November 09, 2006

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

x QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2006

OR

o TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from to .

Commission File Number: 000-15637

SVB FINANCIAL GROUP

(Exact name of registrant as specified in its charter)

Delaware	**91-1962278**
(State or other jurisdiction of incorporation or organization)	(I.R.S. Employer Identification No.)
3003 Tasman Drive, Santa Clara, California	**95054-1191**
(Address of principal executive offices)	(Zip Code)

(408) 654-7400

(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes x No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act.

Large accelerated filer x Accelerated filer o Non-accelerated filer o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes o No x

At October 31, 2006, 34,317,570 shares of the registrant s common stock ($0.001 par value) were outstanding.

SVB FINANCIAL GROUP AND SUBSIDIARIES
NOTES TO INTERIM CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Description of Business

SVB Financial Group and its subsidiaries (which we refer to collectively as we , our or us in this Form 10-Q) offer clients financial products and services through four primary strategic business groups: Commercial Banking, SVB Capital, SVB Alliant, and Other Business Services. Our Other Business Services group includes SVB Global, SVB Private Client Services and certain other business service units (see Note 11. Segment Reporting).

SVB Financial Group, our parent company (which we refer to as SVB Financial Group or the Parent company) is a bank holding company and financial holding company whose principal subsidiary is Silicon Valley Bank (the Bank). The Bank is a California-chartered bank, founded in 1983, and headquartered in Santa Clara, California. We serve more than 11,000 clients worldwide through our 28 regional offices in the United States and four subsidiaries outside the United States. The Company has 13 offices throughout California and operates regional offices across the country in Arizona, Colorado, Georgia, Illinois, Massachusetts, Minnesota, New York, North Carolina, Oregon, Pennsylvania, Utah, Texas, Virginia, and Washington. SVB Financial Group also has four foreign subsidiaries, two in London, England, one in Bangalore, India and one in Shanghai, China.

Through our Commercial Banking business group, referred to as SVB Silicon Valley Bank, which includes the Bank and its subsidiaries, we serve clients in all stages of maturity ranging from emerging-growth companies to established, private and public companies in the technology, life science and premium wine industries. We define emerging-growth clients as companies in the start-up or early stages of their life cycles. These companies tend to be privately held and backed by venture capital; they generally have few employees, are primarily engaged in research and development, have brought relatively few products or services to market and have no or little revenue. By contrast, we define established or middle-market clients as companies that tend to be more mature. These companies may be publicly traded and are more established in the markets in which they participate. In 2006, we began using SVB Silicon Valley Bank to refer to our Commercial Banking activities.

SVB Capital focuses on the business needs of our private equity clients, with whom we have established and maintain relationships domestically and internationally. Through this segment, we provide banking services and financial solutions, including traditional deposit and checking accounts, loans, letters of credit and cash management services to private equity clients. SVB Capital also makes investments in private equity firms and in companies in the niches we serve. The group manages five private equity funds and oversees investments, including our investments in several sponsored limited partnerships. These limited partnerships include Gold Hill Venture Lending Partners 03, LP and its parallel funds, which primarily provide secured debt, typically to emerging-growth clients in their earliest stages; and the Partners for Growth funds, which are special situation debt funds that provide secured debt primarily to higher-risk, more established middle-market clients in their later stages.

SVB Alliant, our investment banking subsidiary, provides merger and acquisition advisory services, private placement advisory services, strategic alliance services, and specialized financial studies such as valuations and fairness opinions. SVB Alliant is a broker-dealer registered with the U.S. Securities and Exchange Commission (SEC) and a member of the National Association of Securities Dealers, Inc. (NASD). In 2005, we established SVB Alliant Europe Limited, a subsidiary of SVB Financial Group based in London, England, in order to provide investment advisory services to companies in Europe. SVB Alliant Europe Limited commenced full operations on May 2, 2006, when it received its license from the Financial Services Authority, an independent body that regulates the financial services industry in the United Kingdom.

Other Business Services includes SVB Global, SVB Private Client Services, SVB Analytics and other business service units that are not part of one of the three business groups described above. SVB Global includes three foreign subsidiaries, which facilitate our clients global expansion into major technology centers around the world. SVB Global provides a variety of services, including consulting and business services, referrals, and knowledge sharing, as well as identifying business opportunities for us. SVB Private Client Services provides a wide range of credit services to high-net-worth individuals using both long-term secured and short-term unsecured lines of credit. SVB Private Client Services helps our clients meet their cash management needs by providing deposit account products and services, including checking accounts, deposit accounts, money market accounts, and certificates of deposit. SVB Analytics, a new entity formed in 2006, provides solutions to address the valuation needs of private emerging-growth technology and life sciences companies. SVB Analytics includes eProsper, a company in which SVB Analytics acquired a controlling interest in August 2006, which provides equity ownership data management services.

2. Summary of Significant Accounting Policies

Basis of Presentation

The accompanying unaudited interim consolidated financial statements reflect all adjustments (of a normal and recurring nature) that are, in the opinion of management, necessary to fairly present our financial position; results of operations; and cash flows in accordance with accounting principles generally accepted in the United States of America (GAAP). Such interim financial statements have been prepared in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the SEC. Certain information and footnote disclosures normally included in financial statements prepared in accordance with GAAP have been condensed or omitted pursuant to such rules and regulations. The results of operations for the three and nine months ended September 30, 2006 are not necessarily indicative of results to be expected for any future periods. These interim consolidated financial statements should be read in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2005 (2005 Form 10-K).

The consolidated balance sheet at December 31, 2005 has been derived from the audited consolidated financial statements at that date, but does not include all of the information and footnotes required by GAAP for complete financial statements. The accompanying interim consolidated financial statements have been prepared on a consistent basis with the accounting policies described in Part II, Item 8. Consolidated Financial Statements and Supplementary Data - Note 2. Summary of Significant Accounting Policies presented in our Annual Report on Form 10-K for the year ended December 31, 2005.

The preparation of interim consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates.

Recent Accounting Pronouncements

In December of 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 123, Share-Based Payment (Revised 2004) (SFAS 123(R)). SFAS 123(R) requires us to measure all employee share-based compensation awards using a fair value based method, estimate award forfeitures, and record such expense in our consolidated statements of operations. SFAS 123(R) also requires the benefit of tax deductions in excess of recognized compensation cost to be reported in the statement of cash flows as a financing cash flow, rather than as an operating cash flow. SFAS 123(R) supersedes Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) and amends SFAS No. 95, Statement of Cash Flows. On January 1, 2006, we adopted SFAS 123(R) using the modified prospective method, one of the adoption methods permitted under SFAS 123(R) (see Note 4).

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments, an amendment of FASB Statements No. 133 and 140 (SFAS 155). Hybrid financial instruments are financial instruments that contain an embedded derivative within a single instrument. SFAS 155 gives entities an option to elect to record hybrid financial instruments at fair value as one financial instrument. Prior to this amendment, hybrid financial instruments were required to be separated into two instruments, a derivative and host, and generally only the derivative was recorded at fair value. SFAS 155 requires that beneficial interests in securitized assets be evaluated for derivatives, either freestanding or embedded. On October 25, 2006, the FASB provided a scope exception for securitized interests that (1) only contain an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets and (2) the investor does not control the right to accelerate the settlement. SFAS 155 is effective for all financial instruments acquired or issued after January 1, 2007. Additionally, SFAS 155 provides a one-time opportunity to apply the fair value election to hybrid financial instruments existing at the date of implementation at fair value as one financial instrument, with any difference between the carrying amount of the existing hybrid financial instruments and the fair value of the single financial instrument being recorded as a cumulative-effect adjustment to beginning retained earnings. We are currently assessing the impact of SFAS 155 on our consolidated financial position and results of operations.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets, an amendment of SFAS 140 (SFAS 156). SFAS 156 clarifies when an entity should separately recognize servicing assets and servicing liabilities when it undertakes an obligation to service a financial asset by entering into a servicing contract. SFAS 156 requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value and subsequently measured using either the amortization method as previously permitted under SFAS 140 or the fair value measurement method. Entities are permitted to make an election to subsequently re-measure classes of separately recognized servicing assets and liabilities. Once the fair value measurement method is elected for a class, the election should be applied prospectively to all new and existing separately recognized servicing assets and servicing liabilities within that class. The

effect of re-measuring an existing class of separately recognized servicing assets and servicing liabilities at fair value would be reported as a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. SFAS 156 is effective as of the beginning of an entity s first fiscal year that begins after September 15, 2006. Earlier adoption is permitted as of the beginning of an entity s fiscal year, provided the entity has not yet issued interim financial statements for that fiscal year. In the first quarter of 2006, we elected not to early adopt this Statement and, accordingly, will adopt it as of January 1, 2007.

In July 2006, the FASB issued FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48), to clarify the accounting for uncertain tax positions. FIN 48 prescribes that a two-step benefit recognition model be applied initially to recognize and measure the benefit amount of a tax position. The first step requires that a tax benefit be recognized only when the tax position is more-likely-than-not to be sustained based on the technical merits of the position. Assuming the first step is met, the second step requires that the benefit amount be measured at the largest amount that is at least more-likely-than-not likelihood to be the ultimate outcome based on a cumulative-probability approach. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the period in which the threshold is subsequently met, the tax matter is resolved or the statute of limitations for examining the tax position has expired. FIN 48 requires that a previously recognized tax benefit be de-recognized in the period it becomes more-likely-than-not that the tax position would not be sustained on audit. The impact of applying FIN 48 should be recognized as a cumulative-effect adjustment to beginning retained earnings at the adoption date. The Interpretation is effective for fiscal years beginning after December 15, 2006. We are currently assessing the impact of FIN 48 on our consolidated financial position and results of operations.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of SFAS 157 on our consolidated financial position and results of operations.

In September 2006, the SEC Staff Bulletin issued SAB 108 on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC Staff believes that companies should quantify errors using both a balance sheet and an income statement approach and evaluate whether either of these approaches results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 also describes the circumstances where it would be appropriate for a registrant to record a one-time cumulative effect adjustment to correct errors existing in prior years that previously had been considered immaterial as well as the required disclosures to investors. SAB 108 is effective for periods ending after November 15, 2006. We are currently assessing the impact of SAB 108 on our consolidated financial position and results of operations.

3. Earnings Per Share (EPS)

The following is a reconciliation of basic EPS to diluted EPS for the three and nine months ended September 30, 2006 and 2005:

	Three Months Ended September 30,			**Nine Months Ended September 30,**		
(Dollars and shares in thousands, except per share amounts)	**Net Income**	**Weighted-Average Shares**	**Per Share Amount**	**Net Income**	**Weighted-Average Shares**	**Per Share Amount**
2006:						
Basic EPS:						
Income available to common stockholders	$ 25,170	34,417	$ 0.73	$ 61,035	34,813	$ 1.75
Effect of dilutive securities:						
Stock options, restricted stock awards, restricted stock units and convertible debt		2,637			3,007	
Diluted EPS:						
Income available to common stockholders and assumed conversions	$ 25,170	37,054	$ 0.68	$ 61,035	37,820	$ 1.61
2005:						
Basic EPS:						
Income available to common stockholders	$ 23,059	34,838	$ 0.66	$ 66,891	35,179	$ 1.90
Effect of dilutive securities:						
Stock options, restricted stock awards, restricted stock units and convertible debt		3,617			3,390	
Diluted EPS:						
Income available to common stockholders and assumed conversions	$ 23,059	38,455	$ 0.60	$ 66,891	38,569	$ 1.73

9

For the three months ended September 30, 2006 and 2005, approximately 5.5 million and 4.5 million average potential common stock equivalents (including stock options, restricted stock and warrants), respectively, were excluded from the calculation, as they were anti-dilutive. For the nine months ended September 30, 2006 and 2005, approximately 5.3 million and 4.6 million average potential common stock equivalents (including stock options, restricted stock and warrants), respectively, were excluded from the calculation, as they were anti-dilutive.

In September 2004, the Emerging Issues Task Force (EITF) reached final consensus on EITF No. 04-8, *The Effect of Contingently Convertible Instruments on Diluted Earnings per Share* , that contingently convertible debt should be treated as convertible debt and included in the calculation of diluted EPS. The potential dilutive effect of our contingently convertible debt using the treasury stock method was approximately 1.1 million shares and 1.4 million shares for the three months ended September 30, 2006 and 2005, respectively, and 1.3 million shares and 1.2 million shares for the nine months ended September 30, 2006 and 2005, respectively. The assumed proceeds under the treasury stock method were calculated by subtracting the aggregate weighted-average conversion price from the average market price of the shares related to the contingently convertible debt. We included the dilutive effect of the $150.0 million zero-coupon, convertible subordinated notes (see Note 8. Borrowings) in our diluted EPS calculation using the treasury stock method, in accordance with the provisions of EITF No. 90-19, *Convertible Bonds With Issuer Option to Settle in Cash Upon Conversion* and SFAS No. 128, *Earnings Per Share* .

4. Share-Based Compensation

Impact of Adopting SFAS 123(R)

Prior to January 1, 2006, we accounted for employee stock-based compensation using the intrinsic value method supplemented by pro forma disclosures in accordance with APB 25 and SFAS 123, Accounting for Stock-Based Compensation. as amended by SFAS No. 148 Accounting for Stock-Based Compensation Transition and Disclosures. Under the intrinsic value method, stock options granted with exercise prices equal to the grant date fair value of our stock have no intrinsic value and therefore no expense was actually recorded for these options under APB 25. For pro forma disclosure only, we measured the fair value of our stock options using the Black-Scholes option-pricing model and expensed the value over the corresponding service period using the straight-line amortization approach. Equity-based awards for which stock-based compensation expense was actually recorded were generally grants of restricted stock awards and restricted stock units which were measured at fair value on the date of grant based on the number of shares granted and the quoted price of our common stock. Such value was then recognized as an expense over the corresponding service period using an accelerated amortization approach in accordance with FASB Interpretation No. 28 Accounting for Stock Appreciation Rights and Other Variable Stock Option or Award Plans.

Effective January 1, 2006, we adopted SFAS 123(R) using the modified prospective transition method and accordingly prior periods have not been restated to reflect the impact of SFAS 123(R). Under SFAS 123(R), stock-based awards that were granted prior to January 1, 2006 are being expensed over the remaining portion of their vesting period under the same amortization method and, for stock options, using the same fair value measurements which were used in calculating pro forma stock-based compensation expense under SFAS 123. Under SFAS 123(R), the fair value of stock options are being measured using the Black-Scholes option-pricing model while the fair value for restricted stock awards and restricted stock units are based on the quoted price of our common stock on the date of grant. For all stock-based awards granted on or after January 1, 2006, stock-based compensation expense is being amortized on a straight-line basis over the requisite service period. SFAS 123(R) requires that the deferred stock-based compensation on the consolidated balance sheet on the date of adoption be netted against additional paid-in capital. As of December 31, 2005, there was a balance of $5.8 million of deferred stock-based compensation that was netted against additional paid-in capital on January 1, 2006.

For the three and nine months ended September 30, 2006, we recorded share-based compensation expense of $5.2 million and $16.8 million, respectively, resulting in the recognition of $1.1 million and $3.6 million, respectively, in related tax benefits. For the three and nine months ended September 30, 2005, we recognized $2.0 million and $5.5 million, respectively, of share-based compensation expense under the intrinsic value method of APB 25, resulting in the recognition of $0.8 million and $2.2 million, respectively, in related tax benefits. As a result of adopting SFAS 123(R) on January 1, 2006, our income before income taxes and our net income for the nine months ended September 30, 2006 was $12.4 million and $10.7 million lower, respectively, than if we had continued to account for share-based compensation under APB 25. Basic

and diluted earnings per share for the nine months ended September 30, 2006 were $0.31 and $0.28 lower, respectively, than if we had continued to account for share-based compensation under APB 25.

SFAS 123(R) requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from initial estimates. Stock-based compensation expense was recorded net of estimated forfeitures for the nine months ended September 30, 2006 such that expense was recorded only for those stock-based awards that are expected to vest. Previously under APB 25 to the extent awards were forfeited prior to vesting, the corresponding previously recognized expense was reversed in the period of forfeiture. Upon adoption of FAS 123(R) as of January 1, 2006, we recorded a cumulative adjustment of $0.2 million to account for the expected forfeitures of restricted stock awards and restricted stock units granted prior to January 1, 2006, for which we previously recorded an expense.

Equity Incentive Plans

On May 11, 2006, shareholders approved the 2006 Equity Incentive Plan (the 2006 Incentive Plan). Our existing 1997 Equity Incentive Plan was set to expire in December 2006. The 2006 Incentive Plan provides for the grant of the following types of incentive awards: (i) stock options, (ii) stock appreciation rights, (iii) restricted stock, (iv) restricted stock units, (v) performance shares and performance units, and (vi) other stock awards.

Subject to the provisions of Section 14 of the 2006 Incentive Plan, the maximum aggregate number of shares that may be awarded and sold there under is 3,000,000 shares plus 1,488,361 shares comprising (i) any shares that have been reserved but not issued under our 1997 Equity Incentive Plan as of May 11, 2006, (ii) any shares subject to stock options or similar awards granted under the 1997 Equity Incentive Plan that expire or otherwise terminate without having been exercised in full and shares issued pursuant to awards granted under the 1997 Equity Incentive Plan that are forfeited to or repurchased by us. No further awards will be made under the 1997 Equity Incentive Plan, but it will continue to govern awards previously granted there under.

Restricted stock awards and restricted stock units will be counted against the numerical limits of the 2006 Incentive Plan as two shares for every one share subject thereto. Further, if shares acquired pursuant to any such award are forfeited or repurchased by us and would otherwise return to the 2006 Incentive Plan pursuant to the terms thereof, two times the number of shares so forfeited or repurchased will return to the 2006 Incentive Plan and will again become available for issuance.

Eligible participants in the 2006 Incentive Plan include directors, employees, and consultants. Options granted under the 2006 Incentive Plan generally expire 7 years after the grant date. Options generally become exercisable over various periods, typically 4 years, from date of grant based on continued employment, and typically vest annually. Restricted stock awards generally vest over the passage of time and require continued employment through the vesting period. Restricted stock units generally vest upon meeting certain performance-based objectives, with the passage of time, or a combination of both, and require continued employment through the vesting period. The vesting period for restricted stock units cannot be less than three years unless they are subject to certain performance-based objectives, in which case the vesting period can be 12 months or longer.

Employee Stock Purchase Plan

We maintain an employee stock purchase plan (ESPP) under which participating employees may annually contribute up to 10% of their gross compensation to purchase shares of our common stock at 85% of its fair market value at either the beginning or end of each six-month offering period, whichever price is less. All employees are eligible to participate in the ESPP on the first day of hire. To be eligible, an employee must, among other requirements, be age 18 or above and complete at least one hour of service as an employee of us or any of our affiliates. There were 71,036 shares issued under the ESPP for the nine months ended September 30, 2006. At September 30, 2006, a total of 915,577 shares of our common stock were still available for future issuance under the ESPP. The next purchase will be on December 29, 2006 at the end of the current six-month offering period. Effective January 1, 2006, we began recognizing compensation expense associated with the ESPP in accordance with SFAS 123(R).

Pro forma Information for Periods Prior to the Adoption of SFAS No. 123(R)

Prior to the adoption of SFAS No. 123(R), we provided the pro forma disclosures required under SFAS No. 123, as amended by SFAS No. 148, *Accounting for Stock-Based Compensation Transition and Disclosures* . Previously reported amounts have not been restated.

(Dollars in thousands, except per share amounts)	Three Months Ended September 30, 2005	Nine Months Ended September 30, 2005
Net income, as reported	$ 23,059	$ 66,891
Add: Stock-based compensation expense, net of tax reported in net income	1,235	3,154
Less: Total stock-based employee compensation expense determined under fair value based method, net of tax	(5,472)	(16,381)
Net income, pro forma	$ 18,822	$ 53,664
Earnings per common share basic:		
As reported	$ 0.66	$ 1.90
Pro forma	0.54	1.53
Earnings per diluted share diluted:		
As reported	$ 0.60	$ 1.73
Pro forma	0.50	1.43

Unrecognized Compensation Expense

As of September 30, 2006, unrecognized share-based compensation expense is as follows:

	As of September 30, 2006	
(Dollars in thousands)	Unrecognized Expense	Average Expected Recognition Period in Years
Stock option awards	$ 17,934	1.16
Restricted stock awards	931	0.78
Restricted stock units	5,963	2.29
Employee stock purchase plan	64	0.25
Total unrecognized share-based compensation expense	$ 24,892	

Valuation Assumptions

As of September 30, 2006 and 2005, the fair values of share-based awards for employee stock options and employee stock purchases made under our ESPP were estimated using the Black-Scholes option pricing model. The fair values of restricted stock awards and restricted stock units were based on our closing quoted market price on date of grant. The following weighted-average assumptions were used:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2006	2005	2006	2005
Equity Incentive Plan Awards				
Expected term of options in years	5.2	5.1	5.3	5.1
Expected volatility of the Company s underlying common stock	30.4 %	34.7 %	29.5	37.1 %
Risk-free interest rate	4.66 %	3.98 %	4.78 %	4.05 %
Expected dividend yield	%	%	%	%
Weighted-average grant date fair value-stock options	$ 16.43	$ 18.68	$ 18.57	$ 17.61
Weighted-average grant date fair value-restricted stock awards and restricted stock units	$ 45.27	$ 49.64	$ 50.97	$ 45.12
ESPP				
Expected term in years	0.5	0.5	0.5	0.5
Expected volatility of the Company s underlying common stock	19.7%	19.7 %	21.3 %	22.7 %

Risk-free interest rate	5.24		%	3.38		%	4.76		%	2.94	%
Expected dividend yield			%			%			%		%
Weighted-average fair value	$	9.84		$	10.18		$	10.07		$ 10.08	

The expected term was based on the implied term of the stock options using a lattice option-pricing model with early exercise factors based on historic employee exercise behavior. The expected volatilities for the 2006 Incentive Plan for the three and nine months ended September 30, 2006 and September 30, 2005 were calculated using a blended rate consisting of equal measures of our historic volatility and our expected volatility over a five-year term. The expected volatilities for the ESPP for the three and nine months ended September 30, 2006 and September 30, 2005 are equal to the historical volatility for the previous six-month periods. The expected risk-free interest rates for all periods were based on the yields of U.S. Treasury Securities, as reported by the Federal Reserve Bank of New York, with maturities equal to the expected terms of the employee stock options.

