## WisdomTree Government/Corporate Bond Zero Duration Fund

### Fund Summary

#### Investment Objective

The WisdomTree Government/Corporate Bond Zero Duration Fund (the Fund) seeks to track the price and yield performance, before fees and expenses, of the WisdomTree Government/Corporate Bond Zero Duration Index (the Index).

#### Fees and Expenses of the Fund

The following table describes the fees and expenses you may pay if you buy and hold shares of the Fund. The fees are expressed as a percentage of the Fund's average net assets.

<b>Shareholder Fees</b> (fees paid directly from your investment)	None
<b>Annual Fund Operating Expenses</b> (expenses that you pay each year as a percentage of the value of your investment)	
Management Fees	[ ]%
Distribution and/or Service (12b-1) Fees	None
Other Expenses*	0.00%
<b>Total Annual Fund Operating Expenses</b>	[ ]%

\* Other Expenses are based on estimated amounts for the current fiscal year.

#### Example

The following example is intended to help retail investors compare the cost of investing in the Fund with the cost of investing in other funds. It illustrates the hypothetical expenses that such investors would incur over various periods if they were to invest \$10,000 in the Fund for the time periods indicated and then redeem all of the shares at the end of those periods. This example assumes that the Fund provides a return of 5% a year and that operating expenses remain the same. This example does not include the brokerage commissions that retail investors may pay to buy and sell shares of the Fund. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

	1 Year	3 Years
	[\$ [ ]]	[\$ [ ]]

#### Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or turns over its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, affect the Fund's performance. Because the Fund is newly organized, portfolio turnover information is not yet available.

#### Principal Investment Strategies of the Fund

The Fund employs a passive management or indexing investment approach designed to track the performance of the Index. The Fund generally uses a representative sampling strategy to achieve its investment objective, meaning it generally will invest in a sample of the securities in the Index whose risk, return and other characteristics resemble the risk, return and other characteristics of the Index as a whole. Under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of the Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

The Index is designed to provide long exposure to the WisdomTree Government/Corporate Bond Index while seeking to manage interest rate risk through the use of short U.S. Treasury securities ( U.S. Treasuries ). The Index is comprised of a long portfolio and short portfolio. The long portfolio intends to replicate the WisdomTree Government/Corporate Bond Index, which broadly captures the U.S. investment grade, fixed

## Edgar Filing: WisdomTree Trust - Form 485APOS

income securities market and is comprised of U.S. Treasuries and U.S. Government-related bonds (*e.g.*, obligations of the U.S. Government or its agencies or instrumentalities), corporate bonds, mortgage-backed pass-through securities, commercial mortgage-backed securities and asset-backed securities that are publicly offered for sale in the United States. The short portfolio of the Index holds short positions in U.S. Treasuries that seek to correspond to a duration exposure matching the duration of the long portfolio, with a targeted total duration exposure of approximately zero years (*e.g.*, if the average duration of bonds in the long portfolio is approximately five years, the short portfolio will seek an average duration of approximately five years among its short holdings of U.S. Treasuries, with an aggregate targeted duration of Index holdings of approximately zero years). Duration is a measure used to determine the sensitivity of a portfolio to changes in interest rates with a longer duration portfolio being more sensitive to changes in interest rates.

2 WisdomTree Trust Prospectus

The Index methodology weights the short exposure to U.S. Treasuries of differing maturities in an attempt to offset the sensitivity of the long exposure to overall moves in interest rates as well to relative moves in interest rates of different maturity securities. The long portfolio and short portfolio of the Index are rebalanced on a monthly basis to where the dollar amount of the long portfolio's bond positions is equivalent to the dollar amount of the short exposure achieved within the short portfolio.

The Index is designed to have greater returns than an equivalent non-interest rate hedged investment when U.S. Treasury rates are rising. Conversely, the Index is designed to have lower returns than an equivalent non-interest rate hedged investment when U.S. Treasury rates are falling.

A significant portion of the bonds represented in the long portion of the Index are U.S. agency mortgage-backed pass-through securities. U.S. agency mortgage-backed pass-through securities are securities issued by entities such as Government National Mortgage Association (GNMA) and Federal National Mortgage Association (FNMA) that are backed by pools of mortgages. Most transactions in mortgage-backed pass-through securities occur through standardized contracts for future delivery in which the exact mortgage pools to be delivered are not specified until a few days prior to settlement, referred to as a to-be-announced transaction or TBA Transaction. In a TBA Transaction, the buyer and seller agree upon general trade parameters such as agency, settlement date, par amount and price. The actual pools delivered generally are determined two days prior to the settlement date; however, it is not anticipated that the Fund will receive pools, but instead will participate in rolling TBA Transactions. The Fund expects to enter into such contracts on a regular basis. The Fund, pending settlement of such contracts, will invest its assets in high-quality, liquid short term instruments.

