**ARMSTRONG WORLD INDUSTRIES, INC.**

(Exact name of registrant as specified in its charter)

Pennsylvania

1-2116

23-0366390

(State or other jurisdiction of incorporation or organization)

Commission file number

(I.R.S. Employer Identification No.)

P. O. Box 3001, Lancaster, Pennsylvania

17604

(Address of principal executive offices)

(Zip Code)

Registrant's telephone number, including area code (717) 397-0611

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes  No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter time period that the registrant was required to submit and post such files). Yes  No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act (Check one):

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes  No

Indicate by check mark whether the registrant has filed all documents and reports required to be filed by Section 12, 13 or 15(d) of the Securities Exchange Act of 1934 subsequent to the distribution of securities under a plan confirmed by a court. Yes  No

Number of shares of Armstrong World Industries, Inc.'s common stock outstanding as of July 30, 2010 57,678,931.

**Uncertainties Affecting Forward-Looking Statements**

Our disclosures here and in other public documents and comments contain forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Those statements provide our future expectations or forecasts and can be identified by our use of words such as anticipate, estimate, expect, project, intend, plan, outlook, etc. in discussions of future operating or financial performance or the outcome of contingencies such as liabilities or legal proceedings.

Any of our forward-looking statements may turn out to be wrong. Actual results may differ materially from our expected results. Forward-looking statements involve risks and uncertainties (such as those discussed in the Risk Factors section below) because they relate to events and depend on circumstances that may or may not occur in the future. We undertake no obligation to update any forward-looking statement beyond what is required under applicable securities law.

**Risk Factors**

As noted in the introductory section titled **Uncertainties Affecting Forward-Looking Statements**, our business, operations and financial condition are subject to various risks. These risks should be taken into account in evaluating any investment decision involving Armstrong. It is not possible to predict or identify all factors that could cause actual results to differ materially from expected and historical results. The following discussion is a summary of what we believe to be our most significant risk factors. These and other factors could cause our actual results to differ materially from those in forward-looking statements made in this report.

We try to reduce both the likelihood that these risks will affect our businesses and their potential impact. However, no matter how accurate our foresight, how well we evaluate risks, and how effective we are at mitigating them, it is still possible that one of these problems or some other issue could have serious consequences for us, up to and including a materially adverse effect. See related discussions in this document and our other SEC filings for more details and subsequent disclosures.

**Our business is dependent on construction activity. Downturns in construction activity and global economic conditions, such as weak consumer confidence and weak credit markets, adversely affect our business and our profitability.**

Our businesses have greater sales opportunities when construction activity is strong and, conversely, have fewer opportunities when such activity declines. Commercial and residential construction activity tends to increase when economies are strong, interest rates are favorable, government spending is strong (including stimulus programs), and consumers are confident. However, the commercial and residential construction cycles do not move in tandem. When the economy is weak and access to credit is limited, customers, distributors and suppliers are at heightened risk of defaulting on their obligations. Since most of our sales are in the U.S., its economy is the most important for our business, but conditions in Europe, Canada and Asia also are significant. A prolonged economic downturn would exacerbate the adverse effect on our business, profitability, and the carrying value of assets.

**We require a significant amount of liquidity to fund our operations.**

Our liquidity needs vary throughout the year. There are no significant debt maturities until 2011 and 2013 under our existing senior credit facility. We believe that cash on hand and generated from operations will be adequate to address our foreseeable liquidity needs. If future operating performance declines significantly, we cannot assure that our business will generate sufficient cash flow from operations to fund our needs or to remain in compliance with our debt covenants.

**Table of Contents**

**Our markets are highly competitive. Competition can reduce demand for our products or cause us to lower prices. Failure to compete effectively by meeting consumer preferences and/or maintaining market share would adversely affect our results.**

Our customers consider our products' performance, product styling, customer service and price when deciding whether to purchase our products. Shifting consumer preference in our highly competitive markets, e.g. from residential vinyl products to other flooring products, styling preferences or inability to offer new competitive performance features could hurt our sales. For certain products there is excess industry capacity in several geographic markets, which tends to increase price competition, as does competition from overseas competitors with lower cost structures.

**If the availability of raw materials and energy decreases, or the costs increase, and we are unable to pass along increased costs, our operating results could be adversely affected.**

The cost and availability of raw materials, packaging materials, energy and sourced products are critical to our operations. For example, we use substantial quantities of natural gas, petroleum-based raw materials, hardwood lumber and mineral fiber in our manufacturing operations. The cost of some items has been volatile in recent years and availability sometimes has been tight. We source some materials from a limited number of suppliers, which, among other things, increases the risk of unavailability. Limited availability could cause us to reformulate products or to limit our production. The impact of increased costs is greatest where our ability to pass along increased costs through price increases on our products is limited, whether due to competitive pressures or other factors.

**Reduction in sales to key customers could have a material adverse effect on our revenues and profits.**

Some of our businesses are dependent on a few key customers such as The Home Depot, Inc. and Lowe's Companies, Inc. The loss of sales to one of these major customers, or changes in our business relationship with them, could hurt both our revenues and profits.

**Changes in the political, regulatory and business environments of our international markets, including changes in trade regulations and currency exchange fluctuations, could have an adverse effect on our business.**

A significant portion of our products move in international trade, particularly among the U.S., Canada, Europe and Asia. Also, approximately 30% of our annual revenues are from operations outside the U.S. Our international trade is subject to currency exchange fluctuations, trade regulations, import duties, logistics costs and delays and other related risks. Our international operations are also subject to variable tax rates, credit risks in emerging markets, political risks, uncertain legal systems, potential restrictions on repatriating profits to the U.S., and loss of sales to local competitors following currency devaluations in countries where we import products for sale.

**Capital investments and restructuring actions may not achieve expected savings in our operating costs.**

We look for ways to make our operations more efficient and effective. We reduce, move and expand our plants and operations as needed. Each action generally involves substantial planning and capital investment. We can err in planning and executing our actions, which could hurt our customer service and cause unplanned costs.

**Labor disputes or work stoppages could hurt production and reduce sales and profits.**

Most of our manufacturing employees are represented by unions and are covered by collective bargaining or similar agreements that must be periodically renegotiated. Although we anticipate that we will reach new contracts as current ones expire, our negotiations may result in a significant increase in our costs. Failure to reach new contracts could lead to work stoppages, which could hurt production, revenues, profits and customer relations.

**Table of Contents**

**Adverse judgments in regulatory actions, product claims and other litigation could be costly. Insurance coverage may not be available or adequate in all circumstances.**

While we strive to ensure that our products comply with applicable government regulatory standards and internal requirements, and that our products perform effectively and safely, customers from time to time could claim that our products do not meet contractual requirements, and users could claim to be harmed by use or misuse of our products. This could give rise to breach of contract, warranty or recall claims, or claims for negligence, product liability, strict liability, personal injury or property damage. The building materials industry has been subject to claims relating to silicates, mold, PCBs, PVC, formaldehyde, toxic fumes, fire-retardant properties and other issues, as well as for incidents of catastrophic loss, such as building fires. Product liability insurance coverage may not be available or adequate in all circumstances. In addition, claims may arise related to patent infringement, environmental liabilities, distributor terminations, commercial contracts, antitrust or competition law, employment law and employee benefits issues, and other regulatory matters. While we have in place processes and policies to mitigate these risks and to investigate and address such claims as they arise, we cannot predict the costs to defend or resolve such claims. We are subject to regulatory requirements regarding protection of the environment. Current and future environmental laws and regulations, including those proposed concerning climate change, could increase our cost of compliance, cost of energy, or otherwise materially adversely affect our business, results of operations and financial condition.

