KAISER FEDERAL FINANCIAL GROUP, INC. AND SUBSIDIARY

Notes to Consolidated Financial Statements

(Unaudited)

Note 1 Nature of Business and Significant Accounting Policies

Nature of Business: Kaiser Federal Financial Group, Inc. (the Company) is a Maryland corporation that owns all of the outstanding common stock of Kaiser Federal Bank (the Bank). It is the successor to K-Fed Bancorp following the completion of the second-step conversion and offering in November 2010. The Company s primary activity is holding all of the outstanding shares of common stock of Kaiser Federal Bank. The Bank is a federally chartered savings bank headquartered in Covina, California. The Bank s principal business activity consists of attracting retail deposits from the general public and originating primarily loans secured by first mortgages on owner-occupied, one-to-four family residences and multi-family residences located in its market area. While the Bank originates many types of residential and commercial real estate loans, the majority of its one-to-four family real estate loans have been purchased from other financial institutions.

The Company s business activities generally are limited to passive investment activities and oversight of its investment in the Bank. Unless the context otherwise requires, all references to the Company include the Bank and the Company on a consolidated basis, and prior to November 19, 2010, the Company refers to K-Fed Bancorp and the Bank on a consolidated basis.

Principles of Consolidation and Basis of Presentation: The financial statements of Kaiser Federal Financial Group, Inc. have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) and predominant practices followed by the financial services industry. The consolidated financial statements presented in this report include the accounts of Kaiser Federal Financial Group, Inc. and its wholly-owned subsidiary, Kaiser Federal Bank. All material intercompany balances and transactions have been eliminated in consolidation. Financial information presented in this report is derived in part from the consolidated financial statements of K-Fed Bancorp and subsidiary prior to November 19, 2010. In the opinion of the Company s management, all adjustments consisting of normal recurring accruals necessary for a fair presentation of the financial condition and results of operations for the interim periods included herein have been made.

On November 19, 2010, the Company completed the conversion from a mutual holding company structure to a fully public stock holding company form of organization and related public offering. The Company sold a total of 6,375,000 shares of common stock in the offering at a purchase price of \$10.00 per share. The offering raised capital of \$59.1 million, which is net of costs of \$4.7 million. Concurrent with the completion of the offering, shares of K-Fed Bancorp common stock owned by public stockholders were exchanged for 0.7194 shares of the Company s common stock. All share and per share information in this report for periods prior to the conversion has been revised to reflect the 0.7194:1 conversion ratio on shares outstanding, including shares of K-Fed Bancorp held by the former mutual holding company that were not publically traded.

The results of operations for the three months and nine months ended March 31, 2012 are not necessarily indicative of the results of operations that may be expected for any other interim period or for the fiscal year ending June 30, 2012. Certain information and note disclosures normally included in the Company s annual financial statements have been condensed or omitted. Therefore, these consolidated financial statements and notes thereto should be read in conjunction with the consolidated financial statements and notes included in the 2011 Annual Report on Form 10-K filed with the Securities and Exchange Commission.

Use of Estimates in the Preparation of Consolidated Financial Statements: The preparation of consolidated financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of income and expenses during the reporting period. Changes in these estimates and assumptions are considered reasonably possible and may have a material impact on the consolidated financial statements and thus actual results could differ from the amounts reported and disclosed herein. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses, real estate owned and financial instruments.

6

Adoption of New Accounting Standards:

In April 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2011-02 Receivable (Topic 310): A Creditor s Determination of Whether a Restructuring is a Troubled Debt Restructuring. The ASU amended existing guidance to assist creditors in determining whether a modification of the terms of a receivable meets the definition of a troubled debt restructuring (TDR). The guidance does not change previous standards that a restructuring of debt constitutes a TDR if the creditor for economic or legal reasons related to the debtor s financial difficulties grants a concession to the debtor that it would not otherwise consider, but provides clarification on determining whether a debtor is in financial difficulty and if a concession was granted. The guidance is effective for interim and annual periods beginning on or after June 15, 2011, and should be applied retrospectively to restructurings occurring on or after the beginning of the fiscal year of adoption. The adoption of this guidance did not have a material effect on the Company s results of operations or financial position.

In May 2011, the FASB issued ASU 2011-04, Fair Value Measurement (Topic 820): Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs, to clarify Topic 820, Fair Value Measurement, but also include some instances where a particular principle or requirement for measuring fair value or disclosing information about fair value measurements has changed. This Update results in common fair value measurement and disclosure requirements in U.S. GAAP and International Financial Reporting Standards (IFRSs). Key provisions of the amendment include: a prohibition on grouping financial instruments for purposes of determining fair value, except when an entity manages market and credit risks on the basis of the entity s net exposure to the group; an extension of the prohibition against the use of a blockage factor to all fair value measurements (that prohibition currently applies only to financial instruments with quoted prices in active markets); and a requirement that for recurring Level 3 fair value measurements, entities disclose quantitative information about unobservable inputs, a description of the valuation process used and qualitative details about the sensitivity of the measurements. In addition, for items not carried at fair value but for which fair value is disclosed, entities will be required to disclose the level within the fair value hierarchy that applies to the fair value measurement disclosed. The amendments in this guidance are to be applied prospectively. This guidance is effective during interim and annual periods beginning after December 15, 2011. The adoption of this guidance did not have a material effect on the Company s results of operations or financial position, however, it expanded the disclosure for items not carried at fair value but for which fair value is disclosed.

In June 2011, the FASB issued ASU 2011-05, Comprehensive Income (Topic 220): Presentation of Comprehensive Income. ASU 2011-05 does not change what would be classified as other comprehensive income (OCI), rather, items classified as OCI will be moved to the income statement instead of the statement of stockholders—equity. Under this guidance, companies will have the option to present OCI either in a single continuous statement of comprehensive income or in two separate but consecutive statements. In both options, companies will be required to present each component of net income along with total net income, each component of OCI along with a total for OCI, and a total amount for comprehensive income. The FASB amended ASU 2011-05 in December 2011, with the issuance of ASU 2011-12, Comprehensive Income (Topic 220): Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in Accounting Standards Update No. 2011-05. ASU 2011-12 defers changes in ASU 2011-05 that relate to the presentation of reclassification adjustments. Both standards are effective for interim and annual periods beginning after December 15, 2011, and are applied retrospectively to transactions or modifications of existing transactions that occur on or after the effective date. The adoption of this guidance did not have a material effect on the Company s consolidated financial statements, however it changed the way the Company discloses OCI.

7

Effect of Newly Issued But Not Yet Effective Accounting Standards:

In September 2011, the FASB issued ASU 2011-08, *Intangibles Goodwill and Other (Topic 350): Testing Goodwill for Impairment.* Under the amendments, an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not (a likelihood of more than 50 percent) that its fair value is less than its carrying amount. Under the amendments in this Update, an entity has the option to bypass the qualitative assessment for any reporting unit in any period and proceed directly to performing the first step of the two-step goodwill impairment test. An entity may resume performing the qualitative assessment in any subsequent period. The amendments are effective for annual and interim goodwill impairment tests performed for fiscal years beginning after December 15, 2011. The adoption of this guidance is not expected to have a material effect on the Company s result of operations or financial position.

8

Note 2 **Earnings Per Share**

Basic earnings per common share is net income divided by the weighted average number of common shares outstanding during the period. Employee Stock Ownership Plan (ESOP) shares are considered outstanding for this calculation unless unearned. All outstanding unvested share-based payment awards that contain rights to nonforfeitable dividends are considered participating securities for this calculation and had an immaterial impact on the calculation for the three and nine months ended March 31, 2012 and 2011. Diluted earnings per common share includes the dilutive effect of additional potential common shares issuable under stock options.

| | Three months ended March 31, | | | | | | | |
|---|---------------------------------|---------|------------|-------------|-------------|-------------|-----|---------|
| | : | 2012 | 2 | 2011 | 2 | 2012 | 2 | 2011 |
| Basic | | | (Dollars i | n thousands | s, except p | er share da | ta) | |
| Net income | \$ | 1,647 | \$ | 2,261 | \$ | 5,748 | \$ | 6,295 |
| Weighted average common shares outstanding | 9, | 022,704 | 9,0 | 072,381 | 9,0 | 096,323 | 9,2 | 260,539 |
| Basic earnings per share | \$ | 0.18 | \$ | 0.25 | \$ | 0.63 | \$ | 0.68 |
| <u>Diluted</u> | | | | | | | | |
| Net income | \$ | 1,647 | \$ | 2,261 | \$ | 5,748 | \$ | 6,295 |
| Weighted average common shares outstanding | 9, | 022,704 | 9,0 | 072,381 | 9,0 | 096,323 | 9,2 | 260,539 |
| Add: Dilutive effect of stock options | | 9,171 | | 0 | | 4,603 | | 161 |
| Average shares and dilutive potential common shares | 9, | 031,875 | 9,0 | 072,381 | 9, | 100,926 | 9,2 | 260,700 |
| Diluted earnings per share | \$ | 0.18 | \$ | 0.25 | \$ | 0.63 | \$ | 0.68 |

For the three and nine months ended March 31, 2012 outstanding stock options to purchase 222,590 shares, respectively were anti-dilutive and not considered in computing diluted earnings per common share. For the three and nine months ended March 31, 2011 outstanding stock options to purchase 304,515 shares, respectively were anti-dilutive and not considered in computing diluted earnings per common share. Stock options are not considered participating securities as they do not contain rights to nonforfeitable dividends.

The Recognition and Retention Plan (RRP) awards contain rights to nonforfeitable dividends and are considered participating securities. RRP shares of 39,475 are included in weighted average common shares outstanding for the three and nine months ended March 31, 2012. RRP shares of 12,230 are included in weighted average common shares outstanding for the three and nine months ended March 31, 2011.

