Table of Contents

Notes to Consolidated Financial Statements

(Dollars in thousands, except per share amounts)

Note A

Accounting Policies

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America for interim financial information. Accordingly, they do not include all of the information and notes required by accounting principles generally accepted in the United States of America for complete financial statements.

In the opinion of management, the consolidated financial statements contain all material adjustments necessary to present fairly the financial position of First Citizens BancShares, Inc. as of and for each of the periods presented, and all such adjustments are of a normal recurring nature. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates.

These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes included in the 2006 First Citizens BancShares, Inc. Form 10-K. Certain amounts for prior periods have been reclassified to conform with statement presentations for 2007. However, the reclassifications have no effect on shareholders' equity or net income as previously reported.

Note B

Operating Segments

BancShares conducts its banking operations through its two wholly-owned subsidiaries, First-Citizens Bank & Trust Company (FCB) and IronStone Bank (ISB). Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and each entity operates under a separate charter. The financial results and trends of ISB reflect the impact of the de novo nature of its growth.

FCB is a mature banking institution that operates under a state bank charter from its branch network in North Carolina, Virginia, West Virginia, Maryland and Tennessee. ISB began operations in 1997 and currently operates in Georgia, Florida, Texas, Arizona, California, New Mexico, Colorado, Oregon and Washington under a federal thrift charter.

In the aggregate, FCB and its consolidated subsidiaries, which are integral to its branch operation, and ISB account for more than 90 percent of consolidated assets, revenues and net income. Other includes activities of the parent company and Neuse, Incorporated, a subsidiary that owns real property used in the banking operation. For 2006, other also includes American Guaranty Insurance Corporation, a property insurance company that was sold January 1, 2007.

The adjustments in the accompanying tables represent the elimination of the impact of certain inter-company transactions. The adjustments to interest income and interest expense neutralize the earnings and cost of inter-company borrowings. The adjustments to noninterest income and noninterest expense reflect the elimination of management fees and other services fees paid by one company to another within BancShares consolidated group.

Table of Contents

As of and for the six months ended June 30, 2007

Table of Contents**Note C****Employee Benefits**

BancShares recognized pension expense totaling \$5,250 and \$6,898, respectively, in the six-month periods ended June 30, 2007 and 2006. Pension expense is included as a component of employee benefit expense.

	Six month periods ended June 30,	
	2007	2006
<u>Components of Net Periodic Benefit Cost</u>		
Service cost	\$ 8,471	\$ 8,730
Interest cost	10,501	10,056
Expected return on assets	(14,886)	(13,800)
Amortization of prior service cost	118	140
Amortization of net actuarial loss	1,046	1,772
Total net periodic benefit cost	\$ 5,250	\$ 6,898

The expected long-term rate of return on plan assets for 2007 is 8.50 percent, and the assumed discount rate is 5.75 percent.

Note D**Income Taxes**

BancShares and its subsidiaries file a consolidated federal income tax return. BancShares and its subsidiaries each file separate state income tax returns except where unitary filing is required. BancShares and its subsidiaries are generally no longer subject to federal, state or local income tax examinations for years before 2002.

BancShares adopted the provisions of FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes* (FIN 48), on January 1, 2007. As a result of the implementation of FIN 48, BancShares recognized a decrease in the liability for uncertain tax positions of \$962, which was accounted for as an increase to the January 1, 2007 balance of retained earnings.

The total amount of unrecognized tax benefits at the date of adoption of FIN 48 was \$1,700. The total amount of unrecognized tax benefits that, if recognized, would affect the effective tax rate at the date of adoption of FIN 48 was \$500. BancShares recognizes accrued interest and penalties related to unrecognized tax benefits in tax expense. At the date of adoption of FIN 48, BancShares had recognized approximately \$700 for the payment of interest and penalties. BancShares is not aware of any positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly increase or decrease within the next twelve months.

Table of Contents

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

Management's discussion and analysis of earnings and related financial data are presented to assist in understanding the financial condition and results of operations of First Citizens BancShares, Inc. and Subsidiaries (BancShares). This discussion and analysis should be read in conjunction with the unaudited Consolidated Financial Statements and related notes presented within this report. Intercompany accounts and transactions have been eliminated.

During the fourth quarter of 2006, BancShares retroactively adopted the provisions of Staff Accounting Bulletin No. 108 *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108) to an effective date of January 1, 2006 by recognizing the cumulative effect of the change. Upon the adoption of SAB 108, we recorded an adjusting entry to recognize \$7.2 million in income earned not collected and \$2.8 million in income tax payable. The net impact of \$4.4 million was recorded as an adjustment to retained earnings as of January 1, 2006. Certain other amounts for prior years have been reclassified to conform to statement presentations for 2007, and except for the entry recorded in conjunction with the SAB 108 adoption, the reclassifications had no effect on shareholders' equity or net income as previously reported.

OVERVIEW

BancShares is a financial holding company with two wholly owned banking subsidiaries: First-Citizens Bank & Trust Company (FCB), a North Carolina-chartered bank, and IronStone Bank (ISB), a federally-chartered thrift institution. FCB operates branches in North Carolina, Virginia, West Virginia, Maryland and Tennessee. ISB operates in Georgia, Florida, Texas, New Mexico, Arizona, California, Oregon, Washington and Colorado. ISB has announced plans to expand into Oklahoma City, Oklahoma; Kansas City, Missouri; Kansas City, Kansas; and Dallas, Texas.

