AMTECH SYSTEMS, INC. AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
THREE AND SIX MONTHS ENDED MARCH 31, 2015 AND 2014
(UNAUDITED)

1. Basis of Presentation

Nature of Operations and Basis of Presentation – Amtech Systems, Inc. (the “Company” or “Amtech”) is a global supplier of advanced thermal processing equipment to the solar, semiconductor, electronics and LED manufacturing markets, and includes diffusion, atomic layer deposition (“ALD”) and plasma-enhanced chemical vapor deposition (“PECVD”) systems, ion implanters and solder reflow systems. The Company also supplies wafer handling automation and polishing equipment and related consumable products. The Company sells these products worldwide, particularly in Asia, the United States and Europe.

The Company serves markets in industries that are experiencing rapid technological advances and which historically have been very cyclical. Therefore, future profitability and growth depend on the Company’s ability to develop or acquire and market profitable new products and on its ability to adapt to cyclical trends.

The accompanying unaudited condensed consolidated financial statements have been prepared pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”), and consequently do not include all disclosures normally required by accounting principles generally accepted in the United States of America. In the opinion of management, the accompanying unaudited interim condensed consolidated financial statements contain all adjustments necessary, all of which are of a normal and recurring nature, to present fairly our financial position, results of operations and cash flows. Certain information and note disclosures normally included in financial statements have been condensed or omitted pursuant to the rules and regulations of the SEC. These condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014.

The consolidated results of operations for the three and six months ended March 31, 2015, are not necessarily indicative of the results to be expected for the full fiscal year.

Principles of Consolidation – The condensed consolidated financial statements include the accounts of the Company, its wholly-owned subsidiaries and subsidiaries in which it has a controlling interest. The Company reports noncontrolling interests in consolidated entities as a component of equity separate from the Company's equity. All material intercompany accounts and transactions have been eliminated in consolidation.

Use of Estimates – The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Revenue Recognition - We review product and service sales contracts with multiple deliverables to determine if separate units of accounting are present. Where separate units of accounting exist, revenue allocated to delivered items is the lower of the relative selling price of the delivered items in the sales arrangement or the portion of the selling price that is not contingent upon performance of the service.

We recognize revenue when persuasive evidence of an arrangement exists; the product has been delivered and title has transferred, or services have been rendered; and the seller’s price to the buyer is fixed or determinable and

collectability is reasonably assured. For us, this policy generally results in revenue recognition at the following points:

For our equipment business, transactions where legal title passes to the customer upon shipment, we recognize revenue upon shipment for those products where the customer's defined specifications have been met with at least two similarly configured systems and processes for a comparably situated customer. Our selling prices may include both equipment and services, i.e., installation and start-up services performed by our service technicians. The equipment and services are multiple deliverables. Our recognition of revenue upon delivery of equipment is limited 1. to the lesser of (i) the total selling price minus the relative selling price of the undelivered services or (ii) the non-contingent amount. Since we defer only those costs directly related to installation or other unit of accounting not yet delivered and the portion of the contract price is often considerably greater than the relative selling price of those items, our policy at times will result in deferral of profit that is disproportionate in relation to the deferred revenue. When this is the case, the gross margin recognized in one period will be lower and the gross margin reported in a subsequent period will improve.

Table of Contents

For products where the customer's defined specifications have not been met with at least two similarly configured systems and processes, the revenue and directly related costs are deferred at the time of shipment and later recognized at the time of customer acceptance or when this criterion has been met. We have, on occasion, experienced longer than expected delays in receiving cash from certain customers pending final installation or system acceptance. If some of our customers refuse to pay the final payment, or otherwise delay final acceptance or installation, the deferred revenue would not be recognized, adversely affecting our future cash flows and operating results.

3. Sales of certain equipment, spare parts and consumables are recognized upon shipment, as there are no post shipment obligations other than standard warranties.

Service revenue is recognized upon performance of the services requested by the customer. Revenue related to 4. service contracts is recognized ratably over the period of the contract or in accordance with the terms of the contract, which generally coincides with the performance of the services requested by the customer.

Deferred Profit – Revenue deferred pursuant to the Company's revenue recognition policy, net of the related deferred costs, if any, is recorded as deferred profit in current liabilities. The components of deferred profit are as follows:

	March 31, 2015	September 30, 2014
	(dollars in thousands)	
Deferred revenues	\$8,338	\$8,118
Deferred costs	2,841	1,210
Deferred profit	\$5,497	\$6,908

Concentrations of Credit Risk – Financial instruments that potentially subject the Company to significant concentrations of credit risk consist principally of trade accounts receivable and cash. The Company's customers, located throughout the world, consist of manufacturers of solar cells, semiconductors, semiconductor wafers, light-emitting diodes (LEDs) and micro-electro-mechanical systems (MEMS). Credit risk is managed by performing ongoing credit evaluations of the customers' financial condition, by requiring significant deposits where appropriate, and by actively monitoring collections. Letters of credit are required of certain customers depending on the size of the order, type of customer or its creditworthiness, and its country of domicile. Reserves for potentially uncollectible receivables are maintained based on an assessment of collectability.

The Company maintains its cash, cash equivalents and restricted cash in multiple financial institutions. Balances in the United States (approximately 60% of total cash balances) are primarily invested in U.S. Treasuries or are in financial institutions insured by the Federal Deposit Insurance Corporation (FDIC). The remainder of the Company's cash is maintained in banks in The Netherlands, France, China, and other foreign jurisdictions that are uninsured.

As of March 31, 2015, one customer accounted for 12% of accounts receivable.

Restricted Cash – Restricted cash is \$1.6 million and \$2.4 million as of March 31, 2015, and September 30, 2014, respectively. The balance includes collateral for bank guarantees required by certain customers from whom deposits have been received in advance of shipment and cash received from research and development grants related to our ion implant technology to be used for research and development projects.

Accounts Receivable - Unbilled and Other – Unbilled and other accounts receivable consist mainly of the contingent portion of the sales price that is not collectible until successful installation of the product. These amounts are generally billed upon final customer acceptance. For the majority of these amounts, a liability has been accrued in deferred

profit.

9

Table of Contents

Inventories – Inventories are stated at the lower of cost or net realizable value. Approximately 50% and 70% of inventory is valued on an average cost basis with the remainder determined on a first-in, first-out (FIFO) basis at March 31, 2015, and September 30, 2014, respectively. The components of inventories are as follows:

	March 31, 2015	September 30, 2014
	(dollars in thousands)	
Purchased parts and raw materials	\$14,410	\$8,797
Work-in-process	11,111	4,809
Finished goods	7,536	3,154
	\$33,057	\$16,760

Property, Plant and Equipment – Property, plant and equipment are recorded at cost. Maintenance and repairs are charged to expense as incurred. The cost of property retired or sold and the related accumulated depreciation are removed from the applicable accounts when disposition occurs and any gain or loss is recognized. Depreciation is computed using the straight-line method. Useful lives for equipment, machinery and leasehold improvements range from three to seven years; for furniture and fixtures from five to ten years; and for buildings 20-25 years.

The following is a summary of property, plant and equipment:

	March 31, 2015	September 30, 2014
	(dollars in thousands)	
Land, building and leasehold improvements	\$18,022	\$10,414
Equipment and machinery	11,320	8,189
Furniture and fixtures	5,189	5,453
	34,531	24,056
Accumulated depreciation	(14,352)	(14,304)
	\$20,179	\$9,752

Table of Contents

Goodwill - Goodwill is not subject to amortization and is reviewed for impairment on an annual basis, typically at the end of the fiscal year, or more frequently if circumstances dictate.

