CONDENSED NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - BASIS OF PRESENTATION

Independent Bank Corp. (the “Company”) is a state chartered, federally registered bank holding company, incorporated in 1985. The Company is the sole stockholder of Rockland Trust Company (“Rockland Trust” or the “Bank”), a Massachusetts trust company chartered in 1907.

All material intercompany balances and transactions have been eliminated in consolidation. Certain previously reported amounts may have been reclassified to conform to the current year’s presentation.

The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, all adjustments considered necessary for a fair presentation of the financial statements, primarily consisting of normal recurring adjustments, have been included. Operating results for the quarter ended June 30, 2016 are not necessarily indicative of the results that may be expected for the year ending December 31, 2016 or any other interim period.

For further information, refer to the consolidated financial statements and notes thereto included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2015, filed with the Securities and Exchange Commission.

NOTE 2 - RECENT ACCOUNTING STANDARDS UPDATES

FASB ASC Topic 326 "Financial Instruments - Credit Losses" Update No. 2016-13. Update No. 2016-13 was issued in June 2016 to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments and other commitments to extend credit held by a reporting entity at each reporting date. To achieve this objective, the amendments in this update replace the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The amendments affect entities holding financial assets and net investment in leases that are not accounted for at fair value through net income. The amendments affect loans, debt securities, trade receivables, net investments in leases, off-balance sheet credit exposures, reinsurance receivables, and any other financial assets not excluded from the scope that have the contractual right to receive cash. The amendments in this update are effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years, with earlier adoption permitted as of fiscal years beginning after December 15, 2018, including interim periods with those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-12. Update No. 2016-12 was issued in May 2016. This update does not affect the core principle of the guidance. It only affects the narrow aspects of Topic 606, such as assessing the collectability criterion, presentation of sales tax and other similar taxes collected from customers, noncash consideration, contract modifications at transition, completed contracts at transition, and other technical corrections. The amendments in this update are effective for annual periods and interim periods within those annual periods beginning after December 31, 2017. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim reporting periods within that reporting period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 605 "Revenue Recognition" and Topic 815 "Derivatives and Hedging" Update No. 2016-11. Update No. 2016-11 was issued in May 2016 and is a rescission of SEC guidance because of ASU Updates 2014-09 and 2014-16 pursuant to staff announcements at the March 3, 2016 Emerging Issues Task Force meeting. The amendments in this update are effective upon adoption of Topic 606 "Revenue from Contracts with Customers." The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-10. Update No. 2016-10 was issued in April 2016 and affects entities that enter into contracts with customers to transfer goods or services (that are an output of the entity's ordinary activities) in exchange for consideration. The amendments in this update do not change the core principle of the guidance in Topic 606. Rather, the amendments in this update clarify the following two aspects of Topic 606: identifying performance obligations and the licensing implementation guidance, while retaining the related principles for those areas. The amendments in this update are effective for annual periods and interim periods within those annual periods beginning after December 31, 2017. Earlier adoption is permitted only as of annual reporting periods beginning after December 15, 2016, including interim

Table of Contents

reporting periods within that reporting period. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 718 "Compensation - Stock Compensation" Update No. 2016-09. Update No. 2016-09 was issued in March 2016 and affects all entities that issue share-based awards to their employees. This update was issued as part of the FASB’s simplification initiative. The areas for simplification in this update involve several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 606 "Revenue from Contracts with Customers" Update No. 2016-08. Update No. 2016-08 was issued in March 2016 and affects entities that enter into contracts with customers to transfer goods or services (that are an output of the entity's ordinary activities) in exchange for consideration. The core principle of the guidance in Topic 606 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. To achieve that core principle, an entity should apply the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. The amendments in this update do not change the core principle of the guidance. The effective date and transition requirements for the amendments are the same as the effective date and transitions requirements of Update No. 2014-09, which were originally finalized for public companies effective for fiscal years beginning after December 15, 2016. However, this effective date was subsequently deferred for another year. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.

FASB ASC Topic 323 "Investments -Equity Method and Joint Ventures" Update No. 2016-07. Update No. 2016-07 was issued in March 2016 and eliminates the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required. The amendments in this update require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method. Early adoption is permitted. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Contingent Put and Call Options in Debt Instruments" Update No. 2016-6. Update No. 2016-6 was issued in March 2016 to clarify the requirements for assessing whether contingent call (put) options that can accelerate the payment of principal on debt instruments are clearly and closely related to their debt hosts. An entity performing the assessment under the amendments in this update is required to assess the embedded call (put) options solely in accordance with the four-step decision sequence. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply the amendments in this update on either a prospective basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.

FASB ASC Topic 815 "Derivative and Hedging - Effect of Derivative Contract Novations on Existing Hedge Accounting Relationships" Update No. 2016-05. Update No. 2016-05 was issued in March 2016 and applies to all reporting entities for which there is a change in the counterpart to a derivative instrument that has been designated as a hedging instrument under Topic 815. The amendments in this update clarify that a change in the counterparty to a derivative instrument that has been designated as the hedging instrument under Topic 815 does not, in and of itself, require dedesignation of that hedging relationship provided that all other hedge accounting criteria (including those in paragraphs 815-20-35-14 through 35-18) continue to be met. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2016, including interim periods within those fiscal years. An entity has an option to apply the amendments in this update on either a prospective

Table of Contents

basis or a modified retrospective basis. Early adoption is permitted, including adoption in an interim period. The adoption of this standard is not expected to have a material impact on the Company's consolidated financial position.
FASB ASC Topic 842 "Leases" Update No. 2016-02. Update No. 2016-02 was issued in February 2016 and affects any entity that enters into a lease (as that term is defined in this update), with some specified scope exemptions. The core principle of this update is that a lessee should recognize in the statement of financial position a liability to make lease payments and a right-of-use asset representing its right to use the underlying asset for the lease term. For leases with a term of 12 months or less, a lessee is permitted to make an accounting policy election by class of underlying asset not to recognize lease assets and lease liabilities. The recognition, measurement, and presentation of expenses and cash flows arising from a lease have not significantly changed from previous GAAP. In addition, the accounting applied by a lessor is largely unchanged from that applied under previous GAAP. For public companies, the amendments in this update are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.
FASB ASC Topic 825-10 "Financial Instruments - Overall Recognition and Measurement of Financial Assets and Financial Liabilities" Update No. 2016-01. Update No. 2016-01 was issued in January 2016 to amend the guidance in U.S. GAAP on the classification and measurement of financial instruments. Although the update retains many current requirements, it significantly revises an entity's accounting related to (1) the classification and measurement of investments in equity securities and (2) the presentation of certain fair value changes for financial liabilities measured at fair value. The update also amends certain disclosure requirements associated with the fair value of financial instruments and various other aspects of recognition, measurement, presentation and disclosure of financial instruments. For public entities, the amendments in this update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted for only certain guidance. The Company is currently assessing the impact of the adoption of this standard on the Company's consolidated financial position.
Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") Subtopic 835-30 "Interest - Imputation of Interest" Update No. 2015-03. Update No. 2015-03 was issued in April 2015 to simplify presentation of debt issuance costs. The amendments in this update require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuances costs are not affected by the amendments in this update. The amendments in this update were adopted by the Company effective January 1, 2016, with applicable prior period presentation updated as well. The adoption of this standard did not have a material impact on the Company's consolidated financial position.