BancShares' earnings and cash flows are derived primarily from the commercial banking activities conducted by its banking subsidiaries. These activities include commercial and consumer lending, deposit and cash management products, cardholder, merchant, wealth management services as well as various other products and services typically offered by commercial banks. FCB and ISB gather interest-bearing and noninterest-bearing deposits from retail and commercial customers. BancShares and its subsidiaries also secure funding through various non-deposit sources. We invest the liquidity generated from these funding sources in various types of interest-earning assets such as loans and leases, investment securities and overnight investments. We also invest in bank premises, furniture and equipment used to conduct the subsidiaries' commercial banking business.

Various external factors influence customer demand for our loan, lease and deposit products. In an effort to stimulate and control the rate of growth of economic activity, monetary actions by the Federal Reserve are significant to the interest rate environment in which we operate. At any point in time, both the existing level and anticipated movement of interest rates have a profound impact on customer demand for our products, our pricing of those products and on our profitability.

In addition to the interest rate environment, the general strength of the economy influences demand as well as the quality and collectibility of our loan and lease portfolio. External economic indicators such as consumer bankruptcy rates and business debt service capacity closely follow trends in the economic cycle. Demand for our deposit and cash management products is highly dependent on interest rates and, to some extent, the volatility of alternative investment markets.

Although we are unable to control the external factors that influence our business, through the utilization of various liquidity, interest rate and credit risk management tools, we seek to minimize the potentially adverse risks of unforeseen and potentially unfavorable economic trends and take advantage of favorable economic conditions when appropriate.

Financial institutions frequently focus their strategic and operating emphasis on maximizing profitability and therefore measure their relative success by reference to profitability measures such as return on average assets or return on average shareholders' equity. BancShares' profitability measures have historically compared unfavorably to the returns of similar-sized financial holding companies. We have historically placed significant emphasis upon asset quality, balance sheet liquidity, capital conservation and de novo expansion, even when those priorities and initiatives may be detrimental to short-term profitability.

Table of Contents

Based on our organization's strengths and competitive position within the financial services industry, we believe opportunities for significant growth and expansion exist. We operate in diverse and growing geographic markets and believe that through competitive products and superior customer service, we can increase our business volumes and profitability. In recent years, we have focused our efforts on businesses owners, medical and other professionals and individuals who are financially active. We seek to increase fee income in areas such as merchant processing, working capital finance, insurance, cash management, wealth management and other private banking services. We also focus on opportunities to generate income by providing various processing services to other banks.

We attempt to mitigate certain of the risks that can endanger our profitability and growth prospects. While we are attentive to all areas of risk, economic risk is especially problematic due to the lack of control and the potential material impact upon our financial results. Specific economic risks include recession, rapid movements in interest rates, changes in the yield curve and significant shifts in inflation expectations. Compared to our larger competitors, our relatively small asset size and limited capital resources create a level of economic risk that requires constant and focused management attention.

PERFORMANCE SUMMARY

BancShares realized a decrease in earnings during the second quarter of 2007 compared to the second quarter of 2006. Consolidated net income during the second quarter of 2007 was \$30.9 million, compared to \$31.7 million earned during the corresponding period of 2006. The annualized return on average assets was 0.79 percent during the second quarter of 2007, compared to 0.84 percent during the same period of 2006. The annualized return on average equity was 9.14 percent during 2007, compared to 10.43 percent during the same period of 2006. Net income per share during the second quarter of 2007 totaled \$2.96, compared to \$3.04 during the second quarter of 2006. The \$861,000 or 2.7 percent earnings decrease resulted from higher noninterest expense and slightly lower net interest income, partially offset by improved levels of noninterest income and significantly lower provision for credit losses.

For the first six months of 2006, BancShares recorded net income of \$59.8 million, compared to \$60.4 million earned during the first six months of 2006. The \$534,000 or 0.9 percent decrease was attributable to higher levels of noninterest expense and a marginal reduction in net interest income, partially offset by higher noninterest income and lower provision for credit losses. Net income per share for the first six months of 2006 was \$5.73, compared to \$5.79 during the same period of 2006. On an annualized basis, BancShares returned 0.77 percent on average assets during the first six months of 2006, compared to 0.82 percent from the corresponding period of 2006. Annualized return on average equity for the first six months of 2007 was 9.02 percent, down from 10.08 percent during the same period of 2006.

Table of Contents

INTEREST-EARNING ASSETS

Interest-earning assets include loans and leases, investment securities and overnight investments, all of which reflect varying interest rates based on the risk level and maturity of the underlying asset. Riskier investments typically carry a higher interest rate, but expose the investor to potentially higher levels of default. We have historically focused on maintaining high asset quality, which results in a loan and lease portfolio subjected to strenuous underwriting and monitoring procedures. Our investment securities portfolio includes high-quality assets, primarily United States Treasury and federal government agency securities. Generally, the investment securities portfolio grows and shrinks based on loan, lease and deposit trends. When deposit growth exceeds loan and lease demand, we invest excess funds in the securities portfolio. Conversely, when loan and lease demand exceeds deposit growth, we use proceeds from maturing securities to fund loan and lease demand. Overnight investments are selectively made with other financial institutions that are within our risk tolerance.

Interest-earning assets for the second quarter of 2007 averaged \$14.08 billion, an increase of \$555.7 million or 4.1 percent from the second quarter of 2006. For the six months ended June 30, 2007, interest-earning assets averaged \$13.98 billion, an increase of \$650.9 million or 4.9 percent over the same period of 2006. These increases resulted from modest growth in the loan, lease and investment securities portfolios.

Loans and Leases. At June 30, 2007 and 2006, loans and leases totaled \$10.47 billion and \$10.03 billion, respectively. The \$444.1 million or 4.4 percent growth from June 30, 2006 to June 30, 2007 resulted from growth within the commercial mortgage, commercial and industrial loan and lease financing portfolios.

