Table of Contents**AMERICAN SUPERCONDUCTOR CORPORATION****NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS****1. Description of the Business and Basis of Presentation**

American Superconductor Corporation (the Company or AMSC) was founded on April 9, 1987. The Company offers an array of proprietary technologies and solutions spanning the electric power infrastructure from generation to delivery to end use. The Company is a leader in renewable energy, providing proven, megawatt-scale wind turbine designs and electrical control systems. The Company also offers a host of Smart Grid technologies for power grid operators that enhance the reliability, efficiency and capacity of the power grid, and seamlessly integrate renewable energy sources into the power infrastructure. These technologies include superconductor power cable systems, grid-level surge protectors and power electronics-based voltage stabilization systems. The Company operates in two business segments: AMSC Power Systems and AMSC Superconductors.

These unaudited condensed consolidated financial statements of the Company have been prepared in accordance with the Securities and Exchange Commission's (SEC) instructions to Form 10-Q. Certain information and footnote disclosures normally included in the financial statements prepared in accordance with accounting principles generally accepted in the United States (GAAP) have been condensed or omitted pursuant to those instructions. The year-end condensed balance sheet data was derived from audited financial statements but does not include all disclosures required by GAAP. The unaudited condensed consolidated financial statements, in the opinion of management, reflect all adjustments (consisting of normal recurring adjustments) necessary for a fair statement of the results for the interim periods ended December 31, 2010 and 2009 and the financial position at December 31, 2010. The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. All significant intercompany balances and transactions are eliminated in consolidation. Certain reclassifications of prior year amounts have been made to conform to current year presentation. These reclassifications had no effect on net income, cash flows or stockholders' equity.

The results of operations for an interim period are not necessarily indicative of the results of operations to be expected for the fiscal year. These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements for the fiscal year ended March 31, 2010 (fiscal 2009) which are contained in the Company's Annual Report on Form 10-K, filed with the SEC on May 27, 2010.

The Company has performed an evaluation of subsequent events through the time of filing this Quarterly Report on Form 10-Q with the SEC.

Recently Adopted Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2009-13, *Multiple-Deliverable Revenue Arrangements*, pertaining to the accounting for revenue arrangements with multiple deliverables. Specifically, the new standard requires an entity to allocate consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. In the absence of the vendor-specific objective evidence or third-party evidence of the selling prices, consideration must be allocated to the deliverables based on management's best estimate of the selling prices. In addition, the new standard eliminates the use of the residual method of allocation. This new accounting standard supersedes the prior multiple element revenue arrangement accounting rules that were previously used by the Company. The Company adopted this new accounting standard on April 1, 2010 using the prospective method and the adoption did not have a material impact on its condensed consolidated financial statements.

For sales that involve the delivery of multiple elements, the Company allocates revenue to each undelivered element based on the element's fair value as determined by VSOE, which is the price charged when that element is sold separately, or TPE. When VSOE and TPE are unavailable, fair value is based on the Company's best estimate of selling price. When these estimates are used to determine fair value, management makes its estimates using reasonable and objective evidence to determine the price. The Company reviews VSOE and TPE at least annually. If the Company concludes that they are unable to establish fair values for one or more undelivered elements within a multiple-element arrangement using VSOE then it uses TPE or its best estimate of the selling price for that unit of accounting, being the price at which the vendor would transact if the unit of accounting were sold by the vendor regularly on a standalone basis.

Table of Contents**2. Stock-Based Compensation**

The Company accounts for its stock-based compensation at fair value. The following table summarizes employee stock-based compensation expense by financial statement line item for the three and nine months ended December 31, 2010 and 2009 (in thousands):

	Three months ended		Nine months ended	
	December 31,		December 31,	
	2010	2009	2010	2009
Cost of revenues	\$ 442	\$ 307	\$ 1,277	\$ 886
Research and development	708	509	1,867	1,499
Selling, general and administrative	2,295	2,706	8,125	8,055
Total	\$3,445	\$3,522	\$11,269	\$10,440

During the nine months ended December 31, 2010, the Company granted approximately 229,000 shares and 347,000 shares of stock options and restricted stock, respectively, to employees under the 2007 Stock Incentive Plan. The restricted stock awards include approximately 86,500 shares of performance-based restricted stock, which will vest upon achievement of certain annual financial and operational performance measurements. The remaining shares granted vest upon the passage of time, generally pro rata over 3 years. For awards that vest upon the passage of time, expense is being recorded on a straight-line basis over the vesting period. At December 31, 2010, the Company determined that achievement of the performance measures is probable and as such, is recognizing the fair value of the performance-based awards over the estimated performance period of each award.

