------|

15

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Nonperformance and Credit Risk

The fair value of the Company's non-coal trading derivative assets and liabilities reflects adjustments for nonperformance and credit risk. The Company manages its counterparty risk through established credit standards, diversification of counterparties, utilization of investment grade commercial banks, adherence to established tenor limits based on counterparty creditworthiness and continuous monitoring of that creditworthiness. To reduce its credit exposure for these hedging activities, the Company seeks to enter into netting agreements with counterparties that permit the Company to offset asset and liability positions with such counterparties in the event of default.

(7) Coal Trading

The Company engages in the direct and brokered trading of coal and freight-related contracts (coal trading). Except those for which the Company has elected to apply a normal purchases and normal sales exception, all derivative coal trading contracts are accounted for at fair value.

The Company's policy is to include instruments associated with coal trading transactions as a part of its trading book. Trading revenues from such transactions are recorded in "Other revenues" in the unaudited condensed consolidated statements of operations and include realized and unrealized gains and losses on derivative instruments, including those that arise from coal deliveries related to contracts accounted for on an accrual basis under the normal purchases and normal sales exception. Therefore, the Company has elected the trading exemption surrounding disclosures related to its coal trading activities.

Trading revenues recognized during the three months ended March 31, 2013 and 2012 were as follows:

| Trading Revenues by Type of Instrument | Three Months Ended | |
|--|-----------------------|--------|
| | March 31, | |
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Commodity futures, swaps and options | \$51.0 | \$10.8 |
| Physical commodity purchase/sale contracts | (25.1 |) 9.1 |
| Total trading revenues | \$25.9 | \$19.9 |

Risk Management

Hedge Ineffectiveness. The Company assesses, both at inception and at least quarterly thereafter, whether the derivatives used in cash flow hedging activities are highly effective at offsetting the changes in the anticipated cash flows of the hedged item. The effective portion of the change in the fair value is recorded in "Accumulated other comprehensive income" until the hedged transaction impacts reported earnings, at which time gains and losses are also reclassified to earnings. To the extent that periodic changes in the fair value of a derivative exceeds the changes in the hedged item to which it has been designated, the ineffective portion is recorded in earnings in the period of the change. If the hedge ceases to qualify for hedge accounting, the Company prospectively recognizes the changes in fair value of the instrument in earnings in the period of the change.

In some instances, the Company has designated an existing coal trading derivative as a hedge and, thus, the derivative has a non-zero fair value at hedge inception. The "off-market" nature of these derivatives, which is best described as an embedded financing element within the derivative, is a source of ineffectiveness. In other instances, the Company uses a coal trading derivative that settles at a different time, has different quality specifications or has a different location basis than the occurrence of the cash flow being hedged. These collectively yield ineffectiveness to the extent that the derivative hedge contract does not exactly offset changes in the fair value or expected cash flows of the hedged item.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The gross fair value of coal trading positions designated as cash flow hedges of forecasted sales was an asset of \$181.7 million and \$153.1 million as of March 31, 2013 and December 31, 2012, respectively. The increase in the fair value of coal trading positions designated as cash flow hedges of forecasted sales was predominantly driven by a decrease in the associated price levels in international thermal coal markets during the period. Based on the net fair value of the Company's coal trading positions held in "Accumulated other comprehensive income" at March 31, 2013, unrealized gains to be reclassified from comprehensive income to earnings over the next 12 months are expected to be approximately \$163 million. As these unrealized gains are associated with derivative instruments that represent hedges of forecasted transactions, the amounts reclassified to earnings may partially offset the realized transactions in the unaudited condensed consolidated statements of operations.

Offsetting and Balance Sheet Presentation

The fair value of assets and liabilities from coal trading activities presented on a gross and net basis as of March 31, 2013 and December 31, 2012 is set forth below:

| Affected line item in the condensed consolidated balance sheets | Gross Amounts of Recognized Assets (Liabilities) | Gross Amounts Offset in the Condensed Consolidated Balance Sheets | Variation margin (held) posted ⁽¹⁾ | Net Amounts of Assets (Liabilities) Presented in the Condensed Consolidated Balance Sheets |
|---|---|---|--|--|
| | (Dollars in millions) | | | |
| | Fair Value as of March 31, 2013 | | | |
| Assets from coal trading activities, net | \$565.6 | \$(342.4 |) \$(165.3 |) \$57.9 |
| Liabilities from coal trading activities, net | (364.9 |) 342.4 | 0.6 | (21.9 |
| Total, Net | \$200.7 | \$— | \$(164.7 |) \$36.0 |
| | Fair Value as of December 31, 2012 | | | |
| Assets from coal trading activities, net | \$380.4 | \$(170.8 |) \$(157.2 |) \$52.4 |
| Liabilities from coal trading activities, net | (190.5 |) 170.8 | 0.3 | (19.4 |
| Total, Net | \$189.9 | \$— | \$(156.9 |) \$33.0 |

⁽¹⁾ Approximately \$97 million and \$76 million of the net variation margin held at March 31, 2013 and December 31, 2012, respectively, related to cash flow hedges.

See Note 6. "Derivatives and Fair Value Measurements" for information on balance sheet offsetting related to the Company's non-coal trading activities.

Fair Value Measurements

The following tables set forth the hierarchy of the Company's net financial asset coal trading positions for which fair value is measured on a recurring basis as of March 31, 2013 and December 31, 2012:

| | March 31, 2013 | | | Total |
|--|-----------------------|---------|---------|--------|
| | Level 1 | Level 2 | Level 3 | |

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

For Level 1 and 2 financial assets and liabilities, the Company utilizes both direct and indirect observable price quotes, including U.S. interest rate curves, LIBOR yield curves, Chicago Mercantile Exchange (CME), Intercontinental Exchange indices (ICE), NOS Clearing ASA, LCH.Clearnet (formerly known as the London Clearing House), Singapore Exchange (SGX), broker quotes, published indices and other market quotes. Below is a summary of the Company's valuation techniques for Level 1 and 2 financial assets and liabilities:

• Commodity futures, swaps and options: generally valued based on unadjusted quoted prices in active markets (Level 1) or a valuation that is corroborated by the use of market-based pricing (Level 2).

• Physical commodity purchase/sale contracts: purchases and sales at locations with significant market activity corroborated by market-based information (Level 2).

Physical commodity purchase/sale contracts transacted in less liquid markets or contracts, such as long-term arrangements with limited price availability, are classified in Level 3. Indicators of less liquid markets are those with periods of low trade activity or wide pricing spreads between broker quotes.

The Company's risk management function, which is independent of the Company's commercial trading function, is responsible for valuation policies and procedures, with oversight from executive management. Generally, the Company's Level 3 instruments or contracts are valued using bid/ask price quotations and other market assessments obtained from multiple, independent third-party brokers or other transactional data incorporated into internally-generated discounted cash flow models. While the Company does not anticipate any decrease in the number of third-party brokers or market liquidity, the occurrence of such events could erode the quality of market information and therefore the valuation of its market positions. The Company's valuation techniques include basis adjustments to the foregoing price inputs for quality, such as heat rate and sulfur and ash content; location differentials, expressed as port and freight costs, and credit and nonperformance risk. The Company's risk management function independently validates the Company's valuation inputs, including unobservable inputs, with third-party information and settlement prices from other sources where available. A daily process is performed to analyze market price changes and changes to the portfolio. Further periodic validation occurs at the time contracts are settled with the counterparty. These valuation techniques have been consistently applied in all periods presented, and the Company believes it has obtained the most accurate information available for the types of derivative contracts held.

The following table summarizes the quantitative unobservable inputs utilized in the Company's internally-developed valuation models for physical commodity purchase/sale contracts classified as Level 3 as of March 31, 2013:

| Input | Range | | Weighted | | |
|-----------------------------|-------|------|----------|--|---|
| | Low | High | Average | | |
| Quality adjustments | 2 | % 21 | % 18 | | % |
| Location differentials | 17 | % 17 | % 17 | | % |
| Non-performance adjustments | 4 | % 4 | % 4 | | % |

Significant increases or decreases in the inputs in isolation could result in a significantly higher or lower fair value measurement. The unobservable inputs do not have a direct interrelationship; therefore, a change in one unobservable input would not necessarily correspond with a change in another unobservable input.