Commercial mortgage loans totaled \$3.82 billion at June 30, 2007, representing 36.4 percent of the total loan and lease portfolio. This represents an increase of \$223.7 million or 6.2 percent since June 30, 2006. Demand for commercial real estate financing remains stable for owner-occupied medical and professional facilities, although competition for this type of high-quality lending remains strong. A large percentage of our commercial mortgage portfolio is secured by owner-occupied facilities, rather than investment property. These owner-occupied secured loans are underwritten based primarily upon the cash flow from the operation of the business rather than the value of the real estate collateral.

Commercial and industrial loans totaled \$1.55 billion or 14.8 percent of total loans and leases outstanding. These loans have increased \$132.2 million or 9.3 percent since June 30, 2006. Customer demand for these loans has remained generally stable but expansion into new markets has fueled growth.

At June 30, 2007, revolving mortgage loans totaled \$1.37 billion, representing 13.1 percent of total loans and leases outstanding. While these loans remain a significant component of our retail loan portfolio, outstandings have increased only \$5.6 million since June 30, 2006. The inversion of the yield curve, which has caused the short-term rate on variable rate mortgage products to exceed those offered on longer-term fixed rate products, has weakened demand for revolving mortgage products.

Residential mortgage loans totaled \$1.04 billion or 9.9 percent of total loans at June 30, 2007, an increase of \$31.0 million or 3.1 percent since June 30, 2006. Growth has been caused primarily by increased loan originations within the medical customer base.

We anticipate moderate growth in commercial mortgage and commercial and industrial loans in the second half of 2007, as our expansion into new markets translates into higher levels of loan demand among our business customers. Our continued expansion will also continue to diversify risks resulting from regional concentrations. All growth projections are subject to change as a result of economic deterioration or improvement, competitive forces and other external factors.

Net loans and leases	\$ 10,343,830	\$ 10,088,938	\$ 10,107,547	\$ 9,997,771	\$ 9,898,513

Investment Securities. Investment securities available for sale totaled \$2.96 billion at June 30, 2007, compared to \$2.63 billion at June 30, 2006. Available-for-sale securities are reported at their aggregate fair value. Investment securities held to maturity totaled \$60.9 million at June 30, 2007, compared to \$398.7 million at June 30, 2006. Securities that are classified as held-to-maturity reflect our ability and positive intent to hold those investments until maturity. The growth in investment securities available for sale and the corresponding reduction in investment securities held to maturity results from our decision to increase balance sheet liquidity and flexibility. Table 3 presents detailed information relating to the investment securities portfolio.

Income on Interest-Earning Assets. Interest income amounted to \$221.9 million during the second quarter of 2007, a \$19.4 million or 9.6 percent increase over the second quarter of 2006. Improved yields and marginal growth in the volume of interest-earning assets accounted for the increase in interest income when compared to the same period of 2006. The taxable-equivalent yield on interest-earning assets for the second quarter of 2007 equaled 6.37 percent, compared to 6.05 percent for the corresponding period of 2006.

Loan and lease interest income for the second quarter of 2007 equaled \$177.8 million, an increase of \$10.7 million or 6.4 percent from the second quarter of 2006, the combined result of balance sheet growth and higher yields. The taxable-equivalent yield on the loan and lease portfolio was 6.93 percent during the second quarter of 2007, up 16 basis points from the same period of 2006. The higher yield resulted from new loans and leases originated at current market rates. Average loans and leases increased \$395.7 million, a 4.0 percent growth rate from the second quarter of 2006 to the same period of 2007.

Interest income earned on the investment securities portfolio amounted to \$34.7 million during the second quarter of 2007 versus \$27.5 million during the same period of 2006, an increase of \$7.2 million or 26.1 percent. This increase in income is the result of improved yields and slightly higher average volume. The taxable-equivalent yield increased 87 basis points from 3.87 percent in the second quarter of 2006 to 4.74 percent in the second quarter of 2007 due to the reinvestment of proceeds from maturing securities into securities at higher rates. Average investment securities increased \$83.4 million from \$2.96 billion during the second quarter of 2006 to \$3.05 billion during the second quarter of 2007.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35% and a state income tax rate of 6.90% for each period. The taxable-equivalent adjustment was \$1,834 and \$1,480 for 2007 and 2006, respectively.

Interest income from overnight investments amounted to \$9.4 million during the second quarter of 2007, an increase of \$1.6 million from the \$7.8 million earned during the second quarter of 2006, the combined result of a 36 basis point yield increase and \$76.5 million growth in average balances.

Interest income amounted to \$438.0 million during the first six months of 2007, a \$45.5 million or 11.6 percent increase from the same period of 2006, the result of higher yields and growth in interest-earning assets. The taxable-equivalent yield increased 38 basis points from 5.98 percent for the first six months of 2006 to 6.36 percent during the same period of 2007, caused by higher market interest rates during 2007.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q/A

For the six months ended June 30, 2007, loan and lease interest income equaled \$352.9 million, an increase of \$26.5 million or 8.1 percent from the same period of 2006. The improvement in interest income reflects the favorable effect of a 23 basis point increase in loan and lease yields as well as a 4.5 percent increase in average balances.

For the six months ended June 30, 2007, income earned on the investment securities portfolio amounted to \$68.3 million, compared to \$52.6 million during the same period of 2006, an increase of \$15.7 million or 29.9 percent. This increase was the result of portfolio growth and an 89 basis point increase in the taxable-equivalent yield resulting from the reinvestment of proceeds arising from maturing securities to current market rates.

Interest earned on overnight investments totaled \$16.8 million during the first six months of 2007 compared to \$13.5 million during the same period of 2006, a \$3.3 million or 24.4 percent increase. This strong growth was the combined result of a 54 basis point yield increase and a \$67.5 million increase in average overnight investments.