The total unrecognized compensation cost for unvested employee stock-based compensation awards outstanding, net of estimated forfeitures, was \$20.0 million at December 31, 2010. This expense will be recognized over a weighted-average expense period of 2.0 years.

The weighted-average assumptions used in the Black-Scholes valuation model for stock options granted during the three and nine months ended December 31, 2010 and 2009 are as follows:

	Three months		Nine months ended	
	ended		December 31,	
	December 31,	December 31,	2010	2009
	2010	2009	2010	2009
Expected volatility	61.4%	65.6%	65.5%	68.9%
Risk-free interest rate	2.4%	2.6%	2.1%	2.6%
Expected life (years)	6.1	4.8	6.1	4.8
Dividend yield	None	None	None	None

The expected volatility was estimated based on an equal weighting of the historical volatility of the Company's common stock and the implied volatility of the Company's traded options. The expected life was estimated based on an analysis of the Company's historical experience of exercise, cancellation, and expiration patterns. The risk-free interest rate is based on the average of the five and seven year U.S. Treasury rates for the three and nine months ended December 31, 2010 and the five year U.S. Treasury rates for the three and nine months ended December 31, 2009. The stock-based compensation expense recognized in the unaudited condensed consolidated statements of income is based on awards that ultimately are expected to vest; therefore, the amount of expense has been reduced for estimated forfeitures. Forfeitures are estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates. Forfeitures were estimated based on historical experience. This analysis is re-evaluated periodically and the forfeiture rate is adjusted as necessary.

3. Computation of Net Income per Common Share

Basic earnings per share (EPS) is computed by dividing net earnings by the weighted-average number of common shares outstanding for the period. Diluted EPS is computed by dividing the net earnings by the

weighted-average number of common shares and dilutive common equivalent shares outstanding during the period, calculated using the treasury stock method. Common equivalent shares include the effect of restricted stock, exercise of stock options and warrants and contingently issuable shares. For the three and nine months ended December 31, 2010 and 2009, common equivalent shares of 0.6 million shares and 1.3 million shares, respectively, and 0.1 million shares and 0.9 million shares, respectively, were not included in the calculation of diluted EPS as they were considered anti-dilutive.

Table of Contents

The following table reconciles the numerators and denominators of the earnings per share calculation for the three and nine months ended December 31, 2010 and 2009 (in thousands, except per share data):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Numerator:				
Net income	\$ 16,004	\$ 5,179	\$ 35,161	\$ 11,311
Denominator:

Weighted-average shares subject to repurchase	(248)	(42)	(239)	(54)
Shares used in per-share calculation basic	48,418	44,623	46,385	44,222
Dilutive effect of employee equity incentive plans	599	943	691	850
Shares used in per-share calculation diluted	49,017	45,566	47,076	45,072
Net income per share basic	\$ 0.33	\$ 0.12	\$ 0.76	\$ 0.26
Net income per share diluted	\$ 0.33	\$ 0.11	\$ 0.75	\$ 0.25

4. Fair Value Measurements

The accounting standard for fair value measurements provides a framework for measuring fair value and requires expanded disclosure regarding fair value measurements. Fair value is defined as the price that would be received for an asset or the exit price that would be paid to transfer a liability in the principal or most advantageous market in an orderly transaction between market participants on the measurement date. The accounting standard established a fair value hierarchy which requires an entity to maximize the use of observable inputs, where available. This hierarchy prioritizes the inputs into three broad levels as follows:

Valuation Hierarchy

- Level 1** - Inputs are unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.
- Level 2** - Inputs include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the asset or liability, and inputs that are derived principally from or corroborated by observable market data by correlation or other means (market corroborated inputs).
- Level 3** - Unobservable inputs that reflect the Company's assumptions that market participants would use in pricing the asset or liability. The Company develops these inputs based on

the best information available, including its own data.

A financial asset's or liability's classification within the hierarchy is determined based on the lowest level input that is significant to the fair value measurement.