FASB ASC Topic 810 "Consolidation" Update No. 2015-02. Update No. 2015-02 was issued in February 2015 to respond to stakeholders' concerns about the current accounting for consolidation of certain legal entities. The amendments in this update affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: (1) modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities, (2) eliminate the presumption that a general partner should consolidate a limited partnership, (3) affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships, and (4) provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940 for registered money market funds. The amendments in this update were adopted by the Company effective January 1, 2016. The adoption of this standard did not have a material impact on the Company's consolidated financial position.

NOTE 3 - SECURITIES
Trading Securities

The Company had trading securities of $799,000 and $356,000 as of June 30, 2016 and December 31, 2015, respectively. These securities are held in a rabbi trust and will be used for future payments associated with the Company’s non-qualified
401(k) Restoration Plan and Non-Qualified Deferred Compensation Plan.

Available for Sale and Held to Maturity Securities
The following table presents a summary of the amortized cost and gross unrealized holding gains and losses recorded in other comprehensive income and fair value of securities available for sale and securities held to maturity for the periods below:

	June 30, 2016				December 31, 2015			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value

Small business administration pooled securities	33,367	1,282	—	34,649	35,291	437	(64)	35,664

Corporate debt securities	—	—	—	—	5,000	6	—	5,006
Total held to maturity securities	$438,656	$ 13,710	$ (446)	$451,920	$477,507	$ 5,177	$ (3,935)	$478,749
Total	$816,678	$ 26,706	$ (1,640)	$841,744	$842,647	$ 10,429	$ (7,078)	$845,998

When securities are sold, the adjusted cost of the specific security sold is used to compute the gain or loss on the sale.

The actual maturities of certain securities may differ from the contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties. A schedule of the contractual maturities of securities available for sale and securities held to maturity as of June 30, 2016 is presented below:

Table of Contents

	Available for Sale		Held to Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
	(Dollars in thousands)			
Due in one year or less	$—	$—	$32	$32
Due after one year to five years	24,601	25,143	16,186	16,973
Due after five to ten years	96,138	99,926	26,469	27,595
Due after ten years	242,916	249,920	395,969	407,320
Total debt securities	$363,655	$374,989	$438,656	$451,920
Equity securities	$14,367	$14,835	$—	$—
Total	$378,022	$389,824	$438,656	$451,920

Inclusive in the table above is $14.4 million of callable securities in the Company's investment portfolio at June 30, 2016.

The carrying value of securities pledged to secure public funds, trust deposits, repurchase agreements and for other purposes, as required or permitted by law, was $450.4 million and $444.8 million at June 30, 2016 and December 31, 2015, respectively.

At June 30, 2016 and December 31, 2015, the Company had no investments in obligations of individual states, counties, or municipalities which exceeded 10% of stockholders' equity.

Other-Than-Temporary Impairment ("OTTI")

The Company continually reviews investment securities for the existence of OTTI, taking into consideration current market conditions, the extent and nature of changes in fair value, issuer rating changes and trends, the credit worthiness of the obligor of the security, volatility of earnings, current analysts' evaluations, the Company's intent to sell the security, or whether it is more likely than not that the Company will be required to sell the debt security before its anticipated recovery, as well as other qualitative factors. The term "other-than-temporary" is not intended to indicate that the decline is permanent, but indicates that the prospects for a near-term recovery of value is not necessarily favorable, or that there is a lack of evidence to support a realizable value equal to or greater than the carrying value of the investment.

The following tables show the gross unrealized losses and fair value of the Company's investments in an unrealized loss position, which the Company has not deemed to be OTTI, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position:

	June 30, 2016						
		Less than 12 months		12 months or longer		Total

The Company does not intend to sell these investments and has determined based upon available evidence that it is more likely than not that the Company will not be required to sell the security before the recovery of its amortized cost basis. As a result, the Company does not consider these investments to be OTTI. The Company made this determination by reviewing various qualitative and quantitative factors regarding each investment category, such as current market conditions, extent and nature of changes in fair value, issuer rating changes and trends, volatility of earnings, and current analysts' evaluations.

As a result of the Company's review of these qualitative and quantitative factors, the causes of the impairments listed in the table above by category are as follows at June 30, 2016:

- Agency Mortgage-Backed Securities and Agency Collateralized Mortgage Obligations: These portfolios have contractual terms that generally do not permit the issuer to settle the securities at a price less than the current par value of the investment. The decline in market value of these securities is attributable to changes in interest rates and not credit quality. Additionally, these securities are either implicitly or explicitly guaranteed by the U.S. Government or one of its agencies.
- Single Issuer Trust Preferred Securities: This portfolio consists of two securities, one of which is below investment grade. The unrealized loss on these securities is attributable to the illiquid nature of the trust preferred market in the current economic environment. Management evaluates various financial metrics for the issuers, including regulatory capital ratios of the issuers.
- Pooled Trust Preferred Securities: This portfolio consists of one below investment grade security which is performing. The unrealized loss on this security is attributable to the illiquid nature of the trust preferred market and the significant risk premiums required in the current economic environment. Management evaluates collateral credit and instrument structure, including current and expected deferral and default rates and timing. In addition, discount rates are determined by evaluating comparable spreads observed currently in the market for similar instruments.
- Equity Securities: This portfolio consists of mutual funds and other equity investments. During some periods, the mutual funds in the Company's investment portfolio may have unrealized losses resulting from market fluctuations as well as the risk premium associated with that particular asset class. For example, emerging market equities tend to trade at a higher risk premium than U.S. government bonds and thus, will fluctuate to a greater degree on both the upside and the downside. In the context of a well-diversified portfolio, however, the correlation amongst the various asset classes represented by the funds serves to minimize downside risk. The Company evaluates each mutual fund in the portfolio regularly and measures performance on both an absolute and relative basis. A reasonable recovery period for positions with an unrealized loss is based on management's assessment of general economic data, trends within a particular asset class, valuations, earnings forecasts and bond durations. The Company has the ability and intent to hold these equity securities until a recovery of fair value.