The following table summarizes the changes in the Company's recurring Level 3 net financial assets:

| | Three Months Ended | |
|---|--------------------|-------|
| | March 31, 2013 | 2012 |
| Beginning of period | \$5.2 | \$8.7 |
| Total net (losses) gains realized/unrealized: | | |
| Included in earnings | (4.1 |) 1.5 |

| | | | |
|---------------|-------|-------|---|
| Settlements | 0.3 | (1.3 |) |
| End of period | \$1.4 | \$8.9 | |

18

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The following table summarizes the changes in net unrealized (losses) gains relating to Level 3 net financial assets held both as of the beginning and the end of the period:

| | Three Months Ended March 31, | |
|---|---------------------------------|----------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Changes in net unrealized (losses) gains ⁽¹⁾ | \$ (3.2 |) \$ 1.9 |

Within the unaudited condensed consolidated statements of operations and unaudited condensed consolidated statements of comprehensive income for the periods presented, unrealized gains and losses from Level 3 items are combined with unrealized gains and losses on positions classified in Level 1 or 2, as well as other positions that have been realized during the applicable periods.

The Company did not have any significant transfers in its coal trading positions between Level 1 and Level 2 during the three months ended March 31, 2013 or 2012. There were also no transfers in or out of Level 3 during the three months ended March 31, 2013 or 2012. The Company's policy is to value transfers between levels using the beginning of period valuation.

As of March 31, 2013, the timing of the estimated future realization of the value of the Company's trading portfolio was as follows:

| Year of Expiration | Percentage of Portfolio Total | |
|--------------------|----------------------------------|---|
| 2013 | 48 | % |
| 2014 | 37 | % |
| 2015 | 14 | % |
| 2016 | 1 | % |
| | 100 | % |

Nonperformance and Credit Risk. The fair value of the Company's coal derivative assets and liabilities reflects adjustments for nonperformance and credit risk. The Company's exposure is substantially with electric utilities, steel producers and energy marketers. The Company's policy is to independently evaluate each customer's creditworthiness prior to entering into transactions and to regularly monitor the credit extended. If the Company engages in a transaction with a counterparty that does not meet its credit standards, the Company seeks to protect its position by requiring the counterparty to provide an appropriate credit enhancement. Also, when appropriate (as determined by its credit management function), the Company has taken steps to reduce its exposure to customers or counterparties whose credit has deteriorated and who may pose a higher risk of failure to perform under their contractual obligations. These steps include obtaining letters of credit or cash collateral (margin), requiring prepayments for shipments or the creation of customer trust accounts held for the Company's benefit to serve as collateral in the event of a failure to pay or perform. To reduce its credit exposure related to trading and brokerage activities, the Company seeks to enter into netting agreements with counterparties that permit the Company to offset asset and liability positions with such counterparties and, to the extent required, will post or receive margin amounts associated with exchange-cleared and certain OTC positions.

At March 31, 2013, 77% of the Company's credit exposure related to coal trading activities was with investment grade counterparties while 16% was with non-investment grade counterparties and 7% was with counterparties that are not rated.

Performance Assurances and Collateral

Certain of the Company's derivative trading instruments require the parties to provide additional performance assurances whenever a material adverse event jeopardizes one party's ability to perform under the instrument. If the

Company was to sustain a material adverse event (using commercially reasonable standards), its counterparties could request collateralization on derivative trading instruments in net liability positions which, based on an aggregate fair value at March 31, 2013 and December 31, 2012, would have amounted to collateral postings to counterparties of approximately \$9 million and \$8 million, respectively. As of March 31, 2013 and December 31, 2012, no collateral was posted to counterparties for such positions.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Certain of the Company's other derivative trading instruments require the parties to provide additional performance assurances whenever a credit downgrade occurs below a certain level as specified in each underlying contract. The terms of such derivative trading instruments typically require additional collateralization, which is commensurate with the severity of the credit downgrade. If a credit downgrade were to have occurred below contractually specified levels, the Company's additional collateral requirement owed to its counterparties would have been zero at March 31, 2013 and December 31, 2012 based on the aggregate fair value of all derivative trading instruments with such features. Accordingly, the Company had posted no margin related to such features as of March 31, 2013 or December 31, 2012. The Company is required to post variation margin on positions that are in a net liability position and is entitled to receive variation margin on positions that are in a net asset position with an exchange and certain of its OTC derivative contract counterparties. At March 31, 2013 and December 31, 2012, the Company held net variation margin of \$164.7 million and \$156.9 million, respectively.

In addition to the requirements surrounding variation margin, the Company is required by the exchanges upon which it transacts to post certain additional collateral, known as initial margin, which represents an estimate of potential future adverse price movements across the Company's portfolio under normal market conditions. As of March 31, 2013 and December 31, 2012, the Company had posted initial margin of \$19.0 million and \$23.2 million, respectively, which is reflected in "Other current assets" in the condensed consolidated balance sheets. The Company also had posted \$0.5 million of margin in excess of the exchange-required variation and initial margin discussed above as of December 31, 2012, which is also reflected in "Other current assets."

(8) Financing Receivables

The Company had total financing receivables of \$412.5 million and \$391.7 million at March 31, 2013 and December 31, 2012, respectively, which consisted of the following:

| Balance Sheet Classification | March 31, 2013 | December 31, 2012 |
|---------------------------------|-----------------------|----------------------|
| | (Dollars in millions) | |
| Accounts receivable, net | \$1.8 | \$0.7 |
| Investments and other assets | 410.7 | 391.0 |
| Total financing receivables | \$412.5 | \$391.7 |

The Company periodically assesses the collectability of accounts and loans receivable by considering factors such as specific evaluation of collectability, historical collection experience, the age of the receivable and other available evidence. Below is a description of the Company's financing receivables at March 31, 2013.

Codrilla Mine Project. In 2011, a wholly owned subsidiary of PEA-PCI, then Macarthur Coal Limited, completed the sale of its 85% interest in the Codrilla Mine Project to participants of the Coppabella Moorvale Joint Venture (CMJV) where PEA-PCI sold down its interest in the Codrilla project to the CMJV (Codrilla sell down) so that, following completion of the sale, ownership of the Codrilla Mine Project reflected the existing ownership of the Coppabella and Moorvale mines with PEA-PCI retaining a 73.3% ownership. Prior to the acquisition of PEA-PCI by the Company, consideration of \$15.0 million Australian dollars was received by PEA-PCI upon completion of the Codrilla sell down, representing 20% of the agreed price. Two installments, for which the Company holds non-interest-bearing receivables, are due upon the completion of certain milestones. The first installment, with 40% due on the granting of the related mining lease, was received during the three months ended September 30, 2012. The final 40% is due upon the mine's first coal shipment. There are currently no indications of impairment on the remaining installment and the Company expects to receive full payment upon the mine's first shipment. The remaining balance associated with these receivables is recorded in "Investments and other assets" which was \$34.2 million and \$33.6 million at March 31, 2013 and December 31, 2012, respectively, in the condensed consolidated balance sheets.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Middlemount Mine. The Company periodically makes loans to the Middlemount Mine joint venture (Middlemount), in which the Company owns a 50% equity interest, pursuant to the related shareholders' agreement for purposes of funding capital expenditures and working capital requirements. Middlemount intends to pay down the loans as excess cash is generated as required by the shareholders' agreement. The loans bear interest at a rate equal to the monthly average 30-day Australian Bank Bill Swap Reference Rate plus 3.5% and expire December 24, 2015. Based on the expected timing of repayment on these loans, the Company now considers these loans to be of a long-term nature. As a result, the foreign currency impact related to the shareholder loans for the three month period ended March 31, 2013 is included in foreign currency translation adjustment in the unaudited condensed consolidated balance sheet as of March 31, 2013 and the unaudited condensed consolidated statement of comprehensive income for the three months then ended. "Investments and other assets" included \$376.5 million and \$357.4 million at March 31, 2013 and December 31, 2012, respectively, related to these loans in the condensed consolidated balance sheets.

