UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

Washington, DC 20549

FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Year Ended December 31, 2010

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

Commission File Number 000-25032

UNIVERSAL STAINLESS & ALLOY PRODUCTS, INC.

(Exact name of Registrant as specified in its charter)

DELAWARE
(State or other jurisdiction of

incorporation or organization)

25-1724540
(IRS Employer

Identification No.)

600 MAYER STREET, BRIDGEVILLE, PA 15017
(Address of principal executive offices, including zip code)

(412) 257-7600
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act: [None]

Securities registered pursuant to Section 12(g) of the Act:

Title of Class

Common Stock, par value \$.001 per share

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definitions of accelerated filer and large accelerated filer in Rule 12b-2 of the Exchange Act. (Check One)

Edgar Filing: UNIVERSAL STAINLESS & ALLOY PRODUCTS INC - Form 10-K

Large accelerated filer Accelerated filer
Non-accelerated filer (Do not check if a smaller reporting company) Smaller reporting company
Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of the voting stock held by non-affiliates of the registrant on June 30, 2010, based on the closing price of \$15.99 per share on that date, was \$51,432,000. For the purposes of this disclosure only, the registrant has assumed that its directors, executive officers, and beneficial owners of 5% or more of the registrant's Common Stock are the affiliates of the registrant. The registrant has made no determination that such persons are affiliates within the meaning of Rule 405 under the Securities Act of 1933.

As of February 28, 2011, there were 6,881,464 shares of the Registrant's Common Stock issued and outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Part III of this Form 10-K incorporates by reference portions of the Company's definitive Proxy Statement for the 2011 Annual Meeting of Stockholders.

PART I

ITEM 1. BUSINESS GENERAL

Universal Stainless & Alloy Products, Inc. and its wholly-owned subsidiaries (the Company), which was incorporated in 1994, manufactures and markets semi-finished and finished specialty steel products, including stainless steel, tool steel and certain other alloyed steels. The Company's manufacturing process involves melting, remelting, heat treating, hot and cold rolling, machining and cold drawing of semi-finished and finished specialty steels. The Company's products are sold to rerollers, forgers, service centers, original equipment manufacturers (OEMs) and wire redrawers. The Company's customers further process its products for use in a variety of industries, including the aerospace, power generation, petrochemical and heavy equipment manufacturing industries. The Company also performs conversion services on materials supplied by customers that lack certain of the Company's production facilities or that are subject to their own capacity constraints.

The Company is comprised of three operating locations and one corporate headquarters. For segment reporting, the Bridgeville and Titusville facilities have been aggregated into one reportable segment, Universal Stainless & Alloy Products. Dunkirk Specialty Steel represents the second reportable segment.

The Company's products are manufactured in a wide variety of grades, widths and gauges in response to customer specifications. At its Bridgeville facility, the Company produces specialty steel products in the form of long products (ingots, blooms, billets and bars) and flat rolled products (slabs and plates). Certain grades requiring vacuum-arc remelting (VAR) may be transported to the Titusville facility to complete that process and then be transported back to the Bridgeville facility for further processing. The semi-finished long products are primarily used by the Company's Dunkirk facility and certain customers to produce finished bar, rod and wire products, and the semi-finished flat rolled products are used by customers to produce light-gauge plate, sheet and strip products. The finished bar products manufactured by the Company are primarily used by OEMs and by service center customers for distribution to a variety of end users. The Company also produces customized shapes primarily for OEMs that are cold rolled from purchased coiled strip, flat bar or extruded bar at its Precision Rolled Products department (PRP), located at its Titusville facility.

INDUSTRY OVERVIEW

The specialty steel industry is a relatively small but distinct segment of the overall steel industry. Specialty steels include stainless steels, high-speed and tool steels, electrical steels, high-temperature alloys, magnetic alloys and electronic alloys. Specialty steels are made with a high alloy content, which enables their use in environments that demand exceptional hardness, toughness, strength and resistance to heat, corrosion or abrasion, or combinations thereof. Specialty steels generally must conform to more demanding customer specifications for consistency, straightness and surface finish than carbon steels. According to the Specialty Steel Industry of North America (SSINA), annual domestic consumption of specialty steels approximated 1.6 million tons in 2009 compared with 2.3 million tons in 2008. Of the 2009 amount, approximately 1.2 million tons of specialty steels consumed domestically represented stainless steel sheet and strip and electrical alloy products which the Company does not produce. Also, according to SSINA data through October 31, 2010, U.S. consumption of total specialty steel products in 2010 increased 32% from 2009 levels. The consumption of those products in the Company's addressable market, comprising stainless steel bar, rod and wire products, increased by 44%, 89% and 14%, respectively.

The Company primarily manufactures its products within the following product lines and, generally, in response to customer orders:

Stainless Steel. Stainless steel, which represents the largest part of the specialty steel market, contains elements such as nickel, chrome and molybdenum that give it the unique qualities of high strength, good wear characteristics, natural attractiveness, ease of maintenance and resistance to rust, corrosion and heat. Stainless steel is used, among other applications, in the automotive, aerospace and power generation industries, as well as

Table of Contents

in the manufacture of food handling, health and medical, chemical processing and pollution control equipment. The increased number of applications for stainless steel has resulted in the development of a greater variety of stainless steel metallurgical grades than carbon steel.

Net sales by principal product line were as follows:

For the years ended December 31, (dollars in thousands)	2010	2009	2008
Stainless steel	\$ 142,302	\$ 98,069	\$ 172,222
Tool steel	26,196	9,413	39,046
High-strength low alloy steel	10,310	9,235	11,936
High-temperature alloy steel	5,853	5,567	7,931
Conversion service	2,719	1,203	1,941
Scrap sales and other	2,043	1,420	2,030
Total net sales	\$ 189,423	\$ 124,907	\$ 235,106

Tool Steel. Tool steels contain elements of manganese, silicon, chrome and molybdenum to produce specific hardness characteristics that enable tool steels to form, cut, shape and shear other materials in the manufacturing process. Heating and cooling at precise rates in the heat-treating process bring out these hardness characteristics. Tool steels are utilized in the manufacturing of metals, plastics, paper and aluminum extrusions, pharmaceuticals, electronics and optics.

High-Temperature Alloy Steel. These steels are designed to meet critical requirements of heat resistance and structural integrity. They generally have very high nickel content relative to other types of specialty steels. High-temperature alloy steels are manufactured for use generally in the aerospace industry.

High-Strength Low Alloy Steel. High-strength low alloy steel is a relative term that refers to those steels that maintain alloying elements that range in versatility. The alloy element of nickel, chrome and molybdenum in such steels typically exceeds the alloy element of carbon steels but not that of high-temperature alloy steel. High-strength low alloy steels are manufactured for use generally in the aerospace industry.

RAW MATERIALS

The Company's Bridgeville facility depends on the delivery of key raw materials for its day-to-day operations. These key raw materials are ferrous and non-ferrous scrap metal and alloys, primarily consisting of nickel, chrome, molybdenum and copper. Scrap metal is primarily generated by industrial sources and is purchased through a number of scrap brokers and dealers. The Company also recycles scrap metal generated from its own production operations as a source of metal for the melt shop. Alloys are generally purchased from domestic agents and originate in Australia, Canada, China, Russia and South Africa. Political disruptions in countries such as these could cause supply interruptions and affect the availability and price of the raw materials purchased by the Company.

The Bridgeville facility supplies semi-finished specialty steel products as starting materials to the Company's Titusville and Dunkirk facilities. Semi-finished specialty steel starting materials, not capable of being produced by the Company at a competitive cost, are purchased from other suppliers. The Company generally purchases these starting materials from steel strip coil suppliers, extruders, flat rolled producers and service centers. The Company believes that adequate supplies of starting material will continue to be available.

The cost of raw materials represents more than 50% of the Company's total cost of products sold in 2010 and 2009. Raw material costs can be impacted by significant price changes. Raw material prices vary based on numerous factors, including quality, and are subject to frequent market fluctuations. Future raw material prices cannot be predicted with any degree of certainty. The Company does not maintain any long-term agreements with any of its raw material suppliers.

Table of Contents

The Company has implemented a sales price surcharge mechanism on its products to help offset the impact of raw material price fluctuations. For substantially all stainless semi-finished products, the surcharge is calculated at the time of order entry, based on current raw material prices. For substantially all finished products and tool steel plate, the surcharge is calculated based on the monthly average raw material prices two months prior to the promised ship date. While the material surcharge mechanism is designed to offset modest fluctuations in raw material prices, it cannot immediately absorb significant spikes in raw material prices. A material change in raw material prices within a short period of time could have a material effect on the financial results of the Company, and there can be no assurance that the raw material surcharge mechanism will completely offset immediate changes in the Company's raw material costs.

ENERGY AGREEMENTS

The production of specialty steel requires the ready availability of substantial amounts of electricity and natural gas for which the Company negotiates competitive agreements for the supply of electricity and natural gas. While the Company believes that its energy agreements allow it to compete effectively within the specialty steel industry, the potential of curtailments exists as a result of decreased supplies during periods of increased demand for electricity and natural gas. These interruptions not only can adversely affect the operating performance of the Company, but also can lead to increased costs. The Company has a sales price surcharge mechanism on its products to help offset the impact of natural gas price fluctuations.

CUSTOMERS

The Company's customer base increased from 568 customers at December 31, 2009 to 595 customers at December 31, 2010. The Company's five largest customers in the aggregate accounted for approximately 45% and 38% of sales for the years ended December 31, 2010 and 2009, respectively. For the year ended December 31, 2010, sales to Carpenter Technology Corporation (CRS) accounted for 14% of the Company's sales and 17% of accounts receivable. No other customer accounted for more than 10% of the Company's sales for the year ended December 31, 2010. Sales outside of the United States approximated 5% of 2010, 10% of 2009 and 4% of 2008 sales, respectively.

BACKLOG

The Company's backlog of orders on hand, considered to be firm, as of December 31, 2010 was approximately \$69 million as compared to approximately \$36 million at the same time in 2009. The 93% increase in the backlog is primarily due to increased demand primarily caused by improving economic and credit conditions which started to impact order entry levels during the first quarter of 2010. The December 31, 2010 backlog has no promise dates beyond the year 2011. The Company's backlog may not be indicative of actual sales because certain surcharges are not determinable until the order is shipped to the customer and therefore should not be used as a direct measure of future revenue.

COMPETITION

Competition in the Company's markets is based upon product quality, delivery capability, customer service and price. Maintaining high standards of product quality, while responding quickly to customer needs and keeping production costs at competitive levels, is essential to the Company's ability to compete in its markets.

Annual domestic U.S. consumption of specialty steel products of the type manufactured by the Company approximated 400,000 tons in 2009 compared with 600,000 tons in 2008. The Company chooses to restrict its participation in this market by limiting the volume of commodity stainless steel products it markets because of the highly competitive nature of the commodity business.

The Company believes that twelve companies that manufacture one or more similar specialty steel products are significant competitors. There are many smaller producing companies and material converters that are also considered to be competitors of the Company.

Table of Contents

High import penetration of specialty steel products, especially stainless and tool steels, also impacts the competitive nature within the United States. Unfair pricing practices by foreign producers have resulted in high import penetration into the U.S. markets in which the Company participates. According to SSINA, import penetration for the years ended December 31, 2009 and 2008 was 51% and 53%, respectively, for stainless bar, and 39% and 49%, respectively, for stainless rod. Import penetration during the first ten months of 2010 for stainless bar and rod was 49% and 36%, respectively, according to SSINA.

The Continued Dumping and Subsidy Offset Act of 2000 (the CDSOA) provides for payment of import duties collected by the U.S. Treasury to domestic companies injured by unfair foreign trade practices. The assets purchased for the operations of Dunkirk Specialty Steel were previously owned and operated by AL Tech Specialty Steel, Inc. and Empire Specialty Steel, Inc. During their ownership, both organizations participated in several anti-dumping lawsuits with other domestic specialty steel producers. The Company has joined other domestic producers in the filing of trade actions against foreign producers.

In December 2010, the Company received an import duty net payment of \$32,000, and, in December 2009, the Company received a net payment of \$551,000. Benefits awarded from the CDSOA expired on September 30, 2007. Future benefits are dependent on the amount of undistributed import duties collected as of September 30, 2007 and the relationship of Dunkirk Specialty Steel's claim in relation to claims filed by other domestic specialty steel producers. The Company expects minimal distributions in the future.

