Notes to Condensed Consolidated Financial Statements

1. Basis of Presentation

The accompanying unaudited condensed consolidated financial statements of Ferro Corporation (“Ferro,” “we,” “us” or “the Company”) have been prepared in accordance with accounting principles generally accepted in the United States of America (“U.S. GAAP”) for interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. These statements reflect all normal and recurring adjustments which are, in the opinion of management, necessary to present fairly the financial position, results of operations and cash flows for the periods presented. The preparation of financial statements in conformity with U.S. GAAP requires us to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. These interim condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and related notes included in our Annual Report on Form 10-K for the year ended December 31, 2016.

As discussed in Note 3, in the third quarter of 2016, we completed the disposition of the Europe-based Polymer Additives business and have classified the related operating results, net of income tax, as discontinued operations in the accompanying condensed consolidated statements of operations for the three and nine months ended September 30, 2016.

During the first quarter of 2017, the Company renamed the Pigments, Powders and Oxides segment “Color Solutions.”

Operating results for the three and nine months ended September 30, 2017, are not necessarily indicative of the results expected in subsequent quarters or for the full year ending December 31, 2017.

2. Recent Accounting Pronouncements

Recently Adopted Accounting Standards

In March 2016, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2016-09, Compensation – Stock Compensation: (Topic 718): Improvements to Employee Share-Based Payment Accounting. ASU 2016-09 is intended to simplify several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. This new guidance requires all income tax effects of awards to be recognized as income tax expense or benefit in the income statement when the awards vest or are settled. Cash flow related to excess tax benefits will no longer be classified as a financing activity on the statement of cash flows but will

be presented with all other income tax cash flows as an operating activity. The new guidance also provides an accounting policy election to account for award forfeitures as they occur. Finally, the updated standard also allows the Company to repurchase more of an employee's shares for tax withholding purposes without triggering liability accounting and clarifies that all cash tax payments made on an employee's behalf for withheld shares should be presented as financing activities on the statement of cash flows.

The Company adopted ASU 2016-09, in the first quarter of 2017. As a result of the adoption, tax benefits of \$0.3 million were recorded in income tax expense. The Company has elected to account for award forfeitures as they occur.

In addition, the Company elected to apply the presentation requirements for cash flows related to excess tax benefits prospectively. The presentation requirements for cash flows related to employee taxes paid for withheld shares had no impact on the statements of cash flows since the Company has historically presented such payments as financing activities.

New Accounting Standards

In August 2017, the FASB issued ASU 2017-12, Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities. ASU 2017-12 provides guidance to better align an entity's risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. This pronouncement is effective for fiscal years beginning after December 15, 2018, including interim

Table of Contents

periods within those fiscal years. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In May 2017, the FASB issued ASU 2017-09, Compensation – Stock Compensation: (Topic 718): Scope of Modification Accounting. ASU 2017-09 provides guidance about which changes to the terms or conditions of a share-based payment award require an entity to apply modification accounting in Topic 718. This pronouncement is effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In March 2017, the FASB issued ASU 2017-07, Compensation – Retirement Benefits: (Topic 715): Improving the Presentation of Net Periodic Pension Cost and Net Periodic Postretirement Benefit Costs. ASU 2017-07 requires that an employer report the service cost component in the same line item as other compensation costs arising from services rendered during the period. The other components of net benefit costs are to be presented in the income statement separately from the service costs component and outside a subtotal of income from operations. Employers will have to disclose the line(s) used to present the other components of net periodic benefit cost, if the components are not presented separately in the income statement. This pronouncement is effective for annual periods beginning after December 15, 2017, including interim periods within those annual periods. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, Intangibles – Goodwill and Other: (Topic 350): Simplifying the Test for Goodwill Impairment. ASU 2017-04 is intended to simplify the subsequent measurement of goodwill by eliminating Step 2 from the current goodwill impairment test. This pronouncement is effective for the annual or any interim goodwill impairment tests conducted in fiscal years beginning after December 15, 2019. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In January 2017, the FASB issued ASU 2017-01, Business Combinations: (Topic 805): Clarifying the Definition of a Business. ASU 2017-01 is intended to clarify the definition of a business with the objective of adding guidance to assist entities in evaluating whether transactions should be accounted for as acquisitions (or dispositions) of assets or businesses. This pronouncement is effective for annual periods beginning after December 15, 2017, including interim periods within those fiscal years. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In October 2016, the FASB issued ASU 2016-16, Income Taxes: (Topic 740): Intra-Entity Transfers of Assets Other Than Inventory. ASU 2016-16 is intended to improve the accounting for the income tax consequences of intra-entity transfers of assets other than inventory and requires the recognition of the income tax consequences of an intra-entity transfer of an asset, other than inventory, when the transfer occurs. This pronouncement is effective for annual periods beginning after December 15, 2017, including interim reporting periods within those annual reporting periods. The Company is in the process of assessing the impact that the adoption of this ASU will have on our consolidated financial statements.

In August 2016, the FASB issued ASU 2016-15, Statement of Cash Flow: (Topic 230): Classification of Certain Cash Receipts and Cash Payments. ASU 2016-15 is intended to address eight specific cash flow issues with the objective of reducing the existing diversity in practice. This pronouncement is effective for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The Company is in the process of assessing the impact the adoption of this ASU will have on our consolidated financial statements.

In February 2016, the FASB issued ASU 2016-02, Leases: (Topic 842). ASU 2016-02 requires companies to recognize a lease liability and asset on the balance sheet for operating leases with a term greater than one year. This pronouncement is effective for fiscal years beginning after December 15, 2018, and interim periods within those fiscal years. The Company is in the process of assessing the impact the adoption of this ASU will have on our consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers: (Topic 606). This ASU replaces nearly all existing U.S. GAAP guidance on revenue recognition. The standard prescribes a five-step model for recognizing revenue, the application of which will require significant judgment. This standard is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. We will adopt the new standard effective January 1, 2018, using the modified

Table of Contents

retrospective method. We are nearing completion of our assessment and review of specific contracts and we do not currently believe ASU 2014-09 will have a material effect on our consolidated financial statements.

No other new accounting pronouncements issued had or are expected to have a material impact of the Company's consolidated financial statements.