Table of Contents

The following table provides the assets carried at fair value, measured as of December 31, 2010 and March 31, 2010 (in thousands):

	Total Carrying Value	Quoted Prices in Active Markets (Level 1)	Using Significant Other Observable Inputs (Level 2)	Using Significant Unobservable Inputs (Level 3)
December 31, 2010:				
Assets:				
Cash equivalents	\$ 137,445	\$ 137,445	\$	\$
Short-term marketable securities	73,910		73,910	
Long-term marketable securities	12,161		12,161	
Derivatives	2,335		2,335	
Liabilities:				
Derivatives	\$ 534	\$	\$ 534	\$
March 31, 2010:				
Assets:				
Cash equivalents	\$ 29,054	\$ 29,054	\$	\$
Short-term marketable securities	54,469		54,469	
Long-term marketable securities	7,342		7,342	
Derivatives	168		168	

Valuation Techniques*Cash Equivalents*

Cash equivalents consist of highly liquid instruments with maturities of three months or less that are regarded as high quality, low risk investments and are measured using such inputs as quoted prices, and are classified within Level 1 of the valuation hierarchy. Cash equivalents consist principally of money market accounts and corporate debt instruments.

Marketable Securities

Long-term and short-term marketable securities consist primarily of government-backed securities and sovereign debt are measured using such inputs as quoted prices for identical or similar assets in markets that are not active, inputs other than quoted prices that are observable for the asset (for example, interest rates and yield curves observable at commonly quoted intervals), and inputs that are derived principally from or corroborated by observable market data by correlation or other means, and are classified within Level 2 of the valuation hierarchy. Short-term marketable securities have maturities of greater than three months from original purchase date but less than twelve months from the date of the balance sheet. All marketable securities are considered available-for-sale and are carried at fair value. The Company periodically reviews the realizability of each short-term and long-term marketable security when impairment indicators exist with respect to the security. If an other-than-temporary impairment of value of the security exists, the carrying value of the security is written down to its estimated fair value.

Derivatives

The derivatives entered into by the Company are valued using over-the-counter quoted market prices for similar instruments, and are classified within Level 2 of the valuation hierarchy.

5. Derivative Financial Instruments

The Company's foreign currency risk management strategy is principally designed to mitigate the potential financial impact of changes in the value of transactions and balances denominated in foreign currency resulting from changes in foreign currency exchange rates. The Company's foreign currency hedging program uses both forward contracts and currency options to manage the foreign currency exposures that exist as part of its ongoing business operations.

Table of Contents*Cash Flow Hedges*

The Company hedges a portion of its intercompany sales of inventory over a maximum period of 15 months using forward foreign exchange contracts accounted for as cash flow hedges to mitigate the impact of volatility associated with foreign currency transactions.

For forward foreign exchange contracts that are designated as cash flow hedges, if they are effective in offsetting the variability of the hedged cash flows, and otherwise meet the hedge accounting criteria, changes in the derivatives value are not included in current earnings but are included in other comprehensive income in stockholders equity. The changes in fair value will subsequently be reclassified into earnings as a component of cost of revenues, as applicable, when the forecasted transaction occurs. To the extent that a previously forecasted transaction is no longer an effective hedge, any ineffectiveness measured in the hedging relationship is recorded in earnings in the period it occurs. The Company does not enter into derivative instruments for trading or speculative purposes. Realized gains and losses resulting from these cash flow hedges offset the foreign exchange gains and losses on the underlying transactions being hedged. Gains and losses on derivatives not designated for hedge accounting or representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in other income (expense), net.

At December 31, 2010, the Company had forward contracts outstanding to hedge cash flow exposure at the Company's wholly-owned Austrian subsidiary, AMSC Windtec GmbH (AMSC Windtec), with aggregate USD equivalent notional amounts of \$28.9 million. These contracts will expire at various dates through December 2011. The net gain or loss from these cash flow hedges reported in accumulated other comprehensive income will be reclassified to earnings and recorded in cost of revenues in our condensed consolidated statement of income when the related inventory is sold to third-party customers.

Balance Sheet Hedges

In addition to cash flow hedges, the Company also enters into foreign currency forward exchange contracts to mitigate the impact of foreign exchange risk related to certain non-functional currency receivable balances in its foreign entities. The Company does not elect hedge accounting treatment for these hedges, consequently, changes in the fair value of these contracts are recorded within other income (expense), net, in the period which they occur. At December 31, 2010, the Company had forward contracts outstanding with aggregate USD equivalent notional amounts of \$87.5 million. These contracts will expire at various dates through February 2011.

