## SPECIAL EDITION

### **Inco and Falconbridge to join forces to become Canadian-based global mining powerhouse**

*On October 11, 2005, Inco announced a friendly take-over offer to Falconbridge. If our offer to acquire all of the outstanding common shares of Falconbridge Limited is completed as planned, we will immediately become the world's largest nickel producer and a leading copper producer with great opportunities for growth in both metals.*

Combining these two great companies will give us greater global reach, more financial muscle and even stronger growth prospects than we had before in nickel and now in copper as well.

Our core belief has always been that nickel enjoys the best prospects of any metal. That remains true. But as Scott Hand has always said, if we could get into other metals that we know well, we would do it under the right circumstances.

Copper is a natural adjunct to our nickel business we believe that they are the two most attractive metals. Coupled with strong assets in aluminum and zinc, this combination creates tremendous opportunity for the future.

#### **You may be wondering...**

***Inco has been mentioned as a take-over target itself. Is this our way of preventing that?***

This acquisition stands on its own merits. The new Inco will be a stronger, larger and more diversified company with outstanding prospects in Canada and around the world. Together, we will have great projects and great properties to meet growing demand in nickel and copper, as well as the financial firepower to bring them on stream. Additionally, Falconbridge brings very good assets in aluminum and zinc. Given the metals prices that we're seeing, these operations should provide excellent cash flow to Inco.

***What happens next? Are the two companies now officially one?***

No, not right away. Falconbridge common shareholders will need to tender their shares so that our minimum bid condition of obtaining 2/3 of these shares will be met. Once made, our offer must remain open for Falconbridge shareholders for at least 60 days. We also require regulatory clearances from the authorities in Canada, the U.S. and the European Union.

***Who will run the new company?***

Scott Hand will be Chairman and CEO of the new Inco and Derek Pannell will be President. An integration team will look at a host of things related to the acquisition, including the new management structure. There are a number of committed and talented people in both organizations to lead the success of the new Inco going forward.

**We're back to keeping**

***We thank you for your patience as we move forward to get back in touch with you.***

### *The synergy factor*

**Synergy** (definition): Co-operative interaction among groups that creates an enhanced combined effect.

Inco and Falconbridge have said that combining the companies will produce some \$350 million annually in synergies. These synergies and cost savings will come from realizing efficiencies in overlapping operations better use of mining and processing facilities in Canada, improving procurement practices, building a common information technology base, incorporating best practices, and capital expenditure savings.

*An example of how this synergy can work for us:*

Right now, high-copper content ore from Inco's McCreedy East Mine in Levack travels many miles to Inco's mill in Sudbury. Nickel ore from Falconbridge's Thayer-Lindsley Mine in Sudbury travels the same lengthy route in reverse to the Falconbridge mill in Levack. By swapping the mill feeds, we will save on freight costs, reduce feed variability and improve mill recoveries.

### **Operations and Development Projects**

The new Inco will be more geographically diverse with operations, projects and offices in 28 countries and a marketing network that extends to over 40. The new company will become the world's leading nickel producer, eighth largest copper producer, third largest zinc producer, a leading cobalt producer, and will have 10 per cent of the United States aluminum market. The new company will also possess an enviable portfolio of growth projects and will be a Canadian-based, global mining leader.

### **Some employees respond to Scott Hand's announcement:**

*Thank you Scott, for keeping me up to speed on this issue. I am proud to be part of the new Inco and excited about our future in mining.*

**Bill SanCartier,**
