#### **Tax Cost of Investments**

The United States federal income tax basis of the Fund s investments and net unrealized appreciation as of July 31, 2008 were as follows:

Cost	Appreciation	Depreciation	Net Unrealized Appreciation
\$136,173,273	\$ 13,679,550	\$ 2,766,294	\$ 10,913,256

#### **Quality of Investments**

As of July 31, 2008, 69.8% of the Registrant's total investments were invested in securities where either the issue or the issuer was rated. A or better by Standard & Poor's Corporation or Moody's Investors Service, Inc. or, if unrated, judged to be of equivalent quality by the Investment Manager. The table below shows the asset quality of the Registrant's portfolio as of July 31, 2008.

	% of total Investments
AAA/Aaa	41.8
AA/Aa	15.9
A	12.1
BBB/Baa	10.3
BB/Ba*	14.1
B*	5.8

<sup>\*</sup> Below Investment Grade

#### **Notes to Portfolio of Investments**

#### **Securities Valuation**

The Registrant s Board of Directors has adopted Pricing and Valuation Procedures (the Procedures) to be used in determining the value of the assets held by the Registrant. In accordance with the Procedures, investments are stated at value. Investments for which market quotations are readily available are valued at the last trade price on the date of determination as obtained from a pricing source. If no such trade price is available, such investments are valued at the quoted bid price or the mean between the quoted bid and asked price on the date of determination as obtained from a pricing source.

Short-term securities which mature in more than 60 days are valued at current market quotations. Short-term securities which mature in 60 days or less are valued at amortized cost, which approximates market value.

Securities for which market quotations are not readily available (including investments which are subject to limitations as to their sale) are to be valued at fair value. As a general rule, whether or not the Registrant is required to fair value price an asset is dependent on the ready availability of current market quotes or, even if readily available, the reliability of such quotes. Any assets for which market quotations are not readily available or for which available prices are not reliable, shall be determined in a manner that most fairly reflects the asset s (or group of assets) fair value (i.e., the amount that the Registrant might reasonably expect to receive for the asset upon its current sale) on the valuation date, based on consideration of all available information.

The Procedures provide that in certain instances, including without limitation, if there is a stale price for a portfolio security, in an emergency situation, or if a significant event occurs after the close of trading of a portfolio security, but before the calculation of the Registrant s net asset value, the security may be valued at its fair value.

#### Portfolio of Investments (concluded)

As of July 31, 2008 (unaudited)

#### **Interest Rate Swaps**

The Registrant may engage in certain interest rate swap transactions or to hedge the Registrant s leverage facility. An interest rate swap is an agreement between two parties, which involves the exchange of floating and fixed rate interest payments for a specified period of time. Interest rate swaps involve the accrual and exchange of interest payments between the parties. These payments are recorded as realized gain/(loss).

During the term of the swap, changes in the value of the swap are recognized as unrealized appreciation or depreciation by marking-to-market the fair market value of the swap. When the swap is terminated, the Registrant will record a realized gain/(loss) equal to the difference, if any, between the proceeds from (or cost of) the closing transaction and the Registrant s basis in the contract. The Fund is exposed to credit risk in the event of non-performance by the counterparty to the swap. However, the Registrant does not anticipate non-performance by any counterparty.

#### **Forward Foreign Currency Exchange Contracts**

A forward foreign currency exchange contract ( Forward Contract ) involves an obligation to purchase and sell a specific currency at a future date, which may be any fixed number of days from the date of the contract agreed upon by the parties, at a price set at the time of the contract. The Forward Contract is marked-to-market daily and the change in market value is recorded by the Registrant as unrealized appreciation or depreciation. When the Forward Contract is closed, the Registrant records a realized gain or loss equal to the difference between the value at the time it was opened and the value at the time it was closed. Risks arise from unanticipated movements in the value of the foreign currency relative to the functional currencies and from potential inability of counterparties to meet the terms of their contracts.

#### **Futures Contracts**

A futures contract is an agreement between two parties to buy and sell a security for a set price on a future date. Upon entering into a contract, the Registrant deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Registrant agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin and are recorded by the Registrant as unrealized appreciation or depreciation. When the contract is closed, the Registrant records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

#### **Options**

When the Registrant writes an option, an amount equal to the premium received by the Registrant is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Registrant enters into a closing transaction), the Registrant realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received). As of July 31, 2008, there were no open option contracts.

### Repurchase Agreements

In connection with transactions in repurchase agreements with U.S. financial institutions, it is the Registrant s policy that its custodian/counterparty segregates the underlying collateral securities, the value of which exceeds the principal amount of the repurchase transaction, including accrued interest. To the extent that any repurchase transaction exceeds one business day, the collateral is valued on a daily basis to determine its adequacy. If the seller of the security defaults and the value of the collateral declines or if bankruptcy proceedings are commenced with respect to the seller of the security, realization of the collateral by the Registrant may be delayed or limited.

#### **Foreign Currency Translation**

Foreign currency amounts are translated into United States dollars on the following basis:

(i) market value of investment securities, other assets and liabilities at the exchange rates at the end of the reporting period;

(ii) purchases and sales of investment securities, income and expenses at the rates of exchange prevailing on the respective dates of such transactions.

The Registrant isolates that portion of the results of operations arising as a result of changes in the foreign exchange rates from the fluctuations arising from changes in the market prices of the securities held at the end of the reporting period. Similarly, the Registrant isolates the effect of changes in foreign exchange rates from the fluctuations arising from changes in the market prices of portfolio securities sold during the reporting period.

Net realized foreign exchange gains/(losses) includes realized foreign exchange gains/(losses) from sales and maturities of portfolio securities, sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the amounts of interest, discount and foreign withholding taxes recorded on the Registrant's books and the U.S. dollar equivalent amounts actually received or paid. Net unrealized foreign exchange appreciation/(depreciation) includes changes in the value of portfolio securities and other assets and liabilities arising as a result of changes in the exchange rate. Accumulated realized and unrealized foreign exchange gains/(losses) shown in the composition of net assets represent foreign exchange gains/(losses) for book purposes that have not yet been recognized for tax purposes.

Foreign security and currency transactions may involve certain considerations and risks not typically associated with those of domestic origin, including unanticipated movements in the value of the foreign currency relative to the U.S. dollar.

#### Item 2 Controls and Procedures

- (a) It is the conclusion of the Registrant s principal executive officer and principal financial officer that the effectiveness of the Registrant s current disclosure controls and procedures (such disclosure controls and procedures having been evaluated within 90 days of the date of this filing) provide reasonable assurance that the information required to be disclosed by the Registrant has been recorded, processed, summarized and reported within the time period specified in the Commission s rules and forms and that the information required to be disclosed by the Registrant has been accumulated and communicated to the Registrant s principal executive officer and principal financial officer in order to allow timely decisions regarding required disclosure.
- (b) There have been no changes in the Registrant s internal control over financial reporting (as defined in Rule 30a-3(d) under the Investment Company Act of 1940, as amended) that occurred during the Registrant s last fiscal quarter that have materially affected, or are reasonably likely to materially affect, the Registrant s internal control over financial reporting.

#### Item 3 Exhibits.

(a) Certifications required pursuant to Rule 30a-2(a) under the Investment Company Act of 1940, as amended, are filed as Exhibit 99.CERT.

#### **SIGNATURES**

Pursuant to the requirements of the Securities Exchange Act of 1934 and the Investment Company Act of 1940, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Aberdeen Global Income Fund, Inc.