The Company s 2011 Equity Incentive Plan (EIP) provides for the issuance of stock options, restricted stock awards and restricted stock units to directors, officers, and employees. Restricted stock awards issued under the EIP contain rights to nonforfeitable dividends and are considered participating securities. Restricted stock awards of 8,664 shares are included in the weighted average common shares outstanding for the three and nine months ended March 31, 2012.

Note 3 Fair Value Measurements

FASB ASC 820-10 establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Edgar Filing: Kaiser Federal Financial Group, Inc. - Form 10-Q

Level 3: Significant unobservable inputs that reflect a reporting entity s own assumptions about the assumptions that market participants would use in pricing an asset or liability.

9

<u>Investment Securities</u>: The fair values for investment securities are determined by quoted market prices, if available (Level 1). For securities where quoted prices are not available, fair values are calculated based on market prices of similar securities (Level 2). For securities where quoted prices or market prices of similar securities are not available, fair values are calculated using discounted cash flows or other market indicators (Level 3).

There were no financial or nonfinancial instruments transferred in or out of Level 1, 2, or 3 input categories during the three and nine months ended March 31, 2012 and 2011.

Impaired Loans: At the time a loan is considered impaired, it is valued at the lower of cost or fair value. Impaired loans carried at fair value generally receive allocations of the allowance for loan losses that are individually evaluated. For collateral dependent loans, fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value. Non-real estate collateral may be valued using an appraisal, net book value per the borrower s financial statements, or aging reports, adjusted or discounted based on management s historical knowledge, changes in market conditions from the time of the valuation, and management s expertise and knowledge of the client and client s business, resulting in a Level 3 fair value classification. Impaired loans are evaluated on a monthly basis for additional impairment and adjusted accordingly.

Other Real Estate Owned: Assets acquired through or instead of loan foreclosure are initially recorded at fair value less costs to sell when acquired, establishing a new cost basis. These assets are subsequently accounted for at lower of cost or fair value less estimated costs to sell. Fair value is commonly based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the independent appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.

As of March 31, 2012 and June 30, 2011, there were no liabilities measured at fair value.

Assets measured at fair value on a recurring basis are summarized in the following table (in thousands):

| | | | Fair vait | ie Measurement | s Using | |

| Assets at June 30, 2011: | 1000 | -, | (EC | (12) | (EC | . () |
| Real estate owned: one-to-four family residential | \$ 828 | \$0 | \$ | 0 | \$ | 828 |

Loans are considered impaired when it is probable that the Company will be unable to collect all amounts due as scheduled according to the contractual terms of the loan agreement, including contractual interest and principal payments. Impaired loans are measured for impairment using the fair value of the collateral for collateral dependent loans, or alternatively, based on the present value of expected future cash flows discounted at the loan's effective interest rate. The fair value of collateral is calculated using an independent third party appraisal. For one-to-four family residential loans, appraised values are based on the comparative sales approach. A significant unobservable input in the sales approach is the adjustment for the differences between the comparable sales. At March 31, 2012, these adjustments ranged from an upward adjustment of 3.3% to a discount of 16.8%. For multi-family residential and commercial real estate loans, appraisers may use either a single valuation approach or a combination of approaches such as comparative sales, cost or the income approach. At March 31, 2012, adjustments made on multi-family residential and commercial real estate loans valued using the comparable sales approach ranged from 0.0% to a discount of 8.0%. A significant unobservable input in the income approach is the estimated income capitalization rate. At March 31, 2012, a 7.5% capitalization rate was utilized to determine the fair value of the underlying collateral of a multi-family residential loan. Impaired loans measured at fair value had a principal balance of \$15.9 million at March 31, 2012 as compared to \$22.2 million at June 30, 2011. The valuation allowance for these loans was \$2.8 million at March 31, 2012 as compared to \$5.3 million at June 30, 2011. The reduction of valuation allowance for impaired loans was primarily attributable to charge-offs of specific valuation allowances previously identified during the nine months ended March 31, 2012.

Edgar Filing: Kaiser Federal Financial Group, Inc. - Form 10-Q

Real estate owned is measured at fair value less estimated costs to sell at transfer. If the fair value of the asset declines, a write-down is recorded through expense. During the three and nine months ended March 31, 2012, the Company did not incur a charge to reduce real estate owned to fair value. During the three and nine months ended March 31, 2011, the Company incurred charges of \$10,000 and \$164,000, respectively to reduce real estate owned to fair value.

11

Fair Value of Financial Instruments

The estimated fair value amounts have been determined by the Company using available market information and appropriate valuation methodologies. However, considerable judgment is necessarily required to interpret market data to develop the estimates of fair value. Accordingly, the estimates presented herein are not necessarily indicative of the amounts the Company could realize in a market exchange. The use of different assumptions and/or estimation methodologies may have a material effect on the estimated fair value amounts.

The following methods and assumptions were used to estimate fair value of each class of financial instruments for which it is practicable to estimate fair value:

Cash and Cash Equivalents

The carrying amounts of cash and cash equivalents approximate fair values. Cash on hand and non-interest due from bank accounts are classified as Level 1 and federal funds sold are classified as Level 2.

Interest Earning Time Deposits in Other Financial Institutions

The carrying amounts of interest earning time deposits in other financial institutions approximate fair values and are classified as Level 2.

Investments

Estimated fair values for securities held-to-maturity are obtained from quoted market prices where available and are classified as Level 1. Where quoted market prices are not available, estimated fair values are based on quoted market prices of comparable instruments and are classified as Level 2.

Securities available-for-sale that are previously reported are excluded from the fair value disclosure below.

FHLB Stock

It is not practical to determine the fair value of FHLB stock due to restrictions placed on its transferability.

Loans

Fair value for loans are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality resulting in a Level 3 classification. Impaired loans are valued at the lower of cost or fair value as described previously. The methods utilized to estimate the fair value of loans do not necessarily represent an exit price.

Accrued Interest Receivable

The carrying amounts of accrued interest receivable approximate fair value resulting in a Level 3 classification.

Deposits

The fair values disclosed for demand deposits are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amount) resulting in a Level 2 classification. The carrying amounts of variable rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date resulting in a Level 2 classification. Fair values for fixed rate certificates of deposit are estimated using a discounted cash flows calculation that applies interest rates currently being offered on certificates to a schedule of aggregated expected monthly maturities on time deposits resulting in a Level 2 classification.

FHLB Advances

The fair values of the Company s FHLB advances are estimated using discounted cash flow analyses based on the current borrowing rates for similar types of borrowing arrangements resulting in a Level 2 classification.

Off-Balance Sheet Financial Instruments

The fair values for the Company s off-balance sheet loan commitments are estimated based on fees charged to others to enter into similar agreements taking into account the remaining terms of the agreements and credit standing of the Company s customers. The estimated fair value of these commitments is not significant.

13

The carrying amounts and estimated fair values of the Company $\,$ s financial instruments are summarized as follows (in thousands):

15

There were no sales of securities during the three or nine months ended March 31, 2012 or March 31, 2011.

All mortgage-backed securities and collateralized mortgage obligations have varying contractual maturity dates at March 31, 2012. Expected maturities may differ from contractual maturities because borrowers may have the right to call or repay obligations with or without call or repayment penalties. An FHLB bond with a maturity date of April, 2014 was called during July 2011.

Securities with unrealized losses at March 31, 2012 and June 30, 2011, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, are as follows (in thousands):

| <u>Description of Securities</u> | | | | | | | | | | |
| Collateralized mortgage obligations (residential) | \$ 5,115 | \$ | (95) | \$0 | \$ | 0 | \$ 5,115 | \$ | (95) | |
| Total temporarily impaired | \$ 5,115 | \$ | (95) | \$0 | \$ | 0 | \$ 5,115 | \$ | (95) | |

The Company evaluates securities for other-than-temporary impairment at least on a quarterly basis, and more frequently when economic or market concerns warrant such evaluation. Consideration is given to the length of time and the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the Company does not have the intent to sell these securities and it is not more likely than not that it will be required to sell the securities before their anticipated recovery. In analyzing an issuer s financial condition, the Company may consider whether the securities are issued by the federal government or its agencies, whether downgrades by bond rating agencies have occurred, and the results of reviews of the issuer s financial condition.

At March 31, 2012, nine debt securities had an aggregate unrealized loss of 0.3% of the Company s amortized cost basis. At June 30, 2011, one debt security had an unrealized loss of 0.5% of the Company s amortized cost basis. The unrealized losses relate principally to the general change in interest rates and liquidity, and not credit quality, that has occurred since the securities purchase dates, and such unrecognized losses or gains will continue to vary with general interest rate level fluctuations in the future. As management has the intent and ability to hold debt securities until recovery, which may be maturity, and it is not more likely than not that it will be required to sell the securities before their anticipated recovery, no declines in fair value are deemed to be other-than-temporary as of March 31, 2012 and June 30, 2011.

There were no investments in any one issuer, other than the U.S. Government and its agencies, in an amount greater than 10% of stockholders equity.

Note 5 Loans

The composition of loans consists of the following (in thousands):

| | March 31, 2012 | June 30, 2011 |
|---|-------------------|------------------|
| Real Estate: | | |

During the three months ended March 31, 2012, the Bank purchased \$13.0 million newly originated adjustable and fixed rate one-to-four family loans at a premium of 2.50%, or \$326,000. The purchased loans carried a weighted average interest rate of 3.97% net of servicing fees of 25 basis points and are serviced by an outside servicer. During the nine months ended March 31, 2012, the Bank purchased \$47.8 million of newly originated adjustable and fixed rate one-to-four family loans at a premium of 2.22%, or \$1.0 million. The purchased loans carried a weighted average interest rate of 4.22% net of servicing fees of 25 basis points and are serviced by an outside servicer. Each purchased loan was underwritten in accordance with the Bank s underwriting standards and met the Bank s residential underwriting requirements. The loans purchased were current at the time of purchase.