The following is a summary of activity in goodwill:

	Solar (dollars in thousands)	Semiconductor	Polishing	Total
Gross goodwill	\$12,315	\$—	\$728	\$13,043
Accumulated impairment losses	(4,720)	) —	—	(4,720)
Carrying value at September 30, 2014	7,595	—	728	8,323
Goodwill recognized due to acquisitions	2,272	4,347	—	6,619
Net exchange differences	(346)	) —	—	(346)
Carrying value at March 31, 2015	\$9,521	\$4,347	\$728	\$14,596
Goodwill	\$14,030	\$4,347	\$728	\$19,105
Accumulated impairment losses	(4,509)	) —	—	(4,509)
Carrying value at March 31, 2015	\$9,521	\$4,347	\$728	\$14,596

Intangibles – Intangible assets are capitalized and amortized over their useful life if the life is determinable. If the life is not determinable, amortization is not recorded. On December 24, 2014, the Company acquired a 51% controlling interest in SoLayTec, B.V. (“SoLayTec”). The intangible assets of SoLayTec total \$2.2 million and are included in "Other" in the table below. The fair value of the intangible assets, the allocation and the amortization period are still being evaluated by the Company. On January 30, 2015, the Company completed its merger with BTU International, Inc. ("BTU"). The intangible assets of BTU total \$1.3 million, and are included in "Trade Names" in the table below. See Note 9, “Acquisitions,” for more information regarding the acquisition of SoLayTec and the merger with BTU.

The following is a summary of intangibles:

	Useful Life	Gross Carrying Amount March 31, 2015 (dollars in thousands)	Accumulated Amortization	Net Carrying Amount	Gross Carrying Amount September 30, 2014	Accumulated Amortization	Net Carrying Amount
Non-compete agreements	4-8 years	\$1,032	\$(1,032)	) \$—	\$1,055	\$(955)	) \$100
Customer lists	10 years	699	(568)	) 131	817	(592)	) 225
Technology	5-10 years	2,085	(1,734)	) 351	2,319	(1,682)	) 637
In-process research and development	5 years	1,600	(187)	) 1,413	1,600	(27)	) 1,573
Trade names	15 years	1,330	(18)	) 1,312	—	—	—
Other	2-12 years	2,429	(258)	) 2,171	321	(178)	) 143
		\$9,175	\$(3,797)	) \$5,378	\$6,112	\$(3,434)	) \$2,678

Long-lived assets - Long-lived assets are reviewed for impairment when events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable.

Warranty – A limited warranty is provided free of charge, generally for periods of 12 to 24 months, for all purchases of the Company’s new products and systems. Accruals are recorded for estimated warranty costs at the time revenue is recognized.

Table of Contents

The following is a summary of activity in accrued warranty expense:

	Six Months Ended March 31,	
	2015	2014
	(dollars in thousands)	
Beginning balance	\$628	\$1,454
Warranty expenditures	(368	) (496
Warranty provisions/(adjustment)	791	(200
Ending balance	\$1,051	\$758

Stock-Based Compensation - The Company measures compensation costs relating to share-based payment transactions based upon the grant date fair value of the award. Those costs are recognized as expense over the requisite service period, which is generally the vesting period. The benefits of tax deductions in excess of recognized compensation cost are credited to additional paid-in capital and reported as cash flow from financing activities rather than as cash flow from operating activities.

Stock-based compensation expense reduced the Company's results of operations by the following amounts:

	Three Months Ended		Six Months Ended	
	March 31,		March 31,	
	2015	2014	2015	2014
	(dollars in thousands)			
Effect on income before income taxes (1)	\$(336	) \$(197	) \$(568	) \$(373
Effect on income taxes	58	119	95	159
Effect on net income	\$(278	) \$(78	) \$(473	) \$(214

(1) Stock-based compensation expense is included in selling, general and administrative expenses.

Stock options issued under the terms of the plans have, or will have, an exercise price equal to the fair market value of the common stock at the close of trading on the Nasdaq the day prior to the date of the option grant and expire no later than 10 years from the date of grant, with the most recent grant expiring in 2025. Options issued by the Company vest over 2 to 4 years.

Stock option transactions and the options outstanding are summarized as follows:

	Six Months Ended March 31,			
	2015		2014	
	Options	Weighted Average Exercise Price	Options	Weighted Average Exercise Price
Outstanding at beginning of period	1,063,324	\$7.37	1,059,417	\$6.71
Granted	327,500	9.74	220,406	7.01

Exercised	(11,289	) 4.91	(260,726	) 4.28
Forfeited	(641	) 9.08	(3,464	) 6.92

Edgar Filing: AMTECH SYSTEMS INC - Form 10-Q

Outstanding at end of period	1,746,123	\$9.26	1,015,633	\$7.40
Exercisable at end of period	1,102,682	\$9.90	664,934	\$8.11
Weighted average fair value of options granted during the period	\$5.91		\$4.38	

12

Table of Contents

The fair value of options was estimated at the grant date using the Black-Scholes option pricing model with the following assumptions:

	Six Months Ended March 31,	
	2015	2014
Risk free interest rate	2%	2%
Expected life	6 years	6 years
Dividend rate	0%	0%
Volatility	67%	69%

To estimate expected lives for this valuation, it was assumed that options will be exercised at varying schedules after becoming fully vested. Forfeitures have been estimated at the time of grant and will be revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based upon historical experience. Fair value computations are highly sensitive to the volatility factor assumed; the greater the volatility, the higher the computed fair value of the options granted. The Company uses historical stock prices to determine the volatility factor.

The Company awards restricted shares under the existing share-based compensation plans. The Company's restricted share awards vest in equal annual installments over a two- to four-year period. The total value of these awards is expensed on a ratable basis over the service period of the employees receiving the grants. The "service period" is the time during which the employees receiving grants must remain employees for the shares granted to fully vest.

Restricted stock transactions and awards outstanding are summarized as follows:

	Six Months Ended March 31,			
	2015		2014	
	Awards	Weighted Average Grant Date Fair Value	Awards	Weighted Average Grant Date Fair Value
Beginning Outstanding	35,203	\$10.13	69,154	\$10.13
Released	(21,663)	) 11.47	(30,828)	) 10.08
Ending Outstanding	13,540	\$7.98	38,326	\$10.17

Fair Value of Financial Instruments

In accordance with the requirements of the Fair Value Measurements and Disclosures Topic of the Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC"), the Company groups its financial assets and liabilities measured at fair value on a recurring basis in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. These levels are: Level 1 - Valuation is based upon quoted market price for identical instruments traded in active markets.

Level 2 - Valuation is based on quoted market prices for similar instruments in active markets, quoted prices for identical or similar instruments in markets that are not active, and model-based valuation techniques for which all significant assumptions are observable in the market.

Level 3 - Valuation is generated from model-based techniques that use significant assumptions not observable in the market. Valuation techniques include use of discounted cash flow models and similar techniques.

In accordance with the requirements of the Fair Value Measurements and Disclosures Topic of the FASB ASC, it is the Company's policy to use observable inputs whenever reasonably practicable in order to minimize the use of unobservable inputs when developing fair value measurements. When available, the Company uses quoted market prices to measure fair value. If market prices are not available, the fair value measurement is based on models that use primarily market based parameters including

Table of Contents

interest rate yield curves, option volatilities and currency rates. In certain cases, where market rate assumptions are not available, the Company is required to make judgments about assumptions market participants would use to estimate the fair value of a financial instrument. Changes in the underlying assumptions used, including discount rates and estimates of future cash flows, could significantly affect the results of current or future values.

Cash, Cash Equivalents and Restricted Cash - Included in Cash and Cash Equivalents in the Condensed Consolidated Balance Sheets is \$16.0 million and \$17.0 million as of March 31, 2015 and September 30, 2014, respectively, of money market funds invested in treasury bills, notes and other direct obligations of the U.S. Treasury. The fair value of this cash equivalent is based on Level 1 inputs in the fair value hierarchy.

Receivables and Payables - The recorded amounts of these financial instruments, including accounts receivable and accounts payable, approximate their fair value because of the short maturities of these instruments. If measured at fair value in the financial statements, these financial instruments would be classified as Level 3 in the fair value hierarchy.

Debt - The recorded amounts of these financial instruments, including long-term debt and current maturities of long-term debt, approximate fair value and are considered Level 2 in the fair value hierarchy.

Pensions - The Company has retirement plans covering substantially all employees. The principal plans are the multiemployer defined benefit pension plans of the Company's operations in The Netherlands and France and the plan for hourly union employees in Pennsylvania. The multiemployer plans in the United States and France are insignificant to the Company's results of operations and financial condition. The Company's defined contribution plans cover substantially all of the employees in the United States. The Company matches employee funds on a discretionary basis.