**Our principal shareholders could significantly influence our business and our affairs.**

The Armstrong World Industries, Inc. Asbestos Personal Injury Settlement Trust ( Asbestos PI Trust ), formed in 2006 as part of AWI s emergence from bankruptcy, and Armor TPG Holdings LLC ( TPG ) together hold more than 60% of the Company s outstanding shares and have entered into a shareholders agreement pursuant to which the Asbestos PI Trust and TPG have agreed to vote their shares together on certain matters. Such a large percentage of ownership could result in below average equity market liquidity and affect matters which require approval by our shareholders.

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

**NOTE 1. BUSINESS AND BASIS OF PRESENTATION**

Armstrong World Industries, Inc. ( AWI ) is a Pennsylvania corporation incorporated in 1891. When we refer to we , our and us in this report, we are referring to AWI and its subsidiaries.

In December 2000, AWI filed a voluntary petition for relief ( the Filing ) under Chapter 11 of the U.S. Bankruptcy Code ( the Bankruptcy Code ) in the United States Bankruptcy Court for the District of Delaware ( the Bankruptcy Court ) in order to use the court-supervised reorganization process to achieve a resolution of AWI s asbestos-related liability. Also filing under Chapter 11 were two of AWI s wholly-owned subsidiaries, Nitram Liquidators, Inc. ( Nitram ) and Desseaux Corporation of North America, Inc. ( Desseaux ). On October 2, 2006, AWI s court-approved Plan of Reorganization ( POR ) became effective, and AWI emerged from Chapter 11. See Note 1 to our 2009 Form 10-K for more information on the Chapter 11 Case.

In August 2009 Armor TPG Holdings LLC ( TPG ) and the Armstrong World Industries, Inc. Asbestos Personal Injury Settlement Trust ( Asbestos PI Trust ) entered into agreements whereby TPG purchased 7,000,000 shares of AWI common stock from the Asbestos PI Trust, and acquired an economic interest in an additional 1,039,777 shares from the Asbestos PI Trust. The Asbestos PI Trust and TPG together hold more than 60% of AWI s outstanding shares and have entered into a shareholders agreement pursuant to which the Asbestos PI Trust and TPG have agreed to vote their shares together on certain matters.

The accounting policies used in preparing the Condensed Consolidated Financial Statements in this Form 10-Q are the same as those used in preparing the Consolidated Financial Statements for the year ended December 31, 2009, except as noted below. These statements should therefore be read in conjunction with the Consolidated Financial Statements and notes that are included in the Form 10-K for the fiscal year ended December 31, 2009. In the opinion of management, all adjustments of a normal recurring nature have been included to provide a fair statement of the results for the reporting periods presented. Quarterly results are not necessarily indicative of annual earnings, primarily due to the different level of sales in each quarter of the year and the possibility of changes in general economic conditions. These Condensed Consolidated Financial Statements are prepared in accordance with U.S. generally accepted accounting principles ( U.S. GAAP ). The statements include management estimates and judgments, where appropriate. Management utilizes estimates to record many items including asset values, allowances for bad debts, inventory obsolescence and lower of cost or market charges, warranty, workers compensation, general liability, income taxes and environmental claims. When preparing an estimate, management determines the amount based upon the consideration of relevant information. Management may confer with outside parties, including outside counsel. Actual results may differ from these estimates.

In June 2009 the Financial Accounting Standard Board ( FASB ) issued new guidance, which is now part of Accounting Standards Codification ( ASC ) 810, *Consolidations* , which amends the consolidation guidance applicable to variable interest entities. These provisions were effective for us as of January 1, 2010. There was no material impact on our financial statements from the adoption of this guidance.

In January 2010 the FASB issued new guidance, which is now part of ASC 820, *Fair Value Measurements and Disclosures* . The new guidance requires disclosures of the amounts of assets and liabilities transferred into and out of Levels 1 and 2, along with a description of the reasons for the transfers. The new guidance also requires additional disclosures related to activity presented for Level 3 measurements. These provisions were effective for us as of January 1, 2010 except for the additional disclosures related to activities for Level 3 measurements which are effective for us as of January 1, 2011. There was no impact on our financial statements from the adoption of this guidance.

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

In March 2010 the FASB issued new guidance, which is now part of ASC 815, *Derivatives and Hedging*. The new guidance clarifies the scope exception for embedded credit related derivatives. The provisions are effective for us as of January 1, 2011. We do not expect a material impact on our financial statements from the adoption of this guidance. Operating results for the second quarter and first six months of 2010 and the corresponding periods of 2009 included in this report are unaudited. However, these Condensed Consolidated Financial Statements have been reviewed by an independent registered public accounting firm in accordance with standards of the Public Company Accounting Oversight Board (United States) for a limited review of interim financial information.

Resilient Flooring	\$ 636.2	\$ 645.2
Wood Flooring	382.8	410.3
Building Products	942.4	966.0
Cabinets	56.4	53.2
Total segment assets	2,017.8	2,074.7
Assets not assigned to segments	1,238.5	1,227.9
Total consolidated assets	\$ 3,256.3	\$ 3,302.6

Impairment testing of our tangible assets occurs whenever events or changes in circumstances indicate that the carrying amount of the assets may not be recoverable. During the first quarter of 2010, management decided to exit our corporate flight operations. As a result, we recorded a \$3.1 million impairment charge in selling, general and administrative ( SG&A ) expense for corporate aircraft in the first quarter of 2010. The fair values were determined by management estimates of market prices based upon information available at that time. This data included recent sales of similar equipment and historical appraisal information (considered Level 3 inputs in the fair value hierarchy as described in Note 13).

During the second quarter of 2010 we received additional information regarding the estimated fair value for our flight operations assets. As a result we recorded an additional \$3.0 million impairment charge in SG&A expense in the second quarter of 2010. The fair values were determined by management estimates and an independent valuation. The valuation information included recent sales of similar equipment and estimates of market prices (considered Level 2 inputs in the fair value hierarchy) for these assets.

We also recorded an asset impairment charge of \$2.1 million in the second quarter of 2010 in SG&A expense for a European Resilient Flooring warehouse facility due to the recent decline in the commercial property sector. This asset was also transferred from an asset held for sale to property, plant and equipment. Due to market conditions it is not probable that a sale of the property will occur within twelve months. The fair values were determined by management estimates of market prices. This data included recent sales and leases of comparable properties within similar real estate markets (considered Level 3 inputs in the fair value hierarchy).

During the first quarter of 2010, we also announced that one of our European metal ceilings manufacturing facilities would be shutdown in the second quarter of 2010, which prompted us to perform an impairment test for this asset group. The carrying amount of the tangible assets were determined to be recoverable as the projected undiscounted cash flows exceeded the carrying value.

**NOTE 3. ACQUISITIONS**

As of December 31, 2009, we owned 80% of our Shanghai ceiling operations. During the first quarter of 2010, we completed the acquisition of the remaining 20% with additional cash payments of \$7.8 million. We recorded the difference between the purchase price and the net book value of the net equity acquired within capital in excess of par value.

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

**NOTE 4. ACCOUNTS AND NOTES RECEIVABLE**

	June 30, 2010	December 31, 2009
Customer receivables	\$ 315.1	\$ 269.3
Customer notes	1.9	2.5
Miscellaneous receivables	6.7	5.6
Less allowance for discounts and losses	(43.1)	(48.3)
Accounts and notes receivable, net	\$ 280.6	\$ 229.1

The increase in accounts and notes receivable, net is primarily due to higher sales in June 2010 than in December 2009.

Generally, we sell our products to select, pre-approved customers whose businesses are affected by changes in economic and market conditions. We consider these factors and the financial condition of each customer when establishing our allowance for losses from doubtful accounts.

