MERITAGE HOMES CORPORATION AND SUBSIDIARIES
NOTES TO UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 — ORGANIZATION AND BASIS OF PRESENTATION

Organization. Meritage Homes is a leading designer and builder of single-family homes. We primarily build in historically high-growth regions of the United States and offer a variety of homes that are designed to appeal to a wide range of homebuyers, including first-time, move-up, active adult and luxury. We have homebuilding operations in three regions: West, Central and East, which are comprised of nine states: Arizona, California, Colorado, Texas, Florida, Georgia, North Carolina, South Carolina and Tennessee. We also operate a wholly-owned title company, Carefree Title Agency, Inc. ("Carefree Title"). Carefree Title's core business includes title insurance and closing/settlement services we offer to our homebuyers. Through our predecessors, we commenced our homebuilding operations in 1985. Meritage Homes Corporation was incorporated in 1988 in the state of Maryland.

Our homebuilding and marketing activities are conducted under the name of Meritage Homes in each of our homebuilding markets, other than Tennessee, where we currently operate under the name of Phillips Builders. We also offer luxury homes in some markets under the brand name of Monterey Homes. At June 30, 2016, we were actively selling homes in 241 communities, with base prices ranging from approximately \$160,000 to \$1,440,000.

Basis of Presentation. The accompanying unaudited consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States ("GAAP") for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. These financial statements should be read in conjunction with the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2015. The consolidated financial statements include the accounts of Meritage Homes Corporation and those of our consolidated subsidiaries, partnerships and other entities in which we have a controlling financial interest, and of variable interest entities (see Note 3) in which we are deemed the primary beneficiary (collectively, "us", "we", "our" and "the Company"). Intercompany balances and transactions have been eliminated in consolidation. In the opinion of management, the accompanying unaudited financial statements include all adjustments (consisting only of normal recurring entries), necessary for the fair presentation of our results for the interim periods presented. Results for interim periods are not necessarily indicative of results to be expected for the full year.

Cash and Cash Equivalents. Liquid investments with an initial maturity of three months or less are classified as cash equivalents. Amounts in transit from title companies or closing agents for home closings of approximately \$70.3 million and \$74.5 million are included in cash and cash equivalents at June 30, 2016 and December 31, 2015, respectively. Included in our balance as of June 30, 2016 and December 31, 2015 is \$0.1 million and \$20.0 million, respectively, of money market funds that are invested in short term (three months or less) government securities.

Real Estate. Real estate is stated at cost unless the asset is determined to be impaired, at which point the inventory is written down to fair value as required by Accounting Standards Codification ("ASC") 360-10, Property, Plant and Equipment ("ASC 360-10"). Inventory includes the costs of land acquisition, land development, home construction, capitalized interest, real estate taxes, capitalized direct overhead costs incurred during development and home construction that benefit the entire community, less impairments, if any. Land and development costs are typically allocated and transferred to homes under construction when construction begins. Home construction costs are accumulated on a per-home basis, while selling costs are expensed as incurred. Cost of home closings includes the specific construction costs of the home and all related allocated land acquisition, land development and other common costs (both incurred and estimated to be incurred) that are allocated based upon the total number of homes expected to be closed in each community or phase. Any changes to the estimated total development costs of a community or phase are allocated to the remaining homes in the community or phase. When a home closes, we may have incurred costs for goods and services that have not yet been paid. An accrued liability to capture such obligations is recorded in connection with the home closing and charged directly to cost of sales.

We rely on certain estimates to determine our construction and land development costs. Construction and land costs are comprised of direct and allocated costs, including estimated future costs. In determining these costs, we compile project budgets that are based on a variety of assumptions, including future construction schedules and costs to be incurred. It is possible that actual results could differ from budgeted amounts for various reasons, including construction delays, labor or material shortages, increases in costs that have not yet been committed, changes in governmental requirements, or other unanticipated issues encountered during construction and development and other factors beyond our control. To address

uncertainty in these budgets, we assess, update and revise project budgets on a regular basis, utilizing the most current information available to estimate construction and land costs.

Typically, a community's life cycle ranges from three to five years, commencing with the acquisition of the land, continuing through the land development phase, if applicable, and concluding with the sale, construction and closing of the homes. Actual community lives will vary based on the size of the community, the sales absorption rate and whether the land purchased was raw, partially-developed or in finished status. Master-planned communities encompassing several phases and super-block land parcels may have significantly longer lives and projects involving smaller finished lot purchases may be shorter.

All of our land inventory and related real estate assets are reviewed for recoverability, as our inventory is considered "long-lived" in accordance with GAAP. Impairment charges are recorded to write down an asset to its estimated fair value if the undiscounted cash flows expected to be generated by the asset are lower than its carrying amount. Our determination of fair value is based on projections and estimates. Changes in these expectations may lead to a change in the outcome of our impairment analysis, and actual results may also differ from our assumptions. Such an analysis is conducted if there is an indication of a decline in value of our land and real estate assets. For those assets deemed to be impaired, the impairment recognized is measured as the amount by which the assets' carrying amount exceeds their fair value. The impairment of a community is allocated to each lot on a straight-line basis.

Deposits. Deposits paid related to land options and purchase contracts are recorded and classified as Deposits on real estate under option or contract until the related land is purchased. Deposits are reclassified as a component of real estate inventory at the time the deposit is used to offset the acquisition price of the lots based on the terms of the underlying agreements. To the extent they are non-refundable, deposits are charged to expense if the land acquisition is terminated or no longer considered probable. Since our acquisition contracts typically do not require specific performance, we do not consider such contracts to be contractual obligations to purchase the land and our total exposure under such contracts is limited to the loss of the non-refundable deposits and any ancillary capitalized costs. Our deposits were \$91.4 million and \$87.8 million as of June 30, 2016 and December 31, 2015, respectively.

Goodwill. In accordance with ASC 350, Intangibles, Goodwill and Other ("ASC 350"), we analyze goodwill on at least an annual basis to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount, including goodwill. ASC 350 states that an entity may first assess qualitative factors to determine whether it is necessary to perform a two-step goodwill impairment test. Such qualitative factors include: (1) macroeconomic conditions, such as a deterioration in general economic conditions, (2) industry and market considerations such as deterioration in the environment in which the entity operates, (3) cost factors such as increases in raw materials and labor costs, and (4) overall financial performance such as negative or declining cash flows or a decline in actual or planned revenue or earnings. If the qualitative analysis determines that additional impairment testing is required, the two-step impairment testing in accordance with ASC 350 would be initiated. We continually evaluate our qualitative inputs to assess whether events and circumstances have occurred that indicate the goodwill balance may not be recoverable. Under the guidelines contained in ASC 350, we evaluate goodwill for impairments annually or more frequently if deterioration in our inputs exists. See Note 9 for additional information related to goodwill.

Off-Balance Sheet Arrangements - Joint Ventures. In the past, we have participated in land development joint ventures as a means of accessing larger parcels of land and lot positions, expanding our market opportunities, managing our risk profile and leveraging our capital base; however, in recent years, such ventures have not been a significant vehicle for us to access lots. See Note 4 for additional discussion of our investments in unconsolidated entities.

Off-Balance Sheet Arrangements - Other. In the normal course of business, we may acquire lots from various development entities pursuant to option and purchase agreements. The purchase price generally approximates the

market price at the date the contract is executed (with possible future escalators). See Note 3 for additional information on off-balance sheet arrangements.

Surety Bonds and Letters of Credit. We provide letters of credit in support of our obligations relating to the development of our projects and other corporate purposes. Surety bonds are generally posted in lieu of letters of credit or cash deposits. The amount of these obligations outstanding at any time varies depending on the stage and level of completion of our development activities. Bonds are generally not released until all development activities under the bond are complete. In the event a bond or letter of credit is drawn upon, we would be obligated to reimburse the issuer for any amounts advanced under the bond. We believe it is unlikely that any significant amounts of these bonds or letters of credit will be drawn upon.

The table below outlines our surety bond and letter of credit obligations (in thousands):

	As of June 30, 2016		December 31, 2015	
	Outstanding	Estimated work remaining to complete	Outstanding	Estimated work remaining to complete
Sureties:				
Sureties related to joint ventures	\$ —	\$ —	\$87	\$ 87
Sureties related to owned projects and lots under contract	242,212	72,120	250,639	103,200
Total Sureties	\$242,212	\$ 72,120	\$250,726	\$ 103,287
Letters of Credit (“LOCs”):				
LOCs in lieu of deposits for contracted lots	\$500	N/A	\$—	N/A
LOCs for land development	27,847	N/A	23,934	N/A
LOCs for general corporate operations	3,750	N/A	3,750	N/A
Total LOCs	\$32,097	N/A	\$27,684	N/A

Accrued Liabilities. Accrued liabilities at June 30, 2016 and December 31, 2015 consisted of the following (in thousands):

	As of	
	June 30, 2016	December 31, 2015
Accruals related to real estate development and construction activities	\$55,562	\$37,509
Payroll and other benefits	33,272	41,240
Accrued taxes	11,493	9,950
Warranty reserves	22,699	21,615
Legal reserves (1)	1,659	18,812
Other accruals	29,958	32,037
Total	\$154,643	\$161,163

(1) See Note 15 for additional information related to our legal reserves.

Warranty Reserves. We provide home purchasers with limited warranties against certain building defects and we have certain obligations related to those post-construction warranties for closed homes. The specific terms and conditions of these limited warranties vary by state, but overall the nature of the warranties include a complete workmanship and materials warranty typically during the first one to two years after the close of the home and a structural warranty that typically extends up to 10 years subsequent to the close of the home. With the assistance of an actuary, we have estimated these reserves for the structural warranty based on the number of homes still under warranty and historical data and trends for our communities. We also use industry data with respect to similar product types and geographic areas in markets where our experience is incomplete to draw a meaningful conclusion. We regularly review our warranty reserves and adjust them, as necessary, to reflect changes in trends as information becomes available. Based on such reviews of warranty costs incurred, we decreased our warranty reserve balance by \$275,000 in the three and six months ended June 30, 2016, which decreased our cost of sales. In the three and six months ended June 30, 2015 we increased our warranty reserve balance by \$750,000, which increased our cost of sales. A summary of changes in our warranty reserves follows (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Balance, beginning of period	\$22,308	\$21,839	\$21,615	\$22,080
Additions to reserve from new home deliveries	4,423	2,996	7,958	5,624

Edgar Filing: Meritage Homes CORP - Form 10-Q

Warranty claims	(3,757)	(3,592)	(6,599)	(6,461)
Adjustments to pre-existing reserves	(275)	750	(275)	750
Balance, end of period	\$22,699	\$21,993	\$22,699	\$21,993

Warranty reserves are included in Accrued liabilities on the accompanying unaudited consolidated balance sheets, and additions and adjustments to the reserves, if any, are included in Cost of home closings within the accompanying unaudited

consolidated income statements. These reserves are intended to cover costs associated with our contractual and statutory warranty obligations, which include, among other items, claims involving defective workmanship and materials. We believe that our total reserves, coupled with our contractual relationships and rights with our trades and the general liability insurance we maintain, are sufficient to cover our general warranty obligations. However, as unanticipated changes in legal, weather, environmental or other conditions could have an impact on our actual warranty costs, future costs could differ significantly from our estimates.