Shipping expense – Shipping expenses of \$0.4 million and \$0.2 million for the three months ended March 31, 2015 and 2014, respectively, are included in selling, general and administrative expenses. Shipping expenses of \$0.7 million and \$0.5 million for the six months ended March 31, 2015 and 2014, respectively, are included in selling, general and administrative expenses.

Research, development and engineering expense – Research, development and engineering expenses consist of the cost of employees, consultants and contractors who design, engineer and develop new products and processes; materials and supplies used in those activities; and product prototyping. The Company receives reimbursements through governmental research and development grants which are netted against these expenses when certain conditions have been met. The table below shows gross research and development expenses and grants earned:

	Three Months Ended		Six Months Ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
	(dollars in thousands)		(dollars in thousands)	
Research, development and engineering	\$3,540	\$2,494	\$6,113	\$5,388
Grants earned	(2,790)	(339)	(3,527)	(2,344)
Net research, development and engineering	\$750	\$2,155	\$2,586	\$3,044

Segments - Effective for the second quarter of 2015, following the Company's merger with BTU, the Company changed the way it reports its segment information. Previously reported information has been recast to reflect the current reportable segments. The Company now reports its financial results in three segments: solar, semiconductor and polishing. See Note 4: "Segment Information" for additional information on the Company's reportable segments.

See also Note 9: "Acquisitions" for additional information with respect to the Company's recent acquisitions.

Table of Contents

Impact of Recently Issued Accounting Pronouncements

In April 2015, the FASB issued Accounting Standards Update ("ASU") No. 2015-05, Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40). This ASU provides guidance that will help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement, including whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then this ASU requires the customer to account for the software license consistent with the acquisition of other software licenses; otherwise, the customer should account for the arrangement as a service contract. The ASU is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Entities can elect to adopt the amendments either prospectively to all arrangements entered into after the effective date or retrospectively to all prior periods. We are currently assessing the impact of this ASU.

In April 2015, the FASB issued ASU No. 2015-3, Interest-Imputation of Interest (Subtopic 835-30). This ASU requires debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of the related debt liability instead of being presented as an asset. The ASU requires retrospective application and represents a change in accounting principle. The ASU is effective for fiscal years beginning after December 15, 2015. Early adoption is permitted for financial statements that have not been previously issued. We are currently assessing the impact of this ASU.

In January 2015, the FASB issued ASU No. 2015-1, Income Statement - Extraordinary and Unusual Items (Subtopic 225-20). The FASB is issuing this ASU as part of its initiative to reduce costs and complexity in accounting standards, known as its Simplification Initiative. This ASU eliminates from GAAP the concept of extraordinary items in an effort to save time and reduce costs, while alleviating uncertainty and maintaining accurate and fulsome disclosure. The amendments in this ASU are effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. We are currently assessing the impact of this ASU, but do not expect it to have a material impact on our consolidated financial position and results of operations.

In June 2014, the FASB issued ASU No. 2014-12 which provides guidance on how to account for share-based payment awards where the terms of the award provide that a performance target that affects vesting could be achieved after the requisite service period. This ASU requires that a performance target that affects vesting and that could be achieved after the requisite service period be treated as a performance condition. ASU 2014-12 is effective for annual periods, and interim periods within those annual periods, beginning after December 15, 2015, and early adoption is permitted. We are currently assessing the impact of this ASU but do not expect it to have a material impact on our consolidated financial position and results of operations.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, which supersedes most of the current revenue recognition requirements. The core principle of the new guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for these goods or services. New disclosures about the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers are also required. This guidance is effective for the Company in the first quarter of fiscal year 2018 and early application is not permitted. Entities must adopt the new guidance using one of two retrospective application methods. The Company is currently evaluating the standard and the impact on our financial position and results of operations.

In April 2014, the FASB issued ASU No. 2014-08 Presentation of Financial Statements (Topic 205) and Property, Plant and Equipment (Topic 360). The amendments in this ASU change the requirements for reporting discontinued operations in Subtopic 205-20. A discontinued operation may include a component of an entity or a group of

components of an entity, or a business or nonprofit activity. Under current U.S. GAAP, many disposals, some of which may be routine in nature and not a change in an entity's strategy, are reported in discontinued operations. The amendments in this ASU improve the definition of discontinued operations by limiting discontinued operations reporting to disposals of components of an entity that represent strategic shifts that have (or will have) a major effect on an entity's operations and financial results. The amendments in this ASU require expanded disclosures for discontinued operations. The FASB concluded that those disclosures should provide users of financial statements with more information about the assets, liabilities, revenues, and expenses of discontinued operations. The amendments in this ASU also require an entity to disclose the pretax profit or loss of an individually significant component of an entity that does not qualify for discontinued operations reporting. The amendments in this ASU are effective for fiscal years, and interim periods within those years, beginning after December 15, 2014. The Company will evaluate the impact of this ASU as future transactions occur.

Table of Contents

2. Income Taxes

The quarterly income tax provision is calculated using an estimated annual effective tax rate, based upon expected annual income, permanent items, statutory rates and planned tax strategies in the various jurisdictions in which the Company operates. However, losses in certain jurisdictions and discrete items are treated separately.

Deferred tax assets and liabilities reflect the tax effects of temporary differences between the carrying value of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. The Company records a valuation allowance if, based on the weight of available evidence, it is more likely than not that some portion or all of a deferred tax asset will not be realized. Our expectations regarding realization of our deferred tax assets is based upon the weight of all available evidence, including such factors as our recent earnings history, expected future taxable income and available tax planning strategies. As a result of the merger with BTU, the Company determined that is more likely than not that some of our U.S. federal deferred tax assets would not be realized, and recorded a partial valuation allowance in the U.S. The Company maintains a valuation allowance with respect to certain state, federal and foreign deferred tax assets that may not be recovered. Each quarter, the valuation allowance is re-evaluated. During the six months ended March 31, 2015 the valuation allowance increased by \$1.5 million due to net operating losses in The Netherlands and United Kingdom, partially offset by utilization of net operating losses in China and France.

The Company classifies all of our uncertain tax positions as non-current income taxes payable. At March 31, 2015 and September 30, 2014, the total amount of unrecognized tax benefits was approximately \$3.2 million. If recognized, these amounts would favorably impact the effective tax rate.

The Company classifies interest and penalties related to unrecognized tax benefits as income tax expense. As of March 31, 2015 and September 30, 2014, the Company had an accrual for potential interest and penalties of approximately \$1.8 million and \$1.6 million, respectively.

The Company and one or more of its subsidiaries file income tax returns in The Netherlands, Germany, France, Singapore, Malaysia, China and Hong Kong, as well as the U.S. and various states in the U.S. The Company and its subsidiaries have a number of open tax years dictated by statute in each of the respective taxing jurisdictions, but generally is from 3 to 5 years.

Table of Contents

3. Earnings Per Share

Basic earnings per share ("EPS") is computed by dividing net income (loss) by the weighted average number of common shares outstanding for the period. Diluted EPS is computed similarly to basic EPS except that the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares had been issued. In the case of a net loss, diluted earnings per share is calculated in the same manner as basic EPS.

For the three and six months ended March 31, 2015, options for 1,746,000 shares and 14,000 restricted stock awards are excluded from the diluted EPS calculations because they are anti-dilutive. For the three and six months ended March 31, 2014, options for 1,016,000 shares and 38,000 restricted stock awards were excluded from the diluted EPS calculations because they were anti-dilutive.

	Three Months Ended March 31,		Six Months Ended March 31,	
	2015	2014	2015	2014
	(in thousands, except per share amounts)		(in thousands, except per share amounts)	
Basic Loss Per Share Computation				
Net loss attributable to Amtech Systems, Inc.	\$ (2,321	) \$ (3,751	) \$ (7,515	) \$ (4,545
Weighted Average Shares Outstanding:				
Common stock	11,997	9,679	10,914	9,619
Basic loss per share attributable to Amtech shareholders	\$ (0.19	) \$ (0.39	) \$ (0.69	) \$ (0.47
Diluted Loss Per Share Computation				
Net loss attributable to Amtech Systems, Inc.	\$ (2,321	) \$ (3,751	) \$ (7,515	) \$ (4,545
Weighted Average Shares Outstanding:				
Common stock	11,997	9,679	10,914	9,619
Common stock equivalents (1)	—	—	—	—
Diluted shares	11,997	9,679	10,914	9,619
Diluted loss per share attributable to Amtech shareholders	\$ (0.19	) \$ (0.39	) \$ (0.69	) \$ (0.47

(1) The number of common stock equivalents is calculated using the treasury stock method and the average market price during the period.