3. Discontinued Operations

During 2014, we commenced a process to market for sale our Europe-based Polymer Additives business. We determined that the criteria to classify these assets as held-for-sale under ASC Topic 360, Property, Plant and Equipment, were met at that time. On August 22, 2016, we completed the disposition of the Europe-based Polymer Additives business to Plahoma Two AG, an affiliate of the LIVIA Group. The Company made a capital contribution of €12 million (approximately \$13.6 million) to its subsidiaries that owned the assets prior to the close of the sale. In August 2016, prior to the sale, an impairment charge of \$26.8 million was recorded under ASC Topic 360 Property, Plant and Equipment. The charge was calculated as the difference of the executed transaction price and the carrying value of the assets. The impairment charge included \$1.1 million associated with the reclassification of foreign currency translation loss from Accumulated other comprehensive loss (Note 17). We have classified the Europe-based Polymer Additives operating results, net of income tax, as discontinued operations in the accompanying condensed consolidated statements of operations for the three and nine months ended September 30, 2016.

The table below summarizes results for the Europe-based Polymer Additives assets, for the three and nine months ended September 30, 2016, which are reflected in our condensed consolidated statements of operations as discontinued operations. Interest expense has been allocated to the discontinued operations based on the ratio of net assets of each business to consolidated net assets excluding debt.

4. Acquisitions

Dip Tech Ltd.

On August 2, 2017, the Company acquired 100% of the equity interests of Dip Tech Ltd. (“Dip-Tech”), a leading provider of digital printing solutions for glass coatings, for \$77.3 million, excluding customary adjustments. Dip-Tech is headquartered in Kfar Saba, Israel. The fair value of the consideration transferred was cash paid at closing of \$60.4 million and contingent consideration of \$16.9 million. The Company incurred acquisition costs for the three and nine months ended September 30, 2017, of \$2.1 million, which is included in Selling, general and administrative expenses in our condensed consolidated statements of operations. The acquired business contributed net sales of \$6.4 million for the three and nine months ended September 30, 2017, and net loss attributable to Ferro Corporation of \$1.1 million for the three and nine months ended September 30, 2017. The net loss attributable to Ferro Corporation was driven by the amortization of inventory step up costs of \$0.8 million and acquired intangible asset amortization

Table of Contents

costs of \$0.6 million for the three and nine months ended September 30, 2017. Dip-Tech incurred research and development costs of \$1.1 million for the three and nine months ended September 30, 2017.

The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches, and estimates made by management. As of September 30, 2017, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company. The Company preliminarily recorded \$46.3 million of amortizable intangible assets, \$38.2 million of goodwill, \$11.5 million of a deferred tax liability, \$3.2 million of personal and real property and \$1.1 million of net working capital on the condensed consolidated balance sheet.

Gardenia Quimica S.A.

On August 3, 2017, the Company acquired the majority interest in Gardenia Quimica S.A. (“Gardenia”) for \$3.0 million. The Company previously owned 46% of Gardenia and recorded it as an equity method investment. In connection with this transaction, the Company now owns 83.5% and fully consolidates Gardenia. Due to a change of control that occurred, the Company recorded a gain on purchase of \$2.6 million related to the difference between the Company’s carrying value and fair value of the previously held equity method investment.

On April 24, 2017, the Company acquired 100% of the equity interests of S.P.C. Group s.r.l., and 100% of the equity interests of Smalti per Ceramiche, s.r.l. (“SPC”), for €17.9 million (approximately \$19.4 million), including the assumption of debt of €5.7 million (approximately \$6.2 million). SPC is a high-end tile coatings manufacturer based in Italy focused on fast-growing specialty products. SPC’s products, strong technology, design capabilities, and customer-centric business model are complementary to our Performance Coatings segment, and position us for continued growth in the high-end tile markets. The Company incurred acquisition costs for the three and nine months ended September 30, 2017, of \$0.1 million and \$1.3 million, respectively, which is included in Selling, general and administrative expenses in our condensed consolidated statements of operations.

The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches, and estimates made by management. As of September 30, 2017, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company. The Company preliminarily recorded \$6.7 million of personal and real property, \$5.9 million of amortizable intangible assets, \$5.7 million of net working capital, \$3.3 million of goodwill and \$2.2 million of a deferred tax liability on the condensed consolidated balance sheet.

Cappelle Pigments NV

On December 9, 2016, the Company acquired 100% of the equity interests of Belgium-based Cappelle Pigments NV (“Cappelle”), a leader in specialty, high-performance inorganic and organic pigments used in coatings, inks and plastics, for €49.8 million (approximately \$52.7 million), including the assumption of debt of €9.8 million. The acquired business contributed net sales of \$17.8 million and \$55.8 million for the three and nine months ended September 30, 2017, respectively, and net income attributable to Ferro Corporation of \$1.2 million and \$2.3 million for the three and nine months ended September 30, 2017, respectively.

The information included herein has been prepared based on the preliminary allocation of the purchase price using estimates of the fair value and useful lives of the assets acquired and liabilities assumed, which were determined with the assistance of third parties who performed independent valuations using discounted cash flow and comparative market approaches, and estimates made by management. As of September 30, 2017, the purchase price allocation is subject to further adjustment until all information is fully evaluated by the Company. The Company preliminarily recorded \$28.6 million of net working capital, \$24.1 million of personal and real property, \$3.5 million of goodwill and \$3.5 million of a deferred tax liability on the condensed consolidated balance sheet.

In the production of some of our products, we use precious metals, which we obtain from financial institutions under consignment agreements with terms of one year or less. The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign. These fees were \$0.3 million and \$0.2 million for the three months ended September 30, 2017 and 2016, respectively, and were \$0.8 million and \$0.6 million for the nine months ended September 30, 2017 and 2016, respectively. We had on-hand precious metals owned by participants in our precious metals consignment program of \$36.3 million at September 30, 2017, and \$28.7 million at December 31, 2016, measured at fair value based on market prices for identical assets and net of credits.

6. Property, Plant and Equipment

Property, plant and equipment is reported net of accumulated depreciation of \$493.6 million at September 30, 2017, and \$439.4 million at December 31, 2016. Unpaid capital expenditure liabilities, which are non-cash investing activities, were \$3.2 million at September 30, 2017, and \$2.4 million at September 30, 2016.

We recorded a \$3.9 million gain on sale of a closed site in Australia which was recorded in Miscellaneous (income) expense, net in our condensed consolidated statements of operations for the nine months ended September 30, 2016.

