This page intentionally left blank

Message from the President

During the six months ended November 30, 2013, the municipal market was affected by a number of factors. For several months ending in April 2013, municipal bonds had been trading in a relatively fixed range and exhibited muted price volatility. That trend changed abruptly during May 2013, when stronger-than-anticipated economic data led the media to suggest a great rotation from bonds to equities. In light of continuing low interest rates, this theory suggested that investors with ample cash reserves would abandon bonds to pursue higher returns in the stock market.

After addressing the Joint Economic Committee of the U.S. Congress on May 22, Federal Reserve Chairman Ben Bernanke suggested in response to questions that the Federal Open Market Committee (FOMC) might begin tapering its extensive bond-purchase program, widely known as quantitative easing.

Interest rates responded by moving higher, and municipal bonds underperformed U.S. Treasury securities throughout the summer. In large measure, the underperformance was due to Detroit's Chapter 9 bankruptcy filing and Puerto Rico's fiscal crises. The weakness resulted in substantial outflows from municipal bond funds.

Meanwhile, the FOMC decided that economic conditions did not yet warrant tapering direct bond purchases. Instead, the FOMC specified the economic conditions under which a less accommodative policy might be warranted. Throughout the reporting period, no tapering materialized and the FOMC maintained the federal funds target rate in a range between zero and 0.25%.

During the reporting period, many municipal issuers came to market, seeking to take advantage of low interest rates. As supply and demand shifted, however, the municipal market remained quite challenging for issuers and investors alike.

Through all of these market developments, the portfolio managers of MainStay DefinedTerm Municipal Opportunities Fund focused on the Fund's investment objective and investment strategies. Using disciplined investment techniques, they sought to achieve results consistent with their mandate.

The following semiannual report contains more detailed information about the specific market events, securities and decisions that affected MainStay DefinedTerm Municipal Opportunities Fund during the six months ended November 30, 2013. Past performance is no guarantee of future results.

We thank you for choosing MainStay DefinedTerm Municipal Opportunities Fund, and we look forward to serving your financial needs over time.

Sincerely,

Stephen P. Fisher

President

Fund Performance and Statistics (Unaudited)

Performance data quoted represents past performance. Past performance is no guarantee of future results. Because of market volatility, current performance may be lower or higher than the figures shown. Index performance is shown for illustration purposes only. You cannot invest directly into an index. Investment return and principal value will fluctuate, and as a result, when shares are sold, they may be worth more or less than their original cost. For performance information current to the most recent month-end, please visit mainstayinvestments.com/mmd.

Total Returns	Six	One	Since Inception 6/26/12

Market Price ¹	15.71	20.45	11.49
Barclays Municipal Bond Index ²	2.45	3.51	0.47
Average Lipper general & insured municipal debt fund (leveraged) ³	7.58	9.53	2.03

Fund Statistics (as of November 30, 2013)

NYSE Symbol	MMD	Premium/Discount ⁴	9.42%
CUSIP	56064K100	Total Net Assets (millions)	\$ 468.1
Inception Date	6/26/12	Total Managed Assets (millions) ⁵	\$ 741.9
Market Price	\$15.39	Leverage ⁶	36.7%
NAV	\$16.99	Percent of AMT Bonds ⁷	7.43%

1. Total returns assume dividends and capital gains distributions are reinvested.
2. The Barclays Municipal Bond Index is an unmanaged index considered representative of the broad market for investment-grade, tax-exempt bonds with a maturity of at least one year. Bonds subject to the alternative minimum tax or with floating or zero coupons are excluded. An investment cannot be made directly in an index.
3. The average Lipper general & insured municipal debt fund (leveraged) is representative of funds that, by portfolio practice, either invest primarily in municipal debt issues rated in the top four credit ratings or invest primarily in municipal debt issues insured as to timely payment. These funds can be leveraged via use of debt, preferred equity, and/or reverse repurchase agreements. This benchmark is a product of Lipper Inc. Lipper Inc. is an independent monitor of fund performance. Results are based on average total returns of similar funds with all dividend and capital gain distributions reinvested.
4. Premium/Discount is the percentage (%) difference between the market price and the NAV price. When the market price exceeds the NAV, the Fund is trading at a Premium. When the market price is less than the NAV, the Fund is trading at a Discount.
5. Managed Assets is defined as the Fund's total assets, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the purpose of creating effective leverage (i.e. tender option bonds) or Fund liabilities related to liquidation preference of any preferred shares issued).
6. Leverage is based on the use of proceeds received from tender option bond transactions, issuing Preferred Shares, funds borrowed from banks or other institutions or derivative transactions, expressed as a percentage of Managed Assets.
7. Alternative Minimum Tax (AMT) is a separate tax computation under the Internal Revenue Code that, in effect, eliminates many deductions and credits and creates a tax liability for an individual who would otherwise pay little or no tax.

Credit Quality as of November 30, 2013 (Unaudited)

Ratings apply to the underlying portfolio of bonds held by the Fund and are rated by an independent rating agency, such as Standard & Poor's (S&P), Moody's Investors Service, Inc. and/or Fitch Ratings, Inc. If ratings are provided by the ratings agencies, but differ, the higher rating will be utilized. If only one rating is provided, the available rating will be utilized. Securities that are unrated by the rating agencies are reflected as such in the breakdown. Unrated securities do not necessarily indicate low quality. S&P rates borrowers on a scale from AAA to D. AAA through BBB represent investment grade, while BB through D represent non-investment grade.

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

As a percentage of Managed Assets.

Some of these holdings have been transferred to a Tender Option Bond (TOB) Issuer in exchange for the TOB residuals and cash.

6 MainStay DefinedTerm Municipal Opportunities Fund

Portfolio Management Discussion and Analysis (Unaudited)

Questions answered by portfolio managers Robert DiMella, CFA, John Loffredo, CFA, Michael Petty, Scott Sprauer and David Dowden of MacKay Shields LLC, the Fund's Subadvisor.

How did MainStay DefinedTerm Municipal Opportunities Fund perform relative to its benchmark and peers for the six months ended November 30, 2013?