Allowance for loan losses for the Nine months ended March 31, 2011 One-to-four Multi-family Commercial Home family residential real estate Automobile Other **Total** equity Balance, beginning of period \$ 7,812 3,643 1,599 \$ 185 9 \$ 61 \$13,309 Provision for loan losses 593 (19)469 (134)7 34 950 Recoveries 90 0 0 90 23 203 0 Loans charged-off (1,709)(772)0 (66)(91)(2,638)Balance, end of period \$ 6,786 2,852 2,068 75 \$ 16 \$ 27 \$ 11,824

At March 31, 2012, non-accrual loans totaled \$25.1 million, compared to \$26.4 million at June 30, 2011. At March 31, 2012 and June 30, 2011, there were no loans past due more than 90 days and still accruing interest. The difference between the recorded investment and unpaid principal balance of loans relates to accrued interest, net deferred origination costs and net premiums and discounts on purchased loans each of which is immaterial to each loan class.

There was no provision for loan losses for the three and nine months ended March 31, 2012 as compared to no provision for the three months ended March 31, 2011, and \$950,000 for the nine months ended March 31, 2011. While the net provision for loan losses was zero for the three months ended March 31, 2012, it was comprised of a \$117,000 provision on one-to-four family loans, a \$92,000 reduction in provision on multi-family loans, a \$33,000 reduction in provision on commercial real estate loans, a \$16,000 reduction in provision on automobile loans, a \$21,000 provision on home equity loans and a \$3,000 provision on other loans. The reduction in provision on multi-family loans was primarily due to a decline in the overall historical peer group loss factors on loans collectively evaluated for impairment and a reduction in the valuation allowance on multi-family loans that were individually evaluated for impairment.

While the net provision for loan losses was zero for the nine months ended March 31, 2012, it was comprised of a \$844,000 provision on one-to-four family loans, a \$62,000 provision on multi-family loans, a \$935,000 reduction in provision on commercial real estate loans, a \$54,000 reduction in provision on automobile loans, a \$54,000 provision on home equity loans and a \$29,000 provision on other loans. The reduction in provision on commercial real estate loans was primarily due to a decline in the overall historical peer group loss factors on loans collectively evaluated for impairment, a decline in the balance of commercial real estate loans collectively evaluated for impairment and a reduction in the valuation allowance on commercial real estate loans that were individually evaluated for impairment.

19

The following tables present the balance in the allowance for loan losses and the recorded investment in loans by portfolio segment and based on impairment method as of March 31, 2012 and June 30, 2011 (in thousands):

A loan is impaired when it is probable, based on current information and events, the Company will be unable to collect all contractual principal and interest payments due in accordance with the terms of the loan agreement. When it is determined that a loss is probable, a valuation allowance is established and included in the allowance for loan losses. The amount of impairment is determined by the difference between the recorded investment in the loan and the present value of expected cash flows, or estimated net realizable value of the underlying collateral on collateral dependent loans.

The following tables present loans individually evaluated for impairment by class of loans as of March 31, 2012 and June 30, 2011 (in thousands):

| | | | | |
| Total | \$ 25.914 | \$ 28.070 | \$ 26,264 | \$ 29,434 |

Payments received on impaired loans are recorded as a reduction of principal or as interest income depending on management s assessment of the ultimate collectability of the loan principal. Generally, interest income on an impaired loan is recorded on a cash basis when the outstanding principal is brought current.

The following table presents income recorded on impaired loans by class (in thousands). Interest income recorded on impaired loans for all periods presented was recorded on a cash basis.

Troubled Debt Restructurings:

Troubled debt restructurings totaled \$11.8 million and \$12.9 million at March 31, 2012 and June 30, 2011, respectively. Troubled debt restructurings of \$11.0 million and \$12.9 million are included in the non-accrual loans at March 31, 2012 and June 30, 2011. The Bank has allocated \$1.3 million and \$2.5 million of valuation allowance to customers whose loan terms have been modified in troubled debt restructurings as of March 31, 2012 and June 30, 2011, respectively. There were no further commitments to customers whose loans were troubled debt restructurings at March 31, 2012 and June 30, 2011.

In the past, the terms of certain loans were modified as troubled debt restructurings. The modification of the terms of such loans included one or a combination of the following: a reduction of the stated interest rate of the loan; an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk; or a permanent reduction of the recorded investment in the loan. There were no loan modifications that met the definition of troubled debt restructuring during the three and nine months ended March 31, 2012.

During the three and nine months ended March 31, 2012, there was one one-to-four family loan, with a recorded investment of \$345,000, modified as a troubled debt restructuring within the previous 12 months and for which there was a payment default. This troubled debt restructuring increased the allowance for loan losses by \$65,000 and did not result in any charge-offs during the three and nine months ended March 31, 2012.

A loan is considered to be in payment default once it is 30 days contractually past due under the modified terms.

The terms of certain other loans were modified during the period ended March 31, 2012 that did not meet the definition of a troubled debt restructuring. During the three and nine months ended March 31, 2012, there were 21 and 49 loans that were modified and not accounted for as troubled debt restructurings in the amount of \$14.5 million and \$29.2 million, respectively. The modifications were made to refinance the credits to maintain the borrowing relationships and generally consisted of term or rate modifications. The borrowers were not experiencing financial difficulty or delay in loan payments and the modifications were made at market terms.

In order to determine whether a borrower is experiencing financial difficulty, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification. This evaluation is performed under the Company s internal underwriting policy.

Credit Quality Indicators

The Company categorizes loans into risk categories based on relevant information about the ability of the borrowers to service their debt such as: current financial information, historical payment experience, credit documentation and current economic trends among other factors. This analysis is performed monthly. The Company uses the following definitions for risk ratings:

Special Mention. Loans are classified as special mention when it is determined a loan relationship should be monitored more closely. Loans that are 60 days to 89 days past due are generally classified as special mention. In addition, loans are classified as special mention for a variety of reasons including changes in recent borrower financial conditions, changes in borrower operations, changes in value of available collateral, concerns regarding changes in economic conditions in a borrower sindustry, and other matters. A loan classified as special mention in many instances may be performing in accordance with the loan terms.

Substandard. Loans that are 90 days or more past due are generally classified as substandard. A loan is also considered substandard if it is inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Substandard assets include those characterized by the distinct possibility that the insured institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Assets classified as doubtful have all of the weaknesses inherent in those classified substandard with the added characteristic that the weaknesses present make collection or liquidation in full highly questionable and improbable.

Loss. Assets classified as loss are considered uncollectible and of such little value that continuance as an asset, without establishment of a valuation allowance individually evaluated or charge-off, is not warranted.

Loans not meeting the criteria as part of the above described process are considered to be Pass rated loans. Pass rated loans are generally well protected by the current net worth and paying capacity of the obligor or by the value of the underlying collateral. Pass rated assets are not more than 59 days past due but are generally performing in accordance with the loan terms.

As of March 31, 2012 and June 30, 2011, and based on the most recent analysis performed, the risk category of loans by class of loans is as follows (in thousands):

| March 31, 2012 | Pass | Special Mention | | pecial Mention Substandard | | l Doubtful | | Loss |
|--------------------|------------|------------------------|--------|----------------------------|--------|------------|----|-------|

| Sales | (1,118) | (3 | 3,369) | |
| | | | | |
| End of period | \$ 725 | \$ | 828 | |

25

Net income (expenses) related to foreclosed assets are as follows and are included in other operating expense (in thousands):

| | Nine months ended | | | | | |
|--|-------------------|-------|------------|--|--|--|
| | March 31, 2012 | March | h 31, 2011 | | | |
| Net gain on sales | \$ 55 | \$ | 21 | | | |
| Direct write-down | 0 | | (164) | | | |
| Operating expenses, net of rental income | (31) | | (231) | | | |
| | | | | | | |
| Total | \$ 24 | \$ | (374) | | | |

The Company has no valuation allowance or activity in the valuation allowance account for the nine months ended March 31, 2012 and March 31, 2011.

Note 7 Federal Home Loan Bank Advances

FHLB advances were \$100.0 million and \$60.0 million at March 31, 2012 and June 30, 2011, respectively. At March 31, 2012, the stated interest rates on the Bank s advances from the FHLB ranged from 0.85% to 4.93% with a weighted average stated rate of 2.85%. At June 30, 2011, the stated interest rates on the Bank s advances from the FHLB ranged from 4.40% to 5.28%, with a weighted average stated rate of 4.86%.

The contractual maturities by fiscal year of the Bank s FHLB advances over the next five years are as follows (in thousands):

| Fiscal Year of Maturity | March 31, 2011 | June 30, 2011 |
|-------------------------|-------------------|------------------|
| 2012 | \$ 20,000 | \$ 40,000 |
| 2013 | 20,000 | 20,000 |
| 2014 | 0 | 0 |
| 2015 | 20,000 | 0 |
| 2016 and thereafter | 40,000 | 0 |
| | | |
| Total | \$ 100,000 | \$ 60,000 |

Note 8 Repurchase of Common Stock

In November 2011, the Board of Directors authorized a stock repurchase program pursuant to which the Company intends to repurchase up to 5% of issued and outstanding shares, or up to approximately 480,257 shares. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, the Company s liquidity requirements and alternative uses of capital. The stock repurchase program may be carried out through open-market purchases, block trades, negotiated private transactions and pursuant to a trading plan that has been adopted in accordance with Rule 10b5-1 of the Securities and Exchange Commission rules.