Table of Contents

The following table shows the total OTTI that the Company recorded for the periods indicated:

	Three Months Ended June 30 2016	Three Months Ended June 30 2015	Six Months Ended June 30 2016	Six Months Ended June 30 2015

For the purpose of estimating the allowance for loan losses, management segregates the loan portfolio into the portfolio segments detailed in the above tables. Each of these loan categories possesses unique risk characteristics that are considered when determining the appropriate level of allowance for each segment. Some of the risk characteristics unique to each loan category include:

Commercial Portfolio

- Commercial and Industrial: Loans in this category consist of revolving and term loan obligations extended to business and corporate enterprises for the purpose of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to: accounts receivable, inventory, plant and equipment, or real estate, if applicable. Repayment sources consist of primarily, operating cash flow, and secondarily, liquidation of assets.

- Commercial Real Estate: Loans in this category consist of mortgage loans to finance investment in real property such as multi-family residential, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties. Loans are typically written with amortizing payment structures. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources consist of primarily, cash flow from operating leases and rents, and secondarily, liquidation of assets.

- Commercial Construction: Loans in this category consist of short-term construction loans, revolving and nonrevolving credit lines and construction/permanent loans to finance the acquisition, development and construction or rehabilitation of real property. Project types include residential 1-4 family, condominium and multi-family homes, commercial/retail, office, industrial, hotels, educational and healthcare facilities and other specific use properties. Loans may be written with nonamortizing or hybrid payment structures depending upon the type of project. Collateral values are determined based upon third party appraisals and evaluations. Loan to value ratios at origination are governed by established policy and regulatory guidelines. Repayment sources vary depending upon the type of project and may consist of sale or lease of units, operating cash flows or liquidation of other assets.
- Small Business: Loans in this category consist of revolving, term loan and mortgage obligations extended to sole proprietors and small businesses for purposes of financing working capital and/or capital investment. Collateral generally consists of pledges of business assets including, but not limited to, accounts receivable, inventory, plant and equipment, or real estate if applicable. Repayment sources consist primarily of operating cash flows, and secondarily, liquidation of assets.

For the commercial portfolio it is the Company's policy to obtain personal guarantees for payment from individuals holding material ownership interests of the borrowing entities.

Consumer Portfolio

- Residential Real Estate: Residential mortgage loans held in the Company's portfolio are made to borrowers who demonstrate the ability to make scheduled payments with full consideration to underwriting factors such as current and expected income, employment status, current assets, other financial resources, credit history and the value of the collateral. Collateral consists of mortgage liens on 1-4 family residential properties. The Company does not originate or purchase sub-prime loans.
- Home Equity: Home equity loans and lines are made to qualified individuals and are primarily secured by senior or junior mortgage liens on owner-occupied 1-4 family homes, condominiums or vacation homes. The home equity loan has a fixed rate and is billed in equal payments comprised of principal and interest. The home equity line of credit has a variable rate and is billed in interest-only payments during the draw period. At the end of the draw period, the home equity line of credit is billed as a percentage of the principal balance plus all accrued interest. Additionally, the Company has the option of renewing the line of credit for additional draw periods. Borrower qualifications include favorable credit history combined with supportive income requirements and combined loan to value ratios within established policy guidelines.
- Other Consumer: Other consumer loan products include personal lines of credit and amortizing loans made to qualified individuals for various purposes such as education, debt consolidation, personal expenses or overdraft protection. Borrower qualifications include favorable credit history combined with supportive income and collateral requirements within established policy guidelines. These loans may be secured or unsecured.

Credit Quality

The Company continually monitors the asset quality of the loan portfolio using all available information. Based on this information, loans demonstrating certain payment issues or other weaknesses may be categorized as delinquent, impaired, nonperforming and/or put on nonaccrual status. Additionally, in the course of resolving such loans, the Company may choose to restructure the contractual terms of certain loans to match the borrower's ability to repay the loan based on their current financial condition. If a restructured loan meets certain criteria, it may be categorized as a troubled debt restructuring ("TDR").

The Company reviews numerous credit quality indicators when assessing the risk in its loan portfolio. For the commercial portfolio, the Company utilizes a 10-point commercial risk-rating system, which assigns a risk-grade to each borrower based on a number of quantitative and qualitative factors associated with a commercial loan transaction. Factors considered include industry and market conditions, position within the industry, earnings trends, operating cash flow, asset/liability values, debt capacity, guarantor strength, management and controls, financial reporting, collateral, and other considerations. The risk-ratings categories are defined as follows:

- 1- 6 Rating — Pass: Risk-rating grades “1” through “6” comprise those loans ranging from ‘Substantially Risk Free’ which indicates borrowers are of unquestioned credit standing and the pinnacle of credit quality, well established companies with a very strong financial condition, and loans fully secured by cash collateral, through ‘Acceptable Risk’, which indicates borrowers may exhibit declining earnings, strained cash flow, increasing or above average leverage and/or weakening market fundamentals that indicate below average asset quality, margins and market share. Collateral coverage is protective.

Table of Contents

- 7 Rating — Potential Weakness: Borrowers exhibit potential credit weaknesses or downward trends deserving management's close attention. If not checked or corrected, these trends will weaken the Company's asset and position. While potentially weak, currently these borrowers are marginally acceptable; no loss of principal or interest is envisioned.
- 8 Rating — Definite Weakness Loss Unlikely: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt. Loan may be inadequately protected by the current net worth and paying capacity of the obligor or by the collateral pledged, if any. Normal repayment from the borrower is in jeopardy, although no loss of principal is envisioned. However, there is a distinct possibility that a partial loss of interest and/or principal will occur if the deficiencies are not corrected. Collateral coverage may be inadequate to cover the principal obligation.
- 9 Rating — Partial Loss Probable: Borrowers exhibit well defined weaknesses that jeopardize the orderly liquidation of debt with the added provision that the weaknesses make collection of the debt in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. Serious problems exist to the point where partial loss of principal is likely.
- 10 Rating — Definite Loss: Borrowers deemed incapable of repayment. Loans to such borrowers are considered uncollectible and of such little value that continuation as active assets of the Company is not warranted.

The credit quality of the commercial loan portfolio is actively monitored and any changes in credit quality are reflected in risk-rating changes. Risk-ratings are assigned or reviewed for all new loans, when advancing significant additions to existing relationships (over $50,000), at least quarterly for all actively managed loans, and any time a significant event occurs, including at renewal of the loan.

The Company utilizes a comprehensive strategy for monitoring commercial credit quality. Borrowers are required to provide updated financial information at least annually which is carefully evaluated for any changes in credit quality. Larger loan relationships are subject to a full annual credit review by an experienced credit analysis group. Additionally, the Company retains an independent loan review firm to evaluate the credit quality of the commercial loan portfolio. The independent loan review process achieves significant penetration into the commercial loan portfolio and reports the results of these reviews to the Audit Committee of the Board of Directors on a quarterly basis.