As discussed in Note 3, our Europe-based Polymer Additives assets had been classified as held-for-sale under ASC Topic 360, Property, Plant and Equipment from 2014 until the ultimate sale of the business in August 2016. As such, at each historical reporting date, these assets were tested for impairment comparing the fair value of the assets, less costs to sell, to the carrying value. The fair value was determined using both the market approach and income approach, utilizing Level 3 measurements within the fair value hierarchy, which indicated the fair value, less costs to sell, was less than the carrying value during the first quarter of 2016, resulting in an impairment charge of \$24.1 million, representing the remaining carrying value of long-lived assets at that reporting date. During the third quarter of 2016, prior to the sale, an impairment charge of \$26.8 million, representing net working capital, was recorded under

ASC Topic 360 Property, Plant and Equipment. The impairment charges of \$26.8 million and \$50.9 million are included in Loss from discontinued operations, net of income taxes in our condensed consolidated statements of operations for the three and nine months ended September 30, 2016, respectively.

2014 Credit Facility

In 2014, the Company entered into a credit facility that was amended on January 25, 2016, and August 29, 2016, resulting in a \$400 million secured revolving line of credit with a term of five years and a \$300 million secured term loan facility with a term of seven years from the original issuance date (the “Previous Credit Facility”) with a group of lenders that was replaced on February 14, 2017, by the Credit Facility (as defined below). For discussion of the Company’s Previous Credit Facility, refer to Note 8 in the Company’s Annual Report on Form 10-K for the year ended December 31, 2016.

In conjunction with the refinancing of the Previous Credit Facility, we recorded a charge of \$3.9 million in connection with the write-off of unamortized issuance costs, which is recorded within Loss on extinguishment of debt in our condensed consolidated statement of operations for the nine months ended September 30, 2017.

2017 Credit Facility

On February 14, 2017, the Company entered into a new credit facility (the “Credit Facility”) with a group of lenders to refinance its then outstanding credit facility debt and to provide liquidity for ongoing working capital requirements and general corporate purposes.

The Credit Facility consists of a \$400 million secured revolving line of credit with a term of five years, a \$357.5 million secured term loan facility with a term of seven years and a €250 million secured euro term loan facility with a term of seven years. The term loans are payable in equal quarterly installments in an amount equal to 0.25% of the original principal amount of the term loans, with the remaining balance due on the maturity date thereof. In addition, the Company is required, on an annual basis, to make a prepayment of term loans until they are fully paid and then to the revolving loans in an amount equal to a portion of the Company’s excess cash flow, as calculated pursuant to the Credit Facility.

Subject to the satisfaction of certain conditions, the Company can request additional commitments under the revolving line of credit or term loans in the aggregate principal amount of up to \$250 million to the extent that existing or new lenders agree to provide such additional commitments and/or term loans and, certain additional debt subject to satisfaction of certain covenant levels.

Certain of the Company’s U.S. subsidiaries have guaranteed the Company’s obligations under the Credit Facility and such obligations are secured by (a) substantially all of the personal property of the Company and the U.S. subsidiary guarantors and (b) a pledge of 100% of the stock of certain of the Company’s U.S. subsidiaries and 65% of the stock of certain of the Company’s direct foreign subsidiaries.

Interest Rate – Term Loans: The interest rates applicable to the U.S. term loans will be, at the Company’s option, equal to either a base rate or a LIBOR rate plus, in both cases, an applicable margin. The interest rates applicable to the Euro term loans will be a Euro Interbank Offered Rate (“EURIBOR”) rate plus an applicable margin.

- The base rate for U.S. term loans will be the highest of (i) the federal funds rate plus 0.50%, (ii) syndication agent's prime rate or (iii) the daily LIBOR rate plus 1.00%. The applicable margin for base rate loans is 1.50%.
- The LIBOR rate for U.S. term loans shall not be less than 0.75% and the applicable margin for LIBOR rate U.S. term loans is 2.50%.
- The EURIBOR rate for Euro term loans shall not be less than 0% and the applicable margin for EURIBOR rate loans is 2.75%.
- For LIBOR rate term loans and EURIBOR rate term loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate or EURIBOR rate, as applicable, for the corresponding duration.

At September 30, 2017, the Company had borrowed \$355.7 million under the secured term loan facility at an interest rate of 3.73% and €248.8 million under the secured euro term loan facility at an interest rate of 2.75%. At September 30, 2017, there were no additional borrowings available under the term loan facilities. We entered into interest rate swap agreements in the second quarter of 2017. These

Table of Contents

swaps converted \$150 million and €90 million of our term loans from variable interest rates to fixed interest rates. At September 30, 2017, the effective interest rate for the term loan facilities after adjusting for the interest rate swap was 4.27% for the secured term loan facility and 3.00% for the euro term loan facility.

Interest Rate – Revolving Credit Line: The interest rates applicable to loans under the revolving credit line will be, at the Company's option, equal to either a base rate or a LIBOR rate plus, in both cases, an applicable variable margin. The variable margin will be based on the ratio of (a) the Company's total consolidated net debt outstanding at such time to (b) the Company's consolidated EBITDA computed for the period of four consecutive fiscal quarters most recently ended.

- The base rate for revolving loans will be the highest of (i) the federal funds rate plus 0.50%, (ii) syndication agent's prime rate or (iii) the daily LIBOR rate plus 1.00%. The applicable margin for base rate loans will vary between 0.75% and 1.75%.
 - The LIBOR rate for revolving loans shall not be less than 0% and the applicable margin for LIBOR rate revolving loans will vary between 1.75% and 2.75%.
- For LIBOR rate revolving loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.

At September 30, 2017, there were \$27.4 million borrowings under the revolving credit line at an interest rate of 3.48%. After reductions for outstanding letters of credit secured by these facilities, we had \$367.9 million of additional borrowings available under the revolving credit facilities at September 30, 2017.

The Credit Facility contains customary restrictive covenants including, but not limited to, limitations on use of loan proceeds, limitations on the Company's ability to pay dividends and repurchase stock, limitations on acquisitions and dispositions, and limitations on certain types of investments. The Credit Facility also contains standard provisions relating to conditions of borrowing and customary events of default, including the non-payment of obligations by the Company and the bankruptcy of the Company.

Specific to the revolving credit facility, the Company is subject to a financial covenant regarding the Company's maximum leverage ratio. If an event of default occurs, all amounts outstanding under the Credit Facility may be accelerated and become immediately due and payable. At September 30, 2017, we were in compliance with the covenants of the Credit Facility.