Share-Based Payment Award Activity

The table below provides stock option information related to the 1989 Stock Option Plan, the 1997 Equity Incentive Plan and the 2006 Equity Incentive Plan for the three and nine months ended September 30, 2006:

	Three Months Ended September 30, 2006		Nine Months Ended September 30, 2006	
	Shares	Weighted-Average Exercise Price	Shares	Weighted-Average Exercise Price
Outstanding at beginning of period	5,086,451	$ 31.06	6,023,080	$ 28.87
Granted	18,250	45.27	333,097	51.48
Exercised	(120,753)	25.00	(1,167,199)	23.90
Forfeited	(33,218)	36.51	(236,543)	35.76
Expired	(6,057)	37.54	(7,762)	38.21
Outstanding at September 30, 2006	4,944,673	$ 31.22	4,944,673	$ 31.22
Exercisable at September 30, 2006	3,239,604	$ 27.30	3,239,604	$ 27.30

	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Life in Years	Aggregate Intrinsic Value of In-The-Money Options ($)
Outstanding at September 30, 2006	4,944,673	$ 31.22	4.27	$ 69,188,603
Exercisable at September 30, 2006	3,239,604	$ 27.30	4.10	$ 56,609,829

The aggregate intrinsic value of outstanding options shown in the table above represents the pretax intrinsic value as of September 30, 2006. This value is based on our closing stock price of $44.64 as of September 30, 2006. The total intrinsic value of options exercised during the three and nine months ended September 30, 2006 was $2.4 million and $30.5 million, respectively, and the total intrinsic value of options exercised during the three and nine months ended September 30, 2005 was $3.1 million and $15.8 million, respectively. The total fair value of option grants that vested during the three and nine months ended September 30, 2006 was $2.4 million and $20.6 million, respectively, and the total fair value of option grants that vested during the three and nine months ended September 30, 2005 was $2.7 million and $22.9 million, respectively. Cash received from stock option exercises was $3.0 million and $27.2 million during the three and nine months ended September 30, 2006, respectively, and cash received from stock option exercises was $2.7 million and $14.7 million during the three and nine months ended September 30, 2005, respectively. The tax benefit realized from stock options exercised was $0.7 million and $10.1 million for the three and nine months ended September 30, 2006, respectively, and the tax benefit realized from stock options exercised was $1.3 million and $7.0 million for the three and nine months ended September 30, 2005, respectively.

The following table summarizes information regarding stock options outstanding as of September 30, 2006:

		Outstanding Options			Vested Options	
Ranges of Exercise Prices		**Shares**	**Weighted-Average Remaining Contractual Life in Years**	**Weighted-Average Exercise Price**	**Shares**	**Weighted-Average Exercise Price**
$ 8.25	$ 17.07	617,334	3.65	$ 13.75	522,755	13.22
17.20	23.69	505,860	4.73	22.36	484,710	22.51
23.90	25.17	496,190	2.14	25.04	363,459	25.02
25.29	26.40	513,070	4.81	26.06	511,133	26.07
26.66	31.29	508,865	5.20	30.94	490,991	30.99
31.40	35.26	575,650	2.37	34.94	300,756	34.71
35.54	36.46	495,864	4.45	35.60	241,877	35.61
36.56	43.49	671,163	5.10	40.86	210,636	40.08
43.62	53.29	555,177	5.92	49.61	113,287	48.39
53.30	53.30	5,500	6.51	53.30		
$ 8.25	$ 53.30	4,944,673	4.27	$ 31.22	3,239,604	$ 27.30

We expect to satisfy the exercise of stock options and future grants of restricted stock by issuing new shares registered under the 2006 Incentive Plan. At September 30, 2006, 4,391,611 shares were available for future issuance under the 2006 Incentive Plan.

The table below provides information for restricted stock awards and restricted stock units related to the 1989 Stock Option Plan, 1997 Plan and 2006 Incentive Plan for the three and nine months ended September 30, 2006:

	Three Months Ended September 30, 2006		Nine Months Ended September 30, 2006	
	Shares	**Weighted-Average Grant Date Fair Value**	**Shares**	**Weighted-Average Grant Date Fair Value**
Nonvested at beginning of period	321,729	$ 44.28	253,848	$ 42.12
Granted	5,250	45.27	153,341	50.97
Vested	(3,729)	45.10	(65,378)	52.93
Forfeited	(2,099)	47.94	(20,660)	45.74
Nonvested at September 30, 2006	321,151	$ 44.26	321,151	$ 43.91

The total fair value of restricted stock grants that vested during the three and nine months ended September 30, 2006 was $0.2 million and $3.5 million, respectively, and the total fair value of restricted stock grants that vested during the three and nine months ended September 30, 2005 was $0.1 million and $3.1 million, respectively.

5. Investment Securities

Federal Funds Sold, Securities Purchased under Agreement to Resell and Other Short-Term Investments

Federal funds sold, securities purchased under agreement to resell and other short-term investment securities as reported in the interim consolidated balance sheets include interest-bearing deposits in other financial institutions of $27.1 million and $34.7 million at September 30, 2006 and December 31, 2005, respectively.

The detailed composition of our investment securities as of September 30, 2006 and December 31, 2005 is presented as follows:

(Dollars in thousands)	September 30, 2006	December 31, 2005
Available-for-sale securities, at fair value	$ 1,501,632	$ 1,850,655
Non-marketable securities (investment company fair value accounting):		
Venture capital fund investments (1)	111,686	81,280
Other private equity investments (2)	32,477	26,782
Other investments (3)	15,116	25,300
Non-marketable securities (equity method accounting):		
Other investments (4)	15,584	10,985
Low income housing tax credit funds	18,260	11,682
Non-marketable securities (cost method accounting):		
Fund investments	27,683	26,924
Other private equity investments	4,061	3,662
Total investment securities	$ 1,726,499	$ 2,037,270

(1) Includes $62.2 million and $58.7 million related to SVB Strategic Investors Fund, LP at September 30, 2006 and December 31, 2005, respectively. We have a controlling ownership interest of 12.6% in the fund. Also includes $40.3 million and $22.1 million related to SVB Strategic Investors Fund II, LP, at September 30, 2006 and December 31, 2005, respectively. We have a controlling interest of 8.6% in the fund. Additionally, it includes $9.2 million and $0.5 million related to SVB Strategic Investors Fund III, LP at September 30, 2006 and December 31, 2005, respectively. Currently, we have a controlling interest of 11.7% in the fund. As of December 31, 2005, we had a controlling interest of 100.0% in the fund.

(2) Includes $29.9 million and $26.8 million related to Silicon Valley BancVentures, LP at September 30, 2006 and December 31, 2005, respectively. We have a controlling ownership interest of 10.7% in the fund. Additionally, includes $2.6 million related to SVB Capital Partners II, LP as of September 30, 2006. We have a direct ownership interest of 0.5% and indirect ownership interest of 8.5% in the fund through our ownership of SVB Strategic Investors Fund II, LP.

(3) Represents $15.1 million and $25.3 million related to Partners for Growth, LP at September 30, 2006 and December 31, 2005, respectively. We have a majority ownership interest of approximately 50.01% in the fund.

(4) Includes $6.9 million and $5.6 million related to Gold Hill Venture Lending Partners 03, LLC, the general partner of Gold Hill Venture Lending 03, LP and its parallel funds, as of September 30, 2006 and December 31, 2005, respectively. We have a majority interest of 90.7% in Gold Hill Venture Lending Partners 03, LLC. We have an indirect ownership interest of 4.5% in Gold Hill Venture Lending 03, LP and its parallel funds through Gold Hill Venture Lending Partners 03, LLC. It also includes $6.5 million and $5.4 million related to our direct investment in Gold Hill Venture Lending Partners 03, LP, as of September 30, 2006 and December 31, 2005, respectively. We have a direct ownership interest of 4.8% in the fund. Additionally, it includes $2.2 million to Partners for Growth II, LP as of September 30, 2006. We have an ownership interest of 24.2% in the fund.

The following table breaks out our unrealized losses on our available-for-sale investment securities portfolio into categories of less than 12 months, or 12 months or longer as of September 30, 2006:

	September 30, 2006					
	Less than twelve months		**Twelve months or longer**		**Total**	
(Dollars in thousands)	**Fair Value of Investments**	**Unrealized Losses**	**Fair Value of Investments (1)**	**Unrealized Losses (1)**	**Fair Value of Investments**	**Unrealized Losses**
U.S. Treasury securities	$	$	$ 9,900	$ (81)	$ 9,900	$ (81)
U.S. agencies and corporations:						
Collateralized mortgage obligations	54,753	(501)	590,685	(14,936)	645,438	(15,437)
Mortgage-backed securities	25,465	(190)	399,572	(12,703)	425,037	(12,893)
Discount notes and bonds	29,531	(467)	210,579	(4,414)	240,110	(4,881)
Asset-backed securities			486	(1)	486	(1)
Commercial mortgage-backed securities			69,408	(1,766)	69,408	(1,766)
Total temporarily impaired securities	$ 109,749	$ (1,158)	$ 1,280,630	$ (33,901)	$ 1,390,379	$ (35,059)

---

(1) As of September 30, 2006, we identified 136 investments totaling $1,280.6 million with unrealized losses of $33.9 million whose fair value has been less than their adjusted cost for a period of time greater than twelve months. A U.S. Treasury note totaling $9.9 million with an unrealized loss of $81 thousand was purchased in July 2005. Securities classified as collateralized mortgage obligations totaling $590.7 million with unrealized losses of $14.9 million were originally purchased between July 1998 and September 2005. Securities classified as mortgage-backed securities totaling $399.6 million with unrealized losses of $12.7 million were originally purchased between June 2003 and April 2004. Securities classified as discount notes and bonds totaling $210.6 million with unrealized losses of $4.4 million were originally purchased between February 2003 and January 2005. An asset-backed security totaling $0.5 million with an unrealized loss of $1 thousand was originally purchased in October 2002. Securities classified as commercial mortgage-backed securities totaling $69.4 million with unrealized losses of $1.8 million were originally purchased between April 2005 and July 2005. All investments with unrealized losses for a period of time greater than twelve months are either rated triple A by Moody s or S&P or are issued by the U.S. Treasury or a government sponsored enterprise. Because these securities are of superior credit quality, the unrealized losses are due solely to increases in market interest rates and we expect to recover the impairment prior to or at maturity, we deem these impairments to be temporary. We have the intent and ability to hold the securities until the market value recovers or until maturity. Market valuations and impairment analyses on assets in the investment portfolio are reviewed and monitored on an ongoing basis.

The following table presents the components of gains and losses on investment securities, for the three and nine months ended September 30, 2006 and 2005.

(Dollars in thousands)	Three Months Ended September 30, 2006	2005	Nine Months Ended September 30, 2006	2005
Gross gains on investment securities:				
Available-for-sale securities, at fair value	$ 3,692	$ 173	$ 7,042	$ 173
Marketable securities (investment company fair value accounting)		1,602		1,602
Non-marketable securities (investment company fair value accounting):				
Private equity fund investments.	2,161	2,219	9,341	7,121
Other private equity investments	588	6	974	973
Other investments			1,170	
Non-marketable securities (equity method accounting)	332		852	
Non-marketable securities (cost method accounting):				
Private equity fund investments	103	289	465	816
Other private equity investments	11		120	171
Total gross gains on investment securities	6,887	4,289	19,964	10,856
Gross losses on investment securities:				
Available-for-sale securities, at fair value			(3,230)	(2,274)
Non-marketable securities (investment company fair value accounting):				
Private equity fund investments	(3,438)	(1,450)	(7,294)	(2,903)
Other private equity investments		(479)	(475)	(530)
Other investments	(1,166)	(425)	(1,166)	(425)
Non-marketable securities (equity method accounting)	(157)		(918)	
Non-marketable securities (cost method accounting):				
Private equity fund investments	(481)	(634)	(1,172)	(3,379)
Other private equity investments			(45)	(473)
Total gross losses on investment securities	(5,242)	(2,988)	(14,300)	(9,984)
Net gains on investment securities	$ 1,645	$ 1,301	$ 5,664	$ 872

6. Loans and Allowance for Loan Losses

The detailed composition of loans, net of unearned income of $21.3 million and $20.6 million, as of September 30, 2006 and December 31, 2005, respectively, are presented in the following table:

(Dollars in thousands)	September 30, 2006	December 31, 2005
Commercial loans	$ 2,817,077	$ 2,410,893
Vineyard development	118,540	104,881
Commercial real estate	2,906	20,657
Total real estate construction	121,446	125,538
Real estate term consumer	64,030	39,906
Real estate term commercial	29,624	10,694
Total real estate term	93,654	50,600
Consumer and other	287,338	256,322
Total loans, net of unearned income	$ 3,319,515	$ 2,843,353

17

The activity in the allowance for loan losses for the three and nine months ended September 30, 2006 and 2005 were as follows:

(Dollars in thousands)	Three Months Ended September 30, 2006	2005	Nine Months Ended September 30, 2006	2005
Beginning balance	$ 37,907	$ 36,372	$ 36,785	$ 37,613
Provision for (recovery of) loan losses	2,767	1,427	4,895	(1,573)
Loans charged off	(3,216)	(4,437)	(10,427)	(10,507)
Recoveries	2,091	1,501	8,296	9,330
Ending balance	$ 39,549	$ 34,863	$ 39,549	$ 34,863

The aggregate recorded investment in loans for which impairment has been determined in accordance with SFAS No. 114 totaled $9.3 million and $6.5 million at September 30, 2006 and December 31, 2005, respectively. Allocations of the allowance for loan losses specific to impaired loans totaled $7.0 thousand at September 30, 2006, and $0.0 thousand at December 31, 2005. Average impaired loans for the three months ended September 30, 2006 and 2005 totaled $8.9 million and $14.5 million, respectively. Average impaired loans for the nine months ended September 30, 2006 and 2005 totaled $6.9 million and $14.4 million, respectively.

7. Goodwill

The goodwill balance at September 30, 2006 and December 31, 2005 was $21.2 million and $35.6 million, respectively. Goodwill resulted from the acquisition of SVB Alliant, our investment banking subsidiary, and eProsper, our equity ownership data management services company. During the third quarter of 2006, we acquired a 65% ownership stake in eProsper through our wholly owned subsidiary, SVB Analytics. eProsper provides corporate equity administration services, including capitalization table data management to private companies. As a result of the acquisition, we recorded $4.0 million of goodwill.

SFAS No. 142, Goodwill and Other Intangible Assets, requires that we evaluate on an annual basis (or whenever events occur which may indicate possible impairment) whether any portion of our recorded goodwill is impaired. We performed this analysis at the reporting unit level as defined in SFAS No. 142. As discussed in our Annual Report on Form 10-K for the fiscal year ended December 31, 2005, this analysis requires management to make a series of critical assumptions to (1) evaluate whether any impairment exists, and (2) measure the amount of impairment. As part of this analysis, SFAS No. 142 requires that we estimate the fair value of our reporting units and compare it with their carrying value. If the estimated fair value of a reporting unit is less than the carrying value, then impairment is deemed to have occurred.

We conducted our annual valuation analysis of the SVB Alliant reporting unit during the second quarter of 2006. We concluded at that time that we had an impairment of goodwill based on forecasted discounted net cash flows for that reporting unit. As required by SFAS No. 142, in measuring the amount of goodwill impairment, we made a hypothetical allocation of the reporting unit s estimated fair value to the tangible and intangible assets (other than goodwill) of the reporting unit. Based on this allocation, we concluded that $18.4 million of the related goodwill was impaired and was required to be expensed as a non-cash charge to continuing operations during the second quarter of 2006. Thus, the goodwill balance related to SVB Alliant was reduced from $35.6 million at December 31, 2005 to $17.2 million at June 30, 2006.

8. Borrowings

The following table represents outstanding borrowings at September 30, 2006 and December 31, 2005:

(Dollars in thousands)	Maturity	September 30, 2006	December 31, 2005
Federal funds purchased	Overnight	$ 330,000	$ 205,000
FHLB advances	One Month or Less	135,000	
Securities sold under agreement to repurchase	Less than One Month	344,767	74,464
Total federal funds purchased, FHLB advances and securities sold under agreement to repurchase		$ 809,767	$ 279,464
Contingently convertible debt	June 15, 2008	$ 148,215	$ 147,604
Junior subordinated debentures	October 15, 2033	51,201	48,228
8.0% Long-term note payable (1)	November 30, 2009	2,669	
Other borrowings	Overdraft	$	$ 11

18

(1) Debt assumed in relation to the acquisition of a 65% interest in eProsper during the third quarter of 2006.

Interest expense related to borrowings was $8.3 million and $1.8 million for the three months ended September 30, 2006 and 2005, respectively, and $16.5 and $3.5 million for the nine months ended September 30, 2006 and 2005, respectively.

Contingently Convertible Debt

The fair value of the convertible debt at September 30, 2006 was $197.8 million, based on quoted market prices. We intend to settle the outstanding principal amount in cash. Based on the terms of the notes, if, at any time before September 15, 2007, the per share stock price on the last trading day of the immediately preceding fiscal quarter was 110% or more of the conversion price, the notes would become convertible. The per share closing price of $45.46 of our common stock on June 30, 2006, was 135.2% of the conversion price of $33.63. Accordingly, during the third quarter of 2006, our note holders held the right, at their option, to convert their notes, in whole or in part, subject to certain limitations, at the conversion price of $33.63. We received conversion notices relating to the notes in an aggregate principal amount of $7.0 thousand during the third quarter of 2006, increasing the total cumulative amount converted to $162.0 thousand. The per share closing price of $44.64 of our common stock on September 30, 2006 was 132.7% of the conversion price of $33.63, so our noteholders hold the right to convert their notes in the fourth quarter of 2006. After September 15, 2007, if the closing sales price of our common stock on the previous trading day is 110% or more of the conversion price of the notes, then the notes would become convertible.

Concurrent with the issuance of the convertible notes, we entered into a convertible note hedge (see Note 9. Derivative Financial Instruments - Derivative Financial Instruments Indexed to and Potentially Settled in a Company s Own Stock).

Available Lines of Credit

As of September 30, 2006, we have available $865.0 million in unsecured federal funds lines of credit, $535.0 million of which were unused. We have reverse repurchase agreement lines available with multiple securities dealers. Reverse repurchase lines allow us to finance short-term borrowings using various fixed income securities as collateral. At September 30, 2006, we borrowed $344.8 million against our reverse repurchase lines. Additionally, we have collateral pledged to the Federal Reserve Bank and Federal Home Loan Bank of San Francisco of which $75.0 million is unused.

9. Derivative Financial Instruments

If held for hedging purposes we designate the derivative when we enter into a derivative contract. The designation may change based on management s reassessment or changing circumstances. Derivative instruments that we obtain or use include interest rate swaps, forward contracts, options and warrants. A swap agreement is a contract between two parties to exchange cash flows based on specified underlying notional amounts, assets or indices. Forward settlement contracts are agreements to buy or sell a quantity of a financial instrument, index, currency or commodity at a predetermined future date, and rate or price. An option or warrant contract is an agreement that conveys to the purchaser the right, but not the obligation, to buy or sell a quantity of a financial instrument (including another derivative financial instrument), index, currency or commodity at a predetermined rate or price during a period or at a time in the future. Option or warrant agreements can be transacted on organized exchanges or directly between parties. The gross positive fair values of derivative assets are recorded as a component of the other assets line item on the balance sheet. The gross negative fair values of derivative liabilities are recorded as a component of the other liabilities line item on the balance sheet.

The total notional or contractual amounts, credit risk amount and estimated net fair value for derivatives as of September 30, 2006 and December 31, 2005 were as follows:

	At September 30, 2006		
(Dollars in thousands)	**Notional or contractual amount**	**Credit risk amount (1)**	**Estimated net fair value - Asset (liability)**
Fair Value Hedge			
Interest rate swap	$ 50,000	$	$ (2,456)
Derivatives			
Foreign exchange forward contracts	413,851	2,526	(1,177)

Foreign currency options	41,204	22	
Equity warrant assets	111,248	32,420	32,420

19

(Dollars in thousands)	At December 31, 2005		
Derivative - Fair Value Hedge			
Interest rate swap	$ 50,000	$	$ (1,314)
Derivatives - Other			
Foreign exchange forward contracts	432,733	5,701	766
Foreign currency options	18,772	101	
Equity warrant assets	108,574	27,802	27,802

(1) Credit risk amounts reflect the replacement cost for those contracts in a gain position in the event of nonperformance by all such counterparties.

Derivative - Fair Value Hedges

Derivative instruments that we hold as part of our interest rate risk management include interest rate swaps and forward contracts. On October 30, 2003, we entered into an interest rate swap agreement with a notional amount of $50.0 million. This agreement hedges against the risk of changes in the fair value associated with the majority of our 7.0% fixed rate, junior subordinated debentures, which management evaluates for effectiveness using the statistical regression analysis approach for each reporting period. For information on our junior subordinated debentures, see Note 8. Borrowings.

The terms of the interest rate swap agreement provide for a swap of our 7.0% fixed rate payment for a variable rate based on the London Inter-Bank Offer Rate (LIBOR) plus a spread. This interest rate swap agreement provided a cash benefit of $30.0 thousand and $0.3 million during the three months ended September 30, 2006 and 2005, respectively, and a cash benefit of $0.3 million and $1.0 million during the nine months ended September 30, 2006 and 2005, respectively, which was recognized in the consolidated statements of income as a reduction in interest expense. The swap agreement largely mirrors the terms of the junior subordinated debentures and therefore is callable by the counterparty anytime on or after October 30, 2008. All components of the swap s gain or loss are included in the assessment of hedge effectiveness. Changes in fair value of the fair value hedge agreement, which is primarily dependent on changes in market interest rates, are recognized in net income as gains or losses on derivative instruments. We recorded a non-cash increase in fair value of the fair value hedge agreement of $0.4 million for the three months ended September 30, 2006, and a non-cash decrease in fair value of $3.3 million for the interest rate swap agreement prior to its designation as a fair value hedge and $0.8 million for the fair value hedge agreement for the nine months ended September 30, 2006, which were reflected in gains on derivative instruments, net.

