EXPLANATORY NOTE

This amendment on Form 10-QSB/A (the April 2006 Form 10-QSB/A) amends the quarterly report on Form 10-QSB of Newgold, Inc. ("Newgold") for the quarter ended April 30, 2006 (the 2006 Form 10-QSB), which was originally filed on June 19, 2006. This Amendment No. 1 to the April 2006 Form 10-QSB/A is being filed for the purpose of reflecting changes made as a result of the completion of the SAS No. 100 review by Newgold's independent accountants by amending certain portions of the Management's Discussion and Analysis or Plan of Operations and expanded disclosure appearing in Newgold's financial statements. This Form 10-QSB/A includes restated financial statements due to an error in recording of derivative transactions. See "Restatement" section under Note 1 to the financial statements.

As required by Rule 12b-15 of the Securities Exchange Act of 1934, set forth in their entirety are Item 1 (Financial Statements), Item 2 (Management's Discussion and Analysis or Plan of Operation), and Item 6 (Exhibits).

As part of this amendment, Newgold is also filing new certifications from its chief executive officer and chief financial officer (Exhibits 31.1, 31.2, and 32).

No attempt has been made in this Form 10-QSB/A to update other disclosures presented in the April 2006 Form 10-QSB. Consequently, except for the adjustments described above, this Amendment No. 1 to the April 2006 Form 10-QSB/A does not reflect events occurring after June 19, 2006, the date of the original filing of Newgold's April 2006 Form 10-QSB, or modify or update those disclosures that may have been affected by subsequent events. Accordingly, this Amendment No. 1 to the April 2006 Form 10-QSB/A should be read in conjunction with Newgold's filings made with the SEC subsequent to the filing of the April 2006 Form 10-QSB.

NEWGOLD, INC.  
(AN EXPLORATION STAGE COMPANY)  
NOTES TO FINANCIAL STATEMENTS  
FOR THE THREE MONTHS ENDED APRIL 30, 2006  
(UNAUDITED)

NOTE 1 - ORGANIZATION AND LINE OF BUSINESS

NEWGOLD, Inc. has been in the business of acquiring, exploring, developing, and producing gold properties. Newgold had rights to mine properties in Nevada and Montana. Its primary focus was on the Relief Canyon mine located near Lovelock, Nevada, where it has performed development and exploratory drilling and was in the process of obtaining permits to allow operation of the Relief Canyon Mine. In December 1997, Newgold placed the Relief Canyon Mine on care and maintenance status. From mid-2001 until the beginning of 2003 Newgold was essentially inactive, only continuing with some of the care and maintenance at Relief Canyon, as provided for by a non-affiliate company owned by the Chairman and CEO of Newgold.

Newgold has embarked on a business strategy whereby it will invest in and/or manage gold mining and other mineral producing properties. Currently, Newgold's principal assets include various mineral leases associated with the Relief Canyon mine located near Lovelock, Nevada along with various items of mining equipment located at that site. Newgold's business will be to acquire, explore and, if warranted, develop various mining properties located in the state of Nevada. Newgold plans to carryout comprehensive exploration and development programs on its properties. While Newgold may fund and conduct these activities itself, Newgold's current plan is to outsource most of these activities through the use of various joint venture, royalty or partnership arrangements pursuant to which other companies would agree to finance and carryout the exploration and development programs on Newgold's mining properties. Consequently, Newgold's current plan will not require the hiring of significant amounts of mining employees but will require a smaller group of employees to monitor and/or supervise the mining and exploration activities of other entities in exchange for royalties or other revenue sharing arrangements.

Restatement

-----

The Company restated its previously filed financial statements due to error in recording of derivative transactions. The effect on its previously reported financial statements is as follows:

	As Reported	Adjustment	As Restated
	-----	-----	-----
Assets	968,928	-	968,928
Liabilities	4,040,071	483,298	4,523,369
Shareholder's Deficit	(3,071,145)	(483,296)	(3,554,441)
Net Loss	(210,718)	(483,300)	(694,078)
EPS	(0.01)	-	(0.01)

NOTE 2 - GOING CONCERN

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

These financial statements have been prepared on a going concern basis. During the years ended January 31, 2006 and 2005 and the period from January 1, 1995 to January 31, 2006, Newgold incurred net losses of approximately \$2,645,231, \$1,278,140 and \$18,088,740, respectively. In addition, Newgold had a total shareholders' deficit of \$2,960,365 and was in the exploration stage since inception and through January 31, 2006. Information for the three months ended April 30, 2006 include a net loss of \$694,078; negative cash flows from operations of \$544,188 and an accumulated shareholders' deficit of \$3,554,441. The Company's ability to continue as a going concern is dependent upon its ability to generate profitable operations in the future and/or to obtain the necessary financing to meet its obligations and repay its liabilities arising from normal business operations when they come due. The outcome of these matters cannot be predicted with any certainty at this time. Since inception, the Company has satisfied its capital needs by issuing equity securities.

11

Management plans to continue to provide for its capital needs during the year ended January 31, 2007 by issuing equity securities or incurring additional debt financing, with the proceeds to be used to re-establish mining operations at Relief Canyon as well as improve its working capital position. These financial statements do not include any adjustments to the amounts and classification of assets and liabilities that may be necessary should Newgold be unable to continue as a going concern.

### NOTE 3 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Basis of Presentation

-----

These financial statements have been prepared in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). Certain information and footnotes normally included in financial statements prepared in accordance with generally accepted accounting principles in the United States of America have been condensed or omitted pursuant to these rules and regulations. These consolidated financial statements should be read in conjunction with the consolidated financial statements and the notes thereto included in Newgold's Form 10-KSB, as filed with the SEC for the year ended January 31, 2006.

#### Exploration Stage Company

-----

Effective January 1, 1995 (date of inception), the Company is considered an exploration stage Company as defined in SFAS No. 7. The Company's exploration stage activities consist of the development of several mining properties located in Nevada. Sources of financing for these exploration stage activities have been primarily debt and equity financing. The Company has, at the present time, not paid any dividends and any dividends that may be paid in the future will depend upon the financial requirements of the Company and other relevant factors.

#### Cash and Cash Equivalents

-----

For the purpose of the statements of cash flows, Newgold considers all highly liquid investments purchased with original maturities of three months or less to be cash equivalents.

#### Restricted Cash

-----

Restricted cash represents a certificate of deposit with Wells Fargo Bank to serve as collateral for a reclamation bond with the Nevada Department of

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

Environmental Protection at the Relief Canyon Mine.

### Deferred Reclamation Costs

-----  
In August 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs. The statement was adopted February 1, 2003. The reclamation costs will be allocated to expense over the life of the related assets and will be adjusted for changes resulting from the passage of time and revisions to either the timing or amount of the original present value estimate.