Other Financing Arrangements

We maintain other lines of credit to provide global flexibility for our short-term liquidity requirements. These facilities are uncommitted lines for our international operations and totaled \$61.8 million and \$7.3 million at September 30, 2017, and December 31, 2016, respectively. The unused portions of these lines provided additional liquidity of \$43.5 million at September 30, 2017, and \$6.7 million at December 31, 2016.

(1) The carrying values of the term loan facilities are net of unamortized debt issuance costs of \$7.7 million and \$3.7 million for the period ended September 30, 2017, and December 31, 2016, respectively.

The fair values of cash and cash equivalents are based on the fair values of identical assets. The fair values of loans payable are based on the present value of expected future cash flows and approximate their carrying amounts due to the short periods to maturity. At September 30, 2017, the fair value of the term loan facility is based on market price information and is measured using the last available bid price of the instrument on a secondary market and at December 31, 2016, is based on the present value of expected future cash flows and interest rates that would be currently available to the Company for issuance of similar types of debt instruments with similar terms and remaining maturities adjusted for the Company's performance risk. The revolving credit facility and other long-term notes payable are based on the present value of expected future cash flows and interest rates that would be currently available to the Company for issuance of similar types of debt instruments with similar terms and remaining maturities adjusted for the Company's performance risk. The fair values of our interest rate swaps are determined based on inputs that are readily available in public markets or can be derived from information available in publicly quoted markets. The fair values of the foreign currency forward contracts are based on market prices for comparable contracts.

Derivative Instruments

The Company may use derivative instruments to partially offset its business exposure to foreign currency and interest rate risk on expected future cash flows, on net investment in certain foreign subsidiaries and on certain existing assets and liabilities. However, the Company may choose not to hedge in countries where it is not economically feasible to enter into hedging arrangements or where hedging inefficiencies exist, such as timing of transactions.

Derivatives Designated as Hedging Instruments

Interest rate swaps. To reduce our exposure to interest rate changes on our variable-rate debt, we entered into interest rate swap agreements in the second quarter of 2017. These swaps converted \$150 million and €90 million of our term loans from variable interest

rates to fixed interest rates. These swaps qualify and were designated as cash flow hedges. The effective portions of cash flow hedges are recorded in accumulated other comprehensive income (“AOCI”) and are reclassified into earnings in the same period the underlying hedged items impact earnings. The ineffective portions of cash flow hedges is recognized immediately into earnings. The Company did not have any ineffectiveness related to the interest rate swaps during the three and nine months ended September 30, 2017.

Net investment hedge. To help protect the value of the Company’s net investment in European operations against adverse changes in exchange rates, the Company uses non-derivative financial instruments, such as its foreign currency denominated debt, as economic hedges of its net investments in certain foreign subsidiaries. Net investment

hedges that use foreign currency denominated debt to hedge net investments are not impacted by ASC Topic 820, Fair Value Measurements, as the debt used as a hedging instrument is marked to a value with respect to changes in spot foreign currency exchange rates and not with respect to other factors that may impact fair value. The effective portions of net investment hedges are recorded in AOCI as a part of the cumulative translation adjustment. The ineffective portions of net investment hedges are recognized immediately into earnings.

Effective May 1, 2017, the Company designated a portion of its euro denominated debt as a net investment hedge for accounting purposes. The fair value of the net investment hedge is €79.4 million at September 30, 2017. The Company did not have any ineffectiveness related to net investment hedges during the three and nine months ended September 30, 2017.

Derivatives Not Designated as Hedging Instruments

Foreign currency forward contracts. We manage foreign currency risks principally by entering into forward contracts to mitigate the impact of currency fluctuations on transactions. These forward contracts are not formally designated as hedges. Gains and losses on these foreign currency forward contracts are netted with gains and losses from currency fluctuations on transactions arising from international trade and reported as Foreign currency losses, net in the condensed consolidated statements of operations. We recognized net losses of \$1.4 million and \$4.1 million in the three and nine months ended September 30, 2017, respectively, and net losses of \$1.2 million and \$5.8 million in the three and nine months ended September 30, 2016, respectively, arising from the change in fair value of our financial instruments, which offset the related net gains and losses on international trade transactions. The notional amount of foreign currency forward contracts was \$212.1 million at September 30, 2017, and \$338.2 million at December 31, 2016.

The following table presents the effect on our condensed consolidated statements of operations for the three and nine months ended September 30, 2017 and 2016, respectively, of our foreign currency forward contracts:

10. Income Taxes

Income tax expense for the nine months ended September 30, 2017, was \$23.2 million, or 25.9% of pre-tax income, compared with \$22.7 million, or 25.8% of pre-tax income in the prior-year same period. The tax expense in the first nine months of 2017 and 2016, as a percentage of pre-tax income, is lower than the U.S. federal statutory income tax rate of 35% primarily as a result of foreign statutory rate differences.

11. Contingent Liabilities

We have recorded environmental liabilities of \$6.6 million at September 30, 2017, and \$7.2 million at December 31, 2016, for costs associated with the remediation of certain of our properties that have been contaminated. The liability at September 30, 2017, and December 31, 2016, was primarily related to a non-operating facility in Brazil, and for retained environmental obligations related to a site in the United States that was part of the sale of our North American and Asian metal powders product lines in 2013. The costs include legal and consulting fees, site studies, the design and implementation of remediation plans, post-remediation monitoring and related activities. The ultimate liability could be affected by numerous uncertainties, including the extent of contamination found, the required period of monitoring and the ultimate cost of required remediation.

There are various lawsuits and claims pending against the Company and its consolidated subsidiaries. We do not currently expect the resolution of these lawsuits and claims to materially affect the consolidated financial position, results of operations, or cash flows of the Company.

12. Retirement Benefits

Net periodic benefit (credit) cost of our U.S. pension plans (including our unfunded nonqualified plans), non-U.S. pension plans, and postretirement health care and life insurance benefit plans for the three months ended September 30, 2017 and 2016, respectively, follow:

13. Stock-Based Compensation

On May 22, 2013, our shareholders approved the 2013 Omnibus Incentive Plan (the “Plan”), which was adopted by the Board of Directors on February 22, 2013, subject to shareholder approval. The Plan’s purpose is to promote the Company’s long-term financial interests and growth by attracting, retaining and motivating high quality key employees and directors, motivating such employees and directors to achieve the Company’s short- and long-range performance goals and objectives and thereby align their interests with those of the Company’s shareholders. The Plan reserves 4,400,000 shares of common stock to be issued for grants of several different types of long-term incentives including stock options, stock appreciation rights, restricted shares, performance shares, other common stock-based awards, and dividend equivalent rights.