The following table details the amount of outstanding principal balances relative to each of the risk-rating categories for the Company's commercial portfolio:

		June 30, 2016				
Category	Risk Rating	Commercial and Industrial	Commercial Real Estate	Commercial Construction	Small Business	Total
		(Dollars in thousands)				
Pass	1 - 6	$811,834	$2,581,659	$ 361,211	$ 107,949	$3,862,653

Table of Contents

For the Company's consumer portfolio, the quality of the loan is best indicated by the repayment performance of an individual borrower. However, the Company does supplement performance data with current Fair Isaac Corporation ("FICO") scores and Loan to Value ("LTV") estimates. Current FICO data is purchased and appended to all consumer loans on a quarterly basis. In addition, automated valuation services and broker opinions of value are used to supplement original value data for the residential and home equity portfolios, periodically. The following table shows the weighted average FICO scores and the weighted average combined LTV ratios as of the periods indicated below:

	June 30, 2016		December 31, 2015	
Residential portfolio				
FICO score (re-scored)(1)	742		742	
LTV (re-valued)(2)	61.9	%	61.4	%
Home equity portfolio				
FICO score (re-scored)(1)	766		765	
LTV (re-valued)(2)	55.9	%	55.8	%

(1) The average FICO scores for June 30, 2016 are based upon rescores available from May 31, 2016 and origination score data for loans booked between June 1, 2016 and June 30, 2016. The average FICO scores for December 31, 2015 are based upon rescores available from November 30, 2015 and origination score data for loans booked between December 1, 2015 and December 31, 2015.

(2) The combined LTV ratios for June 30, 2016 are based upon updated automated valuations as of March 31, 2015 and origination value data for loans booked between April 1, 2015 and June 30, 2016. The combined LTV ratios for December 31, 2015 are based upon updated automated valuations as of March 31, 2015 and actual score data for loans booked from April 1, 2015 through December 31, 2015. For home equity loans and lines in a subordinate lien position, the LTV data represents a combined LTV, taking into account the senior lien data for loans and lines.

Asset Quality

The Company's philosophy toward managing its loan portfolios is predicated upon careful monitoring, which stresses early detection and response to delinquent and default situations. Delinquent loans are managed by a team of seasoned collection specialists and the Company seeks to make arrangements to resolve any delinquent or default situation over the shortest possible time frame. As a general rule, loans more than 90 days past due with respect to principal or interest are classified as nonaccrual loans. The Company also may use discretion regarding other loans over 90 days delinquent if the loan is well secured and/or in process of collection. Set forth is information regarding the Company's nonperforming loans at the period shown:

Table of Contents

The following table shows information regarding nonaccrual loans at the dates indicated:

	June 30, 2016	December 31, 2015
	(Dollars in thousands)	
Commercial and industrial	$3,177	$ 3,699
Commercial real estate	8,220	7,856
Commercial construction	—	304
Small business	349	239
Residential real estate	7,116	8,795
Home equity	6,684	6,742
Other consumer	81	55
Total nonaccrual loans(1)	$25,627	$ 27,690

(1) Included in these amounts were $5.1 million and $5.2 million of nonaccruing TDRs at June 30, 2016 and December 31, 2015, respectively.

The following table shows information regarding foreclosed residential real estate property at the dates indicated:

	June 30, 2016	December 31, 2015
	(Dollars in thousands)	
Foreclosed residential real estate property held by the creditor	$1,467	$ 1,430
Recorded investment in mortgage loans collateralized by residential real estate property that are in the process of foreclosure	$1,137	$ 1,059

The following table shows the age analysis of past due financing receivables as of the dates indicated:

(1) Other consumer portfolio is inclusive of deposit account overdrafts recorded as loan balances.

Troubled Debt Restructurings

In the course of resolving nonperforming loans, the Bank may choose to restructure the contractual terms of certain loans. The Bank attempts to work out an alternative payment schedule with the borrower in order to avoid foreclosure actions. Any loans that are modified are reviewed by the Bank to identify if a TDR has occurred, which is when, for economic or legal reasons related to a borrower's financial difficulties, the Bank grants a concession to the borrower that it would not otherwise consider. Terms may be modified to fit the ability of the borrower to repay in line with its current financial status and the restructuring of the loan may include the transfer of assets from the borrower to satisfy the debt, a modification of loan terms, or a combination of the two.

The following table shows the Company's total TDRs and other pertinent information as of the dates indicated:

	June 30, 2016	December 31, 2015
	(Dollars in thousands)	
TDRs on accrual status	$28,319	$ 32,849
TDRs on nonaccrual	5,121	5,225
Total TDRs	$33,440	$ 38,074
Amount of specific reserves included in the allowance for loan losses associated with TDRs	$1,592	$ 1,628
Additional commitments to lend to a borrower who has been a party to a TDR	$1,104	$ 972

The Company's policy is to have any restructured loan which is on nonaccrual status prior to being modified remain on nonaccrual status for six months subsequent to being modified before management considers its return to accrual status. If the restructured loan is on accrual status prior to being modified, it is reviewed to determine if the modified loan should remain on accrual status. Additionally, loans classified as TDRs are adjusted to reflect the changes in value of the recorded investment in the loan, if any, resulting from the granting of a concession. For all residential loan modifications, the borrower must perform during a 90 day trial period before the modification is finalized.

The following table shows the modifications which occurred during the periods indicated and the change in the recorded investment subsequent to the modifications occurring:

Table of Contents

	Three Months Ended June 30, 2016			Six Months Ended June 30, 2016

Court ordered concession	866	—	866	30
Total	$2,169	$3,415	$ 3,600	$ 4,201

Table of Contents

The Company considers a loan to have defaulted when it reaches 90 days past due. There were no loans that have been modified during the past twelve months which have subsequently defaulted during the three months ended June 30, 2016 and 2015. The following table shows loans that have been modified during the past twelve months which have subsequently defaulted during the periods indicated:

	Six Months Ended June 30			
	2016		2015	
	Number of Contracts	Recorded Investment	Number of Contracts	Recorded Investment
	(Dollars in thousands)			
Troubled debt restructurings that subsequently defaulted				
Commercial real estate	—	$ —	2	$ 880
Commercial and industrial	—	—	3	339
	—	$ —	5	$ 1,219

All TDR loans are considered impaired and therefore are subject to a specific review for impairment. The impairment analysis appropriately discounts the present value of the anticipated cash flows by the loan's contractual rate of interest in effect prior to the loan's modification. The amount of impairment, if any, is recorded as a specific loss allocation to each individual loan in the allowance for loan losses. Commercial loans (commercial and industrial, commercial construction, commercial real estate and small business loans), residential loans, and home equity loans that have been classified as TDRs and which subsequently default are reviewed to determine if the loan should be deemed collateral dependent. In such an instance, any shortfall between the value of the collateral and the carrying value of the loan is determined by measuring the recorded investment in the loan against the fair value of the collateral less costs to sell. The Company charges off the amount of any confirmed loan loss in the period when the loans, or portion of loans, are deemed uncollectible. Smaller balance consumer TDR loans are reviewed for performance to determine when a charge-off is appropriate.