Prior to adoption of SFAS No. 143, estimated future reclamation costs were based principally on legal and regulatory requirements. Such costs related to active mines were accrued and charged over the expected operating lives of the mines using the UOP method based on proven and probable reserves. Future remediation costs for inactive mines were accrued based on management's best estimate at the end of each period of the undiscounted costs expected to be incurred at a site. Such cost estimates included, where applicable, ongoing care, maintenance and

12

monitoring costs. Changes in estimates at inactive mines were reflected in earnings in the period an estimate was revised.

### Risks Associated with Gold Mining

-----  
The business of gold mining is subject to certain types of risks, including environmental hazards, industrial accidents, and theft. Prior to suspending operations, Newgold carried insurance against certain property damage loss (including business interruption) and comprehensive general liability insurance. While Newgold maintained insurance consistent with industry practice, it is not possible to insure against all risks associated with the mining business, or prudent to assume that insurance will continue to be available at a reasonable cost. Newgold has not obtained environmental liability insurance because such coverage is not considered by management to be cost effective. Newgold currently carries no insurance on any of its properties due to the current status of the mine and Newgold's current financial condition.

### Comprehensive Income

-----  
Newgold utilizes SFAS No. 130, "Reporting Comprehensive Income." This statement establishes standards for reporting comprehensive income and its components in a financial statement. Comprehensive income as defined includes all changes in equity (net assets) during a period from non-owner sources. Examples of items to be included in comprehensive income, which are excluded from net income, include foreign currency translation adjustments, minimum pension liability adjustments, and unrealized gains and losses on available-for-sale marketable securities. Comprehensive income is presented in Newgold's financial statements since Newgold did have unrealized gain (loss) from changes in equity from available-for-sale marketable securities.

### Estimates

-----  
The preparation of financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

### Loss Per Share

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

-----  
Newgold utilizes SFAS No. 128, "Earnings per Share." Basic loss per share is computed by dividing loss available to common shareholders by the weighted-average number of common shares outstanding. Diluted loss per share is computed similar to basic loss per share except that the denominator is increased to include the number of additional common shares that would have been outstanding if the potential common shares had been issued and if the additional common shares were dilutive. Common equivalent shares are excluded from the computation if their effect is anti-dilutive.

The following common stock equivalents were excluded from the calculation of diluted loss per share since their effect would have been anti-dilutive:

	2006	2005
Warrants	21,274,583	13,224,583

### Recent Accounting Pronouncements

-----

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments", which amends SFAS No. 133, "Accounting for Derivatives Instruments and Hedging Activities" and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities". SFAS No. 155 amends SFAS No. 133 to narrow the

13

scope exception for interest-only and principal-only strips on debt instruments to include only such strips representing rights to receive a specified portion of the contractual interest or principle cash flows. SFAS No. 155 also amends SFAS No. 140 to allow qualifying special-purpose entities to hold a passive derivative financial instrument pertaining to beneficial interests that itself is a derivative instrument. The Company is currently evaluating the impact this new Standard but believes that it will not have a material impact on the Company's financial position, results of operations, or cash flows.

In March 2006, the FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets" ("SFAS NO. 156"), which provides an approach to simplify efforts to obtain hedge-like (offset) accounting. This Statement amends FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", with respect to the accounting for separately recognized servicing assets and servicing liabilities. The Statement (1) requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in certain situations; (2) requires that a separately recognized servicing asset or servicing liability be initially measured at fair value, if practicable; (3) permits an entity to choose either the amortization method or the fair value method for subsequent measurement for each class of separately recognized servicing assets or servicing liabilities; (4) permits at initial adoption a one-time reclassification of available-for-sale securities to trading securities by an entity with recognized servicing rights, provided the securities reclassified offset the entity's exposure to changes in the fair value of the servicing assets or liabilities; and (5) requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the balance sheet and additional disclosures for all separately recognized servicing assets and servicing liabilities. SFAS No. 156 is effective for all separately recognized servicing assets and liabilities as of the beginning of an entity's fiscal year that begins after September 15, 2006, with earlier adoption permitted in certain circumstances. The Statement also describes the manner in which it should be initially applied. The Company does not believe that SFAS No. 156 will have a material impact on its financial position, results of operations or cash flows.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

### NOTE 4 - PROPERTY AND EQUIPMENT

Property and equipment at April 30, 2006 was recorded at \$51,485 and consisted of \$32,286 of computer equipment and related software purchased during the quarter ended April 30, 2006 and \$19,199 in additional monitoring wells that were installed at the Relief Canyon Mine during the year ended January 31, 2006.

Newgold had previously determined that the value of its fixed assets at the Relief Canyon Mine were permanently impaired and wrote off assets with a basis of \$800,000. If Newgold can reestablish mining operations at Relief Canyon it is possible that some of these assets could be utilized in such operations.

14

A summary of property and equipment was as follows:

	Buildings	Machinery & Equipment	Development Costs	Capitalized Interest
Relief Canyon Mine	\$ 215,510	\$ 277,307	\$ 261,742	\$ 45,441

### NOTE 5 - NOTES PAYABLE TO RELATED PARTIES AND INDIVIDUALS

Unsecured notes payable to individuals and related parties consist of the following at April 30, 2006:

#### Loans from officers:

Convertible note payable \$ 209,251

The note bears interest at 8% per year.

In October 2004, Newgold consolidated the amounts owed to the Chief Executive Officer and the Chief Financial Officer referred to in Note 9 (excluding accrued interest payable) into new convertible notes payable due September 30, 2005. The notes and any interest accrued on the new notes are convertible into common shares of Newgold at a conversion price of \$0.15 per share. On July 31, 2005 the Chief Executive Officer converted his note payable and accrued interest payable on all of his notes payable into 12,326,231 common shares of Newgold. In connection with the loans, warrants to purchase 5,798,140 and 1,395,007 shares of common stock have been issued to the Chief Executive Officer and the Chief Financial Officer, respectively.

Term note payable \$ 19,844

The note bears interest at 8% per year.

The note is due January 31, 2007 and is owed to the Chief Executive Officer. Newgold is not in default with respect to this loan. In connection with the loan, warrants to purchase 132,293 shares of common stock have been issued. The warrants have been valued using the Black-Scholes option pricing model (see Note 8). The warrants were issued at \$0.15 per share and expire in five years from the date of issuance. These loans were paid off subsequent to April 30, 2006.

Loan from individual \$ 176,500

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

The note bears interest at 8% per year.

The note is currently due. Newgold is in default with respect to this loan.