Other Financing Receivables. From time to time, the Company may enter into transactions resulting in accounts or notes receivable held by the Company, which have been reflected in "Accounts receivable, net." These notes are generally short term in nature with positive historical collection experience and do not represent a material credit risk to the Company. During the three months ended March 31, 2013, the Company collected all such receivables outstanding as of December 31, 2012.

(9) Income Taxes

The Company's tax expense of \$3.7 million and \$74.4 million for the three months ended March 31, 2013 and 2012 included remeasurement expense related to foreign tax accounts of \$1.6 million and \$8.9 million, respectively. The 2013 effective tax rate before remeasurement is based on the Company's estimated full year effective tax rate, which is comprised of the expected statutory tax expense, more than offset by reductions from percentage depletion, foreign rate differential and the Australian minerals resource rent tax.

The Company's Australian income tax returns for the tax years 2004 through 2010 are under examination by the Australian Tax Office (ATO). In April 2013, the ATO issued a final assessment challenging certain financing transactions with a total assessment of \$78.9 million, comprised of additional taxes of \$54.8 million plus interest and penalties of \$24.1 million. The Company plans to proceed with litigation and may be required to make a deposit payment of up to 50% of the assessment during the second quarter of 2013.

(10) Long-term Debt

The Company's total indebtedness as of March 31, 2013 and December 31, 2012 consisted of the following:

| | March 31, 2013 | December 31, 2012 |
|--|-----------------------|-------------------|
| | (Dollars in millions) | |
| Term Loan | \$368.8 | \$418.8 |
| 2011 Term Loan Facility | 862.5 | 912.5 |
| 7.375% Senior Notes due November 2016 | 650.0 | 650.0 |
| 6.00% Senior Notes due November 2018 | 1,518.8 | 1,518.8 |
| 6.50% Senior Notes due September 2020 | 650.0 | 650.0 |
| 6.25% Senior Notes due November 2021 | 1,339.6 | 1,339.6 |
| 7.875% Senior Notes due November 2026 | 247.4 | 247.4 |
| Convertible Junior Subordinated Debentures due December 2066 | 377.9 | 377.4 |
| Capital lease obligations | 96.9 | 104.6 |
| Other | 33.8 | 33.8 |
| Total Debt | \$6,145.7 | \$6,252.9 |
| First Quarter 2013 Voluntary Prepayments | | |

During the first quarter of 2013, the Company voluntarily prepaid \$100.0 million in aggregate principal amount of its Term Loan and 2011 Term Loan Facility with existing cash on hand. That voluntary repayment represented all of the contractual 2014 quarterly principal repayments associated with those facilities and a portion of the contractual 2015 principal repayments related to the Term Loan. The Company recognized a loss on debt extinguishment of \$0.9 million associated with these prepayments. The loss is classified in "Interest expense" in the unaudited condensed consolidated statement of operations for the three months ended March 31, 2013.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Subsequent Events

In April 2013, the Company committed to voluntarily prepay an additional \$67.0 million in aggregate principal amount of its Term Loan and \$32.4 million of certain Australian private placement bonds (presented in "Other" in the above schedule) during the second quarter of 2013 with existing cash on hand. Because the Company had the intention to prepay those amounts within the next twelve months as of March 31, 2013, those amounts have been included in "Current maturities of long-term debt" in the unaudited condensed consolidated balance sheet at that date.

Other Long-Term Debt

Other than the foregoing, there were no significant changes to the Company's long-term debt subsequent to December 31, 2012. Information regarding the Company's debt is outlined in Note 12 to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

(11) Pension and Postretirement Benefit Costs

Net periodic pension costs included the following components:

| | Three Months Ended March 31, | |
|---|---------------------------------|---------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Service cost for benefits earned | \$0.6 | \$0.5 |
| Interest cost on projected benefit obligation | 10.6 | 11.7 |
| Expected return on plan assets | (14.9 |) (15.9 |
| Amortization of prior service cost | 0.2 | 0.2 |
| Amortization of actuarial loss | 16.4 | 12.2 |
| Net periodic pension costs | \$12.9 | \$8.7 |

Annual contributions to the qualified plans are made in accordance with minimum funding standards and the Company's agreement with the Pension Benefit Guaranty Corporation (PBGC). Funding decisions also consider certain funded status thresholds defined by the Pension Protection Act of 2006 (generally 80%). The Company currently expects its qualified plans to be at or above the Pension Protection Act thresholds and will therefore avoid benefit restrictions and at-risk penalties for 2013. Based upon minimum funding requirements in accordance with the Moving Ahead for Progress in the 21st Century Act (MAP-21) issued in July 2012, the Company expects to contribute approximately \$5.0 million in 2013 to meet minimum funding requirements for its qualified plans and benefit payments for its non-qualified plans.

Net periodic postretirement benefit costs included the following components:

| | Three Months Ended March 31, | |
|--|---------------------------------|--------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Service cost for benefits earned | \$3.9 | \$3.6 |
| Interest cost on accumulated postretirement benefit obligation | 10.5 | 13.7 |
| Amortization of prior service cost | (0.4 |) 0.7 |
| Amortization of actuarial loss | 6.0 | 8.1 |
| Net periodic postretirement benefit costs | \$20.0 | \$26.1 |

The following table provides additional information regarding items reclassified out of "Accumulated other comprehensive income" into earnings during the three months ended March 31, 2013:

| Details about accumulated other comprehensive income (loss) components | Amount reclassified from accumulated other comprehensive income ⁽¹⁾ (Dollars in millions) | Affected line item in the condensed consolidated statement of operations |
|---|--|---|
| Net actuarial loss associated with postretirement plans and workers compensation obligations: | | |
| Postretirement health care and life insurance benefits | \$(6.0 |) Operating costs and expenses |
| Defined benefit pension plans | (13.6 |) Operating costs and expenses |
| Defined benefit pension plans | (2.8 |) Selling and administrative expenses |
| Insignificant items | (0.3 |) |
| | (22.7 |) Total before income taxes |
| | 8.4 | Income tax provision |
| | \$(14.3 |) Total after income taxes |
| Prior service cost associated with postretirement plans: | | |
| Postretirement health care and life insurance benefits | \$0.4 | Operating costs and expenses |
| Defined benefit pension plans | (0.2 |) Operating costs and expenses |
| | 0.2 | Total before income taxes |
| | (0.1 |) Income tax provision |
| | \$0.1 | Total after income taxes |
| Cash flow hedges: | | |
| Foreign currency cash flow hedge contracts | \$85.1 | Operating costs and expenses |
| Fuel and explosives commodity swaps | 6.9 | Operating costs and expenses |
| Coal trading commodity futures, swaps and options | 25.3 | Other revenues |
| Insignificant items | (0.1 |) |
| | 117.2 | Total before income taxes |
| | (40.1 |) Income tax provision |
| | \$77.1 | Total after income taxes |
| Available-for-sale securities: | | |
| Debt securities | \$0.1 | Interest income ⁽²⁾ |

⁽¹⁾ Recognized as gains (losses) in the unaudited condensed consolidated statements of operations.

⁽²⁾ The tax effect associated with the realized gain on sale of debt securities during the three months ended March 31, 2013 was less than \$0.1 million.