Impaired Loans

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed.

Purchased Credit Impaired Loans

Certain loans acquired by the Company may have shown evidence of deterioration of credit quality since origination and it was therefore deemed unlikely that the Company would be able to collect all contractually required payments. As such, these loans were deemed to be PCI loans and the carrying value and prospective income recognition are predicated upon future cash flows expected to be collected. The following table displays certain information pertaining to PCI loans at the dates indicated:

	June 30, 2016	December 31, 2015
	(Dollars in thousands)	
Outstanding balance	$22,293	$ 23,199
Carrying amount	$20,001	$ 20,595

The following table summarizes activity in the accretable yield for the PCI loan portfolio:

	Three Months Ended June 30		Six Months Ended June 30	
	2016	2015	2016	2015
	(Dollars in thousands)			
Beginning balance	$2,779	$2,628	$2,827	$2,974
Acquisition	—	—	—	319
Accretion	(420)	(583)	(829)	(1,546)
Other change in expected cash flows (1)	234	481	531	700
Reclassification from nonaccretable difference for loans which have paid off (2)	32	1	96	80
Ending balance	$2,625	$2,527	$2,625	$2,527

(1) Represents changes in cash flows expected to be collected and resulting in increased interest income as a prospective yield adjustment over the remaining life of the loan(s).
(2) Results in increased interest income during the period in which the loan paid off at amount greater than originally expected.

NOTE 5 -EARNINGS PER SHARE

Earnings per share consisted of the following components for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30		June 30	
	2016	2015	2016	2015
	(Dollars in thousands, except share and per share data)			
Net income	$20,374	$ 17,451	$38,985	$ 26,910
Weighted Average Shares				
Basic shares	26,304,129	26,149,593	26,289,726	25,558,016
Effect of dilutive securities	47,885	71,819	45,679	76,626
Diluted shares	26,352,014	26,221,412	26,335,405	25,634,642
Net income per share				
Basic EPS	$0.77	$ 0.67	$1.48	$ 1.05
Effect of dilutive securities	—	—	—	—
Diluted EPS	$0.77	$ 0.67	$1.48	$ 1.05

The following table illustrates the options to purchase common stock or shares of performance-based restricted stock that were excluded from the calculation of diluted earnings per share because they were anti-dilutive for the periods indicated:

	Three Months Ended		Six Months Ended	
	June 30		June 30	
	2016	2015	2016	2015
Stock options	—	—	3,626	—
Performance-based restricted stock	—	—	—	—

Table of Contents

NOTE 6 - STOCK BASED COMPENSATION

Time Vested Restricted Stock Awards

During the six months ended June 30, 2016, the Company made the following awards of restricted stock:

Date	Shares Granted	Plan	Grant Date Fair Value Per Share	Vesting Period
2/11/2016	51,475	2005 Employee Stock Plan	$ 41.96	Ratably over 5 years from grant date
3/1/2016	600	2005 Employee Stock Plan	$ 44.37	Ratably over 5 years from grant date
5/24/2016	8,700	2010 NonEmployee Director Stock Plan	$ 48.34	Once at end of 5 years from grant date

The fair value of the restricted stock awards is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of restricted stock awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights.

Performance-Based Restricted Stock Awards

On February 11, 2016, the Company granted 20,450 performance-based restricted stock awards to certain executive level employees. These performance-based restricted stock awards were issued from the 2005 Employee Stock Plan and were determined to have a grant date fair value per share of $41.96. The number of shares to be vested will be contingent upon the Company's attainment of certain performance measures outlined in the award agreement and will be measured as of the end of the three year performance period (January 1, 2016 - December 31, 2018). These awards will be accounted for as equity awards due to the nature of these awards and the fact that these shares will not be settled in cash.

The fair value of the performance-based restricted stock awards, assuming achievement at target, is based upon the average of the high and low price at which the Company's common stock traded on the date of grant. The holders of these awards are not entitled to receive dividends or vote until the shares are vested.

Stock Options

The Company has made the following awards of nonqualified options to purchase shares of common stock during the six months ended June 30, 2016:

	Six Months Ended June 30, 2016
Date of grant	2/20/2016
Plan	2010
Options granted	5,000
Vesting period (beginning on grant date)	22 months
Expiration date	2/20/2026
Expected volatility	32.44 %
Expected life (years)	5.5
Expected dividend yield	2.28 %
Risk free interest rate	1.29 %
Fair value per option	$ 10.59

NOTE 7 - REPURCHASE AGREEMENTS

The Company can raise additional liquidity by entering into repurchase agreements at its discretion. In a security repurchase agreement transaction, the Company will generally sell a security, agreeing to repurchase either the same or substantially identical security on a specified later date, at a greater price than the original sales price. The difference between the sale price and purchase price is the cost of the proceeds, which is recorded as interest expense. The securities underlying the agreements are delivered to counterparties as security for the repurchase obligations. Since the securities are treated as collateral and the agreement does not qualify for a full transfer of effective control, the transactions does not meet the criteria to be classified as a sale, and is therefore

31

Table of Contents

considered a secured borrowing transaction for accounting purposes. Payments on such borrowings are interest only until the scheduled repurchase date. In a repurchase agreement the Company is subject to the risk that the purchaser may default at maturity and not return the securities underlying the agreements. In order to minimize this potential risk, the Company either deals with established firms when entering into these transactions or with customers whose agreements stipulate that the securities underlying the agreement are not delivered to the customer and instead are held in segregated safekeeping accounts by the Company's safekeeping agents. The tables below set forth information regarding the Company’s repurchase agreements allocated by source of collateral at the dates indicated:

	June 30, 2016				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(Dollars in thousands)				
Sources of Collateral					
U.S. government agency securities	$10,380	$ —	$ —	$ —	$10,380
Agency mortgage-backed securities	67,271	—	—	—	67,271
Agency collateralized mortgage obligations	62,065	—	—	—	62,065
Total borrowings	$139,716	$ —	$ —	$ —	$139,716

	December 31, 2015				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 Days	30-90 Days	Greater than 90 Days	Total
	(Dollars in thousands)				
Sources of Collateral					
U.S. government agency securities	$10,157	$ —	$ —	$ —	$10,157
Agency mortgage-backed securities	69,142	—	—	—	69,142
Agency collateralized mortgage obligations	54,659	—	—	—	54,659
Total borrowings	$133,958	$ —	$ —	$ —	$133,958

Certain counterparties monitor collateral, and may request additional collateral to be posted from time to time. For further information regarding the Company's repurchase agreements see Note 9 - Balance Sheet Offsetting.