Other non-interest bearing advances	47,039
	-----
Total notes payable to individuals and related parties	\$ 452,634
	=====

Interest expense was \$85,990, \$356,824 and \$2,495,027 for the three months ended April 30, 2006 and 2005, and the period from January 1, 1995 to April 30, 2006, respectively.

### NOTE 6 - CONVERTIBLE DEBENTURE

On January 27, 2006, Newgold entered into a Securities Purchase Agreement (the "Purchase Agreement") and other agreements in connection with the private placement of a convertible debenture, in the principal amount of \$1,000,000 and bearing interest at 8% per annum (the "Debenture"). The Debenture was funded \$600,000 on January 27, 2006, and \$200,000 on March 2, 2006 with additional funding of \$200,000 due upon the registration statement being declared

15

effective by the SEC. Of the \$600,000 funded on January 27, 2006, \$77,500 was paid for various loan fees and closing costs. Of the \$200,000 funded on March 2, 2006, \$20,000 was paid for loan fees. The Debenture is due and payable on January 27, 2009 unless it is converted into shares of Newgold Common Stock or is repaid prior to its expiration date. The conversion rate is adjustable and at any conversion date, will be the lower of \$0.2626 per share or 95% of the Market Conversion Price.

In conjunction with the Purchase Agreement, Newgold entered into an Investor Registration Rights Agreement (the "Registration Rights Agreement"). The Registration Rights Agreement requires Newgold to register at least 24,050,025 shares of our Common Stock to cover the conversion of the Debenture (assuming conversion prices substantially below \$0.2626) and 2,500,000 shares of our Common Stock issuable upon conversion of warrants (the "Warrants") granted to the Debenture holder. Newgold is required to keep this Registration Statement effective until the Debenture has been fully converted, repaid, or becomes due and the Warrants have been fully exercised or expire. Both the Debenture and the Warrants are currently convertible or exercisable, respectively.

In conjunction with the Purchase Agreement, Newgold entered into a Security Agreement (the "Security Agreement"). The Security Agreement creates a secured interest in favor of the Debenture holder in our mining interest and assets in the Relief Canyon Mine property. This security interest was created by recordation of a Memorandum of Security Agreement filed in Pershing County, Nevada on February 14, 2006. Consequently, if a default occurred under the Debenture, the Debenture holder could take over or sell all of our interests, business and assets associated with the Relief Canyon Mine.

The transaction, to the extent that it is to be satisfied with common stock of the Company, would normally be included as equity obligations. However, in the instant case, due to the indeterminate number of shares which might be issued under the embedded convertible note debt conversion feature, the Company is required to record a liability for the fair value of the detachable warrants and the embedded convertible feature of the note payable (included in the liabilities as a "derivative liability").

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

The accompanying financial statements comply with current requirements relating to warrants and embedded conversion features as described in FAS 133, EITF 98-5, 00-19, and 00-27, and APB 14 as follows:

- o The Company allocated the proceeds received between convertible debt and the detachable warrants based upon the relative fair market values on the date the proceeds were received.
- o Subsequent to the initial recording, the change in the fair value of the detachable warrants, determined under the Black-Scholes option pricing formula, and the change in the fair value of the embedded derivative in the conversion feature of the convertible debentures are recorded as adjustments to the liabilities at January 31, 2006.
- o \$(290,847) of expense relating to the change in the fair value of the Company's stock reflected in the change in the fair value of the warrants and derivatives (noted above) is included as other income (expense).
- o Accreted interest of \$54,629 as of April 30, 2006.

The following table summarizes the various components of the convertible notes as of April 30, 2006:

16

Derivative liabilities	\$ 1,031,926
Convertible debenture	800,000
Unamortized discount	(646,293)
Deferred financing costs, net	(89,375)
	-----
Total convertible debt and financing costs	\$ 1,096,258
	=====

### NOTE 7 - COMMITMENTS AND CONTINGENCIES

Except for the advance royalty and rent payments noted below, Newgold is not obligated under any capital leases or non-cancelable operating lease with initial or remaining lease terms in excess of one year as of April 30, 2006. However, minimum annual royalty payments are required to retain the lease rights to Newgold's properties.

#### Relief Canyon Mine

-----  
Newgold purchased the Relief Canyon Mine from J.D. Welsh Associates ("Welsh") in January 1995. The mine consisted of 39 claims and a lease for access to an additional 800 acres contiguous to the claims. During 1997, Newgold staked an additional 402 claims. Subsequent to January 31, 1998, Newgold reduced the total claims to 50 (approximately 1,000 acres). The annual payment to maintain these claims is \$5,000. As part of the original purchase of Relief Canyon Mine, Welsh assigned the lease from Santa Fe Gold Corporation (Santa Fe) to Newgold. The lease granted Santa Fe the sole right of approval of transfer to any subsequent owner of the Relief Canyon Mine. Santa Fe had accepted lease and minimum royalty payments from Newgold, but has declined to approve the transfer. Due to Welsh's inability to transfer the Santa Fe lease, the original purchase price of \$500,000 for Relief Canyon Mine was reduced by \$50,000 in 1996 to \$450,000.

Subsequent to January 31, 1998, the lease was terminated by Santa Fe. Management believes loss of the Santa Fe lease will have no material adverse affect on the remaining operations of the mine operation or the financial position of Newgold.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

During 1996, Repadre Capital Corporation ("Repadre") purchased for \$500,000 a net smelter return royalty (Repadre Royalty). Repadre was to receive a 1.5% royalty from production at each of the Relief Canyon Mine and Mission Mines. In July 1997, an additional \$300,000 was paid by Repadre for an additional 1% royalty from the Relief Canyon Mine. In October, 1997, when the Mission Mine lease was terminated, Repadre exercised its option to transfer the Repadre Royalty solely to the Relief Canyon Mine resulting in a total 4% royalty. The total amount received of \$800,000 has been recorded as deferred revenue in the accompanying financial statements.

### Crescent Red Caps Joint Venture

-----

Newgold is the owner of a 22.22% joint venture interest and is the operator of the Crescent Red Caps Joint Venture ("Crescent Red Caps"). The remaining 77.78% interest is held by ASDi LLC, a California limited liability company owned by A. Scott Dockter, Chairman and CEO of Newgold. Additionally, Newgold, by making expenditures over the next three years aggregating \$2,700,000, will end up with a 66.66% overall interest in the joint venture. Newgold will then have the opportunity to purchase the remaining joint venture interest held by Mr. Dockter based on the results of the exploration work contemplated by these additional expenditures.