As an alternative to shorting U.S. Treasuries, the Fund may invest in short positions in futures contracts on U.S. Treasuries, which may or may not be represented in the Index, if the Adviser believes they will help the Fund track the Index's short positions. The Fund also may invest its assets in cash and cash equivalents, as well as in shares of other investment companies, forward contracts, futures contracts, options on futures contracts, options, and swaps.

To the extent the Index concentrates (*i.e.*, holds 25% or more of its total assets) in the securities of a particular industry or group of industries, the Fund will concentrate its investments to approximately the same extent as its Index.

#### **Principal Risks of Investing in the Fund**

You can lose money on your investment in the Fund. The Fund is subject to the risks described below. Some or all of these risks may adversely affect the Fund's net asset value per share (NAV), trading price, yield, total return and/or ability to meet its objectives. For more information about the risks of investing in the Fund, see the sections in the Fund's Prospectus titled "Additional Principal Risk Information About the Fund and Additional Non-Principal Risk Information."

- n **Investment Risk.** As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time.
- n **Market Risk.** The trading prices of fixed income securities and other instruments fluctuate in response to a variety of factors. The Fund's NAV and market price may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.
- n **Shares of the Fund May Trade at Prices Other Than NAV.** As with all exchange-traded funds (ETFs), Fund shares may be bought and sold in the secondary market at market prices. The trading prices of the Fund's shares in the secondary market generally differ from the Fund's daily NAV, and there may be times when the market price of the shares is more than the NAV (premium) or less than the NAV (discount). This risk is heightened in times of market volatility or periods of steep market declines.
- n **Cash Redemption Risk.** The Fund's investment strategy will require it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds. The Fund may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind (*i.e.*, distribute securities as payment of redemption proceeds). As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

## Edgar Filing: WisdomTree Trust - Form 485APOS

n **Counterparty and Issuer Credit Risk.** The financial condition of an issuer of a debt security or other instrument or a counterparty to a derivative or other contract may cause such issuer or counterparty to default, become unable to pay interest or principal due or otherwise fail to honor its obligations. While the Fund attempts to limit credit and counterparty exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer or counterparty defaults and changes in the credit ratings of the Fund's portfolio investments.

- n **Derivatives Risk.** The Fund may invest in derivatives, including as a substitute to gain short exposure to U.S. Treasuries. Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or inflation rate. The return on a derivative instrument may not correlate with the return of its underlying reference asset. Derivatives are subject to a number of risks described elsewhere in the Fund's Prospectus, such as market risk and issuer-specific risk. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning and you may lose money. In addition to the other risks associated with the use of derivatives described elsewhere in this Prospectus, there are risks associated with the Fund's use of futures contracts. With respect to futures contracts and short exposure through futures contracts, these risks include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time. In addition, while the Fund may short securities such as U.S. Treasuries, the Fund's anticipated short exposure through derivative instruments may lead to less correlation with the Index.
- n **Hedging Risk.** The Index seeks to mitigate the potential negative impact of rising U.S. Treasury rates on the performance of bonds in the long portfolio of the Index. The Index's short positions in U.S. Treasuries, as well as the Fund's holdings to obtain such exposure, are not intended to mitigate credit risk or mitigate changes in bond values associated with investor perceptions regarding, or premiums placed on, credit risk (*i.e.*, credit risk premiums) or otherwise mitigate risks associated with other factors influencing the price of such bonds, which may have a greater impact than rising or falling interest rates. There is no guarantee that the short positions will completely eliminate the interest rate risk of the long bond positions. The Index's short positions also may fail to provide the targeted duration in light of changes in the shape of the U.S. Treasury curve. The interest rate profile between the long and short exposures of the Index and Fund could also evolve significantly between monthly rebalancing. This could lead to temporary dislocations between the Fund's intended and actual sensitivity to interest rates, which could impact performance. There may also be significant differences between the bond markets and U.S. Treasury markets (including futures markets for U.S. Treasuries) that could result in the Fund's short positions performing ineffectively, exacerbating losses or causing greater tracking error. In addition, when interest rates fall, an unhedged investment in the same long portfolio of bonds will outperform the Fund.
- n **Interest Rate Risk.** Interest rate risk is the risk that fixed income securities will decline in value because of changes in interest rates and other factors, such as perception of an issuer's creditworthiness.
- n **Investment Style Risk.** The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index.
- n **Issuer-Specific Risk.** Issuer-specific events, including changes in the financial condition of an issuer, can have a negative impact on the value of the Fund.
- n **Mortgage- and Asset-Backed Securities Risk.** Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of mortgage- and asset-backed securities. Mortgage- and asset-backed securities can also be subject to the risk of default on the underlying mortgages or other assets. Mortgage- and asset-backed securities are subject to fluctuations in yield due to prepayment rates that may be faster or slower than expected. Default or bankruptcy of a counterparty to a TBA Transaction would expose the Fund to possible loss.
- n **Non-Correlation Risk.** As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons.
- n **Non-Diversification Risk.** Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified, which means that it may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it were a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

n **Short Sales Risk.** The Fund may engage in short sale transactions. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. The Fund may enter into short positions in U.S. Treasuries as well as short derivative positions through futures contracts on U.S. Treasuries. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be

4 WisdomTree Trust Prospectus

exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, neither the Index nor the Fund may be able to fully or partially implement its short selling strategy.