Average loan and lease balances include nonaccrual loans and leases. Yields related to loans, leases and securities exempt from both federal and state income taxes, federal income taxes only, or state income taxes only are stated on a taxable-equivalent basis assuming a statutory federal income tax rate of 35% and a state income tax rate of 6.90% for each period. The taxable-equivalent adjustment was \$3,594 and \$2,862 for 2007 and 2006, respectively.

INTEREST-BEARING LIABILITIES

Interest-bearing liabilities include our interest-bearing deposits as well as short-term borrowings and long-term obligations. Deposits represent our primary funding source, although we also utilize non-deposit borrowings to stabilize our liquidity base and, in some cases, to fulfill commercial customer requirements for cash management services. Certain of our long-term borrowings also provide capital strength under existing guidelines established by the Federal Reserve Bank and other banking regulators.

Edgar Filing: FIRST CITIZENS BANCSHARES INC /DE/ - Form 10-Q/A

Deposits. At June 30, 2007, deposits totaled \$12.78 billion, an increase of \$55.1 million over June 30, 2006. Interest-bearing deposits averaged \$9.97 billion during the second quarter of 2007, an increase of \$191.4 million or 2.0 percent from the second quarter of 2006. Average time deposits increased \$250.2 million or 5.1 percent to \$5.17 billion from the second quarter of 2006 to the same period of 2007. Average money market balances increased \$112.4 million from \$2.63 billion during the second quarter of 2006 to \$2.74 billion during the second quarter of 2007.

We expect time deposit and money market account balances will continue to increase moderately throughout 2007, although competition for deposit business in our market areas is extremely intense. While we have access to non-deposit borrowing sources, we prefer to fund loan demand with core bank deposits. Therefore, generating acceptable levels of deposit growth is a critical and ongoing challenge for us, particularly during periods of strong loan demand.

Table of Contents

Short-term Borrowings At June 30, 2007, short-term borrowings totaled \$1.36 billion compared to \$957.0 million at June 30, 2006. For the quarters ended June 30, 2007 and 2006, short-term borrowings averaged \$1.32 billion and \$908.5 million, respectively. During the second quarter of 2007, master notes averaged \$864.8 million, compared to \$616.0 million in the second quarter of 2006, a growth rate of 40.4 percent. Overnight repurchase agreements averaged \$301.4 million during the second quarter of 2007, a 58.0 percent growth rate over the second quarter of 2006. We attribute the growth in master notes and repurchase agreements to strong customer demand and successful delivery of cash management services to our commercial customers.

Expense on Interest-Bearing Liabilities Interest expense amounted to \$103.9 million during the second quarter of 2007, a 24.3 percent increase from the second quarter of 2006. Higher rates and increased average volume caused the \$20.3 million variance. The rate on average interest-bearing liabilities equaled 3.56 percent during the second quarter of 2007, a 56 basis point increase in the aggregate blended rate on interest-bearing liabilities as compared to the second quarter of 2006. Average interest-bearing liabilities increased \$541.5 million or 4.9 percent from second quarter of 2006 to the second quarter of 2007.

For the year-to-date, interest expense equaled \$203.3 million, compared to \$155.7 million for the same period of 2006. The \$47.6 million or 30.6 percent increase results from higher interest rates and growth in balances attributable to both cash management products and deposits. The rate on interest-bearing liabilities increased from 2.86 percent during the first six months of 2006 to 3.52 percent for the same period of 2007, a 66 basis point increase. The rate on time deposits increased 89 basis points from 3.66 percent to 4.55 percent while the rate on average money market accounts increased 69 basis points from 2.64 percent to 3.33 percent.

For the first six months of 2007, average interest-bearing liabilities increased \$651.9 million or 5.9 percent from \$10.98 billion to \$11.63 billion. Average time deposits increased \$338.3 million to \$5.14 billion and average master notes increased \$256.9 million from \$562.8 million to \$819.8 million. Money market accounts and repurchase agreements increased \$108.5 million and \$108.9 million, respectively, during the same time period.

NET INTEREST INCOME

Net interest income totaled \$118.0 million during the second quarter of 2007, a decrease of \$885,000 or 0.7 percent from the second quarter of 2006. The taxable-equivalent net yield on interest-earning assets equaled 3.42 percent for the second quarter of 2007, compared to the 3.57 percent achieved for the second quarter of 2006. For the six-month period ended June 30, 2007, net interest income declined by \$2.1 million or 0.9 percent from the same period of 2006 due to a 19 basis point contraction in the taxable-equivalent net yield on interest-earning assets. For both the second quarter and the first six months of 2007, the reduction in the net yield on interest-earning assets resulted primarily from the unfavorable impact of the flat yield curve which has persisted since early-2006. For both the three-month and the six-month comparisons, incremental net interest income arising from balance sheet growth during 2007 was more than offset by the unfavorable impact of changes in interest rates.

NONINTEREST INCOME

The growth of noninterest income is essential to our ability to sustain adequate levels of profitability. The primary sources of noninterest income are cardholder and merchant services income, service charges on deposit accounts, various types of commission-based income, fees from processing services and revenues derived from wealth management services.

During the first half of 2007, noninterest income amounted to \$146.1 million, compared to \$135.4 million during the same period of 2006. The \$10.7 million or 7.9 percent increase was primarily due to improvements in cardholder and merchant services income, commission income and mortgage income partially offset by a reduction in other income. Cardholder and merchant services generated \$46.9 million during the first six months of 2007, an increase of \$6.1 million or 15.1 percent compared to the second quarter of 2006. This increase resulted from higher merchant discount and interchange income, the result of growth in transaction volumes generated by both debit and credit cardholders.

Commission income increased \$2.0 million or 12.6 percent during the first six months of 2007. Broker-dealer activities generated \$11.1 million during 2007, a 12.9 percent increase over the same period of 2006. First Citizens Investor Services continues to benefit from favorable market conditions and strong referral activity from the branch network.