The Company acquired its 22.22% in the joint venture by issuing to ASDi LLC 2,500,000 shares

17

of its restricted common stock and a warrant to purchase 2,500,000 shares of its common stock at a price of \$0.40. The warrant has a term of three years. The common stock was valued at \$0.20 per share for a total of \$500,000. The fair market value of the warrants was calculated to be \$359,522 as determined by the methodology described in Note 9. The Company recorded this investment as a loss from the joint venture of \$859,522 for the year ended January 31, 2006.

The properties are subject to two leases which include approximately 135 unpatented mining claims and cover approximately 2700 acres. All gold, silver and other mineral production by Crescent Red Caps is subject to a 3% net smelter return ("NSR") royalty payable to the lessors except for barite which is subject to a 10% royalty on ore produced from claims covered by the leases.

### Litigation

-----

On February 4, 2000, a complaint was filed against Newgold by Sun G. Wong in the Superior Court of Sacramento County, California (Case No. 00AS00690). In the complaint, Mr. Wong claims that he was held liable as a guarantor of Newgold in a claim brought by Don Christianson in a breach of contract action against Newgold. Despite the fact that Newgold settled the action with Mr. Christianson through the issuance of 350,000 shares of Newgold common stock, Mr. Wong, nevertheless, paid \$60,000 to a third party claiming to hold Mr. Christianson's judgment pursuant to Mr. Wong's guaranty agreement. Similarly, Mr. Wong alleges that he was held liable as a guarantor for a debt of \$200,000 owed by Newgold to Roger Primm with regard to money borrowed by Newgold. Mr. Primm filed suit against Newgold which was settled through the issuance of 300,000 shares of Newgold common stock. Nevertheless, Mr. Wong alleges that he remains liable to a third party claiming to hold Mr. Primm's judgment for up to \$200,000 pursuant to his guaranty of such debt of Mr. Primm.

On December 29, 2000, the superior court entered a default judgment against Newgold in the amount of \$400,553 with regard to the Christianson judgment and an additional \$212,500 in regard to the Primm judgment against Mr. Wong. Newgold believes that Mr. Wong was not obligated to pay any sums pursuant to his

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

guarantees with regard to the Christianson and Primm judgments against Newgold and, as a result, Mr. Wong should not have any recourse against Newgold for reimbursement. Should Mr. Wong seek to assert these judgments against Newgold, Newgold cannot predict the outcome of any such action or the amount of expenses that would be ultimately incurred in defending any such claims. Newgold is currently negotiating a settlement with Mr. Wong; however there is no assurance that an acceptable settlement will be consummated.

Newgold is involved in various other claims and legal actions arising in the ordinary course of business. In the opinion of management, the ultimate dispositions of these matters will not have a material adverse effect on Newgold's financial position, results of operations or liquidity.

### NOTE 8 - SHAREHOLDERS' DEFICIT

#### Common Stock

-----  
 In March 2006 Newgold issued 500,000 shares of common stock at a price of \$0.20 per share to an investor for total proceeds of \$100,000. Additionally, 500,000 warrants to purchase common stock at a price of \$0.40 per share were issued to the investor. The warrants expire three years from the date of issuance.

18

#### Warrants

-----  
 Newgold has issued common stock warrants to officers of Newgold as part of certain financing transactions (see Note 5). Newgold has also issued warrants as part of the issuance of a convertible debt transaction (see Note 6). Newgold has also issued warrants as part of the issuance of common stock (see this Note 8).

The fair market value of warrants issued during the three months ended April 30, 2006 in conjunction with the issuance of common stock was determined to be \$56,724 and was calculated under the Black-Scholes option pricing model with the following assumptions used:

Expected life	3 years
Risk free interest rate	4.78%
Volatility	160.4%
Expected dividend yield	None

The fair value of these warrants has been recorded as both a debit and credit to additional paid in capital.

The following table presents warrant activity from January 31, 2006 through April 30, 2006:

	Number of Shares	Weighted- Average Exercise Price
	-----	-----
Outstanding, January 31, 2006	20,774,583	\$ 0.25
Granted	500,000	\$ 0.40
	-----	-----
Outstanding, April 30, 2006	21,274,583	\$ 0.25
	=====	=====
Exercisable, April 30, 2006	21,274,583	\$ 0.25
	=====	=====

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

### NOTE 9 - RELATED PARTY TRANSACTIONS

#### Loans from officers

-----  
During the quarter ended April 30, 2006 the Company repaid \$5,000 previously borrowed from the Chief Executive Officer. As of April 30, 2006 the net principal balance owing to the Chief Executive Officer and Chairman of Newgold was \$19,844 and accrued interest payable was \$33,430. See Note 5.

During prior periods, the Chief Financial Officer and Secretary of Newgold loaned Newgold an aggregate of \$209,251. As of April 30, 2006 the net principal balance owing to him was \$209,251 and accrued interest payable was \$26,831. See Note 5.

#### Joint venture with officer

-----  
On January 25, 2006, Newgold entered into a joint venture with ASDi, LLC to develop two Nevada mining properties known as the Red Caps Project and Crescent Valley Project. The Red Caps consists of approximately 96 unpatented mining claims covering 1900 acres and the Crescent Valley consists of approximately 39 unpatented mining claims covering 750 acres. The Red Caps and Crescent Valley mining claims are currently owned by ASDi, LLC, which is owned and managed by A. Scott Dockter, Chairman and CEO of Newgold. The joint venture will be operated through a newly formed Nevada limited liability company called Crescent Red

19

Caps, LLC. The terms of the joint venture provide for ASDi to contribute the Red Caps and Crescent Valley mining claims to the LLC in exchange for Newgold issuing 2.5 million shares of its Common Stock to ASDi. Additionally, 2,500,000 warrants to purchase common stock at a price of \$0.40 per share were issued to ASDi LLC. The warrants expire three years from the date of issuance. Newgold will initially own a 22.22% interest in the LLC and ASDi will hold a 77.78% interest. By expending up to \$1,350,000 on each project over the next three years, Newgold can increase its interest in the LLC to 66.66%. Thereafter, Newgold has the right to purchase the remaining interest in the LLC held by ASDi at a price to be determined by the results of the exploration work conducted. Newgold will be the Manager of the LLC.

#### Accrued Payroll and Expenses Owed to Officers

-----  
As of April 30, 2006 Newgold owed the Chief Financial Officer and Secretary of Newgold \$34,000 for back wages.

### NOTE 10 - SUBSEQUENT EVENTS

In May 2006 Newgold repaid the remaining term note payable of \$19,844 to the Chief Executive Officer. The accrued interest remains outstanding. See Note 5.