Recent Accounting Pronouncements. In March 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting ("ASU 2016-09"). ASU 2016-09 simplifies several aspects of the accounting for share-based payment transactions, including the income tax consequences, classification of awards as either equity or liabilities, and classification on the statement of cash flows. ASU 2016-09 is effective for us beginning January 1, 2017. Early adoption is permitted. We are currently evaluating the potential impact of adopting this guidance but do not expect it to have a material impact on our consolidated financial statements. In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842) ("ASU 2016-02"), which amends the existing accounting standards for lease accounting, including requiring lessees to recognize most leases on their balance sheets. ASU 2016-02 will be effective for us beginning January 1, 2019, and early adoption is permitted. ASU 2016-02 requires a modified retrospective transition approach for all leases existing at, or entered into after, the date of initial application, with an option to use certain transition relief. We are currently evaluating the impact adopting this guidance will have on our financial statements.

In April 2015, the FASB issued ASU 2015-03, Interest — Imputation of Interest (Subtopic 835-30): Simplifying the Presentation of Debt Issuance Costs ("ASU 2015-03"). ASU 2015-03 requires that debt issuance costs related to a recognized debt liability, other than those related to a revolving debt arrangement, be presented on the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. In August 2015, the FASB issued ASU 2015-15, Presentation and Subsequent Measurement of Debt Issuance Costs Associated with Line-of-Credit Arrangements - Amendments to SEC Paragraphs Pursuant to Staff Announcement at June 18, 2015 EITF Meeting ("ASU 2015-15"), which clarifies the treatment of debt issuance costs from line-of-credit arrangements after the adoption of ASU 2015-03. In particular, ASU 2015-15 clarifies that the SEC staff would not object to an entity deferring and presenting debt issuance costs related to a line-of-credit arrangement as an asset and subsequently amortizing the deferred debt issuance costs ratably over the term of the line-of-credit arrangement, regardless of whether there are any outstanding borrowings on the line-of-credit arrangement. ASU 2015-03 represents a change in accounting principle and was effective on January 1, 2016 and was applied on a retrospective basis. The adoption of ASU 2015-03 resulted in a retrospective reclassification of our debt costs as described above from Prepaids, other assets and goodwill to Senior and convertible senior notes, net on our December 31, 2015 balance sheet in the amount of \$10.7 million. As allowed by ASU 2015-15, we elected not to reclassify deferred debt issuance costs associated with our Credit Facility and continue to present these capitalized costs as an asset.

In February 2015, the FASB issued ASU 2015-02, Consolidation: Amendments to the Consolidation Analysis ("ASU 2015-02"). ASU 2015-02 changes the analysis that a reporting entity must perform to determine whether it should consolidate certain types of legal entities. ASU 2015-02 was effective for us beginning January 1, 2016 and had no effect on our consolidated financial statements.

In January 2015, the FASB issued ASU 2015-01, Income Statement - Extraordinary and Unusual Items ("ASU 2015-01"). ASU 2015-01 eliminates the concept of extraordinary items from GAAP but retains the presentation and disclosure guidance for items that are unusual in nature or occur infrequently and expands the guidance to include items that are both unusual and infrequently occurring. ASU 2015-01 was effective for us on January 1, 2016 and had no effect on our consolidated financial statements.

In May 2014, the FASB issued ASU 2014-09, Revenue from Contracts with Customers (Topic 606), ("ASU 2014-09"). ASU 2014-09 requires entities to recognize revenue that depicts the transfer of promised goods or services to

customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services by applying the following steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract; and (5) recognize revenue when (or as) the entity satisfies a performance obligation. ASU 2014-09 supersedes the revenue recognition requirements in ASU 605, Revenue Recognition, most industry-specific guidance throughout the industry topics of the ASC, and some cost guidance related to construction-type and production-type contracts. Subsequent to the issuance of ASU 2014-09, the FASB issued several amendments in 2016 to the original standard including ASU 2016-08, Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net), ASU

2016-10, Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing and ASU 2016-12, Revenue from Contracts with Customers (Topic 606): Narrow Scope Improvements and Practical Expedients. These amendments do not change the core principle of the guidance stated in ASU 2014-09. Rather, they are intended to clarify and improve understanding of certain topics included within the revenue standard. ASU 2014-09 and the related amendments are effective for us on January 1, 2018. Early adoption is permitted only as of annual reporting periods beginning after December 15, 2016. We are currently evaluating the potential impact of adopting this guidance on our consolidated financial statements.

NOTE 2 — REAL ESTATE AND CAPITALIZED INTEREST

Real estate consists of the following (in thousands):

	As of June 30, 2016	December 31, 2015
Homes under contract under construction ⁽¹⁾	\$607,390	\$456,138
Unsold homes, completed and under construction ⁽¹⁾	274,824	307,425
Model homes ⁽¹⁾	146,707	138,546
Finished home sites and home sites under development ⁽²⁾	1,272,384	1,196,193
Total	\$2,301,305	\$2,098,302

(1) Includes the allocated land and land development costs associated with each lot for these homes.

Includes raw land, land held for development and land held for sale. Land held for development primarily reflects land and land development costs related to land where development activity is not currently underway but is expected to begin in the future. For these parcels, we may have chosen not to currently develop certain land holdings as they typically represent a portion or phases of a larger land parcel that we plan to build out over several years. We do not capitalize interest for inactive assets, and all ongoing costs of land ownership (i.e. property taxes, homeowner association dues, etc.) are expensed as incurred.

Subject to sufficient qualifying assets, we capitalize our development period interest costs incurred in connection with our real estate development and construction activities. Capitalized interest is allocated to active real estate when incurred and charged to cost of closings when the related property is delivered. A summary of our capitalized interest is as follows (in thousands):

	Three Months Ended June 30, 2016		Six Months Ended June 30, 2016	
Capitalized interest, beginning of period	\$64,126	\$56,843	\$61,202	\$54,060
Interest incurred	17,713	16,526	35,272	31,808
Interest expensed	(1,672)	(4,621)	(4,960)	(7,775)
Interest amortized to cost of home and land closings	(15,485)	(9,878)	(26,832)	(19,223)
Capitalized interest, end of period ⁽¹⁾	\$64,682	\$58,870	\$64,682	\$58,870

Approximately \$410,000 and \$445,000 of the capitalized interest is related to our joint venture investments and is a (1) component of Investments in unconsolidated entities on our consolidated balance sheet as of June 30, 2016 and December 31, 2015, respectively.

NOTE 3 — VARIABLE INTEREST ENTITIES AND CONSOLIDATED REAL ESTATE NOT OWNED

We enter into purchase and option agreements for land or lots as part of the normal course of business. These purchase and option agreements enable us to acquire properties at one or multiple future dates at pre-determined prices. We believe these acquisition structures reduce our financial risk associated with land acquisitions and allow us to better leverage our balance sheet.

Based on the provisions of the relevant accounting guidance, we have concluded that when we enter into a purchase or option agreement to acquire land or lots from an entity, a variable interest entity, or “VIE”, may be created. We evaluate

all purchase and option agreements for land to determine whether they are a VIE. ASC 810, Consolidation, requires that for each

10

VIE, we assess whether we are the primary beneficiary and, if so, consolidate the VIE in our financial statements and reflect such assets and liabilities as Real estate not owned. The liabilities related to consolidated VIEs are generally excluded from our debt covenant calculations.

In order to determine if we are the primary beneficiary, we must first assess whether we have the ability to control the activities of the VIE that most significantly impact its economic performance. Such activities include, but are not limited to: the ability to determine the budget and scope of land development work, if any; the ability to control financing decisions for the VIE; the ability to acquire additional land into the VIE or dispose of land in the VIE not under contract with Meritage; and the ability to change or amend the existing option contract with the VIE. If we are not determined to control such activities, we are not considered the primary beneficiary of the VIE. If we do have the ability to control such activities, we will continue our analysis by determining if we are also expected to absorb a potentially significant amount of the VIE's losses or, if no party absorbs the majority of such losses, if we will benefit from a potentially significant amount of the VIE's expected gains.

In substantially all cases, creditors of the entities with which we have option agreements have no recourse against us and the maximum exposure to loss in our option agreements is limited to non-refundable option deposits and any capitalized pre-acquisition costs. Often, we are at risk for items over budget related to land development on property we have under option if we are the land developer. In these cases, we have contracted to complete development at a fixed cost for our benefit, but on behalf of the land owner, and any budget savings or shortfalls are typically borne by us. Some of our option deposits may be refundable to us if certain contractual conditions are not performed by the party selling the lots.

The table below presents a summary of our lots under option at June 30, 2016 (dollars in thousands):

	Projected Number of Lots	Purchase Price	Option/ Earnest Money Deposits—Cash
Purchase and option contracts recorded on balance sheet as Real estate not owned	—	\$—	\$ —
Option contracts not recorded on balance sheet — non-refundable deposits, committed (1)	4,989	478,880	69,466
Purchase contracts not recorded on balance sheet — non-refundable deposits, committed (1)	3,771	204,837	13,318
Purchase contracts not recorded on balance sheet —refundable deposits, committed	1,275	76,101	3,039
Total committed (on and off balance sheet)	10,035	759,818	85,823
Total purchase and option contracts not recorded on balance sheet — refundable deposits, uncommitted (2)	6,575	326,909	5,621
Total lots under contract or option	16,610	\$1,086,727	\$ 91,444
Total purchase and option contracts not recorded on balance sheet (3)	16,610	\$1,086,727	\$ 91,444 (4)

(1) Deposits are non-refundable except if certain contractual conditions are not performed by the selling party.

(2) Deposits are refundable at our sole discretion. We have not completed our acquisition evaluation process and we have not committed to purchase these lots.