For the six months ended November 30, 2013, MainStay DefinedTerm Municipal Opportunities Fund returned 12.10% at net asset value applicable to Common shares and 15.71% at market price. At net asset value and at market price, the Fund underperformed the 2.45% return of the Barclays Municipal Bond Index¹ and the 7.58% return of the average Lippert general & insured municipal debt fund (leveraged) for the six months ended November 30, 2013.

What factors affected the Fund's relative performance during the reporting period?

The Fund was positioned with a longer-maturity, lower-investment-grade rating profile than the Barclays Municipal Bond Index. As municipal mutual fund outflows increased from June through August 2013, however, the municipal yield curve³ steepened and credit spreads⁴ widened. These conditions detracted from the Fund's performance relative to the Barclays Municipal Bond Index. On the upside, a lack of Puerto Rico bonds was a positive contributor to the Fund's performance relative to the Barclays Municipal Bond Index, as Puerto Rico was the worst-performing sector of the Index during the reporting period. (Contributions take weightings and total returns into account.)

How was the Fund's leverage strategy implemented during the reporting period?

The Fund's leverage percentage stayed within a specified range during the reporting period. As of November 30, 2013, the Fund's leverage was equal to 36.7% of the Fund's managed assets. However, the decline in municipal prices during the summer sell-off and the corresponding higher yields allowed the Fund to take advantage of a wider spread between long-term municipal bonds and short-term floater financing costs in its tender option bonds. These factors enabled the Fund to raise its dividend, to the benefit of the Common shareholders. While yields on most municipal bonds increased during the reporting period, the Fund's cost of borrowing on its leverage remained stable.

What was the Fund's duration strategy during the reporting period?

As municipal rates increased substantially from June through August, we increased the Fund's duration to be longer than that of the Barclays Municipal Bond Index. As of November 30, 2013, the Fund had a duration of 9.68 years. As of the same date, the duration of the Barclays Municipal Bond Index was 5.39 years. We continue to use a position in U.S. Treasury futures to hedge some of the Fund's higher exposure in longer-maturity issues.

What specific factors, risks or market forces prompted significant decisions for the Fund during the reporting period?

A combination of factors affected the municipal market during the reporting period. Among these were stronger economic data, which prompted speculation about a rotation from bonds to equities, and suggestions that the Federal Reserve might taper its bond purchases. Financial difficulties in Detroit and Puerto Rico also affected the market. Together, these forces drew money away from municipal mutual funds in 2013. As a closed-end fund, MainStay DefinedTerm Municipal Opportunities Fund was not directly subject to the industrywide outflows. Nevertheless, these redemptions caused municipal yields to move materially higher and drove bond prices lower. This rapid change in market sentiment created opportunities for the Fund to reposition itself in several ways. We focused on selling securities that had fallen in value, as we sought to realize losses that could offset current and future gains in the Fund. Because we reinvested at higher yields, the transactions allowed us to increase monthly tax-exempt dividend distributions to holders of Common shares. During periods of institutional market illiquidity, we targeted the strong appetite for individual bonds among retail investors to execute sales at prices we viewed as favorable relative to the market. We used the proceeds to buy bonds that became available as a result of industry outflows.

During the reporting period, which market segments were the strongest contributors to the Fund's performance and which market segments were particularly weak?

Relative to the Barclays Municipal Bond Index, the most significant positive contribution to the Fund's performance came from our decision to avoid bonds issued by the Commonwealth

1. See footnote on page 5 for more information on Barclays Municipal Bond Index.
2. See footnote on page 5 for more information on Lipper Inc.
3. The yield curve is a line that plots the yields of various securities of similar quality typically U.S. Treasury issues across a range of maturities. The U.S. Treasury yield curve serves as a benchmark for other debt and is used in economic forecasting.
4. The term spread may refer to the difference in yield between a security or type of security and comparable U.S. Treasury issues. The term may also refer to the difference in yield between two specific securities or types of securities at a given time.
5. Duration is a measure of the price sensitivity of a fixed-income investment to changes in interest rates. Duration is expressed as a number of years and is considered a more accurate sensitivity gauge than average maturity.

of Puerto Rico. Puerto Rico bonds underperformed the general municipal market by more than 15 percentage points. The most significant detractors from the Fund's relative performance were yield-curve positioning and credit quality. Longer-maturity municipals underperformed municipal bonds with shorter maturities, and credit spreads widened during the reporting period.

Did the Fund make any significant purchases or sales during the reporting period?

As the Fund remained focused on diversification, no individual purchase or sale was considered significant.

How did the Fund's sector, industry or state weightings change during the reporting period?

There were no material changes to the Fund's sector weightings during the reporting period. Sectors that we continued to favor were marginally increased, including transportation and water/sewer bonds. During the reporting period, we took the oppor-

tunity to lower the Fund's exposure to the special tax and health care sectors. From a state perspective, we opportunistically increased the Fund's exposure to Illinois bonds after a sell-off during the summer pushed prices lower. We also reduced exposure to Ohio and Virginia bonds.

How was the Fund positioned at the end of the reporting period?

As of November 30, 2013, the Fund was overweight relative to the Barclays Municipal Bond Index in the special tax and health care sectors. From a quality perspective, we favored credits rated A and BBB,⁶ though we increased the overall credit quality of the portfolio during the reporting period, including the percentage of AA⁷ rated credits. As of November 30, 2013, the Fund's duration was longer than that of the Barclays Municipal Bond Index.

6. An obligation rated A by Standard & Poor's (S&P) is deemed by S&P to be somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. In the opinion of S&P, however, the obligor's capacity to meet its financial commitment on the obligation is still strong. An obligation rated BBB by S&P is deemed by S&P to exhibit adequate protection parameters. It is the opinion of S&P, however, that adverse economic conditions or changing circumstances are more likely to lead to a weakened capacity of the obligor to meet its financial commitment on the obligation. When applied to Fund holdings, ratings are based solely on the creditworthiness of the bonds in the portfolio and are not meant to represent the security or safety of the Fund.

7. An obligation rated AA by S&P is deemed by S&P to differ from the highest-rated obligations only to a small degree. In the opinion of S&P, the obligor's capacity to meet its financial commitment on the obligation is very strong. When applied to Fund holdings, ratings are based solely on the creditworthiness of the bonds in the portfolio and are not meant to represent the security or safety of the Fund.