20

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATIONS

CAUTION ABOUT FORWARD-LOOKING STATEMENTS

This Form 10-QSB includes "forward-looking" statements about future financial results, future business changes and other events that haven't yet occurred. For example, statements like Newgold "expects," "anticipates" or "believes" are forward-looking statements. Investors should be aware that actual results may differ materially from Newgold's expressed expectations because of risks and uncertainties about the future. Newgold does not undertake to update the information in this Form 10-QSB if any forward-looking statement later turns out to be inaccurate. Details about risks affecting various aspects of Newgold's business are discussed throughout this Form 10-QSB and should be considered carefully.

PLAN OF OPERATION FOR THE NEXT TWELVE MONTHS

Certain key factors that have affected our financial and operating results in the past will affect our future financial and operating results. These include, but are not limited to the following:

- o Gold prices, and to a lesser extent, silver prices;
- o Current gold deposits under our control at the Relief Canyon Mine are estimated by us (based on past exploration by Newgold and work done by others).
- o Our proposed exploration of properties now include 78 unpatented mining claims contained in about 1000 acres of the Relief Canyon Property; 96 unpatented mining claims contained in about 1900 acres of the Red Caps Property; and 39 unpatented mining claims contained in about 750 acres of the Crescent Valley Property.
- o Our operating plan is to commence exploration work on all three mining

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

properties beginning with the Relief Canyon mining property in the summer of 2006. We expect this exploration program to continue through the end of 2006. We expect to begin exploration work at the Red Caps and Crescent Valley properties in the fall of 2006. By the fourth quarter of fiscal 2007, we plan to resume mining operation at the Relief Canyon mine. We anticipate by the end of fiscal 2007 to be realizing production revenue from the Relief Canyon mine. Through the use of joint ventures, royalties, arrangements and partnerships, we intend to progressively enlarge the scope and scale of our exploration, mining and processing operations, thereby potentially increasing our chances of locating commercially viable ore deposits which could increase both our annual revenues and ultimately our net profits. Our objective is to achieve annual growth rates in revenue and net profits for the foreseeable future.

- o We expect to make capital expenditures in calendar years 2006 and 2007 of between \$2.5 million and \$4 million, including costs related to the exploration of the Relief Canyon mining property. We will have to raise additional outside capital to pay for

21

these activities and the resumption of mine operations and production at the Relief Canyon mine.

- o Additional funding or the utilization of other venture partners will be required to fund mining operations, exploration, research, development and operating expenses at the Red Caps and Crescent Valley properties. In the past we have been dependent on funding from the private placement of our securities as well as loans from related and third parties as the sole sources of capital to fund operations.

### RESULTS OF OPERATION

Newgold, Inc., a Delaware corporation ("we," "us," "our" or "Newgold") has a business strategy to invest in, explore and if warranted, conduct mining operations of its current mining properties and other mineral producing properties. Newgold is a public company that in the past has been engaged in the exploration, acquisition and development of gold-bearing properties in the continental United States. Currently, our principal assets include various mineral leases associated with the Relief Canyon Mine located near Lovelock, Nevada along with various items of mining equipment and improvements located at that site. We have also entered into a joint venture to explore additional mining properties known as the Red Caps Project and Crescent Valley Project, both of which are located in Lander County, Nevada.

#### Operating Results for the Fiscal Quarters Ended April 30, 2006 and 2005

-----

Although we commenced efforts to re-establish its mining business early in fiscal year 2004, no mining operations have commenced and no revenues have been recognized during the quarters ended April 30, 2006 and 2005, respectively. Newgold hopes to be able to commence generating revenues from mining operations during the 2007 fiscal year. We have granted a 4% net smelting return royalty to a third party related to the Relief Canyon mining property which has been recorded as an \$800,000 deferred option income.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

During the quarter ended April 30, 2006 we spent \$69,510 on reclamation and maintenance expenses related to the Relief Canyon mining property. Reclamation and maintenance expenses expended during the same quarter ended April 30, 2005 were \$29,000. These expenses relate primarily to maintenance and retention costs required to maintain our mining claims. We incurred operating expenses of \$247,729 during the quarter ended April 30, 2006. Of this amount, \$93,500 reflects officer compensation and related payroll taxes during the quarter and \$123,864 reflect fees for outside professional services. A large portion of the outside professional services reflects legal and accounting work pertaining to our annual and quarterly reporting on Form 10-KSB and Form 10-QSB occurring in fiscal year 2006 as well as our recently filed Form SB-2. During the quarter ended April 30, 2005 we incurred operating expenses of \$202,880 of which \$93,500 represented officer compensation and related payroll taxes, \$22,323 reflected promotional expenses and \$59,848 reflected fees for outside professional services. It is anticipated that both mining costs and operating expenses will increase significantly as we resume our exploration program and mining operations.

22

We incurred interest expense of \$85,990 during the quarter ended April 30, 2006 which compares to interest expenses of \$356,824 incurred during the same quarter of 2005. The principal balance of loans outstanding during the first quarter of fiscal year 2007 decreased by \$602,741 compared to first quarter of fiscal year 2006, which was primarily the result of the Chief Executive Officer's conversion of a convertible note payable of \$1,402,742 into shares of common stock in July 2005, which was partially offset by the convertible debenture of \$600,000 issued in January 2006 and an additional convertible debenture of \$200,000 issued in March 2006. The increase in additional interest expense during the quarter ended April 30, 2006 was primarily due to the increase in accretion of warrants issued in October 2004 as a debt discount.

In conjunction with the Convertible Debenture issued January 27, 2006, we allocated the proceeds received between convertible debt and the detachable warrants based upon the relative fair market values on the date the proceeds were received. Subsequent to the initial recording, the change in the fair value of the detachable warrants, determined under the Black-Scholes option pricing formula, and the change in the fair value of the embedded derivative in the conversion feature of the convertible debentures are recorded as adjustments to the liabilities at January 31, 2006. This resulted in \$37,418 of expense relating to the change in the fair value of Newgold's stock reflected in the change in the fair value of the warrants and derivatives (noted above) and is included as other income (expense).

Our total net loss for the quarter ended April 30, 2006 increased to \$694,078 compared to a net loss of \$588,704 incurred for the same quarter ended April 30, 2005. The higher net loss in the first quarter of fiscal 2007 reflects the income effect of the adjustment to fair value of derivatives and lower interest expense that are partially offset by the increase in operating expenses as we reactivate our mining activities and a continued lack of revenues recognized during the quarter.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

### LIQUIDITY AND CAPITAL RESOURCES

We have incurred significant operating losses since inception and during the three months ended April 30, 2006 which has resulted in an accumulated deficit of \$19,724,611 as of April 30, 2006. At April 30, 2006, we had cash and other current assets of \$404,463 compared to \$701,546 at January 31, 2006 and a net working capital deficit of \$2,222,655. Since the resumption of our business in February 2003, we have been dependent on borrowed or invested funds in order to finance our ongoing operations. As of April 30, 2006, we had outstanding debentures and notes payable in the gross principal amount of \$1,252,634 (net balance of \$1,548,892 after \$(735,668) of note payable discount and deferred financing costs and \$1,031,926 of derivative liabilities) which reflects a decrease of \$602,741 compared to notes payable in the gross principal amount of \$1,855,375, (net balance of \$1,327,147 after \$528,228 of note payable discount) as of April 30, 2005.