(3) Except for our specific performance contracts recorded on our balance sheet as Real estate not owned, if any, none of our option agreements require us to purchase lots.

(4) Amount is reflected on our consolidated balance sheet in Deposits on real estate under option or contract as of June 30, 2016.

Generally, our options to purchase lots remain effective so long as we purchase a pre-established minimum number of lots each month or quarter, as determined by the respective agreement. Although the pre-established number is typically structured to approximate our expected rate of home construction starts, during a weakened homebuilding market, we may purchase lots at an absorption level that exceeds our sales and home starts pace in order to meet the

pre-established minimum number of lots or we will work to restructure our original contract to terms that more accurately reflect our revised sales pace expectations.

NOTE 4 - INVESTMENTS IN UNCONSOLIDATED ENTITIES

In the past, we have entered into land development joint ventures as a means of accessing larger parcels of land, expanding our market opportunities, managing our risk profile and leveraging our capital base. While purchasing land through a joint venture can be beneficial, currently we do not view joint ventures as critical to the success of our homebuilding operations. Based on the structure of these joint ventures, they may or may not be consolidated into our results. Our joint venture partners are generally other homebuilders, land sellers or other real estate investors. We generally do not have a controlling interest in these ventures, which means our joint venture partners could cause the venture to take actions we disagree with, or fail to take actions we believe should be undertaken, including the sale of the underlying property to repay debt or recoup all or part of the partners' investments. As of June 30, 2016, we had two active equity-method land ventures.

We have two separate ongoing legal proceedings related to a minority ownership interest in one of our inactive joint ventures, the South Edge joint venture. The first involves pending litigation regarding the amount of attorneys' fees that are payable by us relating to resolved litigation about the guarantee related to that venture. The other South Edge related matter involves pending arbitration proceedings regarding claims we have asserted against certain members of the inactive joint venture. See Note 15 regarding the outstanding litigation related to this joint venture.

As of June 30, 2016, we also participated in one mortgage joint venture, which is engaged in mortgage activities and provides services to both our homebuyers as well as other buyers. Our investment in this mortgage joint venture as of June 30, 2016 and December 31, 2015 was \$1.7 million and \$2.5 million, respectively.

Summarized condensed combined financial information related to unconsolidated joint ventures that are accounted for using the equity method was as follows (in thousands):

	As of			
	June 30, December			
	2016	31, 2015		
Assets:				
Cash	\$7,894	\$ 7,888		
Real estate	32,434	33,366		
Other assets	5,748	4,514		
Total assets	\$46,076	\$ 45,768		
Liabilities and equity:				
Accounts payable and other liabilities	\$6,129	\$ 7,331		
Notes and mortgages payable	13,345	13,345		
Equity of:				
Meritage ⁽¹⁾	8,711	8,194		
Other	17,891	16,898		
Total liabilities and equity	\$46,076	\$ 45,768		
	Three Months		Six Months Ended	
	Ended June 30,		June 30,	
	2016	2015	2016	2015
Revenue	\$10,430	\$8,413	\$21,501	\$15,154
Costs and expenses	(4,670)	(4,213)	(9,646)	(7,408)
Net earnings of unconsolidated entities	\$5,760	\$4,200	\$11,855	\$7,746
Meritage's share of pre-tax earnings ^{(1) (2)}	\$4,402	\$2,588	\$7,038	\$5,009

(1) Balance represents Meritage's interest, as reflected in the financial records of the respective joint ventures. This balance may differ from the balance reported in our consolidated financial statements due to the following reconciling items: (i) timing differences for revenue and distributions recognition, (ii) step-up basis and corresponding amortization, (iii) capitalization of interest on qualified assets, (iv) income deferrals as discussed in Note (2) below and (v) the cessation of allocation of losses from joint ventures in which we have previously

written down our investment balance to zero and where we have no commitment to fund additional losses. As discussed in Note 2 to

these unaudited combined financial statements, balances do not include \$410,000 and \$445,000 of capitalized interest that is a component of our investment balances at June 30, 2016 and December 31, 2015, respectively.

Our share of pre-tax earnings is recorded in Earnings from financial services unconsolidated entities and other, net and Earnings/(loss) from other unconsolidated entities, net on our consolidated income statements and excludes joint venture profit related to lots we purchased from the joint ventures. Such profit is deferred until homes are delivered by us and title passes to a homebuyer.

The joint venture assets and liabilities noted in the table above primarily represent two active land ventures, one mortgage venture and various inactive ventures. Our total investment in all of these joint ventures is \$11.2 million and \$11.4 million as of June 30, 2016 and December 31, 2015, respectively. We believe these ventures are in compliance with their respective debt agreements, if applicable, and such debt is non-recourse to us.

NOTE 5 — LOANS PAYABLE AND OTHER BORROWINGS

Loans payable and other borrowings consist of the following (in thousands):

	As of	
	June 30, 2016	December 31, 2015
Other borrowings, real estate notes payable ⁽¹⁾	\$19,889	\$23,867
\$500 million unsecured revolving credit facility with interest approximating LIBOR (approximately 0.47% at June 30, 2016) plus 1.75% or Prime (3.50% at June 30, 2016) plus 0.75%	—	—
Total	\$19,889	\$23,867

⁽¹⁾ Reflects balance of non-recourse notes payable in connection with land purchases, with interest rates ranging from 0% to 6%.

The Company has a \$500.0 million unsecured revolving credit facility ("Credit Facility"), with an accordion feature that permits the size of the facility to increase to a maximum of \$600.0 million. In June 2016, the maturity date of a substantial portion of the credit facility was extended whereby \$60 million matures in July 2019 with the remainder maturing in July 2020. Borrowings under the Credit Facility are unsecured but availability is subject to, among other things, a borrowing base. The Credit Facility also contains certain financial covenants, including (a) a minimum tangible net worth requirement of \$670.3 million (which amount is subject to increase over time based on subsequent earnings and proceeds from equity offerings), and (b) a maximum leverage covenant that prohibits the leverage ratio (as defined therein) from exceeding 60%. In addition, we are required to maintain either (i) an interest coverage ratio (EBITDA to interest expense, as defined therein) of at least 1.50 to 1.00 or (ii) liquidity (as defined therein) of an amount not less than our consolidated interest incurred during the trailing 12 months.

We had no outstanding borrowings under the Credit Facility as of June 30, 2016 or December 31, 2015. During the three and six months ended June 30, 2016 we had \$56.0 million each of gross borrowings and repayments. During the three-month period ended June 30, 2015, we had \$110.0 million of gross borrowings and \$137.0 million of repayments. During the six months ended June 30, 2015, gross borrowings and repayments each totaled \$210.0 million. As of June 30, 2016 we had outstanding letters of credit issued under the Credit Facility totaling \$32.1 million, leaving \$467.9 million available under the Credit Facility to be drawn.

NOTE 6 — SENIOR AND CONVERTIBLE SENIOR NOTES, NET

Senior and convertible senior notes, net consist of the following (in thousands):

	As of	
	June 30, 2016	December 31, 2015
4.50% senior notes due 2018	\$175,000	\$175,000
7.15% senior notes due 2020. At June 30, 2016 and December 31, 2015 there was approximately \$2,133 and \$2,418 in net unamortized premium, respectively	302,133	302,418
7.00% senior notes due 2022	300,000	300,000
6.00% senior notes due 2025	200,000	200,000
1.875% convertible senior notes due 2032 ⁽¹⁾	126,500	126,500
Net debt issuance costs ⁽²⁾	(9,487)	(10,745)
Total	\$1,094,146	\$1,093,173

(1) The Convertible Notes may be redeemed by the note-holders on the fifth, tenth and fifteenth anniversary dates of the September 18, 2012 issuance date of the Convertible Notes.

As discussed in Note 1, the adoption of ASU 2015-03 resulted in a retrospective reclassification of our debt costs (2) from Prepaids, other assets and goodwill to Senior and convertible senior notes, net on our December 31, 2015 balance sheet in the amount of \$10.7 million.

The indentures for all of our senior notes contain covenants including, among others, limitations on the amount of secured debt we may incur, and limitations on sale and leaseback transactions and mergers. We believe we are in compliance with all such covenants as of June 30, 2016. Our convertible senior notes do not have any financial covenants.

The convertible senior notes are convertible into shares of our common stock at an initial conversion rate of 17.1985 shares of our common stock per \$1,000 principal amount of convertible senior notes. This corresponds to an initial conversion price of \$58.14 per share and represented a 47.5% conversion premium based on the closing price of our common stock on the issue date of the convertible senior notes.

Obligations to pay principal and interest on the senior and convertible notes are guaranteed by substantially all of our wholly-owned subsidiaries (each a “Guarantor” and, collectively, the “Guarantor Subsidiaries”), each of which is directly or indirectly 100% owned by Meritage Homes Corporation. Such guarantees are full and unconditional, and joint and several. In the event of a sale or other disposition of all of the assets of any Guarantor, by way of merger, consolidation or otherwise, or a sale or other disposition of all of the equity interests of any Guarantor then held by Meritage and its subsidiaries, then that Guarantor may be released and relieved of any obligations under its note guarantee. There are no significant restrictions on our ability or the ability of any Guarantor to obtain funds from their respective subsidiaries, as applicable, by dividend or loan. We do not provide separate financial statements of the Guarantor Subsidiaries because Meritage (the parent company) has no independent assets or operations and the guarantees are full and unconditional and joint and several. Subsidiaries of Meritage Homes Corporation that are nonguarantor subsidiaries are, individually and in the aggregate, minor.

NOTE 7 — FAIR VALUE DISCLOSURES

We account for non-recurring fair value measurements of our non-financial assets and liabilities in accordance with ASC 820-10 Fair Value Measurement (“ASC 820”). This guidance defines fair value, establishes a framework for measuring fair value and addresses required disclosures about fair value measurements. This standard establishes a three-level hierarchy for fair value measurements based upon the significant inputs used to determine fair value. Observable inputs are those which are obtained from market participants external to the company while unobservable inputs are generally developed internally, utilizing management’s estimates, assumptions and specific knowledge of the assets/liabilities and related markets. The three levels are defined as follows:

Level 1 — Valuation is based on quoted prices in active markets for identical assets and liabilities.

•

Level 2 — Valuation is determined from quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar instruments in markets that are not active, or by model-based techniques in which all significant inputs are observable in the market.

Level 3 — Valuation is derived from model-based techniques in which at least one significant input is unobservable and based on the company's own estimates about the assumptions that market participants would use to value the asset or liability.