The opinions expressed are those of the portfolio managers as of the date of this report and are subject to change. There is no guarantee that any forecast made will come to pass. This material does not constitute investment advice and is not intended as an endorsement of any specific investment.

Annualized.

(a) Net asset value at beginning of period reflects the deduction of the sales load of \$0.90 per share and offering costs of \$0.04 per share from the \$20.00 offering price.

(b) Total investment return is not annualized.

(c) The Manager has agreed to reimburse all organizational expenses.

(d) Interest expense and fees relate to the costs of tender option bond transactions (See Note 2 (I)) and the issuance of fixed rate municipal term preferred shares (See Note 2 (J)).

(e) Calculated by subtracting the Fund's total liabilities (not including the Preferred shares) from the Fund's total assets, and dividing the result by the number of Preferred shares outstanding.

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

The notes to the financial statements are an integral part of,
and should be read in conjunction with, the financial statements.

Notes to Financial Statements (Unaudited)

Note 1 Organization and Business

MainStay DefinedTerm Municipal Opportunities Fund (the Fund) was organized as a Delaware statutory trust on April 20, 2011, pursuant to an agreement and declaration of trust, which was amended and restated on May 16, 2012 (Declaration of Trust). The Fund is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a diversified, closed-end management investment company. The Fund first offered Common shares through an initial public offering on June 26, 2012.

Pursuant to the terms of the Declaration of Trust, the Fund will commence the process of liquidation and dissolution at the close of business on December 31, 2024 (the Termination Date) unless otherwise extended by a majority of the Board of Trustees (the Board) (as discussed in further detail below). During the six-month period preceding the Termination Date or Extended Termination Date (as defined below), the Board may, without shareholder approval unless such approval is required by the 1940 Act, determine to (i) merge or consolidate the Fund so long as the surviving or resulting entity is an open-end registered investment company that is managed by the same investment adviser which serves as the investment adviser to the Fund at that time or is an affiliate of such investment adviser; or (ii) convert the Fund from a closed-end fund into an open-end registered investment company. Upon liquidation and termination of the Fund, shareholders will receive an amount equal to the Fund's net asset value (NAV) at that time, which may be greater or less than the price at which Common shares were issued. The Fund's investment objectives and policies are not designed to return to investors who purchased Common shares in the initial offering of such shares their initial investment on the Termination Date and such initial investors may receive more or less than their original investment upon termination.

Prior to the commencement of the six-month period preceding the Termination Date, a majority of the Board may extend the Termination Date for a period of not more than two years or such shorter time as may be determined (the Extended Termination Date), upon a determination that taking such actions as described in (i) or (ii) above would not, given prevailing market conditions, be in the best interests of the Fund's shareholders. The Termination Date may be extended an unlimited number of times by the Board prior to the first business day of the sixth month before the next occurring Extended Termination Date.

The Fund's primary investment objective is to seek current income exempt from regular U.S. Federal income taxes (but which may be includable in taxable income for purpose of the Federal alternative minimum tax). Total return is a secondary objective.

Note 2 Significant Accounting Policies

The Fund prepares its financial statements in accordance with generally accepted accounting principles (GAAP) in the United States of America and follows the significant accounting policies described below.

(A) Securities Valuation. Investments are valued as of the close of regular trading on the New York Stock Exchange (Exchange) (generally 4:00 p.m. Eastern time) on each day the Fund is open for business (valuation date).

The Board has adopted procedures for the valuation of the Fund's securities and has delegated the responsibility for valuation measurements

under those procedures to the Valuation Committee of the Fund (the Valuation Committee). The Board has authorized the Valuation Committee to appoint a Valuation Sub-Committee (the Sub-Committee) to deal in the first instance with questions that arise or cannot be resolved under these procedures. The Sub-Committee meets (in person, via electronic mail or via teleconference) on an as-needed basis. The Valuation Committee meets at a later time, as necessary, to ensure that actions taken by the Sub-Committee were appropriate. The procedures recognize that, subject to the oversight of the Board and unless otherwise noted, the responsibility for day-to-day valuation of portfolio assets (including securities for which market prices are not readily available) rests with New York Life Investment Management LLC (New York Life Investments) or the Manager, aided to whatever extent necessary by the Subadvisor (as defined in Note 3(A)) to the Fund.

To assess the appropriateness of security valuations, the Manager or the Fund's third party service provider, who is subject to oversight by the Manager, regularly compares prior day prices, prices on comparable securities and the sale prices to the prior and current day prices and challenges prices exceeding certain tolerance levels with third party pricing services or broker sources. For those securities valued through either a standardized fair valuation methodology or a fair valuation measurement, the Valuation Committee reviews and affirms the reasonableness of the valuation based on such methodologies and measurements on a regular basis after considering all relevant information that is reasonably available.

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

Fair value is defined as the price that the Fund would receive upon selling an investment in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. Fair value measurements are estimated within a framework that has established a three-tier hierarchy which maximizes the use of observable market data and minimizes the use of unobservable inputs to establish a classification of fair value measurements for disclosure purposes. Inputs refers broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk, such as the risk inherent in a particular valuation technique used to measure fair value using a pricing model and/or the risk inherent in the inputs for the valuation technique. Inputs may be observable or unobservable. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability based on market data obtained from sources independent of the Fund. Unobservable inputs reflect the Fund's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the information available in the circumstances. The inputs or methodology used for valuing securities may not be an indication of the risks associated with investing in those securities. The three-tier hierarchy of inputs is summarized in the three broad Levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments in active markets, interest rates and yield curves, prepayment speeds, credit risks, etc.)

Level 3 significant unobservable inputs (including the Fund's own assumptions about the assumptions that market participants would use in measuring the fair value of investments)

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

The aggregate value by input level, as of November 30, 2013, for the Fund's investments is included at the end of the Fund's Portfolio of Investments.