In January 2006 we made a cash deposit of \$243,204 in a blocked account to cover future reclamation costs as required by the Nevada Department of Environmental Protection for the Relief Canyon Mine.

As of April 30, 2006, we were in default on a promissory note due to an unrelated party in the principal amount \$176,500.

23

On January 25, 2006, Newgold entered into a joint venture with ASDi, LLC to develop two Nevada mining properties known as the Red Caps Project ("Red Caps") and Crescent Valley Project ("Crescent Valley"). Pursuant to the joint venture, Newgold will initially own a 22.22% interest in the LLC and ASDi will hold a 77.78% interest. By expending up to \$1,350,000 on each project over the next three years, Newgold can increase its interest in the LLC to 66.66%. Thereafter, Newgold has the right to purchase the remaining interest in the LLC held by ASDi at a price to be determined by the results of the exploration work conducted.

On January 27, 2006, we entered into a Securities Purchase Agreement and a Convertible Debenture in the principal amount of \$1,000,000 and bearing interest at 8% per annum. The Debenture was funded \$600,000 on January 27, 2006 and we received an additional \$200,000 on March 2, 2006 upon the filing of a resale registration statement with the SEC and we will receive a final \$200,000 upon the registration statement being declared effective by the SEC.

By attempting to resume mining operations, we will require approximately \$10 million to \$15 million in additional working capital above the amounts realized from the convertible debentures to bring the Relief Canyon Mine into full production. It is our intention to pursue several possible funding opportunities including the sale of additional securities, entering into joint venture arrangements, or the incurring of additional debt.

Due to our continuing losses from business operations, the independent auditor's report dated April 26, 2006, includes a "going concern" explanation relating to the fact that Newgold's continuation is dependent upon obtaining additional working capital either through significantly increasing revenues or through outside financing. As of April 30, 2006, Newgold's principal commitments included its obligation to pay ongoing maintenance fees on its 78 unpatented mining claims and the funding arrangement pursuant to the joint venture with ASDi, LLC.

Our management believes that it will need to raise additional capital to

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

continue to develop, promote and conduct our mining operations. Due to our limited cash flow, operating losses and limited assets, it is unlikely that we could obtain financing through commercial or banking sources. Consequently, we are dependent on continuous cash infusions from our major stockholders or other outside sources in order to fund our current operations. Prior to the transaction with Cornell Capital Partners, Newgold's president had paid a substantial portion of Newgold's expenses since restarting its business in February 2003. Although we believe that our creditors and investors will continue to fund Newgold's expenses based upon their significant debt or equity interest in Newgold, there is no assurance that such investors will continue to pay our expenses. If adequate funds are not otherwise available, through public or private financing as well as borrowing from other sources, Newgold would not be able to establish or sustain its mining operations.

### Off-Balance Sheet Arrangements

-----

During the fiscal quarter ended April 30, 2006, Newgold did not engage in any off-balance sheet arrangements as defined in Item 303(c) of the SEC's Regulation S-B.

24

### FACTORS AFFECTING FUTURE OPERATING RESULTS

We are an exploration stage company and an investment in, or ownership position in our common stock is inherently risky. Some of these risks pertain to our business in general, and others are risks which would only affect our common stock. The price of our common stock could decline and/or remain adversely affected due to any of these risks and investors could lose all or part of an investment in our company as a result of any of these risks coming to pass. Readers of this Report should, in addition to considering these risks carefully, refer to the other information contained in this Report, including disclosures in our financial statements and all related notes, for a full description of our business. If any of the events described below were to occur, our business, prospects, financial condition, or results of operations or cash flow could be materially adversely affected. When we say that something could or will have a material adverse effect on it, we mean that it could or will have one or more of these effects. We also refer readers to the information in this Report, discussing the impact of Forward-Looking Statements on the descriptions contained in this Report and included in the Factors discussed below.

As an exploration stage company with unproven mining properties, we may not be able to achieve positive cash flows and our limited history of operations makes evaluation of our business and prospects difficult. We have been relatively inactive since April 2001. Consequently, we have only recently reactivated our business operations and we have not generated any revenues, other than dividend income, since our reactivation. As a result, we have only a limited operating history upon which to evaluate our future potential performance. Our prospects must be considered in light of the risks and difficulties encountered by new companies which have not yet established their business operations.

We will need additional funds to finance our mining and exploration activities as well as fund our current operations. We currently have limited cash reserves and a working capital deficit of \$2,222,655 as of April 30, 2006. Consequently, our ability to meet our long-term obligations in the ordinary course of business is dependent upon our ability to raise additional financing through public or

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

private equity financings, establish cash flow from operations, enter into joint ventures or other arrangements with corporate sources, or secure other sources of financing to fund operations.

Our independent certified public accountants qualified their opinion contained in our financial statements as of and for the years ended January 31, 1997, through January 31, 2006 to include an explanatory paragraph related to our ability to continue as a going concern, stating that " the Company has incurred a net loss of \$2,645,231 and had negative cash flow from operations of \$899,807. In addition, the Company had an accumulated deficit of \$19,030,535 and a shareholders' deficit of \$2,960,365 at January 31, 2006." These factors, among others, as discussed in "Note 2- Going Concern" to the financial statements for the quarter ended April 30, 2006, raise substantial doubt about our ability to continue as a going concern. The auditors recognize that the cash flow uncertainty makes their basic assumptions about value uncertain. When it seems uncertain whether an asset will be used in a "going concern" or sold at auction, the auditors assume that the business is a "going concern" for purposes of all their work, and then they disclose that there is material uncertainty about that assumption. It is definitely a consequence of our negative cash flows from operations that we continually need additional

25

cash. At any time, a serious deficiency in cash flows could occur and it is not always possible or convenient to raise additional capital. A problem in raising capital could result in temporary or permanent insolvency and consequently potential lawsuits by unpaid creditors and perhaps closure of the business. All of these things are possibilities. It is certain, in any case, that analysts and investors view unfavorably any report of independent auditors expressing substantial doubt about a company's ability to continue as a going concern.