In the first nine months of 2017, our Board of Directors granted 0.2 million stock options, 0.2 million performance share units and 0.2 million restricted stock units under the Plan.

We estimate the fair value of each stock option on the date of grant using the Black-Scholes option pricing model. The following table details the weighted-average grant-date fair values and the assumptions used for estimating the fair values of stock option grants made during the nine months ended September 30, 2017:

	Stock Options
Weighted-average grant-date fair value	\$ 7.29
Expected life, in years	6.0
Risk-free interest rate	1.9% - 2.3 %
Expected volatility	48.0% -51.5 %

The weighted average grant date fair value of our performance share units granted in the nine months ended September 30, 2017, was \$14.89. We measure the fair value of performance share units based on the closing market price of our common stock on the date of the grant. These shares are evaluated each reporting period for respective attainment rates against the performance criteria.

Table of Contents

We measure the fair value of restricted share units based on the closing market price of our common stock on the date of the grant. The restricted share units vest over three years. The weighted-average grant date fair value per unit for grants made during the nine months ended September 30, 2017, was \$14.73.

We recognized stock-based compensation expense of \$6.9 million for the nine months ended September 30, 2017, and \$5.3 million for the nine months ended September 30, 2016. At September 30, 2017, unearned compensation cost related to the unvested portion of all stock-based compensation awards was approximately \$9.6 million and is expected to be recognized over the remaining vesting period of the respective grants, through the first quarter of 2020.

14. Restructuring and Cost Reduction Programs

Total restructuring and impairment charges were \$1.5 million and \$7.7 million for the three and nine months ended September 30, 2017, respectively, and \$0.0 million and \$1.7 million for the three and nine months ended September 30, 2016, respectively. Included in the charges for the nine months ended September 30, 2017, was an impairment charge of \$1.5 million related to an equity method investment. The remainder of the charges relate to our restructuring and cost reduction programs, which are primarily related to costs associated with integration of our recent acquisitions, and are further summarized below.

	Employee Severance	Other Costs	Asset Impairment	Total
	(Dollars in thousands)			
Balances at December 31, 2016	\$ 239	\$ 1,489	\$ —	\$ 1,728

Balances at September 30, 2017	\$ 203	\$ 1,261	\$ —	\$ 1,464

We expect to make cash payments to settle the remaining liability for employee severance benefits and other costs primarily over the next twelve months where applicable, except where legal or contractual obligations would require it to extend beyond that period.

The number of anti-dilutive or unearned shares was 1.6 million and 1.8 million for the three and nine months ended September 30, 2017, respectively, and 2.3 million and 2.5 million for the three and nine months ended September 30, 2016, respectively. These shares were excluded from the calculation of diluted earnings per share due to their anti-dilutive impact.

16. Share Repurchase Program

The Company's Board of Directors approved share repurchase programs, under which the Company is authorized to repurchase up to \$100 million of the Company's outstanding shares of Common Stock on the open market, including through a Rule 10b5-1 plan, or in privately negotiated transactions.

The timing and amount of shares to be repurchased will be determined by the Company, based on evaluation of market and business conditions, share price, and other factors. The share repurchase programs do not obligate the Company to repurchase any dollar amount or number of common shares, and may be suspended or discontinued at any time.

For the nine months ended September 30, 2016, the Company repurchased 1,175,437 shares of common stock at an average price of \$9.72 per share for a total cost of \$11.4 million. As of September 30, 2017, Company shares having an aggregate value of up to \$50.0 million may still be purchased under the programs.

19. Subsequent Events

On November 1, 2017, the Company acquired 100% of the equity interests of Endeka Group, a global producer of high-value coatings and key raw materials for €63.8 million (approximately \$74.3 million), excluding customary adjustments and fees.

The operating results related to the Endeka Group acquisition will be included in the Company's condensed consolidated financial statements commencing on the date of the acquisition.

Due to the timing of the acquisition, the Company's initial purchase price accounting was incomplete at the time these financial statements were issued. As such, the Company cannot disclose the allocation of the acquisition price to acquired assets and liabilities and the related disclosures at this time.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Net sales for the three months ended September 30, 2017, increased by \$61.5 million, or 21.3%, compared with the prior-year same period. The increase in net sales was driven by higher sales in Color Solutions, Performance Colors and Glass and Performance Coatings of \$27.9 million, \$17.8 million and \$15.8 million, respectively. During the three months ended September 30, 2017, gross profit increased \$14.6 million, or 16.4%, compared with the prior-year same period; as a percentage of net sales, it decreased approximately 120 basis points to 29.6%. The increase in gross profit was attributable to higher gross profit across all of our segments, with increases in Color Solutions, Performance Colors and Glass and Performance Coatings of \$7.9 million, \$5.6 million and \$1.8 million, respectively.

For the three months ended September 30, 2017, selling, general and administrative ("SG&A") expenses increased \$9.9 million, or 17.8%, compared with the prior-year same period. The increase was primarily driven by \$6.7 million of expenses related to acquisitions completed within the last year.

For the three months ended September 30, 2017, net income was \$23.0 million, compared with net loss of \$8.7 million for the prior-year same period, and net income attributable to common shareholders was \$22.8 million, compared with net loss attributable to common shareholders of \$8.9 million for the prior-year same period. Income from continuing operations was \$23.0 million for the three months ended September 30, 2017, compared with \$20.5 million for the three months ended September 30, 2016. Our total gross profit for the third quarter of 2017 was \$103.6 million, compared with \$89.0 million for the three months ended September 30, 2016.

Outlook

For the remainder of 2017, we expect to continue to benefit from strong organic growth in our businesses, in addition to contributions from recent acquisitions. With respect to gross margins, we could continue to be impacted by the raw material headwinds that have been experienced throughout the year thus far, which we would expect to cover through pricing actions, product reformulations and other optimization actions, with some lag. We expect Selling, general and administrative costs to continue to leverage favorably as a percentage of Net sales, compared with the prior year. Further, as we move through the balance of the year, we will continue to monitor current and near-term increasing customer demand levels, and align our production and inventories accordingly.