The valuation techniques used by the Fund to measure fair value maximize the use of observable inputs and minimize the use of unobservable inputs. The Fund may use third party vendor evaluations, whose prices may be derived from one or more of the following standard inputs:

Benchmark Yields	Reported Trades
Broker Dealer Quotes	Issuer Spreads
Two-sided markets	Benchmark securities
Bids/Offers	Reference Data (corporate actions or material event notices)
Industry and economic events	Comparable bonds
Monthly payment information	

Securities for which market values cannot be measured using the methodologies described above are valued by methods deemed in good faith by the Valuation Committee, following the procedures established by the Board, to represent fair value. Under these procedures, the Fund primarily uses a market-based approach which may use related or comparable assets or liabilities, recent transactions, market multiples, book values, and other relevant information. The Fund may also use an income-based valuation approach in which the anticipated future cash flows of the investment are discounted to calculate fair value. Discounts may also be applied due to the nature or duration of any restrictions on the disposition of the investments. Due to the inherent uncertainty of valuations of such investments, the fair values may differ significantly from the values that would have been used had an active market existed. For the period ended November 30, 2013, there have been no changes to the fair value methodologies.

Securities which may be valued in this manner include, but are not limited to: (i) a security for which trading has been halted or suspended; (ii) a debt security that has recently gone into default and for which there is not a current market quotation; (iii) a security of an issuer that has entered into a restructuring; (iv) a security that has been de-listed from a national exchange; (v) a security for which the market price is not available from a third party pricing source or, if so provided, does not, in the opinion of the Manager or Subadvisor reflect the security's market value; and (vi) a security whose principal market has been temporarily closed at a time when, under normal conditions, it would be open. Securities for which market quotations or observable inputs are not readily available are generally categorized as Level 3 in the hierarchy. As of November 30, 2013, the Fund did not hold any securities that were fair valued in such a manner.

Municipal debt securities are valued at the evaluated mean prices supplied by a pricing agent or broker selected by the Manager, in consultation with the Subadvisor, whose prices reflect broker/dealer supplied valuations and electronic data processing techniques, if such prices are deemed by the Manager, in consultation with the Subadvisor, to be representative of market values, at the regular close of trading of the Exchange on each valuation date. Debt securities purchased on delayed delivery basis are marked to market daily until settlement at the forward settlement date. Municipal debt securities are generally categorized as Level 2 in the hierarchy.

Futures contracts are valued at the last posted settlement price on the market where such futures are primarily traded and are generally categorized as Level 1 in the hierarchy.

Temporary cash investments acquired in excess of 60 days to maturity are valued using the latest bid prices or using valuations based on a matrix system (which considers such factors as security prices, yields, maturities, and ratings), both as furnished by independent pricing services. Other temporary cash investments which mature in 60 days or less (Short-Term Investments) are valued at amortized cost. The amortized cost method involves valuing a security at its cost on the date of purchase and thereafter assuming a constant amortization to maturity of the difference between such cost and the value on maturity date. Amortized cost approximates the current fair value of a security. Securities valued at amortized cost are not valued using a quoted price in an active market. These securities are generally categorized as Level 2 in the hierarchy.

(B) Income Taxes. The Fund's policy is to comply with the requirements of the Internal Revenue Code of 1986, as amended (the Internal Revenue Code), applicable to regulated investment companies and to distribute all of the taxable income to the shareholders of the Fund within the allowable time limits. Therefore, no federal, state and local income tax provisions are required.

Management evaluates the Fund's tax positions to determine if the tax positions taken meet the minimum recognition threshold in connection with accounting for uncertainties in income tax positions taken or expected to be taken for the purposes of measuring and recognizing tax liabilities in the financial statements. Recognition of tax benefits of an uncertain tax position is required only when the position is more likely than not to be sustained assuming examination by taxing authorities. Management has analyzed the Fund's tax positions taken on federal, state and local income tax returns for the open tax year and has concluded that no provisions for federal, state and local income tax are required in the Fund's financial statements. The Fund's federal, state and local income and federal excise tax returns for tax years for which the applicable statutes of limitations have not expired are subject to examination by the Internal Revenue Service and state and local departments of revenue.

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

(C) Dividends and Distributions to Common

Shareholders. Dividends and distributions are recorded on the ex-dividend date. The Fund intends to declare dividends of net investment income, after payment of any dividends on any outstanding Preferred shares, if any, at least monthly and declares and pays distributions of net realized capital gains, if any, at least annually. To the extent that the Fund realizes any capital gains or ordinary taxable income, it will be required to allocate such income between the Common shares and Preferred shares issued by the Fund, in proportion to the total dividends paid to each share class for the year in which the income is realized.

(D) Security Transactions and Investment Income. The Fund records security transactions on the trade date. Realized gains and losses on security transactions are determined using the identified cost method. Interest income is accrued as earned using the effective interest rate method. Discounts and premiums on securities purchased, other than Short-Term Investments, for the Fund are accreted and amortized, respectively, on the effective interest rate method over the life of the respective securities or, in the case of a callable security, over

Notes to Financial Statements (Unaudited) (continued)

the period to the first date of call. Discounts and premiums on Short-Term Investments are accreted and amortized, respectively, on the straight-line method.

The Fund may place a debt obligation on non-accrual status and reduce related interest income by ceasing current accruals and writing off interest receivables when the collection of all or a portion of interest has become doubtful based on consistently applied procedures. A debt obligation is removed from non-accrual status when the issuer resumes interest payments or when collectability of interest is reasonably assured.

(E) Expenses. Expenses of the Fund are recorded on the date the expenses are incurred. The expenses borne by the Fund, including those incurred with related parties of the Fund, are shown in the Statement of Operations.

(F) Use of Estimates. In preparing financial statements in conformity with GAAP, management makes estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

(G) Futures Contracts. A futures contract is an agreement to purchase or sell a specified quantity of an underlying instrument at a specified future date and price, or to make or receive a cash payment based on the value of a financial instrument (e.g., foreign currency, interest rate, security, or securities index). The Fund is subject to interest rate risk in the normal course of investing in these transactions. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized appreciation or depreciation by marking-to-market such contract on a daily basis to reflect the market value of the contract at the end of each day's trading. The Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as variation margin. When the futures contract is closed, the Fund records a realized gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the Fund's basis in the contract.