Derivatives - Other

We enter into various other derivative contracts primarily to provide derivative products or services to customers. These derivatives are not linked to specific assets and liabilities on the balance sheet or to forecasted transactions in an accounting hedge relationship and, therefore, do not qualify for hedge accounting. All of these contracts are carried at fair value with changes in fair value recorded on the statement line item gains on derivative instruments, net.

We enter into foreign exchange forward contracts and non-deliverable foreign exchange forward contracts with clients involved in international trade finance activities, either as the purchaser or seller of foreign currency at a future date, depending upon the clients need. To mitigate the risk of fluctuations in foreign currency exchange rates on these contracts, we enter into opposite way foreign exchange forward contracts and non-deliverable foreign exchange forward contracts with correspondent banks. These contracts are short-term in nature, typically expiring within one year. We have not experienced nonperformance by counterparties and therefore have not incurred related losses. Further, we anticipate performance by all counterparties to such agreements.

We enter into foreign exchange forward contracts with correspondent banks to reduce foreign exchange exposure risk related to certain foreign currency denominated loans. These contracts are short-term in nature, typically expiring within one year. We have not experienced nonperformance by counterparties and therefore have not incurred related losses. Further, we anticipate performance by all counterparties to such foreign exchange forward contracts.

We enter into foreign currency option contracts with clients involved in international trade finance activities, either as the purchaser or seller of foreign currency options, depending upon the client s need. To mitigate the risk of fluctuations in foreign currency exchange rates on these

contracts, we enter into opposite way foreign currency option contracts with correspondent banks. These contracts typically expire in less than one year. We have not experienced nonperformance by

counterparties and therefore have not incurred related losses. Further, we anticipate performance by all counterparties.

We obtain derivative equity warrant assets to purchase an equity position in a client company s stock in consideration for providing credit facilities and, less frequently, for providing other services. The purpose of obtaining warrants from client companies is to increase future revenue. The change in fair value of equity warrant assets is recorded in gains on derivative instruments, net. The change in fair value of equity warrants resulted in net losses of $1.0 million and $1.8 million for the three months ended September 30, 2006 and 2005, respectively, and net gains of $7.5 million and $0.7 million for the nine months ended September 30, 2006 and 2005, respectively.

Derivative Fair Value Instruments Indexed to and Potentially Settled in a Company s Own Stock

On May 20, 2003, we issued $150.0 million of zero-coupon, convertible subordinated notes at face value, due June 15, 2008, (See Note 8. Borrowings). These notes include a conversion feature that is indexed to and could potentially be settled in our stock. The conversion option is an embedded derivative, which, pursuant to paragraphs 11(a) and 12(c) of SFAS No. 133, qualifies as an embedded derivative indexed to our stock. If it was a freestanding derivative, it would be classified in stockholders equity. Thus, the embedded derivative is not considered a derivative for purposes of SFAS No. 133 and is not recorded on our financial statements at fair value.

Concurrent with the issuance of the $150.0 million principal amount of contingently convertible notes, (See Note 8. Borrowings), we entered into a convertible note hedge (purchased call option) at a cost of $39.3 million, and a warrant transaction providing proceeds of $17.4 million with respect to our common stock, with the objective of decreasing our exposure to potential dilution from conversion of the contingently convertible notes.

At issuance under the terms of the convertible note hedge, upon the occurrence of certain conversion events, we had the right to purchase up to approximately 4,460,610 shares of our common stock from the counterparty at a price of $33.63 per common share. The convertible note hedge agreement will expire on June 15, 2008. We have the option to settle any amounts due under the convertible note hedge either in cash or net shares of our common stock. The cost of the convertible note hedge is included in stockholders equity in accordance with the guidance in EITF 00-19 Accounting for Derivative Financial Instruments Indexed to, and Potentially Settled in, a Company s Own Stock . Due to prior conversion events, our right to purchase our stock under the option has been decreased by 4,817 shares.

At issuance under the warrant agreement, the counterparty could purchase up to approximately 4,460,608 shares of our common stock at $51.34 per share, upon the occurrence of certain conversion events. The warrant transaction will expire on June 15, 2008. The proceeds of the warrant transaction were included in stockholders equity in accordance with the guidance in EITF 00-19. Due to prior conversion events, the counterparty s right to purchase our stock under the warrant agreement has been decreased by 4,817 shares. Also see Note 3. Earnings Per Share.

10. Common Stock Repurchase

We currently have in place a program authorizing our repurchase of up to $375.0 million of stock. The repurchase program was initially authorized by our Board of Directors and announced on May 7, 2003 for $160.0 million (with no expiration date), and was subsequently increased by $75.0 million (announced on January 27, 2005), $70.0 million (announced on January 26, 2006 and to be repurchased before September 30, 2007) and $70.0 million (announced on July 20, 2006 and to be repurchased before June 30, 2008). Unless earlier terminated by the Board, the program will expire on June 30, 2008. As of September 30, 2006, we had repurchased 8.5 million shares totaling $297.8 million. During the nine months ended September 30, 2006, we repurchased 1.9 million shares of our common stock totaling $94.3 million. At September 30, 2006, $77.2 million of shares may still be repurchased under the program.

11. Segment Reporting

SFAS No. 131, *Disclosures About Segments of an Enterprise and Related Information* (SFAS 131), requires that we report certain financial information about our reportable operating segments as well as related disclosures about products and services, geographic areas and major customers. An operating segment is a component of an enterprise whose operating results are regularly reviewed by our chief operating decision maker (CODM) when deciding how to allocate resources and in assessing performance. Our CODM is our Chief Executive Officer (CEO).

We offer clients financial products and services through four primary strategic business groups: Commercial Banking, SVB Capital, SVB Alliant, and Other Business Services. Our Other Business Services group includes SVB Global, SVB Private Client Services and certain other business service units. For descriptive information about the products and services provided by each of our operating segments, please refer to our 2005 Annual Report on Form 10-K, Part I. Item 1. Business Business Overview and Footnote 22 Segment Reporting . Unlike financial reporting, which benefits from the comprehensive structure provided by GAAP, the internal profitability reporting process is highly subjective, as there is no comprehensive, authoritative guidance for management reporting. The management reporting process measures the

21

performance of operating segments based on our internal operating structure and is not necessarily comparable with similar information for other financial services companies. In addition, changes in an individual client s primary relationship designation have resulted, and may in the future result, in the inclusion of certain clients in different segments in different periods. We have reclassified certain prior-period amounts to conform to the current period s presentation.

An operating segment is separately reportable if it exceeds any one of several quantitative thresholds specified in SFAS 131. As of September 30, 2006, of our operating segments, only Commercial Banking, SVB Capital and SVB Alliant were determined to be reportable segments. SVB Global and SVB Private Client Services did not meet the separate reporting thresholds and as a result, in the table below, have been aggregated in a column labeled Other Business Services for segment reporting purposes. The Other Business Services column also reflects other business service units and those adjustments necessary to reconcile the results of operating segments based on our internal profitability reporting process to the consolidated financial statements prepared in conformity with GAAP. Our CODM allocates resources to and assesses the performance of each operating segment using information about net interest income, noninterest income and noninterest expense, which are presented as components of segment operating profit or loss before income taxes. Net interest income is reported, net of funds transfer pricing (FTP). FTP is an internal measurement framework designed to assess the financial impact of a financial institution s sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised and an earnings charge is made for funded loans. In addition, we evaluate assets based on average balances; therefore it is not possible to provide period-end asset balances for segment reporting purposes.

Our segment information at and for the three and nine months ended September 30, 2006 and 2005 are as follows:

(Dollars in thousands)	Commercial Banking	SVB Capital	SVB Alliant	Other Business Services	Total
Three months ended September 30, 2006					
Net interest income	$ 71,710	$ 8,305	$ 209	$ 9,584	$ 89,808
Provision for (recovery of) loan losses (1)	950	(24)		1,841	2,767
Noninterest income (2)	25,037	3,066	1,932	933	30,968
Noninterest expense (3)	58,651	5,766	5,061	5,529	75,007
Minority interest in net loss of consolidated affiliates				919	919
Income (loss) before income tax expense (4)	37,147	5,629	(2,920)	4,065	43,921
Total average loans	2,488,741	78,603		408,693	2,976,037

Total average deposits	$ 3,369,301	$ 632,384	$	$ 174,709	$ 4,176,394

---

(1) For segment reporting purposes, we report net charge-offs as the provision for or recovery of loan losses. Thus, the Other Business Services segment includes $1.8 million of net charge offs and $1.5 million of net recovery of loan losses for the three months ended September 30, 2006 and 2005, respectively and $1.9 million of net charge offs and $1.4 million of net recovery of loan losses for the nine months ended September 30, 2006 and 2005, respectively, which represents the difference between net charge-offs and the provision for loan losses.

(2) The noninterest income presented in the Commercial Banking segment includes warrant income of $2.4 million and $3.2 million, for the three months ended September 30, 2006 and 2005, respectively, and $6.2 million and $10.4 million, for the nine months ended September 30, 2006 and 2005, respectively.

(3) The Commercial Banking segment includes direct depreciation and amortization of $0.8 million and $0.5 million for the three months ended September 30, 2006 and 2005, respectively, and $2.4 million and $1.5 million for the nine months ended September 30, 2006 and 2005, respectively. Due to the complexity of our cost allocation model, it is not feasible to determine the exact amount of the remaining depreciation and amortization expense allocated to the various business segments (totaling approximately $1.6 million and $1.2 million for the three months ended September 30, 2006 and 2005, respectively, and approximately $4.2 million and $4.3 million for the nine months ended September 30, 2006 and 2005, respectively).

(4) The internal reporting model used by our management to assess segment performance does not calculate tax expense by segment. Our effective tax rate is a reasonable approximation of the segment rates.

(5) Total Average Assets for the Commercial Banking, SVB Capital, SVB Alliant and Other Business Services segments equals the greater of total loans or the sum of total deposits and total stockholders equity for each segment.

12. Obligations Under Guarantees

We provide guarantees related to financial and performance standby letters of credit issued to our clients to enhance their credit standings and enable them to complete a wide variety of business transactions. Financial standby letters of credit are conditional commitments issued by us to guarantee the payment by a client to a third party (beneficiary). Financial standby letters of credit are primarily used to support many types of domestic and international payments. Performance standby letters of credit are issued to guarantee the performance of a client to a third party when certain specified future events have occurred. Performance standby letters of credit are primarily used to support performance instruments such as bid bonds, performance bonds, lease obligations, repayment of loans, and past due notices. These standby letters of credit have fixed expiration dates and generally require a fee paid by a client at the time we issue the commitment. Fees generated from these standby letters of credit are recognized in noninterest income over the commitment period using the straight-line method.

The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan commitments to clients, and accordingly, we use a credit evaluation process and collateral requirements similar to those for loan commitments. Our standby letters of credit are often cash-secured by our clients. The actual liquidity needs or the credit risk that we have experienced historically have been lower than the contractual amount of letters of credit issued because a significant number of these conditional commitments expire without being drawn upon.

The table below summarizes our standby letter of credits at September 30, 2006. The maximum potential amount of future payments represents the amount that could be remitted under the standby letters of credit if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from the collateral held or pledged.

(Dollars in thousands)	Expires within one year or less	Expires after one year	Total amount outstanding	Maximum amount of future payments
Financial standby	$ 581,167	$ 53,343	$ 634,510	$ 634,510
Commercial standby	5,845		5,845	5,845
Performance standby	14,723	9,772	24,495	24,495
Total	$ 601,735	$ 63,115	$ 664,850	$ 664,850

At September 30, 2006, the carrying amount of the liabilities related to financial and performance standby letters of

23

credit was approximately $2.5 million. At September 30, 2006, collateral available to us in the form of cash and investment securities to cover losses under financial and performance standby letters of credits was $297.3 million.

The Bank, as a financial provider, routinely guarantees, for some of our customers, credit cards that have been provided by an unaffiliated financial institution. We have recourse against the customer for any amount it is required to pay to a third party in the event of default under these arrangements. These guarantees are subject to the same credit policies, underwriting standards and approval process as loans made by us. Certain of these amounts are secured by certificates of deposit and other assets, which we have rights to in the event of nonperformance by customers. The total amount of this guarantee was $70.8 million at September 30, 2006. It is not considered probable that material losses would be incurred by us as a result of these arrangements.

13. Related Party Transactions

In April 2006, the Bank issued a letter of credit in the amount of $0.2 million on behalf of SurgRx, Inc. The initial maturity date of the letter of credit is April 4, 2007, but the letter of credit will be automatically renewed unless affirmatively terminated by SurgRx until its final expiry on May 10, 2010. The letter of credit is secured by a certificate of deposit pledged by SurgRx, Inc. and held by the Bank. The Bank also extended to SurgRx a business credit card line of credit in the amount of $70,000 and a merchant services line of credit in the amount of $15,000, both of which are secured by restricted cash pledged to the Bank by SurgRx. David Clapper, one of our directors, is the Chief Executive Officer of SurgRx, Inc.

In May 2006, the Bank extended a revolving line of credit in the aggregate amount of $60.0 million to NEA XII, LP. Amounts outstanding under the line of credit are secured by the right to receive proceeds of capital calls from the borrower s limited partners. Richard Kramlich, one of our directors, is an owner of NEA Partners 12, L.P., which acts as the General Partner for NEA XII, L.P. The maturity date of the line of credit is 364 days from the date the credit was first extended.

SVB Financial Group has a commitment under a revolving line of credit facility to Gold Hill Venture Lending 03, LP, a venture debt fund (Gold Hill), and its affiliated funds. SVB Financial Group has a 9.3% effective ownership interest in Gold Hill, as well as a 90.7% majority interest in its general partner, Gold Hill Venture Lending Partners 03, LLC. The line of credit bears an interest rate of prime plus one percent. During the nine months ended September 30, 2006, SVB Financial Group renewed the line of credit for an additional year until August 2007 and increased the commitment amount to $40.0 million. The highest aggregate balance outstanding during the nine months ended September 30, 2006 was $30.0 million.

14. Legal Matters

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Based upon information available to us, our review of such claims to date and consultation with our outside legal counsel, management believes the liability relating to these actions, if any, will not have a material adverse effect on our liquidity, consolidated financial position, or results of operations. Where appropriate, as we determine, reserves have been established in accordance with SFAS No. 5, Accounting for Contingencies. The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material adverse effect.

15. Subsequent Events

On May 24, 2001, Gateway Communications, Inc. (Gateway) filed a lawsuit in the United States Bankruptcy Court for the Southern District of Ohio (Western Division) naming the Bank as a defendant. Gateway (the debtor in the bankruptcy case) alleged that the Bank s actions in connection with a loan resulted in Gateway s bankruptcy, and sought $20 million in compensatory damages, punitive damages, interest and attorneys fees. On June 24, 2003, the Court dismissed four of the five counts in the complaint, including the claim for punitive damages, leaving one breach of contract claim. The matter was settled in its entirety in October 2006 for an amount previously accrued for in our financial statements.

In October 2006, SVB Business Partners (Shanghai) Co., Ltd., a wholly-owned subsidiary of SVB Financial Group, entered an agreement with New Enterprise Associates (Beijing), Ltd., by which SVB Business Partners (Shanghai) Co., Ltd., will provide business consulting services to New Enterprise Associates (Beijing), Ltd. The agreement has a three-year term. During the first year of the agreement New Enterprise Associates (Beijing), Ltd., will pay $99,250 to SVB Business Partners (Shanghai). New Enterprise Associates (Beijing), Ltd. is a wholly-owned subsidiary of NEA Management Company, LLC, a company in which Richard Kramlich is an owner.

The Bank has renewed a line of credit in the amount of $1,000,000 to Skalli Corporation (dba St. Supery Vineyards and Winery) in November 2006. Michaela Rodeno, one of our directors, is the Chief Executive Officer of St. Supery. The loan expires in October 2007, with interest payable monthly. Additionally, the Bank plans to extend to Skalli Corporation a line of credit in the amount of $40,000 for business credit cards and $550,000 in availability for automated clearing house transactions.

ITEM 2. MANAGEMENT S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Management s discussion and analysis of financial condition and results of operations below contain forward-looking statements. These statements are based on current expectations and assumptions that are subject to risks and uncertainties. Actual results could differ materially because of certain factors, including those discussed in Item 3. Quantitative and Qualitative Disclosures about Market Risk and Part II. Item IA. Risk Factors.

The following discussion and analysis of financial condition and results of operations should be read in conjunction with our interim unaudited consolidated financial statements and notes as presented in Part I - Item 1 of this report and in conjunction with our Annual Report on Form 10-K for the year ended December 31, 2005 (2005 Form 10-K) as filed with the Securities and Exchange Commission (SEC). Certain reclassifications have been made to prior years results to conform to the current period s presentations. Such reclassifications had no effect on our results of operations or stockholders equity.

Overview of Company Operations

SVB Financial Group is a bank holding company and financial holding company that was incorporated in the state of Delaware in March 1999. Our principal subsidiary, Silicon Valley Bank (the Bank), is a California state-chartered bank and a member of the Federal Reserve System. The Bank s deposits are insured by the Federal Deposit Insurance Corporation. Our corporate headquarters is located at 3003 Tasman Drive, Santa Clara, California 95054, and our telephone number is 408.654.7400. Hereafter when we refer to we , our or us , we mean SVB Financial Group and all of its subsidiaries collectively, including the Bank. When we refer to SVB Financial Group or the parent company, we are referring only to the parent company, SVB Financial Group.

For more than 20 years, we have been dedicated to helping entrepreneurs succeed, specifically focusing on industries where we have deep knowledge and relationships. Our focus is on the technology, life science, private equity, and premium wine industries. Private equity includes our activities with private equity firms and funds. We continue to diversify our products and services to support our clients throughout their life cycles, regardless of age or size. We offer a range of financial services that generate three distinct sources of income: interest rate differentials, fee-based services and investments in private equity funds.

In part, our income is generated from interest rate differentials. The difference between the interest rates received on interest-earning assets, such as loans extended to clients and securities held in our investment portfolio, and the interest rates paid by us on interest-bearing liabilities, such as deposits and borrowings, accounts for the major portion of our earnings. Our deposits are largely obtained from commercial clients within our technology, life science, private equity, and premium wine industry sectors, and, to a lesser extent, from individuals served by our SVB Private Client Services group. We do not obtain deposits from conventional retail sources and have no brokered deposits. As part of negotiated credit facilities and certain other services, we frequently obtain rights to acquire stock in the form of warrants in certain client companies.

Fee-based services also generate income for our business. We market our full range of financial services to all of our commercial and private equity firm clients. In addition to commercial banking and private client services, we offer fee-based merger and acquisition services, private placements, investment, advisory and valuation services. Our ability to integrate and cross-sell our diverse financial services to our clients is a strength of our business model.

In addition, we seek to obtain returns through investments in private equity funds. As of September 30, 2006, we managed five limited partnerships: two private equity funds that invest directly in privately held companies and three funds that invest in other private equity funds.

Commercial Banking

We provide solutions to the needs of our commercial clients in the technology, life science, private equity and premium wine industries through our lending, deposit account and cash management, and global banking and trade products and services.

Through our lending products and services, we extend loans and other credit facilities to our commercial clients, most often secured by the assets of our clients. Lending products and services include traditional term loans, equipment loans, revolving lines of credit, accounts-receivable-based lines of credit, asset-based loans, real estate loans, vineyard development loans, and financing of affordable housing projects. We obtain warrants to purchase an equity position in a client s stock in consideration for making loans to emerging growth companies or for providing other services.

Our deposit account and cash management products and services provide commercial clients with short and long-term cash management solutions. Deposit account products and services include traditional deposit and checking accounts,

26

certificates of deposit, and money market accounts. In connection with deposit accounts, we also provide lockbox and merchant services that facilitate timely depositing of checks and other payments to clients accounts. Cash management products and services include wire transfer and Automated Clearing House (ACH) payment services to enable clients to transfer funds quickly from their deposit accounts. Additionally, the cash management services unit provides collection services, disbursement services, electronic funds transfers, and online banking through SVBeConnect.

Our global banking and trade products and services facilitate our clients global finance and business needs. These products and services include foreign exchange services that allow commercial clients to manage their foreign currency risks through the purchase and sale of currencies on the global inter-bank market. To facilitate our clients international trade, we offer a variety of loans and credit facilities guaranteed by the Export-Import Bank of the United States. We also offer letters of credit, including export, import, and standby letters of credit, to enable clients to ship and receive goods globally.

We offer a variety of investment services and solutions to our Commercial Banking clients and others that enable companies to better manage their assets. The Bank s Repurchase Agreement Program (Repo), which is targeted to those clients who seek interest income with minimal tolerance for loss of principal, offers the ability to enter into secure overnight investments. Through our broker-dealer subsidiary, SVB Securities, we offer money market mutual funds and fixed income securities. SVB Securities is registered with the SEC and a member of the National Association of Securities Dealers, Inc. (NASD) and the Securities Investor Protection Corporation (SIPC). Finally, through our registered investment advisory subsidiary, SVB Asset Management, we offer investment advisory services including outsourced treasury services, with customized cash portfolio management for corporations and industry-leading reporting.

SVB Capital

SVB Capital focuses on the business needs of our private equity clients, with whom we have established and maintain relationships domestically and internationally. Through this segment, we provide banking services and financial solutions, including traditional deposit and checking accounts, loans, letters of credit, and cash management services to private equity clients.

SVB Capital makes investments in private equity firms and in companies in the niches we serve. The segment also currently manages five private equity funds that are consolidated into our financial statements: SVB Strategic Investors Fund, LP, SVB Strategic Investors Fund II, LP, and SVB Strategic Investors Fund III, LP, which are funds of funds that invest in other private equity funds; and Silicon Valley BancVentures, LP and SVB Capital Partners II, LP, which are direct equity funds that invest in privately-held technology and life sciences companies. This segment also includes investments in Gold Hill Venture Lending Partners 03, LP and its parallel funds (collectively known as Gold Hill Venture Lending Partners 03, LP), which provide secured debt, typically to emerging-growth clients in their earliest stages, and the Partners for Growth funds that primarily provide secured debt to higher-risk, middle-market clients in their later stages. We define emerging-growth clients as companies in the start-up or early stages of their life cycles. These companies tend to be privately-held and backed by private equity. They generally have few employees, have brought relatively few products or services to market, and have no or little revenue. By contrast, middle-market clients tend to be more mature; they may be publicly-traded and more established in the markets in which they participate, although not necessarily the leading players in their industries.

