Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)**1. Basis of Presentation**

The accompanying unaudited, condensed consolidated financial statements include the accounts of NVR, Inc. (NVR or the Company) and its subsidiaries and certain other entities in which the Company is deemed to be the primary beneficiary (see Note 2 to the accompanying condensed consolidated financial statements). Intercompany accounts and transactions have been eliminated in consolidation. The statements have been prepared in conformity with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and with the instructions to Form 10-Q and Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. Because the accompanying condensed consolidated financial statements do not include all of the information and footnotes required by GAAP, they should be read in conjunction with the financial statements and notes thereto included in the Company's 2009 Annual Report on Form 10-K. In the opinion of management, all adjustments (consisting only of normal recurring accruals except as otherwise noted herein) considered necessary for a fair presentation have been included. Operating results for the three and nine-month periods ended September 30, 2010 are not necessarily indicative of the results that may be expected for the year ending December 31, 2010, or thereafter.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ from those estimates.

For the three and nine-month periods ended September 30, 2010 and 2009, comprehensive income equaled net income; therefore, a separate statement of comprehensive income is not included in the accompanying financial statements.

2. Consolidation of Variable Interest Entities, Joint Ventures and Land Under Development

Effective January 1, 2010, NVR adopted Statement of Financial Accounting Standards No. 167, *Amendments to FASB Interpretation No. 46(R)*, as codified in Accounting Standards Codification (ASC) 810, *Consolidation*, through Accounting Standards Update 2009-17 (ASC 810). This statement amends FASB Interpretation 46R related to the consolidation of variable interest entities (VIEs), revises the approach to determining the primary beneficiary of a VIE to be more qualitative in nature, and requires companies to more frequently reassess whether they must consolidate a VIE.

Fixed Price Purchase Agreements

NVR generally does not engage in the land development business. Instead, the Company typically acquires finished building lots at market prices from various development entities under fixed price purchase agreements. The purchase agreements require deposits that may be forfeited if NVR fails to perform under the agreement. The deposits required under the purchase agreements are in the form of cash or letters of credit in varying amounts, and typically range up to 10% of the aggregate purchase price of the finished lots.

NVR believes this lot acquisition strategy reduces the financial requirements and risks associated with direct land ownership and land development. NVR may, at its option, choose for any reason and at any time not to perform under these purchase agreements by delivering notice of its intent not to acquire the finished lots under contract. NVR's sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements. In other words, if NVR does not perform under a purchase agreement, NVR loses only its deposit. None of the creditors of any of the development entities with which NVR enters fixed price purchase agreements have recourse to the general credit of NVR. NVR generally does not have any specific performance obligations to purchase a certain number or any of the lots, nor does NVR guarantee

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

completion of the development by the developer or guarantee any of the developers' financial or other liabilities.

NVR is not involved in the design or creation of any of the development entities from which the Company purchases lots under fixed price purchase agreements. The developer's equity holders have the power to direct 100% of the operating activities of the development entity. NVR has no voting rights in any of the development entities. The sole purpose of the development entity's activities is to generate positive cash flow returns to the equity holders. Further, NVR does not share in any of the profit or loss generated by the project's development. The profits and losses are passed directly to the developer's equity holders.

The deposit placed by NVR pursuant to the fixed price purchase agreement is deemed to be a variable interest in the respective development entities. Therefore, the development entities with which NVR enters fixed price purchase agreements, including the joint venture limited liability corporations, as discussed below, are evaluated for possible consolidation by NVR. An enterprise must consolidate a VIE when that enterprise has a controlling financial interest in the VIE. An enterprise is deemed to have a controlling financial interest if it has i) the power to direct the activities of a variable interest entity that most significantly impact the entity's economic performance, and ii) the obligation to absorb losses of the VIE that could be significant to the VIE or the rights to receive benefits from the VIE that could be significant to the VIE.

NVR believes the activities that most significantly impact a development entity's economic performance are the operating activities of the entity. Unless and until a development entity completes finished building lots through the development process to be able to sell, the process of which the development entities' equity investors bear the full risk, the entity does not earn any revenues. The operating development activities are managed solely by the development entity's equity investors.

The development entities with which NVR contracts to buy finished lots typically select the respective projects, obtain the necessary zoning approvals, obtain the financing required with no support or guarantees from NVR, select who will purchase the finished lots and at what price, and manage the completion of the infrastructure improvements, all for the purpose of generating a cash flow return to the development entity's equity holders and all independent of NVR. The Company possesses no more than limited protective legal rights through the purchase agreement in the specific finished lots that it is purchasing, and NVR possesses no participative rights in the development entities. Accordingly, NVR does not have the power to direct the activities of a developer that most significantly impact the developer's economic performance. For this reason, NVR has concluded that it is not the primary beneficiary of the development entities with which the Company enters fixed price purchase agreements, and therefore, NVR does not consolidate any of these VIEs.

As of September 30, 2010, NVR controlled approximately 49,600 lots with deposits in cash and letters of credit totaling approximately \$171,800 and \$4,900, respectively. As noted above, NVR's sole legal obligation and economic loss for failure to perform under these purchase agreements is limited to the amount of the deposit pursuant to the liquidated damage provisions contained within the purchase agreements and in very limited circumstances, specific performance obligations, as follows:

	September 30, 2010
Contract land deposits	\$ 171,792
Loss reserve on contract land deposits	(80,787)
Contract land deposits, net	91,005
Contingent obligations in the form of letters of credit	4,882
Contingent specific performance obligations (1)	2,457

Total risk of loss	\$	98,344
--------------------	----	--------

8

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

- (1) At September 30, 2010, the Company was committed to purchase 55 finished lots under specific performance obligations.

Upon adoption of ASC 810, all of the assets and liabilities of consolidated VIEs at December 31, 2009 were deconsolidated, and there was no resultant gain or loss.

Joint Ventures

On a limited basis, NVR also obtains finished lots using joint venture limited liability corporations (JVs). All JVs are typically structured such that NVR is a non-controlling member and is at risk only for the amount the Company has invested. NVR is not a borrower, guarantor or obligor on any debt of the JVs. The Company enters into a standard fixed price purchase agreement to purchase lots from these JVs, and as a result has a variable interest in these JVs.

At September 30, 2010, the Company had an aggregate investment totaling approximately \$39,000 in three JVs that are expected to produce approximately 1,100 finished lots. At September 30, 2010, NVR had additional funding commitments in the aggregate totaling \$7,000 to two of the three JVs. The Company has determined that it is not the primary beneficiary of two of the JVs because NVR and the respective JV partner share power. NVR has concluded that it is the primary beneficiary of the remaining JV because the Company has the controlling financial interest in the JV. The condensed balance sheet at September 30, 2010 of the consolidated JV is as follows:

	September 30, 2010
Cash	\$ 374
Restricted cash	500
Land under development	21,897
Total assets	22,771
Debt	7,944
Equity	14,827
Total liabilities and equity	\$ 22,771

Land Under Development

During 2010, NVR directly acquired four separate raw parcels of land zoned for their intended use for approximately \$73,000 that it intends to develop into approximately 840 finished lots for use in its homebuilding operations. All of the raw parcels are located in the Washington, D.C. metropolitan area. One of the parcels, with a cost basis of approximately \$51,000 at September 30, 2010, was acquired from an entity controlled by Elm Street Development, Inc., which is controlled by one of our directors, William A. Moran. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes. Based

on current market conditions, NVR may, on a very limited basis, directly acquire additional raw parcels to develop into finished lots. See the Overview section of Item 2, Management's Discussion and Analysis of Financial Condition and Results of Operations included herein for additional discussion.

3. Contract Land Deposits

During the three-month period ended September 30, 2010, the Company incurred pre-tax impairment charges on contract land deposits of approximately \$300. For the nine-month period ended September 30,

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

2010, the Company recognized a net pre-tax recovery of approximately \$650 of contract land deposits previously determined to be uncollectible. During the three and nine-month periods ended September 30, 2009, the Company recognized a pre-tax recovery of approximately \$1,000 and \$5,700, respectively, of contract land deposits previously determined to be uncollectible. The contract land deposit asset is shown net of an approximate \$80,800 and \$89,500 impairment valuation allowance at September 30, 2010 and December 31, 2009, respectively.

4. Earnings per Share

The following weighted average shares and share equivalents are used to calculate basic and diluted earnings per share for the three and nine months ended September 30, 2010 and 2009:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Weighted average number of shares outstanding used to calculate basic EPS	5,748,000	5,866,000	5,978,000	5,762,000
<i>Dilutive Securities:</i>				
Stock options and restricted share units	263,000	357,000	293,000	336,000
Weighted average number of shares and share equivalents used to calculate diluted EPS	6,011,000	6,223,000	6,271,000	6,098,000

The assumed proceeds used in the treasury method for calculating NVR's diluted earnings per share includes the amount the employee must pay upon exercise, the amount of compensation cost attributed to future services and not yet recognized, and the amount of tax benefits that would be credited or charged to additional paid-in capital assuming exercise of the option or vesting of the restricted share unit. The assumed amount credited to additional paid-in capital equals the tax benefit from the assumed exercise of stock options or the assumed vesting of restricted share units after consideration of the intrinsic value upon assumed exercise or vesting less the actual stock-based compensation expense to be recognized in the income statement from 2006 and future periods.

Options issued under equity benefit plans to purchase 441,252 and 440,202 shares of common stock during the three and nine months ended September 30, 2010, and options issued under equity benefit plans to purchase 45,053 and 317,322 shares of common stock during the three and nine months ended September 30, 2009, were not included in the computation of diluted earnings per share because the effect would have been anti-dilutive.

5. Stock-Based Compensation Expense

The Company's Shareholders approved the 2010 Equity Incentive Plan (2010 Equity Plan) at the May 4, 2010 Annual Meeting. The 2010 Equity Plan authorizes the Company to issue non-qualified stock options (Options) and restricted share units (RSUs) to key management employees, including executive officers and Board members, to acquire up to an aggregate 700,000 shares of the Company's common stock. Of the 700,000 aggregate shares available to issue, up to 240,000 may be granted in the form of RSUs.

During 2010, the Company issued 150,104 RSUs and 282,143 Options from the 2010 Equity Plan, and 148,092 Options from the 2000 Broadly-Based Stock Option Plan. The RSUs vest as to 50% of the underlying shares on each of December 31, 2011 and 2012, based on continued employment or continued service as a Director, as applicable. The Options were granted at an exercise price equal to the closing price of the

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

Company's common stock on the New York Stock Exchange on the day prior to the date of grant. The majority of the Options granted during the current year vest 50% on each of December 31, 2013 and 2014, and vesting is based solely on continued employment or continued service as a Director, as applicable. The Options expire 10 years from the date of grant.

To estimate the grant-date fair value of its stock options, the Company uses the Black-Scholes option-pricing model. The Black-Scholes model estimates the per share fair value of an option on its date of grant based on the following factors: the option's exercise price; the price of the underlying stock on the date of grant; the estimated dividend yield; a risk-free interest rate; the estimated option term; and the expected volatility. For the risk-free interest rate, the Company uses a U.S. Treasury Strip due in a number of years equal to the option's expected term. NVR has concluded that its historical exercise experience is the best estimate of future exercise patterns to determine an option's expected term. To estimate expected volatility, NVR analyzed the historic volatility of its common stock over a period equal to the option's expected term. The fair value of the Options granted during 2010 was estimated on the grant date using the Black-Scholes option-pricing model based on the following assumptions:

	Options
Estimated option life	5.03 years
Risk free interest rate (range)	0.99% - 2.84%
Expected volatility (range)	36.03% - 41.12%
Expected dividend rate	0.00%
Weighted average grant-date fair value per share of options granted	\$ 256.82

In accordance with ASC Topic 718, *Compensation-Stock Compensation*, the fair value of the RSUs is measured as if they were vested and issued on the grant date. Additionally, under ASC 718, service only restrictions on vesting of RSUs are not reflected in the fair value calculation at the grant date. As a result, the fair value of the RSUs was the closing price of the Company's common stock on the day immediately preceding the date of grant. The weighted average fair value of the RSUs granted in the current year was \$702.94 per share.