**NOTE 5. INVENTORIES**

	June 30, 2010	December 31, 2009
Finished goods	\$ 284.7	\$ 281.0
Goods in process	31.8	36.2
Raw materials and supplies	106.8	134.4
Less LIFO and other reserves	(13.9)	(6.6)
Total inventories, net	\$ 409.4	\$ 445.0

**NOTE 6. OTHER CURRENT ASSETS**

	June 30, 2010	December 31, 2009
Prepaid expenses	\$ 27.4	\$ 36.0
Fair value of derivative assets	3.3	0.2
Assets held for sale		7.8
Other	15.2	11.2
Total other current assets	\$ 45.9	\$ 55.2

During the second quarter of 2010 we reclassified certain property from asset held for sale to property, plant and equipment. Due to market conditions it is not probable that a sale of the property will occur within twelve months.

(dollar amounts in millions)

**NOTE 7. EQUITY INVESTMENT**

Investment in joint venture of \$196.0 million at June 30, 2010 reflected the equity interest in our 50% investment in our Worthington Armstrong Venture ( WAVE ) joint venture. We account for our WAVE joint venture using the equity method of accounting. Our recorded investment in WAVE was higher than our 50% share of the carrying values reported in WAVE s consolidated financial statements. These differences are due to our adopting fresh-start reporting upon emerging from Chapter 11 in 2006, while WAVE s consolidated financial statements do not reflect fresh-start reporting. See Note 10 Equity Investments in our 2009 Form 10-K for more information. Condensed income statement data for WAVE is summarized below:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Net sales	\$ 92.2	\$ 81.3	\$ 169.4	\$ 156.6
Gross profit	39.5	31.2	72.4	55.1
Net earnings	31.6	24.2	56.8	41.1

**NOTE 8. INTANGIBLE ASSETS**

The following table details amounts related to our intangible assets as of June 30, 2010 and December 31, 2009.

	Estimated Useful Life	June 30, 2010		December 31, 2009	
		Gross Carrying Amount	Accumulated Amortization	Gross Carrying Amount	Accumulated Amortization
Amortizing intangible assets					
Customer relationships	20 years	\$ 171.0	\$ 32.0	\$ 171.0	\$ 27.7
Developed technology	15 years	80.9	20.2	80.9	17.5
Other	Various	11.6	0.6	10.8	0.5
<b>Total</b>		<b>\$ 263.5</b>	<b>\$ 52.8</b>	<b>\$ 262.7</b>	<b>\$ 45.7</b>

## Non-amortizing intangible assets

Trademarks and brand names	Indefinite	375.9	375.8
----------------------------	------------	-------	-------

<b>Total other intangible assets</b>		<b>\$ 639.4</b>	<b>\$ 638.5</b>
--------------------------------------	--	-----------------	-----------------

	Six months ended June 30,	
	2010	2009
Amortization expense	\$ 7.1	\$ 7.2

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

**NOTE 9. ACCOUNTS PAYABLE AND ACCRUED EXPENSES**

	June 30, 2010	December 31, 2009
Payables, trade and other	\$ 196.2	\$ 159.6
Employment costs	112.8	107.2
Other	44.0	44.2
 Total accounts payable and accrued expenses	 \$ 353.0	 \$ 311.0

**NOTE 10. SEVERANCES AND RELATED COSTS**

In the second quarter of 2010, we recorded \$4.1 million of severance and related expenses for employees impacted by the closure of a European metal ceilings manufacturing facility and by the elimination of 75 other manufacturing and SG&A positions around the world.

In the first quarter of 2010, we recorded \$11.2 million in SG&A expense for severance and related expenses to reflect the separation costs for our former Chairman and Chief Executive Officer. In accordance with the separation agreement, payment is expected to be made in the third quarter of 2010.

During the first quarter of 2010, we announced the shutdown of finished goods production at two Wood Flooring plants and the restarting of certain operations at a previously idled Wood Flooring plant. We recorded \$2.8 million of severance and related expenses in the first quarter for approximately 425 employees impacted by these actions. The charges were recorded in cost of goods sold.

In the first quarter of 2009, we recorded \$8.9 million of severance and related expenses to reflect the separation costs for approximately 800 employees. The charges were recorded in SG&A (\$4.5 million) and cost of goods sold (\$4.4 million).

**NOTE 11. INCOME TAX EXPENSE**

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2010	2009	2010	2009
Earnings before income taxes	\$ 49.4	\$ 43.0	\$ 59.6	\$ 40.6
Income tax expense	22.6	14.7	52.2	23.5
Effective tax rate	45.7%	34.2%	87.6%	57.9%

The effective tax rate for the second quarter of 2010 was higher than the comparable period of 2009 due to the recognition of a previously unrecognized tax benefit in 2009.

The effective tax rate for the first six months of 2010 was higher than the first six months of 2009 due to the enactment of the healthcare reform legislation in March 2010 and the recognition of a previously unrecognized tax benefit in 2009, partially offset by a lower amount of unbenefitted foreign losses in 2010.

During March 2010, President Obama signed into law comprehensive health care reform legislation under the Patient Protection and Affordable Care Act and the Health Care and Education Reconciliation Act of 2010 (together, the Act). The federal government currently provides a partial subsidy, on a tax-free basis, to companies that provide certain retiree prescription drug benefits (the Medicare Part D subsidy). The Act reduces the tax deductibility of retiree health costs to the extent of any Medicare Part D subsidy received beginning in 2013. As a result of this change in tax treatment, we recorded a non-cash income

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

tax charge of \$21.6 million in the first quarter of 2010. We also recorded a decrease of \$16.1 million to non-current deferred tax assets and accumulated other comprehensive income that was related to an adjustment to the non-subsidized portion of our postretirement benefit liabilities. These items, together with decreases in other deferred income tax assets, resulted in a reduction to non-current deferred tax assets of \$57.6 million during the first six months of 2010.

We do not expect to record any material changes during 2010 to unrecognized tax benefits that were claimed on tax returns covering tax years which ended on or before December 31, 2009.

**NOTE 12. PENSIONS AND OTHER BENEFIT PROGRAMS**

Following are the components of net periodic benefit costs (credits):

	Three Months Ended June 30		Six Months Ended June 30	
	2010	2009	2010	2009
U.S. defined-benefit plans:				
Pension benefits				
Service cost of benefits earned during the period	\$ 4.1	\$ 4.5	\$ 8.2	\$ 9.0
Interest cost on projected benefit obligation	24.1	24.0	48.2	48.0
Expected return on plan assets	(41.7)	(42.8)	(83.5)	(85.6)
Amortization of prior service cost	0.4	0.4	0.9	0.9
Amortization of net actuarial loss	1.0		2.1	
Net periodic pension (credit)	\$ (12.1)	\$ (13.9)	\$ (24.1)	\$ (27.7)
Retiree health and life insurance benefits				
Service cost of benefits earned during the period	\$ 0.6	\$ 0.4	\$ 1.2	\$ 0.9
Interest cost on projected benefit obligation	3.7	4.2	7.4	8.3
Amortization of net actuarial gain	(1.6)	(1.1)	(3.2)	(2.2)
Net periodic postretirement benefit cost	\$ 2.7	\$ 3.5	\$ 5.4	\$ 7.0
Non-U.S. defined-benefit pension plans				
Service cost of benefits earned during the period	\$ 1.3	\$ 1.2	\$ 2.7	\$ 2.4
Interest cost on projected benefit obligation	4.5	4.7	9.1	9.3
Expected return on plan assets	(3.3)	(3.2)	(6.7)	(6.2)
Amortization of net actuarial loss (gain)	0.1	(0.2)	0.2	(0.5)
Net periodic pension cost	\$ 2.6	\$ 2.5	\$ 5.3	\$ 5.0

We previously disclosed in our consolidated financial statements for the year ended December 31, 2009 that we expected to contribute \$17.6 million to our non-U.S. defined benefit pension plans in 2010. As of June 30, 2010, \$13.5 million of contributions have been made. We presently estimate that we will need to contribute an additional \$8.7 million to fund our non-U.S. defined benefit pension plans in 2010 for a total of \$22.2 million.