SVB Alliant

SVB Alliant, our investment banking subsidiary, principally provides merger and acquisition advisory services (M&A), private placement advisory services and fairness opinions. SVB Alliant is a broker-dealer registered with the SEC and a member of the NASD.

Other Business Services

The Other Business Services segment is principally comprised of SVB Private Client Services, SVB Global, SVB Analytics and other business service units that are not part of the Commercial Banking, SVB Capital or SVB Alliant segments. These business units do not meet the separate reporting thresholds as defined by SFAS 131 and as such, have been aggregated as Other Business Services for segment reporting purposes. The Other Business Services segment also reflects those adjustments necessary to reconcile the results of operating segments based on our internal profitability reporting process to the interim unaudited consolidated financial statements prepared in conformity with GAAP.

SVB Private Client Services

Our SVB Private Client Services group provides a wide range of credit services to targeted high-net-worth individuals using both long-term secured and short-term unsecured lines of credit. These products and services include home equity lines of credit, secured lines of credit, restricted stock purchase loans, airplane loans, and capital call lines of credit. We also help our clients meet their cash management needs by providing deposit account products and services, including

checking accounts, deposit accounts, money market accounts, and certificates of deposit. As a result of SVB Private Client Services group s recent decision to focus on its core banking and credit products, we sold Woodside Asset Management during the quarter ended March 31, 2006. The sale did not have a material impact on our financial condition and results of operations.

SVB Global

SVB Global includes our foreign subsidiaries that facilitate our clients global expansion into major technology centers around the world. SVB Global provides a variety of services, including consulting and business services, referrals, and knowledge sharing, and identifying business opportunities for us. SVB Global serves the needs of our non-U.S. clients with global banking products, including foreign exchange and global finance and access to our international banking network for in-country services abroad. SVB Global also supports our private equity and commercial banking clients with business services through subsidiaries in India, China and the United Kingdom.

SVB Analytics

A new business services unit, SVB Analytics, was formed during the second quarter of 2006. SVB Analytics provides solutions to address the valuation needs of private emerging-growth technology and life sciences companies. During the third quarter of 2006, SVB Analytics acquired a 65% ownership stake in eProsper. eProsper provides corporate equity administration services, including capitalization table data management to private companies.

Critical Accounting Policies and Estimates

The accompanying management s discussion and analysis of results of operations and financial condition are based upon our unaudited interim consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America (GAAP). The preparation of these financial statements in accordance with GAAP requires management to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues, and expenses and related disclosure of contingent assets and liabilities. Management evaluates estimates on an ongoing basis. Management bases its estimates on historical experiences and various other factors and assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ materially from these estimates under different assumptions or conditions.

A summary of significant accounting policies and a description of accounting policies that are considered critical are described in Part II. Item 8. Consolidated Financial Statements and Supplementary Data Note 2. Significant Accounting Policies and in Part II. Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies in our 2005 Form 10-K.

Recent Accounting Pronouncements

In December of 2004, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 123, Share-Based Payment (Revised 2004) (SFAS 123(R)). SFAS 123(R) requires us to measure all employee share-based compensation awards using a fair value based method, estimate award forfeitures, and record such expense in our consolidated statements of operations. SFAS 123(R) also requires the benefit of tax deductions in excess of recognized compensation cost to be reported in the statement of cash flows as a financing cash flow, rather than as an operating cash flow. SFAS 123(R) supersedes Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees (APB 25) and amends SFAS No. 95, Statement of Cash Flows. On January 1, 2006, we adopted SFAS 123(R) using the modified prospective method, one of the adoption methods permitted under SFAS 123(R). (See Note 4 in Notes to Interim Consolidated Financial Statements at Part I, Item 1.).

In February 2006, the FASB issued SFAS No. 155, Accounting for Certain Hybrid Financial Instruments, an amendment of FASB Statements No. 133 and 140 (SFAS 155). Hybrid financial instruments are financial instruments that contain an embedded derivative within a single instrument. SFAS 155 gives entities an option to elect to record hybrid financial instruments at fair value as one financial instrument. Prior to this amendment, hybrid financial instruments were required to be separated into two instruments, a derivative and host, and generally only the derivative was recorded at fair value. SFAS 155 requires that beneficial interests in securitized assets be evaluated for derivatives, either freestanding or embedded. On October 25, 2006, the FASB provided a scope exception for securitized interests that (1) only contain an embedded derivative that is tied to the prepayment risk of the underlying prepayable financial assets and (2) the investor does not control the right to accelerate the settlement. SFAS 155 is effective for all financial instruments acquired or issued after January 1, 2007. Additionally, SFAS 155 provides a one-time opportunity to apply the fair value election to hybrid financial instruments existing at the date of implementation at fair value as one financial instrument, with any difference between the carrying amount of the existing hybrid financial instruments and the fair value of the single financial instrument being

recorded as a cumulative-effect adjustment to beginning retained earnings. We are currently assessing the impact of SFAS 155 on our consolidated financial position and results of operations.

In March 2006, the FASB issued SFAS No. 156, Accounting for Servicing of Financial Assets, an amendment of SFAS 140 (SFAS 156). SFAS 156 clarifies when an entity should separately recognize servicing assets and servicing liabilities when it undertakes an obligation to service a financial asset by entering into a servicing contract. SFAS 156 requires that all separately recognized servicing assets and servicing liabilities be initially measured at fair value and subsequently measured using either the amortization method as previously permitted under SFAS 140 or the fair value measurement method. Entities are permitted to make an election to subsequently re-measure classes of separately recognized servicing assets and liabilities. Once the fair value measurement method is elected for a class, the election should be applied prospectively to all new and existing separately recognized servicing assets and servicing liabilities within that class. The effect of re-measuring an existing class of separately recognized servicing assets and servicing liabilities at fair value would be reported as a cumulative-effect adjustment to retained earnings as of the beginning of the fiscal year of adoption. SFAS 156 is effective as of the beginning of an entity s first fiscal year that begins after September 15, 2006. Earlier adoption is permitted as of the beginning of an entity s fiscal year, provided the entity has not yet issued interim financial statements for that fiscal year. In the first quarter of 2006, we elected not to early adopt this Statement and, accordingly, will adopt it as of January 1, 2007. We are currently assessing the impact of SFAS 156 on our consolidated financial position, results of operations and cash flows.

In July 2006, the FASB issued FASB Interpretation (FIN) No. 48, Accounting for Uncertainty in Income Taxes an interpretation of FASB Statement No. 109 (FIN 48), to clarify the accounting for uncertain tax positions. FIN 48 prescribes that a two-step benefit recognition model be applied initially to recognize and measure the benefit amount of a tax position. The first step requires that a tax benefit be recognized only when the tax position is more-likely-than-not to be sustained based on the technical merits of the position. Assuming the first step is met, the second step requires that the benefit amount be measured at the largest amount that is at least more-likely-than-not likelihood to be the ultimate outcome based on a cumulative-probability approach. Tax positions that previously failed to meet the more-likely-than-not recognition threshold should be recognized in the period in which the threshold is subsequently met, the tax matter is resolved or the statute of limitations for examining the tax position has expired. FIN 48 requires that a previously recognized tax benefit be de-recognized in the period it becomes more-likely-than-not that the tax position would not be sustained on audit. The impact of applying FIN 48 should be recognized as a cumulative-effect adjustment to beginning retained earnings at the adoption date. The Interpretation is effective for fiscal years beginning after December 15, 2006. We are currently assessing the impact of FIN 48 on our consolidated financial position and results of operations.

In September 2006, the FASB issued SFAS No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in accordance with GAAP, and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007. We are currently assessing the impact of SFAS 157 on our consolidated financial position and results of operations.

In September 2006, the SEC Staff Bulletin issued SAB 108 on how the effects of the carryover or reversal of prior year misstatements should be considered in quantifying a current year misstatement. The SEC Staff believes that companies should quantify errors using both a balance sheet and an income statement approach and evaluate whether either of these approaches results in quantifying a misstatement that, when all relevant quantitative and qualitative factors are considered, is material. SAB 108 also describes the circumstances where it would be appropriate for a registrant to record a one-time cumulative effect adjustment to correct errors existing in prior years that previously had been considered immaterial as well as the required disclosures to investors. SAB 108 is effective for periods ending after November 15, 2006. We are currently assessing the impact of SAB 108 on our consolidated financial position and results of operations.

Results of Operations

Earnings Summary

We reported net income of $25.2 million for the three months ended September 30, 2006. This was $2.1 million, or 9.2%, higher than net income of $23.1 million for the three months ended September 30, 2005. Net income totaled $61.0 million for the nine months ended September 30, 2006. This was $5.9 million, or 8.8%, lower than net income of $66.9 million for the nine months ended September 30, 2005. Net income for the nine months ended September 30, 2006 includes a net of tax charge of $10.4 million related to an impairment of goodwill recorded during the second quarter of 2006.

29

The major components and changes of net income for the three and nine months ended September 30, 2006 and 2005 are summarized in the following table.

(Dollars in thousands)	Three Months Ended September 30, 2006	Three Months Ended September 30, 2005	% Change	Nine Months Ended September 30, 2006	Nine Months Ended September 30, 2005	% Change
Net interest income	$ 89,808	$ 77,724	15.5 %	$ 259,449	$ 218,284	18.9 %
Provision for (recovery of) loan losses	2,767	1,427	93.9	4,895	(1,573)	(411.2)
Noninterest income	30,968	24,933	24.2	95,347	80,691	18.2
Noninterest expense	75,007	61,983	21.0	239,333	189,123	26.5
Minority interest in net (income) losses of consolidated affiliates	919	(1,281)	(171.7)	(5,139)	(468)	998.1
Income before income tax expense	43,921	37,966	15.7	105,429	110,957	(5.0)
Income tax expense	18,751	14,907	25.8	44,586	44,066	1.2
Cumulative effect of change in accounting principle, net of tax				192		
Net income	$ 25,170	$ 23,059	9.2 %	$ 61,035	$ 66,891	(8.8)%

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Consolidated net income increased by $2.1 million for the three months ended September 30, 2006, compared to the three months ended September 30, 2005.

Net interest income increased by $12.1 million largely due to an increase in average loans, particularly commercial loans, and an improvement in yields generated from these loans. The increase in interest income from loans was partially offset by a decrease in interest income resulting from decreases in average balances of investment securities and by increases in interest expense resulting from increases in average balances and rates of short-term borrowings. Short-term borrowings include federal funds purchased, Federal Home Loan Bank (FHLB) advances and securities sold under agreement to repurchase.

Noninterest income increased by $6.0 million due to increases in client investment fees and gains on derivative instruments, net, partially offset by a decline in corporate finance fees.

Noninterest expense increased by $13.0 million, which was largely attributable to increases in compensation expense and professional services expense, partially offset by a lower provision for unfunded credit commitments.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Consolidated net income decreased by $5.9 million for the nine months ended September 30, 2006, compared to the nine months ended September 30, 2005.

Net interest income increased by $41.2 million largely due to an increase in average loans, particularly commercial loans, and an improvement in yields generated from these loans, partially offset by a decrease in interest income resulting from decreases in average balances of investment securities and by increases in interest expense resulting from increases in average balances and rates of short-term borrowings.

Noninterest income increased by $14.7 million due to an increase in client investment fees, gains on investment securities, net, and gains on derivative instruments, net, partially offset by a decline in corporate finance fees.

Noninterest expense increased by $50.2 million, which was largely attributable to a pre-tax charge related to an impairment of goodwill as well as increases in compensation expense and professional services expense, partially

offset by a reduction in the allowance for unfunded credit commitments.

Provision for loan losses increased by $6.5 million, minority interest in net income of consolidated affiliates increased by $4.7 million and income tax expense increased by $0.5 million.

30

Net Interest Income and Margin

Net interest income is defined as the difference between interest earned primarily on loans, investment securities, federal funds sold, securities purchased under agreement to resell and other short-term investment securities, and interest paid on funding sources. Net interest income is our principal source of revenue. Net interest margin is defined as the amount of annualized net interest income, on a fully taxable-equivalent basis, expressed as a percentage of average interest-earning assets. The average yield earned on interest-earning assets is the amount of annualized taxable-equivalent interest income expressed as a percentage of average interest-earning assets. The average rate paid on funding sources is defined as annualized interest expense as a percentage of average funding sources.

The following tables set forth average assets, liabilities, minority interest, stockholders equity, interest income, interest expense, annualized yields and rates, and the composition of our annualized net interest margin for the three and nine months ended September 30, 2006 and 2005, respectively.

---

(1) Includes average interest-bearing deposits in other financial institutions of $29.7 million and $18.7 million for the nine months ended September 30, 2006 and 2005, respectively.

(2) Interest income on non-taxable investments is presented on a fully taxable-equivalent basis using the federal statutory income tax rate of 35.0% in both 2006 and 2005. The tax-equivalent adjustments were $1.3 million and $1.5 million for the nine months ended September 30, 2006 and 2005, respectively.

(3) Average equity investments of $137.7 million and $154.6 million for the nine months ended September 30, 2006 and 2005, respectively, were classified as other assets as they were noninterest-yielding assets.

33

Net interest income is affected by changes in the amount and mix of interest-earning assets and interest-bearing liabilities, referred to as volume change. Net interest income is also affected by changes in yields earned on interest-earning assets and rates paid on interest-bearing liabilities, referred to as rate change. The following table sets forth changes in interest income and interest expense for each major category of interest-earning assets and interest-bearing liabilities. The table also reflects the amount of simultaneous change attributable to both volumes and rates for the periods indicated. For this table, changes that are not solely due to either volume or rate are allocated in proportion to the percentage changes in average volume and average rate. Changes relating to investments in non-taxable securities are presented on a fully taxable-equivalent basis using the federal statutory rate of 35.0% in 2006 and 2005.

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Net Interest Income

Net interest income, on a fully taxable-equivalent basis, totaled $90.2 million for the three months ended September 30, 2006, an increase of $12.0 million, or 15.3% from the comparable 2005 period. The increase in net interest income was the result of a $17.6 million increase in interest income, partially offset by a $5.6 million increase in interest expense.

Interest Income - Net Increase in Interest-Earning Assets (Volume Variance)

The $17.6 million increase in interest income, on a fully taxable-equivalent basis, was partially due to a $7.9 million favorable volume variance. The favorable volume variance resulted from a $59.4 million, or 1.3%, increase in average interest-earning assets.

The increase in average interest-earning assets was primarily due to an increase in average loans, which increased $525.9 million or 21.5% from the comparable 2005 period. The increase in average loans resulted in a $13.4 million favorable volume variance. The volume variance was largely driven by growth in our commercial loan category, which represented $441.9 million of the increase in average loans. Specifically, we experienced significant growth during the three months ended September 30, 2006 in loans to our clients in the private equity, premium wine and private client services categories. The increase in average loans reflects our increased focus on serving middle-market clients and new business generation.

34

Average investment securities decreased by $448.8 million, resulting in a $5.3 million unfavorable volume variance. The decreases in average federal funds sold, securities purchased under agreement to resell and other short-term investments and investment securities was a result of our shifting of funds to support the growth in our loan portfolio.

We estimated the duration of our total investment portfolio at September 30, 2006 to be 2.6 years, compared to 2.5 years at September 30, 2005. The duration of the investment portfolio increased due primarily to increases in interest rates, which impacted the levels of expected prepayments on investments securities.

Interest Income - Changes in Market Interest Rates (Rate Variance)

Many elements of our interest-earning assets are interest rate sensitive. As a result, we expect that any future increases or decreases in market interest rates will affect our earnings.

Rate variances for average interest-earning assets resulted in a $9.7 million increase in interest income. The yield on our aggregate average interest-earning assets increased 137 basis points, largely driven by higher yields generated by loans. The increase in yields on interest-earning assets was driven by recent increases in short-term market interest rates.

We realized a $7.5 million favorable rate variance associated with our loan portfolio, largely driven by higher yields from loans resulting from recent increases in our prime lending rate. Our average prime lending rate was 8.25% in the third quarter of 2006 compared to 6.41% in the third quarter of 2005. As of September 30, 2006, 65.67%, or $2.19 billion, of our total outstanding gross loans were variable rate loans that reset at a prescribed measurement date upon a change in our prime lending rate or other variable indices.

We realized a $1.1 million favorable rate variance associated with our investment securities. This was primarily due to increases in interest rates and maturities of lower yielding securities and the full quarter effect of sales of lower yielding securities in the second quarter of 2006.

In addition, we realized a $1.0 million favorable rate variance associated with federal funds sold, securities under agreement to resell and other short-term investment securities. Increases in short-term market interest rates were responsible for this favorable rate variance.

Interest Expense

Total interest expense for the three months ended September 30, 2006 increased by $5.6 million. The average cost of funds during the three months ended September 30, 2006 was 0.87%, compared to 0.41% for the three months ended September 30, 2005. The increase in interest expense and average cost of funds for the three months ended September 30, 2006, was due primarily to increases in levels and rates of short-term borrowings. The increases in short-term borrowings were primarily used to fund the growth in our loan portfolio.

During the three months ended September 30, 2006, the average balance of short-term borrowings was $523.4 million compared to $88.1 million for the three months ended September 30, 2005. The average interest rate for short-term borrowings during the three months ended September 30, 2006 was 5.46%, compared to 3.61% for the three months ended September 30, 2005.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Net Interest Income

Net interest income, on a fully taxable-equivalent basis, totaled $261.0 million for the nine months ended September 30, 2006, an increase of $40.9 million, or 18.6% from the comparable 2005 period. The increase in net interest income was the result of a $52.6 million increase in interest income, partially offset by an $11.7 million increase in interest expense.

Interest Income - Net Increase in Interest-Earning Assets (Volume Variance)

The $52.6 million increase in interest income, on a fully taxable-equivalent basis, was partially due to a $24.6 million favorable volume variance. The favorable volume variance resulted from a $121.3 million, or 2.6% increase, in average interest-earning assets.

The increase in average interest earning assets was primarily due to an increase in loans, which increased $498.4 million resulting in a $36.8 million favorable volume variance. The volume variance was largely driven by growth in our commercial loan category, which represented $446.8 million of the increase. The increase in average loans reflects our increased focus

35

on serving middle-market clients and new business generation. Our loan yield for the nine months ended September 30, 2006 and 2005 included $5.6 million and $4.8 million, respectively, from amortization of gross warrant loan fees.

Average federal funds sold, securities purchased under agreement to resell and other short-term investment securities for the nine months ended September 30, 2006 decreased $119.5 million, resulting in a $3.1 million unfavorable volume variance. Additionally, average investment securities decreased by $257.6 million, resulting in a $9.1 million unfavorable volume variance. The decreases in average federal funds sold, securities purchased under agreement to resell and other short-term investments and investment securities was a result of our shifting of funds to support the growth in our loan portfolio.

Interest Income - Changes in Market Interest Rates (Rate Variance)

Favorable rate variances for average interest-earning assets resulted in a $28.0 million increase in interest income. The yield on average interest-earning assets increased 130 basis points overall, largely driven by higher yields generated by loans. The increase in yields on interest-earning assets was primarily caused by increases in our prime lending rate, a shift from investment securities to higher yielding loan assets and increases in short-term market interest rates.

We realized a $21.7 million favorable rate variance associated with our loan portfolio, largely driven by higher loan yields primarily resulting from increases in our prime lending rate. On February 1, 2006, March 29, 2006, May 11, 2006 and June 30, 2006, we increased our prime lending rate, each time by 25 basis points, bringing our prime rate to 8.25%, in response to increases in short-term market interest rates. Our average prime lending rate increased to 7.85% in the first nine months of 2006 from 5.92% in the first nine months of 2005.

In addition, we realized a $3.6 million favorable rate variance associated with federal funds sold, securities under agreement to resell and other short-term investment securities. Increases in short-term market interest rates were responsible for this favorable rate variance.

The average yield on taxable investment securities for the nine months ended September 30, 2006 increased 19 basis points to 4.62% from 4.43% in the comparable prior year period, resulting in a $2.7 million favorable rate variance associated with our average investment securities. This was primarily due to increases in interest rates and maturities and sales of lower yielding securities.

Interest Expense

Total interest expense for the nine months ended September 30, 2006 increased by $11.7 million. The average cost of funds during the nine months ended September 30, 2006 increased 31 basis points to 0.65% from 0.34% for the nine months ended September 30, 2005. The increase in interest expense and average cost of funds for the nine months ended September 30, 2006, was due primarily to increases in levels and rates of short-term borrowings. The increases in short-term borrowings were primarily used to fund the growth in our loan portfolio.

During the nine months ended September 30, 2006 and 2005 the average balance of short-term borrowings was $344.6 million and $32.3 million, respectively, while the average interest rates during the periods were 5.21% and 3.58%, respectively.

Provision for (Recovery of) Loan Losses

The provision for (recovery of) loan losses is based on our evaluation of the adequacy of the existing allowance for loan losses in relation to total loans, and on our periodic assessment of the inherent and identified risk dynamics of the loan portfolio resulting from reviews of selected individual loans and loan commitments.

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

We recorded a provision for loan losses of $2.8 million for the three months ended September 30, 2006, compared to a provision of $1.4 million for the comparable three-month period a year ago.

We incurred net loan charge-offs of $1.1 million for the three months ended September 30, 2006, compared to net loan charge-offs of $2.9 million for the three months ended September 30, 2005.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

We recorded a provision for loan losses of $4.9 million for the nine months ended September 30, 2006, compared to a $1.6 million recovery of provision for loan losses for the comparable period a year ago.

36

We realized net charge-offs of $2.1 million for the nine months ended September 30, 2006 compared to $1.1 million of recoveries for the nine months ended September 30, 2005. Credit quality remained strong with nonperforming loans at 0.28% of total gross loans as of September 30, 2006. See Consolidated Financial Condition - Credit Quality and the Allowance for Loan Losses for additional discussion.

Noninterest Income

Noninterest income was $31.0 million for the three months ended September 30, 2006. This was $6.1 million, or 24.2%, higher than noninterest income of $24.9 million for the three months ended September 30, 2005. Noninterest income totaled $95.3 million for the nine months ended September 30, 2006. This was $14.6 million, or 18.2%, higher than noninterest income of $80.7 million for the nine months ended September 30, 2005.