Compensation cost for Options and RSUs is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting portion of the grant). For the recognition of equity-based compensation, the RSUs are treated as a separate award from the Options. Compensation cost is recognized within the income statement in the same expense line as the cash compensation paid to the respective employees. ASC 718 also requires the Company to estimate forfeitures in calculating the expense related to stock-based compensation and requires that the compensation costs of stock-based awards be recognized net of estimated forfeitures. Total stock based compensation expense, net of forfeitures, recognized during the three months ended September 30, 2010 and 2009 was \$19,924 and \$11,446, respectively, and for the nine months ended September 30, 2010 and 2009 was \$40,750 and \$34,848, respectively.

As of September 30, 2010, the total unrecognized compensation cost for all outstanding Options and RSUs equals approximately \$185,400, net of estimated forfeitures. The unrecognized compensation cost will be recognized over each grant's applicable vesting period with the latest vesting date being December 31, 2015. The weighted-average period over which the unrecognized compensation will be recorded is equal to approximately 2.07 years.

The following table provides additional information relative to NVR's stock-based compensation plans for the period ended September 30, 2010:

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

	Options	Weighted Average Exercise Price - Options	RSUs (1)
Stock Options			
Outstanding as of January 1, 2010	999,142	\$ 342.08	
Granted	430,235	702.32	150,104
Exercised	(261,815)	217.68	
Forfeited	(18,464)	514.93	(324)
Expired	(62)	759.00	
Outstanding as of September 30, 2010	1,149,036	502.50	149,780
Exercisable as of September 30, 2010	410,585	289.60	

(1) RSUs granted in the current year were issued at a \$0 exercise price.

6. Marketable Securities

As of September 30, 2010 the Company held marketable securities totaling \$25,000. These securities, which are debt securities issued by U.S. government agencies, are classified by the Company as held to maturity, are measured at amortized cost and mature within one year.

7. Excess Reorganization Value

Reorganization value in excess of identifiable assets (excess reorganization value) is an indefinite life intangible asset that was created upon NVR's emergence from bankruptcy on September 30, 1993. Based on the allocation of the reorganization value, the portion of the reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of NVR's entire enterprise upon bankruptcy emergence, the impairment assessment is conducted on an enterprise basis based on the comparison of NVR's total equity compared to the market value of NVR's outstanding publicly-traded common stock. The Company completed the annual assessment of impairment during the first quarter of 2010 and determined that there was no impairment of excess reorganization value.

8. Income Taxes

As of January 1, 2010, the Company had approximately \$31,636 (on a net basis) of unrecognized tax benefits, which would decrease income tax expense if recognized. The Company recognizes interest related to unrecognized tax benefits in the income tax expense line. As of January 1, 2010, the Company had a total of \$22,149 of accrued interest for unrecognized tax benefits on its balance sheet. Based on its historical experience in dealing with various taxing authorities, the Company has found that it is the administrative practice of these authorities to not seek penalties from the Company for the tax positions the Company has taken on its returns, related to its unrecognized tax benefits.

Therefore, the Company does not accrue penalties for the positions in which it has an unrecognized tax benefit. However, if such penalties were to be accrued, they would be recorded as a component of income tax expense. With few exceptions, the Company is no longer subject to income tax examinations for years prior to 2007.

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

9. Shareholders Equity

A summary of changes in shareholders equity is presented below:

	Common Stock	Additional Paid-In Capital	Retained Earnings	Treasury Stock	Deferred Comp. Trust	Deferred Comp. Liability	Total
Balance, December 31, 2009	\$206	\$830,531	\$3,823,067	\$(2,896,542)	\$(40,799)	\$40,799	\$1,757,262
Net income			147,307				147,307
Deferred compensation activity					13,217	(13,217)	
Purchase of common stock for treasury				(377,293)			(377,293)
Stock-based compensation		40,750					40,750
Tax benefit from stock options exercised and deferred compensation distributions		61,659					61,659
Proceeds from stock options exercised		56,993					56,993
Treasury stock issued upon option exercise		(52,310)		52,310			
Balance, September 30, 2010	\$206	\$937,623	\$3,970,374	\$(3,221,525)	\$(27,582)	\$27,582	\$1,686,678

The Company repurchased approximately 581,000 shares of its common stock during the nine months ended September 30, 2010. The Company settles option exercises by issuing shares of treasury stock to option holders. Shares are relieved from the treasury account based on the weighted average cost basis of treasury shares acquired. Approximately 261,800 options to purchase shares of the Company's common stock were exercised during the nine month period ended September 30, 2010.

10. Product Warranties

The Company establishes warranty and product liability reserves (warranty reserve) to provide for estimated future expenses as a result of construction and product defects, product recalls and litigation incidental to NVR's homebuilding business. Liability estimates are determined based on management's judgment, considering such factors as historical experience, the likely current cost of corrective action, manufacturers' and subcontractors' participation in

sharing the cost of corrective action, consultations with third party experts such as engineers, and discussions with NVR's general counsel and outside counsel retained to handle specific product liability cases. The following table reflects the changes in the Company's warranty reserve during the three and nine months ended September 30, 2010 and 2009:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Warranty reserve, beginning of period	\$ 70,181	\$ 60,858	\$ 64,417	\$ 68,084
Provision	6,636	11,154	29,310	18,806
Payments	(9,454)	(9,376)	(26,364)	(24,254)
Warranty reserve, end of period	\$ 67,363	\$ 62,636	\$ 67,363	\$ 62,636

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

11. Segment Disclosures

The following disclosure includes four homebuilding reportable segments that aggregate geographically the Company's homebuilding operating segments, and the mortgage banking operations presented as a single reportable segment. The homebuilding reportable segments are comprised of operating divisions in the following geographic areas:

Homebuilding Mid Atlantic - Virginia, West Virginia, Maryland, and Delaware

Homebuilding North East - New Jersey and eastern Pennsylvania

Homebuilding Mid East - Kentucky, New York, Ohio, western Pennsylvania and Indiana

Homebuilding South East - North Carolina, South Carolina, Florida and Tennessee

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, selling, general and administrative expenses, and a corporate capital allocation charge. The corporate capital allocation charge eliminates in consolidation, is based on the segment's average net assets employed, and is charged using a consistent methodology in the years presented. The corporate capital allocation charged to the operating segment allows the Chief Operating Decision Maker to determine whether the operating segment's results are providing the desired rate of return after covering the Company's cost of capital. The Company records charges on contract land deposits when it is determined that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer, or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. Mortgage banking profit before tax consists of revenues generated from mortgage financing, title insurance and closing services, less the costs of such services and general and administrative costs. Mortgage banking operations are not charged a capital allocation charge.

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between segment profit and consolidated profit before tax include unallocated corporate overhead (including all management incentive compensation), equity-based compensation expense, consolidation adjustments and external corporate interest expense. NVR's overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to the Company's operating segments. Consolidation adjustments consist of such items necessary to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to the Company's operating segments. Likewise, equity-based compensation expense is not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on the Company's outstanding Senior Notes and working capital line borrowings, and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

Following are tables presenting revenues, segment profit and segment assets for each reportable segment, with reconciliations to the amounts reported for the consolidated enterprise, where applicable:

Table of Contents**NVR, Inc.**

Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009

Corporate interest expense	(404)	(2,706)	(4,283)	(7,748)
Reconciling items sub-total	(8,474)	(2,245)	(27,624)	(21,434)
Consolidated income before taxes	\$ 64,890	\$ 113,440	\$ 235,880	\$ 213,887

	September 30,	
	2010	2009
Assets:		
Homebuilding Mid Atlantic	\$ 501,284	\$ 471,449
Homebuilding North East	47,892	56,637
Homebuilding Mid East	109,420	108,451
Homebuilding South East	56,173	52,223
Mortgage Banking	181,909	121,633

Total segment assets	896,678	810,393
Consolidated variable interest entities (5)	22,771	57,461
Cash and cash equivalents	1,053,166	1,114,581
Land under development (6)	72,856	
Marketable securities	25,000	259,406
Deferred taxes	188,698	193,460
Intangible assets	48,927	48,927
Contract land deposit reserve	(80,787)	(136,154)
Consolidation adjustments and other	22,510	26,706
Reconciling items sub-total	1,353,141	1,564,387
Consolidated assets	\$ 2,249,819	\$ 2,374,780

(1) This item represents changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments.

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

- (2) The increase in equity-based compensation expense in both the three and nine-month periods ended September 30, 2010 compared to the same periods of 2009 is attributable to the granting of non-qualified stock options (Options) and restricted share units (RSUs) from the 2010 Equity Incentive Plan in the current year (see Note 5 for additional discussion of stock-based compensation).
- (3) This item represents the elimination of the corporate capital allocation charge included in the respective homebuilding reportable segments. The corporate capital allocation charge is based on the segment's monthly average asset balance,

and is as follows
for the periods
presented:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Homebuilding Mid Atlantic	\$ 11,078	\$ 11,341	\$ 32,742	\$ 31,351
Homebuilding North East	1,476	1,727	4,698	4,988
Homebuilding Mid East	2,350	2,448	7,087	6,690
Homebuilding South East	1,335	1,487	4,145	4,369
Total	\$ 16,239	\$ 17,003	\$ 48,672	\$ 47,398

- (4) The increase in unallocated corporate overhead in the nine-month period is primarily attributable to an increase in management incentive costs as the prior year incentive plan was limited to a payout of 50% of the maximum bonus opportunity, while the current year has no similar limitation.
- (5) The decrease in consolidated variable interest entities (VIEs) is attributable to the adoption of amended ASC 810, which resulted in the deconsolidation in 2010 of all VIEs consolidated in 2009. The

current year
balance relates
to the assets of
one joint
venture
consolidated
under ASC 810.
See Note 2 for
additional
discussion of
VIEs.

- (6) Land under
development is
not allocated to
the respective
operating
segment until
the building lots
are finished. See
Note 2 for
additional
discussion of
land under
development.

12. Fair Value

Financial Instruments

Except as otherwise noted here, NVR believes that insignificant differences exist between the carrying value and the fair value of its financial instruments.

Derivative Instruments and Mortgage Loans Held for Sale

In the normal course of business, NVR's mortgage banking segment enters into contractual commitments to extend credit to buyers of single-family homes with fixed expiration dates. The commitments become effective when the borrowers "lock-in" a specified interest rate within time frames established by NVR. All mortgagors are evaluated for credit worthiness prior to the extension of the commitment. Market risk arises if interest rates move adversely between the time of the "lock-in" of rates by the borrower and the sale date of the loan to a broker/dealer. To mitigate the effect of the interest rate risk inherent in providing rate lock commitments to borrowers, the Company enters into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers. The forward sale contracts lock in an interest rate and price for the sale of loans similar to the specific rate lock commitments. NVR does not engage in speculative or trading derivative activities. Both the rate lock commitments to borrowers and the forward sale contracts to broker/dealers are undesignated derivatives and, accordingly, are marked to fair value through earnings. At September 30, 2010, there were contractual commitments to extend credit to borrowers

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

aggregating approximately \$209,088 and open forward delivery contracts aggregating approximately \$349,264.

GAAP assigns a fair value hierarchy to the inputs used to measure fair value. Level 1 inputs are quoted prices in active markets for identical assets and liabilities. Level 2 inputs are inputs other than quoted market prices that are observable for the asset or liability, either directly or indirectly. Level 3 inputs are unobservable inputs. The fair value of the Company's rate lock commitments to borrowers and the related input levels includes, as applicable:

- i) the assumed gain/loss of the expected resultant loan sale (level 2);
- ii) the effects of interest rate movements between the date of the rate lock and the balance sheet date (level 2); and
- iii) the value of the servicing rights associated with the loan (level 2).

The assumed gain/loss considers the amount that the Company has discounted the price to the borrower from par for competitive reasons and the excess servicing to be received or buydown fees to be paid upon securitization of the loan. The excess servicing and buydown fees are calculated pursuant to contractual terms with investors. To calculate the effects of interest rate movements, the Company utilizes applicable published mortgage-backed security prices, and multiplies the price movement between the rate lock date and the balance sheet date by the notional loan commitment amount. The Company sells all of its loans on a servicing released basis, and receives a servicing released premium upon sale. Thus, the value of the servicing rights, which averaged 108 basis points of the loan amount as of September 30, 2010, is included in the fair value measurement and is based upon contractual terms with investors and varies depending on the loan type. The Company assumes an approximate 7% fallout rate when measuring the fair value of rate lock commitments. Fallout is defined as locked loan commitments for which the Company does not close a mortgage loan and is based on historical experience.