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

**NOTE 13. FINANCIAL INSTRUMENTS**

We do not hold or issue financial instruments for trading purposes. The estimated fair values of our financial instruments are as follows:

	June 30, 2010		December 31, 2009	
	Carrying amount	Estimated Fair Value	Carrying amount	Estimated Fair Value
Assets/(liabilities):				
Money market investments	\$ 294.6	\$ 294.6	\$ 250.1	\$ 250.1
Total debt, including current portion	(458.5)	(446.3)	(472.5)	(462.1)
Foreign currency derivative contracts	0.2	0.2	(4.1)	(4.1)
Natural gas contracts	(4.5)	(4.5)	(4.6)	(4.6)

The carrying amounts of cash and cash equivalents of \$599.9 million (which consists of money market investments totaling \$294.6 million and bank deposits totaling \$305.3 million at June 30, 2010), receivables, accounts payable and accrued expenses, short-term debt and current installments of long-term debt approximate fair value because of the short-term maturity of these instruments. The fair value estimates of long-term debt were based upon quotes from a major financial institution of recently observed trading levels of our Term Loan B debt. The fair value estimates of foreign currency contract obligations are estimated from market quotes provided by a well recognized national market data provider. The fair value estimates of natural gas contracts are estimated by using internal valuation models with verification by obtaining quotes from major financial institutions. For swap transactions, fair value is verified using NYMEX market quotes provided by a well recognized national market data provider. For option based strategies, fair value is verified using an industry standard Black-Scholes model with market based inputs, including but not limited to, underlying asset price, strike price, implied volatility, discounted risk free rate and time to expiration, provided by a well recognized national market data provider.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants at the measurement date. U.S. GAAP establishes a three-level fair value hierarchy that prioritizes the inputs used to measure fair value. The three levels of inputs used to measure fair value are as follows:

Level 1 Quoted prices in active markets for identical assets or liabilities.

Level 2 Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities. This includes certain pricing models, discounted cash flow methodologies and similar techniques that use significant unobservable inputs.

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

Assets and liabilities measured at fair value on a recurring basis are summarized below:

	June 30, 2010		December 31, 2009	
	Fair value based on		Fair value based on	
	Quoted, active markets Level 1	Other observable inputs Level 2	Quoted, active markets Level 1	Other observable inputs Level 2
Assets/(liabilities):				
Money market investments	\$ 294.6		\$ 250.1	
Foreign currency derivative contracts	0.2		(4.1)	
Natural gas contracts		\$ (4.5)		\$ (4.6)

We do not have any financial assets or liabilities that are valued using Level 3 (unobservable) inputs.

**NOTE 14. DERIVATIVE FINANCIAL INSTRUMENTS**

We are exposed to market risk from changes in foreign exchange rates, interest rates and commodity prices that could impact our results of operations and financial condition. We use forward swaps and option contracts to hedge these exposures. Exposure to individual counterparties is controlled and derivative financial instruments are entered into with a diversified group of major financial institutions. Forward swaps and option contracts are entered into for periods consistent with underlying exposure and do not constitute positions independent of those exposures. At inception, we formally designate and document our derivatives as either (1) a hedge of a forecasted transaction or cash flow hedge, or (2) a hedge of the fair value of a recognized liability or asset or fair value hedge. We also formally assess both at inception and at least quarterly thereafter, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in either the fair value or cash flows of the hedged item. If it is determined that a derivative ceases to be a highly effective hedge, or if the anticipated transaction is no longer probable of occurring, we discontinue hedge accounting, and any future mark-to-market adjustments are recognized in earnings. We use derivative financial instruments as risk management tools and not for speculative trading purposes.

**Counter Party Risk**

We only enter into derivative transactions with established counterparties having a credit rating of A or better. We monitor counterparty credit default swap levels and credit ratings on a regular basis. All of our derivative transactions with counterparties are governed by master International Swap Dealer Agreements (ISDA's) with netting arrangements. These agreements can limit our exposure in situations where we have gain and loss positions outstanding with a single counterparty. We generally do not post nor receive cash collateral with any counterparty for our derivative transactions. As of June 30, 2010, we had no cash collateral posted or received for any of our derivative transactions. These ISDA agreements do not have any credit contingent features; however, a default under our bank credit facility would trigger a default under these agreements. Exposure to individual counterparties is controlled, and thus we consider the risk of counterparty default to be negligible.

**Commodity Price Risk** We purchase natural gas for use in the manufacture of ceiling tiles and other products, and to heat many of our facilities. As a result, we are exposed to movements in the price of natural gas. We have a policy to reduce cost volatility for North American natural gas purchases by purchasing natural gas forward contracts and swaps, purchased call options, and zero-cost collars up to 15 months forward to reduce our overall exposure to natural gas price movements. There is a high correlation between the hedged item and the hedged instrument. The gains and losses on these

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

transactions offset gains and losses on the transactions being hedged. These instruments are designated as cash flow hedges. At June 30, 2010 and December 31, 2009 the notional amount of these hedges was 3.2 million and 4.6 million British thermal units ( mmBtus ), respectively. The mark-to-market gain or loss on qualifying hedges is included in other comprehensive income to the extent effective, and reclassified into cost of goods sold in the period during which the underlying gas is consumed. The mark-to-market gains or losses on ineffective portions of hedges are recognized in cost of goods sold immediately. The earnings impact of the ineffective portion of these hedges was not material during the second quarter or first six months of 2010 and 2009. The contracts are based on forecasted usage of natural gas measured in mmBtu s.

In June 2009, we de-designated several monthly natural gas hedge contracts maturing in 2010 due to their over hedged positions. The over hedged positions were due to updated projected production volumes (and gas usage) at our U.S. ceilings plants that were significantly lower than originally forecasted when we entered into the hedges. We discontinued hedge accounting on the hedges and re-designated a portion of the original contracts based upon our revised forecasts, which were designated as cash flow hedges. Starting in July 2009 the fair value adjustments for the portion of the derivative contracts not designated as a hedge have been recognized in cost of goods sold. The earnings impact related to the over hedged portion of these hedges was not material for the second quarter or first six months of 2010.

**Currency Rate Risk**

**Sales and Purchases** We manufacture and sell our products in a number of countries throughout the world and, as a result we are exposed to movements in foreign currency exchange rates. To a large extent, our global manufacturing and sales provide a natural hedge of foreign currency exchange rate movement, as foreign currency expenses generally offset foreign currency revenues. We manage our cash flow exposures on a net basis and use derivatives to hedge the majority of our unmatched foreign currency cash inflows and outflows. As of June 30, 2010, our major foreign currency exposures are to the Canadian dollar, the Euro, and the Australian dollar.

We use foreign currency forward exchange contracts to reduce our exposure to the risk that the eventual net cash inflows and outflows resulting from the sale of products to foreign customers and purchases from foreign suppliers will be adversely affected by changes in exchange rates. These derivative instruments are used for forecasted transactions and are classified as cash flow hedges. Cash flow hedges are executed quarterly generally up to 15 months forward and allow us to further reduce our overall exposure to exchange rate movements, since gains and losses on these contracts offset gains and losses on the transactions being hedged. The notional amount of these hedges was \$175.4 million and \$86.7 million at June 30, 2010 and December 31, 2009, respectively. Gains and losses on these instruments are recorded in other comprehensive income, to the extent effective, until the underlying transaction is recognized in earnings. The earnings impact of the ineffective portion of these hedges was not material during the second quarter or first six months of 2010 and 2009.