If the only observable inputs are from inactive markets or for transactions which the company evaluates as "distressed", the use of Level 1 inputs should be modified by the company to properly address these factors, or the reliance of such inputs may be limited, with a greater weight attributed to Level 3 inputs. Refer to Notes 1 and 2 for additional information regarding the valuation of our non-financial assets.

Financial Instruments: The fair value of our fixed-rate debt is derived from quoted market prices by independent dealers (level 2 inputs as per the discussion above) and is as follows (in thousands):

	As of			
	June 30, 2016		December 31, 2015	
	Aggregate Principal	Estimated Fair Value	Aggregate Principal	Estimated Fair Value
4.50% senior notes	\$175,000	\$178,063	\$175,000	\$175,000
7.15% senior notes	\$300,000	\$324,000	\$300,000	\$315,750
7.00% senior notes	\$300,000	\$321,000	\$300,000	\$313,500
6.00% senior notes	\$200,000	\$202,000	\$200,000	\$197,500
1.875% convertible senior notes	\$126,500	\$125,077	\$126,500	\$124,128

Due to the short-term nature of other financial assets and liabilities including our Loans payable and other borrowings, we consider the carrying amounts of our other short-term financial instruments to approximate fair value.

NOTE 8 — EARNINGS PER SHARE

Basic and diluted earnings per common share were calculated as follows (in thousands, except per share amounts):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Basic weighted average number of shares outstanding	40,012	39,648	39,926	39,520
Effect of dilutive securities:				
Convertible senior notes ⁽¹⁾	2,176	2,176	2,176	2,176
Stock options and unvested restricted stock	345	321	375	383
Diluted average shares outstanding	42,533	42,145	42,477	42,079
Net earnings as reported	\$39,878	\$29,133	\$60,847	\$45,533
Interest attributable to convertible senior notes, net of income taxes	400	386	801	771
Net earnings for diluted earnings per share	\$40,278	\$29,519	\$61,648	\$46,304
Basic earnings per share	\$1.00	\$0.73	\$1.52	\$1.15
Diluted earnings per share ⁽¹⁾	\$0.95	\$0.70	\$1.45	\$1.10
Antidilutive stock options not included in the calculation of diluted earnings per share	289	14	19	7

(1) In accordance with ASC 260-10, Earnings Per Share, ("ASC 260-10") we calculate the dilutive effect of convertible securities using the "if-converted" method.

NOTE 9 — ACQUISITIONS AND GOODWILL

Goodwill. Over the past several years, we entered new markets through the acquisition of the homebuilding assets and operations of local/regional homebuilders in Georgia, South Carolina and Tennessee. As a result of these transactions, we recorded approximately \$33.0 million of goodwill. Goodwill represents the excess of the purchase price of our acquisitions over the fair value of the net assets acquired. Our acquisitions are recorded in accordance with ASC 805, Business Combinations ("ASC 805") and ASC 820, using the acquisition method of accounting. The purchase price for acquisitions is allocated based on estimated fair value of the assets and liabilities at the date of the acquisition. The combined excess purchase price of our acquisitions over the fair value of the net assets is classified as goodwill and is included on our consolidated balance sheet in Prepaids, other assets and goodwill. In accordance with ASC 350, we assess the recoverability of goodwill annually, or more frequently, if impairment indicators are present.

A summary of the carrying amount of goodwill follows (in thousands):

	West	Central	East	Financial Services	Corporate	Total
Balance at December 31, 2015	\$ —	\$ —	—\$32,962	\$ —	—\$	—\$32,962
Additions	—	—	—	—	—	—
Impairments	—	—	—	—	—	—
Balance at June 30, 2016	\$ —	\$ —	—\$32,962	\$ —	—\$	—\$32,962

NOTE 10 — STOCKHOLDERS' EQUITY

A summary of changes in shareholders' equity is presented below (in thousands):

Six Months Ended June 30, 2016 (In thousands)					
	Number Shares	Common Stock	Additional Paid-In Capital	Retained Earnings	Total
Balance at December 31, 2015	39,669	\$ 397	\$559,492	\$699,048	\$1,258,937
Net earnings	—	—	—	60,847	60,847
Exercise/vesting of stock-based awards	349	3	229	—	232
Excess income tax provision from stock-based awards	—	—	(526)	—	(526)
Stock-based compensation expense	—	—	7,313	—	7,313
Balance at June 30, 2016	40,018	\$ 400	\$566,508	\$759,895	\$1,326,803

Six Months Ended June 30, 2015 (In thousands)					
	Number Shares	Common Stock	Additional Paid-In Capital	Retained Earnings	Total
Balance at December 31, 2014	39,147	\$ 391	\$538,788	\$570,310	\$1,109,489
Net earnings	—	—	—	45,533	45,533
Exercise/vesting of stock-based awards	514	6	2,833	—	2,839
Excess income tax benefit from stock-based awards	—	—	2,012	—	2,012
Stock-based compensation expense	—	—	8,465	—	8,465
Balance at June 30, 2015	39,661	\$ 397	\$552,098	\$615,843	\$1,168,338

NOTE 11 — STOCK BASED AND DEFERRED COMPENSATION

We have a stock compensation plan, the Amended and Restated 2006 Stock Incentive Plan (the "Plan"), that was adopted in 2006 and has been amended or restated from time to time. The Plan was approved by our stockholders and is administered by our Board of Directors. The provisions of the Plan allow for the grant of stock appreciation rights, restricted stock awards, restricted stock units, performance share awards and performance-based awards in addition to non-qualified and incentive stock options. The Plan authorizes awards to officers, key employees, non-employee directors and consultants for up to 5,350,000 shares of common stock, of which 1,663,019 shares remain available for grant at June 30, 2016. The available shares include shares from expired, terminated or forfeited awards under prior plans that have since expired and are thus available for grant under the Plan. We believe that such awards provide a means of performance-based compensation to attract and retain qualified employees and better align the interests of our employees with those of our stockholders. Non-vested stock awards are usually granted with a five-year ratable vesting period for employees and with a three-year cliff vesting for both non-vested stock and performance-based awards granted to certain senior executive officers and non-employee directors.

Compensation cost related to time-based restricted stock awards is measured as of the closing price on the date of grant and is expensed on a straight-line basis over the vesting period of the award. Compensation cost related to performance-based restricted stock awards is also measured as of the closing price on the date of grant but is expensed in accordance with ASC 718-10-25-20, Compensation – Stock Compensation ("ASC 718"), which requires an assessment of probability of attainment of the performance target. As our performance targets are dependent on performance over a specified measurement period, once we determine that the performance target outcome is probable, the cumulative expense is recorded immediately with the remaining expense recorded on a straight-line basis through the end of the award vesting period. Beginning with grants in 2014, a portion of the performance-based restricted stock awards granted contain market conditions as defined by ASC 718. The guidance in ASC 718 requires that compensation expense for stock awards with market conditions be expensed based on a derived grant date fair value and expensed over the service period. We engaged a third party to perform a valuation analysis on the awards containing market conditions and our associated expense with those awards is based on the derived fair value from that analysis and is being expensed straight-line over the service period of the awards. Below is a summary of compensation expense and stock award activity (dollars in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
Stock-based compensation expense	\$2,555	\$3,835	\$7,313	\$8,465
Non-vested shares granted	—	15,000	493,865	403,787
Performance-based non-vested shares granted	—	—	66,698	66,187
Stock options exercised	3,200	200	14,400	143,640
Restricted stock awards vested (includes performance-based awards)	29,465	44,134	334,550	370,204

The following table includes additional information regarding our Plan (dollars in thousands):

	As of	
	June 30, December	
	2016	31, 2015
Unrecognized stock-based compensation cost	\$25,139	\$18,545
Weighted average years expense recognition period	3.08	2.34
Total stock-based awards outstanding ⁽¹⁾	1,224,785	1,078,877

⁽¹⁾ Includes options outstanding and unvested restricted stock and performance-based awards (at target level) and restricted stock units.

In 2013, we began to offer a non-qualified deferred compensation plan ("deferred compensation plan") to highly compensated employees in order to allow them additional pre-tax income deferrals above and beyond the limits that

qualified plans, such as 401k plans, impose on highly compensated employees. We do not currently offer a contribution match on the deferred compensation plan. All contributions to the plan to date have been funded by the employees and, therefore, we have no associated expense related to the deferred compensation plan for the three and six months ended June 30, 2016 or 2015, other than minor administrative costs.

NOTE 12 — INCOME TAXES

Components of the income tax provision are as follows (in thousands):

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2016	2015
Federal	\$16,568	\$11,767	\$23,109	\$19,427
State	2,590	514	3,965	1,751
Total	\$19,158	\$12,281	\$27,074	\$21,178

The effective tax rate for the three and six months ended June 30, 2016 was 32.5% and 30.8%, respectively, and for the three and six months ended June 30, 2015 was 29.7% and 31.7%, respectively. Our tax rate has been favorably impacted in both years by the homebuilding manufacturing deduction and additional estimated federal energy tax credits related to prior years.

On December 18, 2015, Congress passed the Protecting Americans from Tax Hikes (PATH) Act of 2015. The PATH Act extended the availability of the IRC §45L new energy-efficient homes credit to 2015 and 2016. Under ASC 740, the effects of new legislation are recognized in the period that includes the date of enactment, regardless of the retroactive benefit. In accordance with ASC 740, no federal energy credits for 2015 were recognized at June 30, 2015.

At June 30, 2016 and December 31, 2015, we have no unrecognized tax benefits due to the lapse of applicable statutes of limitations and completion of audits for prior years. We believe that our current income tax filing positions and deductions will be sustained on audit and do not anticipate any adjustments that will result in a material change. Our policy is to accrue interest and penalties on unrecognized tax benefits and include them in federal income tax expense. We determine our deferred tax assets and liabilities in accordance with ASC 740-10, Income Taxes ("ASC 740"). We evaluate our deferred tax assets, including the benefit from NOLs, by jurisdiction to determine if a valuation allowance is required. Companies must assess whether a valuation allowance should be established based on the consideration of all available evidence using a "more likely than not" standard with significant weight being given to evidence that can be objectively verified. This assessment considers, among other matters, the nature, frequency and severity of cumulative losses, forecasts of future profitability, the length of statutory carry forward periods, experiences with operating losses and experiences of utilizing tax credit carry forwards and tax planning alternatives. We have no valuation allowance on our deferred tax assets and NOL carryovers at June 30, 2016.