- n **U.S. Treasury Exposure Risk.** The methodology used to select U.S. Treasuries (or U.S. Treasuries or U.S. Treasury futures, in the case of the Fund) for different maturities within the short exposure could produce performance that is dissimilar from other U.S. Treasuries of similar maturities. For example, unique supply and demand conditions could create a market whereby selected U.S. Treasuries or positions trade either more or less expensively than other U.S. Treasuries or positions of the same maturity, which could negatively impact the performance of the Fund.
- n **Yield Curve Risk.** The Index and Fund will have short exposure to U.S. Treasuries with different maturity dates and weightings. Interest rates do not change uniformly for U.S. Treasuries of differing lengths of maturity in response to market and economic conditions. For example, interest rates for shorter maturity U.S. Treasuries may rise or fall more or less than interest rates for longer maturity U.S. Treasuries and rates may rise for U.S. Treasuries of certain maturities but fall for U.S. Treasuries of different maturities. Changes in interest rates among U.S. Treasuries with different maturities could impact returns produced both by the long exposures and short exposures of the Index and Fund in different ways, which could lead to unexpected performance. The methodology of the Index and the investment approach of the Fund seek to address this risk, but are subject to the constraints of providing the desired overall interest rate profile and evolving market conditions, and there is no guarantee that any such risk will be reduced or the desired outcome will occur.

#### **Fund Performance**

The Fund is new and therefore does not have a performance history.

#### **Management**

##### **Investment Adviser and Sub-Adviser**

WisdomTree Asset Management, Inc. serves as investment adviser to the Fund. [ ] serves as sub-adviser to the Fund.

##### **Portfolio Managers**

[ ], has been a portfolio manager of the Fund since its inception in [ ].

[ ], has been a portfolio manager of the Fund since its inception in [ ].

[ ], has been a portfolio manager of the Fund since its inception in [ ].

##### **Buying and Selling Fund Shares**

The Fund is an ETF. This means that shares of the Fund are listed on a national securities exchange, such as [ ], and trade at market prices. Most investors will buy and sell shares of the Fund through brokers. Because Fund shares trade at market prices rather than NAV, shares may trade at a price greater than NAV (premium) or less than NAV (discount).

The Fund issues and redeems shares at NAV only in large blocks of shares ( Creation Units ), which only certain institutions or large investors (typically market makers or other broker-dealers) may purchase or redeem. Currently, Creation Units generally consist of 100,000 shares, though this may change from time to time. Creation Units are not expected to consist of less than 50,000 shares. The Fund generally issues and redeems Creation Units in exchange for a portfolio of securities closely approximating the holdings of the Fund and/or a designated amount of U.S. cash.

##### **Payments to Broker-Dealers and Other Financial Intermediaries**

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank) (an Intermediary ), WisdomTree Asset Management or its affiliates may pay Intermediaries for certain activities related to the Fund, including participation in activities that are designed to make Intermediaries more knowledgeable about exchange traded products, including the Fund, or for other activities, such as marketing, educational training or other initiatives related to the sale or promotion of Fund shares. These payments may create a conflict of interest by influencing the Intermediary and your salesperson to recommend the Fund over another investment. Any such arrangements do not result in increased Fund expenses. Ask your salesperson or visit the Intermediary s website for more information.

**Tax Information**

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income, or capital gains.

## Additional Information About the Fund

**Additional Information About the Fund's Investment Objective.** The Fund seeks to track the price and yield performance, before fees and expenses, of the Index developed by WisdomTree Investments. The Index consists of securities in the market suggested by its name that meet specific criteria developed by WisdomTree Investments. Since the Fund's investment objective has been adopted as a non-fundamental investment policy, the Fund's investment objective may be changed without a vote of shareholders upon 60 days' written notice to shareholders.

**Additional Information About the Fund's Investment Strategy.** The Fund will normally invest at least 80% of its net assets, plus the amount of any borrowings for investment purposes, in the types of securities suggested by its name (*i.e.*, investments connoted by its Index). The Fund anticipates meeting this policy because, under normal circumstances, at least 80% of the Fund's total assets (exclusive of collateral held from securities lending) will be invested in the component securities of its underlying Index and investments that have economic characteristics that are substantially identical to the economic characteristics of such component securities.

WisdomTree Asset Management expects that, over time, the correlation between the Fund's performance and that of the Index, before fees and expenses, will be 95% or better. A number of factors may affect the Fund's ability to achieve a high degree of correlation with its Index, and there can be no guarantee that the Fund will achieve a high degree of correlation.