**Intercompany Loan Hedges** We also use foreign currency forward exchange contracts to hedge exposures created by cross-currency intercompany loans. The underlying intercompany loans are classified as short-term and translation adjustments related to these loans are recorded in other non-operating income or expense. The offsetting gains or losses on the related derivative contracts are also recorded in other non-operating income or expense. These contracts are decreased or increased as repayments are made or additional intercompany loans are extended. The notional amount of these hedges was \$34.8 million and \$8.3 million at June 30, 2010 and December 31, 2009, respectively.

(dollar amounts in millions)

**NOTE 15. PRODUCT WARRANTIES**

We provide direct customer and end-user warranties for our products. These warranties cover manufacturing defects that would prevent the product from performing in line with its intended and marketed use. The terms of these warranties vary by product and generally provide for the repair or replacement of the defective product. We collect and analyze warranty claims data with a focus on the historic amount of claims, the products involved, the amount of time between the warranty claims and their respective sales and the amount of current sales. The following table summarizes the activity for the accrual of product warranties for the first six months of 2010 and 2009:

	2010	2009
Balance at January 1	\$ 14.1	\$ 16.3
Reductions for payments	(8.9)	(10.2)
Current year warranty accruals	8.6	10.4
Preexisting warranty accrual changes	(0.2)	(0.2)
Effects of foreign exchange translation	(0.4)	(0.1)
 Balance at June 30	 \$ 13.2	 \$ 16.2

The warranty provision and related reserve are recorded as a reduction of sales and accounts receivable.

**NOTE 16. SUPPLEMENTAL CASH FLOW INFORMATION**

	Six Months Ended June 30,	
	2010	2009
Interest paid	\$ 4.4	\$ 5.8
Income taxes paid, net	\$ 9.0	\$ 6.9

**NOTE 17. LITIGATION AND RELATED MATTERS****ENVIRONMENTAL MATTERS****Environmental Expenditures**

Our manufacturing and research facilities are affected by various federal, state and local requirements relating to the discharge of materials and the protection of the environment. We make expenditures necessary for compliance with applicable environmental requirements at each of our operating facilities. Regulatory requirements continually change, therefore we cannot predict with certainty future expenditures associated with compliance with environmental requirements.

**Environmental Remediation****Summary**

We are actively involved in proceedings under the Comprehensive Environmental Response, Compensation and Liability Act ( CERCLA ), and similar state Superfund laws at three off-site locations. We have also been investigating and/or remediating environmental contamination allegedly resulting from past industrial activity at three domestic and three foreign current or former plant sites. In a few cases, we are one of several potentially responsible parties ( PRPs ) which have potential liability for the required investigation and remediation of each site. In those cases, we have agreed to jointly fund that required investigation and remediation, while preserving our defenses to the liability. We may also have rights of contribution or reimbursement from other parties or coverage under applicable insurance policies.

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

Estimates of our future environmental liability at the Superfund sites and current or former plant sites are based on evaluations of currently available facts regarding each individual site and consider factors such as our activities in conjunction with the site, existing technology, presently enacted laws and regulations and prior company experience in remediating contaminated sites. Although current law imposes joint and several liability on all parties at Superfund sites, our contribution to the remediation of these sites is expected to be limited by the number of other companies potentially liable for site remediation. As a result, our estimated liability reflects only our expected share. In determining the probability of contribution, we consider the solvency of other parties, whether liability is being disputed, the terms of any existing agreements and experience with similar matters, and the impact of AWI's emergence from Chapter 11 upon the validity of the claim.

*Specific Events*

AWI is subject to an order of the Oregon Department of Environmental Quality ( ODEQ ) to investigate and remediate hazardous substances present at its St. Helens, Oregon facility, which was previously owned by Kaiser Gypsum Company, Inc. ( Kaiser ) and then Owens Corning Fiberglas Corp. ( OC ). Costs and responsibilities for the remedial investigation and remedy design are being shared with Kaiser pursuant to an agreement between AWI and Kaiser. Contributions to these costs are also being made available by ODEQ pursuant to its settlement with OC for OC's liabilities for the property. ODEQ subsequently approached the parties to perform investigations in Scappoose Bay ( the Bay ) adjacent to the St. Helens, Oregon facility. AWI has denied liability for any contamination in the Bay. In January 2010, ODEQ requested Environmental Protection Agency ( EPA ) evaluation of the site, which could lead to listing on the federal National Priorities List. Kaiser, AWI, and OC are currently in negotiations with ODEQ to address the requested investigations of the Bay. The parties are also discussing the appropriate allocation amongst themselves of future costs associated with the requested Bay investigations.

The federal EPA has informed AWI that later this year it will propose a portion of AWI's facility in Macon, Georgia, along with the former Macon Naval Ordnance Plant landfill, adjacent to the AWI property, and portions of Rocky Creek ( Macon Site ) be added to the National Priorities List due to the presence of contaminants, most notably PCBs. AWI is negotiating with the EPA to investigate and remedy related contamination in a portion of the Macon Site. AWI will incur field investigation, engineering, and legal costs associated with the St. Helens and Macon Sites. However, we are not currently able to estimate with reasonable certainty the amounts we may ultimately incur with respect to these Sites, although such amounts may be material.

*Summary of Financial Position*

Liabilities of \$5.4 million and \$6.3 million at June 30, 2010 and December 31, 2009, respectively, were recorded for potential environmental liabilities that we consider probable and for which a reasonable estimate of the probable liability could be made. Where existing data is sufficient to estimate the liability, that estimate has been used; where only a range of probable liabilities is available and no amount within that range is more likely than any other, the lower end of the range has been used. As assessments and remediation activities progress at each site, these liabilities are reviewed to reflect new information as it becomes available. These liabilities are undiscounted.

The estimated liabilities above do not take into account any claims for recoveries from insurance or third parties. It is our policy to record probable recoveries that are either available through settlement or anticipated to be recovered through negotiation or litigation as assets in the Condensed Consolidated Balance Sheets. No amounts were recorded for probable recoveries at June 30, 2010 and December 31, 2009.

**Table of Contents**

Armstrong World Industries, Inc., and Subsidiaries  
Notes to Condensed Consolidated Financial Statements (Unaudited)  
(dollar amounts in millions)

Actual costs to be incurred at identified sites may vary from our estimates. Based on our current knowledge of the identified sites, we are not able to estimate with reasonable certainty future costs which may exceed amounts already recognized.

**CUSTOMS LITIGATION**

Beginning in 2002, we began protesting the classification and 6% duty rate then being applied by the U.S. government on imports of our laminate flooring. After administrative denial of several of these protests, we filed a lawsuit against the United States in the U.S. Court of International Trade (New York), challenging the U.S. government's classification and duty rate and its administrative denial of our protests. With the agreement of the U.S. Department of Justice ( DOJ ), Armstrong's case was placed on the reserve calendar pending resolution of two test cases challenging the classification and applicable duty rate of similar laminate flooring. The test cases were decided in 2008 by the U.S. Court of International Trade, which found in favor of the U.S. government. The plaintiffs appealed to the U.S. Court of Appeals for the Federal Circuit. In September 2009 the Court of Appeals reversed the decisions of the Court of International Trade and found that the laminate flooring in the test cases should have been classified differently, and that a 3.2% duty rate should have been applied. Upon expiration of the U.S. government's period to file notice of further appeals, we filed a stipulation request with the DOJ to stipulate that our case covered imports of laminate flooring which were like goods for which the 3.2% duty rate likewise should apply. After review by U.S. Customs and Border Protection ( Customs ), the DOJ agreed to our proposed stipulation, which was approved by the U.S. Court of International Trade in March 2010. The stipulation provides that we will receive a refund of a portion of duties paid by us on the imported laminate flooring at issue in the case, and further allows us to recover refunds on additional entries of laminate flooring which were properly protested. We are seeking refunds on protested imports of laminate flooring from April 2001 through January 2007, when the classification was corrected by statute. We began receiving refunds in March 2010, and have received approximately \$0.2 million through June 30, 2010. We estimate that ultimately we could receive refunds between \$5 million and \$10 million, although the timing of receipt is dependent on the individual Customs ports' processing times. We have not recorded a receivable related to this potential gain.