For the three and nine months ended March 31, 2012, the Company repurchased 377,739 and 435,075 shares at aggregate cost of \$5.2 million and \$5.9 million, net of commissions, respectively. The shares were repurchased at weighted average prices of \$13.68 and \$13.47 per share, respectively.

Note 9 Subsequent Events

On April 26, 2012, the Company announced the completion of the repurchase of 5% of its outstanding shares of common stock, or 480,257 shares under the stock repurchase program previously announced on November 30, 2011. The shares were repurchased at prices between \$12.00 and \$13.94 per share with an average price of \$13.51 per share.

Upon completion of the aforementioned stock repurchase program, the Board of Directors authorized the second stock repurchase program pursuant to which the Company intends to repurchase up to 5% of its issued and outstanding shares, or up to approximately 456,378 shares. The timing of the repurchases will depend on certain factors, including but not limited to, market conditions and prices, the Company s liquidity requirements and alternative uses of capital. The stock repurchase program may be carried out through open-market purchases, block trades, negotiated private transactions and pursuant to a trading plan that may be adopted in accordance with Rule 10b5-1 of the SEC s rules. Any repurchased shares will be available for general corporate purposes, including the funding of the Company s equity incentive plan.

27

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Forward-Looking Statements

This Quarterly Report on Form 10-Q contains certain forward-looking statements and information relating to the Company and the Bank that are based on the beliefs of management as well as assumptions made by and information currently available to management. Forward-looking statements can be identified by the fact that they do not relate strictly to historical or current facts. They often include words like believe, expect, anticipate, estimate, and intend or future or conditional verbs such as will, should, could, or may and similar expressions or the negative Certain factors that could cause actual results to differ materially from expected results include, changes in the interest rate environment, changes in general economic conditions, legislative and regulatory changes that adversely affect the business of Kaiser Federal Financial Group, Inc. and Kaiser Federal Bank, and changes in the securities markets. Should one or more of these risks or uncertainties materialize or should underlying assumptions prove incorrect, actual results may vary materially from those described herein. We caution readers not to place undue reliance on forward-looking statements. The Company disclaims any obligation to revise or update any forward-looking statements contained in this Form 10-Q to reflect future events or developments.

Market Area

Our success depends primarily on the general economic conditions in the California counties of Los Angeles, Orange, San Diego, San Bernardino, Riverside, Santa Clara and Alameda, as nearly all of our loans are to customers in this market area. Economic conditions remain weak both nationally and in our market area of California. We continue to experience distressed home prices and California in particular has experienced significant declines in real estate values. In addition, while both California and national unemployment rates improved during the nine month ended March 31, 2012, unemployment rates remain at historically high levels. In particular, California continues to experience elevated unemployment rates as compared to the national average. Unemployment rates in California were 11.0% in March 2012 as compared to 11.8% in June 2011. This compares to the national unemployment rate of 8.2% in March 2012 and 9.2% in June 2011.

Comparison of Financial Condition at March 31, 2012 and June 30, 2011.

Assets. Total assets increased \$88.5 million, or 10.3% to \$945.0 million at March 31, 2012 from \$856.4 million at June 30, 2011. The increase primarily reflected growth in cash and cash equivalents, securities available-for-sale and net loans receivable. The increase in assets was funded with Federal Home Loan Bank advances and increased deposits.

Cash and cash equivalents increased by \$49.1 million, or 54.8% to \$138.8 million at March 31, 2012 from \$89.7 million at June 30, 2011. The increase was primarily due to an increase in FHLB advances and deposits partially offset by purchases of securities. Cash and cash equivalents remain at historically elevated levels as we continue deploying capital received from the second-step stock offering. We expect to leverage our capital in the future with increased loan originations and purchases, as well as the repurchase of Company stock.

Securities available-for-sale increased by \$42.0 million, or 261.6%, to \$58.0 million at March 31, 2012 from \$16.0 million at June 30, 2011 due to the purchase of \$57.3 million in securities, offset by \$15.3 million in maturities, principal repayments, and amortization on our mortgage-backed securities and collateralized mortgage obligations. During the nine months ended March 31, 2012, the purchased securities included six government-sponsored enterprise (GSE) mortgage backed securities with a fair value of \$20.9 million in the aggregate and carried a weighted average yield of 2.49% and seven GSE collateralized mortgage obligations with a fair value of \$29.2 million in the aggregate and carried a weighted average yield of 0.98%. The purchased investments were funded with FHLB advances.

28

Our net loan portfolio increased by \$11.1 million, or 1.6% to \$707.8 million at March 31, 2012 from \$696.6 million at June 30, 2011 due primarily to the purchase of adjustable and fixed rate one-to-four family real estate loans in the amount of \$47.8 million net of a \$1.0 million purchase premium, partially offset by loan maturities and repayments of \$36.8 million. One-to-four family real estate loans increased \$35.0 million, or 12.4% to \$317.1 million at March 31, 2012 from \$282.1 million at June 30, 2011. Multi-family loans decreased \$8.4 million, or 2.9% to \$279.4 million at March 31, 2012 from \$287.8 million at June 30, 2011. Commercial real estate loans decreased \$18.9 million, or 17.5% to \$89.1 million at March 31, 2012 from \$108.0 million at June 30, 2011. Other loans, which were comprised primarily of automobile and unsecured loans decreased \$718,000, or 2.4% to \$28.8 million at March 31, 2012 from \$29.6 million at June 30, 2011. Real estate loans comprised 96.0% of the total loan portfolio at March 31, 2012, compared with 95.8% at June 30, 2011.

The allowance for loan losses decreased by \$3.5 million, or 30.3% to \$7.9 million at March 31, 2012 from \$11.4 million at June 30, 2011. The decrease was due primarily to \$2.2 million in charge-offs of previously identified specific valuation allowances on loans generally six months or more delinquent or otherwise deemed uncollectible. Prior to the quarter ended December 31, 2011, specific valuation allowances were carried in the allowance for loan losses and charged-off at foreclosure. Loans charged-off during the nine months ended March 31, 2012 totaled \$3.6 million as compared to \$2.6 million for the nine months ended March 31, 2011. While charge-offs increased, historical loss ratios declined as specific valuation allowances were included in the historical loss experience ratios in the earlier periods they were originally identified.

Deposits. Total deposits increased \$48.2 million, or 7.6% to \$682.9 million at March 31, 2012 from \$634.7 million at June 30, 2011. The growth was comprised of increases of \$16.3 million in noninterest bearing deposits and \$31.8 million in interest bearing deposits. The \$31.8 million increase in interest bearing deposits consisted of a \$16.8 million, or 12.8%, increase in money market accounts from \$132.0 million at June 30, 2011 to \$148.8 million at March 31, 2012; a \$10.7 million, or 8.0%, increase in savings account from \$133.9 million at June 30, 2011 to \$144.6 million at March 31, 2012; a \$222,000, or 0.1%, increase in certificates of deposit from \$311.3 million at June 30, 2011 to \$311.6 million at March 31, 2012; and the introduction of a new interest-bearing checking product with a balance of \$4.1 million at March 31, 2012. The increase in noninterest bearing deposits was typical this time of year due to tax refunds as well as an extra payroll deposit received by a significant number of our customers at the end of the quarter. The increase in interest bearing deposits was primarily a result of the introduction of new money market and interest-bearing checking products as well as continued growth in existing money market and savings products. Money market and savings accounts have steadily increased as certain customers prefer the short-term flexibility of non-certificate accounts in a low interest rate environment.

Borrowings. FHLB advances increased to \$100.0 million at March 31, 2012 as compared to \$60.0 million at June 30, 2011. During the nine months ended March 31, 2012, the Bank borrowed \$60.0 million in FHLB advances at a weighted average cost of 1.64%. This borrowing was partially offset by \$20.0 million in FHLB advance maturities. The increase in borrowings has allowed the Bank to improve its interest rate risk position by locking in longer term funding as the weighted average term on the new borrowings is five years.

Stockholders Equity. Stockholders equity decreased \$1.3 million to \$156.1 million at March 31, 2012 from \$157.4 million at June 30, 2011. The decrease in stockholders equity was primarily attributable to shares repurchased during the nine months ended March 31, 2012 pursuant to the stock repurchase program and cash dividends paid offset by earnings.

29

Average Balances, Net Interest Income, Yields Earned and Rates Paid

The following table sets forth certain information for the three months ended March 31, 2012 and 2011, respectively.

⁽³⁾ Calculated based on amortized cost.

⁽⁴⁾ Net interest income divided by interest-earning assets.

Comparison of Results of Operations for the Three Months Ended March 31, 2012 and March 31, 2011.

General. Net income for the three months ended March 31, 2012 was \$1.6 million, a decrease of \$614,000 as compared to net income of \$2.3 million for the three months ended March 31, 2011. Earnings per basic and diluted common share were \$0.18 for the three months ended March 31, 2012, compared to \$0.25 for the three months ended March 31, 2011. The decrease in net income was primarily due to a decrease in net interest income and an increase in noninterest expense partially offset by a decrease in income tax expense.

Interest Income. Interest income decreased \$770,000, or 7.2%, to \$9.9 million for the three months ended March 31, 2012 from \$10.7 million for the three months ended March 31, 2011. The decrease in interest income was primarily due to a decline in interest and fees on loans of \$916,000 to \$9.7 million for the three months ended March 31, 2012 from \$10.6 million for the three months ended March 31, 2011. The decrease in interest and fees on loans was primarily due to a decline in the average balance of loans receivable which decreased by \$16.2 million to \$700.3 million for the three months ended March 31, 2012 from \$716.5 million for the three months ended March 31, 2011, and a decrease of 38 basis points in the average yield on loans from 5.90% for the three months ended March 31, 2011 to 5.52% for the three months ended March 31, 2012. The decrease in the average yield on loans was primarily a result of lower yields earned on loan originations during the period as a result of the low interest rate environment.