(13) (Loss) Earnings per Share (EPS)

Basic and diluted EPS are computed using the two-class method, which is an earnings allocation that determines EPS for each class of common stock and participating securities according to dividends declared and participation rights in undistributed earnings. The Company's restricted stock awards are considered participating securities because holders are entitled to receive non-forfeitable dividends during the vesting term. Diluted EPS includes securities that could potentially dilute basic EPS during a reporting period, for which the Company includes the Debentures and

share-based compensation awards. Dilutive securities are not included in the computation of loss per share when a company reports a net loss as the impact would be anti-dilutive.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

A conversion of the Debentures may result in payment for any conversion value in excess of the principal amount of the Debentures in the Company's common stock. For diluted EPS purposes, potential common stock is calculated based on whether the market price of the Company's common stock at the end of each reporting period is in excess of the conversion price of the Debentures. For a full discussion of the conditions under which the Debentures may be converted, the conversion rate to common stock and the conversion price, see Note 12 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

For all but the performance units, the potentially dilutive impact of the Company's share-based compensation awards is determined using the treasury stock method. Under the treasury stock method, awards are treated as if they had been exercised with any proceeds used to repurchase common stock at the average market price during the period. Any incremental difference between the assumed number of shares issued and purchased is included in the diluted share computation. For the Company's performance units, their contingent features result in an assessment for any potentially dilutive common stock by using the end of the reporting period as if it were the end of the contingency period for all units granted. For further discussion of the Company's share-based compensation awards, see Note 18 to the Consolidated Financial Statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The computation of diluted EPS excludes anti-dilutive shares of approximately 1.0 million for the three months ended March 31, 2013 and 0.6 million for the three months ended March 31, 2012. These anti-dilutive shares were due to certain share-based compensation awards calculated under the treasury stock method. Anti-dilution generally occurs where the exercise prices are higher than the average market value of the Company's stock price during the applicable period.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The following illustrates the earnings allocation method utilized in the calculation of basic and diluted EPS:

| | Three Months Ended March 31, | |
|---|---------------------------------|-----------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| EPS numerator: | | |
| (Loss) income from continuing operations, net of income taxes | \$(10.3 |) \$183.0 |
| Less: Net income attributable to noncontrolling interests | 4.0 | 5.6 |
| (Loss) income from continuing operations attributable to common stockholders, before allocation of earnings to participating securities | (14.3 |) 177.4 |
| Less: Earnings from continuing operations allocated to participating securities | — | 1.2 |
| (Loss) income from continuing operations attributable to common stockholders, after allocation of earnings to participating securities ⁽¹⁾ | (14.3 |) 176.2 |
| Loss from discontinued operations, net of income taxes | (9.1 |) (4.7 |
| Net (loss) income attributable to common stockholders, after allocation of earnings to participating securities ⁽¹⁾ | \$(23.4 |) \$171.5 |
| EPS denominator: | | |
| Weighted average shares outstanding — basic | 266.9 | 270.1 |
| Impact of dilutive securities | — | 0.8 |
| Weighted average shares outstanding — diluted | 266.9 | 270.9 |
| Basic EPS attributable to common stockholders: | | |
| (Loss) income from continuing operations | \$(0.05 |) \$0.65 |
| Loss from discontinued operations | (0.04 |) (0.02 |
| Net (loss) income | \$(0.09 |) \$0.63 |
| Diluted EPS attributable to common stockholders: | | |
| (Loss) income from continuing operations | \$(0.05 |) \$0.65 |
| Loss from discontinued operations | (0.04 |) (0.02 |
| Net (loss) income | \$(0.09 |) \$0.63 |

⁽¹⁾ The reallocation adjustment for participating securities to arrive at the numerator used to calculate diluted EPS was less than \$0.1 million for the three months ended March 31, 2012.

(14) Financial Instruments and Guarantees with Off-Balance Sheet Risk

In the normal course of business, the Company is a party to guarantees and financial instruments with off-balance-sheet risk, which are not reflected in the accompanying condensed consolidated balance sheets. Such financial instruments are valued based on the amount of exposure under the instrument and the likelihood of required performance. In the Company's past experience, virtually no claims have been made against these financial instruments. Management does not expect any material losses to result from these guarantees or off-balance-sheet instruments.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Financial Instruments with Off-Balance Sheet Risk

As of March 31, 2013, the Company had the following financial instruments with off-balance sheet risk:

| | Reclamation Obligations | Lease Obligations | Workers' Compensation Obligations | Other ⁽¹⁾ | Total |
|-------------------|----------------------------|----------------------|---|----------------------|-----------|
| | (Dollars in millions) | | | | |
| Self bonding | \$1,242.5 | \$— | \$— | \$— | \$1,242.5 |
| Surety bonds | 316.4 | 105.1 | 30.9 | 8.9 | 461.3 |
| Bank guarantees | 282.1 | — | — | 169.3 | 451.4 |
| Letters of credit | — | — | 32.6 | 79.7 | 112.3 |
| | \$1,841.0 | \$105.1 | \$63.5 | \$257.9 | \$2,267.5 |

Other includes the \$79.7 million in letters of credit described below and an additional \$178.2 million in bank ⁽¹⁾ guarantees and surety bonds related to collateral for surety companies, road maintenance, performance guarantees and other operations.

The Company owns a 37.5% interest in Dominion Terminal Associates, a partnership that operates a coal export terminal in Newport News, Virginia under a 30-year lease that permits the partnership to purchase the terminal at the end of the lease term for a nominal amount. The partners have severally (but not jointly) agreed to make payments under various agreements which in the aggregate provide the partnership with sufficient funds to pay rents and to cover the principal and interest payments on the floating-rate industrial revenue bonds issued by the Peninsula Ports Authority, and which are supported by letters of credit from a commercial bank. As of March 31, 2013, the Company's maximum reimbursement obligation to the commercial bank was in turn supported by four letters of credit totaling \$42.7 million.

The Company is party to an agreement with the PBGC and TXU Europe Limited, an affiliate of the Company's former parent corporation, under which the Company is required to make special contributions to two of the Company's defined benefit pension plans and to maintain a \$37.0 million letter of credit in favor of the PBGC. If the Company or the PBGC gives notice of an intent to terminate one or more of the covered pension plans in which liabilities are not fully funded, or if the Company fails to maintain the letter of credit, the PBGC may draw down on the letter of credit and use the proceeds to satisfy liabilities under the Employee Retirement Income Security Act of 1974, as amended. The PBGC, however, is required to first apply amounts received from a \$110.0 million guarantee in place from TXU Europe Limited in favor of the PBGC before it draws on the Company's letter of credit. On November 19, 2002, TXU Europe Limited was placed under the administration process in the U.K. (a process similar to bankruptcy proceedings in the U.S.) and continues under this process as of March 31, 2013. As a result of these proceedings, TXU Europe Limited may be liquidated or otherwise reorganized in such a way as to relieve it of its obligations under its guarantee.

Accounts Receivable Securitization

The Company has an accounts receivable securitization program (securitization program) with a maximum capacity of \$275.0 million through its wholly owned, bankruptcy-remote subsidiary (Seller). At March 31, 2013, the Company had \$195.3 million remaining capacity available under the securitization program, net of outstanding letters of credit and amounts drawn. Under the securitization program, the Company contributes trade receivables of most of the Company's U.S. subsidiaries on a revolving basis to the Seller, which then sells the receivables in their entirety to a consortium of unaffiliated asset-backed commercial paper conduits and banks (the Conduits). After the sale, the Company, as servicer of the assets, collects the receivables on behalf of the Conduits for a nominal servicing fee. The Company utilizes proceeds from the sale of its accounts receivable as an alternative to short-term borrowings under the revolving credit facility portion of the Company's Credit Facility, effectively managing its overall borrowing costs and providing an additional source of working capital. The securitization program was renewed in May 2013 and will

expire in April 2016.

27

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

The Seller is a separate legal entity whose assets are available first and foremost to satisfy the claims of its creditors. Of the receivables sold to the Conduits, a portion of the amount due to the Seller is deferred until the ultimate collection of the underlying receivables. During the three months ended March 31, 2013, the Company received total consideration of \$1,042.9 million related to accounts receivable sold under the securitization program, including \$624.5 million of cash up front from the sale of the receivables, an additional \$167.0 million of cash upon the collection of the underlying receivables and \$251.4 million that had not been collected at March 31, 2013 and was recorded at carrying value, which approximates fair value. The reduction in accounts receivable as a result of securitization activity with the Conduits was \$25.0 million at March 31, 2013 and December 31, 2012.