4. Business Segment Information

Following the Company's acquisition of BTU, an evaluation was conducted of the Company's organizational structure. Beginning with the second quarter of 2015, the Company made changes to its reportable segments. Prior period amounts have been revised to conform to the current period segment reporting structure. The Company's three reportable segments are as follows:

Solar - In the Company's Solar segment, we are a leading supplier of thermal processing systems, including related automation, parts and services, to the solar/photovoltaic industry and also offer PECVD (plasma-enhanced chemical vapor deposition) equipment to the global solar market.

Semiconductor - In the Company's Semiconductor segment, we design, manufacture, sell and service thermal processing equipment and related controls for use by leading semiconductor manufacturers, and in electronics,

automotive and other industries.

Polishing - In the Company's Polishing segment, the Company produces consumables and machinery for lapping (fine abrading) and polishing of materials, such as sapphire substrates, optical components, silicon wafers, numerous types of crystal materials, ceramics and metal components.

On December 24, 2014, the Company acquired a 51% controlling interest in SoLayTec, and on January 30, 2015, the Company completed its acquisition of BTU. Beginning in the second quarter of 2015, SoLayTec's business is included in the results for the solar segment, and BTU's business is included in the results for the semiconductor segment. See Note 9, "Acquisitions", for additional information with respect to the Company's recent acquisitions.

Table of Contents

Information concerning our business segments is as follows:

	Three Months Ended		Six Months Ended	
	March 31,	March 31,	March 31,	March 31,
	2015	2014	2015	2014
	(dollars in thousands)			
Net Revenues:				
Solar *	\$9,463	\$8,017	\$17,749	\$16,505
Semiconductor	12,088	2,271	12,820	6,346
Polishing	2,722	2,429	6,100	4,637
	\$24,273	\$12,717	\$36,669	\$27,488
Operating income (loss):				
Solar *	\$(724)	\$(4,133)	\$(3,219)	\$(4,326)
Semiconductor	730	207	630	748
Polishing	601	550	1,343	968

	\$145,782	\$89,904

Table of Contents

5. Major Customers and Foreign Sales

During the six months ended March 31, 2015, one customer individually represented 19% of net revenues. During the six months ended March 31, 2014, two customers individually represented 18% and 16% of net revenues.

Our net revenues were to customers in the following geographic regions:

	Six Months Ended March 31,			
	2015		2014	
United States	17	%	30	%
Other	3	%	—	%
Total North America	20	%	30	%
China	28	%	15	%
Taiwan	18	%	17	%
Other	16	%	14	%
Total Asia	62	%	46	%
Germany	8	%	5	%
Other	10	%	19	%
Total Europe	18	%	24	%
	100	%	100	%

6. Other Accrued Liabilities

Other accrued liabilities consist of the following:

	March 31, September	
	2015	30, 2014
	(dollars in thousands)	
Unearned research and development grants	\$2,878	\$3,989
Other	4,548	1,357
	\$7,426	\$5,346

7. Long-term Debt

In January 2015, the Company acquired \$7.2 million of long-term debt as part of the BTU merger. The debt acquired is a mortgage note secured by its real property in Billerica, Massachusetts, and is stated at fair market value of \$7.1 million as of March 31, 2015. The debt acquired has an interest rate of 4.4% through September 26, 2018, at which time the interest rate will be adjusted to a per annum fixed rate equal to the aggregate of the Federal Home Loan Board (FHLB) Five Year Classic Advance Rate plus two hundred forty basis points. The maturity date of the debt acquired is September 26, 2023. All outstanding principal and accrued and unpaid interest will be due and payable on the maturity date.

In December 2014, the Company acquired long-term debt of \$2.0 million as part of the SoLayTec acquisition. The debt acquired is stated at fair market value of \$2.1 million as of March 31, 2015. The debt acquired has interest rates ranging from 5.95% to 10% and maturity dates ranging from fiscal 2017 to fiscal 2021.

8. Commitments and Contingencies

Purchase Obligations – As of March 31, 2015 the Company had purchase obligations in the amount of \$29.8 million compared to \$7.9 million as of September 30, 2014. These purchase obligations consist of outstanding purchase orders for goods and services.

Table of Contents

While the amount represents purchase agreements, the actual amounts to be paid may be less if any agreements are renegotiated, canceled or terminated.

Development projects – In fiscal 2014, Tempres Systems, Inc. ("Tempres") entered into an agreement with the Energy Research Centre of the Netherlands ("ECN"), a Netherlands government sponsored research institute, for a joint research and development project. Under the terms of the agreement, Tempres sold an ion implanter ("Equipment") to ECN for \$1.4 million. Both Tempres and ECN are performing research and development projects utilizing the Equipment at the ECN facilities. Each party to the agreement will have 100% rights to the results of the projects developed separately by the individual parties. Any results co-developed will be jointly owned. Over the four-year period of the agreement, Tempres is required to contribute \$1.4 million to the project in the form of installation of the Equipment, acceptance testing, project meeting attendance, training, parts, and service, including keeping the equipment in good condition and repair for the first two years of the agreement.

In 2013, Shanghai Kingstone Semiconductor Company Ltd. ("Kingstone") entered into an agreement with certain government agencies in Shanghai, China for the purpose of developing ion implant technology for non-solar applications. Kingstone has substantially completed the first phase of this development project and received \$4.1 million of grant funds for the project. Kingstone is investigating options for securing \$6.1 million of its commitment to the project. Amtech owns 55% of Kingstone Technology Hong Kong Limited, which owns 100% of Kingstone. Amtech has no obligation or plan to fund Kingstone's commitments under this agreement.

EPA Accrual - As a result of the merger with BTU, the Company assumed BTU's proportional responsibility for clean-up costs at a Superfund site. As an equipment manufacturer, BTU generated and disposed of small quantities of solid waste that were considered hazardous under Environment Protection Agency ("EPA") regulations. Because BTU historically used a waste disposal firm that disposed of the solid waste at a site that the EPA designated as a Superfund site, BTU was named by the EPA as one of the entities responsible for a portion of the expected clean-up costs. Based on the Company's proportional responsibility, as negotiated with and agreed to by the EPA, the Company's liability related to this matter is \$0.2 million. As of March 31, 2015, the remaining liability is \$0.1 million, which is included in Other Accrued Liabilities on the Condensed Consolidated Balance Sheet as of March 31, 2015. In 2009, in accordance with the agreement, the Company established a letter of credit for \$0.2 million to the benefit of the EPA for potential cash payments as settlements for the Company's proportional liability.

Litigation – The Company and its subsidiaries are defendants from time to time in actions for matters arising out of their business operations. On October 21, 2014, the Company entered into an Agreement and Plan of Merger (the "Merger Agreement") by and among the Company, BTU Merger Sub, Inc., a Delaware corporation (the "Merger Sub"), and BTU. Shortly after the Company entered into the Merger Agreement with BTU, two separate putative stockholder class action complaints were filed in the Court of Chancery of the State of Delaware (together, the "Stockholder Actions"). The first was filed on November 4, 2014 and the second on November 17, 2014, purportedly on behalf of BTU's public stockholders, against BTU, the members of the BTU Board, Amtech and Merger Sub. The Stockholder Actions were consolidated into one action on December 4, 2014. These complaints generally allege, among other things, that the members of BTU's board of directors breached their fiduciary duties owed to BTU's public stockholders by failing to engage in a competitive sale and bidding process, by causing BTU to enter into the Merger Agreement and by approving the merger, and that the Company and Merger Sub aided and abetted such alleged breaches of fiduciary duties. These complaints further allege that these fiduciary breaches gave the Company an unfair advantage as a result of BTU's alleged failure to solicit other potential acquirers and also that the Merger Agreement improperly favors the Company and unduly restricts BTU's ability to negotiate with other potential bidders. The complaint generally seeks, among other things, declaratory and injunctive relief concerning the alleged fiduciary breaches, injunctive relief prohibiting the Company, Merger Sub, and BTU from consummating the Merger, other forms of equitable relief, and compensatory damages.