The use of futures contracts involves, to varying degrees, elements of market risk in excess of the amount recognized in the Statement of Assets and Liabilities. The contract or notional amounts and variation margin reflect the extent of the Fund's involvement in open futures positions. Risks arise from the possible imperfect correlation in movements in the price of futures contracts, interest rates and the underlying hedged assets, and the possible inability of counterparties to meet the terms of their contracts. However, the Fund's activities in futures contracts have minimal counterparty risk as they are conducted through regulated exchanges that guarantee the futures against default by the counterparty. In the event of a bankruptcy or insolvency of a futures commission merchant that holds margin on behalf of the Fund, the Fund may not be entitled to the return of all of the margin owed to the Fund, potentially resulting in a loss. The Fund may invest in futures contracts to help manage the duration and yield curve of the Fund while minimizing the exposure to wider bid/ask spreads in traditional bonds. The Fund's investment in futures contracts and other derivatives may increase the volatility of the Fund's NAV and may result in a loss to the Fund.

(H) Securities Lending. In order to realize additional income, the Fund may engage in securities lending, subject to the limitations set

forth in the 1940 Act and relevant guidance by the staff of the Securities and Exchange Commission. In the event the Fund does engage in securities lending, the Fund will lend through its custodian, State Street Bank and Trust Company (State Street). State Street will manage the Fund's cash collateral in accordance with the lending agreement between the Fund and State Street, and indemnify the Fund's portfolio against counterparty risk. The loans will be collateralized by cash or securities at least equal at all times to the market value of the securities loaned. Collateral will consist of U.S. government securities, cash equivalents or irrevocable letters of credit. The Fund may bear the risk of delay in recovery of, or loss of rights in, the securities loaned should the borrower experience financial difficulty. The Fund may also record realized gain or loss on securities deemed sold due to a borrower's inability to return securities on loan. The Fund will receive compensation for lending its securities in the form of fees or the retention of a portion of the interest on the investment of any cash received as collateral. The Fund also will continue to receive interest and dividends on the securities loaned and any gain or loss in the market price of the securities loaned that may occur during the term of the loan will be for the account of the Fund.

Although the Fund and New York Life Investments have temporarily suspended securities lending, the Fund and New York Life Investments reserve the right to reinstitute lending when deemed appropriate. The Fund did not have any portfolio securities on loan as of November 30, 2013.

(I) Tender Option Bonds. The Fund may leverage its assets through the use of proceeds received from tender option bond transactions. In a tender option bond transaction, a tender option bond trust (a TOB Issuer) is typically established by a third party sponsor forming a special purpose trust into which the Fund, or an agent on behalf of the Fund, transfers municipal bonds or other municipal securities (Underlying Securities). A TOB Issuer typically issues two classes of beneficial interests: short-term floating rate notes (TOB Floaters), which are sold to

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

third party investors, and residual interest municipal tender option bonds (TOB Residuals), which are generally issued to the Fund. The Fund may invest in both TOB Floaters and TOB Residuals. The Fund may not invest more than 5% of its Managed Assets (as defined in Note 3(A)) in any single TOB Issuer. The Fund may invest in both TOB Floaters and TOB Residuals issued by the same TOB Issuer.

The TOB Issuer receives Underlying Securities from the Fund through the sponsor and then issues TOB Floaters to third party investors and TOB Residuals to the Fund. The Fund is paid the cash (less transaction expenses, which are borne by the Fund) received by the TOB Issuer from the sale of TOB Floaters and typically will invest the cash in additional municipal bonds or other investments permitted by its investment policies. TOB Floaters may have first priority on the cash flow from the securities held by the TOB Issuer and are enhanced with a liquidity support arrangement from a bank or an affiliate of the sponsor (the liquidity provider), which allows holders to tender their position back to the TOB Issuer at par (plus accrued interest). The Fund, in addition to receiving cash from the sale of TOB Floaters, also receives TOB Residuals. TOB Residuals provide the Fund with the right to (1) cause the holders of TOB Floaters to tender their notes to the TOB Issuer at par (plus accrued interest), and (2) acquire the Underlying Securities from the TOB Issuer. In addition, all voting rights and decisions to be made with respect to any other rights relating to the Underlying

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

Securities deposited in the TOB Issuer are passed through to the Fund, as the holder of TOB Residuals. Such a transaction, in effect, creates exposure for the Fund to the entire return of the Underlying Securities deposited in the TOB Issuer, with a net cash investment by the Fund that is less than the value of the Underlying Securities deposited in the TOB Issuer. This multiplies the positive or negative impact of the Underlying Securities' return within the Fund (thereby creating leverage).

Income received by TOB Residuals will vary inversely with the short-term rate paid to holders of TOB Floaters and in most circumstances, TOB Residuals bear substantially all of the Underlying Securities' downside investment risk and also benefits disproportionately from any potential appreciation of the Underlying Securities' value. The amount of such increase or decrease is a function, in part, of the amount of TOB Floaters sold by the TOB Issuer of these securities relative to the amount of TOB Residuals that it sells. The greater the amount of TOB Floaters sold relative to TOB Residuals, the more volatile the income paid on TOB Residuals will be. The price of TOB Residuals will be more volatile than that of the Underlying Securities because the interest rate is dependent on not only the fixed coupon rate of the Underlying Securities but also on the short-term interest rate paid on TOB Floaters.

For TOB Floaters, generally, the interest rate earned will be based upon the market rates for municipal securities with maturities or remarketing provisions that are comparable in duration to the periodic interval of the tender option, which may vary from weekly, to monthly, to extended periods of one year or multiple years. Since the option feature has a shorter term than the final maturity or first call date of the Underlying Securities deposited in the TOB Issuer, the Fund, if it is the holder of the TOB Floaters, relies upon the terms of the agreement with the financial institution furnishing the option as well as the credit strength of that institution. As further assurance of liquidity, the terms of the TOB Issuer provide for a liquidation of the Underlying Security deposited in the TOB Issuer and the application of the proceeds to pay off the TOB Floaters.

The TOB Issuer may be terminated without the consent of the Fund upon the occurrence of certain events, such as the bankruptcy or default of the issuer of the Underlying Securities deposited in the TOB Issuer, a substantial downgrade in the credit quality of the issuer of the securities deposited in the TOB Issuer, the inability of the TOB Issuer to obtain liquidity support for the TOB Floaters, a substantial decline in the market value of the Underlying Securities deposited in the TOB Issuer, or the inability of the sponsor to remarket any TOB Floaters tendered to it by holders of the TOB Floaters. In such an event, the TOB Floaters would be redeemed by the TOB Issuer at par (plus accrued interest) out of the proceeds from a sale of the Underlying Securities deposited in the TOB Issuer. If this happens, the Fund would be entitled to the assets of the TOB Issuer, if any, that remain after the TOB Floaters have been redeemed at par (plus accrued interest). If there are insufficient proceeds from the sale of these securities to redeem all of the TOB Floaters at par (plus accrued interest), the liquidity provider or holders of the TOB Floaters would bear the losses on those securities and there would be no recourse to the Fund's assets (unless the Fund held a recourse TOB Residual).