The securitization activity has been reflected in the unaudited condensed consolidated statements of cash flows as an operating activity because both the cash received from the Conduits upon sale of the receivables as well as the cash received from the Conduits upon the ultimate collection of the receivables are not subject to significantly different risks given the short-term nature of the Company's trade receivables. The Company recorded expense associated with securitization transactions of \$0.3 million and \$0.5 million for the three months ended March 31, 2013 and 2012, respectively.

Patriot Bankruptcy

On October 31, 2007, the Company spun-off companies that constituted portions of its former Eastern U.S. Mining operations business segment to form Patriot Coal Corporation (Patriot). The spin-off included eight company-operated mines, two majority-owned joint venture mines and numerous contractor-operated mines serviced by eight coal preparation facilities, along with 1.2 billion tons of proven and probable coal reserves. On July 9, 2012, Patriot and certain of its wholly owned subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the U.S. Code in the U.S. Bankruptcy Court for the Southern District of New York. The case was subsequently moved to the U.S. Bankruptcy Court for the Eastern District of Missouri.

The Company believes that its only material exposure to the bankruptcy of Patriot relates to up to \$150 million in possible federal and state black lung occupational disease liabilities. As Patriot noted in its Annual Report on Form 10-K for the year ended December 31, 2012, it has posted \$15 million in collateral with the U.S. Department of Labor (DOL) in exchange for the right to self-insure its liabilities under the Federal Coal Mine Health and Safety Act of 1969 (Black Lung Act). If Patriot is unable to meet its black lung liability obligations, the Company believes that the DOL will first look to this collateral for payment. The Black Lung Act allows the DOL to seek recovery from other potentially liable operators as well. The Company may be considered a potentially liable operator for purposes of the Black Lung Act with respect to the black lung liabilities of Patriot at the time of the spin-off.

See Note 15. "Commitments and Contingencies" to the unaudited condensed consolidated financial statements for a discussion of certain litigation related to the Patriot bankruptcy.

Other

The Company is the lessee under numerous equipment and property leases. It is common in such commercial lease transactions for the Company, as the lessee, to agree to indemnify the lessor for the value of the property or equipment leased, should the property be damaged or lost during the course of the Company's operations. The Company expects that losses with respect to leased property, if any, would be covered by insurance (subject to deductibles). The Company and certain of its subsidiaries have guaranteed other subsidiaries' performance under various lease obligations. Aside from indemnification of the lessor for the value of the property leased, the Company's maximum potential obligations under its leases are equal to the respective future minimum lease payments, and the Company assumes that no amounts could be recovered from third parties.

The Company has provided financial guarantees under certain long-term debt agreements entered into by its subsidiaries and substantially all of the Company's U.S. subsidiaries provide financial guarantees under long-term debt agreements entered into by the Company. The maximum amounts payable under the Company's debt agreements are

equal to the respective principal and interest payments.

(15) Commitments and Contingencies

Commitments

Unconditional Purchase Obligations

As of March 31, 2013, purchase commitments for capital expenditures were \$271.4 million, all of which is obligated within the next three years, with \$236.0 million obligated in the next 12 months.

There were no other material changes to the Company's commitments from the information provided in Note 24 to the consolidated financial statements in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

Contingencies

From time to time, the Company or its subsidiaries are involved in legal proceedings arising in the ordinary course of business or related to indemnities or historical operations. The Company believes it has recorded adequate reserves for these liabilities and that there is no individual case pending that is likely to have a material adverse effect on the Company's financial condition, results of operations or cash flows. The Company discusses its significant legal proceedings below.

Litigation Relating to Continuing Operations

Gulf Power Company. On June 22, 2006, Gulf Power Company (Gulf Power) filed a breach of contract lawsuit against a Company subsidiary in the U.S. District Court, Northern District of Florida, contesting the force majeure declaration by the Company's subsidiary under a coal supply agreement with Gulf Power and seeking damages for alleged past and future tonnage shortfalls of nearly 5 million tons under the agreement, which expired on December 31, 2007. On June 30, 2009, the court granted Gulf Power's motion for partial summary judgment on liability and denied the Company subsidiary's motion for summary judgment. On September 30, 2010, the court entered its order on damages, awarding Gulf Power zero dollars in damages and the Company subsidiary its costs to defend the lawsuit. On November 1, 2010, Gulf Power filed a motion to alter or amend the judgment, contesting the trial court's damages order, to which the Company subsidiary objected. The court entered an order on July 29, 2011 that affirmed its September 30, 2010 decision in all respects except for 2007 cover coal purchases and granted in part Gulf Power's motion to alter judgment with respect to 2007 cover coal purchases. On September 30, 2011, the court entered an order awarding Gulf Power damages in the amount of \$20.5 million for its 2007 cover coal purchases. On January 19, 2012, the court entered its order awarding Gulf Power prejudgment interest in the amount of \$6.9 million plus post-judgment interest. The Company's subsidiary appealed and oral arguments before the U.S. Court of Appeals for the Eleventh Circuit occurred on January 31, 2013. Based on the Company's evaluation of information currently available concerning the issues and their potential impact, the Company believes that its subsidiary will be successful in the liability appeals process and, therefore, no liability has been recorded at this time.

Monto Coal Pty Limited, Monto Coal 2 Pty Ltd Limited and Macarthur Coal Limited. In October 2007, a statement of claim was delivered to Monto Coal Pty Ltd, a wholly owned subsidiary of PEA-PCI, then Macarthur Coal Limited, and Monto Coal 2 Pty Ltd, an equity accounted investee, from the minority interest holders in the Monto Coal Joint Venture, alleging that Monto Coal 2 Pty Ltd breached the Monto Coal Joint Venture Agreement and Monto Coal Pty Ltd breached the Monto Coal Management Agreement. Monto Coal Pty Ltd is the manager of the Monto Coal Joint Venture pursuant to the Management Agreement. Monto Coal 2 Pty Ltd holds a 51% interest in the Monto Coal Joint Venture. The plaintiffs are Sanrus Pty Ltd, Edge Developments Pty Ltd and H&J Enterprises (Qld) Pty Ltd. An additional statement of claim was delivered to PEA-PCI in November 2010 from the same minority interest holders in the Monto Coal Joint Venture, alleging that PEA-PCI induced Monto Coal 2 Pty Ltd and Monto Coal Pty Ltd to breach the Monto Coal Joint Venture Agreement and the Monto Coal Management Agreement, respectively. These actions, which are pending before the Supreme Court of Queensland, Australia, seek damages from the three defendants collectively of no less than \$1,193.2 million Australian dollars, plus interest and costs. The defendants

dispute the claims and are vigorously defending their positions. Based on the Company's evaluation of the issues and their potential impact, the amount of any future loss cannot be reasonably estimated. However, based on current information, the Company believes these claims are likely to be finalized without a material adverse effect on its financial condition, results of operations or cash flows.

Sumiseki Materials Co Ltd. In 2010, the Class B shareholder (noncontrolling interest holder) in Wambo Coal Pty Ltd (Wambo), an Australian subsidiary of the Company, filed a lawsuit in the Supreme Court of New South Wales, Australia, against Wambo alleging the Class B shareholder was entitled to certain dividend payments from Wambo (subject to limited exceptions) and requested payment of those dividends for periods from 2009 to 2012.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

On March 25, 2013, the Supreme Court issued a judgment in favor of the plaintiff's position that the Class B shareholder was entitled to dividend payments (subject to limited exceptions), thus requiring Wambo to pay dividends to the Class B shareholder for the periods in question. The Supreme Court issued finalized orders on May 3, 2013, including the final calculation of amounts due for dividends during the periods from 2009 to 2012, which totaled \$32.2 million plus interest.