On January 16, 2015, the Company and BTU, along with the other defendants named therein, entered into a memorandum of understanding (the "MOU") to settle the Stockholder Actions. Pursuant to the MOU, the parties to the Stockholder Actions agreed to resolve the claims alleged and the Company and BTU agreed to make certain additional disclosures regarding the Merger. The MOU is expected to be memorialized in a stipulation of settlement, which will be subject to customary terms and conditions, including court approval, and will include an agreement by the plaintiffs in the Stockholder Actions, on behalf of each stockholder class, to provide a release of all claims against the Company and BTU, along with the other defendants named therein, subject to an exception for certain securities law claims. In addition, as part of the settlement, BTU has agreed to be responsible for the payment of certain amounts in plaintiffs' attorney fees and expenses in connection with the settlement. The Company and BTU entered into the MOU solely to avoid the costs, risks and uncertainties inherent in litigation and without admitting any liability or wrongdoing. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that the court will approve such settlement. In such event, the proposed settlement as contemplated by the MOU may be terminated.

The merger was consummated on January 30, 2015. The plaintiffs' attorney fees and expenses were reflected as a liability on the opening balance sheet of BTU on the date of the merger. See Note 9, "Acquisitions," for more information on the Merger Agreement.

Table of Contents

9. Acquisitions

Merger with BTU International

On January 30, 2015, the Company completed its acquisition of BTU. In connection with the Merger, each share of BTU common stock outstanding immediately prior to the effective time of the Merger, including BTU restricted stock units that vested immediately prior to the effective time of the Merger, was converted to 0.3291 shares of common stock of the Company. The Company issued 3,185,852 shares of Company common stock on the Merger date. Pursuant to the terms of the Merger Agreement, options to purchase BTU common stock held by BTU employees were assumed by the Company and converted into options to purchase shares of Company common stock on substantially the same terms and conditions as were applicable to such BTU stock options, with appropriate adjustments based upon the exchange ratio of 0.3291 to the exercise price and the number of shares of Company common stock subject to such stock option. As a result of the Merger, the company owns 100% of the outstanding stock of BTU.

The following unaudited pro forma data has been prepared by adjusting the Company's historical data to give effect to the Merger as if it had occurred on October 1, 2013 and includes adjustments for depreciation expense, amortization of intangibles, and the effect of other purchase accounting adjustments:

	Quarter Ended		Six Months Ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
	(dollars in thousands, except per share data)			
Revenue, net	\$26,061	\$24,402	\$52,972	\$50,166
Net loss	\$(4,252)	\$(5,301)	\$(9,369)	\$(15,222)
Earnings per share available to Amtech stockholders:				
Basic	\$(0.33)	\$(0.41)	\$(0.72)	\$(1.19)
Diluted	\$(0.33)	\$(0.41)	\$(0.72)	\$(1.19)

The unaudited pro forma financial data was prepared in accordance with the acquisition method of accounting under existing standards and is not necessarily indicative of the results of operations that would have occurred if the Merger had been completed on the date indicated, nor is it indicative of the future operating results of the Company.

The unaudited pro forma results do not reflect certain future events that either have occurred or may occur after the Merger, including, but not limited to, the anticipated realization of ongoing cost reductions from other operating synergies in subsequent periods. They also do not give effect to certain charges that the Company expects to incur in connection with the Merger, including, but not limited to, additional professional fees and other restructuring costs.

The Merger was an all-stock transaction. The following table summarizes the consideration transferred:
(In thousands, except per share amounts)

BTU common shares and restricted stock units exchanged	9,681
Exchange ratio	0.3291
Amtech common stock issued for consideration	3,186
Amtech common stock per share price on January 30, 2015	\$8.20
Consideration for BTU common shares and restricted stock units	\$26,125
Vested BTU stock options exchanged for Amtech stock options	\$500
Total fair value of consideration transferred	\$26,625

Table of Contents

The following table summarizes the allocation of the consideration for the assets acquired and liabilities assumed on January 30, 2015:

(In thousands)

Fair value of net tangible assets acquired	\$20,948
Goodwill	4,347
Identifiable intangible assets	1,330
Total consideration allocated	\$26,625

The primary acquired intangible asset is the trade name "BTU", which has a 15 year useful life. Goodwill of \$4.3 million was assigned to the semiconductor segment. Goodwill will not be amortized but instead tested for impairment at least annually (more frequently if certain indicators are present). Goodwill as of March 31, 2015, is not expected to be deductible for tax purposes. As of March 31, 2015, the accounting for the BTU acquisition has not been finalized due to pending items on the valuation of acquired assets and liabilities.

Under the guidance on accounting for business combinations, merger and integration costs are not included as components of consideration transferred but are accounted for as expenses in the period in which the costs are incurred. Transaction-related expenses of \$0.8 million and \$2.0 million for the three and six months ended March 31, 2015, respectively, and \$0.1 million for the three and six months ended March 31, 2014, are included in the Selling, General and Administrative line in the Condensed Consolidated Statements of Operations.

Acquisition of SoLayTec B.V.

On December 24, 2014, the Company expanded our participation in the solar market by acquiring a 51% controlling interest in SoLayTec, which provides ALD systems used in high efficiency solar cells, for a total purchase price consideration of \$1.9 million.

The Company consolidated the results of operations for SoLayTec beginning on December 24, 2014, the effective date of the acquisition, which were not material to our consolidated statement of operations for the three and six months ended March 31, 2015. Additionally, the Company's historical results would not have been materially affected by the acquisition of SoLayTec and, accordingly, has not presented pro forma information as if the acquisition had been completed at the beginning of each period presented in our consolidated statements of operations. As of March 31, 2015, the accounting for the SoLayTec acquisition has not been finalized due to pending items on the valuation of acquired assets and liabilities.

Table of Contents

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis of our financial condition and results of operations should be read in conjunction with our condensed consolidated financial statements and the related notes included in Item 1, "Condensed Consolidated Financial Statements" in this quarterly report on Form 10-Q and our consolidated financial statements and related notes included in Item 8, "Financial Statements and Supplementary Data" in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014.

Cautionary Statement Regarding Forward-Looking Statements

Certain information contained or incorporated by reference in this Quarterly Report on Form 10-Q is forward-looking in nature. All statements included or incorporated by reference in this Quarterly Report on Form 10-Q, or made by management of Amtech Systems, Inc. and its subsidiaries ("the Company" or "Amtech"), other than statements of historical fact, are hereby identified as "forward-looking statements" (as such term is defined in Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended). In some cases, forward-looking statements can be identified by terminology such as "may," "will," "should," "would," "expects," "plan," "anticipates," "intends," "believes," "estimates," "predicts," "potential," "continue," or the negative of these terms or other comparable terminology. Examples of forward-looking statements include statements regarding Amtech's future financial results, operating results, business strategies, projected costs, products under development, competitive positions and plans and objectives of the Company and its management for future operations.

We cannot guarantee that any forward-looking statement will be realized, although we believe that the expectations reflected in the forward-looking statements are reasonable. Achievement of future results is subject to risks, uncertainties and potentially inaccurate assumptions. The Form 10-K that we filed with the Securities and Exchange Commission for the year-ended September 30, 2014 listed various important factors that could affect Amtech's future operating results and financial condition and could cause actual results to differ materially from historical results and expectations based on forward-looking statements made in this document or elsewhere by Amtech or on its behalf. These factors can be found under the heading "Risk Factors" in the Form 10-K and investors should refer to them. Because it is not possible to predict or identify all such factors, any such list cannot be considered a complete set of all potential risks or uncertainties. Except as required by law, we undertake no obligation to publicly update forward-looking statements, whether as a result of new information, future events, or otherwise.

Introduction

Management's Discussion and Analysis ("MD&A") is intended to facilitate an understanding of our business and results of operations. MD&A consists of the following sections:

- Overview
- Results of Operations
- Liquidity and Capital Resources
- Off – Balance Sheet Arrangements
- Contractual Obligations
- Critical Accounting Policies
- Impact of Recently Issued Accounting Pronouncements

Overview

We are a global supplier of advanced thermal processing equipment to the solar, semiconductor, electronics and LED manufacturing markets. Our equipment includes diffusion, ALD and PECVD systems, ion implanters and solder reflow systems. We also supply wafer handling automation and polishing equipment and related consumable products.