EMPLOYEE RELATIONS

The Company considers the maintenance of good relations with its employees to be important to the successful conduct of its business. The Company has profit-sharing plans for certain salaried employees and for all of its employees represented by United Steelworkers (the USW) and has equity ownership programs for all of its eligible employees, in an effort to forge an alliance between its employees' interests and those of the Company's stockholders. At December 31, 2010, the Company had 298 employees at its Bridgeville facility, 38 employees at its Titusville facility and 182 employees at its Dunkirk facility, of which 237, 32 and 158 were USW members, respectively.

Collective Bargaining Agreements

The Company recognizes the USW as the exclusive representative for the Company's hourly employees with respect to the terms and conditions of their employment. The Company has entered into the following collective bargaining agreements:

Facility	Commencement Date	Expiration Date
Dunkirk	November 2007	October 2012
Bridgeville	September 2008	August 2013
Titusville	October 2010	September 2015

The Company believes a critical component of its collective bargaining agreements is the inclusion of a profit sharing plan. Under the plan, the hourly employees are entitled to receive 8.5% of their respective facilities' annual pretax profits in excess of \$1.0 million at Bridgeville and Dunkirk, and in excess of \$500,000 at Titusville.

Employee Benefit Plans

The Company also maintains a 401(k) retirement plan for its hourly and salaried employees. Pursuant to the 401(k) plan, participants may elect to make pre-tax and after-tax contributions, subject to certain limitations imposed under the Internal Revenue Code of 1986, as amended. In addition, the Company makes periodic contributions to the 401(k) plan for the hourly employees employed at the Dunkirk and Titusville facilities, based on service. The Company makes periodic contributions for the salaried employees, the amount of the contribution is dependent upon their individual contribution to the 401(k) retirement plan.

Table of Contents

The Company also participates in the Steelworkers Pension Trust (the Trust), a multi-employer defined-benefit pension plan that is open to all hourly and salaried employees associated with the Bridgeville facility. The Company makes periodic contributions to the Trust based on hours worked at a fixed rate for each hourly employee and a fixed monthly contribution on behalf of each salaried employee.

The Company also provides group life and health insurance plans for its hourly and salaried employees.

Employee Stock Purchase Plan

Under the 1996 Employee Stock Purchase Plan, as amended (the Plan), the Company is authorized to issue up to 150,000 shares of Common Stock to its full-time employees, nearly all of whom are eligible to participate. Under the terms of the Plan, employees can choose as of January 1 and July 1 of each year to have up to 10% of their total earnings withheld to purchase up to 100 shares of the Company's Common Stock each six-month period. The purchase price of the stock is 85% of the lower of its beginning-of-the-period or end-of-the-period market prices. At December 31, 2010, the Company had issued 122,933 shares of Common Stock since the plan's inception.

ENVIRONMENTAL

The Company is subject to federal, state and local environmental laws and regulations (collectively, Environmental Laws), including those governing discharges of pollutants into the air and water, and the generation, handling and disposal of hazardous and non-hazardous substances. The Company monitors its compliance with Environmental Laws applicable to it and, accordingly, believes that it is currently in compliance with all laws and regulations in all material respects. The Company is subject periodically to environmental compliance reviews by various regulatory offices. The Company may be liable for the remediation of contamination associated with generation, handling and disposal activities. Environmental costs could be incurred, which may be significant, related to environmental compliance, at any time or from time to time in the future.

EXECUTIVE OFFICERS

The following table sets forth, as of February 28, 2011, certain information with respect to the executive officers of the Company:

NAME (AGE)	EXECUTIVE OFFICER SINCE	POSITION
Dennis M. Oates (58)	2008	Chairman, President and Chief Executive Officer
William W. Beible, Jr. (59)	2009	Senior Vice President of Operations
Paul McGrath (59)	1996	Vice President of Administration, General Counsel and Secretary
Douglas McSorley (45)	2010	Vice President of Finance, Chief Financial Officer and Treasurer
Christopher M. Zimmer (37)	2010	Vice President of Sales and Marketing

Dennis M. Oates has been President and Chief Executive Officer of the Company since January 2008. Mr. Oates was named to the Company's Board of Directors in October 2007. Mr. Oates previously served as Senior Vice

Table of Contents

President of the Specialty Alloys Operations of Carpenter Technology Corporation from 2003 to July 2007. Mr. Oates also served as President and Chief Executive Officer of TW Metals, Inc. from 1998 to 2003. In May 2010, the Board of Directors elected Mr. Oates to the additional position of Chairman.

William W. Beible, Jr. has been Senior Vice President of Operations of the Company since February 2009. Mr. Beible was employed by Carpenter Technology Corporation from 2006 to 2008 and served in several positions, including Vice President of Manufacturing Specialty Alloys Operations. Mr. Beible also served as Vice President of Business Improvement and of Information Technology at P.H. Glatfelter Company, a global supplier of specialty papers and engineered products, from 2003 to 2005.

Paul A. McGrath has been Vice President of Administration of the Company since January 2007, General Counsel since 1995 and was appointed Secretary in 1996. Mr. McGrath served as Vice President of Operations from 2001 to December 2006. Previously, he was employed by Westinghouse Electric Corporation for approximately 24 years in various management positions.

Douglas McSorley has been Vice President of Finance, Chief Financial Officer and Treasurer since July 2010. Mr. McSorley was previously employed as Chief Financial Officer of PSC Metals, Inc., an Icahn Enterprises L.P. scrap metal recycling company operating in the United States and Canada from 1999 to 2009. He joined a predecessor company to PSC as Controller in 1994, after serving five years with Deloitte & Touche LLP in Ontario, Canada, where he worked as a Chartered Accountant with a broad spectrum of industrial clients.

Christopher M. Zimmer has been Vice President of Sales and Marketing since April 2008. Mr. Zimmer previously served as Vice President of Sales and Marketing for Schmoltz+Bickenbach USA from 1995 to 2008. He held positions of increasing responsibility including inside sales, commercial manager stainless bar, general manager nickel alloy products, and National Sales Manager.

PATENTS AND TRADEMARKS

The Company does not consider its business to be materially dependent on patent or trademark protection, and believes it owns or maintains effective licenses covering all the intellectual property used in its business. The Company seeks to protect its proprietary information by use of confidentiality and non-competition agreements with certain employees.

AVAILABLE INFORMATION

Copies of the Company's Annual Report on Form 10-K, Quarterly Reports on Form 10-Q, current reports on Form 8-K, and any amendments to those reports, as well as proxy and information statements that we file with the Securities and Exchange Commission (the SEC), are available free of charge on the Company's website at www.univstainless.com as soon as reasonably practicable after such reports are filed with the SEC. The contents of our website are not part of this Form 10-K. You also may read and copy any materials we file with the SEC at the SEC's Public Reference Room at 100 F Street, NE, Washington, DC 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site at www.sec.gov that contains reports, proxy and information statements and other information regarding issuers, like the Company, that file electronically with the SEC.

ITEM 1A. RISK FACTORS

The Company's business and results of operations are subject to a wide range of substantial business and economic factors including, but not limited to, the factors discussed below, many of which are not within the Company's control. Other factors of which the Company is unaware or which the Company does not consider to be material at this time also may impact the Company's business and results of operations. See the information

Table of Contents

under the heading Forward-Looking Information Safe Harbor in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, of this Annual Report on Form 10-K.

SIGNIFICANT CUSTOMERS AND CONCENTRATED CUSTOMER BASE

Net sales to the Company's largest 2010 customer accounted for 14% of 2010 sales. The accounts receivable balance from this largest customer comprised approximately 17% of total accounts receivable at December 31, 2010. An adverse change in, or termination of, the Company's relationship with one or more of its major customers or one or more of its market segments could have a material adverse effect upon the Company. See the information under the heading Customers in Item 1, Business, of this Annual Report on Form 10-K.

COMPETITION

The Company competes with domestic and foreign sources of specialty steel products. In addition, many of the finished products sold by the Company's customers are in direct competition with finished products manufactured by foreign sources, which may affect the demand for those customers' products. Any competitive factors that adversely affect the market for finished products manufactured by the Company or its customers could indirectly adversely affect the demand for the Company's semi-finished products. Additionally, the Company's products compete with products fashioned from alternative materials such as aluminum, composites and plastics, the production of which includes domestic and foreign enterprises. Competition in the Company's field is intense and is expected to continue to be so in the foreseeable future. There can be no assurance that the Company will be able to compete successfully in the future. See the information under the heading Competition in Item 1, Business, of this Annual Report on Form 10-K.

AEROSPACE MARKET

Approximately 35% of the Company's sales and 27% of tons shipped represent products sold to customers in the aerospace market in 2010. The aerospace market is historically cyclical due to both external and internal market factors. These factors include general economic conditions, diminished credit availability, airline profitability, demand for air travel, age of fleets, varying fuel and labor costs, price competition, and international and domestic political conditions such as military conflict and the threat of terrorism. The length and degree of cyclical fluctuation can be influenced by any one or a combination of these factors and therefore are difficult to predict with certainty. A downturn in the aerospace industry would adversely affect the demand for products and/or the prices at which the Company is able to sell its products, and its results of operations, business and financial condition could be materially adversely affected.

SUPPLY OF RAW MATERIALS AND COST OF RAW MATERIALS

The Company purchases scrap metal and alloy additives, principally nickel, chrome and molybdenum, for its melting operation. A substantial portion of the alloy additives is available only from foreign sources, some of which are located in countries that may be subject to unstable political and economic conditions. Those conditions might disrupt supplies or affect the prices of the raw materials used by the Company. The Company maintains sales price surcharges to help offset the impact of raw material price fluctuations.

The Company does not maintain long-term supply agreements with any of its raw material suppliers. If its supply of raw materials were interrupted, the Company might not be able to obtain sufficient quantities of raw materials, or obtain sufficient quantities of such materials at satisfactory prices, which, in either case, could adversely affect the Company's results of operations. In addition, significant volatility in the price of the Company's principal raw materials could adversely affect the Company's financial results and there can be no assurance that the raw material surcharge mechanism employed by the Company will completely offset immediate changes in the Company's raw material costs. See the information under the headings Raw Materials in Item 1, Business, and Liquidity and Capital Resources and Future Outlook in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations, of this Annual Report on Form 10-K.

Table of Contents

GLOBAL ECONOMIC AND MARKET FACTORS

Our results of operations are affected directly by the level of business activity of our customers, which in turn is affected by global economic and market factors impacting the industries and markets that they serve. We are susceptible to macroeconomic downturns in the United States and abroad that may affect the general economic climate, our performance and the demand of our customers. The continuing turmoil in the global financial system has had and may continue to have, an impact on our business and our financial condition. In addition to the impact that the global financial crisis has already had, we may face significant challenges if conditions in the financial markets deteriorate. There can be no assurance that global economic and market conditions will not adversely impact our results of operations, cash flow or financial position in the future.

RELIANCE ON ENERGY AGREEMENTS

The manufacturing of specialty steels is an energy-intensive industry. While the Company believes that its energy agreements allow it to compete effectively within the specialty steel industry, the Company is subjected to curtailments as a result of decreased supplies and increased demand for electricity and natural gas. These interruptions not only can adversely affect the operating performance of the Company, but also can lead to increased costs for energy. See the information under the heading "Energy Agreements" in Item 1, Business, of this Annual Report on Form 10-K.

KEY PERSONNEL

The Company depends on the continued service, availability and ability to attract skilled personnel, including members of our executive management team, management, metallurgists, maintenance and production positions. The inability of the Company and industry to attract and retain such people may adversely impact our ability to fill existing roles and support growth. Further, the loss of key personnel could adversely affect our ability to perform until suitable replacements are found.

LABOR MATTERS

The Company has 427 employees out of a total of 518 who are covered under collective bargaining agreements. There can be no assurance that the Company will be successful in timely concluding collective bargaining agreements with the USW to succeed the agreements that expire.

RELIANCE ON CRITICAL MANUFACTURING EQUIPMENT

The Company's manufacturing processes are dependent upon certain critical pieces of specialty steel making equipment, such as the Company's 50-ton electric-arc furnace and AOD (Argon Oxygen Decarburization) vessel, its ESR (Electro Slag Remelt) and VAR furnaces, and its universal rolling mill. In the event a critical piece of equipment should become inoperative as a result of unexpected equipment failure, there can be no assurance that the Company's operations would not be substantially curtailed, which may have a negative effect on the Company's financial results. See Item 2, Properties.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 2. PROPERTIES

The Company owns its Bridgeville facility, which consists of approximately 760,000 square feet of floor space and the Company's executive offices on approximately 74 acres. The Bridgeville facility contains melting, remelting, conditioning, rolling, annealing and various other processing equipment. Substantially all products shipped from the Bridgeville facility are processed through its melt shop and universal rolling mill operations.