NOTE 8 - DERIVATIVE AND HEDGING ACTIVITIES

The Company’s derivative financial instruments are used to manage differences in the amount, timing, and duration of the Company’s known or expected cash receipts and its known or expected cash payments principally to manage the Company’s interest rate risk. Additionally, the Company enters into interest rate derivatives and foreign exchange contracts to accommodate the business requirements of its customers (“customer related positions”). The Company minimizes the market and liquidity risks of customer related positions by entering into similar offsetting positions with broker-dealers. Derivative instruments are carried at fair value in the Company’s financial statements. The accounting for changes in the fair value of a derivative instrument is dependent upon whether or not it qualifies as a hedge for accounting purposes, and further, by the type of hedging relationship.

The Company does not enter into proprietary trading positions for any derivatives.

Interest Rate Positions

The Company currently utilizes interest rate swap agreements as hedging instruments against interest rate risk associated with the Company’s borrowings. An interest rate swap is an agreement whereby one party agrees to pay a floating rate of interest on a notional principal amount in exchange for receiving a fixed rate of interest on the same notional amount, for a predetermined period of time, from a second party. The amounts relating to the notional principal amount are not actually exchanged. The maximum length of time over which the Company is currently hedging its exposure to the variability in future cash flows for forecasted transactions related to the payment of variable interest on existing financial instruments is five years.

Table of Contents

The following table reflects the Company’s derivative positions for the periods indicated below for interest rate swaps which qualify as cash flow hedges for accounting purposes:

June 30, 2016

Notional Amount	Trade Date	Effective Date	Maturity Date		Receive (Variable) Index	Current Rate Received		Pay Fixed Swap Rate		Fair Value	
(Dollars in thousands)											
$25,000	16-Feb-06	28-Dec-06	28-Dec-16		3 Month LIBOR	0.65	%	5.04	%	$ (547	)
25,000	16-Feb-06	28-Dec-06	28-Dec-16		3 Month LIBOR	0.65	%	5.04	%	(547	)
25,000	9-Dec-08	10-Dec-08	10-Dec-18		3 Month LIBOR	0.66	%	2.94	%	(1,345	)
25,000	1-Apr-16	17-Jan-17	15-Dec-21	(1)	3 Month LIBOR	TBD		1.36	%	(375	)
25,000	1-Apr-16	17-Jan-17	15-Dec-21	(1)	3 Month LIBOR	TBD		1.36	%	(374	)
$125,000										$ (3,188	)

December 31, 2015

Notional Amount	Trade Date	Effective Date	Maturity Date	Receive (Variable) Index	Current Rate Received		Pay Fixed Swap Rate		Fair Value	
			(Dollars in thousands)							
$25,000	16-Feb-06	28-Dec-06	28-Dec-16	3 Month LIBOR	0.51	%	5.04	%	$ (1,054	)
25,000	16-Feb-06	28-Dec-06	28-Dec-16	3 Month LIBOR	0.51	%	5.04	%	(1,055	)
25,000	9-Dec-08	10-Dec-08	10-Dec-18	3 Month LIBOR	0.49	%	2.94	%	(1,164	)
$75,000									$ (3,273	)

(1) In April 2016, the Company entered into two forward starting swaps with notional amounts of $25.0 million each, with the intention of hedging $50.0 million of existing junior subordinated debentures, as the current hedges on this borrowing expire in December 2016.

For derivative instruments that are designated and qualify as cash flow hedging instruments, the effective portion of the gains or losses is reported as a component of other comprehensive income ("OCI"), and is subsequently reclassified into earnings in the period that the hedged forecasted transaction affects earnings. The Company expects approximately $1.6 million (pre-tax) to be reclassified to interest expense from OCI related to the Company’s cash flow hedges in the next twelve months. This reclassification is due to anticipated payments that will be made and/or received on the swaps based upon the forward curve as of June 30, 2016.

The Company recognized $61,000 and $122,000 of net amortization income that was an offset to interest expense related to previously terminated swaps for the three and six month periods ended June 30, 2016 and 2015, respectively.

The Company had no fair value hedges as of June 30, 2016 or December 31, 2015.

Customer Related Positions

Loan level derivatives, primarily interest rate swaps, offered to commercial borrowers through the Company’s loan level derivative program do not qualify as hedges for accounting purposes. The Company believes that its exposure to commercial customer derivatives is limited because these contracts are simultaneously matched at inception with an offsetting dealer transaction. The commercial customer derivative program allows the Company to retain variable-rate commercial loans while allowing the customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap.

Foreign exchange contracts offered to commercial borrowers through the Company’s derivative program do not qualify as hedges for accounting purposes. The Company acts as a seller and buyer of foreign exchange contracts to accommodate its customers. To mitigate the market and liquidity risk associated with these derivatives, the Company enters into similar offsetting positions.

Table of Contents

The following table reflects the Company's customer related derivative positions for the periods indicated below for those derivatives not designated as hedging:

	Number of Positions (1)	Notional Amount Maturing Less than 1 year	Less than 2 years	Less than 3 years	Less than 4 years	Thereafter	Total	Fair Value
	June 30, 2016							
	(Dollars in thousands)							
Loan level swaps								
Receive fixed, pay variable	194	$25,764	$36,089	$61,431	$77,242	$555,329	$755,855	$46,820
Pay fixed, receive variable	179	$25,764	$36,089	$61,431	$77,242	$555,329	$755,855	$(46,723)
Foreign exchange contracts								
Buys foreign currency, sells U.S. currency	32	$54,095	$—	$—	$—	$—	$54,095	$87
Buys U.S. currency, sells foreign currency	32	$54,095	$—	$—	$—	$—	$54,095	$(72)
	December 31, 2015							
	(Dollars in thousands)							
Loan level swaps								
Receive fixed, pay variable	171	$37,732	$34,424	$29,629	$77,041	$488,110	$666,936	$22,467
Pay fixed, receive variable	165	$37,732	$34,424	$29,629	$77,041	$488,110	$666,936	$(22,462)
Foreign exchange contracts								
Buys foreign currency, sells U.S. currency	21	$38,416	$—	$—	$—	$—	$38,416	$(354)
Buys U.S. currency, sells foreign currency	21	$38,416	$—	$—	$—	$—	$38,416	$382

(1) The Company may enter into one dealer swap agreement which offsets multiple commercial borrower swap agreements.

Mortgage Derivatives

Prior to closing and funding certain 1- 4 family residential mortgage loans, an interest rate lock commitment is generally extended to the borrower. During the period from commitment date to closing date, the Company is subject to the risk that market rates of interest may change. If market rates rise, investors generally will pay less to purchase such loans resulting in a reduction in the gain on sale of the loans or, possibly, a loss. In an effort to mitigate such risk, forward delivery sales commitments are executed, under which the Company agrees to deliver whole mortgage loans to various investors. These forward commitments carry a market price that has a strong inverse relationship to that of mortgage prices. Certain assumptions, including pull through rates and rate lock periods, are used in managing the existing and future hedges. The effectiveness of the economic hedges rely on the accuracy of these assumptions.