Wambo intends to appeal the Supreme Court's decision. The Company has until May 17, 2013 to post security for the judgment amount, the payment of which will be stayed until the outcome of the appeal is known. Based on the Company's evaluation of information currently available concerning the issues and their potential impact, the Company believes that its subsidiary should be successful in the appeals process, and therefore, continues to reflect \$34.3 million of previously allocated earnings to the noncontrolling interest as of March 31, 2013. If the Supreme Court's ruling is upheld, the Company believes the claims are likely to be finalized without a material adverse effect on its financial condition, results of operations or cash flows.

Claims and Litigation Relating to Indemnities or Historical Operations

Patriot Coal Corporation. On October 31, 2007, the Company spun off companies that constituted portions of its former Eastern U.S. Mining operations business segment to form Patriot Coal Corporation (Patriot). The spin-off included eight company-operated mines, two majority-owned joint venture mines and numerous contractor-operated mines serviced by eight coal preparation facilities, along with 1.2 billion tons of proven and probable coal reserves. On July 9, 2012, Patriot and certain of its wholly owned subsidiaries filed voluntary petitions for reorganization under Chapter 11 of the U.S. Code in the U.S. Bankruptcy Court for the Southern District of New York. The case was subsequently moved to the U.S. Bankruptcy Court for the Eastern District of Missouri.

On March 14, 2013, Patriot filed a motion in its bankruptcy proceeding seeking to reduce the benefits it provides to certain of its retirees pursuant to section 1114 of the Bankruptcy Code. At the same time, Patriot also filed a declaratory judgment complaint against the Company and one of its subsidiaries seeking a declaration that Section 1(d) of the NBCWA Liabilities Assumption Agreement will not apply to reduce the subsidiary's healthcare benefits funding obligations if Patriot successfully reduces, pursuant to section 1114 of the Bankruptcy Code, the benefits it is required to pay to certain of its retirees under existing collective bargaining agreements. On April 5, 2013, Patriot filed a motion for summary judgment with respect to the declaratory judgment complaint. On April 29, 2013, the Court heard both motions and took the matters under submission. The Company believes the relief that Patriot seeks is contrary to the language of the agreement and will vigorously defend against the complaint and the related motion for summary judgment.

On October 23, 2012, eight individual plaintiffs and the United Mine Workers of America filed a putative class action lawsuit in the U.S. District Court for the Southern District of West Virginia against the Company, one of its subsidiaries and an unrelated coal company. The lawsuit seeks to have the court obligate the defendants to maintain certain Patriot benefit plans at their current levels and to find the defendants' actions in violation of the Employee Retirement Income Security Act of 1974. On January 7, 2013, the Company defendants filed a motion to dismiss the complaint for failure to state a claim upon which relief can be granted. The plaintiffs thereafter amended their complaint to include new allegations and name two more individuals as plaintiffs. The Company defendants updated their motion to dismiss to respond to the new allegations and filed it on February 20, 2013. The Company believes the lawsuit is without merit and will vigorously defend against it.

Environmental Claims and Litigation

Claims Arising From Historical, Non-Coal Producing Operations. Gold Fields Mining, LLC (Gold Fields) is a dormant, non-coal producing entity that was previously managed and owned by Hanson plc, the Company's predecessor owner. In a February 1997 spin-off, Hanson plc transferred ownership of Gold Fields to the Company, despite the fact that Gold Fields had no ongoing operations and the Company had no prior involvement in its past

operations. Gold Fields is currently one of the Company's subsidiaries. The Company indemnified TXU Group with respect to certain claims relating to the historical operations of a former affiliate of Gold Fields.

Environmental claims for remediation, past costs, future costs, and/or natural resource damages have been asserted against Gold Fields related to historical activities of Gold Fields or a former affiliate. Gold Fields or the former affiliate has been named a potentially responsible party (PRP) at five national priority list sites based on the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLA claims were asserted at 13 additional sites, bringing the total to 18, which have since been reduced to 10 by completion of work, transfer or regulatory inactivity. The number of CERCLA sites in and of itself is not a relevant measure of liability because the nature and extent of environmental concerns and costs varies by site, as does the estimated share of responsibility relative to other PRPs for Gold Fields or the former affiliate.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Continued)

Undiscounted liabilities for environmental cleanup-related costs for all of the sites noted above were \$45.7 million as of March 31, 2013 and \$46.7 million as of December 31, 2012, \$9.6 million and \$10.6 million of which was reflected as a current liability, respectively. These amounts represent those costs that the Company believes are probable and reasonably estimable.

Significant uncertainty exists as to whether claims will be pursued against Gold Fields or the former affiliate in all cases, and where they are pursued, the amount of the eventual costs and liabilities, which could be greater or less than the liabilities recorded in the consolidated balance sheets. Based on the Company's evaluation of the issues and their potential impact, the total amount of any future loss cannot be reasonably estimated. However, based on current information, the Company believes these claims are likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

Native Village of Kivalina and City of Kivalina v. ExxonMobil Corporation, et al. In February 2008, the Native Village of Kivalina and the City of Kivalina filed a lawsuit in the U.S. District Court for the Northern District of California against the Company, several owners of electricity generating facilities and several oil companies. The plaintiffs are the governing bodies of a village in Alaska that they contend is being destroyed by erosion allegedly caused by global warming that the plaintiffs attribute to emissions of greenhouse gases by the defendants. The plaintiffs assert claims for nuisance, and allege that the defendants have acted in concert and are jointly and severally liable for the plaintiffs' damages. The suit seeks damages for lost property values and for the cost of relocating the village. The defendants filed motions to dismiss on the grounds of lack of personal and subject matter jurisdiction. In June 2009, the court granted defendants' motion to dismiss for lack of subject matter jurisdiction finding that plaintiffs' federal claim for nuisance is barred by the political question doctrine and for lack of standing. The plaintiffs appealed the court's dismissal to the U.S. Court of Appeals for the Ninth Circuit, which affirmed the dismissal on September 21, 2012. On October 4, 2012, the plaintiffs filed a Petition for Rehearing En Banc, which was denied. On February 25, 2013, the plaintiffs then filed a Petition for Certiorari with the U.S. Supreme Court, which has yet to decide whether to grant the petition.

Other

At times the Company becomes a party to other claims, lawsuits, arbitration proceedings and administrative procedures in the ordinary course of business in the U.S., Australia and other countries where the Company does business. For example, in June 2007, the New York Office of the Attorney General served a letter and subpoena on the Company, seeking information and documents relating to the Company's disclosure to investors of risks associated with possible climate change and related legislation and regulations. The Company believes it has made full and proper disclosure of these potential risks. In addition, in January 2013, the Securities and Exchange Commission (SEC) staff served a subpoena on the Company seeking information and documents relating to the development of Prairie State Energy Campus, a 1,600 megawatt coal-fueled electricity generation plant and adjacent coal mine in Illinois in which the Company owns a 5.06% undivided interest. The Company is cooperating with the SEC's investigation. Based on current information, the Company believes that such other pending or threatened proceedings are likely to be resolved without a material adverse effect on its financial condition, results of operations or cash flows.

(16) Segment Information

The Company reports its results of operations primarily through the following reportable segments: "Western U.S. Mining," "Midwestern U.S. Mining," "Australian Mining," "Trading and Brokerage" and "Corporate and Other." The Company's chief operating decision maker uses Adjusted EBITDA as the primary measure of segment profit and loss. The Company defines Adjusted EBITDA as (loss) income from continuing operations before deducting net interest expense, income taxes, asset retirement obligation expenses, depreciation, depletion and amortization, asset impairment and mine closure costs and amortization of basis difference associated with equity method investments.