Partially offsetting the decrease in interest and fees on loans was an increase in interest on securities of \$144,000, or 334.9%, to \$187,000 for the three months ended March 31, 2012 from \$43,000 for the three months ended March 31, 2011. The increase in interest income on securities was primarily due to an increase in the average balance of securities of \$57.4 million to \$62.2 million for the three months ended March 31, 2012 from \$4.8 million for the three months ended March 31, 2011 due to new securities purchased.

Interest Expense. Interest expense decreased \$598,000, or 18.9% to \$2.6 million for the three months ended March 31, 2012 from \$3.2 million for the three months ended March 31, 2011. The decrease was primarily attributable to a 45 basis point decline in the average cost of interest bearing liabilities to 1.47% for the three months ended March 31, 2012 from 1.92% for the three months ended March 31, 2011 as a result of low interest rates during the period. The decrease in interest expense reflected a significant reduction in the cost of funds such as interest on deposits and borrowings as a result of the low interest rate environment and repayment of higher costing FHLB advances which were replaced by lower costing advances.

Provision for Loan Losses. There was no provision for loan losses for the three months ended March 31, 2012 and March 31, 2011, respectively. The lack of a provision in both quarters was a result of a decline in historical loss ratios and peer group loss factors on loans collectively evaluated for impairment. Delinquent loans 60 days or more decreased to \$10.0 million, or 1.4% of total loans, at March 31, 2012 from \$10.5 million, or 1.48% of total loans, at June 30, 2011. Non-performing loans decreased to \$25.1 million, or 3.50% of total loans, at March 31, 2012 from \$26.4 million, or 3.73% of total loans, at June 30, 2011. Annualized net charge-offs decreased to 0.15% of average outstanding loans for the three months ended March 31, 2012 as compared to 0.26% of average outstanding loans for the three months ended March 31, 2011.

While the net provision for loan losses was zero for the three months ended March 31, 2012, it was comprised of a \$117,000 provision on one-to-four family real estate loans, a \$92,000 reduction in provision on multi-family loans, a \$33,000 reduction in provision on commercial real estate loans, a \$16,000 reduction in provision on automobile loans, a \$21,000 provision on home equity loans and a \$3,000 provision on other loans. The reduction in provision on multi-family loans was primarily due to a decline in the overall historical peer group loss factors on loans collectively evaluated for impairment, and a reduction in the valuation allowance on multi-family loans that were individually evaluated for impairment. The provision reflects management s continuing assessment of the credit quality of the Company s loan portfolio, which is affected by various trends, including current economic conditions.

Noninterest Income. Our noninterest income decreased slightly by \$64,000, or 5.5% to \$1.1 million for the three months ended March 31, 2012 from \$1.2 million for the three months ended March 31, 2011. The decrease in noninterest income was primarily a result of an increase in a loss on an equity method investment in an affordable housing fund partially offset by an increase in ATM fees and charges.

32

Noninterest Expense. Our noninterest expense increased \$835,000, or 16.7% to \$5.8 million for the three months ended March 31, 2012 from \$5.0 million for the three months ended March 31, 2011. The increase in noninterest expense was primarily due to an increase in salaries and benefits of \$517,000, or 21.3%, to \$2.9 million for the three months ended March 31, 2012 from \$2.4 million for the three months ended March 31, 2011; an increase in professional services of \$107,000, or 21.1%, to \$615,000 for the three months ended March 31, 2012 from \$508,000 for the three months ended March 31, 2011; and an increase in REO and foreclosure expenses of \$130,000 from \$32,000 for the three months ended March 31, 2011 to \$162,000 for the three months ended March 31, 2012. The increase in salaries and benefits was a result of an increase in employees hired primarily in the areas of eCommerce and Lending. Employees hired in eCommerce will focus on expanding customer relationships through enhanced eCommerce delivery channels such as online and mobile banking as well as bill payment services. We have also hired seasoned loan officers, underwriters and support staff in the income property and one-to-four family origination departments. Professional services increased due to an increase in financial advisory, strategic and leadership advisory services as well as recruitment costs. The increase in REO and foreclosure expenses was primarily due to an increase of \$118,000 in foreclosure expenses from \$44,000 for the three months ended March 31, 2011 to \$162,000 for the three months ended March 31, 2012.

Income Tax Expense. Income tax expense decreased \$457,000, or 32.0% to \$972,000 for the three months ended March 31, 2012 compared to \$1.4 million for the three months ended March 31, 2011. This decrease was primarily the result of lower pretax income for the three months ended March 31, 2012 compared to the three months ended March 31, 2011. The effective tax rates were 37.1% and 38.7% for the three months ended March 31, 2012 and 2011, respectively.

Comparison of Results of Operations for the Nine Months Ended March 31, 2012 and March 31, 2011.

General. Net income for the nine months ended March 31, 2012 was \$5.7 million, a decrease of \$547,000 as compared to net income of \$6.3 million for the nine months ended March 31, 2011. Earnings per basic and diluted common share were \$0.63 for the nine months ended March 31, 2012, compared to \$0.68 for the nine months ended March 31, 2011. The decrease in net income resulted primarily from an increase in noninterest expense offset by an increase in net interest income, a reduction in the provision for loan losses, and a decrease in income tax expense.

Interest Income. Interest income decreased \$2.5 million, or 7.5%, to \$30.6 million for the nine months ended March 31, 2012 from \$33.1 million for the nine months ended March 31, 2011. The decrease in interest income was primarily due to a decline in interest and fees on loans of \$2.8 million to \$29.8 million for the nine months ended March 31, 2012 from \$32.7 million for the nine months ended March 31, 2011. The decrease in interest and fees on loans was primarily due to a decline in the average balance of loans receivable of \$33.3 million to \$701.3 million for the nine months ended March 31, 2012 from \$734.7 million for the nine months ended March 31, 2011, and a decrease of 26 basis points in the average yield on loans from 5.93% for the nine months ended March 31, 2011 to 5.67% for the nine months ended March 31, 2012. The decrease in the average yield on loans was primarily a result of lower yields earned on loan originations during the period as a result of the low interest rate environment.

Partially offsetting the decrease in interest and fees on loans was an increase in interest on securities of \$358,000, or 219.6%, to \$521,000 for the nine months ended March 31, 2012 from \$163,000 for the nine months ended March 31, 2011. The increase in interest income on securities was primarily due to an increase in the average balance of securities of \$40.0 million to \$45.1 million for the nine months ended March 31, 2012 from \$5.2 million for the nine months ended March 31, 2011 due to new securities purchased.

Interest Expense. Interest expense decreased \$2.7 million, or 25.0% to \$8.2 million for the nine months ended March 31, 2012 from \$10.9 million for the nine months ended March 31, 2011. The decrease was primarily attributable to a 53 basis point decline in the average cost of interest bearing liabilities to 1.59% for the nine months ended March 31, 2012 from 2.12% for the nine months ended March 31, 2011 as a result of low interest rates during the period. The decrease in interest expense reflected a significant reduction in the cost of funds such as interest on deposits and borrowings as a result of the low interest rate environment and repayment of higher costing FHLB advances which were replaced by lower costing advances.

Provision for Loan Losses. There was no provision for loan losses for the nine months ended March 31, 2012 as compared to \$950,000 in provision for loan losses for the nine months ended March 31, 2011. The decline in overall provision was a result of a decline in historical loss ratios and peer group loss factors on loans collectively evaluated for impairment. During the nine months ended March 31, 2012, we charged-off \$2.2 million of previously identified specific valuation allowances on loans generally six months or more delinquent. While the charge-offs resulted in an increase in annualized charge-offs to 0.65% of average outstanding loans for the nine months ended March 31, 2012 as compared to 0.43% of average outstanding loans for the nine months ended March 31, 2011, historical loss ratios declined as specific valuation allowances were included in the historical loss factors in the periods they were originally identified.

While the net provision for loan losses was zero for the nine months ended March 31, 2012, it was comprised of a \$844,000 provision on one-to-four family loans, a \$62,000 provision on multi-family loans, a \$935,000 reduction in provision on commercial real estate loans, a \$54,000 provision on automobile loans, a \$54,000 provision on home equity loans and a \$29,000 provision on other loans. The reduction in provision on commercial real estate loans was primarily due to a decline in the overall historical peer group loss factors on loans collectively evaluated for impairment, a decline in the balance of commercial real estate loans collectively evaluated for impairment and a reduction in the valuation allowance on commercial real estate loans that were individually evaluated for impairment. The provision reflects management s continuing assessment of the credit quality of the Company s loan portfolio, which is affected by various trends, including current economic conditions.

Noninterest Income. Our noninterest income decreased slightly by \$47,000, or 1.4% to \$3.3 million for the nine months ended March 31, 2012 from \$3.4 million for the nine months ended March 31, 2011. The decrease in noninterest income was primarily due to a decrease in service charges and fees and an increase in a loss on an equity method investment in an affordable housing fund, partially offset by an increase in ATM fees and charges.