The fair value of the Company's forward sales contracts to broker/dealers solely considers the market price movement of the same type of security between the trade date and the balance sheet date (level 2). The market price changes are multiplied by the notional amount of the forward sales contracts to measure the fair value.

Mortgage loans held for sale are recorded at fair value when closed, and thereafter are carried at the lower of cost or fair value, net of deferred origination costs, until sold. The fair value of loans held for sale of \$170,601 included in the accompanying condensed consolidated balance sheet has been increased by \$1,275 from the aggregate principal balance of \$169,326.

The undesignated derivative instruments are included in the accompanying condensed consolidated balance sheet as follows:

	Balance Sheet	Fair Value September 30, 2010
	Location	
Derivative Assets:		
Rate Lock Commitments	NVRM - Other assets	\$ 1,213
Derivative Liabilities:		
Forward Sales Contracts	NVRM - Accounts payable and other liabilities	\$ 354

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

The unrealized gain or loss from the change in the fair value measurements is included in earnings as a component of mortgage banking fees in the accompanying condensed consolidated statements of income as follows:

	Notional or Principal Amount	Assumed Gain (Loss) From Loan Sale	Interest Rate Movement Effect	Servicing Rights Value	Security Price Change	Total Fair Value Adjustment Gain/(Loss)
Rate lock commitments	\$ 209,088	\$ (934)	\$ 31	\$ 2,116		\$ 1,213
Forward sales contracts	\$ 349,264				(354)	(354)
Mortgages held for sale	\$ 169,326	(664)	148	1,791		1,275
Total Fair Value Measurement, September 30, 2010		(1,598)	179	3,907	(354)	2,134
Less: Fair Value Measurement, December 31, 2009		(788)	(2,501)	2,187	2,445	1,343
Total Fair Value Adjustment for the nine-month period ended September 30, 2010		\$ (810)	\$ 2,680	\$ 1,720	\$ (2,799)	\$ 791

The fair value measurement will be impacted in the future by the change in the value of the servicing rights and the volume and product mix of the Company's closed loans and locked loan commitments.

13. Debt

On June 15, 2010, the Company redeemed upon maturity, \$133,370 in outstanding 5% Senior Notes due 2010 (Senior Notes) at par. The Company has no Senior Notes outstanding as of September 30, 2010.

NVR's wholly owned mortgage banking subsidiary, NVR Mortgage Finance, Inc. (NVRM), provides for its mortgage origination activities through a revolving mortgage repurchase facility (Repurchase Facility). On July 30, 2010, NVRM entered into an amendment extending the term of the Repurchase Facility to August 2, 2011. The Repurchase Facility provides for loan purchases up to \$100,000, subject to certain sublimits. In addition, the Repurchase Facility provides for an accordion feature under which NVRM may request that the aggregate commitments under the Repurchase Facility be increased to an amount up to \$125,000.

Advances under the Repurchase Facility carry a Pricing Rate based on the Libor Rate plus the Libor Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 4.5%. There are several restrictions on purchased loans, including that they cannot be sold to others, they cannot be pledged to anyone other than the agent, and they cannot support any other borrowing or repurchase agreement. As of September 30, 2010, there was approximately \$99,000 outstanding under the Repurchase Facility, which is

included in Mortgage Banking Note payable in the accompanying condensed consolidated financial statement. Amounts outstanding under the Repurchase Facility are collateralized by the Company's mortgage loans held for sale, which are included in assets in the September 30, 2010 balance sheet in the accompanying condensed consolidated financial statements. There were no borrowing base limitations as of September 30, 2010. The average Pricing Rate on outstanding balances at September 30, 2010 was 4.5%.

Table of Contents**NVR, Inc.**Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

Effective October 27, 2010, NVR voluntarily terminated its \$300,000 working capital facility which was set to expire on December 6, 2010. The Company currently does not intend to enter into a new credit facility; however, effective October 27, 2010, the Company entered into an uncommitted collateralized letter of credit facility to issue letters of credit in our ordinary course of business.

14. Commitments and Contingencies

On July 18, 2007, former and current employees filed lawsuits against the Company in the Court of Common Pleas in Allegheny County, Pennsylvania and Hamilton County, Ohio, in Superior Court in Durham County, North Carolina, and in the Circuit Court in Montgomery County, Maryland, and on July 19, 2007 in the Superior Court in New Jersey, alleging that the Company incorrectly classified its sales and marketing representatives as being exempt from overtime wages. These lawsuits are similar in nature to another lawsuit filed on October 29, 2004 by another former employee in the United States District Court for the Western District of New York. The complaints seek injunctive relief, an award of unpaid wages, including fringe benefits, liquidated damages equal to the overtime wages allegedly due and not paid, attorney and other fees and interest, and where available, multiple damages. The suits were filed as purported class actions. However, while a number of individuals have filed consents to join and assert federal claims in the New York action, none of the groups of employees that the lawsuits purport to represent have been certified as a class. The lawsuits filed in Ohio, Pennsylvania, Maryland, New Jersey and North Carolina have been stayed pending further developments in the New York action.

The Company believes that its compensation practices in regard to sales and marketing representatives are entirely lawful and in compliance with two letter rulings from the United States Department of Labor (DOL) issued in January 2007. The two courts to most recently consider similar claims against other homebuilders have acknowledged the DOL s position that sales and marketing representatives were properly classified as exempt from overtime wages and the only court to have directly addressed the exempt status of such employees concluded that the DOL s position was valid. Accordingly, the Company has vigorously defended and intends to continue to vigorously defend these lawsuits. Because the Company is unable to determine the likelihood of an unfavorable outcome of this case, or the amount of damages, if any, the Company has not recorded any associated liabilities in the accompanying condensed, consolidated balance sheets.

In June 2010, the Company received a Request for Information from the United States Environmental Protection Agency (the EPA) pursuant to Section 308 of the Clean Water Act. The request seeks information about storm water discharge practices in connection with homebuilding projects completed or underway by the Company. The Company has been cooperating with this request, has provided information to the EPA and intends to continue cooperating with the EPA s inquiries. At this time, the Company cannot predict the outcome of this inquiry, nor can it reasonably estimate the potential costs that may be associated with its eventual resolution.

In April 2010, NVRM received a Report of Examination (ROE) from the Office of the Commissioner of Banks of the State of North Carolina reporting certain findings that resulted from the Commissioner s examination of selected files relating to loans originated by NVRM in North Carolina between August 1, 2006 and August 31, 2009. The ROE alleged that certain of the loan files reflected violations of North Carolina and/or U.S. lending or consumer protection laws. The ROE requested that NVRM correct or otherwise address the alleged violations and in some instances requested that NVRM undertake an examination of all of its other loans in North Carolina to determine whether similar alleged violations may have occurred, and if so, to take corrective action. NVRM responded to the ROE by letter dated June 10, 2010, contesting the findings and allegations, providing factual information to correct certain of the findings, and refuting the Commissioner s interpretation of applicable law. The Commissioner has not yet formally responded to NVRM s letter. Accordingly, while the outcome of the matter is currently not

Table of Contents

NVR, Inc.

Notes to Condensed Consolidated Financial Statements
(dollars in thousands except per share data)

determinable, the Company does not expect resolution of the matter to have a material adverse effect on the Company's financial position.

The Company and its subsidiaries are also involved in various other litigation arising in the ordinary course of business. In the opinion of management, and based on advice of legal counsel, this litigation is not expected to have a material adverse effect on the financial position or results of operations of the Company. Legal costs incurred in connection with outstanding litigation are expensed as incurred.

15. Mortgage Loan Loss Allowance

During the three-month periods ended September 30, 2010 and 2009, the Company recorded pre-tax charges for loan losses of approximately \$1,960 and \$670, respectively. For the nine-month periods ended September 30, 2010 and 2009, the Company recorded pre-tax charges for loan losses of approximately \$2,010 and \$680, respectively. Included in the Mortgage Banking segment's Accounts Payable and Other Liabilities line item within the accompanying condensed consolidated balance sheet is a mortgage loan loss allowance equal to approximately \$4,000 and \$3,200 at September 30, 2010 and December 31, 2009, respectively. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications. For additional information, see Management's Discussion and Analysis in Part 1, Item 2, and the disclosure of Risk Factors in Part II, Item 1A.

16. Recent Accounting Pronouncements

In June 2009, the FASB issued SFAS No. 166, *Accounting for Transfers of Financial Assets*, as codified in ASC 860, *Transfers and Servicing*, which changes the conditions for reporting a transfer of a portion of a financial asset as a sale and requires additional year-end and interim disclosures. ASC 860 was effective for the Company beginning January 1, 2010. The adoption of ASC 860 did not have a material impact on the Company's financial statements.

In January 2010, the FASB issued Accounting Standards Update (ASU) No. 2010-06, *Fair Value Measurements and Disclosures (Topic 820) - Improving Disclosures about Fair Value Measurements*, which amends ASC 820 to require the disclosure of additional information related to fair value measurement and provide clarification to existing requirements for fair value measurement disclosure. ASU 2010-06 was effective for the Company beginning January 1, 2010. The Company's disclosures conform to the requirements of ASU 2010-06. Refer to Note 12 for additional discussion of fair value measurements.

Forward-Looking Statements

Some of the statements in this Form 10-Q, as well as statements made by us in periodic press releases or other public communications, constitute forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934. Certain, but not necessarily all, of such forward-looking statements can be identified by the use of forward-looking terminology, such as believes, expects, may, will, should, or anticipates or the negative or other comparable terminology. All statements other than of historical facts are forward looking statements. Forward looking statements contained in this document include those regarding market trends, NVR's financial position, business strategy, the outcome of pending litigation, projected plans and objectives of management for future operations. Such forward-looking statements involve known and unknown risks, uncertainties and other factors that may cause the actual results or performance of NVR to be materially different from future results, performance or achievements expressed or implied by the forward-looking statements. Such risk factors include, but are not limited to the following: general economic and business conditions (on both a national and regional level); interest rate changes; access to suitable financing by NVR and NVR's customers; increased regulation of the mortgage banking industry; competition; the availability and cost of land and other raw materials used by NVR in its homebuilding operations; shortages of labor; weather related slow-downs; building moratoriums; governmental regulation; fluctuation and volatility of stock and other financial markets; mortgage financing availability; and other factors over which NVR has little or no control. NVR undertakes no obligation to update such forward-looking statements, except as required by law. For additional information regarding risk factors, see Part I, Item 1A of our Form 10-K for the year ended December 31, 2009 and Part II, Item 1A of this Report.

Unless the context otherwise requires, references to NVR, we, us or our include NVR and its subsidiaries.

Results of Operations for the Three and Nine Months Ended September 30, 2010 and 2009**Overview**

Our primary business is the construction and sale of single-family detached homes, townhomes and condominium buildings, all of which are primarily constructed on a pre-sold basis. To fully serve customers of our homebuilding operations, we also operate a mortgage banking and title services business. We primarily conduct our operations in mature markets. Additionally, we generally grow our business through market share gains in our existing markets and by expanding into markets contiguous to our current active markets. Our four homebuilding reportable segments consist of the following regions:

<i>Mid Atlantic:</i>	Maryland, Virginia, West Virginia and Delaware
<i>North East:</i>	New Jersey and eastern Pennsylvania
<i>Mid East:</i>	Kentucky, New York, Ohio, western Pennsylvania and Indiana
<i>South East:</i>	North Carolina, South Carolina, Tennessee and Florida

Our lot acquisition strategy is predicated upon avoiding the financial requirements and risks associated with direct land ownership and development. Historically, we have not engaged in land development to obtain finished lots for use in our homebuilding operations. Instead, we have acquired finished lots at market prices from various third party land developers pursuant to fixed price purchase agreements. These purchase agreements require deposits, typically ranging up to 10% of the aggregate purchase price of the finished lots, in the form of cash or letters of credit that may be forfeited if we fail to perform under the purchase agreement. This strategy has allowed us to maximize inventory turnover,

Table of Contents

which we believe enables us to minimize market risk and to operate with less capital, thereby enhancing rates of return on equity and total capital.