Table of Contents

The Company owns its Titusville facility, which consists of seven buildings on approximately 10 acres, including two principal buildings of approximately 265,000 square feet in total area. The Titusville facility contains five VAR furnaces and various rolling and finishing equipment.

The Company owns its Dunkirk facility, which consists of approximately 680,000 square feet of floor space on approximately 81 acres. The Dunkirk facility processes semi-finished billet and bar stock through one or more of its four rolling mills, a high temperature annealing facility and/or a round bar facility. The products are then finished and shipped as finished bar, rod and wire products.

Specialty steel production is a capital-intensive industry. The Company believes that its facilities and equipment are suitable for its present needs. The Company believes, however, that it will continue to require capital from time to time to add new equipment and to repair or replace existing equipment to remain competitive and to enable it to manufacture quality products and provide delivery and other support service assurances to its customers. See *Capital Expenditures and Investments*, page 18.

ITEM 3. LEGAL PROCEEDINGS

From time to time, various lawsuits and claims have been or may be asserted against the Company relating to the conduct of its business, including routine litigation relating to commercial and employment matters. The ultimate cost and outcome of any litigation or claim cannot be predicted with certainty. Management believes, based on information presently available, that the likelihood that the ultimate outcome of any such pending matter will have a material adverse effect on its financial condition, or liquidity or a material impact to our results of operations is remote, although the resolution of one or more of these matters may have a material adverse effect on its results of operations for the period in which the resolution occurs.

ITEM 4. [Removed and Reserved]**PART II****ITEM 5. MARKET FOR THE REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES**

At December 31, 2010, a total of 7,094,314 shares of the Company's Common Stock, par value \$.001 per share, were issued and held by approximately 154 holders of record. There were 282,850 shares of the issued Common Stock of the Company held in treasury at December 31, 2010.

Certain holders of Common Stock and the Company are party to a stockholder agreement. That agreement maintains in effect certain registration rights granted to non-management stockholders and provides to them two demand registration rights exercisable at any time upon written request for the registration of shares of Common Stock having an aggregate net offering price of at least \$5.0 million.

PRICE RANGE OF COMMON STOCK

The Common Stock is listed on the NASDAQ Global Select Market under the symbol USAP. The following table sets forth the range of high and low sale prices per share of Common Stock, for the periods indicated below:

	2010		2009	
	High	Low	High	Low
First quarter	\$ 24.09	\$ 17.07	\$ 16.32	\$ 7.98
Second quarter	\$ 25.37	\$ 15.83	\$ 16.86	\$ 9.48
Third quarter	\$ 25.06	\$ 15.68	\$ 21.23	\$ 14.68
Fourth quarter	\$ 33.50	\$ 23.80	\$ 19.41	\$ 14.48

Table of Contents

EQUITY COMPENSATION PLAN INFORMATION

Securities authorized for issuance under equity compensation plans at December 31, 2010 are as follows:

Plan Category	Number of shares to be issued upon exercise of outstanding options	Weighted-average exercise price of outstanding options	Number of shares remaining available for future issuance under equity compensation plans ^A
Equity compensation plans approved by security holders	605,600	\$ 22.02	481,385
Equity compensation plans not approved by security holders			
Total	605,600	\$ 22.02	481,385

^A Includes 454,318 shares of Common Stock on stock options not issued under the Stock Incentive Plan and 27,067 available under the 1996 Employee Stock Purchase Plan, as amended.

PERFORMANCE GRAPH

The performance graph below compares the cumulative total shareholder return on the Company's stock with the cumulative total return on the equity securities of NASDAQ Composite Index and a peer group selected by the Company. The peer group consists of domestic specialty steel producers: Allegheny Technologies, Inc.; Brush Engineered Materials Inc.; Carpenter Technology Corp.; Haynes International Inc.; and RTI International Metals, Inc. The graph assumes an investment of \$100 on December 31, 2005 reinvestment of dividends, if any, on the date of dividend payment and the peer group is weighted by each company's market capitalization. The performance graph represents past performance and should not be considered to be an indication of future performance.

Comparison of 5-Year Cumulative Total Shareholder Return among Universal Stainless & Alloy Products, Inc., the NASDAQ Composite Index and a Peer Group

Company/Peer/Market	Fiscal Year Ending December 31,					
	2005	2006	2007	2008	2009	2010
Universal Stainless & Alloy Products, Inc.	\$ 100.00	\$ 223.20	\$ 237.13	\$ 96.60	\$ 125.73	\$ 208.53

Table of Contents

PREFERRED STOCK

The Company's Certificate of Incorporation provides that the Company may, by vote of its Board of Directors, issue up to 1,980,000 shares of Preferred Stock. The Preferred Stock may have rights, preferences, privileges and restrictions thereon, including dividend rights, dividend rates, conversion rights, voting rights, terms of redemption, redemption prices, liquidation preferences and the number of shares constituting any series or designation of such series, without further vote or action by the stockholders. The issuance of Preferred Stock may have the effect of delaying, deferring or preventing a change in control of the Company without further action by the stockholders and may adversely affect the voting and other rights of the holders of Common Stock. The issuance of Preferred Stock with voting and conversion rights may adversely affect the voting power of the holders of Common Stock, including the loss of voting control to others. The Company has no outstanding Preferred Stock and has no current plans to issue any of the authorized Preferred Stock.

DIVIDENDS

The Company has never paid a cash dividend on its Common Stock. The Company's Credit Agreement with PNC Bank, National Association (PNC Bank) currently limits the payment of cash dividends payable on its Common Stock to 50% of the Company's excess cash flow per fiscal year. Excess cash flow represents the amount of the Company's earnings before interest, taxes, depreciation and amortization that is greater than the sum of the Company's payments for interest, income taxes, the principal portion of long-term debt and capital lease obligations, and capital expenditures.

ITEM 6. SELECTED FINANCIAL DATA

Table of Contents**ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS
ITEMS AFFECTING COMPARABILITY OF RESULTS**

The Company recorded net income for the year ended December 31, 2010 of \$13.2 million. These results include a favorable third quarter 2010 inventory adjustment of \$976,000 for additional metal recovered as a result of a capital project streamlining the scrap loading area, and a \$647,000 increase in stock option compensation as a result of changes in estimated forfeiture rates and to fully expense vested options.

The Company recorded a net loss of \$3.0 million for the year ended December 31, 2009. These results include a \$742,000 negative tax adjustment primarily for the reconciliation of tax balances at June 30, 2009 to the 2008 tax returns prepared during the second quarter 2009 and the following unusual charges (totaling \$6.0 million pre-tax) recorded during the three-month period ended March 31, 2009, primarily due to the deepening recession and economic uncertainty:

\$1.9 million increase to the bad debt reserve due to the inability of a privately held service center customer to pay amounts owed on 2008 purchases and a related \$0.5 million increase to inventory reserves on made to order specialty material produced for the same customer and held at our plant due to their inability to pay for the 2008 purchases. Once the Company determined that the customer could not pay for either the 2008 purchases or the held material, the held material was reclassified to stock inventory, and because the material was unique to that specific customer and was unlikely to be shipped, inventory reserves were increased by \$0.5 million;

\$1.5 million due to a decline in raw material values and the consumption of high cost material during the quarter;

\$1.0 million write-down of stock inventory;

\$0.9 million attributed to the reduction of operating levels; and

\$0.2 million resulting from a 20% reduction in salaried employees.

RESULTS OF OPERATIONS

Universal Stainless & Alloy Products, Inc., headquartered in Bridgeville, Pa., manufactures and markets a broad line of semi-finished and finished specialty steels, including stainless steel, tool steel and certain other alloyed steels. The Company's products are sold to rerollers, forgers, service centers, OEMs and wire redrawers.

An analysis of the Company's operations is as follows:

For the years ended December 31, (dollars in thousands; percentages are of total net sales)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%
NET SALES						
Stainless steel	\$ 142,302	75.1%	\$ 98,069	78.5%	\$ 172,222	73.2%
Tool steel	26,196	13.8	9,413	7.5	39,046	16.6
High-strength low alloy steel	10,310	5.5	9,235	7.4	11,936	5.1
High-temperature alloy steel	5,853	3.1	5,567	4.5	7,931	3.4
Conversion services	2,719	1.4	1,203	1.0	1,941	0.8

Table of Contents**2010 Results as Compared to 2009**

Net sales for the year ended December 31, 2010 increased \$64.5 million as compared to 2009. The increase is primarily due to a 54% increase in tonnage shipped as well as price increases realized in 2010. The year over year increase in net sales due to increased shipment volume was \$52.7 million. The increase in shipments is attributed to improved economic conditions and market demand which continued to recover throughout 2010 as compared to 2009. During 2009, weaker economic conditions resulted in destocking in the service center industry to bring inventory levels in line with significantly lower end-user demand.

Cost of products sold, as a percentage of net sales, was 82.2% and 94.4% for 2010 and 2009, respectively. The results for 2010 and 2009 include a \$976,000 favorable inventory adjustment in 2010, as described above, and \$3.9 million of the 2009 unusual charges outlined above, representing 0.5% and 3.1% of net sales, respectively. Excluding these adjustments, gross margin was 17.3% of sales in 2010 compared to 8.7% for 2009. The improved proportion of cost of sales to sales in 2010 is also attributable to fixed operating costs being spread over higher production volumes as a result of increased product orders.

Net sales by market segment are as follows:

For the years ended December 31, (dollars in thousands; percentages are of total net sales)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%
Service centers	\$ 88,948	47.0%	\$ 50,355	40.3%	\$ 110,889	47.2%
Forgers	41,793	22.0	39,821	31.9	52,551	22.4
Rerollers	36,515	19.3	12,174	9.7	41,660	17.7
Original equipment manufacturers	13,800	7.3	16,089	12.9	18,955	8.1
Wire redrawers	4,132	2.2	3,845	3.1	7,129	3.0
Conversion services	2,719	1.4	1,203	1.0	1,941	0.8
Scrap sales and other	1,516	0.8	1,420	1.1	1,981	0.8
Net sales	\$ 189,423	100.0%	\$ 124,907	100.0%	\$ 235,106	100.0%
Tons shipped	43,373		28,182		45,679	

Selling and administrative expenses increased in 2010 to \$13.3 million, or 7.0% of sales, from \$11.7 million, or 9.3% of sales in 2009. The increased cost in 2010 is primarily due to a \$2.1 million increase in accrued variable compensation, the \$647,000 increase in stock option compensation, as described above, and by a \$408,000 increase in salary and benefit expenses in 2010, which were partially offset by \$2.1 million of the 2009 unusual charges outlined above.

The effective income tax rate in 2010 was 34.0% as compared to a benefit of (27.0)% for 2009. The effective income tax rate in the current year reflects taxable income and benefits from the domestic manufacturing deduction, whereas the prior year reflected a net operating loss, benefits related to a federal loss carryback and state loss carryforwards. The Company has \$2.0 million of state tax carryforwards at December 31, 2010 and \$2.2 million at December 31, 2009 that represent New York Empire Zone tax credits with no expiration date and various state net operating loss carryforwards expiring in 2029. The Company believes it will generate sufficient income in addition to taxable income generated from the reversal of its temporary differences to utilize these tax credits and losses.

In 2009, the Company recorded a \$742,000 negative tax adjustment primarily for the reconciliation of tax balances to 2008 federal and state income tax returns. The Company determined that \$370,000 of this adjustment related to prior periods and was not considered material to any prior period or to 2009 that would require the restatement of prior period financial statements. The remaining \$172,000 of adjustments consisted of \$48,000 relating to 2009 tax provision-to-tax return adjustments to properly report state tax credits, and the remaining \$124,000 related to other timing differences, primarily state bonus depreciation adjustments.

Table of Contents**2009 Results as Compared to 2008**

The decrease in net sales in 2009 is primarily due to a 38% decline in tonnage shipped, partially offset by base price increases realized in 2009. The lower demand for the Company's products was primarily a result of an oversupply of product within the service center industry resulting from deteriorating economic and credit conditions which started to impact order entry levels during the fourth quarter of 2008.

Cost of products sold, as a percentage of net sales, increased in 2009 as compared to 2008. Cost of products sold for 2009 include \$3.9 million of the unusual charges outlined above, representing 3.1% of net sales. The remaining increase is primarily due to higher operation costs resulting from lower production volumes.

Selling and administrative expenses increased in 2009 to \$11.7 million, or 9.3% of net sales from \$11.1 million, or 4.7% of net sales in 2008. The increased cost in 2009 relates to \$2.1 million of the unusual charges outlined above. These costs were partially offset by an \$867,000 decrease in labor costs, primarily resulting from a 20% workforce reduction implemented in March 2009 and a reduction in the accrual for incentive compensation. In addition, other discretionary expenditures were curtailed as a result of lower production volumes.