The quantity of holdings in the Fund using a representative sampling strategy will be based on a number of factors, including asset size of the Fund. In addition, from time to time, securities are added to or removed from the Index and consequently the attributes of the Index may change. The Fund may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, in anticipation of their removal from or addition to the Index or to reflect various other changes to the Index. Further, the Fund may overweight or underweight securities in the Index, purchase or sell securities not in the Index, or utilize various combinations of other available techniques, in seeking to track the Index.

**Other Investment Information.** The Fund may invest in other investments that the Fund believes will help it track its Index, including cash and cash equivalents, as well as in shares of other investment companies (including affiliated investment companies), forward contracts, futures contracts, options on futures contracts, options and swaps.

The Fund may lend its portfolio securities in an amount not to exceed one third (33 1/3%) of the value of its total assets via a securities lending program through its securities lending agent, The Bank of New York Mellon Corporation, to brokers, dealers and other financial institutions desiring to borrow securities to complete transactions and for other purposes. A securities lending program allows the Fund to receive a portion of the income generated by lending its securities and investing the respective collateral. The Fund will receive collateral for each loaned security which is at least equal to the market value of that security, marked to market each trading day. In the securities lending program, the borrower generally has the right to vote the loaned securities, however the Fund may call loans to vote proxies if a material issue affecting the Fund's economic interest in the investment is to be voted upon. Security loans may be terminated at any time by the Fund.

---

## Additional Principal Risk Information About the Fund

This section provides additional information regarding the principal risks described under "Principal Risks of Investing in the Fund" in the Fund Summary. Each of the factors below could have a negative impact on Fund performance and trading prices.

### Cash Redemption Risk

When the Fund's investment strategy requires it to redeem shares for cash or to otherwise include cash as part of its redemption proceeds, it may be required to sell or unwind portfolio investments in order to obtain the cash needed to distribute redemption proceeds. This may cause the Fund to recognize a capital gain that it might not have recognized if it had made a redemption in-kind (*i.e.*, distribute securities as payment of redemption proceeds). As a result, the Fund may pay out higher annual capital gain distributions than if the in-kind redemption process was used.

### Counterparty and Issuer Credit Risk

The financial condition of an issuer of a debt security or other instrument may cause it to default or become unable to pay interest or principal due on the security. The Fund cannot collect interest and principal payments on a security if the issuer defaults. Recent events in the financial sector have resulted in increased concerns about credit risk and exposure. Well-known financial institutions have experienced significant liquidity and other problems and have defaulted on their debt. The degree of credit risk for a particular debt security or other issuer may be reflected in its credit rating. A credit rating is a measure of a bond issuer's ability to make timely payments of interest and principal. Rating agencies (such as Moody's Investors Service, Inc., Standard & Poor's Corporation, or Fitch) assign letter designations typically ranging from AAA to A- (lower default risk) through CCC to C (higher default risk) or D (in default). A credit rating of BBB or higher generally is considered investment grade. Credit ratings are subjective, do not remove market risk, and represent the opinions of the rating agencies as to the quality of the securities they rate. Credit ratings can change quickly and may not accurately reflect the risk of an issuer. Generally, investment risk and price volatility increase as the credit rating of a security declines. While the Fund attempts to limit credit exposure in a manner consistent with its investment objective, the value of an investment in the Fund may change quickly and without warning in response to issuer defaults and changes in the credit ratings of the Fund's portfolio investments.

The Fund intends to engage in investment transactions or enter into derivative or other contracts with third parties (*i.e.*, counterparties). For example, the Fund intends to enter into forward currency contracts and swap transactions. The Fund bears the risk that the counterparty to such contracts may default on its obligations or otherwise fail to honor its obligations. If a counterparty defaults on its payment obligations the Fund will lose money and the value of an investment in Fund shares may decrease. In addition, the Fund may engage in such investment transactions with a limited number of counterparties, which may increase the Fund's exposure to counterparty credit risk. Listed futures contracts can be traded on futures exchanges without material counterparty credit. After a trade is cleared, the exchange is the ultimate counterparty for all contracts, so the counterparty risk on a listed futures contract ultimately is the creditworthiness of the exchange's clearing corporation.

### Derivatives Risk

Derivatives are financial instruments that derive their performance from an underlying reference asset, such as a commodity, index, interest rate or currency exchange rate. Derivatives include futures contracts, interest rate swaps, total return swaps and credit linked notes. A futures contract may generally be described as an agreement for the future sale by one party and the purchase by another of a specified security or instrument at a specified price and time. The risks of futures contracts and short exposure through futures contracts include but are not limited to: (1) the success of the adviser's and sub-adviser's ability to predict movements in the prices of individual securities, fluctuations in markets and movements in interest rates; (2) an imperfect or no correlation between the changes in market value of the securities and the prices of futures contracts; and (3) no guarantee that an active market will exist for the contracts at any particular time. An interest rate swap typically involves the exchange of a floating interest rate payment for a fixed interest payment. A total return swap is an agreement between two parties in which one party agrees to make payments of the total return of a reference asset in return for payments equal to a rate of interest on another reference asset. The risks of swaps include but are not limited to the potential to increase or decrease the overall volatility of the Fund's investments and its share price. A credit linked note is a type of structured note whose value is linked to an underlying reference asset or entity. Credit linked notes typically provide periodic payments of interest as well as payment of principal upon maturity. The risks of credit linked notes include but are not limited to default by the issuer and the underlying reference asset or entity. Derivatives are subject to a number of risks described elsewhere in this Prospectus, such as market risk and issuer-specific risk. They also involve the risk that changes in the value of the derivative may not correlate perfectly with the underlying asset, rate or index, or that the counterparty to a derivative contract might default on its obligations. Derivatives can be volatile and may be less liquid than other securities. As a result, the value of an investment in the Fund may change quickly and without warning, and you may lose money. In addition, while the Fund may short securities such as U.S. Treasuries, the Fund's anticipated short exposure through derivative instruments may lead to less correlation with the Index.