Our continued success is contingent upon our ability to control an adequate supply of finished lots on which to build and on our developers' ability to timely deliver finished lots to meet the sales demands of our customers. However, the current economic conditions and the continued downturn of the homebuilding industry have exerted pressure on our developers' ability to obtain acquisition and development financing or to raise equity investments to finance land development activity, potentially constraining our supply of finished lots. This pressure has necessitated that in certain specific strategic circumstances we deviate from our historical lot acquisition strategy and engage in joint venture arrangements with land developers or directly acquire raw ground already zoned for its intended use for development. Once we acquire control of any raw ground, we will determine whether to sell the raw parcel to a developer and enter into a fixed price purchase agreement with the developer to purchase the finished lots, or whether we will hire a developer to develop the land on our behalf. While joint venture arrangements and direct land development activity are not our preferred method of acquiring finished building lots, we may enter into additional transactions in the future on a limited basis where there exists a compelling strategic or prudent financial reason to do so. We expect, however, to continue to acquire substantially all of our finished lot inventory using fixed price purchase agreements with forfeitable deposits.

As of September 30, 2010, we controlled approximately 49,600 lots under purchase agreements with deposits in cash and letters of credit totaling approximately \$171,800 and \$4,900, respectively, and approximately 1,100 additional lots through joint ventures. Included in the number of controlled lots are approximately 11,000 lots for which we have recorded a contract land deposit impairment reserve of \$80,800 as of September 30, 2010. See Note 3 to the condensed consolidated financial statements included herein for additional information regarding contract land deposits. Further, as of September 30, 2010, we had approximately \$73,000 in land under development, that once fully developed will result in approximately 840 lots.

In addition to constructing homes primarily on a pre-sold basis and utilizing what we believe is a conservative lot acquisition strategy, we focus on obtaining and maintaining a leading market position in each market we serve. This strategy allows us to gain valuable efficiencies and competitive advantages in our markets, which we believe contributes to minimizing the adverse effects of regional economic cycles and provides growth opportunities within these markets.

Current Overview of the Business Environment

During the third quarter of 2010, new housing demand declined from the higher new order results experienced in the first two quarters of 2010. Our third quarter new orders of 2,151 units were 5% lower than the third quarter of 2009, and 16% lower than our second quarter 2010 new order results. In addition, cancellation rates increased to 18% in the third quarter of 2010, compared to 14% in the third quarter of 2009 and 12% in the second quarter of 2010. The market stabilization we had experienced toward the end of 2009 and into the first quarter of 2010 was negatively impacted by the expiration of the federal homebuyer tax credit which required purchasers to enter into a sales contract prior to April 30, 2010 to qualify. After April 30, 2010, new home sales experienced sharp declines, providing evidence that rather than increasing overall demand, the tax credit may have merely accelerated existing demand. In addition, the current home sales environment continues to be adversely impacted by high inventory levels; low consumer confidence driven by high unemployment rates; and a highly restrictive mortgage lending environment that has made it more difficult for our customers to obtain mortgage financing.

Reflecting the challenging market conditions discussed above, consolidated revenues totaled \$676,169 for the quarter ended September 30, 2010, a 17% decrease from the same period in 2009. Net income and diluted earnings per share in the third quarter of 2010 decreased approximately 39% and

Table of Contents

37%, respectively, compared to the third quarter of 2009. Gross profit margins within our homebuilding business declined to 18.3% in the third quarter of 2010 compared to 19.7% in the third quarter of 2009.

We expect to experience continued sales and pricing pressures over the next several quarters across all of our markets despite historically low mortgage rates and reduced housing prices, as significant economic uncertainties remain. In addition, the Dodd-Frank Wall Street Reform and Consumer Protection Act, enacted on July 21, 2010, contains numerous provisions affecting residential mortgages and mortgage lending practices. Because these provisions are to be implemented through future rulemaking, the ultimate impact of such provisions on lending institutions, including our mortgage banking subsidiary, will depend on how the implementing rules are written.

We believe that we are well positioned to take advantage of opportunities that may arise due to the strength of our balance sheet and liquidity. As of September 30, 2010, our cash and cash equivalents and marketable securities balances totaled approximately \$1,080,000. In addition, we repurchased approximately \$201,200 of our common stock during the quarter.

Homebuilding Operations

The following table summarizes the results of operations and other data for the consolidated homebuilding operations:

	Three Months Ended		Nine Months Ended	
	September 30,		September 30,	
	2010	2009	2010	2009
Revenues	\$661,935	\$792,510	\$2,186,288	\$1,953,327
Cost of Sales	\$540,783	\$636,642	\$1,783,327	\$1,593,512
Gross profit margin percentage	18.3%	19.7%	18.4%	18.4%
Selling, general and administrative	\$ 65,534	\$ 56,662	\$ 195,412	\$ 171,020
Settlements (units)	2,127	2,671	7,391	6,492
Average settlement price	\$ 311.1	\$ 296.3	\$ 295.7	\$ 300.4
New orders (units)	2,151	2,255	7,650	7,409
Average new order price	\$ 306.3	\$ 297.1	\$ 299.9	\$ 291.3
Backlog (units)			3,790	4,081
Average backlog price			\$ 312.5	\$ 296.6
New order cancellation rate	17.9%	13.8%	12.7%	14.1%

Consolidated Homebuilding Three Months Ended September 30, 2010 and 2009

Homebuilding revenues decreased 16% for the third quarter of 2010 from the same period in 2009 as a result of a 20% decrease in the number of units settled, offset partially by a 5% increase in the average settlement price quarter over quarter. Settlements in each of our reportable segments in the current quarter were negatively impacted by the federal homebuyer tax credit's initial settlement deadline of June 30, 2010, which pulled forward settlements into the second quarter of 2010. The increase in the average settlement price is attributable to a product mix shift away from our attached products to our detached product which is partially attributable to first time homebuyers representing a lower percentage of our total third quarter 2010 settlements.

Gross profit margins in the quarter ended September 30, 2010 decreased compared to the third quarter of 2009. The decline is attributable to continued downward pressure on selling prices and increased operating and personnel costs coupled with reduced settlement volume in the quarter ended September 30, 2010 as compared to the same period in the prior year. Due to significant market uncertainties we expect to continue to experience gross profit margin pressure over at least the next several quarters.

Table of Contents

The number of new orders, net of cancellations (new orders) for the third quarter of 2010 decreased 5% compared to the third quarter of 2009, while the average sales price of new orders increased 3% quarter over quarter. The decline in new orders was driven primarily by the lingering impact of the federal homebuyer tax credit April 30, 2010 sales ratification deadline, which we believe generated urgency for certain homebuyers intending to qualify for the tax credit, pulling sales forward into the first quarter of 2010. In addition, as discussed in the *Overview* section above, current economic uncertainties have continued to depress home sales. We expect new orders to be negatively impacted over the next several quarters until the economy begins to exhibit consistent stability and job growth.

Selling, general and administrative (SG&A) expenses in the third quarter of 2010 increased by 16% compared to the third quarter of 2009, and as a percentage of revenue increased to 10% from 7% quarter over quarter. The increase in SG&A expense was attributable primarily to an approximate \$7,900 increase in stock-based compensation costs in the third quarter of 2010 compared to the same period in 2009 due to the grant of non-qualified stock options and restricted share units under the 2010 Equity Incentive Plan which was approved by our shareholders at the May 2010 Annual Meeting (see Note 5 in the accompanying condensed consolidated financial statements for additional discussion of stock-based compensation and the 2010 Equity Incentive Plan). SG&A expenses were also impacted by an approximate \$1,800 increase in selling and marketing costs quarter over quarter due to the difficult selling conditions in the current quarter and to an increase in the average number of active communities to 374 communities in the third quarter of 2010 from 353 communities in the same period in 2009.

Consolidated Homebuilding Nine Months Ended September 30, 2010 and 2009

Homebuilding revenues increased 12% for the nine months ended September 30, 2010 compared to the same period in 2009 primarily due to a 14% increase in the number of units settled period over period. The number of units settled increased in all of our market segments period over period. Settlement increases were primarily attributable to the impact of the federal homebuyer tax credit which resulted in strong first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, the increase in settlements was also favorably impacted by a 12% higher beginning backlog unit balance entering 2010 compared to the same period in 2009.

Gross profit margins in the first nine months of 2010 remained unchanged from those in the first nine months of 2009. We expect to experience gross profit margin pressure over at least the next several quarters due to significant market uncertainties as discussed in the *Overview* section above.

The number of new orders and the average sales price of new orders for the first nine months of 2010 each increased 3% compared to the same period in 2009. The increase in new orders was primarily attributable to higher new orders in the first quarter of 2010, driven we believe by the federal homebuyer tax credit. Since the first quarter of 2010, we have experienced a consistent decline in the number of new orders across all of our markets in both the second and third quarters of 2010 compared to the respective periods in 2009. The increase in the average price of new orders was attributable to a product mix shift away from our attached products to our detached product which generally sell at higher price points.

SG&A expenses in the first nine months of 2010 increased 14% compared to the same period of 2009, but as a percentage of revenue remained flat at 9% each year, respectively. The increase in SG&A expenses was primarily attributable to an approximate \$6,600 increase in management incentive costs as prior year incentive plans were limited to payouts of 50% of incentive earned, while no similar restrictions are imposed on 2010 incentive compensation. SG&A expense was also higher due to an approximate \$5,500 increase in stock-based compensation costs in 2010 compared to the same period in 2009 due to the aforementioned grant of non-qualified stock options and restricted share units under the 2010 Equity Incentive Plan. In addition, SG&A expenses were impacted by an approximate \$5,900 increase in selling and marketing costs period over period due primarily to an approximate \$3,000

Table of Contents

increase in advertising costs and to an increase in the average number of active communities to 368 communities in the first nine months of 2010 from 356 communities in the same period in 2009.

Backlog units and dollars decreased approximately 7% to 3,790 and 2% to \$1,184,488, respectively, as of September 30, 2010 compared to 4,081 and \$1,210,447 as of September 30, 2009. The decrease in backlog units was primarily attributable to the increased settlement activity for the nine-month period ended September 30, 2010 as discussed above. Backlog dollars were negatively impacted by the decrease in backlog units.

Backlog, which represents homes sold but not yet settled with the customer, may be impacted by customer cancellations for various reasons that are beyond our control, such as failure to obtain mortgage financing, inability to sell an existing home, job loss, or a variety of other reasons. In any period, a portion of the cancellations that we experience are related to new sales that occurred during the same period, and a portion are related to sales that occurred in prior periods and therefore appeared in the opening backlog for the current period. Expressed as the total of all cancellations during the period as a percentage of gross sales during the period, our cancellation rate was approximately 13% and 14% in the first nine months of 2010 and 2009, respectively. During the most recent four quarters, approximately 5% of a reporting quarter's opening backlog cancelled during the fiscal quarter. We can provide no assurance that our historical cancellation rates are indicative of the actual cancellation rate that may occur in 2010. See Risk Factors in Part I, Item 1A of our Form 10-K for the year ended December 31, 2009 and Part II, Item 1A of this Report.

Reportable Segments

Homebuilding profit before tax includes all revenues and income generated from the sale of homes, less the cost of homes sold, SG&A expenses, and a corporate capital allocation charge determined at the corporate headquarters. The corporate capital allocation charge eliminates in consolidation, is based on the segment's average net assets employed, and is charged using a consistent methodology in the periods presented. The corporate capital allocation charged to the operating segment allows the Chief Operating Decision Maker to determine whether the operating segment's results are providing the desired rate of return after covering our cost of capital. We record charges on contract land deposits when we determine that it is probable that recovery of the deposit is impaired. For segment reporting purposes, impairments on contract land deposits are generally charged to the operating segment upon the determination to terminate a finished lot purchase agreement with the developer or to restructure a lot purchase agreement resulting in the forfeiture of the deposit. We evaluate our entire net contract land deposit portfolio for impairment each quarter. For additional information regarding our contract land deposit impairment analysis, see the *Critical Accounting Policies* section within this Management Discussion and Analysis. For presentation purposes below, the contract land deposit reserve at September 30, 2010 and 2009 has been allocated to the respective year's reportable segments to show contract land deposits on a net basis. The net contract land deposit balances below also include \$4,882 and \$5,499 at September 30, 2010 and 2009, respectively, of letters of credit issued as deposits in lieu of cash. The following table summarizes certain homebuilding operating activity by segment for the three and nine months ended September 30, 2010 and 2009:

Mid Atlantic***Three Months Ended September 30, 2010 and 2009***

The Mid Atlantic segment had an approximate \$24,700 decrease in segment profit in the three months ended September 30, 2010 compared to the same period in 2009. The decrease in segment profit was driven by a decrease of approximately \$96,400, or 20%, in revenues quarter over quarter due primarily to a 24% decrease in the number of units settled, offset partially by a 6% increase in the average settlement price. The average settlement price increase

was attributable to an 8% higher average price of homes in beginning backlog, quarter over quarter. The Mid Atlantic segment's gross profit margin percentage for the third quarter of 2010 declined to 19.9% from 20.8% in the same period in 2009, due to reduced settlement volume quarter over quarter.