Table of Contents

Mortgage income increased \$1.7 million or 53.0 percent during the first six months of 2007, when compared to the same period of 2006 due to improved mortgage origination activity and the recognition of losses in 2006 on the sale of affordable loans.

Trust and asset management fees equaled \$11.9 million in the first half of 2007 compared to \$10.4 million in 2006. The \$1.5 million or 15.0 percent increase resulted from higher levels of assets under management. Fees from processing services increased \$1.5 million or 10.4 percent as transaction levels continued to grow.

Service charges on deposit accounts generated \$36.5 million for the first six months of 2007, unchanged from 2006. Bad check and overdraft charges increased while reductions were noted in service charge income earned on commercial and personal accounts.

When compared to the same period of 2006, other noninterest income decreased \$2.0 million during 2007, primarily due to the absence of premium income from two insurance subsidiaries that were sold on January 1, 2007.

During the second quarter of 2007, total noninterest income equaled \$74.9 million, an increase of \$5.2 million over the second quarter of 2006. Most of the factors contributing to the 7.5 percent increase in noninterest income during the second quarter were consistent with those noted during the six-month period. Service charges on deposit accounts, however, increased \$1.1 million or 5.8 percent due to higher bad check and overdraft fees.

NONINTEREST EXPENSE

The primary components of noninterest expense are salaries and related employee benefit costs, occupancy expenses related to branch offices and support facilities, and equipment costs related to branch offices and technology.

Noninterest expense equaled \$282.8 million for the first six months of 2007, a \$15.8 million or 5.9 percent increase over the \$266.9 million recorded during the same period of 2006. As a result of its continued growth and expansion, ISB's noninterest expense increased from \$35.9 million for the first half of 2006 to \$38.8 million in 2007, a \$2.9 million or 8.1 percent increase, the result of continued expansion of its branch footprint.

Salaries and wages totaled \$119.7 million for the first six months of 2007, an increase of \$6.0 million or 5.3 percent when compared to the same period of 2006. The increase resulted from new branch offices, headcount additions in several support functions and the effect of merit increases that were effective mid-year 2006.

Employee benefits expense totaled \$26.0 million for the first six months of 2007, a decrease of \$1.8 million. This 6.6 percent decrease resulted from reduced pension and health insurance costs.

Occupancy expense amounted to \$27.9 million during the first half of 2007 and \$25.3 million during 2006. The \$2.6 million or 10.3 percent increase resulted from higher building costs arising from branch expansion and the new headquarters facility. For the first six-month period, equipment costs rose \$1.9 million or 7.5 percent from \$25.6 million in 2006 to \$27.7 million in the second quarter of 2007, due to higher technology costs as well as furniture and equipment expense in new branch offices and the corporate headquarters facility.

Other expenses increased \$7.2 million or 9.6 percent from the first six months of 2006 compared to the same period of 2007. Cardholder-related expenses increased significantly during 2007. The cost of cardholder reward programs increased \$2.4 million or 66.2 percent during 2007 due to two new plans implemented during 2006. Processing costs increased \$1.8 million or 9.6 percent, the result of substantial growth in merchant, debit and credit card transaction volumes. Also contributing to the increase in other expense was a \$756,000 write-off during the second quarter of 2007 of costs related to future development of the headquarters site. Advertising expense increased \$700,000 during 2007.

For the second quarter of 2007, noninterest expense totaled \$143.6 million, an \$8.4 million or 6.2 percent increase over the same period of 2006. Salary expense equaled \$60.5 million during the second quarter of 2006, an increase of \$3.4 million or 5.9 percent due primarily to merit increases that were effective mid-year 2006 and associates hired in new branch offices and in support functions. Occupancy expense increased \$1.6 million or 13.1 percent due primarily to the expansion of the branch network.

Table of Contents

INCOME TAXES

BancShares continually monitors and evaluates the potential impact of current events on the estimates used to establish income tax expenses and income tax liabilities. On a periodic basis, we evaluate our income tax positions based on current tax law, positions taken by various tax auditors within the jurisdictions that BancShares is required to file income tax returns as well as potential or pending audits or assessments by such tax auditors.

Income tax expense amounted to \$33.7 million during the six months ended June 30, 2007, compared to \$35.1 million during the same period of 2006. The 4.1 percent decrease in income tax expense was primarily the result of lower pretax earnings, and changes to the percentage used to calculate the deferred tax asset valuation allowance during late-2006. The effective tax rates for these periods were 36.0 percent and 36.8 percent, respectively.

On January 1, 2007, we adopted the provisions of FASB Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies uncertainty in income taxes recognized by establishing a recognition threshold and a measurement attribute for the financial statement treatment of a tax position taken or expected to be taken in a tax return. The adoption of FIN 48 resulted in a reduction in the liability for unrecognized tax benefits, which was offset by a \$962,000 increase in the beginning balance of retained earnings.

SHAREHOLDERS EQUITY AND CAPITAL ADEQUACY

BancShares continues to exceed minimum regulatory capital standards, and the banking subsidiaries remain well-capitalized. At June 30, 2007 and 2006, the leverage capital ratios of BancShares were 9.75 percent and 9.92 percent, respectively, surpassing the minimum level of 3 percent. As a percentage of risk-adjusted assets, BancShares Tier 1 capital ratios were 13.05 percent at June 30, 2007 and 13.56 percent at June 30, 2006. The minimum ratio allowed is 4 percent of risk-adjusted assets. The total risk-adjusted capital ratios were 15.40 percent at June 30, 2007 and 16.05 percent as of June 30, 2006. The minimum total capital ratio is 8 percent.