### **Hedging Risk**

The Index seeks to mitigate the potential negative impact of rising U.S. Treasury rates on the performance of bonds in the long portfolio of the Index. The Index's short positions in U.S. Treasuries, as well as the Fund's holdings to obtain such exposure, are not intended to mitigate credit risk or mitigate changes in bond values associated with investor perceptions regarding, or premiums placed on, credit risk (*i.e.*, credit risk premiums) or otherwise mitigate risks associated with other factors influencing the price of such bonds, which may have a greater impact than rising or falling interest rates. There is no guarantee that the short positions will completely eliminate the interest rate risk of the long bond positions. The Index's short positions also may fail to provide the targeted duration in light of changes in the shape of the U.S. Treasury curve. The interest rate profile between the long and short exposures of the Index and Fund could also evolve significantly between monthly rebalancing. This could lead to temporary dislocations between the Fund's intended and actual sensitivity to interest rates, which could impact performance. There may also be significant differences between the bond markets and U.S. Treasury markets (including futures markets for U.S. Treasuries) that could result in the Fund's short positions performing ineffectively, exacerbating losses or causing greater tracking error. In addition, when interest rates fall, an unhedged investment in the same long portfolio of bonds will outperform the Fund.

### **Interest Rate Risk**

The market value of fixed income securities, and financial instruments related to fixed income securities, will change in response to changes in interest rates and may change in response to other factors, such as perception of an issuer's creditworthiness. As interest rates rise, the value of certain fixed income securities is likely to decrease. Similarly, if interest rates decline, the value of fixed income securities is likely to increase. While securities with longer maturities tend to produce higher yields, the prices of longer maturity securities tend to be more sensitive to changes in interest rates and thus subject to greater volatility than securities with shorter maturities. The average portfolio maturity of the Fund is the [dollar-weighted] average of all the current maturities of the individual securities in the Fund's portfolio. Average portfolio maturity is important to investors as an indication of the Fund's sensitivity to changes in interest rates. Funds with longer portfolio maturities generally are subject to greater interest rate risk.

### **Investment Risk**

As with all investments, an investment in the Fund is subject to investment risk. Investors in the Fund could lose money, including the possible loss of the entire principal amount of an investment, over short or long periods of time. An investment in the Fund is not a bank deposit and it is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency.

### **Investment Style Risk**

The Fund invests in the securities included in, or representative of, its Index regardless of their investment merit. The Fund does not attempt to outperform its Index or take defensive positions in declining markets. As a result, the Fund's performance may be adversely affected by a general decline in the market segments relating to its Index. The returns from the types of securities in which the Fund invests may underperform returns from the various general securities markets or different asset classes. This may cause the Fund to underperform other investment vehicles that invest in different asset classes. Different types of securities tend to go through cycles of doing better or worse than the general securities markets. In the past, these periods have lasted for as long as several years.

### **Issuer-Specific Risk**

Changes in the financial condition of an issuer or counterparty, changes in specific economic or political conditions that affect a particular type of security or issuer, and changes in general economic or political conditions can affect a security's or instrument's value. The value of securities of smaller, less well-known issuers can be more volatile than that of larger issuers. Issuer-specific events can have a negative impact on the value of the Fund.

### **Market Risk**

The trading prices of fixed income securities, currencies, equity securities, commodities, and other instruments fluctuate in response to a variety of factors. These factors include events impacting the entire market or specific market segments, such as political, market and economic developments, as well as events that impact specific issuers. The Fund's NAV and market price, like security and commodity prices generally, may fluctuate significantly in response to these and other factors. As a result, an investor could lose money over short or long periods of time.

### **Mortgage- and Asset-Backed Securities Risk**

Movements in interest rates (both increases and decreases) may quickly and significantly reduce the value of certain types of mortgage- and asset-backed securities. Mortgage- and asset-backed securities can also be subject to the risk of default on the underlying mortgages or other

## Edgar Filing: WisdomTree Trust - Form 485APOS

assets. Mortgage- and asset-backed securities are subject to fluctuations in yield due to prepayment rates that may be faster or slower than expected. Default or bankruptcy of a counterparty to a TBA Transaction would expose the Fund to possible loss.