Noninterest Expense. Our noninterest expense increased \$2.1 million, or 14.1% to \$16.6 million for the nine months ended March 31, 2012 from \$14.5 million for the nine months ended March 31, 2011. The increase in noninterest expense was primarily due to an increase in salaries and benefits of \$1.5 million, or 21.0%, to \$8.4 million for the nine months ended March 31, 2012 from \$6.9 million for the nine months ended March 31, 2011, an increase in professional services of \$457,000, or 40.7%, to \$1.6 million for the nine months ended March 31, 2012 from \$1.1 million for the nine months ended March 31, 2011, an increase in occupancy and equipment expenses of \$188,000, or 10.4%, to \$2.0 million for the nine months ended March 31, 2012 from \$1.8 million for the nine months ended March 31, 2011 and an increase in ATM expenses of \$173,000, or 12.7%, to \$1.5 million for the nine months ended March 31, 2012 from \$1.4 million for the nine months ended March 31, 2011. The increase in salaries and benefits was a result of an increase in employees hired primarily in the areas of eCommerce and Lending. Employees hired in eCommerce will focus on expanding customer relationships through enhanced eCommerce channels such as online and mobile banking as well as bill payment services. We have also hired seasoned loan officers, underwriters and support staff in the income property and one-to-four family origination departments. Professional services increased due to an increase in financial advisory, strategic and leadership advisory services as well as recruitment costs. Occupancy and equipment expenses increased due primarily to the relocation of two branches. ATM expenses increased due to costs associated with ATM upgrades as a result of new regulatory compliance standards.

Income Tax Expense. Income tax expense decreased \$357,000, or 9.3% to \$3.5 million for the nine months ended March 31, 2012 compared to \$3.8 million for the nine months ended March 31, 2011. This decrease was primarily the result of lower pretax income for the nine months ended March 31, 2012 compared to the nine months ended March 31, 2011. The effective tax rates were 37.6% and 37.1% for the nine months ended March 31, 2012 and 2011, respectively.

34

Asset Quality

General. We continue our disciplined lending practices including our strict adherence to a long standing regimented credit culture that emphasizes the consistent application of underwriting standards to all loans. In this regard, we fully underwrite all loans based on an applicant s employment history, credit history and an appraised value of the subject property. With respect to loans we purchase, we underwrite each loan based upon our own underwriting standards prior to making the purchase.

The following underwriting guidelines, among other things, have been used by us as underwriting tools to further limit our potential loss exposure:

All variable rate one-to-four family residential loans are underwritten using the fully indexed rate.

We only lend up to 80% of the lesser of the appraised value or purchase price for one-to-four family residential loans without private mortgage insurance (PMI), up to 95% with PMI.

We only lend up to 75% of the lesser of the appraised value or purchase price for multi-family residential loans.

We only lend up to 65% of the lesser of the appraised value or purchase price for commercial real estate loans. Additionally, our portfolio has remained strongly anchored in traditional mortgage products. We do not originate or purchase construction and development loans, teaser option-ARM loans, negatively amortizing loans or high loan-to-value loans.

All of our real estate loans are secured by properties located in California. The following tables set forth our real estate loans and non-accrual real estate loans by county:

| County | | o-four family | Multi-family residential | Commercial | Total | Percent | | | | | |
|------------------------|----|---------------|--------------------------|------------|------------|---------|--|--|--|--|--|
| (Dollars in thousands) | | | | | | | | | | | |

| Total | \$ 18,375 | \$ 2,430 | \$ 4,234 | \$ 25,039 | 3.65% |

At March 31, 2012, \$179.7 million, or 56.7% of our one-to-four family residential mortgage portfolio was serviced by others. Due to a number of factors, including the high level of delinquent loans nationwide, certain third party servicers have been unable to service and in certain circumstances foreclose on properties in a timely manner. Currently, we track the servicing of these loans on our core mortgage servicing system. We have hired additional experienced mortgage loan workout staff and reallocated existing staff to monitor the collection activity of the servicers and perform direct customer outreach when a loan falls 30 days past due. In many instances, our role has been to provide direction to the third party servicers regarding loan modification requests and to develop collection plans for individual loans, while maintaining contact with the borrower.

Delinquent one-to-four family loans 60 days or more totaled \$9.2 million at March 31, 2012, of which, \$8.6 million or 93.0% are serviced by two servicers. We previously filed legal suit seeking to obtain the transfer of servicing rights on \$138.6 million of loans serviced by them to us, and we have entered into an agreement with one of the servicers to transfer \$56.0 million in servicing to us in May 2012. Included in the \$56.0 million in loans serviced are \$6.1 million in delinquent loans 60 days or more at March 31, 2012. Once the servicing is transferred back, we will be able to actively manage the delinquent loans and foreclosure activity to further improve our overall credit quality. We are currently in settlement negotiations with the other servicer.

The following table presents information concerning the composition of the one-to-four family residential loan portfolio by servicer at March 31, 2012:

| | Amount | Percent (Dollars | Non-accrual in thousands) | Percent of Non- accrual to Loans in Each Category |
|---|------------|---------------------|------------------------------|---|
| Purchased and serviced by others | \$ 179,677 | 56.67% | \$ 13,512 | 7.52% |
| Purchased and servicing transferred to us | 20,773 | 6.55 | 2,770 | 13.34 |
| Originated and serviced by us | 116,628 | 36.78 | 2,093 | 1.79 |
| Total | \$ 317,078 | 100.00% | \$ 18,375 | 5.80% |

Delinquent loans 60 days or more past due totaled \$10.0 million or 1.4% of total loans at March 31, 2012 as compared to \$10.5 million or 1.48% of total loans at June 30, 2011. Delinquent one-to-four family residential loans increased to \$9.2 million at March 31, 2012 from \$7.6 million at June 30, 2011. The increase in delinquent loans 60 days or more primarily related to the lack of collection efforts on loans serviced by two servicers that we previously filed legal suit against. Delinquent multi-family loans decreased to \$744,000 at March 31, 2012 from \$2.2 million at June 30, 2011. The decrease in delinquent multi-family loans was a result of a loan foreclosed on and sold by the Bank, and the charge-off of a previously identified specific valuation allowance on another loan. Delinquent commercial loans decreased to zero at March 31, 2012 from \$637,000 at June 30, 2011 as a result of a loan foreclosed on by the Bank as of March 31, 2012.

Non-Performing Assets. Non-performing assets consist of non-accrual loans and foreclosed assets. All loans past due 90 days and over are classified as non-accrual. Loans to a customer whose financial condition has deteriorated are considered for non-accrual status whether or not the loan is 90 days and over past due. On non-accrual loans, interest income is not recognized until actually collected. At the time the loan is placed on non-accrual status, interest previously accrued but not collected is reversed and charged against current income. Non-accrual loans also include troubled debt restructurings that are on non-accrual status.

Non-accrual loans continue to remain at historically elevated levels as a result of the decline in the housing market as well as the prolonged levels of high unemployment in our market area. We have worked with responsible borrowers to keep their properties and as a result, as of March 31, 2012, we have restructured \$11.8 million in mortgage loans of which \$10.4 million were performing in accordance with their revised contractual terms. This compares to \$12.9 million in restructured loans at June 30, 2011. Of the \$11.8 million in restructured loans, \$11.0 million were reported as non-accrual at March 31, 2012. Troubled debt restructured loans are included in non-accrual loans until there is a sustained period of payment performance (usually six months or longer and determined on a case by case basis) and there is a reasonable assurance that the payment will continue. There were no further commitments to customers whose loans were troubled debt restructurings at March 31, 2012.

Any changes or modifications made to loans are carefully reviewed to determine whether they are troubled debt restructurings. The modification of the terms of loans that are reported as troubled debt restructurings included one or a combination of the following: a reduction of the stated interest rate of the loan; an extension of the maturity date at a stated rate of interest lower than the current market rate for new debt with similar risk; or a permanent reduction of the recorded investment in the loan. There are other changes or modifications made for borrowers who are not experiencing financial difficulties. During the three and nine months ended March 31, 2012, there were 21 and 49 loans that were modified and not accounted for as troubled debt restructurings in the amount of \$14.5 million and \$29.2 million, respectively. The modifications were made to refinance the credits to maintain the borrowing relationships and generally consisted of term or rate modifications. The borrowers were not experiencing financial difficulty and the modifications were made at market terms.

Real Estate Owned. Real estate owned and repossessed assets consist of real estate and other assets which have been acquired through foreclosure on loans. At the time of foreclosure, assets are recorded at fair value less estimated selling costs, with any write-down charged against the allowance for loan losses. The fair value of real estate owned is determined by a third party appraisal of the property.

38

The following table sets forth the amounts and categories on our non-performing assets at the dates indicated (in thousands).

| | | | | | | |

⁽¹⁾ Total loans are net of deferred fees and costs

⁽²⁾ If interest on the loans classified as non-accrual had been accrued, interest income in these amounts would have been recorded. At March 31, 2012, there were four multi-family residential loans on non-accrual. The first multi-family residential loan was made to one borrower with a principal balance of \$744,000, net of charge-off, at March 31, 2012 located in Adelanto, California. During the nine months ended March 31, 2012, we charged-off \$1.0 million of previously identified specific valuation allowances on this loan as it was over 90 days delinquent and had a court appointed receiver in place to manage the property and collect the rents during the judicial foreclosure process. The second multi-family residential loan was made to one borrower with a principal balance of \$814,000 at March 31, 2012 located in San Bernardino, California, which was current at March 31, 2012 but was previously delinquent. The property value is slightly lower than the current loan balance and accordingly, a valuation allowance of \$53,000 was applied to this loan at March 31, 2012. The remaining two multi-family residential loans on non-accrual were in the amount of \$872,000 in the aggregate and were troubled debt restructurings at March 31, 2012 with a valuation allowance of \$97,000.

At March 31, 2012, we had two non-accruing commercial real estate loans with an aggregate balance of \$4.2 million. The first commercial real estate loan had a principal balance of \$1.6 million secured by an office building in Los Angeles County, California, which was current at March 31, 2012 but has experienced cash flow problems. Accordingly, a valuation allowance of \$277,000 was applied to this loan at March 31, 2012. The second commercial real estate loan had a principal balance of \$2.6 million secured by a strip mall in San Diego, California. This loan was current and was a troubled debt restructuring at March 31, 2012. The level of non-accrual loans is taken into consideration in our determination of the allowance for loan losses at March 31, 2012. Non-accrual loans are assessed to determine impairment. Loans that are found to be impaired are individually evaluated and a valuation allowance is applied.