The price of gold has experienced an increase in value over the past four years, generally reflecting among other things declining interest rates in the United States; worldwide instability due to terrorism; and a slow recovery from prior global economic slumps. Any significant drop in the price of gold may have a materially adverse affect on the results of our operations unless we are able to offset such a price drop by substantially increased production.

Our disclosures of mineral resources are only estimates. We have no proven or probable reserves and have no ability to currently measure or prove our reserves other than estimating such reserves relying on information produced in the 1990's and thus may be unable to actually recover the quantity of gold anticipated. We can only estimate a potential mineral resource which is a subjective process which depends in part on the quality of available data and the assumptions used and judgments made in interpreting such data. There is significant uncertainty in any resource estimate such that the actual deposits encountered or reserves validated and the economic viability of mining the deposits may differ materially from our estimates.

Gold exploration is highly speculative in nature. Success in exploration is dependent upon a number of factors including, but not limited to, quality of management, quality and availability of geological expertise and availability of exploration capital. Due to these and other factors, the probability of our exploration program identifying individual prospects having commercially significant reserves cannot be predicted. It is likely that many of the claims explored will not contain any commercially viable reserves. As such substantial funds will be spent on exploration which may identify only a few, if any, claims having commercial development potential. In addition, if commercially viable

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

reserves are identified, significant amounts of capital will be required to mine and process such reserves.

Our mining property rights consist of 78 mill site and unpatented mining claims at the Relief Canyon Mine and approximately 135 unpatented mining claims covering approximately 2700 acres located along the Cortez/Battle Mountain trend that are part of the Crescent Red Caps Joint Venture. The validity of unpatented mining claims is often uncertain and is always subject to contest. Unpatented mining claims are generally considered subject to greater title risk than patented mining claims, or real property interests that are owned in fee simple. If title to a particular property is successfully challenged, we may not be able to retain our royalty interests on that property, which could reduce our future revenues.

Mining is subject to extensive regulation by state and federal regulatory authorities. State and federal statutes regulate environmental quality, safety, exploration procedures, reclamation, employees' health and safety, use of explosives, air quality standards, pollution of stream and fresh water sources, noxious odors, noise, dust, and other environmental protection controls as

26

well as the rights of adjoining property owners. We believe that, we are currently operating in substantial compliance with all known safety and environmental standards and regulations applicable to its Nevada property. Currently, we are only permitted to carry on designated mining activities until the mining property is brought into full compliance with the requirements of the Nevada Department of Environmental Protection ("NDEP"). While current environmental work is ongoing, permitting our mining property for full exploration and mining activities is expected to take 4 to 12 months. However, there can be no assurance that permits will be granted or that future changes in federal or Nevada laws, regulations or interpretations thereof will not have a material adverse affect on our ability to resume and sustain mining operations.

The business of gold mining is subject to certain types of risks, including environmental hazards, industrial accidents, and theft. Prior to suspending operations, we carried insurance against certain property damage loss (including business interruption) and comprehensive general liability insurance. Since resuming operations in February 2003, Newgold has not carried insurance on any of its properties due to the current status of the mine and Newgold's current financial condition. While we maintained insurance consistent with industry practice, it is not possible to insure against all risks associated with the mining business, or prudent to assume that insurance will continue to be available at a reasonable cost. We have not obtained environmental liability insurance because such coverage is not considered by management to be cost effective. We currently carry no insurance on any of our properties due to the current status of our mining properties and our current financial condition.

We are substantially dependent upon the continued services of A. Scott Dockter, its president. We have no employment agreement with Mr. Dockter, nor is there either key person life insurance or disability insurance on Mr. Dockter. While Mr. Dockter expects to spend the majority of his time assisting Newgold, there can be no assurance that Mr. Dockter's services will remain available to Newgold. If Mr. Dockter's services are not available to us, we will be materially and adversely affected. However, Mr. Dockter has been a significant shareholder of Newgold since its inception and considers his investment of time and money in Newgold of significant personal value.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

We have acquired the exploration rights to two mining properties from ASDi LLC whose sole manager and majority member is A. Scott Dockter, President and CEO of Newgold. Consequently, Mr. Dockter has a conflict of interest in this joint venture. Furthermore, ASDi LLC will initially hold a 77.78% interest in a newly formed Nevada LLC through which the joint venture will be operated. While Newgold will be the sole manager of the Nevada LLC, Mr. Dockter will be able to control the joint venture activities through his position with the Manager (Newgold) and through his ownership and control of the majority member (ASDi LLC). While Mr. Dockter will endeavor to always act in the best interest of Newgold and its stockholders, stockholders will have only limited ability to influence or object to actions taken by the Nevada LLC in exploring, developing and capital spending on the joint venture properties.

As of April 30, 2006, Newgold had approximately 68,604,072 shares of Common Stock outstanding and a convertible debenture which is convertible into up to 24,050,025 shares of our

27

Common Stock. Additionally, warrants to purchase a total of 21,274,583 shares of our Common Stock were outstanding as of April 30, 2006. Furthermore, up to an additional 24,050,025 shares of Common Stock could become issuable to the convertible debenture holders if a default were to occur. The possibility that substantial amounts of our outstanding Common Stock may be sold by investors or the perception that such sales could occur, often called "equity overhang," could adversely affect the market price of our Common Stock and could impair our ability to raise additional capital through the sale of equity securities in the future

At the time of entering into the \$1,000,000 Secured Convertible Debenture ("Convertible Debenture") with Cornell Capital Partners, the Fixed Conversion Price was \$0.26 per share which would equal approximately 3,808,073 if the entire principal were converted into Newgold Common Stock. This represents the minimum number of shares issuable upon the conversion of the Convertible Debenture. However, if the market price for Newgold Common Stock should remain below \$0.26 per share, we would be required to issue substantially more shares of Common Stock upon the conversion of the Convertible Debenture. The issuance of significantly more shares at a lower conversion price would have a dilutive effect to our current stockholders.

### CRITICAL ACCOUNTING POLICIES

The discussion and analysis of our financial conditions and results of operations are based upon our financial statements, which have been prepared in accordance with generally accepted accounting principles in the United States. The preparation of financial statements requires management to make estimates and disclosures on the date of the financial statements. On an on-going basis, we evaluate our estimates, including, but not limited to, those related to revenue recognition. We use authoritative pronouncements, historical experience and other assumptions as the basis for making judgments. Actual results could differ from those estimates. We believe that the following critical accounting policies affect our more significant judgments and estimates in the preparation of our financial statements.