For financial reporting purposes, Underlying Securities that are deposited into a TOB Issuer are treated as investments of the Fund, and are presented on the Fund's Portfolio of Investments. Outstanding TOB Floaters issued by a TOB Issuer are presented as Payable for Floating

Rate Note Obligations in the Fund's Statement of Assets and Liabilities. Interest income from Underlying Securities are recorded by the Fund on an accrual basis. Interest expense incurred on the TOB Floaters and other expense related to remarketing, administration and trustee services to a TOB Issuer are recognized as a component of Interest expense and fees on the Statement of Operations.

At November 30, 2013, the aggregate value of the Underlying Securities transferred to the TOB Issuer and the related liability for TOB Floaters were as follows:

Underlying Securities Transferred to TOB Issuers	Liability for Floating Rate Note Obligations
\$324,685,525	\$ 202,325,000

As of November 30, 2013, the Fund's average TOB Floaters outstanding and the daily weighted average interest rate, including fees, were as follows:

Average Floating Rate Note Obligations Outstanding	Daily Weighted Average Interest Rate
\$204,568,607	0.33%

(J) Fixed Rate Municipal Term Preferred Shares. On October 4, 2012, the Fund issued and has outstanding, two series of Fixed Rate Municipal Term Preferred Shares (Series A FMTP Shares and Series B FMTP Shares , collectively, FMTP Shares), each with a liquidation preference of \$100,000 per share (Liquidation Preference). Dividends on FMTP Shares, which are recognized as interest expense for financial reporting purposes, are paid semiannually at a fixed annual rate, subject to adjustments in certain circumstances. The FMTP Shares were issued in a

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

private offering exempt from registration under the Securities Act of 1933, as amended. As of November 30, 2013, the number of FMTP Shares outstanding and annual interest rate were as follows:

Series	Dates of Issuance	Shares Outstanding	Annual Interest Rate
A	October 4, 2012	350	1.48%
B	October 4, 2012	350	1.58%

The Fund is obligated to redeem its FMTP Shares by the date as specified in its offering document (Term Redemption), unless earlier redeemed by the Fund. FMTP Shares are subject to optional and mandatory redemption in certain circumstances. FMTP Shares will be subject to redemption, at the option of the Fund (Optional Redemption), in whole or in part at any time only for the purposes of decreasing leverage of the Fund. The Fund may be obligated to redeem certain of the FMTP Shares if the Fund fails to maintain certain asset coverage and leverage ratio requirements and such failures are not cured by the applicable cure date. The Optional Redemption price per share is equal to the sum of the Liquidation Preference per share plus any accrued but unpaid dividends. As of November 30, 2013, the Term

Notes to Financial Statements (Unaudited) (continued)

Redemption date and liquidation value for the FMTP Shares outstanding were as follows:

Series	Term Redemption Date	Liquidation Value
A	October 15, 2015	\$ 35,000,000
B	March 15, 2016	\$ 35,000,000

For financial reporting purposes only, the liquidation value of FMTP Shares is recorded as a liability on the Statement of Assets and Liabilities. Unpaid dividends on FMTP Shares are recognized as a component of Interest expense and fees payable on the Statement of Assets and Liabilities. Dividends accrued on FMTP Shares are recognized as a component of Interest expense and fees in the Statement of Operations. As of November 30, 2013, the fair value of the FMTP Shares for Series A and Series B were \$35,001,750 and \$35,001,400, respectively and are categorized as Level 2 in the fair value hierarchy.

(K) Statement of Cash Flows. The cash amount shown in the Fund's Statement of Cash Flows is the amount included in the Fund's Statement of Assets and Liabilities and represents the cash on hand at its custodian and does not include any Short-Term Investments or deposit at brokers for securities sold short or restricted cash.

(L) Concentration of Risk. The ability of issuers of debt securities held by the Fund to meet their obligations may be affected by economic or political developments in a specific country, industry or region.

(M) Offering Costs. Costs are incurred by the Fund in connection with its offering of FMTP Shares were recorded as deferred charges, which are amortized over the life of the shares. The Fund's amortized deferred charges are recognized as Interest expense and fees on the Statement of Operations.

(N) Indemnifications. Under the Fund's organizational documents, its officers and trustees are indemnified against certain liabilities that may arise out of performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with third-party service providers that contain a variety of representations and warranties and which may provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Fund that have not yet occurred. Based on experience, management is of the view that the risk of loss in connection with these potential indemnification obligations is remote. However, there can be no assurance that material liabilities related to such obligations will not arise in the future, which could adversely impact the Fund.

(O) Quantitative Disclosure of Derivative Holdings. The following tables show additional disclosures about the Fund's derivative and hedging activities, including how such activities are accounted for and their effect on the Fund's financial positions, performance and cash flows. These derivatives are not accounted for as hedging instruments.

Fair value of derivatives instruments as of November 30, 2013:

Liability Derivatives

	Statement of Assets and Interest Rate Liabilities	Contracts Risk	Total
Futures Contracts	Net Assets-Net unrealized appreciation (depreciation) on investments and futures contracts (a)	\$ (45,289)	\$ (45,289)

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

Total Fair Value \$ (45,289) \$ (45,289)

(a) Includes cumulative appreciation (depreciation) of futures contracts as reported in the Portfolio of Investments. Only current day's variation margin is reported within the Statement of Assets and Liabilities.