Our wafer handling, thermal processing and consumable products currently address the diffusion, oxidation, deposition and solder reflow steps used in the fabrication of solar cells, LEDs, semiconductors, MEMS, printed circuit boards, semiconductor packaging and the polishing of newly sliced sapphire and silicon wafers.

Beginning with the second quarter of 2015, the Company made changes to its reportable segments. The Company now reports its financial results in three segments: solar, semiconductor and polishing. Previously, the Company's two reporting segments were solar and semiconductor equipment and polishing supplies. Prior period amounts have been revised to conform to the current period segment reporting structure.

Our customers are primarily manufacturers of solar cells and integrated circuits. The solar cell and semiconductor industries are cyclical and historically have experienced significant fluctuations. Our revenue is impacted by these broad industry trends. Since 2012, the solar cell industry is experiencing a structural imbalance between supply and demand. This imbalance has negatively impacted our results of operations.

Our strategy has been, and continues to be, to grow the Company through strategic product development and acquisitions. In addition to internal product development, we have acquired companies with complementary products or products that serve adjacent process steps. On January 30, 2015, we completed the acquisition of BTU, which provides complementary thermal processing technologies in the semiconductor, electronics and solar sectors, and strengthens our footprint in China and other key geographic markets. On December 24, 2014, we expanded our participation in the solar market by acquiring a 51% controlling interest in SoLayTec, which provides atomic layer deposition systems used in high efficiency solar cells. In February 2011, we acquired a 55% ownership interest in Kingstone. In October 2007, we acquired R2D Automation SAS, which allowed us to provide our diffusion furnaces with integrated automation that is also sold as a stand-alone product.

Results of Operations

The following table sets forth certain operational data as a percentage of net revenue for the periods indicated:

	Three Months Ended		Six Months Ended	
	March 31, 2015	March 31, 2014	March 31, 2015	March 31, 2014
Net revenue	100	% 100	% 100	% 100
Cost of goods sold	72	% 77	% 72	% 73
Gross margin	28	% 23	% 28	% 27
Operating expenses:				
Selling, general and administrative	33	% 41	% 39	% 34
Research, development and engineering	3	% 17	% 7	% 11
Total operating expenses	36	% 58	% 46	% 45
Loss from operations	(8	)% (35	)% (18	)% (18
Interest and other income, net	(1	)% 0	% 0	% 0
Loss before income taxes	(9	)% (35	)% (18	)% (18
Income taxes provision	1	% 0	% 1	% 2
Net loss	(10	)% (35	)% (19	)% (20
Add: net loss (income) attributable to noncontrolling interest	0	% 6	% (1	)% 3
Net loss attributable to Amtech Systems, Inc.	(10	)% (29	)% (20	)% (17

Table of Contents

Net Revenue

Net revenue consists of revenue recognized upon shipment or installation of products using proven technology and upon acceptance of products using new technology. In addition, spare parts sales are recognized upon shipment. Service revenue is recognized upon completion of the service activity or ratably over the term of the service contract. Since the majority of our revenue is generated from large system sales, revenue and operating income can be significantly impacted by the timing of system shipments, and recognition of revenue based on customer acceptances.

	Three Months Ended March 31,				Six months ended March 31,					
Segment	2015	2014	Incr (Decr)	% Change		2015	2014	Incr (Decr)	% Change	
	(dollars in thousands)									
Solar	\$9,463	\$8,017	\$1,446	18	%	\$17,749	\$16,505	\$1,244	8	%
Semiconductor	12,088	2,271	9,817	432	%	12,820	6,346	6,474	102	%
Polishing	2,722	2,429	293	12	%	6,100	4,637	1,463	32	%
Total net revenue	\$24,273	\$12,717	\$11,556	91	%	\$36,669	\$27,488	\$9,181	33	%

Net revenue for the quarters ended March 31, 2015 and 2014 was \$24.3 million and \$12.7 million, respectively, an increase of \$11.6 million or 91%. Revenue from the solar segment increased 18% due primarily to improvement in the balance between supply and demand in the solar market. Revenue from the semiconductor segment increased 432% due primarily to the inclusion of BTU revenues since January 30, 2015. Revenue from the polishing segment increased 12% due primarily to the continued increase in demand for our templates used in single-sided polishing processes for sapphire substrates used in LED lighting and mobile communication devices.

Net revenue for the six months ended March 31, 2015 and 2014 was \$36.7 million and \$27.5 million, respectively, an increase of \$9.2 million or 33%. Revenue from the solar segment increased 8% due primarily to ion implant revenue. Revenue from the semiconductor segment increased 102% due primarily to the acquisition of BTU. Increased year-to-date revenue from the polishing segment resulted mainly from continuing increases in sales of templates, for the reasons noted above.

Backlog and Orders

Our order backlog as of March 31, 2015 and 2014 was \$56.0 million and \$31.0 million, respectively, an increase of \$25 million. Our backlog as of March 31, 2015 includes approximately \$41.4 million of orders and deferred revenue from our solar industry customers, compared to \$20.5 million at March 31, 2014. New orders booked in the quarter ended March 31, 2015 were \$30.9 million versus \$21.5 million of customer orders in the quarter ended March 31, 2014. As of March 31, 2015, two customers individually accounted for 23% and 14% of our backlog. The orders included in our backlog are generally credit approved customer purchase orders expected to ship within the next twelve months. Because our orders are typically subject to cancellation or delay by the customer, our backlog at any particular point in time is not necessarily representative of actual sales for succeeding periods, nor is backlog any assurance that we will realize profit from completing these orders. Our backlog also includes revenue deferred pursuant to our revenue recognition policy, derived from orders that have already been shipped, but which have not met the criteria for revenue recognition.

Table of Contents

Gross Profit and Gross Margin

Gross profit is the difference between net revenue and cost of goods sold. Cost of goods sold consists of purchased material, labor and overhead to manufacture equipment and spare parts and the cost of service and support to customers for installation, warranty and paid service calls. Gross margin is gross profit as a percent of net revenue.

Segment	Three Months Ended March 31,				Six months ended March 31,					
	2015	2014	Incr (Decr)	% Change	2015	2014	Incr (Decr)	% Change		
	(dollars in thousands)									
Solar	\$1,723	\$1,510	\$213	14	%	\$3,760	\$4,305	\$(545)	(13)%	
Semiconductor	4,147	460	3,687	802	%	4,330	1,389	2,941	212	%
Polishing	1,019	928	91	10	%	2,227	1,739	488	28	%
Total gross profit	\$6,889	\$2,898	\$3,991	138	%	\$10,317	\$7,433	\$2,884	39	%

Gross profit for the three months ended March 31, 2015 and 2014 was \$6.9 million and \$2.9 million, respectively, an increase of \$4.0 million. Gross margin on products from our solar segment in the quarter ended March 31, 2015 was comparable to the margins in the quarter ended March 31, 2014. Higher gross profit and higher gross margins in the semiconductor segment resulted, in part, from the acquisition of BTU and was supplemented by higher gross profit from the increased revenue from our horizontal diffusion customers. In each of the quarters ended March 31, 2015 and 2014, we deferred profit of \$0.7 million.

Gross profit for the six months ended March 31, 2015 and 2014 was \$10.3 million and \$7.4 million, respectively, an increase of \$2.9 million. Gross margin on products from our solar segment decreased in the first half of fiscal 2015 compared to the first half of fiscal 2014, due primarily to low sales volumes in the first quarter of fiscal 2015. In the semiconductor segment, gross profit increased primarily due to the BTU acquisition. In the six months ended March 31, 2015, we recognized previously-deferred profit of \$0.5 million compared to a profit deferral of \$4.2 million in the six months ended March 31, 2014.

Gross profit on products from our polishing segment increased proportionally to the increase in revenues for this segment as product mix was generally consistent from period-to-period.

Selling, General and Administrative

Selling, general and administrative expenses consist of the cost of employees, consultants and contractors, facility costs, sales commissions, shipping costs, promotional marketing expenses, legal, accounting expenses and bad debt expense.