Segment new orders for the third quarter of 2010 were flat with those in the same period 2009. The segment's average sales price of new orders increased 4% in the quarter compared to the third quarter

Table of Contents

of 2009. The increase in the average price of new orders was attributable to a product mix shift away from our attached products to our detached product which generally sell at higher price points.

Nine Months Ended September 30, 2010 and 2009

The Mid Atlantic segment had an approximate \$11,300 increase in segment profit in the nine months ended September 30, 2010 compared to the same period in 2009. Revenues increased approximately \$82,100, or 7%, for the nine months ended September 30, 2010 from the prior year period on an 8% increase in the number of units settled. The increase in units settled was attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. The segment's gross profit margin percentage remained flat at 19.8% period over period.

Segment new orders and the average sales price of new orders for the nine-month period ended September 30, 2010 increased approximately 2% and 4%, respectively, compared to new orders and the average sales price in the prior year period. The increase in the average price of new orders was attributable to a product mix shift away from our attached products to our detached product which generally sell at higher price points.

North East***Three Months Ended September 30, 2010 and 2009***

The North East segment had an approximate \$1,400 increase in segment profit in the three months ended September 30, 2010 compared to the same period in 2009, despite a decrease of approximately \$2,000, or 3%, in revenues quarter over quarter. The decrease in revenues is attributable to a 15% decrease in the number of units settled, offset partially by a 14% increase in the average settlement price. The higher average settlement price resulted from a product mix shift away from our attached products to our detached product, which generally sell at higher price points. Gross profit margins increased to 19.1% in 2010 from 17.4% in 2009. Gross profit margins were favorably impacted the higher average settlement price in the current quarter.

Segment new orders decreased 23% in the third quarter of 2010 compared to the same period in the prior year, while the average new order sales price for the third quarter of 2010 increased 2% from the same period in 2009. Third quarter 2010 new orders were negatively impacted by an increase in the cancellation rate to 20% in the third quarter of 2010 compared to 15% during the same period in 2009, as well as by a 15% decrease in the average number of active communities quarter over quarter.

Nine Months Ended September 30, 2010 and 2009

The North East segment had an approximate \$5,000 increase in segment profit in the nine-month period ended September 30, 2010 compared to the same period in 2009. Revenues increased approximately \$36,600, or 20%, for the nine-month period ended September 30, 2010 from the prior year period. Revenues increased due to a 13% increase in the number of units settled and a 6% increase in the average settlement price period over period. The increase in units settled was primarily attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, settlements were favorably impacted by a 7% higher beginning backlog entering 2010 compared to the same period in 2009. The increase in the average settlement price resulted from a product mix shift away from our attached products to our detached product, which generally sell at higher price points. Gross profit margins remained relatively flat period over period, as the higher contract land deposit impairment charges in the 2010 period of \$3,776, or 170 basis points, compared to the 2009 period of \$210, or 11 basis points, were offset by the increased sales volume period over period.

Table of Contents

Segment new orders for the nine-month period ended September 30, 2010, decreased 8% compared to the same period in 2009, while the average sales price of new orders increased 9% period over period. The year over year decrease in new orders was driven primarily by the current year's third quarter decline as discussed above. The average sales price of new orders has been favorably impacted by a product mix shift away from our attached products to our detached product which generally sell at higher price points.

Mid East***Three Months Ended September 30, 2010 and 2009***

The Mid East segment had an approximate \$9,100 decrease in segment profit in the three months ended September 30, 2010 compared to the same period in 2009. The decrease in segment profit was driven by a decrease of approximately \$17,400, or 11% in revenues quarter over quarter due to a 13% decrease in the number of units settled. Gross profit margins declined to 16.4% in the third quarter of 2010 from 19.4% in the same period of 2009, due to higher operating and personnel costs coupled with reduced settlement volume in the quarter ended September 30, 2010 as compared to the same period in the prior year.

Segment new orders were flat in the third quarter of 2010 compared to the same period in 2009. The average sales price decreased 2% quarter over quarter. New orders in the current quarter were favorably impacted by a 6% increase in the average number of active communities quarter over quarter, and by the 40 new orders in the current quarter in Indianapolis, which began operations in the fourth quarter of 2009. These favorable variances were offset by the aforementioned impact of the federal homebuyer tax credit April 30, 2010 sales ratification deadline, as well as by an increase in the cancellation rate to 21% in the third quarter of 2010 compared to 15% during the same period in 2009.

Nine Months Ended September 30, 2010 and 2009

The Mid East segment had an approximate \$10,400 increase in segment profit in the nine-month period ended September 30, 2010 compared to the same period in 2009. The increase in segment profit was driven by an increase of approximately \$96,200, or 27%, in revenues for the nine months ended September 30, 2010 compared to the same period in the prior year due to a 27% increase in the number of units settled period over period. The increase in units settled was attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, settlements were favorably impacted by a 31% higher beginning backlog entering 2010 compared to the same period in 2009. Gross profit margins decreased to 17.4% in the first nine months of 2010 from 18.0% in the same period in 2009, driven primarily by the aforementioned third quarter gross profit margin decline.

Segment new orders for the nine-month period ended September 30, 2010 increased approximately 9% compared to the same period in the prior year. New orders were favorably impacted primarily by the 160 new orders in the current year in Indianapolis, which began operations in the fourth quarter of 2009.

South East***Three Months Ended September 30, 2010 and 2009***

The South East segment had an approximate \$1,800 decrease in segment profit in the three months ended September 30, 2010 compared to the same period in 2009. The decrease in segment profit was primarily driven by a decrease of approximately \$14,800, or 21%, in revenues quarter over quarter due primarily to a 23% decrease in the number of units settled. Segment profit was favorably impacted by an increase in gross profit margins to 15.5% in the third quarter of 2010 from 14.7% in the same

Table of Contents

period in 2009, due largely to lower contract land deposit impairment charges of \$141, or 26 basis points, in the third quarter of 2010, compared to \$1,279, or 183 basis points in the third quarter of 2009.

Segment new orders during the third quarter of 2010 decreased 17% from the same period in 2009, while the average new order sales price increased by 3% quarter over quarter. Third quarter 2010 new orders were negatively impacted by an increase in the cancellation rate to 32% in the third quarter of 2010 compared to 14% during the same period in 2009.

Nine Months Ended September 30, 2010 and 2009

The South East segment had an approximate \$2,700 increase in segment profit in the nine-month period ended September 30, 2010 compared to the same period in 2009. The increase in segment profit was driven by an increase of approximately \$18,100, or 9%, in revenues for the nine months ended September 30, 2010 from the prior year period due primarily to an 11% increase in the number of units settled. The increase in units settled was primarily attributable to the impact of the federal homebuyer tax credit which we believe resulted in higher first quarter sales and increased settlements through the second quarter of 2010 as compared to the same period in 2009. In addition, settlements were favorably impacted by an 8% higher beginning backlog entering 2010 compared to the same period in 2009. Gross profit margins remained relatively flat in the comparable periods.

Segment new orders and the average sales price of new orders for the nine-month period ended September 30, 2010 increased approximately 6% and 3%, respectively, compared to new orders and the average sales price in the same period in the prior year. New orders were favorably impacted by a 22% increase in the average number of active communities period over period, and by the 76 new orders in the current year in the Orlando, FL and Raleigh, NC markets, in which we began operations in the third quarter of 2009. Although sales were higher year over year, we believe that the expiration of the federal homebuyer tax credit, coupled with continuing economic instability has attributed to the segment's higher cancellation rates in the third quarter of 2010 and the declining new orders in both the second and third quarters of 2010.

Homebuilding Segment Reconciliations to Consolidated Homebuilding Operations

In addition to the corporate capital allocation and contract land deposit impairments discussed above, the other reconciling items between homebuilding segment profit and homebuilding consolidated profit before tax include unallocated corporate overhead (which includes all management incentive compensation), equity-based compensation expense, consolidation adjustments and external corporate interest expense. Our overhead functions, such as accounting, treasury, human resources, etc., are centrally performed and the costs are not allocated to our operating segments. Consolidation adjustments consist of such items to convert the reportable segments' results, which are predominantly maintained on a cash basis, to a full accrual basis for external financial statement presentation purposes, and are not allocated to our operating segments. Likewise, equity-based compensation expense is not charged to the operating segments. External corporate interest expense is primarily comprised of interest charges on our outstanding senior notes and working capital line borrowings and is not charged to the operating segments because the charges are included in the corporate capital allocation discussed above.

Table of Contents

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
<i>Homebuilding Consolidated Gross Profit:</i>				
Homebuilding Mid Atlantic	\$ 78,784	\$ 102,145	\$ 256,856	\$ 239,469

Consolidation adjustments and other	(2,759)	128	(5,626)	(7,492)
<i>Segment gross profit</i>	\$ 121,152	\$ 155,868	\$ 402,961	\$ 359,815
<i>Homebuilding Consolidated Profit Before Tax:</i>				
Homebuilding Mid Atlantic	\$ 47,192	\$ 71,919	\$ 162,110	\$ 150,804
Homebuilding North East	8,512	7,156	20,440	15,479
Homebuilding Mid East	9,103	18,225	41,418	30,970
Homebuilding South East	1,042	2,870	12,056	9,344
Reconciling items:				
Contract land deposit impairments (1)	545	6,841	8,063	17,302
Equity-based compensation expense (2)	(18,880)	(10,745)	(38,389)	(32,743)
Corporate capital allocation (3)	16,239	17,003	48,672	47,398
Unallocated corporate overhead (4)	(10,422)	(10,017)	(47,391)	(34,348)
Consolidation adjustments and other	5,492	(1,920)	8,065	(9,190)
Corporate interest expense	(404)	(2,706)	(4,283)	(7,748)
Reconciling items sub-total	(7,430)	(1,544)	(25,263)	(19,329)
<i>Homebuilding consolidated profit before taxes</i>	\$ 58,419	\$ 98,626	\$ 210,761	\$ 187,268

(1) This item represents changes to the contract land deposit impairment reserve, which are not allocated to the reportable segments.

(2) The increase in equity-based compensation expense in both

the three and nine-month periods ended September 30, 2010 compared to the same periods of 2009 is attributable to the granting of non-qualified stock options (Options) and restricted share units (RSUs) from the 2010 Equity Incentive Plan in the current year (see Note 5 of the Notes to the Condensed Consolidated Financial Statements).

- (3) This item represents the elimination of the corporate capital allocation charge included in the respective homebuilding reportable segments. The decreases in the corporate capital allocation charge are due to the lower segment asset balances during the respective periods due to the decreases in operating activity period over period. The corporate capital allocation

charge is based on the segment's monthly average asset balance, and is as follows for the periods presented:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Homebuilding Mid Atlantic	\$ 11,078	\$ 11,341	\$ 32,742	\$ 31,351
Homebuilding North East	1,476	1,727	4,698	4,988
Homebuilding Mid East	2,350	2,448	7,087	6,690
Homebuilding South East	1,335	1,487	4,145	4,369
Total	\$ 16,239	\$ 17,003	\$ 48,672	\$ 47,398

(4) The increase in unallocated corporate overhead in the nine-month period is primarily attributable to an increase in management incentive costs as the prior year incentive plan was limited to a payout of 50% of the maximum bonus opportunity, while the current year has no similar limitation.

Table of Contents**Mortgage Banking Segment****Three and Nine Months Ended September 30, 2010 and 2009**

We conduct our mortgage banking activity through NVR Mortgage Finance, Inc. (NVRM), a wholly owned subsidiary. NVRM focuses exclusively on serving the homebuilding segment's customer base.