The change in fair value on the interest rate lock commitments and forward delivery sale commitments are recorded in current period earnings as a component of mortgage banking income. In addition, the Company has elected the fair value option to carry loans held for sale at fair value. The change in fair value of loans held for sale is recorded in current period earnings as a component of mortgage banking income in accordance with the Company's fair value election. The change in fair value associated with loans held for sale was a decrease of $41,000 and an increase of $157,000 for the three month periods ended June 30, 2016 and 2015, respectively, and an increase of $13,000 and $184,000 for the six month periods ended June 30, 2016 and 2015, respectively. These amounts were offset in earnings by the change in the fair value of mortgage derivatives. The table below presents the fair value of the Company's derivative financial instruments as well as their classification on the balance sheet at the periods indicated:

Table of Contents

	Asset Derivatives			Liability Derivatives		
	Balance Sheet Location	Fair Value at June 30 2016	Fair Value at December 31 2015	Balance Sheet Location	Fair Value at June 30 2016	Fair Value at December 31 2015

Mortgage banking income	190	(299)	$304	$(107)
Total	$213	$(336)	$383	$(141)

By using derivatives, the Company is exposed to credit risk to the extent that counterparties to the derivative contracts do not perform as required. Should a counterparty fail to perform under the terms of a derivative contract, the Company's credit exposure on interest rate swaps is limited to the net positive fair value and accrued interest of all swaps with each counterparty. The Company seeks to minimize counterparty credit risk through credit approvals, limits, monitoring procedures, and obtaining collateral, where appropriate. Institutional counterparties must have an investment grade credit rating and be approved by the Company's Board of Directors. As such, management believes the risk of incurring credit losses on derivative contracts with those counterparties is remote and losses, if any, would be immaterial. The Company had no exposure at June 30, 2016 and $272,000 in exposure relating to institutional counterparties at December 31, 2015. The Company’s exposure relating to customer

Table of Contents

counterparties was approximately $47.5 million and $23.2 million at June 30, 2016 and December 31, 2015, respectively. Credit exposure may be reduced by the amount of collateral pledged by the counterparty.

NOTE 9 - BALANCE SHEET OFFSETTING

The Company does not offset fair value amounts recognized for derivative instruments or repurchase agreements. The Company does net the amount recognized for the right to reclaim cash collateral against the obligation to return cash collateral arising from derivative instruments executed with the same counterparty under a master netting arrangement. Collateral legally required to be maintained at dealer banks by the Company is monitored and adjusted as necessary. At June 30, 2016, it was determined that no additional collateral would have to be posted to immediately settle these instruments.

The following tables present the Company's asset and liability derivative positions and the potential effect of netting arrangements on its financial position, as of the periods indicated:

	Gross Amounts Recognized in the Statement of Financial Position	Gross Amounts Offset in the Statement of Financial Position	Net Amounts Presented in the Statement of Financial Position	Gross Amounts Not Offset in the Statement of Financial Position

(1) Reflects offsetting derivative positions with the same counterparty.

The Company has agreements with certain of its derivative counterparties that contain a provision where if the Company fails to maintain its status as a well capitalized institution, then the Company could be required to terminate any outstanding derivatives with the counterparty. All liability position interest rate swap and customer loan level swap counterparties have credit-risk contingent features as of the dates indicated in the table above. In addition, derivative instruments that contain credit-risk related contingent features that are in a net liability position require the Company to assign collateral as noted in the table above.

NOTE 10 - FAIR VALUE MEASUREMENTS

Fair value is a market-based measure considered from the perspective of a market participant rather than an entity-specific measure. Therefore, even when market assumptions are not readily available, the Company's own assumptions are set to reflect those that market participants would use in pricing the asset or liability at the measurement date. If there has been a significant decrease in the volume and level of activity for the asset or liability, regardless of the valuation technique(s) used, the objective of a fair value measurement remains the same. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. The Company uses prices and inputs that are current as of the measurement date. In periods of market dislocation, the observability of prices and inputs may be reduced for many instruments. This condition could cause an instrument to be reclassified from one level to another.

The Fair Value Measurements and Disclosures Topic of the FASB ASC defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy under the Fair Value Measurements and Disclosures Topic of the FASB ASC are described below:

Level 1 – Inputs are quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2 – Valuations based on quoted prices in markets that are not active or for which all significant inputs are observable, either directly or indirectly.

Level 3 – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable.

Table of Contents

To the extent that valuation is based on models or inputs that are less observable or unobservable in the market, the determination of fair value requires more judgment. Accordingly, the degree of judgment exercised by the Company in determining fair value is greatest for instruments categorized in Level 3. A financial instrument's level within the fair value hierarchy is based on the lowest level of any input that is significant to the fair value measurement.

Valuation Techniques

There have been no changes in the valuation techniques used during the current period.

Securities:

Trading Securities

These equity securities are valued based on market quoted prices. These securities are categorized in Level 1 as they are actively traded and no valuation adjustments have been applied.

U.S. Government Agency Securities

Fair value is estimated using either multi-dimensional spread tables or benchmarks. The inputs used include benchmark yields, reported trades, and broker/dealer quotes. These securities are classified as Level 2.

Agency Mortgage-Backed Securities

Fair value is estimated using either a matrix or benchmarks. The inputs used include benchmark yields, reported trades, broker/dealer quotes, and issuer spreads. These securities are categorized as Level 2.

Agency Collateralized Mortgage Obligations and Small Business Administration Pooled Securities

The valuation model for these securities is volatility-driven and ratings based, and uses multi-dimensional spread tables. The inputs used include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are categorized as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

State, County, and Municipal Securities

The fair value is estimated using a valuation matrix with inputs including bond interest rate tables, recent transaction, and yield relationships. These securities are categorized as Level 2.

Single and Pooled Issuer Trust Preferred Securities

The fair value of trust preferred securities, including pooled and single issuer preferred securities, is estimated using external pricing models, discounted cash flow methodologies or similar techniques. The inputs used in these valuations include benchmark yields, reported trades, new issue data, broker dealer quotes, and collateral performance. If there is at least one significant model assumption or input that is not observable, these securities are classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

Equity Securities

These equity securities are valued based on market quoted prices. These securities are classified as Level 1 as they are actively traded and no valuation adjustments have been applied.

Loans Held for Sale

The Company has elected the fair value option to account for originated closed loans intended for sale. The fair value is measured on an individual loan basis using quoted market prices and when not available, comparable market value or discounted cash flow analysis may be utilized. These assets are typically classified as Level 2.

Derivative Instruments

Derivatives

The valuation of these instruments is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs, including interest rate curves and implied volatilities. The Company incorporates credit valuation adjustments to appropriately reflect nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings. Additionally, in conjunction with fair value measurement guidance, the Company has made an accounting policy election to measure the credit risk of its derivative financial

Table of Contents

instruments that are subject to master netting agreements on a net basis by counterparty portfolio. Although the Company has determined that the majority of the inputs used to value its interest rate derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. However, as of June 30, 2016 and December 31, 2015, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified as Level 2.