Exploration Stage Company  
-----

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

Effective January 1, 1995 (date of inception), Newgold is considered an exploration stage company as defined in SFAS No. 7. Newgold's exploration stage activities consist of the development of several mining properties located in Nevada. Sources of financing for these exploration stage activities have been primarily debt and equity financing. Newgold has, at the present time, not paid any dividends and any dividends that may be paid in the future will depend upon the financial requirements of Newgold and other relevant factors.

### Valuation of long-lived assets

-----

Long-lived assets, consisting primarily of property and equipment, patents and trademarks, and goodwill, comprise a significant portion of our total assets. Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that their carrying values may not be recoverable. Recoverability of assets is measured by a comparison of the carrying value of an asset to the future net cash flows expected to be generated by those assets. The cash flow projections are based on historical experience, management's view of growth rates within the

28

industry, and the anticipated future economic environment.

Factors we consider important that could trigger a review for impairment include the following:

- (a) significant underperformance relative to expected historical or projected future operating results,
- (b) significant changes in the manner of its use of the acquired assets or the strategy of its overall business, and
- (c) significant negative industry or economic trends.

When we determine that the carrying value of long-lived assets and related goodwill and enterprise-level goodwill may not be recoverable based upon the existence of one or more of the above indicators of impairment, we measure any impairment based on a projected discounted cash flow method using a discount rate determined by our management to be commensurate with the risk inherent in its current business model.

### Deferred Reclamation Costs

-----

In August 2001, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") No. 143, "Accounting for Asset Retirement Obligations," which established a uniform methodology for accounting for estimated reclamation and abandonment costs. The statement was adopted February 1, 2003. The reclamation costs will be allocated to expense over the life of the related assets and will be adjusted for changes resulting from the passage of time and revisions to either the timing or amount of the original present value estimate.

Prior to adoption of SFAS No. 143, estimated future reclamation costs were based principally on legal and regulatory requirements. Such costs related to active mines were accrued and charged over the expected operating lives of the mines using the UOP method based on proven and probable reserves. Future remediation

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

costs for inactive mines were accrued based on management's best estimate at the end of each period of the undiscounted costs expected to be incurred at a site. Such cost estimates included, where applicable, ongoing care, maintenance and monitoring costs. Changes in estimates at inactive mines were reflected in earnings in the period an estimate was revised.

### Exploration Costs

-----

Exploration costs are expensed as incurred. All costs related to property acquisitions are capitalized.

### Mine Development Costs

-----

Mine development costs consist of all costs associated with bringing mines into production, to

29

develop new ore bodies and to develop mine areas substantially in advance of current production. The decision to develop a mine is based on assessment of the commercial viability of the property and the availability of financing. Once the decision to proceed to development is made, development and other expenditures relating to the project will be deferred and carried at cost with the intention that these will be depleted by charges against earnings from future mining operations. No depreciation will be charged against the property until commercial production commences. After a mine has been brought into commercial production, any additional work on that property will be expensed as incurred, except for large development programs, which will be deferred and depleted.

### Reclamation Costs

-----

Reclamation costs and related accrued liabilities, which are based on our interpretation of current environmental and regulatory requirements, are accrued and expensed, upon determination.

Based on current environmental regulations and known reclamation requirements, management has included its best estimates of these obligations in its reclamation accruals. However, it is reasonably possible that our best estimates of our ultimate reclamation liabilities could change as a result of changes in regulations or cost estimates.

### Valuation of Derivative Instruments

-----

FAS No. 133 "Accounting for Derivative Instruments and Hedging Activities" requires bifurcation of embedded derivative instruments and measurement of their fair value for accounting purposes. In determining the appropriate fair value, the Company uses the Black Scholes model as a valuation technique. Derivative liabilities are adjusted to reflect fair value at each period end, with any increase or decrease in the fair value being recorded in results of operations as Adjustments to Fair Value of Derivatives. In addition, the fair values of freestanding derivative instruments such as warrants are valued using Black Scholes models.

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

### Recent Accounting Pronouncements

-----

In February 2006, the FASB issued SFAS No. 155, "Accounting for Certain Hybrid Financial Instruments", which amends SFAS No. 133, "Accounting for Derivatives Instruments and Hedging Activities" and SFAS No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishment of Liabilities". SFAS No. 155 amends SFAS No. 133 to narrow the scope exception for interest-only and principal-only strips on debt instruments to include only such strips representing rights to receive a specified portion of the contractual interest or principle cash flows. SFAS No. 155 also amends SFAS No. 140 to allow qualifying special-purpose entities to hold a passive derivative financial instrument pertaining to beneficial interests that itself is a derivative instrument. Newgold is currently evaluating the impact of this new Standard but believes that it will not have a material impact on Newgold's financial position, results of operations, or cash flows.

In March 2006, the FASB issued SFAS No. 156, "Accounting for Servicing of Financial Assets" which provides an approach to simplify efforts to obtain hedge-like (offset) accounting. This

30

Statement amends FASB Statement No. 140, "Accounting for Transfers and Servicing of Financial Assets and Extinguishments of Liabilities", with respect to the accounting for separately recognized servicing assets and servicing liabilities. The Statement (1) requires an entity to recognize a servicing asset or servicing liability each time it undertakes an obligation to service a financial asset by entering into a servicing contract in certain situations; (2) requires that a separately recognized servicing asset or servicing liability be initially measured at fair value, if practicable; (3) permits an entity to choose either the amortization method or the fair value method for subsequent measurement for each class of separately recognized servicing assets or servicing liabilities; (4) permits at initial adoption a one-time reclassification of available-for-sale securities to trading securities by an entity with recognized servicing rights, provided the securities reclassified offset the entity's exposure to changes in the fair value of the servicing assets or liabilities; and (5) requires separate presentation of servicing assets and servicing liabilities subsequently measured at fair value in the balance sheet and additional disclosures for all separately recognized servicing assets and servicing liabilities. SFAS No. 156 is effective for all separately recognized servicing assets and liabilities as of the beginning of an entity's fiscal year that begins after September 15, 2006, with earlier adoption permitted in certain circumstances. The Statement also describes the manner in which it should be initially applied. Newgold does not believe that SFAS No. 156 will have a material impact on its financial position, results of operations or cash flows.

### ITEM 3. CONTROLS AND PROCEDURES

#### Disclosure Controls and Procedures.

-----

We carried out an evaluation, under the supervision and with the participation of management, including our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined under Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended) as of the end of the quarter covered by this report. Based upon that evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures are effective in timely alerting them to material information

## Edgar Filing: NEWGOLD INC - Form 10QSB/A

relating to us (including our consolidated subsidiary) that is required to be included in our periodic reports.

### Changes in Internal Control Over Financial Reporting.

-----

There was no change in our internal control over financial reporting that occurred during the period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.