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Loan closing volume:				
Total principal	\$ 497,404	\$ 603,317	\$ 1,621,997	\$ 1,518,229
Loan volume mix:				
Adjustable rate mortgages	3%	1%	3%	1%
Fixed-rate mortgages	97%	99%	97%	99%
Operating Profit:				
Segment Profit	\$ 7,515	\$ 15,515	\$ 27,480	\$ 28,724
Equity-based compensation expense	(1,044)	(701)	(2,361)	(2,105)
Mortgage banking income before tax	\$ 6,471	\$ 14,814	\$ 25,119	\$ 26,619
Capture rate:				
	91%	91%	90%	91%
Mortgage Banking Fees:				
Net gain on sale of loans	\$ 10,794	\$ 17,660	\$ 33,772	\$ 35,000
Title services	3,318	3,731	10,376	9,425
Servicing fees	122	115	451	294
	\$ 14,234	\$ 21,506	\$ 44,599	\$ 44,719

Loan closing volume for the three months ended September 30, 2010 decreased 18% from the same period in 2009. The 2010 decrease is primarily attributable to a 21% decrease in the number of units closed from the same period in 2009, partially offset by a 4% increase in the average loan amount. The decrease in the number of units closed is primarily attributable to the aforementioned decrease in the number of homes that our homebuilding segment settled in the 2010 third quarter compared to the same period in 2009. Loan closing volume for the nine months ended September 30, 2010 increased 7% from the same period in 2009. This increase is primarily attributable to an 8% increase in the number of units closed, partially offset by a 1% decrease in the average loan amount. The unit increase for the nine months ended September 30, 2010 primarily reflects the aforementioned increase in the number of homes that our homebuilding segment settled in the year to date 2010 period compared to the same period in 2009.

Segment profit for the three months ended September 30, 2010, decreased approximately \$8,000 from the same period for 2009 primarily due to an approximate \$7,300 decrease in mortgage banking fees. The decrease in mortgage banking fees is primarily attributable to the aforementioned decrease in closing volume and a reduction in fees charged to customers. Mortgage banking fees were also negatively impacted by an approximate \$3,400 decrease in unrealized income from the fair value measurement of our locked loan commitments, forward mortgage-backed

securities and closed loans held for sale (see Note 12 to the accompanying condensed consolidated financial statements included herein for additional information regarding fair value).

Segment profit for the nine months ended September 30, 2010 decreased approximately \$1,200 from the same period in 2009, despite the 7% increase in loan closing volume. The decrease in segment

Table of Contents

profit for the nine months ended September 30, 2010 was partially the result of an approximate \$3,000 increase in general and administrative expenses. The increase in general and administrative expenses was primarily the result of a 14% increase in headcount and an increase in management incentive costs compared to the same period in 2009. The increase in general and administrative expenses was also partially attributable to an approximate \$1,300 increase in loan loss expense (see additional discussion below). The decrease to segment profit from the increase in general and administrative expenses for the nine months ended September 30, 2010 was partially offset by an approximate \$1,800 increase in interest income. The increase in interest income was attributable to the aforementioned closing volume increase and to the change in the loan sale distribution channels (as discussed below).

We sell all of the loans we originate into the secondary mortgage market. Insofar as we underwrite our originated loans to the standards and specifications of the ultimate investor, we have no further financial obligations from the issuance of loans, except in certain limited instances where early payment default occurs. NVRM has always maintained an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure in the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications. For the period January 1, 2005 to September 30, 2010, we have originated approximately \$16,600,000 of mortgage loans and have cumulative actual charges incurred related to mortgage indemnifications and repurchases of approximately \$5,400. It has been reported that investors have become increasingly aggressive in looking for any type of underwriting deficiency incurred on loans that have gone into default to force the seller or the originator of the loans to assume any losses incurred on the defaulted loans. We have not experienced an increase in the number of loans that we have been requested to either repurchase or provide indemnification for losses. Because we sell all of our loans and do not service them, there is often a substantial delay between the time that a loan goes into default and the time that the servicer requests us to reimburse them for losses incurred because of the default. We believe that all of the loans that we originate are underwritten to the standards and specifications of the ultimate investor to whom we sell our originated loans. We employ a quality control department to ensure that our underwriting controls are effective, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. At September 30, 2010, we had an allowance for loan losses of approximately \$4,000. Although we consider the allowance for loan losses reflected on the September 30, 2010 balance sheet to be adequate, there can be no assurance that this allowance will prove to be adequate to cover losses on loans previously originated.

NVRM continues to manage its interest rate risk by entering into optional or mandatory delivery forward sale contracts to sell whole loans and mortgage-backed securities to broker/dealers to mitigate the effect of the interest rate risk inherent in providing rate lock commitments to our borrowers. However, in April 2010, NVRM changed the method by which we deliver loans into our sale distribution channels in order to increase our financial return on loan sales. While loans are still typically sold to investors within 30 days of settlement, the change has resulted in loans remaining in inventory for a longer period of time than under our previous loan sale channels. This change has resulted in an increase in the mortgages held for sale balance included in the condensed consolidated balance sheet for September 30, 2010 compared to previous quarters ended prior to April 1, 2010.

NVRM is dependent on our homebuilding segment's customers for business. As new orders and selling prices of the homebuilding segment decline, NVRM's operations will also be adversely affected. In addition, the mortgage segment's operating results may be adversely affected in future periods due to the continued tightening and volatility of the credit markets as well as increased regulation of mortgage lending practices.

Liquidity and Capital Resources

We fund our operations from cash flows provided by our operating activities and a mortgage repurchase facility. In the nine month period ended September 30, 2010, net cash used for operating activities was \$85,599. Cash was provided by homebuilding operations and was used to fund the increase

Table of Contents

in homebuilding inventory of \$140,278, as a result of an increase in sold units under construction and land under development at September 30, 2010, compared to December 31, 2009. The presentation of operating cash flows was also reduced by \$61,659, which is the amount of the excess tax benefit realized from the exercise of stock options and deferred compensation plan distributions during the year and credited directly to additional paid in capital.

Net cash provided by investing activities was \$188,733 for the nine month period ended September 30, 2010, which primarily resulted from the redemption at maturity, or upon being called, of \$344,535 of marketable securities, offset partially by \$150,000 in purchases of marketable securities, during the period. The marketable securities, which are debt securities issued by United States government agencies, are classified as held to maturity securities and have maturities of one year from our original acquisition date.

Net cash used by financing activities was \$297,441 for the nine month period ended September 30, 2010. During the nine months ended September 30, 2010, we repurchased approximately 581,000 shares of our common stock at an aggregate purchase price of \$377,293 under our ongoing common stock repurchase program, discussed below. In addition, we redeemed all of our outstanding 5% Senior Notes due 2010, totaling \$133,370, upon their maturity on June 15, 2010. Stock option exercise activity during the period ended September 30, 2010, provided \$56,993 in exercise proceeds, and we realized \$61,659 in excess income tax benefits from stock option exercises and deferred compensation plan distributions. We also increased borrowings under the mortgage repurchase facility by \$86,626 based on current borrowing needs.

Effective October 27, 2010, we voluntarily terminated our \$300,000 working capital facility, prior to the working capital facility's expiration on December 6, 2010. We currently do not intend to enter into a new credit facility, however, effective October 27, 2010 we entered into an uncommitted collateralized letter of credit facility to issue letters of credit in our ordinary course of business. As of September 30, 2010, there were no direct borrowings outstanding under the working capital facility; however, there were \$14,801 in outstanding letters of credit. All outstanding letters of credit were transferred to the uncommitted collateralized letter of credit facility prior to the termination of the working capital facility.

Our mortgage banking segment provides for its mortgage origination and other operating activities using cash generated from operations as well as a revolving mortgage repurchase facility. On July 30, 2010, NVRM entered into the Second Amendment to the Master Repurchase Agreement, (the Repurchase Agreement) extending the term of the revolving mortgage repurchase facility to August 2, 2011. The Repurchase Agreement is used to fund NVRM's mortgage origination activities, and provides for loan purchases up to \$100,000, subject to certain sublimits. In addition, the Repurchase Agreement provides for an accordion feature under which NVRM may request that the aggregate commitments under the Repurchase Agreement be increased to an amount up to \$125,000.

Advances under the Repurchase Agreement carry a Pricing Rate based on the Libor Rate plus the Libor Margin, or the Default Pricing Rate, as determined under the Repurchase Agreement, provided that the Pricing Rate shall not be less than 4.50%. The Repurchase Agreement contains various affirmative and negative covenants. The negative covenants include among others, certain limitations on transactions involving acquisitions, mergers, the incurrence of debt, sale of assets and creation of liens upon any of its Mortgage Notes. Additional covenants include (i) a tangible net worth requirement, (ii) a minimum tangible net worth ratio, (iii) a minimum net income requirement, and (iv) a minimum liquidity requirement, all of which we were compliant with at September 30, 2010. As of September 30, 2010, there was approximately \$99,000 outstanding under the Repurchase Agreement. There were no borrowing base limitations as of September 30, 2010. The average Pricing Rate on outstanding balances at September 30, 2010 was 4.5%.

Table of Contents

In addition to funding growth in our homebuilding and mortgage operations, we historically have used a substantial portion of our excess liquidity to repurchase outstanding shares of our common stock in the open market and in privately negotiated transactions. This ongoing repurchase activity is conducted pursuant to publicly announced Board authorizations, and is typically executed in accordance with the safe harbor provisions of Rule 10b-18 under the Securities Exchange Act of 1934, as amended. In addition, the Board resolutions authorizing us to repurchase shares of our common stock specifically prohibit us from purchasing shares from our officers, directors, Profit Sharing/401K Plan Trust or Employee Stock Ownership Plan Trust. We believe the repurchase program assists us in accomplishing our primary objective, increasing shareholder value. See Part II, Item 2 of this Form 10-Q for disclosure of the status of current repurchase authorizations. We expect to continue to repurchase shares of our common stock from time to time subject to market conditions and available excess liquidity.

We believe that internally generated cash and borrowings available under our mortgage repurchase facility and the public debt and equity markets will be sufficient to satisfy near and long term cash requirements for working capital in both our homebuilding and mortgage banking operations.

Table of Contents**Critical Accounting Policies*****General***

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (GAAP) requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. We continually evaluate the estimates we use to prepare the consolidated financial statements and update those estimates as necessary. In general, our estimates are based on historical experience, on information from third party professionals, and other various assumptions that are believed to be reasonable under the facts and circumstances. Actual results could differ materially from those estimates made by management.

Homebuilding Inventory

The carrying value of inventory is stated at the lower of cost or market value. Cost of lots and completed and uncompleted housing units represent the accumulated actual cost of the units. Field construction supervisors' salaries and related direct overhead expenses are included in inventory costs. Interest costs are not capitalized into inventory, with the exception of land under development. Upon settlement, the cost of the unit is expensed on a specific identification basis. Cost of manufacturing materials is determined on a first-in, first-out basis.

Sold inventory is evaluated for impairment based on the contractual selling price compared to the total estimated cost to construct. Unsold inventory is evaluated for impairment by analyzing recent comparable sales prices within the applicable community compared to the costs incurred to date plus the expected costs to complete. Any calculated impairments are recorded immediately.

Land Under Development and Contract Land Deposits**Land Under Development**

On a very limited basis, we directly acquire raw parcels of land already zoned for its intended use to develop into finished lots. Land under development includes the land acquisition costs, direct improvement costs, capitalized interest, where applicable, and real estate taxes.

Land under development is reviewed for potential write-downs when impairment indicators are present. In addition to considering market and economic conditions, we assess land under development impairments on a community-by-community basis, analyzing, as applicable, current sales absorption levels, recent sales gross profit, and the dollar differential between the projected fully-developed cost of the lots and the current market price for lots. If indicators of impairment are present for a community, we perform an analysis to determine if the undiscounted cash flows estimated to be generated by those assets are less than their carrying amounts, and if so, impairment charges are required to be recorded if the fair value of such assets is less than their carrying amounts. For those assets deemed to be impaired, the impairment to be recognized is measured as the amount by which the carrying amount of the asset exceeds the fair value of the assets. Our determination of fair value is primarily based on discounting the estimated future cash flows at a rate commensurate with the inherent risks associated with the asset and related estimated cash flow streams. We do not believe that any of the land under development, all of which was acquired during 2010, is impaired at this time. However, there can be no assurance that we will not incur impairment charges in the future due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Table of Contents**Contract Land Deposits**

We purchase finished lots under fixed price purchase agreements that require deposits that may be forfeited if we fail to perform under the contract. The deposits are in the form of cash or letters of credit in varying amounts and represent a percentage of the aggregate purchase price of the finished lots.