The following table summarizes the components of noninterest income for the three and nine months ended September 30, 2006 and 2005, and the percent changes from period to period:

(Dollars in thousands)	**Three Months Ended September 30, 2006**	**2005**	**% Change**	**Nine Months Ended September 30, 2006**	**2005**	**% Change**
Client investment fees	$ 11,555	$ 8,700	32.8 %	$ 32,164	$ 23,901	34.6 %
Gains on derivative instruments, net	4,729	3,040	55.6	19,683	16,959	16.1
Letter of credit and standby letter of credit income	2,617	2,625	(0.3)	7,609	7,418	2.6
Deposit service charges	2,747	2,435	12.8	7,235	7,317	(1.1)
Corporate finance fees	1,999	2,990	(33.1)	7,212	14,739	(51.1)
Gains on investment securities, net	1,645	1,301	26.4	5,664	872	549.5
Other	5,676	3,842	47.7	15,780	9,485	66.4
Total noninterest income	$ 30,968	$ 24,933	24.2 %	$ 95,347	$ 80,691	18.2 %

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Client investment fee income for the three months ended September 30, 2006 of $11.6 million was $2.9 million, or 32.8% higher, than $8.7 million for the three months ended September 30, 2005. The increased income in the three months ended September 30, 2006 as compared to September 30, 2005 was attributable to the growth in client investment funds, which resulted from increased cross-selling.

Gains on derivative instruments, net was $4.7 million for the three months ended September 30, 2006 compared to $3.0 million for the three months ended September 30, 2005. The increase of $1.7 million was primarily due to favorable changes in the fair value of equity warrant assets and the fair value hedge agreement for our junior subordinated debentures.

Corporate finance fees for the three months ended September 30, 2006 was $2.0 million, compared to $3.0 million at September 30, 2005, a decrease of $1.0 million. The decrease relates to recent changes in staffing at SVB Alliant. SVB Alliant s business is also highly variable, thus we expect significant changes in corporate finance fees from period to period.

Other income for the three months ended September 30, 2006 was $5.7 million, compared to $3.8 million at September 30, 2005, an increase of $1.9 million. The increase primarily relates to consulting and valuation service income, unused commitment fees and fund management fee income.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Client investment fee income for the nine months ended September 30, 2006 of $32.2 million was $8.3 million higher than $23.9 million for the nine months ended September 30, 2005. The increased income in the nine months ended September 30, 2006 as compared to September 30, 2005 was attributable to the growth in client investment funds, which resulted from increased cross-selling.

Gains on derivative instruments, net, was $19.7 million for the nine months ended September 30, 2006, compared to $17.0 million for the nine months ended September 30, 2005. The increase of $2.7 million was primarily due to favorable changes in the fair value of equity warrant assets, which was partially offset by an unfavorable change in the fair value hedge agreement for our junior subordinated debentures.

Corporate finance fees for the nine months ended September 30, 2006 was $7.2 million, compared to $14.7 million at September 30, 2005, a decrease of $7.5 million. The decrease relates to changes in staffing at SVB Alliant that occurred earlier in 2006.

Other income for the nine months ended September 30, 2006 was $15.8 million, compared to $9.5 million at September 30, 2005, an increase of $6.3 million. The increase primarily relates to a net gain of foreign loan revaluations, unused commitment fees, credit card service fee income, consulting and valuation service income and FHLB stock dividend income.

Client Investment Funds

We offer a variety of investment products on which we earn fees. These products include sweep money market funds, money market mutual funds, overnight repurchase agreements and fixed income securities available through client-directed accounts, and fixed income management services offered through our investment advisory subsidiary. The following table summarizes client investment funds invested across those products as of September 30, 2006 and 2005.

(Dollars in millions)	At September 30, 2006	At September 30, 2005
Client investment funds:		
Client directed investment assets (1)	$ 10,911	$ 8,419
Sweep money market funds	2,332	1,663
Client investment assets under management	4,455	3,740
Total client investment funds (2)	$ 17,698	$ 13,822

(1) Mutual funds and Repurchase Agreement Program assets.

(2) Client funds invested through SVB Financial Group are maintained at third party financial institutions.

Total client investment funds were $17.7 billion at September 30, 2006, compared to $13.8 billion at September 30, 2005, an increase of $3.9 billion, or 28.3%. As of September 30, 2006, assets managed by SVB Asset Management accounted for $4.5 billion, or 25.4% and assets held in the Repurchase Agreement Program were $2.3 billion, or 13.0% of the total client investment funds.

Gains on Derivative Instruments, Net

The following table summarizes the components of gains on derivative instruments, net, for the three and nine months ended September 30, 2006 and 2005, and the percent changes from period to period:

(Dollars in thousands)	Three Months Ended September 30, 2006	2005	% Change	Nine Months Ended September 30, 2006	2005	% Change
Foreign exchange forwards (1)	$ 5,386	$ 5,024	7.2 %	$ 17,330	$ 14,188	22.2 %
Foreign exchange forwards (2)	(22)	(138)	(84.1)	(1,075)	2,087	(151.5)
Total gains on foreign exchange forwards, net	5,364	4,886	9.8	16,255	16,275	(0.1)
Change in fair value of interest rate swap (3)	397			(4,060)		
Equity warrant assets change in fair value:						
Cancellations and expirations	(1,623)	(1,875)	(13.4)	(3,099)	(2,694)	15.0
Other changes in fair value	591	29		10,587	3,378	213.4
Total net (losses) gains on equity warrant assets (4)	(1,032)	(1,846)	(44.1)	7,488	684	994.7
Total gains on derivative instruments, net	$ 4,729	$ 3,040	55.6 %	$ 19,683	$ 16,959	16.1 %

(1) Represents the income differential between foreign exchange forward contracts/non-deliverable foreign exchange forward contracts with clients and opposite way foreign exchange forward contracts/non-deliverable foreign exchange forward contracts with correspondent banks. See Note 13 Derivative Financial Instruments under Item 8 of the Company s Annual Report on Form 10-K for the fiscal year ended December 31,

2005.

(2) Represents change in fair value of foreign exchange forward contracts with correspondent banks to economically reduce foreign exchange exposure risk related to certain foreign currency denominated loans.

(3) Represents change in fair value hedge agreement for the three months ended September 30, 2006. For the nine months ended September 30, 2006, the amount is comprised of $3.3 million for the interest rate swap agreement prior to its designation as a fair value hedge and $0.8 million for the fair value hedge agreement.

38

(4) Includes net gains (losses) on equity warrants assets held by consolidated investment affiliates. Relevant amounts attributable to minority interests are reflected in the interim consolidated income statement under the caption Minority Interest in Net (Income)/Losses of Consolidated Affiliates.

The change in fair value of equity warrant assets is primarily attributable to the changes in the value of the underlying assumptions used to value the equity warrants including: changes in the risk-free interest rate, changes in the underlying value of the client companies stock, changes in the volatility of market comparable public companies and changes in the expected life. The methodology used to calculate the fair value of equity warrant assets has been applied consistently.

Gains on Investment Securities, Net

The following table presents the components of gains and losses on investment securities, net, for the three and nine months ended September 30, 2006 and 2005.

(Dollars in thousands)	Three Months Ended September 30, 2006	September 30, 2005	Nine Months Ended September 30, 2006	September 30, 2005
Gross gains on investment securities:				
Available-for-sale securities, at fair value	$ 3,692	$ 173	$ 7,042	$ 173
Marketable equity securities (investment company accounting)		1,602		1,602
Non-marketable securities (investment company fair value accounting):				
Private equity fund investments	2,161	2,219	9,341	7,121
Other private equity investments	588	6	974	973
Other investments			1,170	
Non-marketable securities (equity method accounting)	332		852	
Non-marketable securities (cost method accounting):				
Private equity fund investments	103	289	465	816
Other private equity investments	11		120	171
Total gross gains on investment securities	6,887	4,289	19,964	10,856
Gross losses on investment securities:				
Available-for-sale securities, at fair value			(3,230)	(2,274)
Non-marketable securities (investment company fair value accounting):				
Private equity fund investments	(3,438)	(1,450)	(7,294)	(2,903)
Other private equity investments		(479)	(475)	(530)
Other investments	(1,166)	(425)	(1,166)	(425)
Non-marketable securities (equity method accounting)	(157)		(918)	
Non-marketable securities (cost method accounting):				
Private equity fund investments	(481)	(634)	(1,172)	(3,379)
Other private equity investments			(45)	(473)
Total gross losses on investment securities	(5,242)	(2,988)	(14,300)	(9,984)
Gains on investment securities, net	$ 1,645	$ 1,301	$ 5,664	$ 872

Gains on investment securities, net, during the three months ended September 30, 2006 and 2005 were $1.6 million and $1.3 million, respectively, representing an increase of $0.3 million. The net gain on investment securities during the three months ended September 30, 2006 included a $3.7 million gain from the exercise of warrants partially offset by a $1.9 million net loss primarily related to a decline in the fair values of our private equity funds and debt investments. We expect continued variability in the performance of our equity securities and debt portfolios.

Gains on investment securities, net, during the nine months ended September 30, 2006 and 2005 were $5.7 million and $0.9 million, respectively, representing an increase of $4.8 million. The net gain on investment securities during the nine months ended September 30, 2006 included a $7.0 million gain from the exercise of warrants and a $2.0 million net gain on private equity fund investments, partially offset by a loss of $3.2 million due to the sale of certain available for sale investments. The net gain of $2.0 million on our private equity investments related to gains on distributions from private equity fund investments. We expect continued variability in the performance of our equity securities and debt portfolios.

Noninterest Expense

Noninterest expense was $75.0 million for the three months ended September 30, 2006. This was $13.0 million, or 21.0%, higher than noninterest expense of $62.0 million for the three months ended September 30, 2005. Noninterest expense totaled $239.3 million for the nine months ended September 30, 2006. This was $50.2 million, or 26.5%, higher than noninterest expense of $189.1 million for the nine months ended September 30, 2005.

The following table presents the components of noninterest expense for the three and nine months ended September 30, 2006 and 2005, and the percent changes from period to period:

(Dollars in thousands)	Three Months Ended September 30, 2006	2005	% Change	Nine Months Ended September 30, 2006	2005	% Change
Compensation and benefits	$ 45,505	$ 37,796	20.4 %	$ 138,701	$ 122,344	13.4 %
Professional services	11,363	6,336	79.3	29,792	17,059	74.6
Impairment of goodwill				18,434		
Net occupancy	4,112	3,633	13.2	12,615	12,506	0.9
Furniture and equipment	3,899	3,278	18.9	11,274	9,297	21.3
Business development and travel	3,013	2,748	9.6	8,754	7,540	16.1
Correspondent bank fees	1,510	1,429	5.7	4,092	4,125	(0.8)
Data processing services	944	1,098	(14.0)	2,933	3,063	(4.2)
Telephone	1,040	894	16.3	2,827	2,844	(0.6)
(Reduction of) provision for unfunded credit commitments	458	1,508	(69.6)	(3,363)	330	
Other	3,163	3,263	(3.1)	13,274	10,015	32.5
Total noninterest expense	$ 75,007	$ 61,983	21.0 %	$ 239,333	$ 189,123	26.5 %

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

The increase in compensation and benefits expense of $7.7 million was primarily due to a $3.2 million increase in share-based compensation expense to $5.2 million for the three months ended September 30, 2006, compared to $2.0 million for the comparable prior year period. This increase reflects our adoption of SFAS 123(R) as of January 1, 2006, which includes recognizing expense for stock options granted and Employee Stock Purchase Plan shares. Compensation and benefits expense also increased due to temporary staffing fees and an increase in full-time equivalent employees from 1,030 at the end of September 30, 2005 to 1,120 at the end of September 30, 2006.

Professional services expense totaled $11.4 million for the three months ended September 30, 2006, an increase of $5.1 million as compared to $6.3 million for the three months ended September 30, 2005. The increase was primarily related to consulting costs incurred as part of ongoing efforts to enhance and maintain compliance with various regulations.

We recorded a provision of $0.5 million to the liability for unfunded credit commitments for the three months ended September 30, 2006, compared to a provision of $1.5 million for the three months ended September 30, 2005. This provision is linked to the credit commitments outstanding at the balance sheet date as well as the credit quality of our unfunded loan commitments.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

The increase in compensation and benefits expense of $16.4 million was primarily due to an $11.3 million increase in share-based compensation expense to $16.8 million for the nine months ended September 30, 2006, compared to $5.5 million for the comparable prior year period. This increase reflects our adoption of SFAS 123(R) as of January 1, 2006, which includes recognizing expense for stock options granted and Employee Stock Purchase Plan shares. Compensation and benefits expense also increased due to temporary staffing fees and an increase in full-time equivalent employees.

Professional services expense totaled $29.8 million for the nine months ended September 30, 2006, an increase of $12.7 million as compared to $17.1 million for the nine months ended September 30, 2005. The increase was primarily related to consulting costs incurred as part of ongoing efforts to enhance and maintain compliance with various regulations.

In connection with our annual goodwill impairment assessment of SVB Alliant, our investment banking subsidiary, we recognized a non-cash, pre-tax charge of $18.4 million during the second quarter of 2006. The impairment resulted from changes in our outlook for SVB Alliant s future financial performance due to recent changes in staffing and lowered expectations of future revenue streams.

Furniture and equipment expense totaled $11.3 million for the nine months ended September 30, 2006, an increase of $2.0 million as compared to $9.3 million for the nine months ended September 30, 2005. The increase is primarily related to the opening of our new parallel operations facility in Salt Lake City, office relocations and information technology initiatives.

Business development and travel expense totaled $8.8 million for the nine months ended September 30, 2006, an increase of $1.3 million as compared to $7.5 million for the nine months ended September 30, 2005. This increase is attributable to investment in business development by all of our business units.

We recorded a net reduction of $3.3 million to the liability for unfunded credit commitments for the nine months ended September 30, 2006 compared to a provision of $0.3 million for the nine months ended September 30, 2005. This provision is linked to the credit commitments outstanding at the balance sheet date as well as the credit quality of our loan commitments. The change in the provision during the nine months ended September 30, 2006 is primarily due to a refinement of the methodology related to a change in estimate of funding percentages used to estimate the liability for unfunded credit commitments.

During the nine months ended September 30, 2006, we recorded a $1.8 million charge in connection with the settlement of a litigation matter.

Minority Interest in Net Losses (Income) of Consolidated Affiliates

Minority interest in net losses (income) of consolidated affiliates was a net loss of $0.9 million for the three months ended September 30, 2006, compared to net income of $1.3 million for the three months ended September 30, 2005. Minority interest in net (income) losses of consolidated affiliates was net income of $5.1 million for the nine months ended September 30, 2006, compared to net income of $0.5 million for the nine months ended September 30, 2005. The increase during the nine months ended September 30, 2006 is primarily due to gains on sales of investment securities, interest income and an increase in the value of warrant assets held by consolidated affiliates. In addition, total minority interest in capital of consolidated affiliates increased due to equity transactions, which included capital calls of $43.4 million by our consolidated affiliates, partially offset by distributions of $10.2 million and the increase in net income of consolidated affiliates.

Income Taxes

Our effective tax rate was 42.69% for the quarter ended September 30, 2006, compared with 39.26% for the third quarter ended September 30, 2005. The higher tax rate was primarily attributable to an increase in tax payable related to the 2005 Federal tax return, the tax impact of the SFAS 123(R) expense for share-based payments and the lower impact of our federally tax-advantaged investments on the overall pre-tax income.

Our effective tax rate for the nine months ended September 30, 2006 was 42.29% compared to 39.71% for the nine months ended September 30, 2005. The higher tax rate was primarily attributable to the tax impact of SFAS 123(R) for share-based payments on our overall pre-tax income.

Operating Segment Results

In accordance with SFAS No. 131, Disclosures about Segments of an Enterprise and Related Information , we report segment information based on the management approach. The management approach designates the internal reporting used by management for making decisions and assessing performance as the source of our reportable segments. Please refer to the discussion of our segment organization in our 2005 Annual Report on Form 10-K, Part I. Item 1. Business Business Overview.

Our primary source of revenue is from net interest income. Accordingly, our segments are reported using net interest income, net of funds transfer pricing (FTP). FTP is an internal measurement framework designed to assess the financial impact of a financial institution s sources and uses of funds. It is the mechanism by which an earnings credit is given for deposits raised and an earnings charge is made for funded loans. We also evaluate performance based on noninterest income and noninterest expense, which are presented as components of segment operating profit or loss. We do not allocate income taxes to our segments. Additionally, our management reporting model is predicated on average asset balances and therefore, we are unable to provide period end asset balances for segment reporting purposes. The following is our segment information at and for the three and nine months ended September 30, 2006 and 2005.

Commercial Banking

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Income Before Income Tax Expense

Commercial Banking s income before income tax expense for the third quarter ended September 30, 2006 of $37.1 million represented an increase of $4.3 million, or 13.1%, from $32.8 million for the same period a year ago. This increase was due to higher net revenues of $17.6 million and a lower provision for loan losses of $2.0 million, offset by higher noninterest expense of $15.2 million. The increase in net revenues was comprised of an increase in net interest income of $12.8 million and an increase of noninterest income of $4.7 million.

Net interest income of $71.7 million for the third quarter ended September 30, 2006 increased $12.8 million, or 21.7%, from $58.9 million for the same period a year ago. Higher loan volumes and interest rates drove this increase. Net interest income is the difference between interest earned on loans, net of funds transfer pricing and interest paid on deposits, net of funds transfer pricing.

Noninterest income of $25.0 million for the third quarter ended September 30, 2006 increased $4.7 million, or 23.2%, from $20.3 million for the same period a year ago. The increase in noninterest income was primarily driven by an increase in client investment fees of $2.6 million, an increase in net gains on derivatives of $1.1 million and an increase in other noninterest income of $1.0 million. The increase in net gains on derivatives was related to the exercise of equity warrant assets of $0.3 million and an increase in gains on foreign exchange derivative income of $0.8 million.

Noninterest expense of $58.7 million for the third quarter ended September 30, 2006 increased $15.2 million, or 34.9%, from $43.5 million for the same period a year ago. Direct noninterest expense increased $4.5 million due primarily to compensation and benefits, professional services and operational losses. Specifically, employee relocation increased $0.5 million, incentive compensation increased $0.3 million, agency fees increased $0.4 million, consulting fees increased $0.5 million, and a litigation settlement of $1.8 million incurred in the second quarter of 2006, was reclassified to the Commercial Banking segment in the third quarter of 2006. Noninterest expenses related to units supporting Commercial Bank activities were also allocated to Commercial Banking. Increases in share-based compensation and professional services related to the support units contributed to the increase in noninterest expense.

Financial Condition

Average deposits decreased $347.2 million, or 10.3%, primarily due to clients seeking higher returns on deposits as a result of recent increases in short-term market interest rates.

Average loans increased $411.6 million, or 19.8%, during the three months ended September 30, 2006, compared to the same period a year ago. The largest growth in loans was due to core commercial loans, which grew by $234.1 million, and asset-based lending, which grew by $171.4 million. The increase in average loans reflects our focus on serving middle-market clients and new business generation.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Income Before Income Tax Expense

Commercial Banking s income before income tax expense for the nine months ended September 30, 2006 of $109.5 million represented an increase of $14.2 million, or 14.9%, from $95.3 million for the same period a year ago. This increase was due to higher net revenues of $49.0 million, offset by higher noninterest expense of $31.7 million and an increase in the provision for loan losses of $3.3 million. The increase in net revenues was comprised of an increase net interest income of $40.2 million and an increase of noninterest income of $8.8 million.

Net interest income of $204.3 million for the nine months ended September 30, 2006 increased $40.3 million, or 24.6%, from $164.0 million for the same period a year ago. Higher loan volumes and interest rates drove this increase. Net interest income is the difference between interest earned on loans, net of funds transfer pricing and interest paid on deposits, net of funds transfer pricing.

Noninterest income of $70.4 million for the nine months ended September 30, 2006 increased $8.8 million, or 14.3%, from $61.6 million for the same period a year ago. This increase in noninterest income was primarily driven by an increase in client investment fees of $7.4 million and an increase in other noninterest income of $2.6 million, partially offset by a decrease in net gains on derivatives of $0.6 million.

Noninterest expense of $162.2 million for the nine months ended September 30, 2006 increased $31.7 million, or 24.3%, from $130.5 million for the same period a year ago. Direct noninterest expense increased $6.9 million. The increase in direct noninterest expense was primarily driven by expense related to compensation and benefits, professional services, and furniture and equipment. Specifically, base compensation increased by $0.6 million, agency fees increased $0.7 million, incentive compensation increased $0.6 million, employee relocation increased $0.7 million, depreciation increased $1.0 million, and consulting fees increased $1.0 million. Noninterest expenses related to units supporting Commercial Banking activities were also allocated to Commercial Banking. Increases in share-based compensation, and professional services related to the support units contributed to the increase in noninterest expense.

Financial Condition

Average deposits decreased $261.8 million, or 7.8%, primarily due to clients seeking higher returns on deposits as a result of recent increases in short-term market interest rates.

Average loans increased $407.5 million, or 21.1%, during the nine months ended September 30, 2006, compared to the same period a year ago. The largest growth in loans was due to core commercial loans, which grew by $285.1 million, and asset-based lending, which grew by $124.8 million. The increase in average loans reflects our focus on serving middle market clients and new business generation.

SVB Capital

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Income Before Income Tax Expense

SVB Capital   s income before income tax expense for the third quarter ended September 30, 2006 of $5.6 million represented an increase of $3.0 million, or 115.4%, from $2.6 million for the same period a year ago. This increase was due to higher net revenues of $3.9 million offset by an increase in noninterest expenses of $0.9 million. The increase in net revenues was comprised of an increase in net interest income of $2.4 million and an increase in noninterest income of $1.5 million.

Net interest income of $8.3 million for the third quarter ended September 30, 2006 increased $2.4 million, or 40.7%, from $5.9 million for the same period a year ago. Higher loan volumes and interest rates drove this increase. Net interest income is the difference between interest earned on loans, net of funds transfer pricing and interest paid on deposits, net of funds transfer pricing.

Noninterest income of $3.1 million for the third quarter ended September 30, 2006 increased $1.5 million, or 93.8%, from $1.6 million for the same period a year ago. The increase was primarily a result of increased net gains on investments, net of minority interest, of $1.4 million.