In 2009, as previously discussed, the Company recorded a \$742,000 negative tax adjustment primarily for the reconciliation of tax balances to 2008 federal and state income tax returns. The effective income tax benefit in 2009 was (27%) compared with an effective income tax rate of 29.9% in 2008. The effective income tax rate in 2009 reflected a net operating loss and benefits related to a federal loss carryback and state loss carryforwards, whereas the prior year had taxable income and benefited from the domestic manufacturing deduction and investment tax credits generated from capital improvements made at the Dunkirk facility in 2008.

Business Segment Results

The Company is comprised of three operating locations and one corporate headquarters. For segment reporting, the Bridgeville and Titusville facilities have been aggregated into one reportable segment, Universal Stainless & Alloy Products. The Universal Stainless & Alloy Products manufacturing process involves melting, remelting, treating and hot and cold rolling of semi-finished and finished specialty steels. Dunkirk Specialty Steel's manufacturing process involves hot rolling and finishing specialty steel bar, rod and wire products.

UNIVERSAL STAINLESS & ALLOY PRODUCTS SEGMENT

An analysis of the segment's operations is as follows:

For the years ended December 31, (dollars in thousands; percentages are of total net sales)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%

Table of Contents

Net sales for the year ended December 31, 2010 increased by \$65.0 million, or 60.0%, in comparison to the year ended December 31, 2009 primarily due to a 57.5% increase in tonnage shipped, and base price increases realized in 2010. The increase in shipments is attributed to improved economic conditions and market demand which continued to recover throughout 2010 as compared to 2009. During 2009, weaker economic conditions resulted in destocking in the service center industry to bring inventory levels in line with significantly lower end-user demand. A 144% increase in roller shipments was accompanied by a 111% increase in service center plate shipments, a 23.1% increase in service center long products shipments, and a 10.5% increase in forger shipments. Shipments of service center plate products, petrochemical products, aerospace products and power generation products increased 111%, 70%, 47% and 41%, respectively, over 2009.

Net sales for the year ended December 31, 2009 decreased by \$98.3 million, or 47.6%, in comparison to the year ended December 31, 2008 primarily due to a 37% decline in tonnage shipped, partially offset by base price increases realized in 2009. Shipments of service center plate products, petrochemical products, aerospace products and power generation products decreased 64%, 43%, 29% and 14%, respectively, over 2008.

Operating income for year ended December 31, 2010 increased by \$19.7 million compared to the year ended December 31, 2009. The 2010 results include a \$976,000 favorable inventory adjustment, as described above, and \$5.0 million of the 2009 unusual charges outlined above, representing 0.6% and 4.6% of net sales, respectively. Excluding the impact of the unusual charges, material costs, as a percentage of sales, increased to 49.9% from 43.7% for the years ended December 31, 2010 and 2009, respectively, as a result of higher material costs in the year 2010, and operation costs, as a percentage of sales, decreased to 35.4% from 48.0% for the same years, respectively. The improved proportion of cost of sales to sales in 2010 is also attributable to fixed operating costs being spread over higher production volumes as a result of increased product orders.

Operating income for the year ended December 31, 2009 decreased by \$18.1 million from 2008 primarily due to the impact of the unusual charges and lower production volumes. The 2009 results include \$5.0 million of the unusual charges outlined above, representing 4.6% of net sales. Excluding the impact of the unusual charges, material costs, as a percentage of sales, dropped from 55.6% to 43.7% reflecting a better alignment of material costs and related sales prices and yield improvements recognized on 2009 shipments of semi-finished products.

DUNKIRK SPECIALTY STEEL SEGMENT

An analysis of the segment's operations is as follows:

For the years ended December 31, (dollars in thousands; percentages are of total net sales)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%

Table of Contents

Net sales for the year ended December 31, 2010 increased by \$19.4 million, or 52.0%, in comparison to the year ended December 31, 2009 primarily due to a 35% increase in tonnage shipped and base price increases realized in 2010. The increase in shipments is attributed to improved economic conditions and market demand which continued to recover throughout 2010 as compared to 2009. During 2009, weaker economic conditions resulted in destocking in the service center industry to bring inventory levels in line with significantly lower end-user demand. Sales to service centers in 2010 comprised 82.0% of external sales and 76.6% of external shipments. Service center sales increased by \$17.5 million over the similar 2009 period. Shipments of aerospace products, general industrial products and petrochemical products increased 50%, 41% and 22%, respectively, over 2009.

Net sales for the year ended December 31, 2009 decreased by \$31.0 million, or 44.5%, in comparison to the year ended December 31, 2008 primarily due to a 26% decline in tonnage shipped, partially offset by base price increases realized in 2009. Shipments of general industrial products, petrochemical products and aerospace products decreased 34%, 31% and 19%, respectively, over 2008.

Operating income increased by \$6.6 million for the year ended December 31, 2010 as compared to the 2009 year. The results for the year ended December 31, 2009 include \$1.0 million of the unusual charges outlined above, representing 2.9% of net sales. Excluding the impact of the unusual charges, material costs, as a percentage of sales, decreased to 58.3% from 60.4% of sales for the years ended December 31, 2010 and 2009, respectively, and operation costs, as a percentage of sales, decreased to 26.5% from 34.7% for the same years, respectively. This improvement is partially attributable to fixed operating costs being spread over higher production volumes.

Operating income for the year ended December 31, 2009 decreased by \$5.7 million compared to the similar period in 2008 primarily due to the impact of the unusual charges and lower production volumes. The 2009 results include \$1.0 million of the unusual charges outlined above, representing 2.5% of net sales.

Liquidity and Capital Resources

The Company has financed its operating activities through cash on hand at the beginning of the period and cash provided by operations. Working capital increased \$12.5 million to \$110.1 million at December 31, 2010 compared to \$97.6 million at December 31, 2009. Accounts receivable increased \$12.2 million as a result of increased sales for the three-month period ended December 31, 2010 in comparison to the three-month period ended December 31, 2009. The \$28.4 million increase in inventory at December 31, 2010 compared to December 31, 2009 is due principally to an 88% increase in the volume of work-in-process applied to inventory in response to the rise in the Company's backlog. The backlog increased from \$36 million at December 31, 2009 to \$69 million at December 31, 2010, an increase of 93%. The raw material inventory increased 29% due to significantly higher raw material purchase prices partially offset by an 8% decrease in the volume of raw material on hand. The Company received a \$4.1 million federal income tax refund in 2010. Accounts payable increased \$12.2 million, or 157%, related to the increase in production levels and raw material price increases. Accrued employment costs increased \$4.3 million, comprised of increases of \$3.9 million for incentive compensation and profit sharing accruals and \$383,000 for accrued wages, as compared to December 31, 2009, which resulted from increased profitability and production levels.

Table of Contents

The Company generated cash from operations of \$1.3 million, \$27.9 million, and \$16.1 million in the years ended December 31, 2010, 2009 and 2008, respectively. Cash received from sales of \$177.2 million, \$139.5 million, and \$228.7 million for the years ended December 31, 2010, 2009 and 2008, respectively, represent the primary source of cash from operations. An analysis of the primary uses of cash is as follows:

For the years ended December 31, (dollars in thousands; percentages are of total uses of cash)	2010		2009		2008	
	Amount	%	Amount	%	Amount	%
Raw material purchases	\$ 93,625	53.2%	\$ 40,699	36.4%	\$ 111,212	52.3%
Employment costs	32,768	18.6	27,840	25.0	38,380	18.1
Utilities	14,240	8.1	14,891	13.3	19,915	9.4
Capital expenditures	7,481	4.3	12,394	11.1	12,905	6.0
Other	27,762	15.8	15,746	14.2	30,166	14.2
Total uses of cash	\$ 175,876	100.0%	\$ 111,570	100.0%	\$ 212,578	100.0%

Cash used for raw material purchases increased in 2010 in comparison to 2009 primarily due to increased production and higher purchase prices. The Company continuously monitors market price fluctuations of its key raw materials.

The following table reflects the average market values per pound for key raw materials for selected months during the last three-year period.

	December 2010	June 2010	December 2009	June 2009	December 2008	June 2008
Nickel	\$ 10.94	\$ 8.79	\$ 7.74	\$ 6.79	\$ 4.39	\$ 10.23
Chrome	\$ 1.31	\$ 1.33	\$ 0.89	\$ 0.78	\$ 0.96	\$ 2.19
Molybdenum	\$ 16.17	\$ 14.73	\$ 11.47	\$ 10.34	\$ 9.85	\$ 33.22
Carbon scrap	\$ 0.19	\$ 0.20	\$ 0.15	\$ 0.10	\$ 0.11	\$ 0.34

The market values for these raw materials and others continue to fluctuate based on supply and demand, market disruptions and other factors. The Company maintains sales price surcharge mechanisms, priced at time of shipment, to mitigate the risk of substantial raw material cost fluctuations. There can be no assurance that these sales price adjustments will completely offset the Company's raw material.

The average price of nickel was \$9.89, \$6.65 and \$9.58 per pound for the years 2010, 2009 and 2008, respectively. The average price of chrome was \$1.26, \$0.82 and \$1.84 per pound for the years 2010, 2009 and 2008, respectively. The average price of carbon scrap was \$0.19, \$0.11 and \$0.23 per pound for the years 2010, 2009 and 2008, respectively. The significantly higher prices in 2008 were believed to be due to increased demand from foreign and domestic sources coupled with supply volatility. The global economic and market factors that impacted the fourth quarter of 2008 and the first quarter of 2009 weakened demand for raw materials and depressed prices. Prices for raw materials have continued to increase since the second quarter of 2009.

While the material surcharge mechanism is designed to offset modest fluctuations in raw material prices, it cannot immediately absorb significant spikes in raw material prices. There can be no assurance that the raw material surcharge mechanism will completely offset immediate changes in the Company's raw material costs. A material decline in raw material prices within a short period of time could have a material adverse effect on the financial results of the Company.

Cash payments in 2010 for employment costs were \$4.9 million higher than 2009 primarily due to higher production volumes and higher payouts under the Company's profit-sharing plan and variable compensation. The decrease in employment costs in 2009 compared to 2008 were primarily due to lower production volumes and lower payouts under the Company's profit-sharing plans, which were partially offset by higher wage and benefit rates.

Table of Contents

Utility costs for 2010 were flat compared to 2009 costs as a result of a reduction in natural gas costs that were offset by an increase in electricity costs. The electricity increase in 2010 was a result of higher usage related to higher production levels, partially offset by lower rates. The overall natural gas cost was lower in 2010 largely a result of lower gas prices, partially offset by increased consumption compared to 2009.

Other uses of cash, the majority of which is cash for production supplies, plant maintenance, outside conversion services, insurance and freight, increases or decreases in relation to production volume. Maintenance expenses in 2009 decreased by \$3.6 million in comparison to 2008, followed by a \$2.4 million increase in 2010 in response to increased production levels. In addition, payments for federal and state income taxes, net of refunds received decreased \$7.7 million in 2009 as a result of tax payments of \$6.3 million in 2008 compared to a net refund of \$1.4 million in 2009. Income tax payments increased by \$3.1 million in 2010 as a result of net taxes paid in 2010 of \$1.8 million compared with the \$1.4 million refund in 2009.

Capital Expenditures and Investments. The Company's capital expenditures were approximately \$7.4 million and \$12.4 million in 2010 and 2009, respectively. The 2010 expenditures included \$2.6 million for the Bridgeville melt shop project and several other smaller projects, while the 2009 expenditures included \$9.6 million for the melt shop project with the balance of the 2009 expenditures primarily used for the addition of annealing and finishing equipment.

In January 2009, the Company announced that it would invest \$13 million in its Bridgeville melt shop. The investment includes major upgrades in equipment, automation and plant layout designed to: cut production cycle times and customer lead times; improve on-time delivery performance; increase material yields; reduce operating costs and enhance working capital management. The spending is substantially complete, and the Company funded the investment with the Term Loan (as defined below).

Capital expenditures are expected to approximate \$10 to \$15 million in 2011, of which \$5.6 million is for remelt expansion.

Capital Resources Including Off-Balance Sheet Arrangements. The Company does not maintain off-balance sheet arrangements, nor does it participate in non-exchange traded contracts requiring fair value accounting treatment, or material related-party transaction arrangements.

PNC Credit Agreement. During 2009, the Company entered into a new unsecured credit agreement with PNC Bank (the PNC Credit Agreement), which provides for a \$12.0 million term loan scheduled to mature on February 28, 2014 (Term Loan) and a \$15.0 million revolving credit facility with a term expiring on June 30, 2012 (the PNC Line). At December 31, 2010, the Company had its entire PNC Line available for borrowings.