The effect of derivative instruments on the Statement of Operations for the period ended November 30, 2013:

Realized Gain (Loss)

	Statement of Operations Location	Interest Rate Contracts Risk	Total
Futures Contracts	Net realized gain (loss) on futures transactions	\$ 245,446	\$ 245,446
Total Realized Gain (Loss)		\$ 245,446	\$ 245,446

Change in Unrealized Appreciation (Depreciation)

	Statement of Operations Location	Interest Rate Contracts Risk	Total
Futures Contracts	Net change in unrealized appreciation (depreciation) on futures contracts	\$ (1,004,352)	\$ (1,004,352)

Number of Contracts, Notional Amounts or Shares/Units

	Interest Rate Contracts Risk	Total
Futures Contracts Short	(625)	(625)

Note 3 Fees and Related Party Transactions

(A) Manager and Subadvisor. New York Life Investments, a registered investment adviser and an indirect, wholly-owned subsidiary of New York Life Insurance Company (New York Life), serves as the Fund's Manager, pursuant to a Management Agreement. The Manager provides offices, conducts clerical, recordkeeping and bookkeeping

services, and keeps most of the financial and accounting records required to be maintained by the Fund. Except for the portion of salaries and expenses that are the responsibility of the Fund, the Manager pays the salaries and expenses of all personnel affiliated with the Fund and certain operational expenses of the Fund. The Fund reimburses New York Life Investments in an amount equal to a portion of the salary of the Chief Compliance Officer (CCO) of the Fund. MacKay Shields LLC (MacKay Shields or the Subadvisor), a registered investment adviser and an indirect, wholly-owned subsidiary of New York Life, serves as Subadvisor to the Fund and is responsible for the day-to-day portfolio management of the Fund. Pursuant to the terms of a Subadvisory Agreement (Subadvisory Agreement) between New York Life Investments and MacKay Shields, New York Life Investments pays for the services of the Subadvisor.

The Fund pays the Manager a monthly fee for services performed and facilities furnished at an annual rate of 0.60% of the Managed Assets . Managed Assets is defined as the Fund s total assets, minus the sum of its accrued liabilities (other than Fund liabilities incurred for the purpose of creating effective leverage (i.e. tender option bonds) or Fund liabilities related to liquidation preference of any preferred shares issued).

For the period ended November 30, 2013, New York Life Investments earned fees from the Fund in the amount of \$2,239,704.

State Street, 1 Lincoln Street, Boston, Massachusetts 02111, provides sub-administration and sub-accounting services to the Fund pursuant to an agreement with New York Life Investments. These services include calculating the daily NAV of the Fund, maintaining the general ledger and sub-ledger accounts for the calculation of the Fund s respective NAV, and assisting New York Life Investments in conducting various aspects of the Fund s administrative operations. For providing these services to the Fund, State Street is compensated by New York Life Investments.

(B) Transfer, Dividend Disbursing and Shareholder Servicing Agent. Computershare Trust Company, N.A. (Computershare), 250 Royal Street, Canton, Massachusetts, 02021, is the Fund s transfer, dividend disbursing and shareholder servicing agent pursuant to an agreement between New York Life Investments and Computershare.

(C) Capital. As of November 30, 2013, New York Life Investment Management Holdings LLC beneficially held 5,716 Common shares of the Fund with a value and percentage of net assets applicable to Common shares of \$97,115 and 0.02%, respectively.

Note 4 Federal Income Tax

The tax character of distributions paid during the period ended May 31, 2013 to Common shareholders (shown in the Statement of Changes in Net Assets) and Preferred shareholders (included as interest expense for financial statement purposes (See Note 2(J)) were as follows:

	Ordinary Income	Exempt Interest Dividends	Long-Term Capital Gain
Distributions paid from:			
Common shares	\$ 6,232,103	\$ 22,827,363	\$ 167,950
Preferred shares	186,420	581,704	3,382
Total	\$ 6,418,523	\$ 23,409,067	\$ 171,332

Note 5 Custodian

State Street is the custodian of the cash and the securities of the Fund. Custodial fees are charged to the Fund based on the Fund s net assets and/or the market value of securities in the Fund and the number of certain cash transactions incurred by the Fund.

Note 6 Purchases and Sales of Securities (in 000 s)

During the period ended November 30, 2013, purchases and sales of securities, other than short-term securities, were \$459,154 and \$471,362, respectively.

Note 7 Capital Share Transactions

Common Shares (a):	Shares
For the period June 26, 2012 through May 31, 2013:	
Common shares issued resulting from initial public offering on June 26, 2012 (b)	27,524,029
Common shares issued in reinvestment of dividends	30,535

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

Common shares outstanding at the end of the period

27,554,564

Preferred Shares (a):	Shares	Amount
For the period June 26, 2012 through May 31, 2013:		
Series A Shares Issued	350	\$ 35,000,000
Series B Shares Issued	350	\$ 35,000,000

(a) For the six months ended November 30, 2013, there were no new shares issued.

(b) Includes 5,236 shares held by New York Life at inception date and 2,768,793 shares resulting from overallocation issuance on August 15, 2012.

Note 8 Subsequent Events

In connection with the preparation of the financial statements of the Fund as of and for the period November 30, 2013, events and transactions subsequent to November 30, 2013 through the date the financial statements were issued have been evaluated by the Fund's management for possible adjustment and/or disclosure. No subsequent events requiring financial statement adjustment or disclosure have been identified, other than the following:

On October 1, 2013, the Fund declared a dividend in the amount of \$0.096 per Common share, payable on December 31, 2013, to shareholders of record on December 16, 2013, respectively.

On December 12, 2013, the Fund declared a short-term capital gain and a long-term capital gain distribution in the amount of \$0.32991 and \$0.01786, respectively, per Common share, payable on December 31, 2013, to shareholders of record on December 16, 2013.

On December 16, 2013, the Fund paid its semiannual distribution to Series A and Series B Preferred shareholders in the amounts of \$735.89 and \$785.60 per Preferred share, respectively, in addition, a supplemental distribution (See Note 2(C)) of \$261.42 and \$279.09 per Preferred share, was paid to Series A and Series B Preferred shareholders, respectively.