Noninterest expense of $5.8 million for the third quarter ended September 30, 2006 increased $0.9 million, or 18.4%, from $4.9 million for the same period a year ago. Direct noninterest expense increased by $0.4 million. The increase in noninterest expense was primarily driven by compensation and benefits expense. Specifically, incentive compensation expense increased by $0.4 million. Noninterest expenses related to units supporting SVB Capital activities were also allocated to SVB Capital. Increases in share-based compensation, and professional services related to the support units contributed to the increase in noninterest expense.

Financial Condition

Average deposits decreased $35.8 million, or 5.4%, while average loans increased $35.7 million, or 83.2%, during the three months ended September 30, 2006, compared to the same period a year ago.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Income Before Income Tax Expense

SVB Capital s income before income tax expense for the nine months ended September 30, 2006 of $19.1 million represented an increase of $11.4 million, or 148.1%, from $7.7 million for the same period a year ago. This increase was due to higher net revenues of $12.8 million offset by an increase in noninterest expense of $1.5 million. The increase in net revenues was comprised of an increase in net interest income of $8.2 million and an increase in noninterest income of $4.7 million.

Net interest income of $23.3 million for the nine months ended September 30, 2006 increased $8.2 million, or 54.3%, from $15.1 million for the same period a year ago. Higher loan volumes and interest rates drove this increase. Net interest income is the difference between interest earned on loans, net of funds transfer pricing and interest paid on deposits, net of funds transfer pricing.

Noninterest income of $11.6 million for the nine months ended September 30, 2006 increased $4.7 million, or 68.1%, from $6.9 million for the same period a year ago. The increase was primarily a result of increased net gains on derivatives, net of minority interest, of $3.1 million, increased client investment fees of $0.8 million, and increased net gains on investments, net of minority interest of $0.7 million.

Noninterest expense of $15.8 million for the nine months ended September 30, 2006 increased $1.5 million, or 10.5%, from $14.3 million for the same period a year ago. Direct noninterest expense decreased by $0.4 million. The decrease in direct noninterest expense was primarily driven by expenses related to compensation and benefits. Specifically, share-based compensation decreased $0.7 million, base compensation decreased by $0.1 million, and employee relocation

decreased $0.1 million. Noninterest expense related to units supporting SVB Capital s activities were also allocated to SVB Capital. Increases in professional services related to the support units contributed to the increase in noninterest expense.

Financial Condition

Average deposits increased $8.7 million, or 1.4%, while average loans increased $3.9 million, or 5.8%, during the nine months ended September 30, 2006, compared to the same period a year ago.

SVB Alliant

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

(Loss) Before Income Tax Expense

SVB Alliant s loss before income tax expense for the third quarter ended September 30, 2006 of $2.9 million represented an increase of $1.6 million, from a loss of $1.3 million for the same period a year ago. The increase in loss was the result of lower revenues of $1.0 million and higher noninterest expenses of $0.7 million.

Noninterest income of $1.9 million for the third quarter ended September 30, 2006 decreased $1.1 million, or 36.7%, from $3.0 million for the same period a year ago. The decrease was due to decreased corporate finance fees.

Noninterest expense of $5.1 million for the third quarter ended September 30, 2006 increased $0.7 million, or 15.9%, from $4.4 million for the same period a year ago. The increase in direct noninterest expense was primarily driven by compensation and benefits. Specifically, incentive compensation increased by $0.6 million.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

(Loss) Before Income Tax Expense

SVB Alliant s loss before income tax expense for the nine months ended September 30, 2006 of $26.6 million represented an increase of $25.8 million, from a loss of $0.8 million for the same period a year ago. The increase in loss was the result of lower revenues of $7.3 million and higher noninterest expenses of $18.5 million.

Noninterest income of $7.1 million for the nine months ended September 30, 2006 decreased $7.6 million, or 51.7%, from $14.7 million for the same period a year ago. The decrease was due to decreased corporate finance fees.

Noninterest expense of $34.3 million for the nine months ended September 30, 2006 increased $18.5 million, or 117.1%, from $15.8 million for the same period a year ago. The increase was due to a pre-tax charge related to an impairment of goodwill of $18.4 million incurred during the second quarter of 2006. The impairment results from changes in the outlook for SVB Alliant s future financial performance due to recent changes in staffing and lowered expectations of future revenue streams.

Other Business Services

Three Months Ended September 30, 2006 Compared to Three Months Ended September 30, 2005

Net Interest Income

Net interest income of $9.6 million for the third quarter ended September 30, 2006 decreased $3.3 million, or 25.6%, from $12.9 million for the same period a year ago. The decrease in net interest income is primarily attributable to an increase in other borrowings expense of $6.5 million, which was partially offset by higher loan volumes for SVB Private Client Services and higher loan and deposit volumes for SVB Global along with higher interest rates.

Nine Months Ended September 30, 2006 Compared to Nine Months Ended September 30, 2005

Net Interest Income

Net interest income of $31.4 million for the nine months ended September 30, 2006 decreased $7.5 million, or 19.3%, from $38.9 million for the same period a year ago. The decrease in net interest income is primarily attributable to an increase in other borrowings expense of $13.1 million, which was partially offset by higher loan volumes for SVB Private Client Services and higher loan and deposit volumes for SVB Global along with higher interest rates.

Consolidated Financial Condition SVB Financial Group and Subsidiaries

Total assets of $5.87 billion at September 30, 2006 increased $331.4 million from December 31, 2005. The increase of our total assets was primarily due to an increase in loans.

Federal Funds Sold, Securities Purchased Under Agreement to Resell and Other Short-Term Investments

Federal funds sold, securities purchased under agreement to resell and other short-term securities totaled $295.4 million at September 30, 2006, an increase of $119.7 million, or 68.1%, compared to the $175.7 million outstanding at December 31, 2005. The increase was due to higher short-term client cash flows at September 30, 2006.

Investment Securities

Investment securities totaled $1.73 billion at September 30, 2006, a decrease of $310.8 million, or 15.3% from $2.04 billion in December 31, 2005. The decrease was due to maturities and paydowns of certain investment securities and sales of selected lower yielding investments.

Refer to our 2005 Form 10-K under Part II. Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations - Critical Accounting Policies and Part II. Item 8. Consolidated Financial Statements and Supplementary Data Note 2. Significant Accounting Policies Investment Securities for our accounting policies related to investment securities.

Loans

Loans, net of unearned income of $21.3 million at September 30, 2006, totaled $3.32 billion, an increase of $476.2 million from the balance at December 31, 2005. The increase in loans reflects our focus on serving middle market clients and new business generation.

Our gross loans by industry niche as of September 30, 2006 and December 31, 2005 are as follows:

(Dollars in thousands)	September 30, 2006	December 31, 2005
Technology	$ 1,662,506	$ 1,417,838
Life science	301,188	266,786
Private equity	526,559	362,754
Winery	368,146	349,744
Other (1)	482,440	466,799
Total gross loans	$ 3,340,839	$ 2,863,921

---

(1) At September 30, 2006, this balance was predominantly SVB Private Client Services loans. The balance also included real estate, media and religious niche loans, areas that we exited in 2002 but will continue to service until the loans are paid off.

Credit Quality and the Allowance for Loan Losses

For a description of the accounting policies related to the allowance for loan losses, see Part II. Item 7. Management s Discussion and Analysis of Financial Condition and Results of Operations Critical Accounting Policies in our 2005 Form 10-K.

We incurred $3.2 million in gross loan charge-offs and realized $2.1 million in gross loan recoveries during the three months ended September 30, 2006. Both gross loan charge-offs and recoveries for the third quarter ended September 30, 2006 were primarily from technology sector clients. We realized net charge-offs of $2.1 million for the nine months ended September 30, 2006, compared to $1.1 million of recoveries for the nine months ended September 30, 2005.

Nonperforming assets consist of well-secured loans that are past due 90 days or more but are still accruing interest, and loans on nonaccrual status. The table below sets forth certain relationships between nonperforming assets and the allowance for loan losses:

45

(Dollars in thousands)	September 30, 2006	December 31, 2005
Nonperforming Loans and Assets:		
Loans past due 90 days or more	$	$ 1,046
Nonaccrual loans	9,322	6,499
Total nonperforming loans	9,322	7,545
Other real estate owned	5,710	6,255
Total nonperforming assets	$ 15,032	$ 13,800
Nonperforming loans as a percentage of total gross loans	0.28 %	0.26 %
Nonperforming assets as a percentage of total assets	0.26 %	0.25 %
Allowance for loan losses	$ 39,549	$ 36,785
As a percentage of total gross loans	1.18 %	1.28 %
As a percentage of nonperforming loans	424.25 %	487.54 %
Allowance for unfunded credit commitments (1)	$ 13,751	$ 17,115

(1) The allowance for unfunded credit commitments is included as a component of Other Liabilities.

Fair Value Hedges and Derivatives

Derivatives are recorded as a component of other assets and liabilities and were comprised of the following as of September 30, 2006 and December 31, 2005:

(Dollars in thousands)	As of September 30, 2006	As of December 31, 2005	% Change
Assets (liabilities):			
Interest rate swap	$ (2,456)	$	
Equity warrant assets	32,420	27,802	16.61 %
Foreign exchange forward and option contracts	(1,177)	766	(253.66)
Total	$ 28,787	$ 28,568	(0.77)%

Derivative instruments that we hold as part of our interest rate risk management include interest rate swaps and forward contracts. On October 30, 2003, we entered into an interest rate swap agreement with a notional amount of $50.0 million. This agreement hedges against the risk of changes in the fair value associated with the majority of our 7.0% fixed rate, junior subordinated debentures, which management evaluates for effectiveness using the statistical regression analysis approach for each reporting period.

The terms of the interest rate swap agreement provide for a swap of our 7.0% fixed rate payment for a variable rate based on the London Inter-Bank Offer Rate (LIBOR) plus a spread. The interest rate swap agreement provided a cash benefit of $30.0 thousand and $0.3 million during the three months ended September 30, 2006 and 2005, respectively, and a cash benefit of $0.3 million and $1.0 million during the nine months ended September 30, 2006 and 2005, respectively, which was recognized in the consolidated statements of income as a reduction in interest expense. The swap agreement largely mirrors the terms of the junior subordinated debentures and therefore is callable by the counterparty anytime on or after October 30, 2008. All components of the swap s gain or loss are included in the assessment of hedge effectiveness. Changes in fair value of the fair value hedge agreement, which is primarily dependent on changes in market interest rates, are recognized in net income as a gain or loss on derivative instruments. We recorded a non-cash increase in fair value of the fair value hedge agreement of $0.4 million for the three months ended September 30, 2006 and a non-cash decrease in fair value of $3.3 million for the interest rate swap agreement prior to its designation as a fair value hedge and $0.8 million for the fair value hedge agreement for the nine months ended September 30, 2006, which were reflected in gains on derivative instruments, net.

Equity warrant assets decreased by $5.2 million for the three months ended September 30, 2006. The decrease related to $6.6 million in exercised warrants and $1.6 million in terminated and expired warrants, offset by $2.4 million in new warrants and a $0.6 million non-cash increase in fair value of the equity warrant assets. Equity warrant assets increased by $4.6 million for the nine months ended September 30, 2006. The increase related to a $10.6 million non-cash increase in fair value and $6.5 million in new warrants, offset by $3.1 million in

terminated and expired warrants and $9.4 million in exercised warrants. The non-cash change in fair value is attributable to changes in the underlying assumptions used to value the equity warrant assets including: changes in the risk-free interest rate, changes in the estimated underlying value of our client companies stock, changes in the volatility of share prices for comparable public companies, and changes in the expected life.

We enter into foreign exchange forward contracts and non-deliverable foreign exchange forward contracts with clients involved in international trade finance activities, either as the purchaser or seller of foreign currency at a future date, depending upon the clients need. To mitigate the risk of fluctuations in foreign currency exchange rates on these contracts, we enter into opposite way foreign exchange forward contracts and non-deliverable foreign exchange forward contracts with correspondent banks. These contracts are short-term in nature, typically expiring within one year. At September 30, 2006 and

December 31, 2005, the aggregate notional amounts of these contracts totaled $413.9 million and $432.7 million, respectively. The maximum credit exposure for counter-party nonperformance for foreign exchange forward contracts with both clients and correspondent banks amounted to $2.5 million at September 30, 2006 and $5.7 million at December 31, 2005. We have not experienced nonperformance by a counter-party and therefore have not incurred related losses. Further, we anticipate performance by all counter-parties to such foreign exchange forward contracts.

We enter into foreign currency option contracts with clients involved in international trade finance activities, either as the purchaser or seller of foreign currency options, depending upon the client s need. To mitigate the risk of fluctuations in foreign currency exchange rates on these contracts, we enter into opposite way foreign currency option contracts with correspondent banks. These contracts typically expire in less than one year. At September 30, 2006 and December 31, 2005, the aggregate notional amounts of these contracts totaled $41.2 million and $18.8 million, respectively. We have not experienced nonperformance by a counter-party and therefore have not incurred related losses. Further, we anticipate performance by all counter-parties.

Deposits

Deposits decreased by $278.3 million to $3.97 billion at September 30, 2006, compared to $4.25 billion at December 31, 2005. Deposits decreased primarily due to clients seeking higher returns on deposits as a result of recent increases in short-term market interest rates. Noninterest-bearing demand deposits as a percentage of total deposits was 74.4%, which increased slightly from December 31, 2005.

Borrowings

Borrowings increased by $536.5 million to $1.0 billion at September 30, 2006, compared to $475.3 million at December 31, 2005. The increase relates primarily to an increase in securities sold under agreement to repurchase of $270.3 million, an increase of federal funds purchased of $125.0 million, and an increase in FHLB advances of $135.0 million. The increases in short-term borrowings were primarily used to fund the growth in our loan portfolio.

Other Liabilities

Other liabilities at September 30, 2006 increased from December 31, 2005, primarily due to an increase in the volume of foreign exchange transactions executed, eligible Tax Credit Fund investments under the Community Reinvestment Act, and an accrual for settlement of litigation.

Minority Interest in Capital of Consolidated Affiliates

Minority interest in capital of consolidated affiliates increased by $37.2 million to $156.7 million at September 30, 2006, compared to $119.5 million at December 31, 2005. The increase was primarily due to capital contributions from the investors of our consolidated affiliates.

Capital Resources

Our management seeks to maintain adequate capital to support anticipated asset growth and credit risks, and to ensure that SVB Financial Group and the Bank are in compliance with all regulatory capital guidelines. Our primary sources of new capital include retained earnings and the issuance of common stock.

Common Stock

During the third quarter of 2006, the Company repurchased 551,800 shares of its common stock at an aggregate cost of $25.0 million under the stock repurchase program, leaving $77.2 million remaining and authorized to be repurchased under the current program. Repurchases of common stock during the nine months ended September 30, 2006 totaled $94.3 million and represented 1,944,415 shares.

From time to time, we may implement a non-discretionary trading plan under Rule 10b5-1 of the Securities and Exchange Act of 1934, which we will automatically repurchase shares of our common stock pursuant to a predetermined formula for a specified period of time.

Stockholders Equity

Stockholders equity totaled $595.8 million at September 30, 2006, an increase of $26.5 million, or 4.7%, from $569.3 million at December 31, 2005. This increase was primarily the result of a reduction in unrealized losses on our available-for-sale investment securities and an increase in consolidated net income, partially offset by common stock repurchases. We have not paid a cash dividend on our common stock since 1992. As of September 30, 2006, there were no

---

plans for payment of dividends. Additionally, we do not have any material commitments for capital expenditures as of September 30, 2006.

Funds generated through retained earnings are a significant source of capital and liquidity, and are expected to continue to be so in the future. Our management engages in a periodic capital planning process in an effort to make effective use of the capital available to us. The capital plan considers capital needs for the foreseeable future and allocates capital to both existing business activities and expected future business activities. Expected future activities for which capital is set aside include potential product expansions and acquisitions of new business lines.

Both SVB Financial Group and Silicon Valley Bank are subject to capital adequacy guidelines issued by the Federal Reserve Board. Under these capital guidelines, the minimum total risk-based capital ratio and Tier 1 risk-based capital ratio requirements are 10.0% and 6.0%, respectively.

The Federal Reserve Board has also established minimum capital leverage ratio guidelines for state member banks. The ratio is determined using Tier 1 capital divided by quarterly average total assets. The guidelines require a minimum of 5.0% for a well-capitalized depository institution. For further information on risk-based capital and leverage ratios as defined by the Federal Reserve Board, see our 2005 Form 10-K, under Part I. Item 1. Business Supervision and Regulation Regulatory Capital.

Both SVB Financial Group and Silicon Valley Bank s capital ratios were in excess of regulatory guidelines for a well-capitalized depository institution as of September 30, 2006, and December 31, 2005. Capital ratios for SVB Financial Group are set forth below:

	September 30, 2006		**December 31, 2005**	
SVB Financial Group:				
Total risk-based capital ratio	13.64	%	14.74	%
Tier 1 risk-based capital ratio	12.06	%	12.39	%
Tier 1 leverage ratio	12.21	%	12.08	%

Related Party Transactions

In April 2006, the Bank issued a letter of credit in the amount of $0.2 million on behalf of SurgRx, Inc. The initial maturity date of the letter of credit is April 4, 2007, but the letter of credit will be automatically renewed unless affirmatively terminated by SurgRx until its final expiry on May 10, 2010. The letter of credit is secured by a certificate of deposit pledged by SurgRx, Inc. and held by the Bank. The Bank also extended to SurgRx a business credit card line of credit in the amount of $70,000 and a merchant services line of credit in the amount of $15,000, both of which are secured by restricted cash pledged to the Bank by SurgRx. David Clapper, one of our directors, is the Chief Executive Officer of SurgRx, Inc.

In May 2006, the Bank extended a revolving line of credit in the aggregate amount of $60.0 million to NEA XII, LP. Amounts outstanding under the line of credit are secured by the right to receive proceeds of capital calls from the borrower s limited partners. Richard Kramlich, one of our directors, is an owner of NEA Partners 12, L.P., which acts as the General Partner for NEA XII, L.P. The maturity date of the line of credit is 364 days from the date the credit was first extended.

SVB Financial Group has a commitment under a revolving line of credit facility to Gold Hill Venture Lending 03, LP, a venture debt fund (Gold Hill), and its affiliated funds. SVB Financial Group has a 9.3% effective ownership interest in Gold Hill, as well as a 90.7% majority interest in its general partner, Gold Hill Venture Lending Partners 03, LLC. The line of credit bears an interest rate of prime plus one percent. During the nine months ended September 30, 2006, SVB Financial Group renewed the line of credit for an additional year until August 2007 and increased the commitment amount to $40.0 million. The highest aggregate balance outstanding during the nine months ended September 30, 2006 was $30.0 million.

In October 2006, SVB Business Partners (Shanghai) Co., Ltd., a wholly-owned subsidiary of SVB Financial Group, entered an agreement with New Enterprise Associates (Beijing), Ltd., by which SVB Business Partners (Shanghai) Co., Ltd., will provide business consulting services to New Enterprise Associates (Beijing), Ltd. The agreement has a three-year term. During the first year of the agreement New Enterprise Associates (Beijing), Ltd., will pay $99,250 to SVB Business Partners (Shanghai). New Enterprise Associates (Beijing), Ltd. is a wholly-owned subsidiary of NEA Management Company, LLC, a company in which Richard Kramlich is an owner.

The Bank has renewed a line of credit in the amount of $1,000,000 to Skalli Corporation (dba St. Supery Vineyards and Winery) in November 2006. Michaela Rodeno, one of our directors, is the Chief Executive Officer of St. Supery. The loan expires in October 2007, with interest payable monthly. Additionally, the Bank plans to extend to Skalli Corporation a line of credit in the amount of $40,000 for business credit cards and $550,000 in availability for automated clearing house transactions.

Off-Balance Sheet Arrangements

Financial and Performance Standby Letters of Credit Guarantees

We provide guarantees related to financial and performance standby letters of credit issued to our clients to enhance their credit standings and enable them to complete a wide variety of business transactions. Financial standby letters of credit are conditional commitments issued by us to guarantee the payment by a client to a third party (beneficiary). Financial standby letters of credit are primarily used to support many types of domestic and international payments. Performance standby letters of credit are issued to guarantee the performance of a client to a third party when certain specified future events have occurred. Performance standby letters of credit are primarily used to support performance instruments such as bid bonds, performance bonds, lease obligations, repayment of loans, and past due notices. These standby letters of credit have fixed expiration dates and generally require a fee paid by a client at the time we issue the commitment. Fees generated from these standby letters of credit are recognized in noninterest income over the commitment period using the straight-line method.

The credit risk involved in issuing letters of credit is essentially the same as that involved with extending loan commitments to clients, and accordingly, we use a credit evaluation process and collateral requirements similar to those for loan commitments. Our standby letters of credit are often cash-secured by our clients. The actual liquidity needs or the credit risk that we have experienced historically have been lower than the contractual amount of letters of credit issued because a significant portion of these conditional commitments expire without being drawn upon.

The table below summarizes our standby letter of credits at September 30, 2006. The maximum potential amount of future payments represents the amount that could be remitted under the standby letters of credit if there were a total default by the guaranteed parties, without consideration of possible recoveries under recourse provisions or from the collateral held or pledged.

(Dollars in thousands as of September 30, 2006)	Expires within one year or less	Expires after one year	Total amount outstanding	Maximum amount of future payments
Financial standby	$ 581,167	$ 53,343	$ 634,510	$ 634,510
Commercial standby	5,845		5,845	5,845
Performance standby	14,723	9,772	24,495	24,495
Total	$ 601,735	$ 63,115	$ 664,850	$ 664,850

At September 30, 2006, the carrying amount of the liabilities related to financial and performance standby letters of credit was approximately $2.5 million. At September 30, 2006, cash and investment securities collateral available to us to reimburse losses under financial and performance standby letters of credits was $297.3 million.

Credit Card Guarantees

Additionally, the Bank, as a financial provider, routinely guarantees credit cards for some of our customers which have been provided by an unaffiliated financial institution. We have recourse against the customer for any amount it is required to pay to a third party in the event of default under these arrangements. These guarantees are subject to the same credit policies, underwriting standards and approval process as loans made by us. Certain of these amounts are secured by certificates of deposit and other assets which we have rights to in the event of nonperformance by the customers. The total amount of this guarantee was $70.8 million at September 30, 2006. It is not considered probable that material losses would be incurred by us as a result of these arrangements.