Selling, general and administrative (SG&A) expenses for the three months ended March 31, 2015 and 2014 were \$8.1 million and \$5.3 million, respectively. SG&A increased primarily due to the acquisition of BTU. In addition to SG&A expenses incurred by BTU, expenses were higher due to activity leading to our acquisition of BTU. Partially offsetting the increase was a decrease in bad debt expense. In the 2014 fiscal second quarter, we recorded \$1.4 million of bad debt expense related to financial difficulties encountered by certain customers. SG&A expense includes \$0.3 million and \$0.2 million of stock-based compensation expense for the three months ended March 31, 2015 and 2014, respectively.

SG&A expense for the six month periods ended March 31, 2015 and 2014 were \$14.5 million and \$9.4 million, respectively. SG&A increased primarily due to the acquisition of BTU. In addition to SG&A expenses incurred by BTU, expenses were higher due to activity leading to our acquisition of BTU as well as increases from higher commission expenses resulting from higher commission rates on certain sales in fiscal 2015. Contributing to the increase were higher compensation expenses, which resulted primarily from restoration of prior years' salary cuts. Partially offsetting the increase is a decrease of \$1.1 million in bad debt expense, as discussed above. SG&A expense includes \$0.6 million and \$0.4 million of stock-based compensation expense for the six months ended March 31, 2015 and 2014, respectively.

Research, Development and Engineering

Research, development and engineering ("RD&E") expenses consist of the cost of employees, consultants and contractors who design, engineer and develop new products and processes as well as materials and supplies used in producing prototypes. We

Table of Contents

receive reimbursements through governmental research and development grants which are netted against these expenses when certain conditions have been met.

	Three Months Ended March 31,				Six Months Ended March 31,				
	2015	2014	Incr. (Decr.)	% change	2015	2014	Incr. (Decr.)	% change	
	(dollars in thousands)				(dollars in thousands)				
Research, development and engineering	\$3,540	\$2,494	\$1,046	42 %	\$6,113	\$5,388	\$725	13 %	
Grants earned	(2,790)	(339)	(2,451)	723 %	(3,527)	(2,344)	(1,183)	50 %	
Net research, development and engineering	\$750	\$2,155	\$(1,405)	(65)%	\$2,586	\$3,044	\$(458)	(15)%	

Research, development and engineering expense, net of grants earned, for the three months ended March 31, 2015 decreased \$1.4 million compared to the three months ended March 31, 2014. For the six months ended March 31, 2015, RD&E expense, net of grants, decreased \$0.5 million compared to the six months ended March 31, 2014. The decrease in net RD&E expense is due to an increase in the recognition of government grant funding, partially offset by increases in spending resulting from the acquisition of BTU and SoLayTec.

As described in our Annual report on Form 10-K for the fiscal year ended September 30, 2014, our Kingstone subsidiary has entered into an agreement for the development of ion implant technology in China for markets other than solar. Depending on its progress, as well as the timing of grant recognition, this development project has resulted, and may result in the future, in significant quarter-to-quarter fluctuations in RD&E expenses.

Income Taxes

For the three and six months ended March 31, 2015 we recorded income tax expense of \$0.2 million and \$0.4 million, respectively. For the three and six month periods ended March 31, 2014 we recorded income tax expense of zero and \$0.6 million, respectively.

The income tax provisions are based upon estimates of annual income, annual permanent differences and statutory tax rates in the various jurisdictions in which we operate, except that certain loss jurisdictions and discrete items are treated separately. During the quarter, the valuation allowance on deferred tax assets increased due to losses in the Netherlands partially offset due to income in China, resulting in no tax benefit being recognized on the losses in the Netherlands and United Kingdom and no tax expense being recognized on the current quarter profit in China and France.

The Financial Accounting Standards requires that a valuation allowance be established when it is “more likely than not” that all or a portion of deferred tax assets will not be realized. A review of all available positive and negative evidence needs to be considered, including a company’s performance, the market environment in which the company operates and the length of carryback and carryforward periods. According to those standards, it is difficult to conclude that a valuation allowance is not needed when the negative evidence includes cumulative losses in recent years. Therefore, cumulative losses weigh heavily in the overall assessment. As a result of the merger with BTU, we determined that it is more likely than not that some of our U.S. federal deferred tax assets would not be realized, and recorded a partial valuation allowance in the U.S. In making this determination, we considered the cumulative losses in the U.S., including BTU, expected future taxable income and available tax planning strategies. The Company continues to have a full valuation allowance on the deferred tax assets related to the Netherlands and China and a partial valuation allowance on the deferred tax assets in France. A full valuation allowance has also been recorded for the United Kingdom as a result of the Merger.

Our future effective income tax rate depends on various factors, such as the amount of income (loss) in each tax jurisdiction, tax regulations governing each region, non-tax deductible expenses incurred as a percent of pre-tax income and the effectiveness of our tax planning strategies. At the end of 2011, we restructured our European operations to lower the tax rate on the Netherlands operations from 35% to a marginal rate of 25%, as we intend to permanently reinvest future Dutch earnings in our foreign operations. The effect of the restructure on our tax rate depends on the amount of income or loss earned in the Netherlands, as well as the portion of such income that can be demonstrated to have been derived from qualified new technologies, as well as the factors mentioned above.

Table of Contents

Liquidity and Capital Resources

At March 31, 2015, and September 30, 2014, cash and cash equivalents were \$32.6 million and \$27.4 million, respectively. At March 31, 2015, and September 30, 2014, restricted cash was \$1.6 million and \$2.4 million, respectively. Our working capital was \$42.6 million as of March 31, 2015 and \$32.3 million as of September 30, 2014.

The increase in cash for the first six months of fiscal 2015 of \$5.3 million was primarily due to \$8.6 million of net cash acquired in the acquisition of BTU and SoLaytec, partially offset by cash used by operating activities of \$3.0 million, capital expenditures and cash used in financing activities. We maintain a portion of our cash and cash equivalents in Euros at our Dutch and French operations; therefore, changes in the exchange rate have an impact on our cash balances. Our ratio of current assets to current liabilities was 1.7:1 and 2.0:1 as of March 31, 2015, and September 30, 2014, respectively. We expect to make a tax payment of approximately \$4.5 million in June 2015. We have never paid dividends on our Common Stock.

In December 2014, we acquired \$2.0 million of long-term debt as part of the SoLayTec acquisition. As of March 31, 2015, total SoLayTec debt was \$2.1 million. The SoLayTec debt has interest rates ranging from 5.95% to 10% and maturity dates ranging from fiscal 2017 to fiscal 2021. Additionally, in January 2015, the Company acquired \$7.2 million of long-term debt as part of the BTU acquisition. The debt acquired from BTU has an interest rate of 4.4% through September, 2018, at which time the interest rate will be adjusted and indexed to the Federal Home Loan Board Five Year Classic Advance Rate.

The success of our growth strategy is dependent upon the availability of additional capital resources on terms satisfactory to management. Our sources of capital in the past have included the sale of equity securities, which include common and preferred stock sold in private transactions and public offerings, capital leases and long-term debt. We believe that our principal sources of liquidity discussed above are sufficient to support operations for at least the next twelve months.

Cash Flows from Operating Activities

Cash used in our operating activities was \$3.0 million for the six months ended March 31, 2015, compared to \$1.9 million used in such activities for the six months ended March 31, 2014. During the six months ended March 31, 2015, \$4.3 million was used in losses on operations, net of non-cash charges. Cash was also used through increases in inventory and other working capital. Partially offsetting these uses of cash were increases in accounts payable and customer deposits.

Cash Flows from Investing Activities

Our investing activities for each of the six month periods ended March 31, 2015 and 2014 consisted of purchases of property, plant and equipment of approximately \$0.1 million and \$0.2 million, respectively. In December 2014, we acquired a 51% interest SoLayTec, for an investment of \$0.3 million net of the cash of the acquired company. Cash of \$8.8 million was acquired in the acquisition of BTU in January, 2015.

Cash Flows from Financing Activities

For the six months ended March 31, 2015 there were no significant cash flows from financing activities. For the six months ended March 31, 2014, \$1.2 million of cash was received from the exercise of stock options.

Table of Contents

Off-Balance Sheet Arrangements

As of March 31, 2015, Amtech had no off-balance sheet arrangements as defined in Item 303(a)(4) of Regulation S-K promulgated by the Securities and Exchange Commission.