**8** WisdomTree Trust Prospectus

### **Non-Correlation Risk**

As with all index funds, the performance of the Fund and its Index may differ from each other for a variety of reasons. For example, the Fund incurs operating expenses and portfolio transaction costs, while also managing cash flows and potential operational inefficiencies, not incurred by its Index. In addition, the Fund may not be fully invested in the securities of its Index at all times or may hold securities not included in its Index. For example, it may take several business days for additions and deletions to the Index to be reflected in the portfolio composition of the Fund. The use of sampling techniques may affect the Fund's ability to achieve close correlation with its Index. The Fund uses a representative sampling strategy and generally can be expected to have a greater non-correlation risk and this risk may be heightened during times of market volatility or other unusual market conditions.

### **Non-Diversification Risk**

Although the Fund intends to invest in a variety of securities and instruments, the Fund will be considered to be non-diversified. This means that the Fund may invest more of its assets in the securities of a single issuer or a smaller number of issuers than if it was a diversified fund. As a result, the Fund may be more exposed to the risks associated with and developments affecting an individual issuer or a smaller number of issuers than a fund that invests more widely. This may increase the Fund's volatility and cause the performance of a relatively smaller number of issuers to have a greater impact on the Fund's performance.

### **Shares of the Fund May Trade at Prices Other Than NAV**

As with all ETFs, Fund shares may be bought and sold in the secondary market at market prices. Although it is expected that the market price of the shares of the Fund will approximate the Fund's NAV, there may be times when the market price and the NAV vary significantly, including due to supply and demand of the Fund's shares and/or during periods of market volatility. Thus, you may pay more (or less) than NAV when you buy shares of the Fund in the secondary market, and you may receive more (or less) than NAV when you sell those shares in the secondary market. If an investor purchases Fund shares at a time when the market price is at a premium to the NAV of the Fund's shares or sells at a time when the market price is at a discount to the NAV of the Fund's shares, an investor may sustain losses.

### **Short Sales Risk**

The Fund may engage in short sale transactions. A short sale involves the sale by the Fund of an instrument or security that it does not own with the hope of purchasing the same security at a later date at a lower price. Short sales are designed to profit from a decline in the price of a security or instrument. The Fund will lose value if the security or instrument that is the subject of a short sale increases in value. This is the opposite of traditional long investments where the value of the Fund increases as the value of a portfolio security or instrument increases. The Fund may enter into short positions in U.S. Treasuries as well as short derivative positions through futures contracts on U.S. Treasuries. If the price of the security or derivative that is the subject of a short sale increases, then the Fund will incur a loss equal to the increase in price from the time that the short sale was entered into plus any premiums and interest paid to a third party in connection with the short sale. The risk of loss on a shorted position is potentially unlimited unlike the risk of loss on a long position, which is limited to the amount paid for the investment plus transaction costs. Therefore, short sales involve the risk that losses may be exaggerated, potentially losing more money than the actual cost of the investment. Also, there is the risk that the third party to the short sale may fail to honor its contract terms, causing a loss to the Fund. Further, in times of unusual or adverse economic, market or political conditions, neither the Index nor the Fund may be able to fully or partially implement its short selling strategy.

### **U.S. Treasury Exposure Risk**

The methodology used to select U.S. Treasuries (or U.S. Treasuries or U.S. Treasury futures, in the case of the Fund) for different maturities within the short exposure could produce performance that is dissimilar from other U.S. Treasuries of similar maturities. For example, unique supply and demand conditions could create a market whereby selected U.S. Treasuries or positions trade either more or less expensively than other U.S. Treasuries or positions of the same maturity, which could negatively impact the performance of the Fund.

### **Yield Curve Risk**

The Index and Fund will have short exposure to U.S. Treasuries with different maturity dates and weightings. Interest rates do not change uniformly for U.S. Treasuries of differing lengths of maturity in response to market and economic conditions. For example, interest rates for shorter maturity U.S. Treasuries may rise or fall more or less than interest rates for longer maturity U.S. Treasuries and rates may rise for U.S. Treasuries of certain maturities but fall for U.S. Treasuries of different maturities. Changes in interest rates among U.S. Treasuries with different maturities could impact returns produced both by the long exposures and short exposures of the Index and Fund in different ways, which could lead to unexpected performance. The methodology of the Index and the investment approach of the Fund seek to address this risk, but are subject to the constraints of providing the desired overall interest rate profile and evolving market conditions, and there is no guarantee that any

such risk will be reduced or the desired outcome will occur.

## Additional Non-Principal Risk Information

**Trading.** Although the Fund's shares are listed for trading on [ ] (the Listing Exchange ) and may be listed or traded on U.S. and non-U.S. stock exchanges other than the Listing Exchange, there can be no assurance that an active trading market for such shares will develop or be maintained. Trading in shares may be halted due to market conditions or for reasons that, in the view of the Listing Exchange, make trading in shares inadvisable. In addition, trading in shares on the Listing Exchange is subject to trading halts caused by extraordinary market volatility pursuant to Listing Exchange circuit breaker rules. There can be no assurance that the requirements of the Listing Exchange necessary to maintain the listing of the Fund will continue to be met or will remain unchanged or that Fund shares will trade with any volume, or at all, on any stock exchange.