The continued de novo growth and operating losses of ISB has required BancShares to infuse significant amounts of capital into ISB to support its expanding balance sheet. BancShares infused \$5.0 million into ISB during the second quarter of 2007. Since ISB was formed in 1997, BancShares has provided \$290.0 million in capital. The cumulative loss incurred since ISB's inception totals \$28.3 million. BancShares prospective capacity to provide capital to support the growth and expansion of ISB is highly dependent upon FCB's ability to return adequate capital through dividends to BancShares.

RISK MANAGEMENT

In the normal course of business, BancShares is exposed to various risks. To manage the major risks that are inherent in the operation of a financial holding company and to provide reasonable assurance that our long-term business objectives will be attained, various policies and risk management processes identify, monitor and manage risk within acceptable tolerances. Management continually refines and enhances its risk management policies and procedures to maintain effective risk management.

The most significant risk exposures are credit, interest rate and liquidity risk. Credit risk is the potential exposure from not collecting the amount of a loan, investment, working capital finance receivable or other receivable when it is contractually due. Interest rate risk is the potential reduction of net interest income as a result of changes in market interest rates. Liquidity risk is the possible inability to fund obligations to depositors, creditors, investors or borrowers.

Credit Risk. The maintenance of excellent asset quality is one of our key performance measures. BancShares manages and monitors extensions of credit and the quality of the loan and lease portfolio through rigorous initial underwriting processes and periodic ongoing reviews. Underwriting standards reflect credit policies and procedures, and much of the credit decision process is centralized. We maintain a credit review function that conducts independent risk reviews and analyses for the purpose of ensuring compliance with credit policies and to monitor asset quality trends. The independent risk reviews include portfolio analysis by geographic location and horizontal reviews across industry sectors within the banking subsidiaries. BancShares strives to identify potential credit problems as early as possible, to take charge-offs or write-downs as appropriate and to maintain adequate allowances for credit losses that are inherent in the loan and lease portfolio.

We maintain a well-diversified loan and lease portfolio, and seek to avoid the risk associated with large concentrations within specific geographic areas or industries. Our continuing expansion into new markets has allowed us to mitigate our historic exposure to geographic concentration in North Carolina and Virginia. We have endeavored to ensure that rigorous centralized underwriting and monitoring controls are functioning effectively, and we will continue to place emphasis upon maintaining strong lending standards in new markets.

Table of Contents

In recent years, we have aggressively sought opportunities to provide financial services to businesses associated with and professionals within the medical community. Due to strong growth within this segment of our loan and lease portfolio, our loans and leases to borrowers in medical, dental or related fields totaled \$1.88 billion as of June 30, 2007, which represents 18.0 percent of total loans and leases outstanding, compared to \$1.76 billion or 17.5 percent at June 30, 2006. Except for this single concentration, no other industry represented more than 10 percent of total loans and leases outstanding at June 30, 2007.

Nonperforming assets include nonaccrual loans and leases and other real estate. Other real estate includes foreclosed property as well as branch facilities that we have closed but not sold. At June 30, 2007, BancShares' nonperforming assets amounted to \$18.8 million or 0.18 percent of loans and leases plus foreclosed properties, compared to \$24.0 million at June 30, 2006. Management views these levels of nonperforming assets as evidence of strong asset quality, but continues to closely monitor nonperforming assets, taking necessary actions to minimize potential exposure.

At June 30, 2007, the allowance for credit losses totaled \$136.4 million or 1.30 percent of total loans and leases, compared to 1.37 percent at June 30, 2006. The allowance for credit losses includes the allowance for loan and lease losses and the reserve for unfunded credit commitments. We continuously analyze the growth and risk characteristics of the loan and lease portfolio under current economic conditions in order to evaluate the adequacy of the allowance. Such factors as the financial condition of borrowers, fair market value of collateral and other considerations are recognized in estimating probable credit losses.

During the second quarter of 2007, we adopted several refinements to the methodology used to establish the allowance for loan and lease losses. After accumulating sufficient data related to the actual repayment history of an isolated pool of revolving mortgage loans that are representative of the entire portfolio, we determined that an adjustment to the formula used to calculate the allowance for this portfolio was appropriate. As a result, the allowance required for this portfolio of loans declined by \$4.5 million. In addition, after monitoring the migration of commercial mortgage and commercial and industrial loans between loan grades over a period of several years, we incorporated applicable data into our formula used to calculate the allowance. Relying on that information, the allowance declined an additional \$4.1 million. Finally, in recognition of data suggesting the banking industry has begun to experience a period of credit deterioration and as a result of our concern about real estate values, we increased the allowance by approximately \$2.5 million.

Management considers the resulting allowance adequate to absorb estimated probable losses that relate to loans and leases outstanding at June 30, 2007, although future additions may be necessary based on changes in economic conditions and other factors. In addition, various regulatory agencies, as an integral part of their examination process, periodically review the allowance for credit losses. Such agencies may require the recognition of adjustments to the allowance based on their judgments of information available to them at the time of their examination.

The provision for credit losses charged to operations during the first six months of 2007 equaled \$4.5 million, compared to \$9.7 million during the second quarter of 2006. The \$5.2 million decrease resulted from the refinements to the allowance methodology and lower net charge-offs. Net charge-offs during the first half of 2007 equaled \$6.7 million compared to \$8.4 million during 2006. On an annualized basis, net charge-offs represent 0.13 percent of average loans and leases during the first six months of 2007 compared to 0.17 percent in the first six months of 2006. Table 6 provides details concerning the allowance and provision for credit losses during the past five quarters.

Investment securities are periodically evaluated to determine whether the investment is other than temporarily impaired. If an investment security is determined to be other than temporarily impaired, the security is written down to its fair value with an offsetting securities loss. No other-than-temporary impairment losses were recorded in the six-month periods ended June 30, 2007 or 2006.