At June 30, 2016, we had no remaining federal NOL carry forward or un-utilized federal tax credits. At June 30, 2016, we had tax benefits for state NOL carry forwards of \$1.5 million net of federal benefit, unchanged from December 31, 2015, that begin to expire in 2028.

At June 30, 2016, we have income taxes payable of \$6.7 million, which primarily consists of current federal and state tax accruals, net of estimated tax payments and tax credits. This amount is recorded in Accrued liabilities on the accompanying unaudited balance sheet at June 30, 2016.

We conduct business and are subject to tax in the U.S. and several states. With few exceptions, we are no longer subject to U.S. federal, state, or local income tax examinations by taxing authorities for years prior to 2012. We have one state income tax examination of multiple years under audit at this time.

The tax benefits from NOLs, built-in losses, and tax credits would be materially reduced or potentially eliminated if we experience an "ownership change" as defined under Internal Revenue Code §382. Based on our analysis performed as of June 30, 2016 we do not believe that we have experienced an ownership change. As a protective measure, our stockholders held a Special Meeting of Stockholders on February 16, 2009 and approved an amendment to our Articles of Incorporation that restricts certain transfers of our common stock. The amendment is intended to help us avoid an unintended ownership change and thereby preserve the value of any tax benefit for future utilization.

NOTE 13 — SUPPLEMENTAL DISCLOSURE OF CASH FLOW INFORMATION

The following table presents certain supplemental cash flow information (in thousands):

	Six Months Ended	
	June 30,	
	2016	2015
Interest capitalized, net	\$2,672	\$4,061
Income taxes paid	\$24,722	\$27,227
Non-cash operating activities:		
Real estate not owned decrease	\$—	\$(4,999)
Real estate acquired through notes payable	\$11,101	\$7,143

NOTE 14 — OPERATING AND REPORTING SEGMENTS

We operate with two principal business segments: homebuilding and financial services. As defined in ASC 280-10, Segment Reporting, we have nine homebuilding operating segments. The homebuilding segments are engaged in the business of acquiring and developing land, constructing homes, marketing and selling those homes and providing warranty and customer services. We aggregate our homebuilding operating segments into a reporting segment based on similar long-term economic characteristics and geographical proximity. Our current reportable homebuilding segments are as follows:

West: Arizona, California and Colorado ⁽¹⁾

Central: Texas

East: Florida, Georgia, North Carolina, South Carolina and Tennessee

(1) Activity for our wind-down Nevada operations is reflected in the West Region's results.

Management's evaluation of segment performance is based on segment operating income, which we define as homebuilding and land revenues less cost of home construction, commissions and other sales costs, land development and other land sales costs and other costs incurred by or allocated to each segment, including impairments. Each reportable segment follows the same accounting policies described in Note 1, "Organization and Basis of Presentation." Operating results for each segment may not be indicative of the results for such segment had it been an independent, stand-alone entity for the periods presented.

The following segment information is in thousands:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2016	2015	2016	2015
Homebuilding revenue ⁽¹⁾ :				
West	\$332,643	\$219,774	\$593,689	\$426,652
Central	208,701	179,475	370,590	333,501
East	256,552	198,552	431,383	356,360
Consolidated total	\$797,896	\$597,801	\$1,395,662	\$1,116,513
Homebuilding segment operating income:				
West	\$27,495	\$15,256	\$43,558	\$29,453
Central	19,784	21,053	33,678	35,158

Other assets	55,112	87,313	(1)77,548	(2)898	261,395	(3)482,266
Total assets	\$1,092,261	\$632,212	\$690,549	\$ 898	\$ 263,857	\$2,679,777

(1) Balance consists primarily of development reimbursements from local municipalities and cash.

(2) Balance consists primarily of goodwill (see Note 9), prepaid permits and fees to local municipalities and cash.

(3) Balance consists primarily of cash and our deferred tax asset.

NOTE 15 — COMMITMENTS AND CONTINGENCIES

We are involved in various routine legal and regulatory proceedings, including, without limitation, warranty claims and litigation and arbitration proceedings alleging construction defects. In general, the proceedings are incidental to our business, and most exposure is subject to and should be covered by warranty and indemnity obligations of our consultants and subcontractors. Additionally, some such claims are also covered by insurance. With respect to the majority of such legal proceedings, our ultimate legal and financial responsibility, if any, cannot be estimated with certainty and, in most cases, any potential losses related to these matters are not considered probable. Historically, most disputes regarding warranty claims are resolved without the initiation of legal proceedings. We believe there are not any pending legal or warranty matters that could have a material adverse impact upon our consolidated financial condition, results of operations or cash flows that have not been sufficiently reserved.

Joint Venture Litigation

Since 2008, we have been involved in litigation initiated by the lender group for a large Nevada-based land acquisition and development joint venture in which we held a 3.53% interest. We were the only builder joint venture partner to have fully performed its obligations with respect to takedowns of lots from the joint venture, having completed our first takedown in April 2007 and having tendered full performance of our second and final takedown in April 2008. The joint venture and the lender group rejected our tender of performance for our second and final takedown, and as a result we contended, among other things, that the rejection by the joint venture and the lender group of our tender of full performance was wrongful and constituted a breach of contract and should release us of liability with respect to the takedown and extinguish or greatly reduce our exposure under all guarantees. On December 9, 2010, three of the lenders filed a petition seeking to place the venture into an involuntary bankruptcy (JP Morgan Chase Bank, N.A. v. South Edge, LLC (Case No. 10-32968-bam)). On June 6, 2011, we received a demand letter from the lenders requesting full payment of \$13.2 million the lenders claimed to be owed under the springing repayment guarantee, including past-due interest and penalties. The lenders claimed that the involuntary bankruptcy filed by three of the co-lenders triggered the springing repayment guarantee. We contested the Lenders' claim on the basis that the repayment guarantee was not properly triggered by the lenders' filing of the involuntary bankruptcy, the lenders breached their contract with us by refusing to accept the April 2008 tender of our performance and by refusing to release their lien in connection with our second and final takedown in this project. The U.S. District Court of Nevada entered judgments in favor of JP Morgan in a combined amount of \$16.6 million, which included prejudgment interest and attorneys' fees, which we paid in January 2016. The only outstanding issue in that case involves the amount of attorneys' fees that will be payable by us related to the now resolved appeal of that case, for which we are fully reserved.

We contend that four of our co-venturers in the South Edge entity (KB Home, Toll Brothers, Pardee Homes and Beazer Homes) are liable to Meritage for certain issues and events related to the South Edge joint venture and property, including certain amounts that Meritage has paid or may hereafter pay pursuant to the above-mentioned

claims and judgments against us, and we have filed an arbitration claim against those builders to recover such amounts from them based on breach of contract, unjust enrichment, and other claims.

Special Note of Caution Regarding Forward-Looking Statements

In passing the Private Securities Litigation Reform Act of 1995 (“PSLRA”), Congress encouraged public companies to make “forward-looking statements” by creating a safe-harbor to protect companies from securities law liability in connection with forward-looking statements. We intend to qualify both our written and oral forward-looking statements for protection under the PSLRA.

The words “believe,” “expect,” “anticipate,” “forecast,” “plan,” “intend,” “may,” “will,” “should,” “could,” “estimate,” “project” and similar expressions identify forward-looking statements, which speak only as of the date the statement was made. All statements we make other than statements of historical fact are forward-looking statements within the meaning of that term in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934.

Forward-looking statements in this Quarterly Report include: statements concerning trends in the homebuilding industry in general, and our markets and results specifically; our operating strategy and initiatives; the benefits of our land acquisition strategy and structures, including the use and the benefits of land banking and joint ventures; that we expect to redeploy cash generated from operations to acquire and develop lot positions; management estimates regarding joint venture exposure; expectations regarding our industry and our business for the remainder of 2016 and beyond; our expectation that existing guarantees, letters of credit and performance and surety bonds will not be drawn on; the adequacy of our insurance coverage and warranty reserves; our strategy, legal positions and the expected outcome of legal proceedings we are involved in and the sufficiency of our reserves relating thereto; the sufficiency of our liquidity and capital resources to support our business strategy; our ability and willingness to acquire land under option or contract; our strategy and trends and expectations concerning sales prices, sales pace, closings, orders, cancellations, material and labor costs for land development and home construction, gross margins, gross profit, revenues, net earnings, operating leverage, backlog, land prices, changes in and location of active communities, seasonality and the timing of new community openings; our future cash needs; that we may seek to raise additional debt and equity capital; and our intentions regarding the payment of dividends and the use of derivative contracts; our perceptions about the importance of joint ventures to our business; and the impact of seasonality and changes in interest rates.

Important factors that could cause actual results to differ materially from those in forward-looking statements, and that could negatively affect our business include, but are not limited to, the following: the availability and cost of finished lots and undeveloped land; interest rates and changes in the availability and pricing of residential mortgages; fluctuations in the availability and cost of labor; changes in tax laws that adversely impact us or our homebuyers; reversal of the current economic recovery; the ability of our potential buyers to sell their existing homes; cancellation rates; inflation in the cost of materials used to develop communities and construct homes; the adverse effect of slower order absorption rates; impairments of our real estate inventory; a change to the feasibility of projects under option or contract that could result in the write-down or write-off of option deposits; our potential exposure to natural disasters or severe weather conditions; competition; construction defect and home warranty claims; failures in health and safety performance; our success in prevailing on contested tax positions; our ability to obtain performance bonds in connection with our development work; the loss of key personnel; enactment of new laws or regulations and our failure to comply with laws and regulations; our limited geographic diversification; fluctuations in quarterly operating results; our level of indebtedness; our ability to obtain financing; our ability to successfully integrate acquired companies and achieve anticipated benefits from these acquisitions; our compliance with government regulations and the effect of legislative or other initiatives that seek to restrain growth of new housing construction or similar measures; legislation relating to energy and climate change; the replication of our energy-efficient technologies by our competitors; our exposure to information technology failures and security breaches; and other factors identified in documents filed by the company with the Securities and Exchange Commission, including those set forth in our Form 10-K for the year ended December 31, 2015 under the caption “Risk Factors,” which can be found on our website. Forward-looking statements express expectations of future events. All forward-looking statements are inherently uncertain as they are based on various expectations and assumptions concerning future events and they are subject to numerous known and unknown risks and uncertainties that could cause actual events or results to differ materially from those projected. Due to these inherent uncertainties, the investment community is urged not to place undue reliance on forward-looking statements. In addition, we undertake no obligations to update or revise forward-looking

statements to reflect changed assumptions, the occurrence of unanticipated events or changes to projections over time.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview and Outlook

Supported by a steady U.S. economy and with many housing drivers remaining positive, the first half of 2016 has continued to experience healthy housing supply and demand in most markets. To date the homebuilding market has not experienced declines stemming from the recent international economic uncertainties. As a result, there has been solid financial and operational performance for the homebuilding sector. The demand for new homes has resulted in rising average sales prices as well as rising land and labor costs, and in some markets labor shortages. The cost increases are out-pacing home price increases in many markets, creating pressure on both margins and cycle times. We believe the current homebuilding cycle will continue on a slow but steady improvement trajectory, which should help better align the rising land and labor prices with consumer demand. We continue to strategically focus on expanding our presence in our markets through acquisitions and development of well-located communities offering homes with energy-efficient features and appealing designs at price points that are attractive to various sectors of the home-buying market.