Liquidity

An important objective of asset/liability management is to manage liquidity. The objective of liquidity management is to ensure that funds are available in a timely manner to meet loan demand, to meet depositors needs, and to service other liabilities as they become due without causing an undue amount of cost or risk and without causing a disruption to normal operating conditions.

We regularly assess the amount and likelihood of projected funding requirements through a review of factors such as historical deposit volatility and funding patterns, present and forecasted market and economic conditions, individual client

---

funding needs, and existing and planned business activities. Our asset/liability committee provides oversight to the liquidity management process and recommends policy guidelines, subject to the approval of our Board of Directors, and courses of action to address our actual and projected liquidity needs.

Historically, we have attracted a stable, low-cost deposit base, which has been our primary source of liquidity. We continue to expand on opportunities to increase our liquidity and take steps to carefully manage our liquidity. We have increased our use of other sources of liquidity available to us, including federal funds purchased, FHLB advances, reverse repurchase agreements, and other short-term borrowing arrangements. Our liquidity requirements can also be met through the use of our portfolio of liquid assets. Our definition of liquid assets includes cash and cash equivalents in excess of the minimum levels necessary to carry out normal business operations, federal funds sold, securities purchased under resale agreements, investment securities maturing within six months, investment securities eligible and available for financing or pledging purposes with a maturity in excess of six months, and anticipated near-term cash flows from investments.

Our policy guidelines provide that liquid assets as a percentage of total deposits should not fall below 20%. Silicon Valley Bank s ratio of liquid assets to total deposits was 37.54% and 39.59% at September 30, 2006 and December 31, 2005, respectively, both well in excess of our minimum policy guidelines. In addition to monitoring the level of liquid assets relative to total deposits, we also utilize other policy measures in liquidity management activities such as the percentage of liquid assets to volatile liabilities and our loan-to-deposit ratio.

Condensed Consolidated Statements of Cash Flows

	For the Nine Months Ended	
(Dollars in thousands)	**September 30, 2006**	**September 30, 2005**
Net cash provided by operating activities	$ 77,625	$ 84,054
Net cash used for investing activities	(168,542)	(453,124)
Net cash provided by financing activities	229,320	160,543
Net increase (decrease) in cash equivalents	138,403	(208,527)
Cash and cash equivalents at the beginning of the year	462,098	627,218
Cash and cash equivalents at the end of the period	$ 600,501	$ 418,691

In analyzing our liquidity during the nine months ended September 30, 2006 and 2005, reference is made to our interim unaudited consolidated statements of cash flows for the nine months ended September 30, 2006 and 2005; see Item 1. Interim Unaudited Consolidated Financial Statements. The statements of cash flows include separate categories for operating, investing, and financing activities.

Cash provided by operating activities was $77.6 million for the nine months ended September 30, 2006, compared to $84.1 million for the nine months ended September 30, 2005. The source of funds during the nine months ended September 30, 2006 and 2005 were principally from net income.

For the nine months ended September 30, 2006, cash used for investing activities was $168.5 million as compared to $453.1 million for the nine months ended September 30, 2005. During the nine months ended September 30, 2006, disbursements of loans to customers were a significant use of funds. Purchases of available-for-sale securities and disbursements of loans to customers were significant uses of funds during the nine months ended September 2005.

Cash provided by financing activities was $229.3 million for the nine months ended September 30, 2006, compared to $160.5 million for the nine months ended September 30, 2005. Short-term borrowings provided the primary sources of financing during the nine months ended September 30, 2006, which were offset by declines in deposits and common stock repurchases. During the nine months ended September 30, 2005, deposits and short-term borrowings provided the primary sources of financing, partially offset by common stock repurchases.

Cash and cash equivalents at September 30, 2006 were $600.5 million.

On a stand-alone basis, SVB Financial Group s primary liquidity channels include dividends from Silicon Valley Bank, its investment portfolio assets, and its ability to raise debt and capital. The ability of Silicon Valley Bank to pay dividends is subject to certain regulations described in Part I. Item 1. Business Supervision and Regulation Restriction on Dividends of our 2005 Form 10-K.

Forward-Looking Statements

This Quarterly Report on Form 10-Q, including the accompanying Management s Discussion and Analysis of

50

Financial Condition and Results of Operations, contains forward-looking statements that involve risks, uncertainties and assumptions that could cause actual results to differ materially and adversely from those expressed in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in Item 1A of Part II under Risk Factors and Item 3 below under Quantitative and Qualitative Disclosures about Market Risk Factors That May Affect Future Results. We urge investors to consider all of these factors carefully in evaluating the forward-looking statements contained in this report. Forward-looking statements can be identified by words such as anticipates, intends, estimates, expects, believes, plans, predicts, and similar terms. In addition, forward-looking statements in without limitation, any statements which include forecasts or projections such as:

- projections of our revenues, income or loss, earnings or loss per share, capital expenditures, dividends, capital structure, or other financial items;
- statements of our plans and objectives for future operations, including plans or objectives relating to our products or services;
- statements of future economic performance including projections concerning prevailing interest rates; and
- any statement of the assumptions underlying or relating to any of the foregoing.

We assume no obligation and do not intend to revise or update any forward-looking statements contained in this Quarterly Report on Form 10-Q.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Interest Rate Risk Management

A key objective of asset/liability management is to manage interest rate risk associated with changing asset and liability cash flows and market interest rate movements. Interest rate risk occurs when interest rate sensitive assets and liabilities do not re-price simultaneously both in timing and volume. Our asset/liability committee provides oversight to our interest rate risk management process and recommends policy guidelines regarding exposure to interest rates for approval by our Board of Directors. Adherence to these policies is monitored on an ongoing basis, and decisions related to the management of interest rate exposure are made when appropriate.

We mitigate interest rate risk principally through strategies involving our investment securities portfolio. Our policies permit the use of off-balance-sheet derivative instruments in managing interest rate risk.

Our monitoring activities related to managing interest rate risk include both interest rate sensitivity gap analysis and the use of a simulation model. While traditional gap analysis provides a simple picture of the interest rate risk embedded in the balance sheet, it provides only a static view of interest rate sensitivity at a specific point in time and does not measure the potential volatility in forecasted results relating to changes in market interest rates over time. Accordingly, we combine the use of gap analysis with use of a simulation model that provides a dynamic assessment of interest rate sensitivity.

For further information see Part II. Item 7A. Quantitative and Qualitative Disclosures About Market Risk in our 2005 Form 10-K for disclosure of the quantitative and qualitative information regarding the interest rate risk inherent in interest rate risk sensitive instruments as of December 31, 2005. As of September 30, 2006, there have been no significant changes to the interest rate risk information contained in our 2005 Form 10-K or to our policies in managing interest rate risk.

Market Value of Portfolio Equity (MVPE)

One application of the aforementioned simulation model involves measurement of the impact of market interest rate changes on the net present value of estimated cash flows from our assets, liabilities, and off-balance sheet items, defined as the market value of portfolio equity (MVPE). Another application measures the impact of market interest rate changes on our net interest income (NII).

The following table presents our MVPE and NII exposure at September 30, 2006 and December 31, 2005, related to an instantaneous and sustained increase or decrease in market interest rates of 100 and 200 basis points, respectively.

Change in interest rates (basis points)	Estimated MVPE	Estimated Increase/ (Decrease) in MVPE Amount	Percent	Estimated NII	Estimated Increase/ (Decrease) in NII Amount	Percent
	(Dollars in thousands)					
September 30, 2006:						
+200	$ 981,652	$ (4,765)	(0.5)%	$ 413,525	$ 35,129	9.3 %
+100	982,447	(3,970)	(0.4)	396,087	17,691	4.7
-	986,417			378,396		
-100	975,367	(11,050)	(1.1)	354,731	(23,665)	(6.3)
-200	938,914	(47,503)	(4.8)	326,954	(51,442)	(13.6)
December 31, 2005:						
+200	$ 1,136,407	$ (12,792)	(1.1)%	$ 408,682	$ 41,236	11.2 %
+100	1,143,348	(5,851)	(0.5)	388,086	20,640	5.6
-	1,149,199			367,446		
-100	1,138,898	(10,301)	(0.9)	344,489	(21,957)	(6.2)
-200	1,093,921	(55,278)	(4.8)	312,746	(54,700)	(14.9)

The market value calculations supporting the results in the preceding table are based on the present value of estimated cash flows using both market interest rates provided by independent broker/dealers and other publicly available sources that we deem reliable. These calculations do not contemplate any changes that we could make to reduce our MVPE or NII exposure in response to a change in market interest rates.

As with any method of measuring interest rate risk, certain shortcomings are inherent in the method of analysis presented in the preceding table. For example, although certain of our assets and liabilities may have similar maturity or re-pricing profiles, they may react to changes in market interest rates with different magnitudes. Also, actual prepayment rates on loans and investments could vary substantially from the assumptions utilized in the model to derive the results as presented in the preceding table. Further, a change in the shape of the forward yield curve could result in different MVPE and NII estimations from those presented herein. Accordingly, the results in the preceding table should not be relied upon as indicative of actual results in the event of changing market interest rates. Additionally, the resulting MVPE and NII estimates are not intended to represent, and should not be construed to represent the underlying value.

Our MVPE and NII sensitivity at September 30, 2006 decreased from December 31, 2005, primarily due to increases in short-term borrowings while staying within our policy guidelines. These estimates are highly assumption-dependent and will change regularly as the Company s asset-liability structure changes and as different interest rate environments evolve. We expect to continue to manage our interest rate risk actively utilizing on and off balance sheet strategies as appropriate.

Interest rate risk is the most significant market risk impacting us. Other types of market risk affecting us in the normal course of our business activities include foreign currency exchange risk, equity price risk, and basis risk. The impact resulting from these market risks is not considered significant, and no separate quantitative information concerning market rate and price exposure is presented herein.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Disclosure controls and procedures are the controls and other procedures that are designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Securities Exchange Act of 1934 (Exchange Act) is recorded, processed, summarized, and reported within the time periods specified in the Securities and Exchange Commission s (SEC) rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed in the reports that the Company files or submits under the Exchange Act is accumulated and communicated to management, including the Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

The Company carried out an evaluation, under the supervision and with the participation of management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of our disclosure controls and procedures as of September 30, 2006 pursuant to Exchange Act Rule 13a-{15b}. Based upon that evaluation and as a result of the material weaknesses described below that were first identified in the Company s Annual Report on Form 10-K for the year ended December 31, 2005 and have not yet been fully remediated, the Chief Executive Officer and Chief Financial Officer have concluded that the Company s disclosure controls and procedures were not effective as of September

30, 2006.

Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting at the Company. The Company s internal control over financial reporting is a process designed under the supervision of the Chief Executive Officer and Chief Financial Officer to provide reasonable assurance regarding the reliability of financial reporting and the preparation of our financial statements for external reporting purposes in accordance with U.S. generally accepted accounting principles (GAAP). A company s internal control over financial reporting includes policies and procedures that

(1) pertain to the maintenance of records that accurately and fairly reflect, in reasonable detail, transactions and dispositions of our assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with GAAP and that receipts and expenditures are being made only in accordance with authorizations of management and the directors of the Company, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

Because of its inherent limitations, internal control over financial reporting cannot provide absolute assurance of achieving financial reporting objectives. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

As of December 31, 2005, the Company carried out an evaluation, under the supervision and with the participation of the Company s management, including the Company s Chief Executive Officer and Chief Financial Officer, of the effectiveness of the Company s internal control over financial reporting pursuant to Rule 13a-15(c), as adopted by the SEC under the Exchange Act. In evaluating the effectiveness of the Company s internal control over financial reporting, management used the framework established in Internal Control Integrated Framework, issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

A material weakness is a control deficiency, or combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. Management identified the following material weaknesses as of December 31, 2005:

The Company did not have adequately designed internal controls in its financial reporting process related to the selection and application of U.S. generally accepted accounting principles (GAAP). Specifically, accounting policies, procedures and practices were not consistently developed, maintained or updated in a manner ensuring that financial statements were prepared in accordance with GAAP. Also, policies and procedures were not designed to consistently ensure the preparation and retention of adequate documentation to support key judgments made in connection with the selection and application of significant accounting policies within the Company s financial reporting process. Finally, the Company s policies and procedures did not consistently provide for effective analysis, implementation, and documentation of new accounting pronouncements.

The Company did not maintain sufficient levels of appropriately qualified and trained personnel in our financial reporting processes. As a result, the Company did not establish internal control over financial reporting policies and procedures related to (a) the timely preparation of comprehensive documentation supporting management s analysis of the appropriate accounting treatment for warrant derivative assets or other non-routine or complex transactions, and (b) the review of such documentation by qualified internal staff, assisted by external advisors as deemed necessary, to determine its completeness and the propriety of the Company s conclusions.

These material weaknesses resulted in the restatement, in December 2005, of the Company s previously issued consolidated financial statements as of December 31, 2004 and 2003, and for each of the years in the three-year period ended December 31, 2004, and the interim consolidated financial information for each of the quarterly periods in 2004 and 2003 and the quarterly period ended March 31, 2005. Specifically, the aforementioned material weaknesses in internal control over financial reporting as of December 31, 2005 resulted in the following accounting errors:

(1) Derivative equity warrant assets with net share settlement provisions were not reported as derivatives in accordance with the provisions of Statement of Financial Accounting Standards (SFAS) No. 133, *Accounting for Derivative Instruments and Hedging Activities*, as amended. Specifically, the Company failed to properly reflect the fair value of equity warrant assets with net settlement terms received during lending activity in our consolidated balance sheet, the change in fair value of the equity warrant assets in the income statement and the accretion of the grant date fair value of equity warrant assets to interest income as a yield adjustment.

(2) Initial non-refundable corporate finance fees were not reported in accordance with the provisions of Staff Accounting Bulletin No. 104, *Revenue Recognition*. Specifically, the Company failed to defer recognition of initial upfront non-refundable retainers received upon execution of engagement letters to provide mergers and acquisitions advisory services until the completion of all contractual obligations pursuant to the terms of the engagement letters or upon receipt or notification of an engagement termination letter.

(3) Non-refundable loan fees and costs associated with the Company s lending products and fees associated with letters of credit were not reported in accordance with the provisions of SFAS No. 91, *Accounting for Nonrefundable Fees and Costs Associated with Originating or Acquiring Loans and Initial Direct Costs of Leases.* Specifically, the Company failed to recognize net fee revenue in accordance with the appropriate straight-line or interest method, as

53

---

prescribed by SFAS No. 91, for net loan fee income obtained in connection with the extension of lending products. In addition, the Company inappropriately recognized non-refundable loan fees that it receives for factoring loans immediately rather than deferring and amortizing fees over the term of the facility granted. The Company did not properly defer direct loan origination costs associated with originating certain loan products. In addition, the Company misclassified fees on certain letters of credit as interest income rather than noninterest income on commitments where the probability of exercise was deemed remote.

(4) Certain investment securities that were readily convertible to known amounts of cash and present insignificant risk of changes in value with original or purchased maturity dates of 90 days or less were not reported as cash equivalents in accordance with the provisions of SFAS No. 95, *Statement of Cash Flows*. This misapplication of GAAP resulted in a reclassification in the Company s consolidated balance sheets of money market mutual fund investments and commercial paper investments from investment securities to federal funds sold and securities purchased under agreement to resell and other short-term investment securities.

(5) Current federal income taxes receivable and current federal income taxes payable were not reflected net on the Company s balance sheets. This misapplication of GAAP resulted in a change to the Company s other assets and other liabilities. Current federal income taxes receivable and current federal income taxes payable should be netted as the Company has the legal right of offset, as defined by FIN No. 39, *Offsetting of Amounts Related to Certain Contracts*.

Remediation of Material Weaknesses

The Company s management has identified the steps necessary to address the aforementioned material weaknesses, including:

Documenting of processes and procedures, along with appropriate training, to ensure that the Company s accounting policies, which have been corrected to conform with GAAP, are consistently applied going forward;

Hiring additional accounting personnel to ensure that accounting personnel with adequate experience, skills and knowledge particularly in relation to complex or non-routine transactions are directly involved in the review and accounting evaluation of such transactions;

Involving internal personnel assisted by external advisors, as deemed necessary, early in the process, particularly in complex or non-routine transactions, to obtain additional guidance as to the application of GAAP to any such proposed transaction;

Ensuring comprehensive documentation supporting management s analysis of the appropriate accounting treatment for equity warrant derivatives or other non-routine or complex transactions and the related review thereof are completed to standards established by senior accounting personnel and the principal accounting officer;

Requiring senior accounting personnel and the principal accounting officer to review all complex or non-routine transactions to evaluate and approve the accounting treatment for such transactions; and

Requiring regular periodic review of all significant accounting policies and their adoptions, application, and impact by senior accounting personnel and the principal accounting officer together with the Audit Committee of the Board of Directors.

The Company began to execute the remediation plans identified above in the third quarter of 2005, and we believe our controls and procedures will continue to improve as a result of the further implementation of these actions.

We cannot assure you that these remediation efforts will be successful or that our internal control over financial reporting will be effective in accomplishing all control objectives all of the time. See Part I, Item 3. Quantitative and Qualitative Disclosures about Market Risk Factors That May Affect Future Results.

Changes in Internal Control

Except as described above, there were no changes in our internal control over financial reporting identified in management s evaluation pursuant to Rules 13a-15(d) or 15d-15(d) of the Exchange Act during the period covered by this Quarterly Report on Form 10-Q that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

54

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Certain lawsuits and claims arising in the ordinary course of business have been filed or are pending against us or our affiliates. Based upon information available to us, our review of such claims to date and consultation with our outside legal counsel, management believes the liability relating to these actions, if any, will not have a material adverse effect on our liquidity, consolidated financial position, or results of operations. Where appropriate, as we determine, reserves have been established in accordance with SFAS No. 5, Accounting for Contingencies. The outcome of litigation and other legal and regulatory matters is inherently uncertain, however, and it is possible that one or more of the legal or regulatory matters currently pending or threatened could have a material effect.

On May 24, 2001, Gateway Communications, Inc. (Gateway) filed a lawsuit in the United States Bankruptcy Court for the Southern District of Ohio (Western Division) naming the Bank as a defendant. Gateway (the debtor in the bankruptcy case) alleged that the Bank s actions in connection with a loan resulted in Gateway s bankruptcy, and sought $20 million in compensatory damages, punitive damages, interest and attorneys fees. On June 24, 2003, the Court dismissed four of the five counts in the complaint, including the claim for punitive damages, leaving one breach of contract claim. The matter was settled in its entirety in October 2006 for an amount previously accrued for in our financial statements.

ITEM 1A. RISK FACTORS

Our business faces significant risks, including credit, market/liquidity, operational, legal/regulatory, and strategic/reputation risks. The factors described below may not be the only risks we face, and are not intended to serve as a comprehensive listing or be applicable only to the category of risk under which they are disclosed. The risks described below are generally applicable to more than one of the following categories of risks. Additional risks that we do not yet know of or that we currently think are immaterial may also impair our business operations. If any of the events or circumstances described in the following factors actually occurs, our business, financial condition and/or results of operations could suffer.

The risk factors set forth below are also set forth in our 2005 Form 10-K. We have updated several of the risk factors in this Form 10-Q to reflect the ongoing evolution of our business, including the risk factors dealing with our interest rate spread, our access to funds, our credit risks, our regulatory and compliance risks, our international operations, risks relating to general economic conditions and natural disasters, and our IT systems risks. In our Form 10-Q for the second quarter of 2006, we included two risk factors regarding historical stock option grant activities described under Operational Risks.

Credit Risks

If our clients fail to perform under their loans, our business, profitability, and financial condition could be adversely affected.

As a lender, one of the largest risk we face is the possibility that a significant number of our smaller client borrowers, or a smaller number of our larger client borrowers, will fail to pay their loans when due. If borrower defaults cause losses in excess of our allowance for loan losses, it could have an adverse effect on our business, profitability, and financial condition. We have established an evaluation process designed to determine the adequacy of the allowance for loan losses. While this evaluation process uses historical and other objective information, the classification of loans and the establishment of loan losses are dependent to a great extent on our experience and judgment. We cannot assure you that our allowance for loan losses will be sufficient to absorb future loan losses or prevent a material adverse effect on our business, profitability, or financial condition.

Because of the credit profile of our loan portfolio, our levels of nonperforming assets and charge-offs can be volatile, and we may need to make material provisions for loan losses in any period, which could reduce net income or increase net losses in that period.

Our loan portfolio has a credit profile different from that of most other banking companies. Many of our loans are made to companies in the early stages of development with negative cash flow and no established record of profitable operations. In many cases, repayment of the loan is dependent upon receipt of additional equity financing from venture capitalists or others. Collateral for many of the loans often includes intellectual property, which is difficult to value and may not be readily salable in the case of default. Because of the intense competition and rapid technological change that characterizes the companies in our technology and life science industry sectors, a borrower s financial position can deteriorate rapidly. We also make loans that are larger, relative to the revenues of the borrower, than those made by traditional small business lenders, so the impact of any single borrower default may be more significant to us. Additionally, we are increasing our lending to larger corporate technology clients, including some companies with greater levels of debt relative to their equity, and have increased the average size of our loans over time. These changes could affect the risk of borrower default and increase the impact on us of any single borrower default.

For all of these reasons, our level of nonperforming loans and loan charge-offs can be volatile and can vary materially from period to period. Changes in our level of nonperforming loans may require us to make material provisions for loan losses in any period, which could reduce our net income or cause net losses in that period.

Market/Liquidity Risks

Our current level of interest rate spread may decline in the future. Any material reduction in our interest spread could have a material impact on our business and profitability.

