

Edgar Filing: IMA EXPLORATION INC - Form 6-K

IMA EXPLORATION INC
Form 6-K
January 13, 2004

SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, DC 20549

FORM 6-K

REPORT OF FOREIGN PRIVATE ISSUER
PURSUANT TO RULE 13a-16 OR 15d-16 UNDER
THE SECURITIES EXCHANGE ACT OF 1934

For the month of DECEMBER , 2003.

IMA EXPLORATION INC.

(Translation of registrant's name into English)

#709 - 837 West Hastings Street, Vancouver, British Columbia, V6C 3N6, Canada

(Address of principal executive offices)

Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F:

Form 20-F X Form 40-F

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(1): _____

Note: Regulation S-T Rule 101(b)(1) only permits the submission in paper of a Form 6-K if submitted solely to provide an attached annual report to security holders.

Indicate by check mark if the registrant is submitting the Form 6-K in paper as permitted by Regulation S-T Rule 101(b)(7): _____

Note: Regulation S-T Rule 101(b)(7) only permits the submission in paper of a Form 6-K if submitted to furnish a report or other document that the registrant foreign private issuer must furnish and make public under the laws of the jurisdiction in which the registrant is incorporated, domiciled or legally organized (the registrant's "home country"), or under the rules of the home country exchange on which the registrant's securities are traded, as long as the report or other document is not a press release, is not required to be and has not been distributed to the registrant's security holders, and, if discussing a material event, has already been the subject of a Form 6-K submission or other Commission filing on EDGAR.

Indicate by check mark whether by furnishing the information contained in this Form, the registrant is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Edgar Filing: IMA EXPLORATION INC - Form 6-K

Yes _____ No X _____

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3- 2(b): 82-_____

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf of the undersigned, thereunto duly authorized.

IMA Exploration Inc.

NEWS RELEASE

December 17, 2003

DRILL RESULTS INDICATE LARGE MINERALIZED SYSTEM AT NAVIDAD

IMA Exploration Inc. is pleased to announce initial results from the diamond drill program at the Company's 100% owned Navidad project, located in Patagonia, Argentina. Drilling to date has tested two small areas approximately 1,200 metres apart that are on the edge of a large geophysical chargeability anomaly (see attached map). Preliminary results indicate a very large, intensely altered and mineralized system. Results received to date compare favorably in terms of size and grade with numerous bulk tonnage silver deposits worldwide (ex: Pan American Silver's Alamo Dorado deposit in Mexico, 35.5 M tonnes at 68 g/t silver).

Partial results have been received from the first four holes (see attached map), two of which were drilled on Navidad Hill and two on Galena Hill, as summarized in the results table in Appendix 1. At Navidad Hill, hole NV03-01 intersected 2,677.6 g/t silver over 0.8 m, or 535.6 g/t silver over 7.4 m, within a zone of 58.4 m averaging 111.1 g/t silver. On the same section, hole NV03-02 intersected 1,320.3 g/t silver over 1.1 m within a zone of 48.0 m that averaged 97.8 g/t silver. Preliminary drill results suggest that mineralization on Navidad Hill occurs predominantly as broad areas of stockwork and breccia, rather than narrow discrete structures as had originally been anticipated from the surface exposures.

Drilling has clearly demonstrated that the large IP chargeability anomaly is caused by sulfide mineralization, principally galena with local pyrite. In hole NV03-03, sulphide breccia mineralization was encountered over the entire 178.5m length of the hole. In hole NV03-04, 266.7 m of sulphide breccia was intersected to a vertical depth of 180m from surface. Results have been received for the upper 81.10 m of this hole, and intersected 111.3 g/t silver over 78.3 m including 169.2 g/t silver over 41.50 m and 223.4 g/t silver over 16.10 m at the bottom of this interval. Assays for the remaining 207 m of the hole are pending.

Drilling on Galena Hill has confirmed that anomalous chargeability values as defined by IP geophysical surveys (see release dated June 25th, 2003) are attributable to silver-lead (sulphide) mineralization over very long intersections in excess of 200 metres. These large widths have dramatic implications for the tonnage potential of this zone, given the 1.6 x 1.3 km size of the IP anomaly and that geophysics indicates depths locally extend to 300m. IMA geologists believe that significant silver-lead+/-copper mineralization may underlie large portions of the 1.6 x 1.3 km chargeability anomaly.

Eleven diamond drill holes (1,724 m total) have been completed to date, and results from the remaining seven holes are pending. Final results from this first phase of drilling will be disseminated when assays from all the holes are received from the lab. The geological crew is completing logging and sampling of core and drilling will resume early in the New Year after the holidays. IMA is committed to meet or exceed industry "best practices" under National Instrument 43-101; please see our website (www.imaexploration.com) for a detailed description of quality assurance and quality control procedures. Dr. Paul Lhotka, P.Geo. is IMA's independent Qualified Person at the Navidad Project.

Edgar Filing: IMA EXPLORATION INC - Form 6-K

IMA Exploration Inc. has over \$4,000,000 in its treasury to fund its exploration objectives. The Company focuses on quality exploration work designed to define economic gold and silver deposits in Argentina and Peru. IMA has put together an enviable property portfolio including over 37 well-located, high-potential projects and is continuing to add to this package through grass-roots exploration and staking.