Summary Company Results

Total home closing revenue was \$795.8 million and \$1.4 billion for the three and six months ended June 30, 2016, respectively representing 34.7% and 25.5% increases over the respective prior year periods. This revenue growth largely contributed to our higher net income of \$39.9 million and \$60.8 million for the three and six months ended June 30, 2016, respectively, as compared to \$29.1 million and \$45.5 million for the same respective periods in 2015. Although home closing gross margin declined year over year, gross profit increased due to higher home closing volumes. Net income was also aided by greater leverage of our general and administrative costs for both the three and six-month periods compared to the 2015 periods. Year-to-date net income also benefited from a lower tax rate resulting from energy tax credits in the first quarter of 2016.

On a consolidated basis, we experienced year-over-year growth in closings, orders and backlog, in units and value for both the three and six months ended June 30, 2016 as compared to prior year. We ended the second quarter of 2016 with 3,314 homes in backlog, valued at \$1.4 billion, representing 4.0% and 7.7% increases over June 30, 2015, respectively. Our average sales price for homes in backlog increased 3.6% to \$421,300 at June 30, 2016 from \$406,800 at June 30, 2015, with increases reported in nearly all our markets.

Company Positioning

We believe that the investments in our new communities, new markets and industry-leading energy-efficient product offerings create a differentiated strategy that has aided us in our growth in the highly competitive new home market. We remain focused on our main goals of growing our orders pace and returning to normalized gross margins while controlling overhead costs and maintaining a strong balance sheet. To help meet these goals, we continue to focus on the following initiatives:

- Continuing to actively acquire and develop land in key markets in order to maintain and grow our lot supply and active community count;
- Expanding market share in our smaller markets;
- Introducing our newest collection of product offerings that targets the growing first-time homebuyer segment;
- Managing cost increases through national and regional vendor relationships with a focus on quality construction and warranty management;
- Generating additional revenue and improving overhead operating leverage in all of our markets;
- Generating additional working capital and maintaining adequate liquidity;
- Increasing orders pace through the use of our consumer and market research to build homes that offer our buyers their desired features and amenities;
- Continuing to innovate and promote our energy efficiency program to drive sales;
- Adapting sales and marketing efforts to increase traffic and allow us to favorably compete with both resale and new homes;
- Actively monitoring and adjusting our sales, construction and closing processes through customer satisfaction survey scores; and

Promoting a positive environment for our employees in order to retain our employees and minimize turnover.

Critical Accounting Policies

The accounting policies we deem most critical to us and that involve the most difficult, subjective or complex judgments include revenue recognition, valuation of real estate, goodwill, deferred tax assets and warranty reserves as well as the calculation of compensation cost relating to share-based payments. There have been no significant changes to our critical accounting policies during the six months ended June 30, 2016 compared to those disclosed in Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations, included in our 2015 Annual Report on Form 10-K.

Home Closing Revenue, Home Orders and Order Backlog

The composition of our closings, home orders and backlog is constantly changing and is based on a changing mix of communities with various price points between periods as new projects open and existing projects wind down.

Further, individual homes within a community can range significantly in price due to differing square footage, option selections, lot sizes and quality and location of lots (e.g. cul-de-sac, view lots, greenbelt lots). These variations result in a lack of meaningful comparability between our home orders, closings and backlog due to the changing mix between periods. The tables on the following pages present operating and financial data that we consider most critical to managing our operations (dollars in thousands):

Operating Results

Companywide. Home closing revenue for the three months ended June 30, 2016 increased 34.7% to \$795.8 million when compared to the same quarter of the prior year, mainly driven by the 394 additional home closings, a 25.3% increase, combined with a \$28,300 higher average sales price. Home orders were relatively flat, growing by 87 units for a total value of \$845.3 million on 2,073 homes as compared to \$775.8 million on 1,986 homes in 2015. Higher beginning backlog entering the second quarter combined with the consistent home orders and higher average sales prices contributed to our 126-home and \$99.4 million increase in ending backlog, 4.0% and 7.7% improvements over the prior year, respectively. Ending and average active community count improved slightly in the three months ended June 30, 2016, as did our orders pace with 8.6 homes ordered per average community compared to 8.5 in the comparable 2015 period. For the six months ended June 30, 2016, home closing units and revenue grew by 547 units and \$283.2 million for ending home closing revenue of \$1.4 billion, 25.5% higher than the six month period in 2015. Consistent with the three-month period, orders for the six months ended June 30, 2016 were mostly flat when compared to the prior year, although coupled with average sales price increases, order value rose by 5.9%. West. During the three months ended June 30, 2016, home closings rose 40.5% over the same 2015 period. This increase combined with a \$32,500 higher average sales price resulted in \$332.6 million in home closing revenue in the second quarter of 2016, 51.3% higher than the prior year. Order units in the West Region improved by 6.9% with a \$31,900 higher average sales price for 789 orders valued at \$366.1 million versus 738 orders valued at \$318.9 million in the prior year. Ending backlog units declined 6.4%, but the value of backlog improved to \$564.5 million due to higher average sales prices.

Demand in the West Region increased in the second quarter of the year as evidenced by the orders pace of 9.9 for the quarter ended June 30, 2016 as compared to 9.2 in 2015, providing 51 additional order units year over year. Orders pace in the California and Colorado markets during the second quarter continue to demonstrate strong buyer demand, generating 11.8 and 13.0 orders per average community, respectively, the highest of any of our markets. The exceptional demand in California, coupled with our community locations and product offerings, led to a consistently high orders pace that directly contributed to the 59.1% increase in units closed in the second quarter of 2016 as compared to the prior year. Colorado contributed \$82.5 million in closing revenue in the second quarter of 2016 on 169 units, 58.2% and 49.6% year-over-year improvements, respectively. The 6.6% decline in orders during the second quarter in Colorado is due to the 18.8% lower active community count and was almost entirely offset by rising average sales prices of 7.1% or \$33,000, leading to overall order value of \$84.4 million, flat from the prior year. The price appreciation speaks to the desirability of this market, although we expect this to temper throughout 2016 as we introduce communities with smaller product offerings and lower price points. Closing revenue in Arizona increased by 30.8% to \$94.0 million, as we closed 21.8% more units than in 2015, with \$23,200 higher average sales prices. Arizona home orders rose 3.4% for the three months ended June 30, 2016 despite the slight decline in the average number of actively-selling communities as a result of improved orders pace from 7.4 in 2015 to 7.8 in 2016 and benefited from a \$28,900 higher average sales price, which resulted in total order value growth of 12.8% or \$13.1 million.

Year-to-date results in the West Region were similar to that of the second quarter of 2016. The number and value of units closed versus prior year improved by 31.0% and 39.1%, respectively, with increases in all states within the Region. Orders pace declined to 18.5 in 2016 versus 18.9 in 2015 as a result of some slowing in the first three months of the year, and the year-to-date orders were further impacted in Colorado by the lower active community count year over year. Despite these lower orders, demand in the West is still high, providing the strongest orders pace in the Company and helping to drive improving average sales prices in each market in the West. The Region ended the six-month period with overall growth in order value of \$20.9 million on 38 fewer units and ending backlog of \$564.5 million on 1,135 units.

Central. In the second quarter of 2016, the Central Region, made up of our Texas markets, closed 556 homes totaling \$206.9 million in home closing revenue, 9.2% and 18.6% improvements, respectively, leading to overall home closing revenue growth of \$32.5 million. Orders in the Region decreased by 13.4% compared to prior year, partially offset by rising average sales prices of \$15,900 or 4.5%. Oil price concerns continue to have an impact on consumer confidence in Houston, impacting the spring selling season. We believe in the long-term viability of this market and accordingly opened 11 new communities in the second quarter of 2016, although more than half of those openings were in the last month of the quarter and accordingly were not able to provide a full quarter of order activity. The Region ended the quarter with 3.5% fewer homes in backlog at June 30, 2016, with 1,062 homes valued at \$402.3 million, a 2.8% improvement in backlog value. Year-to-date closings and home closing revenue were up 7.6% and 12.2%, respectively, while orders were down year over year by 51 units, echoing the results of the second quarter.

East. Our East Region generated 666 closings and \$256.4 million in revenue in the second quarter of 2016, 25.9% and 30.2% increases, respectively, from the same period in 2015. The Region also reported higher orders year over year providing \$43.6 million of additional order dollars, mostly due to the 19.7% increase in home orders. The orders pace in this Region improved 20.9% year over year as we have focused efforts to improve orders pace in newer markets we have entered through acquisitions over recent years. The Region ended the second quarter with 88 actively selling communities as compared to 95 in 2015 and ended the quarter with a 242-home and \$82.1 million increase in ending backlog, 27.7% and 23.6% gains, respectively. We are working to open a large number of communities in the East Region in the second half of the year.

The Florida market, the largest contributor to the Region's results, reported \$103.3 million in closing revenue on 257 home closings, increases of 13.0% and 22.4%, respectively. The 7.1% drop in the number of average communities open for sales during the second quarter was more than offset by a 32.1% improvement in orders pace, providing 267 orders for the three-month period ending June 30, 2016, a 22.5% increase over 2015 and was the main driver of the 52-home and \$11.1 million increase in backlog at June 30, 2016 over June 30, 2015. Operations in North Carolina provided the largest year-over-year improvements in home closing revenue for the second quarter of 2016 in the Region, contributing 179 homes closed and \$76.5 million in home closing revenue, 32.6% and 52.4% improvements, respectively. In addition, North Carolina contributed 159 homes ordered and \$66.9 million in order value from 23 average actively-selling communities in the second quarter of 2016. Tennessee provided improved home closing revenue in the second quarter of 2016, \$6.5 million higher than 2015 on 10 more units. The largest driver for this improvement was from three additional actively-selling communities, which also contributed to the 21.0% higher number of units ordered. As demonstrated by their significant improvements year over year in orders pace, we continue to focus on integrating our newest markets in Georgia and South Carolina, which contributed 81 and 88 closings valued at \$27.4 million and \$27.7 million, respectively, during the second quarter of 2016. During the second quarter, orders in Georgia grew by 117.0% or 62 units, largely attributable to the 20.7% increase in the average number of actively-selling communities during the quarter, with order value also growing by \$21.7 million. Growth in Georgia is a strategic focus for us in this Region, as this market continues to demonstrate solid buyer demand and is one of the strongest homebuilding markets in the country. The Region finished the second quarter of 2016 with 1,117 units in backlog with a value of \$429.3 million, 27.7% and 23.6% improvements over 2015, respectively.