We remain focused on the integration of our recent acquisitions and achieving the identified synergies. We will continue to drive innovation and optimization throughout our business.

Factors that could adversely affect our future performance include those described under the heading "Risk Factors" in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2016.

Results of Operations - Consolidated

Comparison of the three months ended September 30, 2017 and 2016

For the three months ended September 30, 2017, income from continuing operations was \$23.0 million, compared with \$20.5 million income from continuing operations for the three months ended September 30, 2016. Net income was \$23.0 million, compared with net loss of \$8.7 million for the three months ended September 30, 2016. For the three months ended September 30, 2017, net income attributable to common shareholders was \$22.8 million, or earnings per share of \$0.27, compared with net loss attributable to common shareholders of \$8.9 million, or loss per share of \$0.11, for the three months ended September 30, 2016.

Gross profit	\$ 103,616	\$ 88,981	\$ 14,635	16.4 %
Gross profit as a % of net sales	29.6 %	30.8 %		

Net sales increased by \$61.5 million, or 21.3%, in the three months ended September 30, 2017, compared with the prior-year same period, driven by higher sales in Color Solutions, Performance Colors and Glass and Performance Coatings of \$27.9 million, \$17.8 million and \$15.8 million, respectively. The increase in net sales was driven in part by acquisitions including Cappelle, which contributed sales of \$17.8 million, ESL, which contributed sales of \$10.5 million, and SPC, which contributed sales of \$7.8 million, each of which was acquired after the third quarter of 2016. The increase in net sales was also driven by organic growth, with Color Solutions growing \$10.1 million and Performance Coatings growing \$7.2 million.

Gross Profit

Gross profit increased \$14.6 million, or 16.4%, in the three months ended September 30, 2017, compared with the prior-year same period, and as a percentage of net sales, it decreased 120 basis points to 29.6%. The increase in gross profit was attributable to increases across all of our segments, with increases in Color Solutions, Performance Colors

and Glass and Performance Coatings of \$7.9 million, \$5.6 million and \$1.8 million, respectively. The increase in gross profit was driven by acquisitions of \$11.9 million, favorable product pricing of \$6.0 million, lower manufacturing costs of \$4.7 million and favorable foreign currency impacts of \$1.6 million, partially offset by higher raw material costs of \$8.6 million and lower sales volumes and mix of \$0.3 million.

SG&A expenses were \$9.9 million higher in the three months ended September 30, 2017, compared with the prior-year same period. The higher SG&A expenses compared with the prior-year same period are primarily driven by expenses associated with businesses acquired within the last year of approximately \$6.7 million. The acquisitions were the primary driver of the increase in personnel expenses, and accounted for the entire increase in intangible asset amortization. The increase in incentive compensation of \$1.5 million was driven by the Company's performance relative to targets established for certain awards compared with the prior-year same period.

The following table presents SG&A expenses attributable to sales, research and development and operations costs as strategic services and other SG&A costs as functional services.

Interest expense	\$ 7,248	\$ 5,304	\$ 1,944	36.7	%

Interest expense increased in the third quarter of 2017 compared with the prior-year same period. The increase in interest expense was due to an increase in the average long-term debt balance during the three months ended September 30, 2017, compared with the prior-year same period and an increase of the amortization of debt issuance costs associated with the 2017 Credit Facility, partially offset by a favorable average borrowing rate as a result of the refinancing completed in the first quarter of 2017.

Income Tax Expense

During the third quarter of 2017, income tax expense was \$7.4 million, or 24.3% of pre-tax income. In the third quarter of 2016, we recorded tax expense of \$6.2 million, or 23.1% of pre-tax income. The tax expense in the third quarter of 2017 and 2016, as a percentage of pre-tax income, is lower than the U.S. federal statutory income tax rate of 35%, primarily as a result of foreign statutory rate differences.

The net sales increase of \$15.8 million was driven by increases in sales from Europe, Asia Pacific and Latin America, partially offset by lower sales in the United States. The increase in sales from Europe was primarily attributable to SPC, which was acquired in second quarter of 2017, which contributed \$7.8 million, and higher sales of colors, frits and glazes, and porcelain enamel of \$3.0 million, \$1.3 million and \$1.0 million, respectively. The increase in sales from Asia Pacific was driven by higher sales of digital inks and porcelain enamel of \$1.1 million and \$0.4 million. Latin America sales remained relatively flat and the decrease in sales in the United States is fully attributable to lower sales of porcelain enamel.

SG&A expenses were \$20.9 million higher in the nine months ended September 30, 2017, compared with the prior-year same period. The higher SG&A expenses compared with the prior-year same period are primarily driven by businesses acquired within the last year of approximately \$17.2 million. The acquisitions were the primary driver of the increase in personnel expenses, and accounted for the entire increase in intangible asset amortization. The increase in business development expenses is due to higher professional fees. The increase in stock-based compensation expense of \$1.6 million is driven by the Company's performance relative to targets for certain awards compared with the prior-year same period, as well as increases in the Company's stock price.

The net sales increase of \$43.8 million was driven by higher sales from all regions. The increase in sales from Europe was primarily driven by higher sales from acquisitions. The increase in sales from the United States was driven by sales from ESL of \$20.2 million, partially offset by a decrease in sales of industrial products. The increase from Asia Pacific was primarily due to higher sales of automobile and decoration products of \$1.6 million and \$0.8 million, respectively. The increase from Latin America was primarily driven by an increase in sales of decoration products of \$1.8 million, partially offset by a decrease in sales of automobile and industrial products.

Cash flows from operating activities. Cash flows provided by operating activities increased \$27.9 million in the first nine months of 2017 compared with the prior-year same period. The increase was primarily due to higher earnings after consideration of non-cash items, partially offset by higher cash outflows for net working capital of \$7.7 million and other current assets and liabilities of \$6.3 million.

Cash flows from investing activities. Cash flows used in investing activities increased \$73.2 million in the first nine months of 2017 compared with the prior-year same period. The increase was primarily due to higher cash outflows for acquisitions of \$60.5 million, higher capital expenditures of \$11.9 million, and lower proceeds from a closed site in Australia of \$3.6 million which occurred during the nine months ended September 30, 2016. The cash outflow was partially offset by proceeds from the sale of an equity method investment of \$2.3 million.