We maintain an allowance for losses on contract land deposits that reflects our judgment of the present loss exposure in the existing contract land deposit portfolio at the end of the reporting period. To analyze contract land deposit impairments, we utilize a loss contingency analysis that is conducted each quarter. In addition to considering market and economic conditions, we assess contract land deposit impairments on a community-by-community basis pursuant to the purchase contract terms, analyzing, as applicable, current sales absorption levels, recent sales gross profit, the dollar differential between the contractual purchase price and the current market price for lots, a developer's financial stability, a developer's financial ability or willingness to reduce lot prices to current market prices, and the contract's default status by either us or the developer along with an analysis of the expected outcome of any such default.

Our analysis is focused on whether we can sell houses profitably in a particular community in the current market with which we are faced. Because we don't own the finished lots on which we had placed a contract land deposit, if the above analysis leads to a determination that we can't sell homes profitably at the current contractual lot price, we then determine whether we will elect to default under the contract, forfeit our deposit and terminate the contract, or whether we will attempt to restructure the lot purchase contract, which may require us to forfeit the deposit to obtain contract concessions from a developer. We also assess whether an impairment is present due to collectability issues resulting from a developer's non-performance because of financial or other conditions.

Although we consider the allowance for losses on contract land deposits reflected on the September 30, 2010 balance sheet to be adequate (see Note 3 to the accompanying condensed consolidated financial statements included herein), there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated adverse changes in the economy or other events adversely affecting specific markets or the homebuilding industry.

Intangible Assets

Reorganization value in excess of identifiable assets (excess reorganization value) is an indefinite life intangible asset that was created upon our emergence from bankruptcy on September 30, 1993. Based on the allocation of our reorganization value, the portion of our reorganization value which was not attributed to specific tangible or intangible assets has been reported as excess reorganization value, which is treated similarly to goodwill. Excess reorganization value is not subject to amortization. Rather, excess reorganization value is subject to an impairment assessment on an annual basis or more frequently if changes in events or circumstances indicate that impairment may have occurred. Because excess reorganization value was based on the reorganization value of our entire enterprise upon bankruptcy emergence, the impairment assessment is conducted on an enterprise basis based on the comparison of our total equity compared to the market value of our outstanding publicly-traded common stock. We do not believe that excess reorganization value is impaired at this time. However, changes in strategy or continued adverse changes in market conditions could impact this judgment and require an impairment loss to be recognized if our book value, including excess reorganization value, exceeds the fair value.

Warranty/Product Liability Accruals

Warranty and product liability accruals are established to provide for estimated future costs as a result of construction and product defects, product recalls and litigation incidental to our business. Liability estimates are determined based on our judgment considering such factors as historical

Table of Contents

experience, the likely current cost of corrective action, manufacturers and subcontractors participation in sharing the cost of corrective action, consultations with third party experts such as engineers, and evaluations by our General Counsel and outside counsel retained to handle specific product liability cases. Although we consider the warranty and product liability accrual reflected on the September 30, 2010 balance sheet to be adequate (see Note 10 to the accompanying condensed consolidated financial statements included herein), there can be no assurance that this accrual will prove to be adequate over time to cover losses due to increased costs for material and labor, the inability or refusal of manufacturers or subcontractors to financially participate in corrective action, unanticipated adverse legal settlements, or other unanticipated changes to the assumptions used to estimate the warranty and product liability accrual.

Stock-Based Compensation Expense

Compensation costs related to our stock based compensation plans are recognized within our income statement. The costs recognized are based on the grant date fair value. Compensation cost for share-based grants is recognized on a straight-line basis over the requisite service period for the entire award (from the date of grant through the period of the last separately vesting portion of the grant).

We calculate the fair value of our non-publicly traded, employee stock options using the Black-Scholes option-pricing model. While the Black-Scholes model is a widely accepted method to calculate the fair value of options, its results are dependent on input variables, two of which, expected term and expected volatility, are significantly dependent on management's judgment. We have concluded that our historical exercise experience is the best estimate of future exercise patterns to determine an option's expected term. To estimate expected volatility, we analyze the historical volatility of our common stock over a period equal to the option's expected term. Changes in management's judgment of the expected term and the expected volatility could have a material effect on the grant-date fair value calculated and expensed within the income statement. In addition, we are required to estimate future grant forfeitures when considering the amount of stock-based compensation costs to record. We have concluded that our historical forfeiture rate is the best measure to estimate future forfeitures of equity-based compensation grants. However, there can be no assurance that our future forfeiture rate will not be materially higher or lower than our historical forfeiture rate, which would affect the aggregate cumulative compensation expense recognized.

Mortgage Loan Loss Allowance

We originate several different loan products to our customers to finance the purchase of their home. We sell all of the loans we originate into the secondary mortgage market generally within 30 days from origination. All of the loans that we originate are underwritten to the standards and specifications of the ultimate investor. Insofar as we underwrite our originated loans to those standards, we bear no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. We employ a quality control department to ensure that our underwriting controls are effectively operating, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. We maintain an allowance for losses on mortgage loans originated that reflects our judgment of the present loss exposure in the loans that we have originated and sold. The allowance is calculated based on an analysis of historical experience and anticipated losses on mortgages held for investment, real estate owned, and specific expected loan repurchases or indemnifications. Although we consider the allowance for loan losses reflected on the September 30, 2010 balance sheet to be adequate (see Note 15 to the accompanying condensed consolidated financial statements included herein), there can be no assurance that this allowance will prove to be adequate over time to cover losses due to unanticipated changes to the assumptions used to estimate the mortgage loan loss allowance.

Table of Contents

Item 3. Quantitative and Qualitative Disclosure About Market Risk

There have been no material changes in our market risks during the nine months ended September 30, 2010. For additional information regarding market risk, see our Annual Report on Form 10-K for the year ended December 31, 2009.

Item 4. Controls and Procedures

As of the end of the period covered by this report, an evaluation was performed under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures pursuant to Exchange Act Rule 13a-15. Based on that evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the design and operation of these disclosure controls and procedures were effective. There have been no changes in our internal controls over financial reporting in the last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal controls over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On July 18, 2007, former and current employees filed lawsuits against us in the Court of Common Pleas in Allegheny County, Pennsylvania and Hamilton County, Ohio, in Superior Court in Durham County, North Carolina, and in the Circuit Court in Montgomery County, Maryland, and on July 19, 2007 in the Superior Court in New Jersey, alleging that we incorrectly classified our sales and marketing representatives as being exempt from overtime wages. These lawsuits are similar in nature to another lawsuit filed on October 29, 2004 by another former employee in the United States District Court for the Western District of New York. The complaints seek injunctive relief, an award of unpaid wages, including fringe benefits, liquidated damages equal to the overtime wages allegedly due and not paid, attorney and other fees and interest, and where available, multiple damages. The suits were filed as purported class actions. However, while a number of individuals have filed consents to join and assert federal claims in the New York action, none of the groups of employees that the lawsuits purport to represent have been certified as a class. The lawsuits filed in Ohio, Pennsylvania, Maryland, New Jersey and North Carolina have been stayed pending further developments in the New York action.

We believe that our compensation practices in regard to sales and marketing representatives are entirely lawful and in compliance with two letter rulings from the United States Department of Labor (DOL) issued in January 2007. The two courts to most recently consider similar claims against other homebuilders have acknowledged the DOL 's position that sales and marketing representatives were properly classified as exempt from overtime wages and the only court to have directly addressed the exempt status of such employees concluded that the DOL 's position was valid. Accordingly, we have vigorously defended and intend to continue to vigorously defend these lawsuits. Because we are unable to determine the likelihood of an unfavorable outcome of this case, or the amount of damages, if any, we have not recorded any associated liabilities in the accompanying condensed, consolidated balance sheets.

In June, 2010, we received a request for Information from the United States Environmental Protection Agency (the EPA) pursuant to Section 308 of the Clean Water Act. The request seeks information about storm water discharge practices in connection with our homebuilding projects completed or underway. We have been cooperating with this request, have provided information to the EPA and intend to continue cooperating with the EPA 's inquiries. At this time, we can not predict the outcome of this inquiry, nor can we reasonably estimate the potential costs that may be associated with its eventual resolution.

Table of Contents

In April 2010, NVR's wholly owned subsidiary, NVR Mortgage Finance, Inc., received a Report of Examination (ROE) from the Office of the Commissioner of Banks of the State of North Carolina reporting certain findings that resulted from the Commissioner's examination of selected files relating to loans originated by us in North Carolina between August 1, 2006 and August 31, 2009. The ROE alleged that certain of the loan files reflected violations of North Carolina and/or U.S. lending or consumer protection laws. The ROE requested that we correct or otherwise address the alleged violations and in some instances requested that we undertake an examination of all of our other loans in North Carolina to determine whether similar alleged violations may have occurred, and if so, to take corrective action. We responded to the ROE by letter dated June 10, 2010, contesting the findings and allegations, providing factual information to correct certain of the findings, and refuting the Commissioner's interpretation of applicable law. The Commissioner has not yet formally responded to our letter. Accordingly, while the outcome of the matter is currently not determinable, we do not expect resolution of the matter to have a material adverse effect on our financial position.

We are also involved in various other litigation arising in the ordinary course of business. At this time, this litigation is not expected to have a material adverse effect on our financial position or results of operations.

Item 1A. Risk Factors

Our business is affected by the risks generally incident to the residential construction business, including, but not limited to:

the availability of mortgage financing;

actual and expected direction of interest rates, which affect our costs, the availability of construction financing, and long-term financing for potential purchasers of homes;

the availability of adequate land in desirable locations on favorable terms;

unexpected changes in customer preferences; and

changes in the national economy and in the local economies of the markets in which we have operations.

All of these risks are discussed in detail below.

The homebuilding industry continues to experience a significant downturn. The continuation of this downturn could adversely affect our business and our results of operations.

The homebuilding industry has continued to experience a significant downturn as a result of declining consumer confidence driven by an economic recession, affordability issues and uncertainty as to the stability of home prices. Additionally, the tightening credit markets have made it more difficult for customers to obtain financing to purchase homes. As a result, we have experienced reduced demand for new homes. Our cancellation rate was approximately 13% in the first nine months of 2010, and was approximately 14%, 23% and 21% during the years ended December 31, 2009, 2008 and 2007, respectively. These ongoing market factors have also resulted in pricing pressures and in turn lower gross profit margins in most of our markets. A continued downturn in the homebuilding industry could result in a material adverse effect on our sales (fewer gross sales and/or higher cancellation rates), profitability, stock performance, ability to service our debt obligations and future cash flows.

If the market value of our inventory or controlled lot position declines, our profit could decrease and we may incur losses.

Inventory risk can be substantial for homebuilders. The market value of building lots and housing inventories can fluctuate significantly as a result of changing market conditions. In addition, inventory carrying costs can be significant and can result in losses in a poorly performing project or

Table of Contents

market. We must, in the ordinary course of our business, continuously seek and make acquisitions of lots for expansion into new markets as well as for replacement and expansion within our current markets, which is accomplished by us entering fixed price purchase agreements and paying forfeitable deposits under the purchase agreement to developers for the contractual right to acquire the lots. In the event of further adverse changes in economic or market conditions, we may cease further building activities in communities or restructure existing purchase agreements, resulting in forfeiture of some or all of any remaining land contract deposit paid to the developer. Either action may result in a loss which could have a material adverse effect on our profitability, stock performance, ability to service our debt obligations and future cash flows.

If the underwriting quality of our mortgage originations is found to be deficient, our profit could decrease and we may incur losses.

We originate several different loan products to our customers to finance the purchase of their home. We sell all of the loans we originate into the secondary mortgage market generally within 30 days from origination. All of the loans that we originate are underwritten to the standards and specifications of the ultimate investor. Insofar as we underwrite our originated loans to those standards, we bear no increased concentration of credit risk from the issuance of loans, except in certain limited instances where early payment default occurs. We employ a quality control department to ensure that our underwriting controls are effectively operating, and further assess the underwriting function as part of our assessment of internal controls over financial reporting. In the event that a substantial number of the loans that we have originated fall into default and the investors to whom we sold the loan determine that we did not underwrite the loan in accordance with their requirements, we could be required to repurchase the loans from the investor or indemnify the investor for any losses incurred. This may result in a loss which could have a material adverse effect on our profitability, stock performance, ability to service our debt obligations and future cash flows.

Because almost all of our customers require mortgage financing, the availability of suitable mortgage financing could impair the affordability of our homes, lower demand for our products, and limit our ability to fully deliver our backlog.