Working capital finance receivables, which are included in other assets on the consolidated balance sheet, are also evaluated for credit risk. At June 30, 2007 and 2006, there were no reserves for uncollectible receivables. During the second quarter of 2007, we continued to monitor a delinquent working capital finance relationship. However, at this time, there is not sufficient information to determine the magnitude of any potential loss. We continue to monitor these assets for impairment and would record a loss contingency if such an accrual were appropriate. We also monitor off balance sheet exposures, such as commitments to extend credit and standby letters of credit, and we maintain a reserve for unfunded commitments based on an estimate of our exposure resulting from these obligations.

Nonperforming assets to total loans and leases plus other real estate	0.18	0.21	0.20	0.25	0.24	0.18	0.24

Interest Rate Risk. Interest rate risk results principally from assets and liabilities maturing or repricing at different points in time, from assets and liabilities repricing at the same point in time but in different amounts and from short-term and long-term interest rates changing in different magnitudes, an event frequently described by the resulting impact on the shape of the yield curve. External interest rates may also have a direct or indirect impact on the interest rate and repricing characteristics of loans and leases that are originated as well as the rate characteristics of our interest-bearing liabilities.

We do not typically utilize interest rate swaps, floors, collars or other derivative financial instruments to attempt to hedge our rate sensitivity and general balance sheet interest rate risk. However, during the second quarter of 2006, in conjunction with the issuance of \$115.0 million in trust preferred securities, we entered into an interest rate swap to synthetically convert the variable rate coupon on the securities to a fixed rate of 7.125 percent for a period of five years.

During the first six months of 2007 our exposure to interest rate risk has increased due to growing net one-year liability sensitivity. As a result, our simulations of future amounts of net interest income under rising interest rate scenarios indicate that our net interest income will likely decline by approximately 2%. The magnitude of the net one-year liability sensitivity is projected to continue to grow during the remainder of 2007.

Liquidity Risk. Liquidity risk results from the mismatching of asset and liability cash flows. BancShares manages this risk by structuring its balance sheet prudently and by maintaining various borrowing resources to fund potential cash needs. BancShares has historically maintained a strong focus on liquidity, and our deposit base

Table of Contents

represents our primary liquidity source. Through our deposit pricing strategies, we have the ability to stimulate or curtail deposit growth. BancShares also maintains additional sources for borrowed funds through federal funds lines of credit and other borrowing facilities. At June 30, 2007, BancShares had access to \$525.0 million in unfunded borrowings through its correspondent bank network. Brokered deposits have been utilized by ISB to augment its liquidity base with balances totaling \$100.0 million as of June 30, 2007.

Once we have generated the needed liquidity and satisfied our loan and lease demand, residual liquidity is invested in overnight and longer-term investment products. Investment securities available for sale provide immediate liquidity as needed. In addition, investment securities held to maturity provide an ongoing liquidity source based on the scheduled maturity dates of the securities.

SEGMENT REPORTING

BancShares conducts its banking operations through its two banking subsidiaries, FCB and ISB. Although FCB and ISB offer similar products and services to customers, each entity operates in distinct geographic markets and has separate management groups. We monitor growth and financial results in these institutions separately and, within each institution, by geographic segregation.

Although FCB has grown through acquisition in certain of its markets, throughout its history the majority of its expansion has been accomplished on a de novo basis. However, because of FCB's size, market share and maturity as well as the current modest expansion of its branch network, the costs associated with de novo branching are not material to FCB's financial performance. Since it first opened in 1997, ISB has followed a similar business model for growth and expansion. Yet, due to the magnitude of the number of branch offices that have yet to attain sufficient size for profitability, the financial results and trends of ISB are significantly affected by its current and continuing growth. Each new market ISB enters creates additional operating costs that are typically not fully offset by operating revenues until the third year after initial opening. ISB's rapid growth in new markets in recent years has continued to adversely impact its financial performance.

IronStone Bank. At June 30, 2007, ISB operated 57 branches in Florida, Georgia, Texas, New Mexico, Arizona, California, Oregon, Washington and Colorado. ISB continues to focus on markets with favorable growth prospects. At the beginning of 2007, we announced plans to expand into three new markets: Oklahoma City, Kansas City and Dallas.

ISB's assets totaled \$2.22 billion at June 30, 2007 compared to \$2.00 billion at June 30, 2006, an increase of \$216.8 million or 10.8 percent.

ISB reported a net loss of \$1.3 million during the first six months of 2007, compared to net income of \$78,000 reported during 2006. Decreased earnings have resulted from lower net interest income and higher operating costs from expansion of its branch network, offset partially by higher levels of noninterest income and reduced provision for credit losses.

The provision for credit losses decreased \$978,000 during the first six months of 2007 due to refinements in the allowance model. The benefit of those changes was partially offset by higher net charge-offs, which increased from \$608,000 in 2006 to \$1.1 million in 2007. On an annualized basis, the ratio of current quarter net charge-offs to average loans and leases outstanding equaled 0.12 percent, compared to 0.07 percent in the prior year.

ISB's noninterest income increased \$1.5 million or 27.8 percent during the first six months of 2007, the result of strong growth among cardholder and merchant services income and commission income generated by working capital finance.

Noninterest expense increased \$2.9 million or 8.1 percent during the first half of 2007, versus the same period of 2006. Salaries and wages increased \$609,000 or 4.3 percent during the first six months of 2007, the combined result of merit increases and new staff costs to support new facilities. Occupancy expense was up \$1.1 million or 17.4 percent due to growth of the branch network. Other expense equaled \$10.9 million during the six months of 2007 compared to \$9.9 million during the second quarter of 2006, a 10.7 percent increase caused by higher general operating expenses, such as credit card and account processing fees.