**DIVESTITURE DISPUTE**

In 2007 we sold Tapijtfabriek H. Desseaux N.V. and its subsidiaries—the principal operating companies in our European Textile and Sports Flooring business. Certain post completion adjustments specified in the agreement were disputed by the parties after the sale. The matter was referred to an independent expert for a binding determination. In December 2008 a decision was reached with all disputed items awarded in our favor. Full payment of \$8.0 million was received in January 2009. The purchaser filed an appeal to nullify the independent expert's decision. An appeal hearing was held in May 2010. The court ruled in our favor on all matters in this dispute in July 2010.

**OTHER CLAIMS**

Additionally, we are involved in various other claims and legal actions involving product liability, patent infringement, breach of contract, distributor termination, employment law issues and other actions arising in the ordinary course of business. While complete assurance cannot be given to the outcome of these claims, we do not believe there is a reasonable possibility that a loss exceeding amounts already recognized would be material.

Diluted shares outstanding	58.1	56.5	58.1	56.5

**NOTE 19. SUBSEQUENT EVENT**

Pursuant to an employment agreement between Matthew J. Espe and the Company, Mr. Espe began to serve as Chief Executive Officer and President of the Company effective July 29, 2010 and member of the Board of Directors effective August 5, 2010.

In July 2010 we announced plans to close our Building Products manufacturing plant in Beaver Falls, Pennsylvania in 2011. We plan to service our customers ongoing requirements from our other U.S. facilities. This action will reduce employment by approximately 150 positions. Aggregate charges of approximately \$25 million are expected to be recorded, with a portion starting in the third quarter of 2010 and continuing in future quarters into 2011. The charges will be primarily non-cash accelerated depreciation of equipment and buildings, as well as accruals for retirement and termination benefits. The charges will be recorded in cost of goods sold. Additionally, we expect to invest approximately \$10 million, starting in 2010, in new equipment and buildings to accommodate transitioning manufacturing requirements.

**Report of Independent Registered Public Accounting Firm**

The Board of Directors and Shareholders

Armstrong World Industries, Inc.:

We have reviewed the accompanying condensed consolidated balance sheet of Armstrong World Industries, Inc. and subsidiaries ( the Company ) as of June 30, 2010, the related condensed consolidated statements of earnings for the three-month and six-month periods ended June 30, 2010 and 2009, and the related condensed consolidated statements of cash flows and equity for the six-month periods ended June 30, 2010 and 2009. These condensed consolidated financial statements are the responsibility of the Company s management.

We conducted our reviews in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole.

Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Armstrong World Industries, Inc. and subsidiaries as of December 31, 2009, and the related consolidated statements of earnings, cash flows, and equity for the year then ended (not presented herein); and in our report dated February 26, 2010, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of December 31, 2009, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Armstrong World Industries, Inc. (AWI) is a Pennsylvania corporation incorporated in 1891. When we refer to we, our and us in this report, we are referring to AWI and its subsidiaries.

This discussion should be read in conjunction with the financial statements and the accompanying notes included elsewhere in this Form 10-Q. This discussion contains forward-looking statements based on our current expectations, which are inherently subject to risks and uncertainties. Actual results and the timing of certain events may differ significantly from those referred to in such forward-looking statements. We undertake no obligation beyond what is required under applicable securities law to publicly update or revise any forward-looking statement to reflect current or future events or circumstances, including those set forth in the section entitled Uncertainties Affecting Forward-Looking Statements and elsewhere in this Form 10-Q.

**OVERVIEW**

We are a leading global producer of flooring products and ceiling systems for use primarily in the construction and renovation of residential, commercial and institutional buildings. Through our United States (U.S.) operations and U.S. and international subsidiaries, we design, manufacture and sell flooring products (primarily resilient and wood) and ceiling systems (primarily mineral fiber, fiberglass and metal) around the world. We also design, manufacture and sell kitchen and bathroom cabinets in the U.S. As of June 30, 2010 we operated 35 manufacturing plants in nine countries, including 22 plants located throughout the U.S. In July 2010 we announced plans to close our Building Products manufacturing plant in Beaver Falls, Pennsylvania in 2011.

**Reportable Segments**

*Resilient Flooring* produces and sources a broad range of floor coverings primarily for homes and commercial and institutional buildings. Manufactured products in this segment include vinyl sheet, vinyl tile and linoleum flooring. In addition, our Resilient Flooring segment sources and sells laminate flooring products, ceramic tile products, adhesives, installation and maintenance materials and accessories. Resilient Flooring products are offered in a wide variety of types, designs, and colors. We sell these products worldwide to wholesalers, large home centers, retailers, contractors and to the manufactured homes industry.

*Wood Flooring* produces and sources wood flooring products for use in new residential construction and renovation, with some commercial applications in stores, restaurants and high-end offices. The product offering includes pre-finished solid and engineered wood floors in various wood species, and related accessories. Virtually all of our Wood Flooring sales are in North America. Our Wood Flooring products are generally sold to independent wholesale flooring distributors and large home centers. Our products are principally sold under the brand names Bruce®, Robbins®, Timberland®, Armstrong®, HomerWood® and Capella®.

*Building Products* produces suspended mineral fiber, soft fiber and metal ceiling systems for use in commercial, institutional, and residential settings. In addition, our Building Products segment sources complementary ceiling products. Our products, which are sold worldwide, are available in numerous colors, performance characteristics and designs, and offer attributes such as acoustical control, rated fire protection and aesthetic appeal. Commercial ceiling materials and accessories are sold to ceiling systems contractors and to resale distributors. Residential ceiling products are sold in North America primarily to wholesalers and retailers (including large home centers). Suspension system (grid) products manufactured by Worthington Armstrong Venture (WAVE) are sold by both Armstrong and our WAVE joint venture.

**Table of Contents**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

(dollar amounts in millions)

*Cabinets* produces kitchen and bathroom cabinetry and related products, which are used primarily in the U.S. residential new construction and renovation markets. Through our system of Company-owned and independent distribution centers and through direct sales to builders, our Cabinets segment provides design, fabrication and installation services to single and multi-family homebuilders, remodelers and consumers under the Armstrong® brand name. All our Cabinets sales are in the U.S.

We also report an Unallocated Corporate segment, which includes assets, liabilities, income and expenses that have not been allocated to the business units.

See Note 2 to the Condensed Consolidated Financial Statements for additional financial information on our consolidated company and our reportable segments.

**Factors Affecting Revenues**

*Markets.* We compete in building material markets around the world. The majority of our sales are in North America and Europe. During the second quarter of 2010, these markets experienced the following:

According to the U.S. Census Bureau, in the second quarter of 2010 housing starts in the U.S. residential market rose 12% compared to the second quarter of 2009 to 0.60 million units. Housing completions in the U.S. declined 5% year over year in the second quarter of 2010 with approximately 0.78 million units completed. The National Association of Realtors indicated that sales of existing homes increased 17% year over year to 5.6 million units in the second quarter of 2010.

According to the U.S. Census Bureau, U.S. retail sales through building materials, garden equipment and supply stores (an indicator of home renovation activity) increased 7% year-over-year in the second quarter of 2010.

