NOTES TO SCHEDULE OF INVESTMENTS:

Security Valuation

Equity securities are valued at the last sale price at the close of the principal exchange on which they trade. Unlisted securities for which there were no sales during the day are valued at the closing bid price on such exchanges or over-the-counter markets.

Short-term debt obligations maturing in more than 60 days for which market quotations are readily available are valued at current market value. Short-term debt obligations maturing within 60 days are valued at amortized cost, which approximates market value.

Investments for which market quotations are not readily available are valued at fair value as determined in good faith under consistently applied procedures approved by and under the general supervision of the Board of Directors.

- (a) Non-income producing security.