During the first quarter of 2007, ISB announced plans to expand its Texas franchise into the Dallas area and to establish new branches in Oklahoma City and Kansas City during 2007 and 2008. As its growth continues, ISB will incur incremental operating costs, particularly in the areas of personnel, occupancy and equipment. As a result of the anticipated continued expansion of its franchise, a contracting net yield on interest-earning assets and a large provision for credit losses arising from forecasted loan and lease growth, we expect that losses will likely extend into the foreseeable future.

Table of Contents

First Citizens Bank. At June 30, 2007, FCB operated 340 branches in North Carolina, Virginia, West Virginia, Maryland and Tennessee.

FCB's total assets increased slightly from \$13.35 billion at June 30, 2006 to \$13.39 billion at June 30, 2007. First Citizens generated net income of \$65.7 million during the first two quarters of 2007, compared to net income of \$67.3 million during 2006. The \$1.6 million reduction in net income was due to lower levels of net interest income and higher noninterest expense, offset partially by improvements in noninterest income and a significant reduction in the provision for credit losses. FCB's net interest income decreased \$4.0 million or 1.9 percent during 2007, due to continued interest rate pressures, partially offset by slightly higher balances of interest-earning assets.

The provision for credit losses decreased \$4.3 million due to lower net charge offs, which declined by 27.6 percent and refinements to the allowance methodology. FCB's noninterest income increased \$10.5 million or 7.8 percent during the first six months of 2007, primarily the result of higher cardholder and merchant services income, mortgage income and fees from processing services. Noninterest expense increased \$14.5 million or 6.2 percent during 2007, caused by higher personnel, occupancy and technology-related costs.

CURRENT ACCOUNTING AND REGULATORY ISSUES

In June 2006, the FASB issued Interpretation No. 48 Accounting for Uncertainty in Income Taxes (FIN 48). FIN 48 clarifies uncertainty in income taxes recognized by establishing a recognition threshold and a measurement attribute for the financial statement treatment of a tax position taken or expected to be taken in a tax return. We adopted FIN 48 effective January 1, 2007. The adoption of FIN 48 resulted in a reduction in the liability for unrecognized tax benefits, which was offset by a \$962,000 adjustment to the beginning balance of retained earnings.

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 157 Fair Value Measurements (Statement 157). Statement 157 defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. Statement 157 does not require any new fair value measurements, but clarifies and standardizes some divergent practices that have emerged since prior guidance was issued. Statement 157 will become effective for BancShares on January 1, 2008. There will be no material impact on our consolidated financial statements.

In September 2006, the FASB issued Summary of Statement No. 158 Employers Accounting for Defined Benefit Pension and Other Postretirement Plans (Statement 158). Statement 158 requires sponsors of defined benefit and other post-retirement plans to recognize the overfunded or underfunded status of that plan as an asset or liability in the sponsor's statement of financial position and to recognize changes in that funded status in the year in which the changes occur through comprehensive income. The recognition of the funded status of the defined benefit plan and additional disclosures outlined in Statement 158 were reflected in BancShares' December 31, 2006 consolidated financial statements. Statement 158 also requires an employer to measure the funded status of a plan as of the date of its year-end statement of financial position, although that requirement is not effective until 2008.

Management is not aware of any current recommendations by regulatory authorities that, if implemented, would have or would be reasonably likely to have a material effect on liquidity, capital ratios or results of operations.

FORWARD-LOOKING STATEMENTS

Statements in this Report and exhibits relating to plans, strategies, economic performance and trends, projections of results of specific activities or investments, expectations or beliefs about future events or results, and other statements that are not descriptions of historical facts, may be forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking information is inherently subject to risks and uncertainties, and actual results could differ materially from those currently anticipated due to a number of factors, which include, but are not limited to, factors discussed in our Annual Report on Form 10-K and in other documents filed by us from time to time with the Securities and Exchange Commission.

Forward-looking statements may be identified by terms such as may, will, should, could, expects, plans, intends, anticipates, believes, predicts, forecasts, projects, potential or continue, or similar terms or the negative of these terms, or other statements concerning opinions or judgments of BancShares' management about future events.

Factors that could influence the accuracy of those forward-looking statements include, but are not limited to, the financial success or changing strategies of our customers, customer acceptance of our services, products and fee structure, the competitive nature of the financial services industry, our ability to compete effectively against other financial institutions in our banking markets, actions of government regulators, the level of market interest rates and our ability to manage our interest rate risk, changes in general economic conditions particularly changes that affect our loan and lease portfolio, the abilities of our borrowers to repay their loans and leases, and the values of collateral, and other developments or changes in our business that we do not expect.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. We have no obligation to update these forward-looking statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is the potential economic loss resulting from changes in market prices and interest rates. This risk can either result in diminished current fair values of financial instruments or reduced net interest income in future periods. As of June 30, 2007, BancShares' market risk profile has not changed significantly from December 31, 2006. Changes in fair value that result from movement in market rates cannot be predicted with any degree of certainty. Therefore, the impact that future changes in market rates will have on the fair values of financial instruments is uncertain.

Item 4. Controls and Procedures

BancShares' management, with the participation of its Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the design and operation of BancShares' disclosure controls and procedures in accordance with Rule 13a-15 of the Securities Exchange Act of 1934 (Exchange Act). Based on their evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, BancShares' disclosure controls and procedures were effective in enabling it to record, process, summarize and report in a timely manner the information required to be disclosed in reports it files under the Exchange Act.

No change in BancShares' internal control over financial reporting occurred during the second quarter of 2007 that had materially affected, or is reasonably likely to materially affect, BancShares' internal control over financial reporting.
