**Other Financial Data**

(Unaudited; in millions, except for ratios)

	<b>Nine Months Ended September 30,</b>	
	<b>2008</b>	<b>2009</b>
Adjusted OIBDA(1)	\$ 322.9	\$ 356.1
Adjusted OIBDA margin(2)	26%	22%
Existing business adjusted OIBDA(1)	\$ 436.3	\$ 530.9
Existing business adjusted OIBDA margin(2)	36%	41%
Ratio of earnings to fixed charges(3)		

- (1) Adjusted OIBDA is defined as operating income (loss) before depreciation and amortization, adjusted to exclude the effects of: gain/loss on sale/disposal of assets; impairment of assets; and share-based compensation expense (benefit). Existing business adjusted OIBDA further adjusts adjusted OIBDA to exclude total revenues attributable to our business operations in markets launched after December 31, 2007 and our Cricket Broadband service offering that were included in total revenues, and to add back operating expenses attributable to such activities that

were included in total operating expenses (other than depreciation and amortization and share-based compensation expense, which have already been added back to adjusted OIBDA). Generally, for purposes of calculating these measures, corporate-level and regional-level overhead expenses are allocated to our markets based on gross customer additions and weighted-average customers by market.

Adjusted OIBDA and existing business adjusted OIBDA are non-GAAP financial measures. Adjusted OIBDA and existing business adjusted OIBDA should not be construed as alternatives to operating income or net income as determined in accordance with GAAP, as alternatives to cash flows from operating activities as determined in accordance with GAAP or as measures of liquidity.

In a capital-intensive industry such as wireless

telecommunications, management believes that adjusted OIBDA and existing business adjusted OIBDA, as well as the associated percentage margin calculations, are meaningful measures of our operating performance. We use adjusted OIBDA and existing business adjusted OIBDA as supplemental performance measures because management believes they facilitate comparisons of our operating performance from period to period and comparisons of our operating performance to that of other companies by backing out potential differences caused by the age and book depreciation of fixed assets (affecting relative depreciation expenses) as well as the items described above for which additional adjustments were made. While depreciation and amortization are considered operating costs under GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or

constructed in prior periods. Because adjusted OIBDA and existing business adjusted OIBDA facilitate internal comparisons of our historical operating performance, management also uses these metrics for business planning purposes and to measure our performance relative to that of our competitors. In addition, we believe that adjusted OIBDA, existing business adjusted OIBDA, and similar measures are widely used by investors, financial analysts and credit rating agencies as measures of our financial performance over time and to compare our financial performance with that of other companies in our industry.

Adjusted  
OIBDA and  
existing  
business  
adjusted  
OIBDA have  
limitations as  
analytical tools,  
and should not  
be considered in  
isolation or as  
substitutes for  
analysis of our  
results as  
reported under  
GAAP. Some of  
these limitations  
include:

they do not reflect capital expenditures;

although they do not include depreciation and amortization, the assets being depreciated and amortized will often have to be replaced in the future, and adjusted OIBDA and existing business adjusted OIBDA do not reflect cash requirements for such replacements;

they do not reflect costs associated with share-based awards exchanged for employee services;

they do not reflect the interest expense necessary to service interest or principal payments on current future indebtedness;

they do not reflect expenses incurred for the payment of income taxes and other taxes; and

other companies, including companies in our industry, may calculate these measures differently than we do, limiting their usefulness as comparative measures.

Management  
understands  
these limitations  
and considers  
adjusted  
OIBDA and  
existing  
business  
adjusted  
OIBDA as  
financial  
performance  
measures that  
supplement but  
do not replace

the information provided to management by our GAAP results.

- (2) Adjusted OIBDA margin is calculated by dividing adjusted OIBDA by service revenues. Existing business adjusted OIBDA margin is calculated by dividing existing business adjusted OIBDA by existing business service revenues. The term existing business refers to our and our consolidated joint ventures business operations in markets in service on December 31, 2007, excluding any effects of our Cricket Broadband service. See Reconciliation of Non-GAAP Financial Measures below.
- (3) For purposes of calculating the ratio of earnings

to fixed charges,  
earnings  
represent  
income  
(loss) before  
income taxes,  
cumulative  
effect of change  
in accounting  
principle,  
accretion of  
redeemable  
noncontrolling  
interests, net of  
tax, and equity  
in net  
(income) loss of  
investee plus  
fixed charges  
and  
amortization of  
capitalized  
interest, less  
interest  
capitalized.

Fixed charges  
consist of  
interest expense,  
whether  
expensed or  
capitalized, and  
the interest  
portion of rental  
expense  
inherent in our  
operating leases.  
The portion of  
total rental  
expense that  
represents the  
interest factor is  
estimated to be  
33%. Our  
earnings were  
inadequate to  
cover fixed  
charges for the  
nine months  
ended  
September 30,  
2008 and 2009

by \$94.0 million  
and  
\$160.9 million,  
respectively.  
See Calculation  
of Ratio of  
Earnings to  
Fixed Charges  
below.