Contractual Obligations

Purchase obligations were \$29.8 million as of March 31, 2015, compared to \$7.9 million as of September 30, 2014, an increase of \$21.9 million. In December 2014, the Company acquired long-term debt as part of the SoLayTec acquisition. The debt acquired is stated at fair market value of \$2.1 million as of March 31, 2015. The debt acquired has interest rates ranging from 5.95% to 10% and maturity dates ranging from fiscal 2017 to fiscal 2021. Additionally, in January 2015, the Company acquired a mortgage, which is included in long-term debt as part of the merger with BTU. The mortgage acquired is stated at fair market value of \$7.2 million as of March 31, 2015. The mortgage acquired from BTU has an interest rate of 4.4% through September 26, 2018, at which time the interest rate will be adjusted to a per annum fixed rate equal to the aggregate of the Federal Home Loan Board ("FHLB") Five Year Classic Advance Rate plus two hundred forty basis points. All outstanding principal and accrued and unpaid interest will be due and payable on the maturity date. Refer to Amtech's annual report on Form 10-K for the year ended September 30, 2014, for information on the Company's other contractual obligations.

Critical Accounting Policies

"Management's Discussion and Analysis of Financial Condition and Results of Operations" discusses our condensed consolidated financial statements that have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these condensed consolidated financial statements requires us to make estimates and assumptions that affect the reported amount of assets and liabilities at the date of the condensed consolidated financial statements, the disclosure of contingent assets and liabilities at the date of the condensed consolidated financial statements and the reported amounts of revenue and expenses during the reporting period.

On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, inventory valuation, accounts and notes receivable collectability, warranty and impairment of long-lived assets. We base our estimates and judgments on historical experience and on various other factors that we believe to be reasonable under the circumstances. The results of these estimates and judgments form the basis for making conclusions about the carrying value of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions.

A critical accounting policy is one that is both important to the presentation of our financial position and results of operations, and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. These uncertainties are discussed in Part I, Item 1A of our Annual Report on Form 10-K for the year ended September 30, 2014. We believe our critical accounting policies relate to the more significant judgments and estimates used in the preparation of our consolidated financial statements.

We believe the critical accounting policies discussed in the section entitled "Item 7: Management's Discussion and Analysis of Financial Condition and Results of Operations – Critical Accounting Policies" in our Annual Report on Form 10-K for the fiscal year ended September 30, 2014 represent the most significant judgments and estimates used in the preparation of our consolidated financial statements. There have been no significant changes in our critical

accounting policies during the six months ended March 31, 2015.

Impact of Recently Issued Accounting Pronouncements

For discussion of the impact of recently issued accounting pronouncements, see “Item 1: Financial Information” under “Impact of Recently Issued Accounting Pronouncements”.

Table of Contents

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

We are exposed to foreign currency exchange rates to the extent sales contracts, purchase contracts, assets or liabilities of our operations are denominated in currencies other than their functional currency. Our operations in the United States are generally conducted in their functional currency, the U.S. dollar. Our operations in Europe, China and other countries conduct business primarily in their functional currencies and occasionally enter into transactions in non-functional currencies. It is highly uncertain how currency exchange rates will fluctuate in the future. Actual changes in foreign exchange rates could adversely affect our operating results or financial condition.

During fiscal 2014 and in the first six months of fiscal 2015, we did not hold any stand-alone or separate derivative instruments. We incurred net foreign currency transaction gains or losses of less than \$0.1 million during the six months ended March 31, 2015 and 2014.

We incurred foreign currency translation losses of \$3.4 million and gains of \$0.7 million during the six months ended March 31, 2015 and 2014, respectively, a type of other comprehensive income (loss), which is a direct adjustment to stockholders' equity. Our net investment in and advances to our foreign operations totaled \$19.1 million as of March 31, 2015. A 10% change in the value of the foreign currencies relative to the U.S. dollar would cause approximately \$1.9 million of other comprehensive income (loss).

As of March 31, 2015 sales commitments denominated in a currency other than the functional currency of our transacting operation totaled approximately \$4.8 million. Our lead-times to fulfill these commitments generally range between 13 and 26 weeks. A 10% change in the relevant exchange rates between the time the order was taken and the time of shipment would not cause our gross profit on such orders to be significantly greater or less than expected on the date the order was taken.

As of March 31, 2015, purchase commitments denominated in a currency other than the functional currency of our transacting operation totaled less than \$1.0 million. A 10% change in the relevant exchange rates between the time the purchase order was placed and the time the order is received would not cause our cost of such items to be significantly greater or less than expected on the date the purchase order was placed.

Table of Contents

Item 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

Our management, including the Chief Executive Officer (“CEO”) and the Chief Financial Officer (“CFO”), has carried out an evaluation of the effectiveness of our disclosure controls and procedures as of March 31, 2015, pursuant to Exchange Act Rules 13a-15(e) and 15(d)-15(e). Disclosure controls and procedures means controls and other procedures that are designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is accumulated and communicated to management, including the principal executive and principal financial officer, as appropriate to allow timely decisions regarding required disclosure. Based upon that evaluation, our CEO and CFO have concluded that as of such date, our disclosure controls and procedures in place were effective.

Changes in Internal Control Over Financial Reporting

During the quarter ended March 31, 2015, the Company acquired BTU. Other than the addition of BTU's internal control over financial reporting and any related changes in control to integrate BTU into the Company, there was no change in Amtech's internal control over financial reporting during the six months ended March 31, 2015 that has materially affected, or is reasonably likely to materially affect, its internal control over financial reporting.

Table of Contents

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

The Company and its subsidiaries are defendants from time to time in actions for matters arising out of their business operations. As previously disclosed, shortly after the Company entered into the Merger Agreement with BTU, two separate putative stockholder class action complaints were filed in the Court of Chancery of the State of Delaware (together, the "Stockholder Actions"). The first was filed on November 4, 2014 and the second on November 17, 2014, purportedly on behalf of BTU's public stockholders, against BTU, members of the BTU Board, Amtech and Merger Sub. The Stockholder Actions were consolidated on December 4, 2014. These complaints generally allege, among other things, that the members of BTU's board of directors breached their fiduciary duties owed to BTU's public stockholders by failing to engage in a competitive sale and bidding process, by causing BTU to enter into the Merger Agreement and by approving the merger, and that the Company and Merger Sub aided and abetted such alleged breaches of fiduciary duties. These complaints further allege that these fiduciary breaches gave the Company an unfair advantage as a result of BTU's alleged failure to solicit other potential acquirers and also that the Merger Agreement improperly favors the Company and unduly restricts BTU's ability to negotiate with other potential bidders. The complaint generally seeks, among other things, declaratory and injunctive relief concerning the alleged fiduciary breaches, injunctive relief prohibiting the Company, Merger Sub, and BTU from consummating the Merger, other forms of equitable relief, and compensatory damages.

On January 16, 2015, the Company and BTU, along with the other defendants named therein, entered into a memorandum of understanding (the "MOU") to settle the Stockholder Actions. Pursuant to the MOU, the parties to the Stockholder Actions agreed to resolve the claims alleged and the Company and BTU agreed to make certain additional disclosures regarding the Merger. The MOU is expected to be memorialized in a stipulation of settlement, which will be subject to customary terms and conditions, including court approval, and will include an agreement by the plaintiffs in the Stockholder Actions, on behalf of each stockholder class, to provide a release of all claims against the Company and BTU, along with the other defendants named therein, subject to an exception for certain securities law claims. In addition, as part of the settlement, BTU has agreed to be responsible for the payment of certain amounts in plaintiffs' attorney fees and expenses in connection with the settlement. The Company and BTU entered into the MOU solely to avoid the costs, risks and uncertainties inherent in litigation and without admitting any liability or wrongdoing. There can be no assurance that the parties will ultimately enter into a stipulation of settlement or that the court will approve such settlement. In such event, the proposed settlement as contemplated by the MOU may be terminated.

Item 1A. Risk Factors

The most significant risk factors applicable to Amtech are described in Part I, Item 1A (Risk Factors) of Amtech's Annual Report on Form 10-K for the fiscal year ended September 30, 2014 (our "2014 Form 10-K").