A major portion of our net income comes from our interest rate spread, which is the difference between the interest rates paid by us on amounts used to fund interest-earning assets and the interest rates and fees we receive on those assets. We fund interest-earning assets using non-interest bearing deposits, interest-bearing deposits, and other borrowings, including overnight funds. Our interest-earning assets include loans extended to our clients and securities held in our investment portfolio. Interest rates are highly sensitive to many factors beyond our control, such as inflation, recession, global economic disruptions, unemployment and the fiscal and monetary policies of the federal government and its agencies. Market interest rates have been rising in recent periods. Because our deposits are less sensitive to interest rate increases than our loans, these increases have caused our interest rate spread to increase. If interest rates decline, it likely will cause our interest rate spread to decline. In addition, legislative changes could affect the manner in which we pay interest on deposits or other liabilities. For example, Congress has for many years debated repealing a law that prohibits banks from paying interest rates on checking accounts. If this law were to be repealed, we would be subject to competitive pressure to pay interest on our clients checking accounts, which would negatively affect our interest rate spread. In addition, our interest rate spread may be negatively impacted if we are unable to maintain and grow the level of low-cost deposits such as checking accounts to fund the growth in our loan portfolio and are therefore required to rely more on interest-bearing deposits and short or long-term debt. Finally, during 2006 we have funded our loan growth primarily through short term borrowings. These funds carry meaningfully higher interest rate costs than our deposits. A meaningful increase in the share of our loans that are funded through short term borrowings likely would cause our interest rate spread to decline. Any material decline in our interest rate spread would have a material adverse effect on our business and profitability. Additionally, a portion of our loan fee income, a component of loan interest income, is predicated on the receipt of warrant assets. If we fail to continue to receive warrant assets our future interest margin may decline.

Our business is dependent upon access to funds on attractive terms.

We derive our net interest income through lending or investing capital on terms that provide returns in excess of our costs for obtaining that capital. As a result, our credit ratings are important to our business. A reduction in our credit ratings could adversely affect our liquidity and competitive position, increase our borrowing costs (or trigger obligations under certain existing borrowings and other contracts), or increase the interest rates we pay our depositors. Further, our credit ratings and the terms upon which we have access to capital may be influenced by circumstances beyond our control, such as overall trends in the general market environment, perceptions about our creditworthiness or market conditions in the industries in which we focus.

Warrant, private equity fund, and direct equity investment portfolio gains or losses depend upon the performance of the portfolio investments and the general condition of the public equity markets, which is uncertain.

We have historically obtained rights to acquire stock, in the form of equity warrants, in certain clients as part of negotiated credit facilities and for other services. In future periods we may not be able to ultimately realize gains from the sale of securities to third parties related to the exercise of warrants, or our realized gains may be materially less than the current level of fair value of derivative equity warrant assets and unrealized gains disclosed in this filing. We also have made investments in private equity funds as well as direct equity investments in companies. The timing and amount of income, if any, from the disposition of client warrants, private equity funds, and direct equity investments typically depend upon factors beyond our control, including the performance of the underlying portfolio companies, investor demand for initial public offerings, fluctuations in the market prices of the underlying common stock of these companies, levels of mergers and acquisitions activity, and legal and contractual restrictions on our ability to sell the underlying securities. In addition, our investments in private equity funds and direct equity investments could lose value or become worthless, which would reduce our net income. All of these factors are difficult to predict, particularly in the current economic environment. Additionally, due to the nature of investing in private equity venture-backed technology and life science companies, it is likely that additional investments within our existing portfolio will become impaired. However, we are not in a position to know at the present time which specific investments, if any, are likely to be impaired or the extent or timing of individual impairments. Therefore, we cannot predict future investment gains or losses with any degree of accuracy, and any gains or losses are likely to vary materially from period to period.

Public equity offerings and mergers and acquisitions involving our clients can cause loans to be paid off early, which could adversely affect our business and profitability.

While an active market for public equity offerings and mergers and acquisitions generally has positive implications for our business, one negative consequence is that our clients may pay off or reduce their loans with us if they complete a public equity offering or are acquired or merge with another company. Any significant reduction in our outstanding loans could have a material adverse effect on our business and profitability.

56

Operational Risks

Many technology companies have been subject to scrutiny concerning their historical stock option grant activities which could negatively impact our client borrower market.

In recent periods, there have been several reports in the media questioning public company stock option practices, as well as a number of formal and informal regulatory investigations and other actions in connection with the historical stock option grant activities of certain companies. Many of our client borrowers utilize stock options in their employee compensation programs and, as such, could be adversely affected by these developments. Any increase in litigation, investigations or other regulatory actions which adversely affect companies that grant employee stock options, or that adversely affect the technology sector more generally, could adversely affect our client borrowers and potential client borrowers, and therefore could result in a material adverse impact on our results of operations.

We have initiated a voluntary internal review of our historical stock option practices. If we were to discover facts in our review requiring us to change our accounting treatment of previously granted stock options, our stock price and/or our results of operations could be adversely affected.

In light of the recent reports in the media concerning stock option practices, we have voluntarily initiated an internal review of our historical stock option grant activities and related accounting treatment. We have not yet completed that review. If we were to discover facts in our review that would require us to change our accounting treatment of stock options granted in prior periods, this could result in restatements of our historical financial statements, regulatory scrutiny or penalties, lawsuits filed against us, inability to timely file our required reports with the SEC and/or delisting from the Nasdaq Stock Market, or other adverse effects, any of which could have a material adverse effect on our stock price and/or our results of operations.

If we fail to retain our key employees or recruit new employees, our growth and profitability could be adversely affected.

We rely on a substantial number of employees who have technical expertise in their subject matter area and/or a strong network of relationships with individuals and institutions in the markets we serve. If we were to have less success in recruiting and retaining these employees than our competitors, our growth and profitability could be adversely affected. We believe that our employees frequently have opportunities for alternative employment with other organizations, including competing financial institutions and our clients.

Changes to our employee compensation structure could adversely affect our results of operations and cash flows, as well as our ability to attract, recruit, and retain certain key employees.

In December 2004, the FASB issued SFAS No. 123 (revised 2004), Share-Based Payment, which is a revision of SFAS No. 123 and supersedes APB No. 25, and requires us to record compensation expense for all employee share-based payments. The Company adopted SFAS No. 123(R) on January 1, 2006. This expense has had and likely will continue to have a material impact on our results of operations going forward.

In May 2006, in an effort to align our option grant rate to that of other financial institutions similar to us, we committed to restrict the total number of shares of our common stock subject to our stock options, restricted stock awards, restricted stock unit awards, stock bonus awards and any other equity awards granted during a fiscal year as a percentage of the total number of shares outstanding on a prospective basis. We may in the future consider taking other actions to modify employee compensation structures, such as granting cash compensation or other forms of equity compensation. Our decision to reduce the number of option shares to be granted on a prospective basis, and any other future changes we may adopt in our employee compensation structures, could adversely affect our results of operations and cash flows, as well as our ability to attract, recruit, and retain certain key employees.

We could be liable for breaches of security in our online banking services. Fear of security breaches could limit the growth of our online services.

We offer various internet-based services to our clients, including online banking services. The secure transmission of confidential information over the Internet is essential to maintain our clients confidence in our online services. Advances in computer capabilities, new discoveries, or other developments could result in a compromise or breach of the technology we use to protect client transaction data. Although we have developed systems and processes that are designed to prevent security breaches and periodically test our security, failure to mitigate breaches of security could adversely affect our ability to offer and grow our online services and could harm our business.

People generally are concerned with security and privacy on the Internet and any publicized security problems could inhibit the growth of the Internet as a means of conducting commercial transactions. Our ability to provide financial services over the Internet would be severely impeded if clients became unwilling to transmit confidential information online. As a

57

---

result, our operations and financial condition could be adversely affected.

Business interruptions due to natural disasters and other events beyond our control can adversely affect our business.

Our operations can be subject to natural disasters and other events beyond our control, such as earthquakes, fires, public health issues, power failures, telecommunication loss, terrorist attacks, and acts of war. Our corporate headquarters and a portion of our critical business offices are located in California near major earthquake faults. Such events of disaster, whether natural or manmade, could cause severe destruction or interruption to our operations. Financial institutions, such as us, generally must resume operations promptly following any interruption. If we were to suffer a disruption and were not able to resume operations within a period consistent with industry standards, our business could suffer serious harm. In addition, depending upon the nature and duration of the interruption we might be vulnerable to fraud or other losses or to a loss of client confidence. In addition, our business continuity program, which we began phasing in during 2005, has not yet been completed. There is no assurance that our business continuity program can adequately mitigate the risks of such business interruptions.

We rely on other companies to provide key components of our business infrastructure.

Third parties provide key components of our business infrastructure such as Internet connections and network access. Any disruption in internet, network access or other voice or data communication services provided by these third parties or any failure of these third parties to handle current or higher volumes of use could adversely affect our ability to deliver products and services to our customers and otherwise to conduct our business. Technological or financial difficulties of a third party service provider could adversely affect our business to the extent those difficulties result in the interruption or discontinuation of services provided by that party.

We face risks associated with the ability of our information technology systems and our processes to effectively support our growth.

In order to serve our target clients effectively, we have developed a comprehensive array of banking and other products and services. In order to support these products and services, we have developed and purchased information technology and other systems and processes that are relatively more complex and costly than those used by other financial institutions of our size. As our business continues to grow, we will have to continue to invest in these systems and processes. These investments may affect our future profitability. In addition, there can be no assurance that we will be able to effectively and timely improve our systems and processes to meet our business needs efficiently. A failure to improve our systems and processes effectively and in a timely manner may adversely affect the rate of our future growth.

We depend on the accuracy and completeness of information about customers and counterparties.

In deciding whether to extend credit or enter into other transactions with customers and counterparties, we may rely on information furnished to us by or on behalf of customers and counterparties, including financial statements and other financial information. We also may rely on representations of customers and counterparties as to the accuracy and completeness of that information and, with respect to financial statements, on reports of independent auditors. For example, in deciding whether to extend credit, we may assume that a customer s audited financial statements conform to accounting principles generally accepted in the United States (GAAP) and present fairly, in all material respects, the financial condition, results of operations and cash flows of the customer. We also may rely on the audit report covering those financial statements. Our financial condition and results of operations could be negatively affected by relying on financial statements that do not comply with GAAP or that are materially misleading.

Our accounting policies and methods are key to how we report our financial condition and results of operations. They may require management to make estimates about matters that are uncertain.

Our accounting policies and methods are fundamental to how we record and report our financial condition and results of operations. Our management must exercise judgment in selecting and applying many of these accounting policies and methods so they comply with GAAP and reflect management s judgment of the most appropriate manner to report our financial condition and results. In some cases, management must select the accounting policy or method to apply from two or more alternatives, any of which might be reasonable under the circumstances yet might result in our reporting materially different amounts than would have been reported under a different alternative.

Changes in accounting standards could materially impact our financial statements.

From time to time, the Financial Accounting Standards Board (FASB) changes the financial accounting and reporting standards that govern the preparation of our financial statements. These changes can be hard to predict and can materially impact how we record and report our financial condition and results of operations. In some cases, we could be required to apply a new or revised standard retroactively, resulting in our restating prior period financial statements.

58

If we fail to maintain an effective system of internal control over financial reporting, we may not be able to accurately report our financial results. As a result, current and potential stockholders could lose confidence in our financial reporting, which would harm our business and the trading price of our stock.

Our management has determined that as of December 31, 2005, we did not maintain effective internal control over financial reporting based on criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework as a result of identified material weaknesses in our internal control over financial reporting. Specifically, we did not have adequately designed internal controls in our financial reporting process related to the selection and application of generally accepted accounting principles in that (a) accounting policies, procedures and practices were not consistently developed, maintained or updated in a manner ensuring that financial statements were prepared in accordance with U.S. generally accepted accounting principles, (b) these policies and procedures were not designed to consistently ensure the preparation and retention of adequate documentation to support key judgments made in connection with the selection and application of significant accounting policies within our financial reporting process and (c) our policies and procedures did not consistently provide for effective analysis, implementation, and documentation of new accounting pronouncements. In addition, we did not maintain sufficient levels of appropriately qualified and trained personnel in our financial reporting processes resulting in our inability to establish internal control over financial reporting policies and procedures related to (1) the timely preparation of comprehensive documentation supporting management s analysis of the appropriate accounting treatment for warrant derivatives or other non-routine or complex transactions, and (2) the review of such documentation by qualified internal staff, assisted by external advisors as deemed necessary, to determine our completeness and the propriety of our conclusions. For a detailed description of these material weaknesses and our remediation efforts and plans, see Part I, Item 4. These control deficiencies resulted in material errors in our financial reporting which resulted in a restatement of our financial statements for the years 2002, 2003 and 2004. This restatement process took five months to complete, required substantial resources and personnel, and included a comprehensive review of our financial statements and accounting practices by our auditors. However, we have not yet fully remediated these material weaknesses.

In response to these material weaknesses in our internal control over financial reporting, we are implementing additional controls and procedures and are incurring additional related expenses. We cannot be certain that the measures we have taken to date and are planning to take will sufficiently and satisfactorily remediate the identified material weaknesses in full. Furthermore, we intend to continue improving our internal control over financial reporting and the implementation and testing of these efforts could result in increased cost and could divert management attention away from operating our business.

If we are unable to remediate the identified material weaknesses discussed above, or if additional material weaknesses are identified in our internal control over financial reporting, our management will be unable to report favorably as to the effectiveness of our internal control over financial reporting and/or our disclosure controls and procedures, and we could be required to further implement expensive and time-consuming remedial measures and potentially lose investor confidence in the accuracy and completeness of our financial reports, which could have an adverse effect on our stock price and potentially subject us to litigation.

Legal/Regulatory Risks

We are subject to extensive regulation that could limit or restrict our activities and impose financial requirements or limitations on the conduct of our business.

SVB Financial Group, including Silicon Valley Bank, is extensively regulated under federal and state laws governing financial institutions. These regulations are intended primarily for the protection of depositors, other clients of financial institutions, and the deposit insurance fund not for the benefit of stockholders or security holders of these companies. Federal and state laws and regulations govern, limit or otherwise affect the activities in which we may engage, and may affect our ability to expand our business over time. In addition, a change in the applicable statutes, regulations, or regulatory policy could have a material effect on our business, including limiting the types of financial services and products we may offer or increasing the ability of nonbanks to offer competing financial services and products. These laws and regulations also require financial institutions, including SVB Financial Group and Silicon Valley Bank to maintain certain minimum levels of capital, which may affect our ability to use our capital for other business purposes.

If we were to violate federal or state laws or regulations governing financial institutions, we could be subject to disciplinary action that could have a material adverse effect on our business and financial condition.

Federal and state banking regulators possess broad powers to take supervisory action or enforcement action with respect to financial institutions, including SVB Financial Group and Silicon Valley Bank. Other regulatory bodies, including

the SEC, the National Association of Securities Dealers, Inc. (NASD) and state securities regulators, regulate broker-dealers, including our subsidiaries SVB Alliant and SVB Securities. Violations of the laws governing financial institutions and broker-dealers can result in revocation of necessary licenses or authorizations, the imposition of censures, civil money penalties or fines, the issuance of cease and desist orders, and the suspension or expulsion from the securities business of a firm, its officers or employees. Supervisory actions can result in higher capital requirements, higher insurance premiums, and limitations on the activities of SVB Financial Group, including Silicon Valley Bank and its other subsidiaries. These supervisory actions could have a material adverse effect on our business, profitability and reputation. In addition, increased regulatory requirements, whether due to the adoption of new laws and regulations, changes in existing laws and regulations, or more expansive or aggressive interpretations of existing laws and regulations, may have a material adverse effect on our business and profitability.

SVB Financial Group, the Parent, relies on dividends from its subsidiaries for most of its revenue.

SVB Financial Group, the Parent, is a separate and distinct legal entity from its subsidiaries. It receives substantially all of its revenue from dividends from its subsidiaries. These dividends are the principal source of funds to pay dividends on the Parent s common and preferred stock, should the Parent elect to pay dividends, and interest and principal on its debt. Various federal and/or state laws and regulations limit the amount of dividends that our bank and certain of our nonbank subsidiaries may pay to the Parent company. Also, the Parent s right to participate in a distribution of assets upon a subsidiary s liquidation or reorganization is subject to the prior claims of the subsidiary s creditors.

Strategic/Reputation Risks

Our business reputation is important and any damage to it can have a material adverse effect on our business.

Our reputation is very important to sustain our business, as we rely on our relationships with our current, former and potential clients and stockholders, the private equity community and the industries in which we serve. Any damage to our reputation, such as regulatory, supervisory or enforcement actions, downgrade of ratings, loss of customers, late filings of SEC reports and potential delisting actions, could have a material adverse effect on our business.

Adverse changes in domestic or global economic conditions, especially in the technology sector, could have a material adverse effect on our business, growth, and profitability.

If conditions deteriorate in the domestic or global economy, especially in the technology, life science, private equity, and premium wine industry niches, our business, growth, and profitability may be materially adversely affected. A global, U.S. or significant regional economic slowdown could harm us by adversely affecting our clients and prospective clients access to capital to fund their business, their ability to sustain and grow their businesses, the level of funds they have available to maintain deposits, their demand for loans, their ability to repay loans or otherwise.

Decreases in the amount of equity capital available to start-up and emerging-growth companies could adversely affect our business, profitability, and growth prospects.

Historically, our strategy has focused on providing banking products and services to emerging-growth companies receiving financial support from sophisticated investors, including venture capitalists, angels, and corporate investors. We derive a meaningful share of our deposits from these emerging growth companies and provide them with loans as well as other banking products and services. In some cases, our lending credit decision is based on our analysis of the likelihood that our venture capital or angel-backed client will receive a second or third round of equity infusion from investors. If the amount of capital available to such companies decrease, it is likely that the number of new clients and investor financial support to our existing borrowers could decrease, which could have an adverse effect on our business, profitability and growth prospects.

Among the factors that have and could in the future affect the amount of capital available to startup and emerging-growth companies are the receptivity of the capital markets to initial public offerings or mergers and acquisitions of companies within our technology and life science industry sectors, the availability and return on alternative investments, and general economic conditions in the technology and life science industries. Reduced capital markets valuations could reduce the amount of capital available to startup and emerging-growth companies, including companies within our technology and life science industry sectors.

We cannot assure that we will be able to maintain our historical levels of profitability in the face of sustained competitive pressures.

Other banks and specialty and diversified financial services companies, many of which are larger and have more capital than we do, offer lending, leasing, other financial products and advisory services to our client base. In some cases, our competitors focus their marketing on our industry sectors and seek to increase their lending and other financial relationships

60

with technology companies, early stage growth companies or special industries such as wineries. In other cases, our competitors may offer a broader range of financial products to our clients. When new competitors seek to enter one of our markets, or when existing market participants seek to increase their market share, they sometimes undercut the pricing and/or credit terms prevalent in that market, which could adversely affect our market share. Our pricing and credit terms could deteriorate if we act to meet these competitive challenges.

We face risks in connection with completed or potential acquisitions.

Although we have done so only infrequently in the past, if appropriate opportunities present themselves, we intend to acquire businesses, technologies, services or products that we believe are strategic. There can be no assurance that we will be able to identify, negotiate or finance future acquisitions successfully or integrate such acquisitions with our current business.

Future acquisitions could result in potentially dilutive issuances of equity securities, the incurrence of debt, and/or contingent liabilities, which could have a material adverse effect on our business, results of operations, and/or financial condition. Any such future acquisitions of other businesses, technologies, services, or products might require us to obtain additional equity or debt financing, which might not be available on terms favorable to us, or at all; and such financing, if available, might be dilutive.

Upon completion of an acquisition, we are faced with the challenges of integrating the operations, services, products, personnel, and systems of acquired companies into our business, which may divert management s attention from ongoing business operations. In addition, acquisitions of new businesses may subject us to regulatory scrutiny. We cannot assure that we will be successful in integrating any acquired business effectively into the operations of our business. Moreover, there can be no assurance that the anticipated benefits of any acquisition will be realized.

The success of our acquisitions is dependent on the continued employment of several key employees. If acquired businesses do not meet projected revenue targets, or if certain key employees were to leave the businesses, we could conclude that the value of the businesses has decreased and that the related goodwill has been impaired. If we were to conclude that goodwill has been impaired that conclusion would result in an impairment of goodwill charge to us, which would adversely affect our results of operations.

We face risks associated with international operations.

A component of our strategy is to expand internationally on a limited basis. To date, we have opened offices in the UK, India and China. We plan to expand our operations in those locations and are exploring adding other locations. Our efforts to expand our business internationally carries with it certain risks, including risks arising from the allocation of management time and attention to these efforts and the uncertainty regarding our ability to generate revenues from foreign operations and to expand our international presence. In addition, there are certain risks inherent in doing business on an international basis, including, among others, legal, regulatory and tax requirements and restrictions, uncertainties regarding liability, tariffs, and other trade barriers, difficulties in staffing and managing foreign operations, differing technology standards or customer requirements, political and economic risks and financial risks, including currency and payment risks. These risks could adversely affect the success of our international operations and could have a material adverse effect on our overall business, results of operation and financial condition. In addition, we face risks that our non-U.S. based employees may fail to comply with applicable laws and regulations, which could have a material adverse effect on us.

Maintaining or increasing our market share depends on market acceptance of new products and services.

Our success depends, in part, upon our ability to adapt our products and services to evolving industry standards and client demands. There is increasing pressure on financial services companies to provide products and services at lower prices. In addition, the widespread adoption of new technologies, including Internet-based services, could require us to make substantial expenditures to modify or adapt our existing products or services. A failure to achieve market acceptance of any new products we introduce, or a failure to introduce products that the market may demand, could have an adverse effect on our business, profitability, or growth prospects.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

(c) Purchases of Equity Securities by the Issuer and Affiliated Purchasers

Period	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs(1)	(d) Maximum Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs(1)
July 1, 2006 July 31, 2006	$ 200,000	$ 45.08	200,000	$ 93,200,000
August 1, 2006 August 31, 2006	250,000	45.16	250,000	81,800,000
September 1, 2006 - September 30, 2006	100,000	45.69	100,000	77,200,000
Total	$ 550,000	$ 45.23	550,000	

(1) We have in place a program authorizing the repurchase of up to a total of $305.0 million of our stock. The repurchase program was initially authorized by our Board of Directors and announced on May 7, 2003 for $160.0 million (with no expiration date), and was subsequently increased by $75.0 million (to be repurchased before September 30, 2006), $70.0 million (to be repurchased before June 30, 2007) and $70.0 million (to be repurchased before June 30, 2008) as announced on January 27, 2005, January 26, 2006, and July 20, 2006, respectively. Unless earlier terminated by the Board, the program will expire on June 30, 2008. As of September 30, 2006, we have repurchased $8.5 million shares totaling $297.8 million. At September 30, 2006, the dollar value of shares that may still be repurchased under this program was $77.2 million.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

None.

ITEM 5. OTHER INFORMATION

None.