Cash flows from financing activities. Cash flows provided by financing activities increased \$66.1 million in the first nine months of 2017 compared with the prior-year same period. As further discussed in Note 8, during the nine months ended September 30, 2017, we paid off our Previous Credit Facility and entered into our Credit Facility, consisting of a \$400 million secured revolving line of credit, a \$357.5 million secured term loan facility and a €250 million secured euro term loan facility. This transaction resulted in additional borrowings in the first nine months of 2017 of \$82.2 million compared to the prior-year same period. Further, compared to the prior-year same period, net repayments under loans payable was \$13.4 million higher. Additionally, during the first nine months of 2017, we paid

debt issuance costs related to the Credit Facility entered into during the period, partially offset by no repurchases of treasury stock being made during the first nine months of 2017.

Capital Resources and Liquidity

2017 Credit Facility

On February 14, 2017, the Company entered into a new credit facility (the “Credit Facility”) with a group of lenders to refinance its then outstanding credit facility debt and to provide liquidity for ongoing working capital requirements and general corporate purposes.

The Credit Facility consists of a \$400 million secured revolving line of credit with a term of five years, a \$357.5 million secured term loan facility with a term of seven years and a €250 million secured euro term loan facility with a term of seven years. The term loans are payable in equal quarterly installments in an amount equal to 0.25% of the original principal amount of the term loans, with the remaining balance due on the maturity date thereof. In addition, the Company is required, on an annual basis, to make a prepayment of term loans until they are fully paid and then to the revolving loans in an amount equal to a portion of the Company’s excess cash flow, as calculated pursuant to the Credit Facility.

Table of Contents

Subject to the satisfaction of certain conditions, the Company can request additional commitments under the revolving line of credit or term loans in the aggregate principal amount of up to \$250 million to the extent that existing or new lenders agree to provide such additional commitments and/or term loans and, certain additional debt subject to satisfaction of certain covenant levels.

Certain of the Company's U.S. subsidiaries have guaranteed the Company's obligations under the Credit Facility and such obligations are secured by (a) substantially all of the personal property of the Company and the U.S. subsidiary guarantors and (b) a pledge of 100% of the stock of certain of the Company's U.S. subsidiaries and 65% of the stock of certain of the Company's direct foreign subsidiaries.

Interest Rate – Term Loans: The interest rates applicable to the U.S. term loans will be, at the Company's option, equal to either a base rate or a LIBOR rate plus, in both cases, an applicable margin. The interest rates applicable to the Euro term loans will be a Euro Interbank Offered Rate ("EURIBOR") rate plus an applicable margin.

- The base rate for U.S. term loans will be the highest of (i) the federal funds rate plus 0.50%, (ii) syndication agent's prime rate or (iii) the daily LIBOR rate plus 1.00%. The applicable margin for base rate loans is 1.50%.
- The LIBOR rate for U.S. term loans shall not be less than 0.75% and the applicable margin for LIBOR rate U.S. term loans is 2.50%.
- The EURIBOR rate for Euro term loans shall not be less than 0% and the applicable margin for EURIBOR rate loans is 2.75%.
- For LIBOR rate term loans and EURIBOR rate term loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate or EURIBOR rate, as applicable, for the corresponding duration.

At September 30, 2017, the Company had borrowed \$355.7 million under the secured term loan facility at an interest rate of 3.73% and €248.8 million under the secured euro term loan facility at an interest rate of 2.75%. At September 30, 2017, there were no additional borrowings available under the term loan facilities.

Interest Rate – Revolving Credit Line: The interest rates applicable to loans under the revolving credit line will be, at the Company's option, equal to either a base rate or a LIBOR rate plus, in both cases, an applicable variable margin. The variable margin will be based on the ratio of (a) the Company's total consolidated net debt outstanding at such time to (b) the Company's consolidated EBITDA computed for the period of four consecutive fiscal quarters most recently ended.

- The base rate for revolving loans will be the highest of (i) the federal funds rate plus 0.50%, (ii) syndication agent's prime rate or (iii) the daily LIBOR rate plus 1.00%. The applicable margin for base rate loans will vary between 0.75% and 1.75%.
 - The LIBOR rate for revolving loans shall not be less than 0% and the applicable margin for LIBOR rate revolving loans will vary between 1.75% and 2.75%.
- For LIBOR rate revolving loans, the Company may choose to set the duration on individual borrowings for periods of one, two, three or six months, with the interest rate based on the applicable LIBOR rate for the corresponding duration.

At September 30, 2017, there were \$27.4 million borrowings under the revolving credit line at an interest rate of 3.48%. After reductions for outstanding letters of credit secured by these facilities, we had \$367.9 million of additional borrowings available under the revolving credit facilities at September 30, 2017.

The Credit Facility contains customary restrictive covenants including, but not limited to, limitations on use of loan proceeds, limitations on the Company's ability to pay dividends and repurchase stock, limitations on acquisitions and dispositions, and limitations on certain types of investments. The Credit Facility also contains standard provisions relating to conditions of borrowing and customary events of default, including the non-payment of obligations by the

Company and the bankruptcy of the Company.

Specific to the revolving credit facility, the Company is subject to a financial covenant regarding the Company's maximum leverage ratio. If an event of default occurs, all amounts outstanding under the Credit Agreement may be accelerated and become immediately due and payable. At September 30, 2017, we were in compliance with the covenants of the Credit Facility.

Off Balance Sheet Arrangements

Consignment and Customer Arrangements for Precious Metals. We use precious metals, primarily silver, in the production of some of our products. We obtain precious metals from financial institutions under consignment agreements. The financial institutions retain ownership of the precious metals and charge us fees based on the amounts we consign and the period of consignment. These fees were \$0.3 million and \$0.2 million for the three months ended September 30, 2017 and 2016. We had on hand precious metals owned by participants in our precious metals program of \$36.3 million at September 30, 2017, and \$28.7 million at December 31, 2016, measured at fair value based on market prices for identical assets and net of credits.

The consignment agreements under our precious metals program involve short-term commitments that typically mature within 30 to 90 days of each transaction and are typically renewed on an ongoing basis. As a result, the Company relies on the continued willingness of financial institutions to participate in these arrangements to maintain this source of liquidity. On occasion, we have been required to deliver cash collateral. While no deposits were outstanding at September 30, 2017, or December 31, 2016, we may be required to furnish cash collateral in the future based on the quantity and market value of the precious metals under consignment and the amount of collateral-free lines provided by the financial institutions. The amount of cash collateral required is subject to review by the financial institutions and can be changed at any time at their discretion, based in part on their assessment of our creditworthiness.