Our business and earnings depend on the ability of our potential customers to obtain mortgages for the purchase of our homes. In addition, many of our potential customers must sell their existing homes in order to buy a home from us. The tightening of credit standards and the availability of suitable mortgage financing could prevent customers from buying our homes and could prevent buyers of our customers' homes from obtaining mortgages they need to complete that purchase, both of which could result in our potential customers' inability to buy a home from us. If our potential customers or the buyers of our customers' current homes are not able to obtain suitable financing, the result could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

If our ability to sell mortgages to investors is impaired, we may be required to fund these commitments ourselves, or may not be able to originate loans at all.

Our mortgage segment sells all of the loans it originates into the secondary market usually within 30 days from the date of closing, and has up to approximately \$100 million available in a repurchase agreement to fund mortgage closings. In the event that disruptions to the secondary markets similar to those which occurred during 2007 and 2008 continue to tighten or eliminate the available liquidity within the secondary markets for mortgage loans, or the underwriting requirements by our secondary market investors continue to become more stringent, our ability to sell future mortgages could decline and we could be required, among other things, to fund our commitments to our buyers with our own financial resources, which is limited, or require our home buyers to find another source of financing. The result of such secondary market disruption could have a material

Table of Contents

adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Interest rate movements, inflation and other economic factors can negatively impact our business.

High rates of inflation generally affect the homebuilding industry adversely because of their adverse impact on interest rates. High interest rates not only increase the cost of borrowed funds to homebuilders but also have a significant effect on housing demand and on the affordability of permanent mortgage financing to prospective purchasers. We are also subject to potential volatility in the price of commodities that impact costs of materials used in our homebuilding business. Increases in prevailing interest rates could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our financial results also are affected by the risks generally incident to our mortgage banking business, including interest rate levels, the impact of government regulation on mortgage loan originations and servicing and the need to issue forward commitments to fund and sell mortgage loans. Our homebuilding customers account for almost all of our mortgage banking business. The volume of our continuing homebuilding operations therefore affects our mortgage banking business.

Our mortgage banking business also is affected by interest rate fluctuations. We also may experience marketing losses resulting from daily increases in interest rates to the extent we are unable to match interest rates and amounts on loans we have committed to originate with forward commitments from third parties to purchase such loans. Increases in interest rates may have a material adverse effect on our mortgage banking revenue, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our operations may also be adversely affected by other economic factors within our markets such as negative changes in employment levels, job growth, and consumer confidence and availability of mortgage financing, one or all of which could result in reduced demand or price depression from current levels. Such negative trends could have a material adverse effect on homebuilding operations.

These factors and thus, the homebuilding business, have at times in the past been cyclical in nature. Any downturn in the national economy or the local economies of the markets in which we operate could have a material adverse effect on our sales, profitability, stock performance and ability to service our debt obligations. In particular, approximately 38% of our home settlements during 2009 occurred in the Washington, D.C. and Baltimore, MD metropolitan areas, which accounted for 48% of our homebuilding revenues in 2009. Thus, we are dependent to a significant extent on the economy and demand for housing in those areas.

Our inability to secure and control an adequate inventory of lots could adversely impact our operations.

The results of our homebuilding operations are dependent upon our continuing ability to control an adequate number of homebuilding lots in desirable locations. There can be no assurance that an adequate supply of building lots will continue to be available to us on terms similar to those available in the past, or that we will not be required to devote a greater amount of capital to controlling building lots than we have historically. An insufficient supply of building lots in one or more of our markets, an inability of our developers to deliver finished lots in a timely fashion due to their inability to secure financing to fund development activities or for other reasons, or our inability to purchase or finance building lots on reasonable terms could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Table of Contents

Volatility in the credit and capital markets may impact our ability to access necessary financing.

Our homebuilding operations are dependent in part on the availability and cost of working capital financing, and may be adversely affected by a shortage or an increase in the cost of such financing. If we require working capital greater than that provided by our operations, we may be required to seek to obtain alternative financing. No assurance can be given that additional financing will be available on terms that are favorable or acceptable. In addition, the credit and capital markets are experiencing significant volatility that is difficult to predict. If we are required to seek financing to fund our working capital requirements, continued volatility in these markets may restrict our flexibility to access financing. If we are at any time unsuccessful in obtaining sufficient capital to fund our planned homebuilding expenditures, we may experience a substantial delay in the completion of any homes then under construction, or we may be unable to control or purchase finished building lots. Any delay could result in cost increases and could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Our mortgage banking operations are dependent on the availability, cost and other terms of mortgage financing facilities, and may be adversely affected by any shortage or increased cost of such financing. No assurance can be given that any additional or replacement financing will be available on terms that are favorable or acceptable. Our mortgage banking operations are also dependent upon the securitization market for mortgage-backed securities, and could be materially adversely affected by any fluctuation or downturn in such market.

Our current indebtedness may impact our future operations.

Our existing indebtedness contains financial and other restrictive covenants and any future indebtedness may also contain covenants. These covenants include, or could include, limitations on our ability, and the ability of our subsidiaries, to incur additional indebtedness, pay cash dividends and make distributions, make loans and investments, enter into transactions with affiliates, effect certain asset sales, incur certain liens, merge or consolidate with any other person, or transfer all or substantially all of our properties and assets. Substantial losses by us or other action or inaction by us or our subsidiaries could result in the violation of one or more of these covenants which could result in decreased liquidity or a default on our indebtedness, thereby having a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Government regulations and environmental matters could negatively affect our operations.

We are subject to various local, state and federal statutes, ordinances, rules and regulations concerning zoning, building design, construction and similar matters, including local regulations that impose restrictive zoning and density requirements in order to limit the number of homes that can eventually be built within the boundaries of a particular area. These regulations may further increase the cost to produce and market our products. In addition, we have from time to time been subject to, and may also be subject in the future to, periodic delays in our homebuilding projects due to building moratoriums in the areas in which we operate. Changes in regulations that restrict homebuilding activities in one or more of our principal markets could have a material adverse effect on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

We are also subject to a variety of local, state and federal statutes, ordinances, rules and regulations concerning the protection of health and the environment. We are subject to a variety of environmental conditions that can affect our business and our homebuilding projects. The particular environmental laws that apply to any given homebuilding site vary greatly according to the location and environmental condition of the site and the present and former uses of the site and adjoining properties. Environmental laws and conditions may result in delays, cause us to incur substantial compliance and other costs, or prohibit or severely restrict homebuilding activity in certain

Table of Contents

environmentally sensitive regions or areas, thereby adversely affecting our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

We are an approved seller/servicer of FNMA, GNMA, FHLMC, FHA and VA mortgage loans, and are subject to all of those agencies' rules and regulations. Any significant impairment of our eligibility to sell/service these loans could have a material adverse impact on our mortgage operations. In addition, we are subject to regulation at the state and federal level with respect to specific origination, selling and servicing practices including the Real Estate Settlement and Protection Act. Adverse changes in governmental regulation may have a negative impact on our mortgage loan origination business.

We face competition in our housing and mortgage banking operations.

The homebuilding industry is highly competitive. We compete with numerous homebuilders of varying size, ranging from local to national in scope, some of whom have greater financial resources than we do. We face competition:

for suitable and desirable lots at acceptable prices;

from selling incentives offered by competing builders within and across developments; and

from the existing home resale market.

Our homebuilding operations compete primarily on the basis of price, location, design, quality, service and reputation.

The mortgage banking industry is also competitive. Our main competition comes from national, regional and local mortgage bankers, thrifts, banks and mortgage brokers in each of these markets. Our mortgage banking operations compete primarily on the basis of customer service, variety of products offered, interest rates offered, prices of ancillary services and relative financing availability and costs.

There can be no assurance that we will continue to compete successfully in our homebuilding or mortgage banking operations. An inability to effectively compete may have an adverse impact on our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

A shortage of building materials or labor, or increases in materials or labor costs may adversely impact our operations.

The homebuilding business has from time to time experienced building material and labor shortages, including shortages in insulation, drywall, certain carpentry work and concrete, as well as fluctuating lumber prices and supply. In addition, high employment levels and strong construction market conditions could restrict the labor force available to our subcontractors and us in one or more of our markets. Significant increases in costs resulting from these shortages, or delays in construction of homes, could have a material adverse effect upon our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Product liability litigation and warranty claims may adversely impact our operations.

Construction defect and home warranty claims are common and can represent a substantial risk for the homebuilding industry. The cost of insuring against construction defect and product liability claims, as well as the claims themselves, can be high. In addition, insurance companies limit coverage offered to protect against these claims. Further restrictions on coverage availability, or significant increases in premium costs or claims, could have a material adverse effect on our financial results.

Table of Contents

We are subject to litigation proceedings that could harm our business if an unfavorable ruling were to occur.

From time to time, we may become involved in litigation and other legal proceedings relating to claims arising from our operations in the normal course of business. As described in, but not limited to, Part II, Item 1, Legal Proceedings of this 10-Q, we are currently subject to certain legal proceedings. Litigation is subject to inherent uncertainties, and unfavorable rulings may occur. We cannot assure you that these or other litigation or legal proceedings will not materially affect our ability to conduct our business in the manner that we expect or otherwise adversely affect us should an unfavorable ruling occur.

Changes in tax laws or the interpretation of tax laws may negatively affect our operating results.

The effects of possible changes in the tax laws or changes in their interpretation could have a material negative impact on our financial results.

Certain of our net deferred tax assets could be substantially limited if we experience an ownership change as defined in the Internal Revenue Code.

Certain of our net deferred tax assets give rise to built-in losses (BILs). Our ability to utilize BILs and to offset our future taxable income and/or to recover previously paid taxes would be limited if we were to undergo an ownership change within the meaning of Section 382 of the Internal Revenue Code, which we refer to as the Code. In general, an ownership change occurs whenever the percentage of the stock of a corporation owned by 5-percent shareholders (within the meaning of Section 382 of the Code) increases by more than 50 percentage points over the lowest percentage of the stock of such corporation owned by such 5-percent shareholders at any time over the preceding three years.

An ownership change under Section 382 of the Code would establish an annual limitation on the amount of BILs we could utilize to offset our taxable income in any single taxable year to an amount equal to (i) the product of a specified rate, which is published by the U.S. Treasury, and the aggregate value of our outstanding stock plus (ii) the amount of unutilized limitation from prior years. The application of these limitations might prevent full utilization of the deferred tax assets attributable to our BILs. We do not believe we have experienced an ownership change as defined by Section 382 and, therefore, we do not believe the BILs are subject to any Section 382 limitation. However, whether a change in ownership occurs in the future is largely outside of our control, and there can be no assurance that such a change will not occur.

Weather-related and other events beyond our control may adversely impact our operations.

Extreme weather or other events, such as significant snowfalls, hurricanes, tornadoes, earthquakes, forest fires, floods, terrorist attacks or war, may affect our markets, our operations and our profitability. These events may impact our physical facilities or those of our suppliers or subcontractors, causing us material increases in costs, or delays in construction of homes, which could have a material adverse effect upon our sales, profitability, stock performance, ability to service our debt obligations and future cash flows.

Table of Contents**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

(Dollars in thousands, except per share data)

We had two repurchase authorizations outstanding during the quarter ended September 30, 2010. On July 31, 2007 (2007 Authorization), we publicly announced the board of directors approval for us to repurchase up to an aggregate of \$300,000 of our common stock in one or more open market and/or privately negotiated transactions. We fully utilized the 2007 Authorization during July 2010. On July 29, 2010 (2010 Authorization), the Board of Directors approved a repurchase authorization providing us authorization to repurchase up to an aggregate of \$300,000 of our common stock in one or more open market and/or privately negotiated transactions. The 2010 Authorization does not have an expiration date. We repurchased the following shares of our common stock during the third quarter of 2010:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Maximum Number (or Approximate Dollar Value) of Shares that May Yet Be Purchased Under the Plans or Programs
July 1 - 31, 2010 (1)	76,969	\$ 652.15	76,969	\$ 300,000
August 1 - 31, 2010 (2)	242,104	\$ 623.75	242,104	\$ 148,986
September 1 - 30, 2010				\$ 148,986
Total	319,073	\$ 630.60	319,073	

(1) All shares were purchased under the 2007 Authorization, fully utilizing the 2007 Authorization. The aggregate \$300,000 of our common stock that remains available for repurchase relates solely to the 2010 Authorization.

(2) All shares were purchased under the 2010

Authorization.