The Company also executed an interest rate swap with PNC Bank, with a notional amount of \$12.0 million, to convert the LIBOR floating rate under the Term Loan to a fixed interest rate for the life of the loan. Under the agreement, the Company's interest rate is currently fixed at 4.515%. The notional amount of the interest rate swap decreases ratably over its term, as does the Term Loan, and was \$10.2 million at December 31, 2010. The Company recorded a liability of \$287,000, equal to the fair value of the swap agreement at December 31, 2010. This fair value, net of tax, is reported as accumulated other comprehensive loss within stockholders' equity. Changes in market interest rates will be reflected as changes to the fair value of the corresponding liability or receivable, although the Company's actual interest rate payments will continue to be fixed at 4.515%.

The Company pays a commitment fee on the unused portion of the PNC Line of 0.25%, provided it maintains certain financial ratios. Interest on borrowings under the PNC Line is based on short-term market rates, which may be further adjusted, based upon the Company maintaining certain financial ratios. The Company is required to be in compliance with three financial covenants: a minimum leverage ratio of 2.5:1.0 or less; a minimum debt service ratio of 2.5:1.0 or greater; and a minimum tangible net worth of \$159.6 million as of December 31, 2010. The Company was in compliance with all financial ratios and restrictive covenants it is required to maintain under the credit agreement at December 31, 2010. The Company believes it will maintain compliance with the financial covenants in effect throughout 2011.

Table of Contents

Government Financing Programs. The Company maintains two loan agreements with the Commonwealth of Pennsylvania's Department of Commerce, originally aggregating \$600,000. A \$200,000 15-year loan bears interest at 5% per annum with the term ending in 2011, and a \$400,000 20-year loan bears interest at 6% per annum with the term ending in 2016. In 2002, Dunkirk Specialty Steel issued two ten-year, 5% interest-bearing notes payable to the New York Job Development Authority for the combined amount of \$3.0 million. As of December 31, 2010, the total principal balance of all government-financed debt instruments is \$0.6 million.

Share-based Financing Activity. The Company issued 50,415 and 40,820 shares of its Common Stock for the years ended December 31, 2010 and 2009, respectively, through its two share-based compensation plans. In 2010, 40,550 stock options issued under the Stock Incentive Plan were exercised for \$466,000 plus related tax benefits of \$143,000. In 2009, 32,000 stock options were issued for \$253,000 plus related tax benefits of \$86,000. The remaining shares were issued to participants of the Employee Stock Purchase Plan.

In October 1998, the Company initiated a stock repurchase program to repurchase up to 315,000 shares of its outstanding Common Stock in open market transactions at market prices. The Company has not repurchased any shares under the program since 2001. The Company is authorized to repurchase 45,100 remaining shares of Common Stock under this program as of December 31, 2010.

Short- and Long-Term Liquidity. The Company expects to meet substantially all of its short-term liquidity requirements resulting from operations and current capital investment plans with internally generated funds and borrowings under the PNC Credit Agreement. At December 31, 2010, the Company had \$34.9 million in cash and \$15.0 million available under the PNC Line. In addition, the ratio of current assets to current liabilities at December 31, 2010 was 4.7:1 compared with 8.8:1 at December 31, 2009, and the debt to total capitalization ratio was 6.3% compared with 8.3%, due to making \$2.2 million in principal repayments and the increase in Stockholders' Equity. The Company's long-term liquidity depends upon its ability to obtain additional orders from its existing customers, attract new customers and control costs. Additional sources of financing may be required to fund growth initiatives identified by the Company.

Contractual Obligations. At December 31, 2010, the Company had the following contractual principal and interest obligations:

<i>(dollars in thousands)</i>	Total	Less than 1 Year	Payments Due by Period		More than 5 Years
			1-3 Years	3-5 Years	
Long-term debt	\$ 11,897	\$ 3,281	\$ 7,601	\$ 1,010	\$ 5
Operating lease obligations	68	31	37		
Purchase obligations	12,197	12,197			
Total contractual obligations	\$ 24,162	\$ 15,509	\$ 7,638	\$ 1,010	\$ 5

Long-term debt does not include any outstanding balance on the PNC Line, currently due to expire on June 30, 2012, since there was no outstanding balance on December 31, 2010. Purchase obligations include the value of all open purchase orders with established quantities and purchase prices as well as minimum purchase commitments.

Import Protections. The CDSOA provides for payment of import duties collected by the U.S. Treasury Department to domestic companies injured by unfair foreign trade practices. The assets purchased by Dunkirk Specialty Steel were previously owned and operated by AL Tech Specialty Steel, Inc. and Empire Specialty Steel, Inc. During their ownership, both organizations participated in several anti-dumping lawsuits with other domestic specialty steel producers. In accordance with the CDSOA, which expired September 30, 2007, the Company filed claims to receive their appropriate share of the import duties collected and received a net payment of \$32,000 in 2010. Future benefits are dependent on the amount of undistributed import duties collected as of September 30, 2007 and the relationship of Dunkirk Specialty Steel's claim in relation to claims filed by other domestic specialty steel producers. The Company expects minimal distributions in the future.

Table of Contents

EFFECTS OF INFLATION

Despite modest inflation in recent years, rising costs, in particular increasing wage and benefit rates, continue to affect operations. The Company strives to mitigate the effects of inflation through cost containment, productivity improvements and sales price increases.

CONTINGENT ITEMS

Product Claims. The Company is subject to various claims and legal actions that arise in the normal course of conducting business. There were no material product claims outstanding at December 31, 2010.

Environmental Matters. The Company, as well as other steel companies, is subject to demanding environmental standards imposed by federal, state and local environmental laws and regulations. The Company is not aware of any environmental condition that currently exists at any of its facilities that are probable or reasonably possible of having a material impact on the Company's results of operations or liquidity.

The Company is aware of energy usage concerns relating to climate change; however, the Company is not aware of any pending regulations that are expected to have a material impact on the Company's results of operations or liquidity.

Legal Matters. From time to time, various lawsuits and claims have been or may be asserted against the Company relating to the conduct of our business, including routine litigation relating to commercial and employment matters. The ultimate cost and outcome of any litigation or claim cannot be predicted with certainty. Management believes, based on information presently available, that the likelihood that the ultimate outcome of any such pending matter will have a material adverse effect on its financial condition, or liquidity or a material impact to our results of operations is remote, although the resolution of one or more of these matters may have a material adverse effect on its results of operations for the period in which the resolution occurs.

CRITICAL ACCOUNTING POLICIES AND NEW ACCOUNTING PRONOUNCEMENTS

Critical Accounting Policies. Revenue recognition is the most critical accounting policy of the Company. Revenue from the sale of products is recognized when both risk of loss and title have transferred to the customer, which in most cases coincides with shipment of the related products, and collection is reasonably assured. The Company manufactures specialty steel product to customer purchase order specifications and in recognition of requirements for product acceptance. Material certification forms are executed, indicating compliance with the customer purchase orders, before the specialty steel products are packed and shipped to the customer.

Revenue from conversion services is recognized when the performance of the service is complete. Invoiced shipping and handling costs are also accounted for as revenue. Customer claims, which are not material, are accounted for primarily as a reduction to gross sales after the matter has been researched and an acceptable resolution has been reached.

In addition, management constantly monitors the ability to collect its unpaid sales invoices and the valuation of its receivables. The allowance for doubtful accounts includes specific reserves for the value of outstanding invoices issued to customers currently operating under the protection of the federal bankruptcy law and other amounts that are deemed potentially not collectible with a reserve equal to 15% of 90-day or older balances. However, the total allowance will not be less than 1% of total accounts receivable.

The cost of inventory is principally determined by the average cost method for material costs and operation costs. An inventory reserve is provided for material on hand for which management believes cost exceeds net realizable value and for material on hand for more than one year not assigned to a specific customer order.

Table of Contents

Long-lived assets, including property, plant and equipment, are evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable in relation to the operating performance and future undiscounted cash flows of the underlying assets. Adjustments are made if the sum of expected future cash flows is less than book value. At December 31, 2009 and 2008, the Company's stock price was below book value per share. In management's judgment, a significant portion of the decline in the Company's stock price was related to the unprecedented liquidity crisis and the overall economic recession, which began in 2008, and was not reflective of the underlying cash flows of the Company. Based on management's assessment of the carrying values of long-lived assets, no impairment reserve had been deemed necessary as of December 31, 2010, 2009 and 2008. Retirements and disposals are removed from cost and accumulated depreciation accounts, with the gain or loss reflected in operating income.

In addition, management assesses the need to record a valuation allowance to reduce deferred tax assets to the amount that is more likely than not to be realized. The Company believes it will generate sufficient income in addition to taxable income generated from the reversal of its temporary differences to utilize the deferred tax assets recorded at December 31, 2010.

Derivative Financial Instruments. The Company's current risk management strategies include the use of derivative instruments to minimize the risk of significant changes to interest rates used in long-term agreements. In 2009, the Company entered into an interest rate swap that effectively converts the floating-rate Term Loan into a fixed-rate debt instrument. Also, in 2009, the Company entered into nickel futures contracts, the last of which matured March 31, 2010, to minimize the price change impact of anticipated purchases of nickel over the life of a customer short-term supply agreement. The interest rate swap and nickel futures contracts qualify as cash flow hedges and have been marked-to-market at each reporting period date with unrealized gains and losses included in other comprehensive income (loss) (OCI) to the extent effective, and reclassified to interest expense or cost of sales in the period during which the hedged transaction affects earnings.

New Accounting Pronouncements. See information under the heading Note 1: Significant Accounting Policies within Notes to Consolidated Financial Statements in Item 8, Financial Statements and Supplementary Data, in this Annual Report on Form 10-K for details of recently issued accounting pronouncements and their expected impact on the Company's financial statements.

FUTURE OUTLOOK

The Company entered 2011 with a total backlog of approximately \$69 million, which is 93% higher than the \$36 million backlog at the beginning of 2010. The current backlog mainly consists of semi-finished products for rerollers and forgers and tool steel plate and finished bar for service centers. The increase is primarily due to stronger end-market demand within each of the Company's end markets. End-market demand is expected to gradually increase from current levels during 2011. The Company expects orders for its products will improve in 2011 as demand increases. Our ability to make scheduled payments of principal, or to pay the interest on or to refinance our indebtedness, or to fund planned capital expenditures will depend on our future performance, which, to a certain extent, is subject to general economic, financial, competitive, legislative, regulatory and other factors that are beyond our control. Based upon the current level of operations and our current expectations for future periods in light of the current economic environment, we believe that cash flow from operations and available cash, together with available borrowings under the line of credit agreement, will be adequate to meet the future liquidity needs during the one year following December 31, 2010.

FORWARD-LOOKING INFORMATION SAFE HARBOR

The Management's Discussion and Analysis and other sections of this Annual Report on Form 10-K contain forward-looking statements that reflect the Company's current views with respect to future events and financial performance. Statements looking forward in time, including statements regarding future growth, cost savings, expanded production capacity, broader product lines, greater capacity to meet customer quality reliability, price

Table of Contents

and delivery needs, enhanced competitive posture, effect of new accounting pronouncements and no material financial impact from litigation or contingencies are included in this Annual Report on Form 10-K pursuant to the safe harbor provision of the Private Securities Litigation Reform Act of 1995.

The Company's actual results will be affected by a wide range of factors, including those items described in Item 1A, Risk Factors. Many of these factors are not within the Company's control and involve known and unknown risks and uncertainties that may cause the Company's actual results in future periods to be materially different from any future performance suggested herein. Any unfavorable change in the foregoing or other factors could have a material adverse effect on the Company's business, financial condition and results of operations. Further, the Company operates in an industry sector where securities values may be volatile and may be influenced by economic and other factors beyond the Company's control.

Table of Contents

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company's customers and suppliers absorb fluctuations in foreign currency exchange rates. Prices for the Company's raw materials and natural gas requirements are subject to frequent market fluctuations, and profit margins may decline in the event market prices increase. Selling price increases and surcharges are implemented to offset raw material and natural gas market price increases.

The cost of raw materials represented 57% of the Company's total cost of products sold in 2010 due to increases in prices for raw materials purchased compared with approximately 52% of the total cost of products sold in 2009 due to lower raw material prices, compared with 63% in 2008. Raw material prices vary based on numerous factors, including quality, and are subject to frequent market fluctuations. Future raw material prices cannot be predicted with any degree of certainty. The Company does not maintain any long-term agreements with any of its raw material suppliers.