The fair value amounts of asset derivatives included in prepaid expenses and other current assets and liability derivatives included in accounts payable and accrued expenses in the condensed consolidated balance sheets related to forward foreign exchange contracts as of December 31, 2010 and March 31, 2010 were as follows (in thousands):

	Asset derivatives		Liability derivatives	
	December 31, 2010	March 31, 2010	December 31, 2010	March 31, 2010
Derivatives designated as cash flow hedges	\$ 475	\$ 168	\$ 470	\$
Derivatives not designated as cash flow hedges	1,860	168	64	
Total	\$ 2,335	\$ 168	\$ 534	\$

The Company recognized the following pre-tax gains (losses) in other comprehensive income related to forward foreign exchange contracts designated as cash flow hedges (in thousands):

	Three months ended December 31,	Nine months ended December	December
--	---------------------------------	----------------------------	----------

	31, 2010	2009	31, 2010	31, 2009
Gains (losses) recognized in other comprehensive income	\$ (1,658)	\$	\$ 101	\$

The Company recognized the following pre-tax gains (losses) related to forward foreign exchange contracts in the condensed consolidated statements of income (in thousands):

	Three months ended		Nine months ended	
	December	31,	December	December

Gains (losses) recognized in other income (expense), net	\$ (1,423)	\$ 585	\$ 2,552	\$ 448
Gains (losses) recognized in cost of revenues	978	\$	1,418	\$
Total	\$ (445)	\$ 585	\$ 3,970	\$ 448

Table of Contents**6. Accounts Receivable**

Accounts receivable consisted of the following (in thousands):

	December 31, 2010	March 31, 2010
Accounts receivable (billed)	\$ 114,482	\$ 48,517
Accounts receivable (unbilled)	9,422	10,305
Less: Allowance for doubtful accounts	(2,528)	(1,532)
Accounts receivable, net	\$ 121,376	\$ 57,290

The Company also recorded net long-term accounts receivable of \$19.2 million and \$14.1 million as of December 31, 2010 and March 31, 2010, respectively, which are also classified within other assets and as long-term deferred revenue on the condensed consolidated balance sheet.

7. Inventory

The components of inventory are as follows (in thousands):

	December 31, 2010	March 31, 2010
Raw materials	\$ 21,778	\$ 18,065
Work-in-process	4,846	7,318
Finished goods	10,077	7,879
Deferred program costs	4,140	2,596
Net inventory	\$ 40,841	\$ 35,858

Finished goods inventory as of December 31, 2010 includes \$1.0 million of costs of product shipped to customers on contracts for which revenue was deferred until final customer acceptance.

Deferred program costs as of December 31, 2010 and March 31, 2010 primarily represent costs incurred on wind turbine development programs accounted for under contract accounting where the Company needs to achieve certain milestones or complete development programs before revenue and costs will be recognized.

8. Product Warranty

The Company generally provides a one to two year warranty on its products, commencing upon installation. A provision is recorded upon revenue recognition to cost of revenues for estimated warranty expense based on historical experience.

Product warranty activity was as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Balance at beginning of period	\$7,374	\$5,497	\$6,431	\$4,749
Accruals for warranties during the period	2,193	2,238	6,533	4,955
Settlements and adjustments during the period	(1,119)	(1,703)	(4,516)	(3,672)
Balance at end of period	\$8,448	\$6,032	\$8,448	\$6,032

9. Income Taxes

The Company recorded income tax expense of \$7.8 million and \$23.6 million for the three and nine months ended December 31, 2010, respectively, and \$5.6 million and \$13.8 million for the three and nine months ended December 31, 2009, respectively, related primarily to income generated in foreign jurisdictions. The Company has provided a valuation allowance against all deferred tax assets in the U.S. as it is more likely than not that its U.S. deferred tax assets are not currently realizable due to the net operating losses incurred by the Company in the U.S. since its inception.

Table of Contents**10. Commitments and Contingencies**

The Company enters into long-term construction contracts with customers that require the Company to obtain performance bonds. The Company is required to deposit an amount equivalent to some or all the face amount of the performance bonds into an escrow account until the termination of the bond. When the performance conditions are met, amounts deposited as collateral for the performance bonds are returned to the Company. In addition, the Company has various contractual arrangements in which minimum quantities of goods or services have been committed to be purchased on an annual basis.