Classified Assets. We regularly review potential problem assets in our portfolio to determine whether any assets require classification in accordance with applicable regulations. The total amount of classified and special mention assets represented 36.41% of our equity capital and 6.02% of our total assets at March 31, 2012, as compared to 28.66% of our equity capital and 5.27% of our total assets at June 30, 2011. At March 31, 2012 and June 30, 2011, there were \$25.0 million and \$26.4 million in non-accrual loans included in classified assets, respectively.

The aggregate amount of our classified and special mention assets at the dates indicated were as follows (in thousands):

| | | March 31, 2012 | | e 30, 11 |
|--|-------|-------------------|-------|-------------|
| Classified and Special Mention Assets: | | | | |
| Loss | \$ | 10 | \$ | 5 |
| Doubtful | | 18 | | 29 |
| Substandard | 35 | 5,102 | 34 | ,043 |
| Special Mention | 21 | ,721 | 11 | ,026 |
| | | | | |
| Total | \$ 56 | 5,851 | \$ 45 | 5,103 |

Allowance for Loan Losses. We maintain an allowance for loan losses to absorb probable incurred losses inherent in the loan portfolio. The allowance is based on ongoing, quarterly assessments of the probable losses inherent in the loan portfolio. In accordance with generally accepted accounting principles the allowance is comprised of general valuation allowances and valuation allowances on loans individually evaluated for impairment.

Loans that are classified as impaired are individually evaluated. We consider a loan impaired when it is probable that we will be unable to collect all amounts due according to the terms of the loan agreement and determine impairment by computing a fair value either based on discounted cash flows using the loan s initial interest rate or the fair value of the collateral, less estimated selling costs, if the loan is collateral dependent. The general component covers non-impaired loans and is based both on our historical loss experience as well as significant factors that, in management s judgment, affect the collectability of the portfolio as of the evaluation date.

The general valuation allowance is calculated by applying loss factors to outstanding loans based on the internal risk evaluation of the loans or pools of loans. Changes in risk evaluations of both performing and non-performing loans affect the amount of the allowance. The appropriateness of the allowance is reviewed and established by management based upon its evaluation of then-existing economic and business conditions affecting key lending areas and other conditions, such as credit quality trends (including trends in non-performing loans expected to result from existing conditions), collateral values, loan volumes and concentrations, specific industry conditions and peer data within portfolio segments, and recent loss experience in particular segments of the portfolio that existed as of the balance sheet date and the impact that such conditions were believed to have had on the collectability of the loan. Significant factors reviewed in determining the allowance for loan losses included loss ratio trends by loan product; levels of and trends in delinquencies and impaired loans; levels of and trends in classified assets; levels of and trends in charge-offs and recoveries; trends in volume of loans by loan product; effects of changes in lending policies and practices; industry conditions and effects of concentrations in geographic regions and by third party servicers.

Valuation allowances on real estate loans that are individually evaluated for impairment are charged-off when management believes a loan or part of a loan is deemed uncollectible. Subsequent recoveries, if any, are credited to the allowance when received. A loan is generally considered uncollectible when the borrower s payment is six months or more delinquent. Prior to the quarter ended December 31, 2011, specific valuation allowances were charged-off at foreclosure.

Our multi-family and commercial real estate loans (income property) are less seasoned, and therefore, to-date we have not incurred material charge-offs and our delinquency history on income property loans has been less than our single-family real estate loans. In addition, the multi-family portfolio has been a significant growth area in our loan portfolio beginning in fiscal 2009. For income property loans we review the debt service coverage ratios, seasoning and peer group data. In fiscal 2010, we expanded our migration analysis to include the credit loss migration from published sources, including FDIC, in order to determine the allowance for loan losses on income property loans, given the characteristics of the peer group as compared to our portfolio. Due to the loss experience of our peer group over the past year, our analysis of debt service coverage ratios, and the limited growth of our income property compared to our prior year, the general valuation portion of our income property loan portfolio decreased by \$838,000 at March 31, 2012 compared to June 30, 2011.

Senior management reviews these conditions quarterly in discussions with our senior credit officers. To the extent that any of these conditions is evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management s estimate of the effect of such conditions may be reflected as an allowance specifically applicable to such credit or portfolio segment. Where any of these conditions is not evidenced by a specifically identifiable problem credit or portfolio segment as of the evaluation date, management s evaluation of the loss related to this condition is reflected in the general allowance. The evaluation of the inherent loss with respect to these conditions is subject to a higher degree of uncertainty because they are not identified with specific problem credits or portfolio segments.

Given that management evaluates the adequacy of the allowance for loan losses based on a review of individual loans, historical loan loss experience, the value and adequacy of collateral and economic conditions in our market area, this evaluation is inherently subjective as it requires material estimates, including the amounts and timing of future cash flows expected to be received on impaired loans that may be susceptible to significant change. Large groups of smaller balance homogeneous loans that are collectively evaluated for impairment and are excluded from loans individually evaluated for impairment; their allowance for loan losses is calculated in accordance with the allowance for loan losses policy described above.

Because the allowance for loan losses is based on estimates of losses inherent in the loan portfolio, actual losses can vary significantly from the estimated amounts. Our methodology as described above permits adjustments to any loss factor used in the computation of the formula allowance in the event that, in management s judgment, significant factors which affect the collectability of the portfolio as of the evaluation date are not reflected in the loss factors. By assessing the estimated losses inherent in the loan portfolio on a quarterly basis, we are able to adjust individual and inherent loss estimates based upon any more recent information that has become available. We continue to review our allowance for loan losses methodology for appropriateness to keep pace with the size and composition of the loans and the changing economic conditions and credit environment. We believe that our methodologies continue to be appropriate given our size and level of complexity. In addition, management s determination as to the amount of our allowance for loan losses is subject to review by the Office of the Comptroller of the Currency (OCC) and the FDIC,

41

which may require the establishment of additional general allowances or allowances on loans individually evaluated for impairment based upon their judgment of the information available to them at the time of their examination of our Bank.

Non-performing loans decreased \$1.3 million to \$25.1 million at March 31, 2012 from \$26.4 million at June 30, 2011. Non-performing loans to total loans declined to 3.5% at March 31, 2012 from 3.73% at June 30, 2011. The allowance for loan losses to non-performing loans was 31.61% at March 31, 2012 as compared to 43.06% at June 30, 2011. The decrease in non-performing loans and allowance for loan losses to non-performing loans was primarily attributable to \$2.2 million in charge-offs of previously identified specific valuation allowances on loans generally six months or more delinquent during the nine months ended March 31, 2012. The provision reflected management s continuing assessment of the credit quality of the Company s loan portfolio, which is affected by various trends, including current economic conditions.

The distribution of the allowance for losses on loans at the dates indicated is summarized as follows.

| | Marc | Ph 31, 2012 Percent of Loans in Each Category to | June | Percent of Loans in Each Category to |

| Total allowance for loan losses | \$ 7,928 | 100.00% | \$ 11,367 | 100.00% |

42

Liquidity, Capital Resources and Commitments

Liquidity may increase or decrease depending upon the availability of funds and comparative yields on investments in relation to the return on loans. Historically, we have maintained liquid assets at levels above the minimum requirements previously imposed by our regulator and above levels believed to be adequate to meet the requirements of normal operations, including potential deposit outflows. Cash flow projections are regularly reviewed and updated to assure that adequate liquidity is maintained.

Our liquidity, represented by cash and cash equivalents, interest earning accounts and mortgage-backed and related securities, is a product of our operating, investing and financing activities. Our primary sources of funds are deposits, amortization, prepayments and maturities of outstanding loans and mortgage-backed and related securities, and other short-term investments and funds provided from operations. While scheduled payments from the amortization of loans and mortgage-backed related securities and maturing investment securities and short-term investments are relatively predictable sources of funds, deposit flows and loan prepayments are greatly influenced by general interest rates, economic conditions, and competition. In addition, we invest excess funds in short-term interest earning assets, which provide liquidity to meet lending requirements. We also generate cash through borrowings. We utilize FHLB advances to leverage our capital base and provide funds for our lending and investment activities as well as enhance our interest rate risk management.

Liquidity management is both a daily and long-term function of business management. Excess liquidity is generally invested in short-term investments such as overnight deposits. On a longer-term basis, we maintain a strategy of investing in various lending products. We use our sources of funds primarily to meet ongoing commitments, to pay maturing certificates of deposit and savings withdrawals, to fund loan commitments and to maintain our portfolio of mortgage-backed and related securities. At March 31, 2012, total approved loan commitments amounted to \$7.0 million and the unadvanced portion of loans was \$2.2 million.

Certificates of deposit and advances from the FHLB of San Francisco scheduled to mature in one year or less at March 31, 2012, totaled \$109.2 million and \$40.0 million, respectively. Based on historical experience, management believes that a significant portion of maturing deposits will remain with Kaiser Federal Bank and we anticipate that we will continue to have sufficient funds, through deposits and borrowings, to meet our current commitments.

At March 31, 2012, we had available additional advances from the FHLB of San Francisco in the amount of \$272.8 million. We also had an available line of credit with the Federal Reserve Bank of San Francisco of \$61.5 million at March 31, 2012, which has not been drawn upon.

43

Contractual Obligations

In the normal course of business, we enter into contractual obligations that meet various business needs. These contractual obligations include certificates of deposit to customers, borrowings from the FHLB, lease obligations for facilities, and commitments to purchase and/or originate loans.