**Costs of Buying or Selling Shares.** Investors buying or selling Fund shares in the secondary market will pay brokerage commissions or other charges imposed by brokers, as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of Fund shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to buy shares (the bid price) and the price at which an investor is willing to sell shares (the ask price). This difference in bid and ask prices is often referred to as the spread or bid/ask spread. The bid/ask spread varies over time for shares based on trading volume and market liquidity, and is generally lower if the Fund's shares have more trading volume and market liquidity and higher if the Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling Fund shares, including bid/ask spreads, frequent trading of Fund shares may significantly reduce investment results and an investment in shares may not be advisable for investors who anticipate regularly making small investments.

**Securities Lending.** Although the Fund is indemnified by the Fund's lending agent for losses incurred in connection with a borrower's default with respect to a loan, the Fund bears the risk of loss of investing cash collateral and may be required to make payments to a borrower upon return of loaned securities if invested collateral has declined in value. Furthermore, because of the risks in delay of recovery, the Fund may lose the opportunity to sell the securities at a desirable price, and the Fund will generally not have the right to vote securities while they are being loaned. These events could also trigger negative tax consequences for the Fund.

## Portfolio Holdings Information

Information about the Fund's daily portfolio holdings is available at [www.wisdomtree.com](http://www.wisdomtree.com). In addition, the Fund will disclose its complete portfolio holdings as of the end of its fiscal year (August 31) and its second fiscal quarter (February 28) in its reports to shareholders. The Fund files its complete portfolio holdings as of the end of its first and third fiscal quarters (November 30 and May 30, respectively) with the SEC on Form N-Q no later than 60 days after the relevant fiscal period. You can find the SEC filings on the SEC's website, [www.sec.gov](http://www.sec.gov). A summarized description of the Fund's policies and procedures with respect to the disclosure of the Fund's portfolio holdings is available in the Fund's Statement of Additional Information (SAI).

## Management

### Investment Adviser

As investment adviser, WisdomTree Asset Management has overall responsibility for the general management and administration of WisdomTree Trust (the Trust) and each of its separate investment portfolios called Funds. WisdomTree Asset Management is a registered investment adviser with offices located at 380 Madison Avenue, 21st Floor, New York, New York 10017 and is a leader in ETF management. As of [ ], 2013, WisdomTree Asset Management had assets under management totaling approximately \$[ ] billion. WisdomTree Investments\* is the parent company of WisdomTree Asset Management. WisdomTree Asset Management provides an investment program for the Fund. WisdomTree Asset Management also arranges for sub-advisory, transfer agency, custody, fund administration, securities lending, and all other non-distribution related services necessary for the Fund to operate. For its services, WisdomTree Asset Management expects to receive fees from the Fund, based on a percentage of the Fund's average daily net assets, as shown in the following table:

Name of Fund	Management Fee
WisdomTree Government/Corporate Bond Zero Duration Fund	[ ]%

Under the Investment Advisory Agreement for the Fund, WisdomTree Asset Management has agreed to pay generally all expenses of the Fund, subject to certain exceptions. For a detailed description of the Investment Advisory Agreement for the Fund, please see the Management of the Trust section of the SAI. Pursuant to a separate contractual arrangement, WisdomTree Asset Management arranges for the provision of Chief Compliance Officer (CCO) services with respect to the Fund, and is liable and responsible for, and administers, payments to the CCO, the Independent Trustees and counsel to the Independent Trustees. WisdomTree Asset Management receives a fee of up to 0.0044% of the Fund's average daily net assets for providing such services and paying such expenses. WisdomTree Asset Management provides CCO services to the Trust.

The basis for the Board of Trustees' approval of the Fund's Investment Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the period ended February 28, 2014.

### Sub-Adviser

[ ] ( [ ] ) is responsible for the day-to-day management of the Fund. [ ] chooses the Fund's portfolio investments and places orders to buy and sell the Fund's portfolio investments. [ ], a registered investment adviser, is a leading innovator in the investment industry and manages global quantitative-based investment strategies for institutional and private investors. Its principal office is located at [ ]. As of [ ], 2013, [ ] had assets under management totaling approximately \$[ ] billion. [ ] is a wholly-owned indirect subsidiary of [ ], a publicly traded financial holding company. WisdomTree Asset Management pays [ ] for providing sub-advisory services to the Fund.

The basis for the Board of Trustees' approval of the investment Sub-Advisory Agreement will be available in the Trust's Semi-Annual Report to Shareholders for the period ended February 28, 2014.