According to the U.S. Census Bureau the rate of decline in the North American key commercial market, in nominal dollar terms, was 29% in the second quarter of 2010 compared to the same period in 2009.

Construction activity in the office, healthcare, retail and education segments declined 35%, 16%, 36% and 18%, respectively, in the second quarter of 2010 year over year.

Markets in Western European countries generally experienced continued weakness, while Eastern European markets grew.

Pacific Rim markets generally grew.

*Pricing Initiatives.* We periodically modify prices in response to changes in costs for raw materials and energy, and to market conditions and the competitive environment. In certain cases, realized price increases are less than the announced price increases because of competitive reactions and changing market conditions. We estimate that prior pricing actions reduced our second quarter total consolidated net sales by approximately \$5 million and in the first six months of 2010 by approximately \$15 million, when compared to the same periods of 2009.

Year-to-date we announced the following pricing actions:

Resilient Flooring announced a domestic price increase effective June.

Wood Flooring announced price increases effective March and June.

Building Products announced price increases for ceiling tile in the Americas and Europe effective February, for grid effective May and again for ceiling tile in the Americas effective August.

**Table of Contents**

**Management's Discussion and Analysis of Financial Condition and Results of Operations**

(dollar amounts in millions)

*Mix.* Each of our businesses offers a wide assortment of products that are differentiated by style and design and by performance attributes. Pricing and margins for products within the assortment vary. Changes in the relative quantity of products purchased at the different price points can affect year-to-year comparisons of net sales and operating income. We estimate mix changes did not materially affect consolidated net sales in the second quarter or first six months of 2010 when compared to the same periods of 2009.

**Factors Affecting Operating Costs**

*Operating Expenses.* Our operating expenses are comprised of direct production costs (principally raw materials, labor and energy), manufacturing overhead costs, freight, costs to purchase sourced products and selling, general and administrative ( SG&A ) expenses.

Our largest individual raw material expenditures are for lumber and veneers, PVC resins and plasticizers. Natural gas is also a significant input cost. Fluctuations in the prices of these inputs are generally beyond our control and have a direct impact on our financial results. In the second quarter and first six months of 2010 these input costs decreased operating income by approximately \$8 million and \$7 million, respectively, when compared to the same periods of 2009.

Our management team is committed to augmenting margin expansion through further cost elimination. Through the aggressive adoption of LEAN practices and projects to standardize, simplify and eliminate SG&A programs and policies, we are seeking to remove at least \$150 million of manufacturing and SG&A costs by 2013. In 2010, we have announced the closure of two Building Products plants and the idling of two Wood Products finished goods production facilities. We will continue to evaluate the efficiency of our manufacturing footprint in the U.S. and Europe. The charges associated with our cost reduction initiatives may include termination benefits, asset impairments and accelerated depreciation and could be material to our financial statements. Even if we achieve these targeted savings, there is no assurance that our net operating results in the future will improve by this amount. As indicated in our discussion of risk factors, errors in planning or execution, as well as inflation and other external events, can cause unplanned costs or adversely affect operating costs.

In July 2010 we announced plans to close our Building Products manufacturing plant in Beaver Falls, Pennsylvania in 2011. We plan to service our customers' ongoing requirements from our other U.S. facilities. This action will reduce employment by approximately 150 positions. Aggregate charges of approximately \$25 million are expected to be recorded, with a portion starting in the third quarter of 2010 and continuing in future quarters into 2011. The charges will be primarily non-cash accelerated depreciation of equipment and buildings, as well as accruals for retirement and termination benefits. The charges will be recorded in cost of goods sold. Additionally, we expect to invest approximately \$10 million, starting in 2010, in new equipment and buildings to accommodate transitioning manufacturing requirements. Once completely implemented, these actions are expected to provide approximately \$10 million in annual operating benefits.

**Employees**

As of June 30, 2010, we had approximately 10,200 full-time and part-time employees worldwide. This compares to approximately 10,800 employees as of December 31, 2009. The reduction is primarily due to the shutdown of finished goods production at two Wood Flooring plants.

**Table of Contents****Management's Discussion and Analysis of Financial Condition and Results of Operations**  
(dollar amounts in millions)**RESULTS OF OPERATIONS**

Unless otherwise indicated, net sales in these results of operations are reported based upon the location where the sale was made. Please refer to Note 2 to the Condensed Consolidated Financial Statements for a reconciliation of operating income to consolidated earnings before income taxes.

**2010 COMPARED TO 2009****CONSOLIDATED RESULTS**

	2010	2009	Change is Favorable/ (Unfavorable)
<b>Three months ended June 30</b>			
Net Sales:			
Americas	\$ 525.2	\$ 519.3	1.1%
Europe	147.6	148.6	(0.7)%
Pacific Rim	52.0	37.8	37.6%
Total consolidated net sales	\$ 724.8	\$ 705.7	2.7%
Operating income	\$ 52.9	\$ 47.1	12.3%

**Six months ended June 30**

Net Sales:			
Americas	\$ 996.4	\$ 1,007.8	(1.1)%
Europe	296.3	296.7	(0.1)%
Pacific Rim	91.0	69.5	30.9%
Total consolidated net sales	\$ 1,383.7	\$ 1,374.0	0.7%
Operating income	\$ 66.3	\$ 48.2	37.6%

Consolidated net sales increased nearly 3% in the second quarter due to increased international volume and favorable foreign exchange impact of \$5.6 million. For the first six months, consolidated net sales increased slightly as a decrease in price realization (described previously in Pricing Initiatives) was more than offset by favorable foreign exchange impact of \$24.3 million.

Net sales in the Americas increased approximately 1% in the second quarter as lower residential market volume was offset by favorable foreign exchange impact of \$5.9 million and higher Building Products sales to commercial markets. Net sales in the Americas decreased approximately 1% in the first six months as decreased volumes more than offset favorable foreign exchange of \$10.7 million and improved product mix.

Net sales in the European markets were flat for the second quarter and first six months of 2010. In both periods, Building Products volume growth was offset by less profitable mix in both Building Products and Resilient Flooring. In addition, results reflect unfavorable foreign exchange of \$4.3 million for the second quarter and favorable foreign exchange of \$4.6 million for the first six months.

Net sales in the Pacific Rim increased primarily due to volume growth in both periods and favorable foreign exchange of \$4.0 million for the second quarter and \$9.0 million for the first six months of 2010.

Cost of goods sold in the second quarter of 2010 was 76.5% of net sales, compared to 76.8% for the same period in 2009. Cost of goods sold in the first six months of 2010 was 77.1% of net sales, compared to 78.5% for the same period in 2009. The percentage decrease was primarily the result of reductions in manufacturing costs.

SG&A expenses in the second quarter of 2010 were \$131.8 million, or 18.2% of net sales, and in the first six months of 2010 were \$275.3, or 19.9% of net sales compared to \$127.3 million, or 18.0% of net sales, and \$264.5, or 19.3% of net sales for the corresponding periods in 2009. The increase in absolute expense and expenses as a percent of net

sales was due to \$11.2 million of separation costs for our

**Table of Contents****Management's Discussion and Analysis of Financial Condition and Results of Operations**

(dollar amounts in millions)

former Chairman and Chief Executive Officer recorded in the first quarter of 2010 and a \$6.1 million asset impairment charge related to the termination of our flight operations, half of which was recorded in the first quarter of 2010 with the remainder recorded in the second quarter of 2010. We also recorded an asset impairment charge of \$2.1 million in the second quarter of 2010 for a European warehouse facility due to the recent decline in the commercial property sector. These charges more than offset reductions in core SG&A expenses.

Equity earnings from our WAVE joint venture were \$14.3 million for the second quarter of 2010 compared to \$10.4 million in the second quarter of 2009, and \$25.4 million for the first six months of 2010 compared to \$17.3 million in first six months of 2009. See Note 7 for further information.

