Fair Value Measurements

In determining the value of the Fund s investments, various inputs are used. These inputs are summarized in the three broad levels listed below:

Level 1 - Quoted prices in active markets for identical securities.

Level 2 - Other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 - Significant unobservable inputs (including management s assumptions in determining the fair value of investments). The inputs or methodology used for valuing securities are not an indication of the risk associated with investing in those securities. The following is a summary of the Fund s fair value measurements as of March 31, 2010:

Derivative Instruments and Hedging Activities

The Fund records derivative instruments at fair value with changes in fair value recognized in the Statement of Operations, when applicable. Even though the Fund's investments in derivatives may represent economic hedges, they are considered to be non-hedge transactions for financial reporting purposes.

The table below presents the fair value of all derivative instruments held by the Fund as of March 31, 2010, the location of these instruments on the Statement of Assets and Liabilities, and the primary underlying risk exposure.

| | | Location on the Statement of Assets and Liabilities | | | | | |
|------------------|------------|---|-------|--------------------------|----|-----------|--|

| Income Tax Infor | mation | | | | | | |

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses, recognition of premium amortization, timing differences in the recognition of income on REIT investments and timing differences in recognizing certain gains and losses on investment transactions. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts on the Statement of Assets and Liabilities presented in the annual report, based on their federal tax basis treatment; temporary differences do not require reclassification. Temporary and permanent differences do not impact the net asset value of the Fund.

At March 31, 2010, the cost of investments (excluding securities sold short and call options written) was \$1,167,866,392. Gross unrealized appreciation and gross unrealized depreciation of investments (excluding securities sold short and call options written) at March 31, 2010, were as follows:

| Gross unrealized: Appreciation Depreciation | \$ 76,460,428 (82,327,078) |
|---|----------------------------------|
| Net unrealized appreciation (depreciation) of investments | \$ (5,866,650) |

These floating lending rates are generally (i) the lending rate referenced by the London Inter-Bank Offered Rate (LIBOR), or (ii) the prime rate offered by one or more major United States banks.
 - Senior Loans may be considered restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