The Company has implemented a sales price surcharge mechanism on its products to help offset the impact of raw material price fluctuations. For substantially all stainless semi-finished products, the surcharge is calculated at the time of order entry, based on current raw material prices. For substantially all finished products, the surcharge is calculated based on the monthly average raw material prices two months prior to the promised ship date. While the material surcharge mechanism is designed to offset modest fluctuations in raw material prices, it cannot immediately absorb significant spikes in raw material prices. A material change in raw material prices within a short period of time could have a material effect on the financial results of the Company and there can be no assurance that the raw material surcharge mechanism will completely offset immediate changes in the Company's raw material costs.

The Company may use derivative financial instruments to reduce certain types of financial risk. Fixed-price sales arrangements involve a risk of profit margin fluctuations particularly as raw material prices have been volatile. In order to reduce the risk of fluctuating profit margins on firm price sales, the Company, in 2009, entered into commodity futures contracts, the last of which matured March 31, 2010, to purchase certain critical raw materials necessary to produce the products sold under a fixed-price sales arrangement. To manage interest rate risk, the Company has entered into an interest rate swap that effectively converts the floating-rate Term Loan into a fixed-rate debt instrument. The interest rate swap agreement minimizes the impact of interest rate changes on the Company's floating-rate debt and is designated and accounted for as a cash flow hedge. The Company utilizes the interest rate swap to maintain a fixed-rate of 4.515% on the Term Loan until its maturity on February 28, 2014. The notional amount of the interest rate swap decreases ratably over its term, as does the Term Loan, and was \$10.2 million at December 31, 2010.

All hedging strategies are reviewed and approved by senior financial management before being implemented. Management has established policies regarding the use of derivative instruments that prohibit the use of speculative or leveraged derivatives. Market valuations are performed at least quarterly to monitor the effectiveness of our risk management programs.

The Company currently is not exposed to market risk from changes in interest rates related to its government long-term debt. At December 31, 2010, all of the Company's \$623,000 of government long-term debt had fixed interest rates.

**ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA
MANAGEMENT'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING**

Management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) under the Securities Exchange Act of 1934). Our internal control over financial reporting is designed to provide reasonable assurance to management and the board of directors regarding the preparation and fair presentation of published financial statements. Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Based on our assessment, we believe that, as of December 31, 2010, our internal control over financial reporting is effective.

The effectiveness of internal control over financial reporting as of December 31, 2010 has been audited by Schneider Downs & Co. Inc., an independent registered public accounting firm which also audited our consolidated financial statements. Schneider Downs' attestation report on the consolidated financial statements and management's maintenance of effective internal control over financial reporting is included under the heading Report of Independent Registered Public Accounting Firm.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Stockholders of Universal Stainless & Alloy Products, Inc.

We have audited the accompanying consolidated balance sheets of Universal Stainless & Alloy Products, Inc. and subsidiaries (the Company) as of December 31, 2010 and 2009, and the related consolidated statements of operations, comprehensive income (loss) and cash flows for each of the years in the three-year period ended December 31, 2010. In addition, our audit included the financial statement schedule listed in the index at Item 15 (2). We also have audited the Company's internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company's management is responsible for these consolidated financial statements and financial statement schedule, for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements, the consolidated financial statement schedule, and an opinion on the Company's internal control over financial reporting based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audits of the financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

Table of Contents

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements, referred to above present fairly, in all material respects, the financial position of the Company as of December 31, 2010 and 2009, and the results of its operations, comprehensive income (loss) and its cash flows for each of the years in the three-year period ended December 31, 2010, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, the related financial statement schedule, when considered in relation to the consolidated financial statements as a whole, presents fairly, in all material respects, the information set forth therein. Also, in our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2010, based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

Table of Contents

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Note 1: Significant Accounting Policies

Basis of Consolidation. The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. The Company has no interests in any unconsolidated entity.

Use of Estimates. The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements. The estimates and assumptions used in these consolidated financial statements are based on known information available as of the balance sheet date. Actual results could differ from those estimates.

Concentration of Credit Risk. Financial instruments that potentially subject the Company to concentrations of credit risk are cash and cash equivalents and accounts receivable. The Company limits its credit risk associated with cash and cash equivalents by placing its investments in high-grade short-term instruments or in bank transaction accounts with full FDIC insurance protection, regardless of amount. With respect to accounts receivable, the Company limits its credit risk by performing ongoing credit evaluations and, when deemed necessary, requiring letters of credit, guarantees or cash collateral. The allowance for doubtful accounts includes specific reserves for the value of outstanding invoices issued to customers currently operating under the protection of the federal bankruptcy law and other amounts that are deemed potentially not collectible with a reserve equal to 15% of 90-day or older balances. However, the total allowance will not be less than 1% of total accounts receivable. Receivables are charged-off to the allowance when they are deemed to be uncollectible. Bad debt expense for fiscal years 2010, 2009 and 2008 was \$4,000, \$1.8 million and \$13,000, respectively.

Inventories. Inventories are stated at the lower of cost or market with cost principally determined by the weighted average cost method. Such costs include the acquisition cost for raw materials and supplies, direct labor and applied manufacturing overhead within the guidelines of normal plant capacity. The Company changed its method of stating the raw material inventory from the first-in-first-out method to the weighted average cost method. The Company believes the change is preferable as the average cost method better reflects the current value of the co-mingled raw material inventory and provides a consistent better reflection of periodic income. The change did not have a material impact due to the rapid turn-over rate of the raw material inventory. Provisions are made for slow-moving inventory based upon management's expected method of disposition. The net change in inventory reserves for fiscal years 2010, 2009 and 2008 was a \$166,000 decrease, a \$2.0 million decrease, and a \$1.0 million increase, respectively.

Included in inventory are operating materials consisting of production molds and rolls that will normally be consumed within one year.

Property, Plant and Equipment. Property, plant and equipment is recorded at cost. Costs incurred in connection with the construction or major rebuild of facilities, including interest directly related to the project, are capitalized as construction in progress. No depreciation is recognized on these assets until placed in service. Retirements and disposals are removed from cost and accumulated depreciation accounts, with the gain or loss reflected in operating income. Material major equipment maintenance costs are capitalized as incurred and amortized into expense over the subsequent six-month period, while other maintenance costs are expensed as incurred. Costs of improvements and renewals are capitalized. Maintenance expense for the fiscal year 2010, 2009 and 2008 was \$11.9 million, \$9.4 million and \$13.1 million, respectively.

Depreciation and amortization are computed using the straight-line method based on the estimated useful lives of the related assets. The estimated useful lives of buildings and land improvements are between 10 and 39 years, and the estimated useful lives of machinery and equipment are between 5 and 20 years. Direct costs incurred in the development and implementation of internal-use software are capitalized and recorded within property, plant

Table of Contents

and equipment, and amortized on a straight-line basis over its anticipated useful life, which is generally three to five years. Depreciation and amortization expense for fiscal year 2010, 2009 and 2008 was \$5.5 million, \$4.8 million and \$4.1 million, respectively.

Long-Lived Asset Impairment. Long-lived assets, including property, plant and equipment, are evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable in relation to the operating performance and future undiscounted cash flows of the underlying assets. Adjustments are made if the sum of expected future cash flows is less than book value. Based on management's assessment of the carrying values of long-lived assets, no impairment reserve has been deemed necessary as of December 31, 2010, 2009 and 2008.

Revenue Recognition. Revenue from the sale of products is recognized when both risk of loss and title have transferred to the customer, which in most cases coincides with shipment of the related products, and collection is reasonably assured. Revenue from conversion services is recognized when the performance of the service is complete. Invoiced shipping and handling costs are also accounted for as revenue. Customer claims, which are not material, are accounted for primarily as a reduction to gross sales after the matter has been researched and an acceptable resolution has been reached.

Income Taxes. Deferred income taxes are provided for unused tax credits earned and the tax effect of temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. The Company uses the liability method to account for income taxes, which requires deferred taxes to be recorded at the statutory rate expected to be in effect when the taxes are paid. Valuation allowances are provided for a deferred tax asset when it is more likely than not that such asset will not be realized. Income tax penalties and interest are included in the provision for income tax expense.

In addition, the Company evaluates the tax positions taken or expected to be taken in its tax returns. A tax position should only be recognized in the financial statements if the Company determines that it is more-likely-than-not that the tax position will be sustained upon examination by the tax authorities, based upon the technical merits of the position. For those tax positions that should be recognized, the measurement of a tax position is determined as being the largest amount of benefit that is greater than fifty percent likely of being realized upon ultimate settlement. The Company believes there are no known uncertain tax positions at December 31, 2010, 2009 and 2008.

Share-based Compensation Plans. The Company recognizes compensation expense based on the grant-date fair value of the awards. The fair value of the option grants is estimated on the date of grant using the Black-Scholes option-pricing model, and is recognized ratably over the service/vesting period of the award. The tax effects of exercising stock options are added to additional paid-in capital at the exercise date.

Earnings Per Common Share. Basic earnings per common share is computed by dividing net income (loss) by the weighted-average number of common shares outstanding during the period. Diluted earnings per common share is computed by dividing net income by the weighted-average number of common shares outstanding plus all dilutive potential common shares outstanding during the period. Dilutive common shares are determined using the treasury stock method. Under the treasury stock method, exercise of options is assumed at the beginning of the period when the average stock price during the period exceeds the exercise price of outstanding options, and common shares are assumed issued. The assumed proceeds from the exercise of stock options are used to purchase common stock at the average market price during the period. The incremental shares to be issued are considered to be the dilutive potential common shares outstanding.

Derivatives. In March 2008, the Financial Accounting Standards Board (FASB) issued Disclosures about Derivative Instruments and Hedging Activities , which changes the disclosure requirements for derivative instruments and hedging activities. Enhanced disclosures are required to provide information about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted

Table of Contents

for and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows. Adoption of the standard, effective January 1, 2009, did not have a material impact on the Company's financial statements.

In June 2009, the FASB issued The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles. The standard establishes the FASB Accounting Standards Codification as the source of authoritative accounting principles recognized by the FASB to be applied in the preparation of financial statements in conformity with GAAP in the United States. The Company adopted the standard effective June 30, 2009.

Reclassifications. Certain prior year amounts have been reclassified to conform to the 2010 presentation.

Note 2: Inventory

The major classes of inventory are as follows:

December 31, (dollars in thousands)	2010	2009
Raw materials and supplies	\$ 7,141	\$ 5,585
Semi-finished and finished steel products	58,899	32,969
Inventory reserves	(986)	(1,152)
Operating materials	4,656	3,920
Total inventory	\$ 69,710	\$ 41,322

Note 3: Property, Plant and Equipment

Property, plant and equipment consists of the following:

December 31, (dollars in thousands)	2010	2009
Land and land improvements	\$ 2,772	\$ 2,603
Buildings	16,313	14,479
Machinery and equipment	90,909	86,276
Construction in progress	4,606	4,284
	114,600	107,642
Accumulated depreciation	(43,019)	(37,557)
Property, plant and equipment, net	\$ 71,581	\$ 70,085

Note 4: Long-Term Debt and Other Financing

Long-term debt consists of the following:

December 31, (dollars in thousands)	2010	2009
Term Loan	\$ 10,200	\$ 12,000
Government debt	623	1,046

Less amounts due within one year	(2,833)	(2,223)
Total long-term debt	\$ 7,990	\$ 10,823

Table of Contents

In February 2009, the Company executed an unsecured credit agreement with PNC Bank which provides for a \$12.0 million term loan (Term Loan) scheduled to mature on February 28, 2014 and a \$15.0 million revolving credit facility with a term expiring on June 30, 2012. There was no balance outstanding under the revolver at December 31, 2010 or December 31, 2009. The Term Loan was used to fund the capital expenditures for the Bridgeville melt shop upgrade. Accordingly, all of the \$454,000 interest on the loan for 2009 was capitalized and \$132,000 of the 2010 interest was capitalized. Interest on both facilities is based on short-term market rates, which may be adjusted, based upon the Company maintaining certain financial ratios. PNC Bank also charges a commitment fee payable on the unused portion of the revolving credit facility of 0.25%, provided certain financial ratios are maintained. The Company is required to be in compliance with three financial covenants: a minimum leverage ratio, a minimum debt service ratio and a minimum tangible net worth. The Company was in compliance with all such covenants at December 31, 2010.

The Company maintains two separate loan agreements with the Commonwealth of Pennsylvania's Department of Commerce, aggregating to \$600,000. A \$200,000 15-year loan bears interest at 5% per annum with the term ending in 2011, and a \$400,000 20-year loan bears interest at 6% per annum with the term ending in 2016. On February 14, 2002, Dunkirk Specialty Steel issued two ten-year, 5% interest-bearing notes payable to the New York Job Development Authority for the combined amount of \$3.0 million.