The year-to-date results of the East Region were similar to those of the second quarter, with 1,127 units closed, providing \$431.0 million in home closing revenue, 17.8% and 21.5% higher than the 2015 period. The number and value of orders also improved by 184 units and \$60.7 million, spurred by an improved orders pace of 15.2 versus 13.6 in the prior year.

Land Closing Revenue and Gross Profit

From time to time, we may sell certain lots or land parcels to other homebuilders, developers or investors if we feel the sale will provide a greater economic benefit to us than continuing home construction or where we are looking to diversify our land positions in the specific geography. As a result of such sales, we recognized land closing revenue of \$2.1 million and \$6.8 million for the three months ending June 30, 2016 and 2015, respectively and \$4.2 million and \$8.2 million for the six months ended June 30, 2016 and 2015, respectively. For both years, modest profits were achieved on these land sales, \$0.4 million and \$0.5 million for the three months ended June 30, 2016 and 2015, respectively and \$0.8 million and \$0.7 million for the six months ended June 30, 2016 and 2015, respectively.

West	\$57,184	17.2 %	\$38,253	17.4 %	\$100,498	16.9 %	\$75,897	17.8 %
Central	\$41,016	19.8 %	\$39,096	22.4 %	\$73,118	19.9 %	\$70,726	21.6 %
East	\$39,546	15.4 %	\$36,888	18.7 %	\$67,477	15.7 %	\$63,101	17.8 %

(1) Home closing gross profit represents home closing revenue less cost of home closings, including impairments. Cost of home closings includes land and lot development costs, direct home construction costs, an allocation of common community costs (such as model complex costs and architectural, legal and zoning costs), interest, sales tax, impact fees, warranty, construction overhead and closing costs.

Companywide. Home closing gross profit for the three and six months ended June 30, 2016 was \$137.7 million and \$241.1 million, respectively, increases of \$23.5 million and \$31.4 million versus the same respective periods in 2015 as a result of higher home closing revenue from more units closed and higher average sales prices. The 200 and 160 basis point declines in home closing gross margin for the three and six months ended June 30, 2016, respectively, is mainly from a combination of higher labor and land costs than the prior year. As demand has remained strong, labor costs have not yet normalized and we expect elevated land prices will continue to place pressure on margins, as most of our markets continue to experience steadily increasing land prices. Real estate impairments recognized in the second quarter of both 2016 and 2015 impacted margins by 30 basis points; margins adjusted for impairments were 17.6% and 19.6% for the 2016 and 2015 periods, respectively (home closing margins before adjusting for impairments were 17.3% and 19.3% for the three months ended June 30, 2016 and June 30, 2015, respectively).

West. Our West Region reported slightly lower year-over-year home closing gross margin, with 17.2% for the second quarter of 2016 compared to 17.4% in 2015, although improved sequentially by 60 basis points from the first quarter of 2016. When adjusted for impairments, 2015 margins in the second quarter were 18.2% with only minimal impairments in this Region in 2016. The year-over-year margin decline is largely the result of higher land prices in the Region, as we are focused on building communities in sought-after submarkets, which demand high land prices. Targeted pricing concessions offered in an effort to spur demand in certain Southern California and Arizona communities further negatively impacted the Region's margins. These concessions brought communities to within the limits for FHA loans. Home closing gross margin for the six months ended June 30, 2016 also declined from 17.8% in 2015 to 16.9% in 2016 for the same reasons noted for the second quarter.

Central. The Central Region produced the highest home closing gross margin in the company, although the Region's margins declined year over year, with 19.8% in 2016 versus 22.4% in 2015 for second quarter results. While we have experienced some pricing power with improved average sales prices, the increases are at a slower pace than that of rising land and labor costs. The year-over-year margin decline was impacted partially by several communities with above average margins providing less closing volume in the second quarter of 2016 as compared to the prior year period. Further, the oil price concerns led to some pricing concessions in Houston, which also is a contributing factor to the lower margins in the Region. For the same reasons noted for the second quarter, year-to-date margins in this Region declined to 19.9% in 2016 versus 21.6% in 2015.

East. The East Region experienced lower gross margins in the second quarter and first six months of 15.4% and 15.7%, respectively, versus 18.7% and 17.8% for the same periods in 2015. Impairment charges in the Region reduced

gross margin by 70 basis points and 40 basis points for the three and six months ended June 30, 2016, respectively, while the impairment charges in the respective 2015 periods were nominal. This Region currently delivers our lowest gross margins, partially attributable to our newer division operations that are not yet fully scaled to our normal operating levels. In addition, a shift in product mix in Florida contributed to the decline in margin year over year, as several luxury communities that generated above-average margins with high closing volume in 2015 tapered off in 2016.

Financial Services Profit (in thousands)

	Three Months		Six Months	
	Ended June 30,		Ended June 30,	
	2016	2015	2015	2014

Financial services profit	\$5,763	\$4,136	\$9,809	\$7,916
---------------------------	---------	---------	---------	---------

Financial services profit represents the net profit of our financial services operations, including the operating profit generated by our wholly-owned title company, Carefree Title, as well as our portion of earnings from a mortgage joint venture. The increase in financial services profit year over year is primarily the result of the increase in home closings.

Commissions and Other Sales Costs. Commissions and other sales costs are comprised of internal and external commissions and related sales and marketing expenses such as advertising and sales office costs. As a result of the additional revenues on homes closed, these costs increased by \$11.2 million and \$15.8 million for the three and six months ended June 30, 2016, respectively, versus the 2015 period. As a percentage of home closing revenue, commissions and other sales costs declined to 7.1% and 7.4% during the three and six months ended June 30, 2016, respectively, compared to 7.6% and 7.8% in the comparable 2015 periods as a result of improved overhead leverage on the additional revenue dollars. We have made concerted efforts to contain these costs and recently modified our internal commission structure as part of our cost-cutting initiatives.

General and Administrative Expenses. General and administrative expenses represent corporate and divisional overhead expenses such as salaries and bonuses, occupancy, insurance and travel expenses. As a percentage of total closing revenue, these costs declined by 100 basis points for the three month period of 2016 to 3.6% and declined by 90 basis points for the six-month period of 2016 to 4.2%. This improved leverage is mainly attributable to the additional closing revenue in 2016 over 2015. These expenses were slightly higher at \$28.9 million for the three months ended June 30, 2016 compared to \$27.7 million in 2015. For the six months ended June 30, 2015, we had \$58.5 million in general and administrative expenses as compared to \$57.3 million for the same period in 2015. We continually strive to optimize overhead leverage through cost control efforts at both corporate and divisional levels.

Earnings/(Loss) from Other Unconsolidated Entities, Net. Earnings/(loss) from other unconsolidated entities, net represents our portion of pre-tax earnings/(losses) from non-financial services joint ventures. Included in this amount is both the pass through of earnings/(losses) from the joint venture's most recently available financial statements as well as any accrued expected earnings/(losses) for the periods presented that might not have been reflected in the joint venture's financial statements provided to us. The three- and six-month periods ended June 30, 2016 reported earnings of \$0.6 million and \$0.4 million, respectively, compared to losses for the prior year periods of \$0.2 million and \$0.3 million, respectively. The 2016 earnings are the result of land sales recorded in the respective joint venture financial

statements in 2016, with no comparable land sales in 2015.

35

Interest Expense. Interest expense is comprised of interest incurred, but not capitalized, on our senior notes, convertible senior notes and our Credit Facility. Despite a higher amount of interest incurred due to a larger amount of debt versus prior year, interest expense decreased year over year for both the three- and six-month periods, as we have more inventory under development that qualifies for interest capitalization. During the three months ended June 30, 2016 and June 30, 2015, our non-capitalizable interest expense was \$1.7 million and \$4.6 million, respectively. For the year-to-date results, our interest expense was \$5.0 million and \$7.8 million, respectively.

Other Income, Net. Other income, net primarily consists of (i) forfeited deposits from potential homebuyers who canceled their purchase contracts with us, (ii) sublease income, (iii) interest earned on our cash and cash equivalents, and (iv) payments and awards related to legal settlements. The year-over-year increase in both the second quarter and year-to-date Other income, net is related to a combination of positive legal settlements in 2016 versus legal settlement charges in prior year combined with a higher amount of interest income from municipalities related to reimbursable land development costs.

Income Taxes.

Our effective tax rate was 32.5% and 29.7% for the three months ended June 30, 2016 and 2015, respectively, and 30.8% and 31.7% for the six months ended June 30, 2016 and 2015, respectively. Our tax rate has been favorably impacted in both years by the homebuilding manufacturing deduction and by additional federal energy credits applicable to prior years.

Liquidity and Capital Resources

Overview

Our principal uses of capital in 2016 were acquisition and development of new and strategic lot positions, operating expenses, home construction and the payment of routine liabilities. In the first six months of 2016, we used funds generated by operations to meet our short-term working capital requirements. We remain focused on acquiring desirable land positions, generating increasing margins in our homebuilding operations and maintaining a strong balance sheet to support future needs and growth, while leveraging land options where possible.

Operating Cash Flow Activities

During the six months ended June 30, 2016 and June 30, 2015, net cash used in operations totaled \$110.6 million and \$76.9 million, respectively. Operating cash flows in both 2016 and 2015 benefited from cash generated by net earnings of \$60.8 million and \$45.5 million, respectively, offset mainly by the respective increases in real estate of \$194.0 million and \$144.5 million, respectively, reflecting increased land and land development spending.

Investing Cash Flow Activities

During the six months ended June 30, 2016, net cash used in investing activities totaled \$7.6 million as compared to \$8.0 million for the same period in 2015. Cash used in investing activities in 2016 and 2015 is mainly attributable to the purchases of property and equipment of \$7.6 million and \$7.8 million, respectively.