Bank Guarantees and Standby Letters of Credit.

At September 30, 2017, the Company and its subsidiaries had bank guarantees and standby letters of credit issued by financial institutions that totaled \$7.1 million. These agreements primarily relate to Ferro's insurance programs, foreign energy purchase contracts and foreign tax payments.

Other Financing Arrangements

We maintain other lines of credit to provide global flexibility for Ferro's short-term liquidity requirements. These facilities are uncommitted lines for our international operations and totaled \$61.8 million and \$7.3 million at September 30, 2017, and December 31, 2016, respectively. We had \$43.5 million and \$6.7 million of additional borrowings available under these lines at September 30, 2017, and December 31, 2016, respectively.

Liquidity Requirements

Our primary sources of liquidity are available cash and cash equivalents, available lines of credit under the revolving credit facility, and cash flows from operating activities. As of September 30, 2017, we had \$52.2 million of cash and cash equivalents. Cash generated in the U.S. is generally used to pay down amounts outstanding under our revolving credit facility and for general corporate purposes, including acquisitions. If needed, we could repatriate the majority of cash held by foreign subsidiaries without the need to accrue and pay U.S. income taxes. We do not anticipate a liquidity need requiring such repatriation of these funds to the U.S.

Our liquidity requirements and uses primarily include debt service, purchase commitments, labor costs, working capital requirements, restructuring expenditures, acquisition costs, capital investments, precious metals cash collateral requirements, and postretirement obligations. We expect to meet these requirements in the long term through cash provided by operating activities and availability under existing credit facilities or other financing arrangements. Cash flows from operating activities are primarily driven by earnings before non-cash charges and changes in working

capital needs. We had additional borrowing capacity of \$411.4 million at September 30, 2017, and \$112.0 million at December 31, 2016, available under our various credit facilities, primarily our revolving credit facility.

Our revolving credit facility subjects us to a customary financial covenant regarding the Company's maximum leverage ratio. This covenant under our Credit Facility restricts the amount of our borrowings, reducing our flexibility to fund ongoing operations and strategic initiatives.

As of September 30, 2017, we were in compliance with our maximum leverage ratio covenant of 4.25x as our actual ratio was 2.79x, providing \$80.3 million of EBITDA cushion on the leverage ratio, as defined within the Credit Facility. To the extent that economic conditions in key markets deteriorate or we are unable to meet our business projections and EBITDA falls below approximately \$130 million for rolling four quarters, based on reasonably consistent net debt levels with those as of March 31, 2017,

Table of Contents

we could become unable to maintain compliance with our leverage ratio covenant. In such case, our lenders could demand immediate payment of outstanding amounts and we would need to seek alternate financing sources to pay off such debts and to fund our ongoing operations. Such financing may not be available on favorable terms, if at all.

Difficulties experienced in global capital markets could affect the ability or willingness of counterparties to perform under our various lines of credit, forward contracts, and precious metals program. These counterparties are major, reputable, multinational institutions, all having investment-grade credit ratings. Accordingly, we do not anticipate counterparty default. However, an interruption in access to external financing could adversely affect our business prospects and financial condition.

We assess on an ongoing basis our portfolio of businesses, as well as our financial and capital structure, to ensure that we have sufficient capital and liquidity to meet our strategic objectives. As part of this process, from time to time we evaluate the possible divestiture of businesses that are not critical to our core strategic objectives and, where appropriate, pursue the sale of such businesses and assets. We also evaluate and pursue acquisition opportunities that we believe will enhance our strategic position. Generally, we publicly announce divestiture and acquisition transactions only when we have entered into a material definitive agreement or closed on those transactions.

Critical Accounting Policies and Their Application

There were no material changes to our critical accounting policies described in “Critical Accounting Policies” within Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2016.

Impact of Newly Issued Accounting Pronouncements

Refer to Note 2 to the condensed consolidated financial statements under Item 1 of this Quarterly Report on Form 10-Q for a discussion of accounting standards we recently adopted or will be required to adopt.

Risk Factors

Certain statements contained here and in future filings with the SEC reflect the Company’s expectations with respect to future performance and constitute “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. These statements are subject to a variety of uncertainties, unknown risks and other factors concerning the Company’s operations and business environment, which are difficult to predict and are beyond the control of the Company. Factors that could adversely affect our future financial performance include those described under the heading “Risk Factors” in Item 1A of Part I of our Annual Report on Form 10-K for the year ended December 31, 2016.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The primary objective of the following information is to provide forward-looking quantitative and qualitative information about our exposure to instruments that are sensitive to fluctuations in interest rates and foreign currency exchange rates.

Our exposure to interest rate risk arises from our debt portfolio. We manage this risk by controlling the mix of fixed versus variable-rate debt after considering the interest rate environment and expected future cash flows. To reduce our exposure to interest rate changes on variable rate debt, we entered into interest rate swap agreements. These swaps effectively convert a portion of our variable rate debt to a fixed rate. Our objective is to limit variability in earnings, cash flows and overall borrowing costs caused by changes in interest rates, while preserving operating flexibility.

We operate internationally and enter into transactions denominated in foreign currencies. These transactions expose us to gains and losses arising from exchange rate movements between the dates foreign currencies are recorded and the dates they are settled. We manage this risk by entering into forward currency contracts that substantially offset these gains and losses.

The notional amounts, carrying amounts of assets (liabilities), and fair values associated with our exposure to these market risks and sensitivity analysis about potential gains (losses) resulting from hypothetical changes in market rates are presented in the table below.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

Ferro is committed to maintaining disclosure controls and procedures that are designed to ensure that information required to be disclosed in its Exchange Act reports is recorded, processed, summarized, and reported within the time periods specified in the U.S. Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to its management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(b) of the Exchange Act, Ferro has carried out an evaluation, under the supervision and with the participation of its management, including its Chief Executive Officer and its Chief Financial Officer, of the effectiveness of the design and operation of its disclosure controls and procedures. The evaluation examined those disclosure controls and procedures as of September 30, 2017, the end of the period covered by this report. Based on that evaluation, our Chief Executive Officer and our Chief Financial Officer concluded that the disclosure controls and procedures were effective as of September 30, 2017.

Changes in Internal Control over Financial Reporting

During the third quarter of 2017, there were no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.