Notes to Financial Statements (Unaudited) (continued)

On January 2, 2014, the Fund declared dividends for the upcoming quarter as shown in the following schedule:

Month	Ex-Date	Record Date	Payable Date	Amount
January	01/13/2014	01/15/2014	01/31/2014	\$ 0.096
February	02/12/2014	02/14/2014	02/28/2014	\$ 0.096
March	03/12/2014	03/14/2014	03/31/2014	\$ 0.096

Dividend Reinvestment Plan

Pursuant to the Fund's Dividend Reinvestment Plan (the "Plan") shareholders whose shares are registered in their own name may opt-in to the Plan and elect to reinvest all or a portion of their distributions in the Common shares by providing the required enrollment notice to Computershare Trust Company, N.A., the Plan Administrator ("Plan Administrator"). Shareholders whose shares are held in the name of a broker or other nominee may have distributions reinvested only if such a service is provided by the broker or the nominee or if the broker or the nominee permits participation in the Plan. Shareholders whose shares are held in the name of a broker or other nominee should contact the broker or nominee for details. A shareholder may terminate participation in the Plan at any time by notifying the Plan Administrator before the record date of the next distribution through the Internet, by telephone or in writing. All distributions to shareholders who do not participate in the Plan, or have elected to terminate their participation in the Plan, will be paid by check mailed directly to the record holder by or under the direction of the Plan Administrator when the Fund declares a distribution.

When the Fund declares a dividend or other distribution (together, a "Dividend") payable in cash, non-participants in the Plan will receive cash and participants in the Plan (*i.e.*, those holders of Common shares who ("opt-in") will receive the equivalent in Common shares. The Common shares will be acquired by the Plan Administrator for the participants' accounts, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized Common shares from the Fund ("Newly Issued Common Shares") or (ii) by purchase of outstanding Common shares on the open market ("Open-Market Purchases") on the NYSE or elsewhere. If, on the payment date for any Dividend, the closing market price per Common share plus estimated per share fees, which include any brokerage commissions the Plan Administrator is required to pay, is equal to or greater than the NAV per Common share, the Plan Administrator will invest the Dividend amount in Newly Issued Common shares on behalf of the participants. The number of Newly Issued Common Shares to be credited to each participant's account will be determined by dividing the dollar amount of the Dividend by the NAV per Common share on the payment date; provided that, if the NAV is less or equal to 95% of the closing market value on the payment date, the dollar amount of the Dividend will be divided by 95% of the closing market price per Common share on the payment date. If, on the payment date for any Dividend, the NAV per Common share is greater than the closing market value plus estimated per share fees, the Plan Administrator will invest the Dividend amount in Common shares acquired on behalf of the participants in Open-Market Purchases. In the event of a market discount on the payment date for any Dividend, the Plan Administrator will have until the last business day before the next date on which the Common shares trade on an ex-dividend basis or 30 days after the payment date for such Dividend, whichever is sooner (the "Last Purchase Date"), to invest the Dividend amount in Common shares acquired in Open-Market Purchases. It is contemplated that the Fund will pay monthly income Dividends. Therefore, the period during which Open-Market Purchases can be made will exist only from the payment date of each Dividend through the date before the next ex-dividend date which typically will be approximately ten days. If, before the Plan Administrator has completed its Open-Market Purchases, the market price per Common share exceeds the NAV per Common shares, the average per Common share purchase price paid by the Plan

Administrator may exceed the NAV of the Common shares, resulting in the acquisition of fewer Common shares than if the Dividend had been paid in Newly Issued Common Shares on the Dividend payment date. Because of the foregoing difficulty with respect to Open-Market Purchases, the Plan provides that if the Plan Administrator is unable to invest the full Dividend amount in Open-Market Purchases during the purchase period or if the market discount shifts to a market premium during the purchase period, the Plan Administrator may cease making Open-Market Purchases and may invest the uninvested portion of the Dividend amount in Newly Issued Common Shares at the NAV per Common share at the close of business on the Last Purchase Date provided that, if the NAV per Common share is less than or equal to 95% of the then current market price per Common share; the dollar amount of the Dividend will be divided by 95% of the market price per Common share on the payment date.

The Plan Administrator maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Common shares in the account of each Plan participant will be held by the Plan Administrator on behalf of the Plan participant, and each shareholder proxy will include those shares purchased or received pursuant to the Plan. The Plan Administrator will forward all proxy solicitation materials to participants and vote proxies for shares held under the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Administrator will administer the Plan on the basis of the number of Common shares certified from time to time by the record shareholder's name and held for the account of beneficial owners who participate in the Plan.

There will be no charges with respect to Common shares issued directly by the Fund as a result of dividends or capital gains distributions payable either in Common shares or in cash. The Plan Administrator's fees for the handling of the reinvestment of dividends and distributions will be paid by the Fund. However, each participant will pay a per share fee incurred in connection with Open-Market Purchases. The reinvestment of Dividends will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such dividends. See "U.S. Federal Income Tax Matters." Participants that request a sale of shares through the Plan Administrator are subject to

Edgar Filing: MainStay DefinedTerm Municipal Opportunities Fund - Form N-CSRS

a \$2.50 sales fee and a \$.15 per share sold fee. All per share fees include any brokerage commission the Plan Administrator is required to pay.

The Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants with regard to purchases in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence or questions concerning the Plan should be directed to the Plan Administrator, Computershare Trust Company, N.A., by telephone (855) 456-9683, through the internet at www.computershare.com/investor or in writing to P.O. Box 43078, Providence, Rhode Island 02940-3078.

Proxy Voting Policies and Procedures and Proxy Voting Record

A description of the policies and procedures that New York Life Investments uses to vote proxies related to the Fund's securities is available without charge, upon request, (i) by visiting the Fund's website at mainstayinvestments.com; or (ii) on the Securities and Exchange Commission's (SEC) website at www.sec.gov.

The Fund is required to file with the SEC its proxy voting record for the 12-month period ending June 30 on Form N-PX. The Fund's most recent Form N-PX is available free of charge upon request (i) by calling 800-MAINSTAY (624-6782); (ii) by visiting the Fund's website at mainstayinvestments.com; or (iii) on the SEC's website at www.sec.gov.

Shareholder Reports and Quarterly Portfolio Disclosure

The Fund is required to file its complete schedule of portfolio holdings with the SEC for its first and third fiscal quarters on Form N-Q. The Fund's Form N-Q is available without charge on the SEC's website at www.sec.gov or by calling MainStay Investments at 800-MAINSTAY (624-6782). You also can obtain and review copies of Form N-Q by visiting the SEC's Public Reference Room in Washington, DC (information on the operation of the Public Reference Room may be obtained by calling 1-800-SEC-0330).