Interest expense was \$4.0 million for the second quarter of 2010 compared to \$4.5 million in the second quarter of 2009. Interest expense was \$7.9 in the first six months of 2010 compared to \$9.0 million in first six months of 2009, primarily due to lower interest rates in 2010.

Income tax expense was \$22.6 million and \$14.7 million for the second quarter of 2010 and 2009, respectively. The effective tax rate for the second quarter of 2010 was 45.7% as compared to a rate of 34.2% for the same period of 2009. The effective tax rate for 2010 was higher than 2009 due to the recognition of a previously unrecognized tax benefit in 2009. Income tax expense was \$52.2 million and \$23.5 million for the first six months of 2010 and 2009, respectively. The effective tax rate for the first six months of 2010 was 87.6% versus 57.9% for the same period of 2009. The effective tax rate was higher in 2010 than 2009 due to the enactment of healthcare reform legislation in March 2010 and the recognition of a previously unrecognized tax benefit in 2009, partially offset by a lower amount of unbenefitted foreign losses in 2010.

**REPORTABLE SEGMENT RESULTS****Resilient Flooring**

	2010	2009	Change is Favorable/ (Unfavorable)
<b>Three months ended June 30</b>			
Net Sales:			
Americas	\$ 183.8	\$ 183.4	0.2%
Europe	70.9	71.4	(0.7)%
Pacific Rim	21.3	15.5	37.4%
Total segment net sales	\$ 276.0	\$ 270.3	2.1%
Operating income	\$ 10.0	\$ 7.5	33.3%
<b>Six months ended June 30</b>			
Net Sales:			
Americas	\$ 334.6	\$ 347.3	(3.7)%
Europe	136.7	136.7	0.0%
Pacific Rim	37.3	27.5	35.6%
Total segment net sales	\$ 508.6	\$ 511.5	(0.6)%
Operating income (loss)	\$ 4.8	\$ (5.4)	Favorable

Net sales in the Americas were flat in the second quarter and decreased in the first six months of 2010 primarily due to volume declines on continued weakness in commercial and particularly residential markets. Product mix improvement more than offset lower price realization. Foreign exchange was favorable by \$4.6 million for the first six months of 2010.

Net sales in the European markets were approximately flat for the second quarter and first six months of 2010 compared to the same periods in 2009. Product mix was unfavorable for both periods when

**Table of Contents****Management's Discussion and Analysis of Financial Condition and Results of Operations**

(dollar amounts in millions)

compared to the same periods in 2009, and the second quarter was impacted by unfavorable foreign exchange of \$2.3 million.

Net sales in the Pacific Rim increased due to higher volume in both periods and favorable foreign exchange impact of \$4.4 million for the first six months of 2010.

Operating income improved for the second quarter and first six months of 2010 compared to the same periods in 2009. In both periods reduced manufacturing and SG&A expenses offset the margin impact of lower sales and raw material inflation. Operating income included a loss related to European Resilient Flooring of \$7.2 million for the second quarter, including a \$2.1 million fixed asset impairment charge, and \$14.3 million for the first half of 2010, compared to \$5.8 million and \$20.7 million, respectively, for the same periods in 2009.

**Wood Flooring**

	2010	2009	Change is Favorable/ (Unfavorable)
<b>Three months ended June 30</b>			
Total segment net sales	\$ 127.2	\$ 127.8	(0.5)%
Operating income	\$ 1.1	\$ 0.9	22.2%

**Six months ended June 30**

Total segment net sales	\$ 251.5	\$ 249.6	0.8%
Operating (loss)	\$ (0.5)	\$ (6.9)	92.8%

Net sales were flat for the second quarter and first six months of 2010 compared to the same periods in 2009. Modest improvements in product mix and price largely offset lower volume.

Operating income increased slightly for the second quarter of 2010 when compared to the same period in 2009.

Operating loss improved for the first six months of 2010 when compared to the same period in 2009. In both the second quarter and first six months of 2010 reduced manufacturing and SG&A expenses offset significant raw hardwood lumber material inflation, when compared to the same periods in 2009.

**Building Products**

	2010	2009	Change is Favorable/ (Unfavorable)
<b>Three months ended June 30</b>			
Net Sales:			
Americas	\$ 177.0	\$ 169.2	4.6%
Europe	76.7	77.2	(0.6)%
Pacific Rim	30.7	22.3	37.7%
Total segment net sales	\$ 284.4	\$ 268.7	5.8%
Operating income	\$ 53.0	\$ 43.1	23.0%

**Six months ended June 30**

Net Sales:			
Americas	\$ 339.0	\$ 333.6	1.6%
Europe	159.6	160.0	(0.3)%
Pacific Rim	53.7	42.0	27.9%

Edgar Filing: ARMSTRONG WORLD INDUSTRIES INC - Form 10-Q

Total segment net sales	\$	552.3	\$	535.6	3.1%
Operating income	\$	95.7	\$	74.9	27.8%

**Table of Contents****Management's Discussion and Analysis of Financial Condition and Results of Operations**

(dollar amounts in millions)

Net sales in the Americas increased in the second quarter primarily due to improved product mix. For the first six months, improved product mix was largely offset by lower volume and reduced price realization.

Net sales in Europe were approximately flat as higher volume was largely offset by less profitable product mix. In addition, the second quarter included unfavorable foreign exchange of \$2.0 million and the first six months of 2010 had favorable foreign exchange of \$3.0 million.

Net sales in the Pacific Rim increased as both periods had higher volume and improved product mix plus favorable foreign exchange of \$2.0 million for the second quarter and \$4.6 million for the first six months of 2010.

Operating income increased for the second quarter and first six months of 2010 compared to the same periods in 2009, primarily due to reduced manufacturing expenses and higher earnings from WAVE.

**Cabinets**

	2010	2009	Change is Favorable/ (Unfavorable)
<b>Three months ended June 30</b>			
Total segment net sales	\$ 37.2	\$ 38.9	(4.4)%
Operating (loss)	\$ (0.4)	\$ (2.5)	84.0%

**Six months ended June 30**

Total segment net sales	\$ 71.3	\$ 77.3	(7.8)%
Operating (loss)	\$ (4.3)	\$ (7.0)	38.6%

Net sales decreased for the second quarter and first six months of 2010 compared to the same periods in 2009 due to lower volume driven by continued declines in residential housing markets.

Operating loss improved primarily due to reduced SG&A expenses, partially offset by the margin impact of lower sales.

**Unallocated Corporate**

Unallocated corporate expense of \$10.8 million in the second quarter of 2010 and \$29.4 million for the first six months increased from \$1.9 million and \$7.4 million, respectively, in the prior year. The second quarter of 2010 includes a \$3.0 million impairment charge related to the termination of our flight operations. The first six months of 2010 included \$11.2 million of severance and related expenses to reflect the separation costs for our former Chairman and Chief Executive Officer and \$6.1 million of asset impairment charges related to the termination of our flight operations. In addition to the factors discussed above, both the second quarter and first six months of 2010 were negatively impacted compared to the same periods of 2009 by a lower pension credit and costs related to the support of our LEAN initiatives. The first six months of 2009 included \$3.4 million of employee separation costs, partially offset by a reduction of our stock-based compensation expense of \$1.6 million related to stock grants that were forfeited by employees.

**FINANCIAL CONDITION AND LIQUIDITY****Cash Flow**

Operating activities for the first six months of 2010 provided \$56.2 million of cash, an increase of \$5.8 million over the \$50.4 million of cash provided for the first six months of 2009. The increase was primarily due to larger increases in accounts payable and accrued expenses across all business units, partially due to timing of sourced products and inventory receipts, and an accrual for severance payable to our former