The Company leases certain office equipment and a vehicle. The aggregate annual principal payments due under the Company's long-term debt and minimum lease payments under operating leases are as follows:

For the years ended December 31, (dollars in thousands)	2011	2012	2013	2014	2015	Thereafter	Total
Long-term debt principal payments	\$ 2,833	\$ 3,391	\$ 3,629	\$ 931	\$ 39	\$	\$ 10,823
Operating lease minimum payments	30	25	13				68

Note 5: Derivatives and Hedging Activities

To manage interest rate risk, the Company has entered into an interest rate swap that effectively converts the floating-rate Term Loan into a fixed-rate debt instrument. The interest rate swap agreement minimizes the impact of interest rate changes on the Company's floating-rate debt and is designated and accounted for as a cash flow hedge. The effective portion of the change in the fair value of the interest rate swap is recorded in accumulated other comprehensive income (loss) (OCI) and reflected a \$287,000 loss at December 31, 2010. The Company utilizes the interest rate swap to maintain a fixed-rate of 4.515% on the Term Loan until its maturity on February 28, 2014. The notional amount of the interest rate swap decreases ratably over its term, as does the Term Loan, and was \$10.2 million at December 31, 2010.

In July 2009, the Company entered into nickel futures contracts, the last of which matured March 31, 2010, to minimize the price change impact of anticipated purchases of nickel over the life of a customer fixed-price sales agreement which was designated as and accounted for as a cash flow hedge. The effective portion of the change in the fair value of the nickel hedge agreements was recorded in accumulated OCI and reflected a \$94,000 gain at December 31, 2009, which was realized in 2010.

Table of Contents

The interest rate swap and nickel futures contracts qualify as cash flow hedges and are marked-to-market at each reporting period date with unrealized gains and losses included in OCI to the extent effective, and reclassified to interest expense or cost of sales in the period during which the hedged transaction affects earnings. No cash flow hedges were discontinued and there was no ineffectiveness during the year. The location and amounts recorded in the Condensed Consolidated Balance Sheets for the derivative instruments are as follows:

(dollars in thousands)	December 31, 2010	December 31, 2009
Other current assets	\$	\$ 94
Other assets, deferred tax	105	53
Other current liabilities, deferred tax		(34)
Other liabilities	(287)	(145)
Shareholders equity, other comprehensive loss	\$ (182)	\$ (32)

Note 6: Fair Value Measurements

The Company adopted Topic 820 Fair Value Measurement and Disclosures which defines fair value, establishes a framework for measuring fair value and expands disclosure requirements about fair value measurements. It also defines fair value as the price that would be received to sell an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy prescribed by the standard contains three levels as follows:

Level 1 Unadjusted quoted prices available in active markets for the identical assets or liabilities at the measurement date.

Level 2 Unadjusted quoted prices in active markets for similar assets or liabilities, or unadjusted quoted prices for identical or similar assets or liabilities in markets that are not active, or inputs other than quoted prices that are observable for the asset or liability

Level 3 Unobservable inputs that cannot be corroborated by observable market data and reflect the use of significant management judgment. These values are generally determined using pricing models for which the assumptions utilize management's estimates of market participant assumptions.

The fair value hierarchy requires the use of observable market data when available. In instances where the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input significant to the fair value measurement in its entirety. Our assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability. The interest rate swap is recorded at fair value based on Level 2 quoted LIBOR swap rates adjusted for credit and non-performance risk. The nickel futures contracts were recorded at fair value based on Level 2 quoted futures rates.

Financial instruments include cash, accounts receivable, other current assets, accounts payable, short-term debt, other current liabilities and long-term debt. The carrying amounts of these financial instruments approximated fair value at December 31, 2010 and December 31, 2009. The fair value of the Term Loan approximates the carrying amount based on the interest rate being based on one-month floating Libor rates.

Table of Contents**Note 7: Income Taxes**

Components of the provision for income taxes are as follows:

For the years ended December 31, (dollars in thousands)	2010	2009	2008
CURRENT PROVISION (BENEFIT)			
Federal	\$ 5,887	\$ (4,109)	\$ 5,553
State	205	1,164	(163)
DEFERRED PROVISION (BENEFIT)			
Federal	568	2,450	936
State	161	(598)	(378)
Provision (benefit) for income taxes	\$ 6,821	\$ (1,093)	\$ 5,948

A reconciliation of the federal statutory tax rate and the Company's effective tax rate is as follows:

For the years ended December 31,	2010	2009	2008
Federal statutory tax (benefit) rate	35.0%	(35.0)%	35.0%
Reconciliation of federal and state tax balances to tax returns	0.0	13.4	0.0
Statutory tax rate changes	0.0	(4.5)	(0.2)
Loss carryback realized at higher statutory rate	0.0	(1.9)	0.0
State government grants, net of federal tax impact	(0.1)	(1.2)	(2.4)
Domestic manufacturing deduction	(2.8)	0.0	(1.7)
State income taxes, net of federal tax impact	1.6	0.0	0.0
Other, net	0.3	2.2	(0.8)
Effective income tax (benefit) rate	34.0%	(27.0)%	29.9%

Dunkirk Specialty Steel operates in a New York State Empire Zone and is qualified to benefit from investments made and employees hired at the Dunkirk, New York facility for up to 15 years from its 2002 acquisition date. The Company recognized tax credit benefits of \$43,000 and \$73,000 for fiscal years 2010 and 2009, respectively, none of which were applied against the respective year's current tax provision. The balance of the credits, which have no expiration date, will be applied against future tax liabilities for income apportioned to New York State. The Company believes it will generate sufficient income in addition to taxable income generated from the reversal of its temporary differences to utilize this tax credit.

The Company recognized a Pennsylvania Educational Improvement Tax Credit benefit (PAEIT) of \$180,000 for 2008 which was applied against that year's current tax provision.

Table of Contents

Deferred taxes result from the following:

December 31, <i>(dollars in thousands)</i>	2010	2009
DEFERRED TAX ASSETS		
Receivables	\$ 809	\$ 837
Inventory	1,598	1,642
Accrued liabilities	386	288
Share-based compensation expense	1,443	848
State tax carryforwards (noncurrent)	1,294	1,416
Other	195	120
	\$ 5,725	\$ 5,151
DEFERRED TAX LIABILITIES		
Property, plant and equipment (noncurrent)	\$ 15,276	\$ 14,049
Other	124	134
	\$ 15,400	\$ 14,183

State tax carryforwards represent New York Empire Zone tax credits with no expiration date and a state net operating loss carryforward expiring in 2029.

The Company is routinely under audit by federal or state authorities in the areas of income taxes and the remittance of sales and use taxes. The Company's tax returns for tax years 2007 through 2010 remain subject to examination by the Internal Revenue Service and from 2006 for state tax jurisdictions.

Table of Contents**Note 8: Stockholders Equity**

The Company has never paid a cash dividend on its Common Stock. The Company's Credit Agreement with PNC Bank limits the payment of cash dividends payable on its Common Stock to 50% of the Company's excess cash flow per fiscal year. Excess cash flow represents the amount of earnings before interest, taxes, depreciation and amortization that is greater than the sum of the Company's payments for interest, income taxes, the principal portion of long-term debt and capital lease obligations, and capital expenditures.

In October 1998, the Company initiated a stock repurchase program to repurchase up to 315,000 shares of its outstanding Common Stock in open market transactions at market prices. The Company is authorized to repurchase 45,100 remaining shares of Common Stock under this program as of December 31, 2010.

The Company has 1,980,000 authorized shares of Senior Preferred Stock. At December 31, 2010 and 2009, there were no preferred shares issued or outstanding.

	Common Shares Outstanding	Common Stock	Additional Paid-In Capital	Retained Earnings	Accumulated Other Comprehensive (Loss)	Treasury Shares	Treasury Stock
<i>(dollars in thousands)</i>							
Balance at January 1, 2008	6,930,294	\$ 7	\$ 35,112	\$ 96,142	\$	270,795	\$ (1,659)
Common Stock issuance under Employee Stock Purchase Plan	7,935		155				
Exercise of Stock Options	64,850		626				
Share-based compensation			838				
Tax benefit on share-based compensation			529				
Net income				13,950			
Balance at December 31, 2008	7,003,079	\$ 7	\$ 37,260	\$ 110,092	\$	270,795	\$ (1,659)
Common Stock issuance under Employee Stock Purchase Plan	8,820		119				
Exercise of Stock Options	32,000		253				
Share-based compensation			1,058				
Tax benefit on share-based compensation			86				
Net (loss)				(2,958)			
Net losses on derivative instruments, net of tax					(32)		
Balance at December 31, 2009	7,043,899	\$ 7	\$ 38,776	\$ 107,134	\$ (32)	270,795	\$ (1,659)

Share-based compensation			1,819				
Tax benefit on share-based compensation			143				
Net income				13,242			
Net losses on derivative instruments, net of tax					(150)		
Purchase of treasury stock						12,055	(260)
Balance at December 31, 2010	7,094,314	\$ 7	\$ 41,341	\$ 120,376	\$ (182)	282,850	\$ (1,919)

Table of Contents**Note 9: Basic and Diluted Earnings Per Share**

The computation of basic and diluted earnings per share for the years ended December 31, 2010, 2009 and 2008 is as follows:

For the years ended December 31, (dollars in thousands, except per share amounts)	Income	2010 Shares	Income	2009 Shares	Income	2008 Shares
Income (loss) available to common Stockholders	\$ 13,242	6,782,576	\$ (2,958)	6,755,560	\$ 13,950	6,706,535
Effect of dilutive securities		85,679				94,668
Income (loss) available to common Stockholders plus assumed conversion	\$ 13,242	6,868,255	\$ (2,958)	6,755,560	\$ 13,950	6,801,203
EARNINGS (LOSS) PER COMMON SHARE						
Basic	\$ 1.95		\$ (0.44)		\$ 2.08	
Diluted	\$ 1.93		\$ (0.44)		\$ 2.05	

The Company had 38,028 common stock equivalents outstanding at December 31, 2009 which were not included in the common share computations for earnings (loss) per share as the common stock equivalents were anti-dilutive.

Table of Contents**Note 10: Share-based Compensation Plans**

At December 31, 2010, the Company has three incentive compensation plans that are described below:

STOCK INCENTIVE PLAN

The Company maintains the Stock Incentive Plan that has been adopted and amended from time to time by the Company's Board of Directors and approved by its stockholders. The Stock Incentive Plan permits the issuance of stock options to non-employee directors, other than those directors owning more than 5% of the Company's outstanding Common Stock, officers and other key employees of the Company who are expected to contribute to the Company's future growth and success. The stockholders approved an increase of 400,000 reserved shares in 2010. The Company may grant options up to a maximum of 1,750,000 shares of Common Stock, of which 454,318 are available for grant at December 31, 2010. The option price is equal to the fair market value of the Common Stock at the date of grant. Options granted to non-employee directors vest over a three-year period, and options granted to employees vest over a four-year period. All options under the Stock Incentive Plan will expire no later than ten years after the grant date. Forfeited options may be reissued and are included in the amount available for grants.

A summary of the Stock Incentive Plan activity as of and for the years ended December 31, 2010, 2009 and 2008 is presented below:

	Shares Available for Grant	Number of Shares	Non-Vested Stock Options Outstanding Weighted- Average Grant Fair Value	Stock Options Outstanding Number of Shares	Weighted- Average Exercise Price
Balance, January 1, 2008	393,668	174,050	\$ 14.80	403,650	\$ 18.14
Granted	(160,000)	160,000	15.12	160,000	27.23
Stock options exercised				(64,850)	9.64

Table of Contents

The following table summarizes information about stock options outstanding at December 31, 2010:

Range of Exercise Prices	Options Outstanding			Options Exercisable	
	Number of Shares	Weighted-Average Remaining Years Contractual Life	Weighted-Average Exercise Price	Number of Shares	Weighted-Average Exercise Price
\$5.12 to \$13.89	121,300	4.2	\$ 9.79	95,775	\$ 9.16
\$14.18 to \$16.98	113,500	6.9	16.14	66,550	15.64
\$18.15 to \$30.97	189,000	8.9	21.37	36,050	20.41
\$31.95 to \$34.80	136,000	6.8	33.12	94,050	32.84
\$36.15 to \$42.50	45,800	7.1	38.73	33,200	39.28
Outstanding at end of year	605,600	7.0	\$ 22.02	325,625	\$ 21.64
Exercisable at end of year	325,625	5.5			

Proceeds from stock option exercises totaled \$466,000 in 2010, \$253,000 in 2009 and \$625,000 in 2008. Shares issued in connection with stock option exercises are issued from available authorized shares. Tax benefits realized from stock options exercised totaled \$143,000 in 2010, \$86,000 in 2009 and \$529,000 in 2008.