Financing Cash Flow Activities

During the six months ended June 30, 2016, net cash used in financing activities totaled \$15.8 million as compared to \$198.7 million net cash provided by financing activities for the same period in 2015. The net cash used in financing activities in 2016 is primarily the result of repayments of loans payable and other borrowings of \$15.5 million. Our 2015 results were mainly attributable to \$200.0 million in proceeds from the issuance of our 2025 senior notes.

Overview of Cash Management

Cash flows for each of our communities depend on their stage of the development cycle, and can differ substantially from reported earnings. Early stages of development or expansion require significant cash outlays for land acquisitions, zoning plat and other approvals, community and lot development, and construction of model homes, roads, utilities, landscape and other amenities. Because these costs are a component of our inventory and not recognized in our statement of operations until a home closes, we incur significant cash outlays prior to recognition of earnings. In the later stages of a community, cash inflows may significantly exceed earnings reported for financial statement purposes, as the cash outflow associated with home and land construction was previously incurred. From a liquidity standpoint, we are currently actively acquiring and developing lots in our markets to maintain and grow our lot supply and active community count. We are also using our cash on hand and draws under our Credit Facility, as needed, to fund operations in newer markets. As demand for new homes improves and we continue to expand our business, we expect cash outlays for land purchases, land development and home construction will continue to exceed our cash generated from operations in the near term.

During the six months ended June 30, 2016, we closed 3,438 homes, purchased about 3,800 lots for \$324.6 million, spent \$114.2 million on land development, paid \$37.0 million in lot purchase and option deposits, and started approximately 4,000 homes. The opportunity to purchase substantially finished lots in desired locations continues to be more limited and competitive as compared to prior years. As a result, we are purchasing more undeveloped land and partially-finished lots than in recent years and subsequently incurring development dollars in order to bring them to a finished status ready for home construction. We exercise strict controls and believe we have a prudent strategy for Company-wide cash management, including those related to cash outlays for land and inventory acquisition and development. We ended the second quarter of 2016 with \$128.2 million of cash and cash equivalents, a \$134.0 million decrease from December 31, 2015. We expect to generate cash from the sale of our inventory, but we intend to redeploy that cash to acquire and develop strategic and well-positioned lots to grow our business.

We believe that we currently have strong liquidity. Nevertheless, we may seek additional capital to strengthen our liquidity position, enable us to opportunistically acquire additional land inventory in anticipation of improving market conditions, and/or strengthen our long-term capital structure. Such additional capital may be in the form of equity or debt financing and may be from a variety of sources. There can be no assurances that we would be able to obtain such additional capital on terms acceptable to us, if at all, and such additional equity or debt financing could dilute the interests of our existing stockholders or increase our interest costs. Reference is made to Notes 5 and 6 in the accompanying unaudited consolidated financial statements.

We believe that our leverage ratios provide useful information to the users of our financial statements regarding our financial position and cash and debt management. Debt-to-capital and net debt-to-capital are calculated as follows (dollars in thousands):

	As of	
	June 30, 2016	December 31, 2015
Notes payable and other borrowings	\$1,114,035	\$1,117,040
Stockholders' equity	1,326,803	1,258,937
Total capital	\$2,440,838	\$2,375,977
Debt-to-capital ⁽¹⁾	45.6 %	47.0 %
Notes payable and other borrowings	\$1,114,035	\$1,117,040
Less: cash and cash equivalents	(128,171)	(262,208)
Net debt	985,864	854,832
Stockholders' equity	1,326,803	1,258,937
Total net capital	\$2,312,667	\$2,113,769
Net debt-to-capital ⁽²⁾	42.6 %	40.4 %

(1) Debt-to-capital is computed as senior and convertible senior notes and other borrowings divided by the aggregate of total senior and convertible senior notes and other borrowings and stockholders' equity.

Net debt-to-capital is computed as net debt divided by the aggregate of net debt and stockholders' equity. Net debt is total notes payable and other borrowings, less cash and cash equivalents. The most directly comparable GAAP (2) financial measure is the ratio of debt to total capital. We believe the ratio of net debt-to-capital is a relevant financial measure for investors to understand the leverage employed in our operations and as an indicator of our ability to obtain financing.

Credit Facility Covenants

Borrowings under the Credit Facility are unsecured but availability is subject to, among other things, a borrowing base. The Credit Facility also contains certain financial covenants, including (a) a minimum tangible net worth requirement of \$670.3 million (which amount is subject to increase over time based on subsequent earnings and proceeds from equity offerings), and (b) a maximum leverage covenant that prohibits the leverage ratio (as defined therein) from exceeding 60%. In addition, we are required to maintain either (i) an interest coverage ratio (EBITDA to interest expense, as defined therein) of at least 1.50 to 1.00 or (ii) liquidity (as defined therein) of an amount not less than our consolidated interest incurred during the trailing 12 months. We were in compliance with all Credit Facility covenants as of June 30, 2016. Our actual financial covenant calculations as of June 30, 2016 are reflected in the table below.

Financial Covenant (dollars in thousands):	Covenant Requirement	Actual
Minimum Tangible Net Worth	\$825,297	\$1,290,022
Leverage Ratio	<60%	41%
Interest Coverage Ratio ⁽¹⁾	>1.50	4.41
Minimum Liquidity ⁽¹⁾	>\$71,006	\$596,074
Investments other than defined permitted investments	<\$387,007	\$11,188

(1) We are required to meet either the Interest Coverage Ratio or Minimum Liquidity, but not both.

Off-Balance Sheet Arrangements

Reference is made to Notes 1, 3, 4, and 15 in the accompanying Notes to the unaudited consolidated financial statements included in this Quarterly Report on Form 10-Q. These Notes discuss our off-balance sheet arrangements with respect to land acquisition contracts and option agreements, and land development joint ventures, including the nature and amounts of financial obligations relating to these items. In addition, these Notes discuss the nature and amounts of certain types of commitments that arise in connection with the ordinary course of our land development and homebuilding operations, including commitments of land development joint ventures for which we might be

obligated.

38

Seasonality

Historically, we have experienced seasonal variations in our quarterly operating results and capital requirements. We typically take orders for more homes in the first half of the fiscal year than in the second half, which creates additional working capital requirements in the second and third quarters to build our inventories to satisfy seasonally higher deliveries in the second half of the year. We expect this seasonal pattern to continue over the long term.

Recently Issued Accounting Pronouncements

See Note 1 to our unaudited consolidated financial statements included in this report for discussion of recently issued accounting standards.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our fixed rate debt is made up primarily of \$175.0 million in principal of our 4.50% senior notes, \$300.0 million in principal of our 7.15% senior notes, \$300.0 million in principal of our 7.00% senior notes, \$200.0 million in principal of our 6.00% senior notes and \$126.5 million in principal of our 1.875% convertible senior notes. Except in limited circumstances, or upon the occurrence of specific trigger events for our convertible notes, we do not have an obligation to prepay our fixed-rate debt prior to maturity and, as a result, interest rate risk and changes in fair value should not have a significant impact on our fixed rate borrowings until we would be required to repay such debt. Our Credit Facility is subject to interest rate changes as the borrowing rates are based on LIBOR or PRIME (see Note 5 in the accompanying notes to the unaudited consolidated financial statements included in this Form 10-Q).

Our operations are interest rate sensitive. As overall housing demand is adversely affected by increases in interest rates, a significant increase in mortgage interest rates may negatively affect the ability of homebuyers to secure adequate financing. Higher interest rates could adversely affect our revenues, gross margins and net income and would also increase our variable rate borrowing costs. We do not enter into, or intend to enter into, derivative financial instruments for trading or speculative purposes.

Item 4. Controls and Procedures

In order to ensure that the information we must disclose in our filings with the SEC is recorded, processed, summarized and reported on a timely basis, we have developed and implemented disclosure controls and procedures. Our management, with the participation of our chief executive officer and chief financial officer, has reviewed and evaluated the effectiveness of our disclosure controls and procedures, as defined in Securities Exchange Act Rules 13a-15(e) and 15d-15(e), as of the end of the period covered by this Form 10-Q (the "Evaluation Date"). Based on such evaluation, management has concluded that, as of the Evaluation Date, our disclosure controls and procedures were effective in ensuring that information that is required to be disclosed in the reports we file or submit under the Securities Exchange Act of 1934 (the "Exchange Act") is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms, and that information required to be disclosed in our reports filed or submitted under the Exchange Act is accumulated and communicated to our management, including our CEO and CFO, as appropriate to allow timely decisions regarding required disclosure.

During the fiscal quarter covered by this Form 10-Q, there has not been any change in our internal control over financial reporting that has materially affected, or that is reasonably likely to materially affect, our internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

We are involved in various routine legal and regulatory proceedings, including, without limitation, claims and litigation alleging construction defects. In general, the proceedings are incidental to our business, and most exposure is subject to and should be covered by warranty and indemnity obligations of our consultants and subcontractors. Additionally, some such claims are also covered by insurance. With respect to the majority of pending legal proceedings, our ultimate legal and financial responsibility, if any, cannot be estimated with certainty and, in most cases, any potential losses related to these matters are not considered probable. Historically, most disputes regarding warranty claims are resolved prior to the initiation of legal proceedings. We believe there are not any pending legal or warranty matters that could have a material adverse impact upon our consolidated financial condition, results of operations or cash flows that have not been sufficiently reserved. Information related to pending legal proceedings is presented in Note 15 - Commitments on Contingencies, in the accompanying consolidated financial statements and is incorporated by reference herein.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2015, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks facing us. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may eventually prove to materially adversely affect our business, financial condition and/or operating results.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities:

We did not acquire any of our own equity securities during the three months ended June 30, 2016.

We have never declared cash dividends, nor do we intend to declare cash dividends in the foreseeable future. We plan to retain our cash to finance the continuing development of the business. Future cash dividends, if any, will depend upon financial condition, results of operations, capital requirements, compliance with certain restrictive debt covenants, as well as other factors considered relevant by our Board of Directors.

Item 6. Exhibits

Exhibit Number	Description	Page or Method of Filing
3.1	Restated Articles of Incorporation of Meritage Homes Corporation	Incorporated by reference to Exhibit 3 of Form 8-K dated June 20, 2002.
3.1.1	Amendment to Articles of Incorporation of Meritage Homes Corporation	Incorporated by reference to Exhibit 3.1 of Form 8-K dated September 15, 2004.