WisdomTree Asset Management, as the investment adviser for the Fund, may hire one or more sub-advisers to oversee the day-to-day activities of the Fund. The sub-advisers are subject to oversight by WisdomTree Asset Management. WisdomTree Asset Management and the Trust have received an exemptive order from the SEC that permits WisdomTree Asset Management, with the approval of the Independent Trustees of the Trust, to retain unaffiliated investment sub-advisers for the Fund without submitting the sub-advisory agreement to a vote of the Fund's shareholders. The Trust will notify shareholders in the event of any change in the identity of such sub-adviser or sub-advisers. WisdomTree Asset Management has ultimate responsibility for the investment performance of the Fund due to its responsibility to oversee each sub-adviser and recommend their hiring, termination and replacement. WisdomTree Asset Management is not required to disclose fees paid to any sub-adviser retained pursuant to the order.

### Portfolio Managers

The Fund is managed by [ ]'s Portfolio management team. The individual members of the team responsible for the day-to-day management of the Fund's portfolio are described below.

[PM bios to be provided by amendment]

## Edgar Filing: WisdomTree Trust - Form 485APOS

The Fund's SAI provides additional information about the Portfolio Managers' compensation, other accounts managed by the Portfolio Managers, and the Portfolio Managers' ownership of shares in the Fund.

\* WisdomTree is a registered mark of WisdomTree Investments and has been licensed for use by the Trust. WisdomTree Investments has patent applications pending on the methodology and operation of its Indexes and the Funds.

**Additional Information on Buying and Selling Fund Shares**

Most investors will buy and sell shares of the Fund through brokers. Shares of the Fund trade on the Listing Exchange and elsewhere during the trading day and can be bought and sold throughout the trading day like other shares of publicly traded securities. When buying or selling shares through a broker, most investors will incur customary brokerage commissions and charges. Shares of the Fund trade under the trading symbol listed on the cover of this Prospectus.

**Share Trading Prices**

(a)  
Amount beneficially owned: 391,004

(b)  
Percent of class: 0.9%. The percentages used herein and in the rest of Item 4 are calculated based upon the 44,208,359 shares of Common Stock issued and outstanding as of February 2, 2011 as reported in the Form 10-Q for the fiscal quarter ended December 31, 2010 filed by the Company on February 4, 2011.

(c)  
(i)  
Sole power to vote or direct the vote: -0-

(ii)  
Shared power to vote or direct the vote: 391,004

(iii)  
Sole power to dispose or direct the disposition: -0-

(iv)  
Shared power to dispose or direct the disposition of: 391,004

ACP has the power to dispose of and the power to vote the shares of Common Stock beneficially owned by it, which power may be exercised by its general partner, ACPGP. ACA, as managing member of ACPGP, directs ACPGP's operations. Neither ACPGP nor ACA directly own any shares of Common Stock. By reason of the provisions of Rule 13d-3 of the Securities Exchange Act of 1934 (the "Act"), ACPGP and ACA may be deemed to beneficially own the shares owned by ACP.

**B. Robert Atchinson and Phillip Gross**

- (a) Amount beneficially owned: 391,004
- (b) Percent of class: 0.9%
- (c)
  - (i) Sole power to vote or direct the vote: -0-
  - (ii) Shared power to vote or direct the vote: 391,004
  - (iii) Sole power to dispose or direct the disposition: -0-
  - (iv) Shared power to dispose or direct the disposition: 391,004

Messrs. Atchinson and Gross, as managing members of ACA, have shared power to vote the Common Stock beneficially owned by ACP. Neither Mr. Atchinson nor Mr. Gross directly own any shares of Common Stock. By reason of the provisions of Rule 13d-3 of the Act, each may be deemed to beneficially own the

shares beneficially owned by ACP.

Item 5. OWNERSHIP OF FIVE PERCENT OR LESS OF A CLASS.

If this statement is being filed to report the fact as of the date hereof the reporting person has ceased to be the beneficial owner of more than five percent of the class of securities, check the following [X].

---

Item 6. OWNERSHIP OF MORE THAN FIVE PERCENT ON BEHALF OF ANOTHER PERSON.

Not applicable.

Item 7. IDENTIFICATION AND CLASSIFICATION OF THE SUBSIDIARY WHICH ACQUIRED THE SECURITY BEING REPORTED ON BY THE PARENT HOLDING COMPANY.

Not applicable.

Item 8. IDENTIFICATION AND CLASSIFICATION OF MEMBERS OF THE GROUP.

Not applicable.

Item 9. NOTICE OF DISSOLUTION OF GROUP.

Not applicable.

Item 10. CERTIFICATION.

Each of the Reporting Persons hereby makes the following certification:

By signing below each Reporting Person certifies that, to the best of its knowledge and belief, the securities referred to above were not acquired and are not held for the purpose of or with the effect of changing or influencing the control of the issuer of the securities and were not acquired and are not held in connection with or as a participant in any transaction having that purpose or effect.

---

SIGNATURES

After reasonable inquiry and to the best of our knowledge and belief, the undersigned certify that the information set forth in this statement is true, complete and correct.