Based upon the closing stock price of \$31.28 at December 31, 2010, the aggregate intrinsic value of outstanding in-the-money stock options and outstanding exercisable in-the-money stock options was \$6.2 million and \$3.6 million, respectively. Intrinsic value of stock options is calculated as the amount by which the market price of the Company's Common Stock exceeds the exercise price of the options. The aggregate intrinsic value of stock options exercised was \$560,000 in 2010, \$239,000 in 2009 and \$1.5 million in 2008. The total fair value of share awards vested was \$1.3 million during 2010, \$1.2 million during 2009, and \$759,000 in 2008.

Share-based Compensation Expense. FASB Accounting Standards require that share-based compensation to employees and directors be recognized as compensation expense in the income statement based on their fair values on the measurement date, which is the date of the grant. The value of the portion of the award that is ultimately expected to vest is recognized as expense over the requisite service periods. The compensation expense recognized and its related tax effects are included in additional paid-in capital. Additional paid-in capital is further adjusted for the difference between compensation expense recorded under the accounting standard and compensation expense reported for tax purposes upon actual exercise of employee stock options.

Share-based compensation expense totaled \$1.8 million in 2010, \$1.1 million in 2009 and \$838,000 in 2008. Share-based compensation expense is recognized ratably over the requisite service period for all awards. The tax benefit associated with the stock compensation expense recognized in the accompanying Consolidated Statements of Operations was \$420,000 in 2010, \$394,000 in 2009 and \$305,000 in 2008. Unrecognized share-based compensation expense related to non-vested stock awards totaled \$4.9 million at December 31, 2010. At such date, the weighted-average period over which this unrecognized expense was expected to be recognized was 29 months.

Valuation of Share-based Compensation. The fair value of the Company's employee stock options granted is estimated on the measurement date, which, for the Company, is the date of grant. The Company uses the Black-Scholes option-pricing model. The weighted-average fair value of stock options granted was \$1.6 million for 2010, \$1.1 million for 2009, and \$2.4 million for 2008. The Company's determination of fair value of share-based payment awards on the date of grant is affected by the Company's stock price as well as assumptions regarding the Company's expected stock price volatility over the term of the awards, and actual and projected employee stock option exercise behaviors.

Table of Contents

The assumptions used to determine the fair value of options granted are detailed in the table below:

	2010	2009	2008
Risk-free interest rate	1.53 to 2.68%	2.34 to 3.15%	2.19 to 3.87%
Dividend yield	0.0%	0.0%	0.0%
Expected market price volatility	54 to 59%	54 to 56%	47 to 53%
Weighted-average expected market price volatility	56.3%	55.2%	49.8%
Expected term	6.0 to 7.8 years	6.0 to 7.8 years	5.8 to 8.2 years

The risk-free interest rate was developed using the U.S. Treasury yield curve for periods equal to the expected life of the options at the grant date. No dividend yield was assumed because the Company does not pay cash dividends on Common Stock and currently has no plans to pay a dividend. Expected volatility is based on the long-term historical volatility (estimated over a period equal to the expected term of the options) of the Company's stock. In estimating the fair value of stock options under the Black-Scholes option-pricing model, separate groups of employees that have similar historical exercise behavior are considered separately. The expected term of options granted represents the period of time that options granted are expected to be outstanding.

EMPLOYEE STOCK PURCHASE PLAN

Under the 1996 Employee Stock Purchase Plan (the "Stock Purchase Plan"), the Company is authorized to issue up to 150,000 shares of Common Stock to its full-time employees, nearly all of whom are eligible to participate. Under the terms of the plan, employees can choose as of January 1 and July 1 of each year to have up to 10% of their total earnings withheld to purchase up to 100 shares of the Company's Common Stock each six-month period. The purchase price of the stock is 85% of the lower of its beginning-of-the-period or end-of-the-period market prices. At December 31, 2010, the Company has issued 122,933 shares of Common Stock since the plan's inception.

CASH INCENTIVE PLANS

The Company has a management cash incentive plan covering certain key executives and employees and profit-sharing plans that cover the remaining employees. The profit-sharing plans provide for the sharing of pre-tax profits in excess of specified amounts. For the years ended December 31, 2010, 2009 and 2008, the Company expensed \$5.0 million, \$252,000 and \$3.7 million, respectively, under these plans.

Note 11: Retirement Plans

The Company has a defined contribution retirement plan that covers substantially all employees. Pursuant to the 401(k) plan, participants may elect to make pre-tax and after-tax contributions, subject to certain limitations imposed under the Internal Revenue Code of 1986, as amended. In addition, the Company makes periodic contributions to the 401(k) plan based on service for the Titusville and Dunkirk hourly employees. The company makes periodic contributions for the salaried employees; the amount of the contribution is dependent upon their individual contribution to the 401(k) retirement plan.

The Company participates in the Steelworkers Pension Trust (the "Trust"), a multi-employer defined-benefit pension plan that is open to all hourly and salaried employees associated with the Bridgeville facility. The Company makes periodic contributions to the Trust based on hours worked at a fixed rate for each hourly employee and a fixed monthly contribution on behalf of each salaried employee. The company has the option and right to terminate participation in the Trust if the withdrawal liability ratio of assets to liabilities is below 100%.

The total expense for the years ended December 31, 2010, 2009 and 2008 was \$937,000, \$743,000 and \$972,000, respectively, including \$567,000, \$438,000 and \$494,000, respectively, for the multi-employer Trust. No other post-retirement benefit plans exist.

Table of Contents

Note 12: Commitments and Contingencies

From time to time, various lawsuits and claims have been or may be asserted against the Company relating to the conduct of our business, including routine litigation relating to commercial and employment matters. The ultimate cost and outcome of any litigation or claim cannot be predicted with certainty. Management believes, based on information presently available, that the likelihood that the ultimate outcome of any such pending matter will have a material adverse effect on its financial condition, or liquidity or a material impact to our results of operations is remote, although the resolution of one or more of these matters may have a material adverse effect on its results of operations for the period in which the resolution occurs.

The Company, as well as other steel companies, is subject to demanding environmental standards imposed by federal, state and local environmental laws and regulations. The Company is not aware of any environmental condition that currently exists at any of its facilities that would cause a material adverse effect on the financial condition of the Company, results of operations or liquidity in a particular future quarter or year.

The CDSOA provides for payment of import duties collected by the U.S. Treasury to domestic companies injured by unfair foreign trade practices. In accordance with the CDSOA, which expired in 2007, the Company filed claims to receive its appropriate share of the import duties collected. In 2010, 2009 and 2008 the Company received \$32,000, \$551,000 and \$599,000, respectively, from the U.S. Treasury net of expenses incurred. Future benefits are dependent on the amount of undistributed import duties collected as of September 30, 2007 and the relationship of Dunkirk Specialty Steel's claim in relation to claims filed by other domestic specialty steel producers. The Company expects minimal distributions in the future.

The Company's purchase obligations include the value of all open purchase orders with established quantities and purchase prices, as well as minimum purchase commitments, all made in the normal course of business. At December 31, 2010, the Company's total purchase obligations were \$12.0 million, all of which will be due in year 2011.

Table of Contents**Note 13: Segment and Related Information**

The Company is comprised of three operating locations and the corporate headquarters. For segment reporting, the Bridgeville and Titusville facilities have been aggregated into one reportable segment, Universal Stainless & Alloy Products. The Universal Stainless & Alloy Products manufacturing process involves melting, remelting, treating and hot and cold rolling of semi-finished and finished specialty steels. A second reportable segment, Dunkirk Specialty Steel has a manufacturing process involving hot rolling and finishing specialty steel bar, rod and wire products. At December 31, 2010, 82% of the Company's 518 employees are covered by USW collective bargaining agreements.

The accounting policies of both reportable segments are the same as those described in Note 1: Significant Accounting Policies. Sales between the segments are generally made at market-related prices. Corporate assets are primarily cash and cash equivalents, prepaid expenses, deferred income taxes, and property, plant and equipment.

Table of Contents

The Company's fourth quarter 2010 sales increased 93% from the fourth quarter 2009 on an 84% increase in tons shipped as shipments to rerollers, service centers, and forgers increased substantially from the 2009 fourth quarter. In total, sales to rerollers, service centers, and forgers increased 446%, 98% and 17%, respectively, from the 2009 fourth quarter. The Company's 2010 fourth quarter earnings were positively impacted from the receipt of import duties of \$32,000. The Company's 2009 fourth quarter earnings were positively impacted by the receipt of import duties of \$551,000.

Earnings per share amounts for each quarter are required to be computed independently. As a result, their sum may not equal the total year earnings per share amounts.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

The Company's management, including the Company's Chairman, President and Chief Executive Officer and the Vice President of Finance, Chief Financial Officer and Treasurer, performed an evaluation of the effectiveness of the Company's disclosure controls and procedures. Based on that evaluation, the Company's Chairman, President and Chief Executive Officer and the Vice President of Finance, Chief Financial Officer and Treasurer concluded that, as of the end of the fiscal year covered by this Annual Report on Form 10-K, the Company's disclosure controls and procedures are effective. Management's Report on the Company's internal control over financial reporting is included in Item 8 of this Annual Report on Form 10-K under the caption "Management's Report on Internal Control Over Financial Reporting" and is incorporated herein by reference. The Company's independent registered public accounting firm has issued a report on management's maintenance of effective internal control over financial reporting and is set forth in Item 8 of this Annual Report on Form 10-K under the caption "Report of Independent Registered Public Accounting Firm" and is incorporated herein by reference.

During the last fiscal quarter of the fiscal year ended December 31, 2010, there were no changes in the Company's internal control over financial reporting which have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

The information concerning the directors of the Company is set forth in the Proxy Statement for the 2011 Annual Meeting of Stockholders (the "Proxy Statement") to be sent to stockholders in connection with the Company's 2011 Annual Meeting of Stockholders, under the heading "Proposal No. 1 Election of Directors," which information is incorporated by reference. With the exception of the information specifically incorporated herein by reference, the Company's Proxy Statement is not to be deemed filed as part of this report for the purposes of this Item.

In addition to the information set forth under the caption "Executive Officers" in Part I of this report, the information concerning our directors required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Nominees for Election as Directors" in the Company's Proxy Statement, which will be filed with the SEC, pursuant to Regulation 14A, not later than 120 days after the end of the 2010 fiscal year. Information concerning the Audit Committee and its audit committee financial expert required by this item is incorporated and made part hereof by reference to the material appearing under the heading "Committees of the Board of Directors" in the Proxy Statement. Information required by this item regarding compliance with Section 16(a) of the Exchange Act is incorporated and made a part hereof by reference to the material appearing under the heading "Security Ownership of Certain Beneficial Owners and Management" in the Proxy Statement. Information concerning the executive officers of the Company is contained in Part I of this Annual Report on Form 10-K under the caption "Executive Officers."

The Company has adopted a Code of Business Conduct and Ethics that applies to all directors and employees, including its principal executive officer and principal financial officer. A copy is available, free of charge, through the Company's website at <http://www.univstainless.com>. Information on the Company's website is not part of this Annual Report on Form 10-K. The Company intends to timely disclose any amendment of or waiver under the Code of Business Conduct and Ethics on its website and will retain such information on its website as required by applicable SEC rules.

Table of Contents

ITEM 11. EXECUTIVE COMPENSATION

The information concerning executive compensation is set forth in the Proxy Statement under the heading Executive Compensation, which information is incorporated by reference. With the exception of the information specifically incorporated herein by reference, the Proxy Statement is not to be deemed filed as part of this report for the purposes of this Item.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information concerning security ownership of certain beneficial owners and management is set forth in the Proxy Statement under the heading Security Ownership of Certain Beneficial Owners and Management, which information is incorporated by reference. With the exception of the information specifically incorporated herein by reference, the Proxy Statement is not to be deemed filed as part of this report for the purposes of this Item.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information concerning certain relationships and related transactions, and director independence is set forth in the Proxy Statement under the heading The Board of Directors, which information is incorporated by reference. With the exception of the information specifically incorporated herein by reference, the Proxy Statement is not to be deemed filed as part of this report for the purposes of this Item.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information concerning principal accountant fees and services is set forth in the Proxy Statement under the heading Principal Accountant Fees and Services, which information is incorporated by reference. With the exception of the information specifically incorporated herein by reference, the Proxy Statement is not to be deemed filed as part of this report for the purposes of this Item.