Table of Contents

PEABODY ENERGY CORPORATION

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

Reportable segment results were as follows:

| | Three Months Ended March 31, | |
|------------------------|---------------------------------|-----------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Revenues: | | |
| Australian Mining | \$738.0 | \$854.1 |
| Western U.S. Mining | 640.1 | 761.0 |
| Midwestern U.S. Mining | 336.7 | 347.7 |
| Trading and Brokerage | 25.9 | 52.5 |
| Corporate and Other | 7.3 | 5.4 |
| Total | \$1,748.0 | \$2,020.7 |
| Adjusted EBITDA: | | |
| Australian Mining | \$100.4 | \$295.6 |
| Western U.S. Mining | 160.5 | 207.0 |
| Midwestern U.S. Mining | 112.3 | 109.2 |
| Trading and Brokerage | 16.0 | 28.1 |
| Corporate and Other | (109.1) | (128.4) |
| Total | \$280.1 | \$511.5 |

A reconciliation of Adjusted EBITDA to consolidated (loss) income from continuing operations, net of income taxes follows:

| | Three Months Ended March 31, | |
|---|---------------------------------|---------|
| | 2013 | 2012 |
| | (Dollars in millions) | |
| Total Adjusted EBITDA | \$280.1 | \$511.5 |
| Depreciation, depletion and amortization | 170.7 | 142.9 |
| Amortization of basis difference related to equity affiliates | 1.6 | 2.3 |
| Asset retirement obligation expenses | 19.0 | 15.0 |
| Interest expense | 101.3 | 102.0 |
| Interest income | (5.9) | (8.1) |
| Income tax provision | 3.7 | 74.4 |
| (Loss) income from continuing operations, net of income taxes | \$(10.3) | \$183.0 |

(17) Supplemental Guarantor/Non-Guarantor Financial Information

In accordance with the indentures governing the 7.375% Senior Notes due November 2016, the 6.00% Senior Notes due November 2018, the 6.50% Senior Notes due September 2020, the 6.25% Senior Notes due November 2021 and the 7.875% Senior Notes due November 2026 (collectively the Senior Notes), certain wholly owned U.S. subsidiaries of the Company have fully and unconditionally guaranteed the Senior Notes, on a joint and several basis. Separate financial statements and other disclosures concerning the Guarantor Subsidiaries are not presented because management believes that such information is not material to the holders of the Senior Notes. The following historical financial statement information is provided for the Guarantor/Non-Guarantor Subsidiaries.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Cautionary Notice Regarding Forward-Looking Statements

This report includes statements of our expectations, intentions, plans and beliefs that constitute "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934 and are intended to come within the safe harbor protection provided by those sections. These statements relate to future events or our future financial performance, including, without limitation, the section captioned "Outlook" in Management's Discussion and Analysis of Financial Condition and Results of Operations. We use words such as "anticipate," "believe," "expect," "may," "project," "should," "estimate" or "plan" or other similar words to forward-looking statements.

Without limiting the foregoing, all statements relating to our future operating results, anticipated capital expenditures, future cash flows and borrowings and sources of funding are forward-looking statements and speak only as of the date of this report. These forward-looking statements are based on numerous assumptions that we believe are reasonable, but are subject to a wide range of uncertainties and business risks and actual results may differ materially from those discussed in these statements. Among the factors that could cause actual results to differ materially are:

- global supply and demand for coal, including the seaborne thermal and metallurgical coal markets;
- price volatility, particularly in higher-margin products and in our trading and brokerage businesses;
- impact of alternative energy sources, including natural gas and renewables;
- global steel demand and the downstream impact on metallurgical coal prices;
- impact of weather and natural disasters on demand, production and transportation;
- reductions and/or deferrals of purchases by major customers and ability to renew sales contracts;
- credit and performance risks associated with customers, suppliers, contract miners, co-shippers and trading, banks and other financial counterparties;
- geologic, equipment, permitting, site access and operational risks related to mining;
- transportation availability, performance and costs;
- availability, timing of delivery and costs of key supplies, capital equipment or commodities such as diesel fuel, steel, explosives and tires;
- impact of take-or-pay arrangements for rail and port commitments for the delivery of coal;
- successful implementation of business strategies;
- negotiation of labor contracts, employee relations and workforce availability;
- changes in postretirement benefit and pension obligations and their related funding requirements;
- replacement and development of coal reserves;
- availability, access to and the related cost of capital and financial markets;
- effects of changes in interest rates and currency exchange rates (primarily the Australian dollar);
- effects of acquisitions or divestitures;
- economic strength and political stability of countries in which we have operations or serve customers;
- legislation, regulations and court decisions or other government actions, including, but not limited to, new
- environmental and mine safety requirements, changes in income tax regulations, sales-related royalties or other regulatory taxes and changes in derivatives laws and regulations;
- litigation, including claims not yet asserted;
- terrorist attacks or security threats;
- impacts of pandemic illnesses; and
- other factors, including those discussed in Part II, Item 1. "Legal Proceedings."

When considering these forward-looking statements, you should keep in mind the cautionary statements in this document and in our other Securities and Exchange Commission (SEC) filings, including the more detailed discussion of these factors and other factors that could affect our results contained in Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2012. These forward-looking statements speak only as of the date on which such statements were made, and we undertake no obligation to update these statements except as required by federal securities laws.

Table of Contents

When used in this filing, the term "ton" refers to short or net tons, equal to 2,000 pounds (907.18 kilograms), while "tonne" refers to metric tons, equal to 2,294.62 pounds (1,000 kilograms).

Overview

We are the world's largest private sector coal company. We own interests in 28 active coal mining operations located in the United States (U.S.) and Australia. We have a majority interest in 27 of those coal operations and a 50% equity interest in the Middlemount Mine in Australia. We also own a noncontrolling interest in a mining operation in Venezuela. In addition to our mining operations, we market and broker coal from other coal producers, both as principal and agent, and trade coal and freight-related contracts through trading and business offices in China, Australia, the United Kingdom, Germany, Singapore, India, Indonesia and the U.S.

In 2012, we produced and sold 225.7 million and 248.5 million tons of coal, respectively, from continuing operations. During that period, approximately 89% of our worldwide sales (by volume) were under long-term contracts. For the year ended December 31, 2012, 75% of our total sales (by volume) were to U.S. electricity generators, 23% were to customers outside the U.S. and 2% were to the U.S. industrial sector.

We conduct business through four principal operating segments: Western U.S. Mining, Midwestern U.S. Mining, Australian Mining and Trading and Brokerage. Our Western U.S. Mining segment consists of our Powder River Basin, Southwest and Colorado operations, while our Midwestern U.S. Mining segment consists of our operations in Illinois and Indiana.

The principal business of the Western and Midwestern U.S. Mining segments is the mining, preparation and sale of thermal coal. In the U.S., we typically supply thermal coal to domestic electricity generators and industrial customers for power generation under long-term contracts, with a portion sold into seaborne export markets.

The business of our Australian Mining segment is the mining of various qualities of metallurgical coal, as well as thermal coal. Our Australian Mining segment operations are primarily export focused with customers spread across several countries, while a portion of our coal is sold to Australian steel producers and power generators. Revenues from individual countries generally vary year by year based on demand for electricity and steel, global economic conditions and several other factors, including those specific to each country. Industry commercial practice, and our practice, is to negotiate pricing for metallurgical and seaborne thermal coal contracts on a quarterly and annual basis, respectively.

The principal business of our Trading and Brokerage segment is the marketing and brokering of coal for other producers, both as principal and agent, and the trading of coal and freight-related contracts. The segment also provides transportation-related services in support of our coal trading strategy and conducts hedging activities in support of sales from our mining operations.

Our fifth segment, Corporate and Other, includes mining and export/transportation joint ventures and activities associated with certain energy-related commercial matters, Btu Conversion, the optimization of our coal reserve and real estate holdings and the closure of inactive mining sites.

To maximize our coal assets and land holdings for long-term growth, we are pursuing Btu Conversion projects that would convert coal to natural gas (CTG) or transportation fuels (CTL) and advancing clean coal technologies, including carbon capture and storage (CCS).

Results of Operations

Non-U.S. GAAP Financial Measures

The following discussion of our results of operations includes references to and analysis of Adjusted EBITDA, Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS, which are financial measures not recognized in accordance with U.S. generally accepted accounting principles (GAAP). These financial measures are not intended to serve as alternatives to U.S. GAAP measures of performance and may not be comparable to similarly-titled measures presented by other companies.