The following table summarizes our long-term contractual obligations at March 31, 2012 (in thousands).

| | Total | Less than 1 vear | 1 3 Years | Over 3 5 Years | More than 5 years |
|--|------------|---------------------|--------------|-------------------|-------------------|
| FHLB advances | \$ 100,000 | \$ 40,000 | \$ 20,000 | \$ 20,000 | \$ 20,000 |
| Operating lease obligations | 5,611 | 941 | 1,981 | 1,205 | 1,484 |
| Loan commitments to originate | 6,989 | 6,989 | 0 | 0 | 0 |
| Available home equity and unadvanced lines of credit | 2,210 | 2,210 | 0 | 0 | 0 |
| Certificates of deposit | 311,569 | 109,224 | 104,353 | 97,869 | 123 |
| | | | | | |
| Total commitments and contractual obligations | \$ 426,379 | \$ 159,364 | \$ 126,334 | \$ 119,074 | \$ 21,607 |

Off-Balance Sheet Arrangements

As a financial service provider, we routinely are a party to various financial instruments with off-balance sheet risks, such as commitments to extend credit and unused lines of credit. While these contractual obligations represent our future cash requirements, a significant portion of commitments to extend credit may expire without being drawn upon. Such commitments are subject to the same credit policies and approval process accorded to loans we make.

44

Capital

The table below sets forth Kaiser Federal Bank s capital position relative to its regulatory capital requirements at March 31, 2012 and June 30, 2011. The definitions of the terms used in the table are those provided in the capital regulations issued by the OCC.

Minimum required

Consistent with our goal to operate a sound and profitable financial organization, we actively seek to continue as a well capitalized institution in accordance with regulatory standards. At March 31, 2012, Kaiser Federal Bank was a well-capitalized institution under regulatory standards.

Impact of Inflation

The consolidated financial statements presented herein have been prepared in accordance with GAAP. These principles require the measurement of financial position and operating results in terms of historical dollars, without considering changes in the relative purchasing power of money over time due to inflation.

Our primary assets and liabilities are monetary in nature. As a result, interest rates have a more significant impact on our performance than the effects of general levels of inflation. Interest rates, however, do not necessarily move in the same direction or with the same magnitude as the price of goods and services, since such prices are affected by inflation. In a period of rapidly rising interest rates, the liquidity and maturity structure of our assets and liabilities are critical to the maintenance of acceptable performance levels.

The principal effect of inflation, as distinct from levels of interest rates, on earnings is in the area of noninterest expense. Such expense items as employee compensation, employee benefits and occupancy and equipment costs may be subject to increases as a result of inflation.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our Risk When Interest Rates Change. The rates of interest we earn on assets and pay on liabilities generally are established contractually for a period of time. Market interest rates change over time. Our fixed rate loans generally have longer maturities than our fixed rate deposits. Accordingly, our results of operations, like those of other financial institutions, are impacted by changes in interest rates and the interest rate sensitivity of our assets and liabilities. The risk associated with changes in interest rates and our ability to adapt to these changes is known as interest rate risk and is our most significant market risk.

How We Measure Our Risk of Interest Rate Changes. As part of our attempt to manage our exposure to changes in interest rates and comply with applicable regulations, we monitor our interest rate risk. In monitoring interest rate risk we continually analyze and manage assets and liabilities based on their payment streams and interest rates, the timing of their maturities, and their sensitivity to actual or potential changes in market interest rates.

In order to minimize the potential for adverse effects of material and prolonged increases in interest rates on our results of operations, we have adopted investment/asset and liability management policies to better match the maturities and repricing terms of our interest-earning assets and interest-bearing liabilities. The board of directors—sets and recommends the asset and liability policies of Kaiser Federal Bank, which are implemented by the asset/liability management committee.

The purpose of the asset/liability management committee is to communicate, coordinate and control asset/liability management consistent with our business plan and board approved policies. The committee establishes and monitors the volume and mix of assets and funding sources taking into account relative costs and spreads, interest rate sensitivity and liquidity needs. The objectives are to manage assets and funding sources to produce results that are consistent with liquidity, capital adequacy, growth, risk, and profitability goals.

The asset/liability management committee generally meets at least monthly to review, among other things, economic conditions and interest rate outlook, current and projected liquidity needs and capital position, anticipated changes in the volume and mix of assets and liabilities and interest rate risk exposure limits versus current projections pursuant to net present value of portfolio equity analysis and income simulations. The asset/liability management committee recommends appropriate strategy changes based on this review. The chairman or his designee is responsible for reviewing and reporting on the effects of the policy implementations and strategies to the board of directors at least monthly.

In order to manage our assets and liabilities and achieve the desired liquidity, credit quality, interest rate risk, profitability and capital targets, we have focused our strategies on: (1) maintaining an adequate level of adjustable rate loans; (2) originating a reasonable volume of short-term and intermediate-term loans; (3) managing our deposits to establish stable deposit relationships; and (4) using FHLB advances, and pricing on fixed-term non-core deposits to align maturities and repricing terms.

At times, depending on the level of general interest rates, the relationship between long-term and short-term interest rates, market conditions and competitive factors, the asset/liability management committee may determine to increase our interest rate risk position somewhat in order to maintain our net interest margin.

The asset/liability management committee regularly reviews interest rate risk by forecasting the impact of alternative interest rate environments on net interest income and economic value of portfolio equity, which is defined as the net present value of an institution s existing assets, liabilities and off-balance sheet instruments, and evaluating such impacts against the maximum potential changes in net interest income and economic value of portfolio equity that are authorized by the board of directors of Kaiser Federal Bank.

An independent third party provides Kaiser Federal Bank with the information presented in the following table, which is based on information provided by Kaiser Federal Bank. It presents the change in Kaiser Federal Bank s net portfolio value at March 31, 2012 that would occur upon an immediate change in interest rates without giving effect to any steps that management might take to counteract that change.

March 31, 2012 Estimated Increase (Decrease) NPV as a percentage of Present in NPV Value of Assets (3)

| Change in Interest Rates (basis points) (1) | Estimated NPV (2) | Amount (Dol | Percent lars in thousan | NPV ratio (4) ds) | Increase (Decrease) (basis points) |
|---|----------------------|----------------|----------------------------|-------------------|--|
| +300 | \$ 124,887 | \$ (16,563) | (11.71)% | 13.77% | (69) |
| +200 | 132,340 | (9,110) | (6.44) | 14.21 | (24) |
| +100 | 138,012 | (3,438) | (2.43) | 14.45 | (1) |
| 0 | 141,450 | 0 | 0.00 | 14.45 | 0 |
| -100 | 140,776 | (674) | (0.48) | 14.11 | (35) |

- (1) Assumes an instantaneous uniform change in interest rates at all maturities.
- (2) NPV is the discounted present value of expected cash flows from assets, liabilities and off-balance sheet contracts.
- (3) Present value of assets represents the discounted present value of incoming cash flows on interest-earning assets.
- (4) NPV Ratio represents NPV divided by the present value of assets.

The analysis uses certain assumptions in assessing interest rate risk. These assumptions relate to interest rates, loan prepayment rates, deposit decay rates, and the fair values of certain assets under differing interest rate scenarios, among other things.

As with any method of measuring interest rate risk, shortcomings are inherent in the method of analysis presented in the foregoing tables. For example, although assets and liabilities may have similar maturities or periods to repricing, they may react in different degrees to changes in the market interest rates. Also, the interest rates on certain types of assets and liabilities may fluctuate in advance of changes in market interest rates, while interest rates on other types may lag behind changes in market rates. Additionally, certain assets, such as adjustable rate mortgage loans, have features, that restrict changes in interest rates on a short-term basis and over the life of the asset. Further, if interest rates change, expected rates of prepayments on loans and early withdrawals from certificates of deposit could deviate significantly from those assumed in calculating the table.

Item 4. Controls and Procedures

Our management evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures (as defined in Rule 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Act)) as of the end of the period covered by this report. The Company s Chief Executive Officer and Chief Financial Officer concluded that the Company s disclosure controls and procedures as of the end of the period covered by this report are effective in ensuring that the information required to be disclosed by the Company in the reports it files or submits under the Act is (i) accumulated and communicated to the Company s management (including the Chief Executive Officer and Chief Financial Officer) in a timely manner, and (ii) recorded, processed, summarized, and reported within the time periods specified in the SEC s rules and forms.

There have been no changes in our internal control over financial reporting (as defined in Rule 13a-15(f) under the Act) that occurred during the quarter ended March 31, 2012 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. OTHER INFORMATION

Item 1. Legal Proceedings

From time to time, we are involved as plaintiff or defendant in various legal actions arising in the normal course of business. We do not anticipate incurring any material liability as a result of this litigation or any material impact on our financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes to the risk factors that were previously disclosed in the Company s annual report on Form 10-K for the fiscal year ended June 30, 2011.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Purchases of Equity Securities by the Issuer

| | | | Weight | ted Average | Total Number of Shares | Maximum Number of Shares That May Yet be |
|---------|----------|------------------|--------|-------------|---------------------------|---|
| | | Total Number of | 8 | Paid Per | Purchased as Part of | Purchased Under |
| Period | | Shares Purchased | 9 | Share | Publicly Announced Plans* | the Plan |
| 01/1/12 | 01/31/12 | 0 | \$ | 0 | 0 | 422,921 |
| 02/1/12 | 02/29/12 | 77,739 | | 13.19 | 135,075 | 345,182 |
| 03/1/12 | 03/31/12 | 300,000 | | 13.88 | 435.075 | 45,182 |

^{*} On November 29, 2011, the Company announced its intention to repurchase up to 5% of its issued and outstanding shares, or up to approximately 480,257 shares. 377,739 and 435,075 shares were purchased under this plan in the three and nine months ended March 31, 2012.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

Not applicable

Item 5. Other Information

None.
