Item 8.01 Other Events.

As noted in Item 7.01 above, on June 17, 2013, the Company issued a press release with certain operational updates. Highlights of the release are as follows:

Since the release of the first quarter 2013 financial and operating results, the Company's management has completed a comprehensive review of the Company's operations. After re-designing the pits to reflect lower gold prices, the Company believes that operations are viable in the current gold price environment and that existing cash and cash flow from operations can cover its sustaining capital requirements for 2013.

The Company's 2013 gold production estimate is now expected to range from 290,000 ounces to 310,000 ounces of gold. Cash operating costs are expected to remain in the range of \$1,050 to \$1,150 per ounce.

Year-to-date production through June 12, 2013 is approximately 154,000 ounces of gold. The Company's current cash position as of June 17, 2013 is approximately \$51 million.

The Company's total capital expenditure for 2013 is now expected to be approximately \$74 million, with sustaining capital reduced to \$40 million and development capital reduced to \$34 million. Exploration spending for 2013 is now expected to be approximately \$16.5 million. The Company plans to reduce operating costs by an estimated \$45 million.