Mortgage Derivatives

The fair value of mortgage derivatives is determined based on current market prices for similar assets in the secondary market and, therefore, classified as Level 2 within the fair value hierarchy.

Impaired Loans

Collateral dependent loans that are deemed to be impaired are valued based upon the lower of cost or fair value of the underlying collateral less costs to sell. The inputs used in the appraisals of the collateral are not always observable, and therefore the loans may be classified as Level 3 within the fair value hierarchy; otherwise, they are classified as Level 2.

Other Real Estate Owned and Other Foreclosed Assets

The fair values are generally estimated based upon recent appraisal values of the property less costs to sell the property, as Other Real Estate Owned ("OREO") and Other Foreclosed Assets are valued at the lower of cost or fair value of the property, less estimated costs to sell. Certain inputs used in appraisals are not always observable, and therefore OREO and Other Foreclosed Assets may be classified as Level 3 within the fair value hierarchy.

Goodwill and Other Intangible Assets

Goodwill and other intangible assets are subject to impairment testing. The Company conducts an annual impairment test of goodwill in the third quarter of each year, or more frequently if necessary, and other intangible assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. To estimate the fair value of goodwill and, if necessary, other intangible assets, the Company utilizes both a comparable analysis of relevant price multiples in recent market transactions and discounted cash flow analysis. Both valuation models require a significant degree of management judgment. In the event the fair value as determined by the valuation model is less than the carrying value, the intangibles may be impaired. If the impairment testing resulted in impairment, the Company would classify the impaired goodwill and other intangible assets subjected to nonrecurring fair value adjustments as Level 3.

Table of Contents

Assets and liabilities measured at fair value at the periods indicated were as follows:

	Balance	Fair Value Measurements at Reporting Date Using Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
	June 30, 2016 (Dollars in thousands)

The table below presents a reconciliation for all assets and liabilities measured at fair value on a recurring basis using significant unobservable inputs (Level 3), which were valued using pricing models and discounted cash flow methodologies, as of the dates indicated:

	Securities Available for Sale:	
	Three Months Ended June 30, 2016	Three Months Ended June 30, 2015
	(Dollars in thousands)	

Pooled Trust Preferred Securities		
Beginning balance	$1,500	$6,272
Gains and (losses) (realized/unrealized)		
Included in other comprehensive income	13	12
Sales	—	(4,679)
Settlements	(7)	(10)
Ending balance	$1,506	$1,595

Table of Contents

	Securities Available for Sale:	
	Six Months Ended June 30, 2016	Six Months Ended June 30, 2015
	(Dollars in thousands)	
Pooled Trust Preferred Securities		
Beginning balance	$1,572	$6,321
Gains and (losses) (realized/unrealized)		
Included in other comprehensive income	(58)	8
Sales	—	(4,679)
Settlements	(8)	(55)
Ending balance	1,506	1,595

It is the Company's policy to recognize the transfers between levels of the fair value hierarchy as of the end of the reporting period. There were no transfers between the levels of the fair value hierarchy for any assets or liabilities measured at fair value on a recurring basis during the six month periods ended June 30, 2016 or 2015.

The following table sets forth certain unobservable inputs regarding the Company's investment in securities that are classified as Level 3 for the periods indicated:

Valuation Technique	June 30 2016	December 31 2015	Unobservable Inputs	June 30 2016	December 31 2015	June 30 2016	December 31 2015
	Fair Value			Range		Weighted Average	
	(Dollars in thousands)						
Discounted cash flow methodology							
Pooled trust preferred securities	$1,506	$ 1,572	Cumulative prepayment	0% - 63%	0% - 64%	2.6%	2.7%
			Cumulative default	5% - 100%	5% - 100%	14.2%	15.1%
			Loss given default	85% - 100%	85% - 100%	93.9%	94.2%
			Cure given default	0% - 75%	0% - 75%	65.2%	62.3%
Appraisals of collateral (1)							
Impaired loans	$5,206	$ 4,598					
Other real estate owned and foreclosed assets	$1,845	$ 2,159					

(1) Fair value is generally determined through independent appraisals of the underlying collateral, which generally include various Level 3 inputs which are not identifiable. Appraisals may be adjusted by management for qualitative factors such as economic factors and estimated liquidation expenses. The range of these possible adjustments may vary.

For the fair value measurements in the table above, which are classified as Level 3 within the fair value hierarchy, the Company's Treasury and Finance groups determine the valuation policies and procedures. For the pricing of the securities, the Company uses third-party pricing information, without adjustment. Depending on the type of the security, management employs various techniques to analyze the pricing it receives from third parties, such as analyzing changes in market yields and in certain instances reviewing the underlying collateral of the security. Management reviews changes in fair value from period to period and performs testing to ensure that prices received from the third parties are consistent with their expectation of the market. For the securities whose market is deemed to be inactive and which are categorized as Level 3, the fair value models are calibrated and significant inputs are back tested on a quarterly basis, to the extent possible. This testing is done by the third party service provider, who performs this testing by comparing anticipated inputs to actual results. Significant changes in fair value from period to period are closely scrutinized to ensure fair value models are not flawed. The driver(s) of the respective change in fair value and the method for forecasting the driver(s) is closely considered by management.

Table of Contents

The significant unobservable inputs used in the fair value measurement of the Company’s pooled trust preferred securities are cumulative prepayment rates, cumulative default rates, loss given default rates and cure given default rates. Significant increases (decreases) in deferrals or defaults, in isolation, would result in a significantly lower (higher) fair value measurement. Alternatively, significant increases (decreases) in cure rates, in isolation, would result in a significantly higher (lower) fair value measurement.

Additionally, the Company has certain assets which are marked to fair value on a nonrecurring basis which are categorized within Level 3. These assets include collateral dependent impaired loans and OREO. The determination of the fair value amount is derived from the use of independent third party appraisals and evaluations, prepared by firms from a predetermined list of qualified and approved appraisers or evaluators. Upon receipt of an appraisal or evaluation, the Company's Commercial Real Estate Appraisal Department will review the report for compliance with regulatory and Company standards, as well as reasonableness and acceptance of the value conclusions. Any issues or concerns regarding compliance or value conclusions will be addressed with the engaged firm and the report may be adjusted or revised. If a disagreement cannot be resolved, the Commercial Real Estate Appraisal Department will either address the key issues and modify the report for acceptance or reject the report and re-order a new report. Ultimately, the Company’s Commercial Real Estate Appraisal Department will confirm the collateral value as part of its review process.

The estimated fair values and related carrying amounts for assets and liabilities for which fair value is only disclosed are shown below as of the periods indicated:

			Fair Value Measurements at Reporting Date Using		
	Carrying Value	Fair Value	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