Adjusted EBITDA is defined as (loss) income from continuing operations before deducting net interest expense, income taxes, asset retirement obligation expenses, depreciation, depletion and amortization, asset impairment and mine closure costs and amortization of basis difference associated with equity method investments. Adjusted EBITDA is used by management to measure our segments' operating performance and we believe it is a useful indicator of our ability to meet debt service and capital expenditure requirements.

Table of Contents

Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS are defined as (loss) income from continuing operations and diluted earnings per share from continuing operations (EPS), respectively, excluding the impacts of asset impairment and mine closure costs, net of tax, and the remeasurement of foreign income tax accounts on our income tax provision. The income tax benefits related to asset impairment and mine closure costs are calculated based on the enacted tax rate in the jurisdiction in which they have been or will be realized, adjusted for the estimated recoverability of those benefits. We have included Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS in our discussion because, in the opinion of management, excluding those foregoing items is useful in comparing our current results with those of prior periods. We also believe that excluding the impact of the remeasurement of our foreign income tax accounts represents a meaningful indicator of our ongoing effective tax rate. A reconciliation of Adjusted EBITDA to its most comparable measure under U.S. GAAP is included in Note 16. "Segment Information" of the accompanying unaudited condensed consolidated financial statements. Adjusted (Loss) Income from Continuing Operations and Adjusted Diluted EPS are reconciled to their most comparable measures under U.S. GAAP in the sections that follow.

Three Months Ended March 31, 2013 Compared to the Three Months Ended March 31, 2012

Summary

Global coal market conditions displayed indicators of improvement during the three months ended March 31, 2013, including higher coal consumption in the U.S. compared to the prior year and a sequential quarterly increase in international seaborne metallurgical coal settlement prices heading into the second quarter of 2013. However, those positive indicators were not reflected in our earnings for the three months ended March 31, 2013 due to the carryover effects of the challenged global coal market environment from 2012.

In international seaborne metallurgical coal markets, continued growth in global seaborne metallurgical coal demand throughout 2012 was outpaced by an increase in supply, lowering prices in those markets. Prices for quarterly contracts commencing in January 2013 for high quality hard coking coal (HQHCC) and low volatile pulverized coal injections (LV PCI) settled at approximately \$165 and \$124 per tonne, respectively, an approximate 30% decrease compared to price levels observed in the year-ago quarter. Global metallurgical coal demand continued its trend of growth during the three months ended March 31, 2013, corresponding with an approximate 2% increase in worldwide steel production during that period compared to the year-ago quarter according to data recently published by the World Steel Association (WSA). In its April 2013 Short Range Outlook, the WSA forecasted 3% year-over-year growth in worldwide steel production in 2013, reflecting an improvement from 2012 annual worldwide growth of approximately 1%. This uptick in demand has led to improved prices for quarterly contracts commencing April 2013 of \$172 and \$141 per tonne of HQHCC and LV PCI, respectively.

International seaborne thermal coal demand continued to grow in the three months ended March 31, 2013 compared to the prior year, led by imports into China, India and Europe. Nonetheless, those markets remain well-supplied and marginal production cuts in those markets have been slow as legacy-priced contracts expire. Accordingly, annual thermal contracts commencing in April 2013 for thermal coal exports out of Newcastle, Australia have been settled at approximately \$95 per tonne, a decline of approximately 17% compared to the prior year.

U.S. coal consumption increased 12% during the three months ended March 31, 2013 compared to the prior year, led by the electric power generation sector, according to data recently published by the U.S. Energy Information Administration (EIA), driven by a 25% year-over-year increase in heating-degree days during that period from a comparatively colder winter and a rise in the relative cost of natural gas. However, changes in our U.S. sales volumes in the three months ended March 31, 2013 compared to the prior year were not indicative of that increase as electric power generation customers continued to draw down on their coal stockpile inventories.

Given the foregoing factors, our revenues decreased during the three months ended March 31, 2013 compared to the prior year (\$272.7 million) from lower average realized pricing across our global platform and lower U.S. sales volumes, partially offset by an increase in Australian Mining segment tons sold due to the benefit of growth and development projects completed in the prior year.

Segment Adjusted EBITDA similarly decreased during the three months ended March 31, 2013 compared to the prior year, though by a lesser amount (\$250.7 million) as we began to realize the benefits of cost control initiatives implemented in the second half of 2012.

Table of Contents

Net results attributable to common stockholders decreased in the three months ended March 31, 2013 compared to the prior year (\$196.1 million), driven by lower Adjusted EBITDA and increases in depreciation, depletion and amortization and asset retirement obligation expenses resulting from higher Australian production and an overall increase in reclamation rates, partially offset by a lower income tax provision.

As of March 31, 2013, our available liquidity was approximately \$2.2 billion. Refer to the "Liquidity and Capital Resources" section contained within this Item 2 for further discussion of factors affecting our available liquidity.

Tons Sold

The following table presents tons sold by operating segment:

| | Three Months Ended | | Increase (Decrease) | | |
|------------------------|--------------------|------|---------------------|--------|----|
| | March 31, 2013 | 2012 | to Volumes | | |
| | (Tons in millions) | | Tons | % | |
| Australian Mining | 8.3 | 6.6 | 1.7 | 25.8 | % |
| Western U.S. Mining | 37.6 | 43.4 | (5.8) | (13.4) |)% |
| Midwestern U.S. Mining | 6.5 | 6.7 | (0.2) | (3.0) |)% |
| Trading and Brokerage | 4.8 | 4.7 | 0.1 | 2.1 | % |
| Total tons sold | 57.2 | 61.4 | (4.2) | (6.8) |)% |

Revenues

The following table presents revenues by operating segment:

| | Three Months Ended | | Increase (Decrease) | | |
|------------------------|-----------------------|-----------|---------------------|--------|----|
| | March 31, 2013 | 2012 | to Revenues | | |
| | (Dollars in millions) | | \$ | % | |
| Australian Mining | \$738.0 | \$854.1 | \$(116.1) | (13.6) |)% |
| Western U.S. Mining | 640.1 | 761.0 | (120.9) | (15.9) |)% |
| Midwestern U.S. Mining | 336.7 | 347.7 | (11.0) | (3.2) |)% |
| Trading and Brokerage | 25.9 | 52.5 | (26.6) | (50.7) |)% |
| Corporate and Other | 7.3 | 5.4 | 1.9 | 35.2 | % |
| Total revenues | \$1,748.0 | \$2,020.7 | \$(272.7) | (13.5) |)% |

Revenues from our Australian Mining segment decreased during the three months ended March 31, 2013 compared to the prior year driven primarily by the year-over-year decline in seaborne metallurgical and thermal coal settlement prices mentioned above (\$266.2 million). That unfavorable pricing variance was partially offset by the benefit of an increase in tons sold in the three months ended March 31, 2013 compared to the prior year (\$150.1 million) due to higher year-over-year production capacity resulting from growth and development capital projects that were completed in the second half of 2012. The impacts of increased production were partially offset by wet weather experienced at certain of our Queensland surface mines during the current year quarter and roof falls in February 2013 at our Metropolitan Mine. Metallurgical coal sales totaled 3.6 million and 2.9 million tons for the three months ended March 31, 2013 and 2012, respectively.

The decrease in Western U.S. Mining segment revenues for the three months ended March 31, 2013 compared to the prior year was driven mainly by a 13.4% decline in volumes (\$98.9 million). While demand for coal consumption by electric power generators in the U.S. improved in the three months ended March 31, 2013 compared to the year-ago quarter due to an increase in heating-degree days and an increase in coal's market share due to higher natural gas prices, volumes shipped were constrained by electric power generation customers continuing to work down coal inventories. Western U.S. Mining segment revenues in the three months ended March 31, 2013 were also negatively affected by lower realized prices compared to the year-ago quarter (\$22.0 million).

Midwestern U.S. Mining segment revenues decreased 3.2% during the three months ended March 31, 2013 compared to the prior year attributable to a modest decline in realized prices and volumes.