As of December 31, 2010, the Company had five performance bonds on behalf of AMSC Windtec and its wholly-owned Chinese subsidiary, Suzhou AMSC Superconductor Co. Ltd (AMSC China), in support of customer contracts to guarantee supply of core components and software. The total value of the outstanding performance bonds is \$1.2 million and they expire between November 30, 2011 and March 31, 2014. In the event that the payment is made in accordance with the requirements of any of these performance bonds, the Company would record the payment as an offset to revenue.

At December 31, 2010 and March 31, 2010, the Company had \$5.4 million and \$5.7 million, respectively, of restricted cash included in current assets, which includes the restricted cash securing the AMSC Windtec and AMSC China performance bonds noted above. The Company also has an additional \$3.8 million in bank guarantees and letters of credit supported by unsecured lines of credit.

The Company also has unused, unsecured lines of credit consisting of \$18.2 million (approximately CNY 120.4 million) and \$2.7 million (approximately 2.0 million) as of December 31, 2010. Recently, the Chinese government adopted various economic measures designed to restrict the availability of credit and contain inflation which may impact the Company's ability to access unused lines of credit in China.

From time to time, the Company may be involved in legal and administrative proceedings and claims of various types. The Company records a liability in its consolidated financial statements for these matters when a loss is known or considered probable and the amount can be reasonably estimated. Management reviews these estimates in each accounting period as additional information is known and adjusts the loss provision when appropriate. If the loss is not probable or cannot be reasonably estimated, a liability is not recorded in the consolidated financial statements. At December 31, 2010, the Company did not have any material pending litigation.

11. Cost-Sharing Arrangements

The Company has entered into several cost-sharing arrangements with various agencies of the United States government. Funds paid to the Company under these agreements are not reported as revenues but are used to directly offset the Company's research and development (R&D) and selling, general and administrative (SG&A) expenses, and to purchase capital equipment.

Costs incurred and funding received under these agreements are as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Costs incurred	\$ 523	\$ 943	\$ 1,547	\$ 3,418
R&D expenditures offset by cost sharing funding received	128	250	402	867
SG&A expenditures offset by cost sharing funding received	111	217	349	755

At December 31, 2010, total funding received under these agreements was \$30.4 million.

12. Acquisitions***Acquisition of Windtec Consulting GmbH***

On January 5, 2007, the Company acquired AMSC Windtec. AMSC Windtec develops and sells electrical systems for wind turbines. AMSC Windtec also provides technology transfer for the manufacturing of wind turbines;

documentation services; and training and support regarding the assembly, installation, commissioning, and service of wind turbines.

The acquisition agreement included an earn-out provision for the issuance of up to an additional 1,400,000 shares of common stock upon AMSC Windtec's achievement of specified revenue objectives during the first four fiscal years

Table of Contents

following closing of the acquisition. During the nine months ended December 31, 2010, the Company recorded contingent consideration of \$10.0 million to goodwill and additional paid-in capital representing 350,000 shares earned. These 350,000 shares are expected to be issued in the first quarter of the fiscal year ending March 31, 2012. As of December 31, 2010, the Company has recorded contingent consideration up to the maximum amount of shares that could be earned under the agreement. The carrying amount of goodwill at December 31, 2010 and March 31, 2010 was \$46.4 million and \$36.7 million, respectively. The goodwill activity for the nine months ended December 31, 2010 is as follows (in thousands):

Balance at April 1, 2010	\$ 36,696
Contingent consideration	10,003
Net foreign exchange rate impact	(263)
Balance at December 31, 2010	\$ 46,436

Investment in Tres Amigas

On October 9, 2009, the Company made an investment in Tres Amigas LLC, (Tres Amigas), a merchant transmission company, for \$1.8 million, consisting of \$0.8 million in cash and \$1.0 million in AMSC common stock. The investment was recorded under the equity method of accounting and is included in other assets on the condensed consolidated balance sheet. The Company's minority interest in the losses of Tres Amigas are included in other income (expense), net, on the condensed consolidated statements of income and were immaterial for the three and nine months ended December 31, 2010. The net investment activity for the nine months ended December 31, 2010 is as follows (in thousands):

Balance at April 1, 2010	\$ 1,750
Minority interest in net losses	(685)
Balance at December 31, 2010	\$ 1,065

On January 6, 2011, the Company increased its minority position in Tres Amigas for \$1.8 million in cash consideration.

Investment in Blade Dynamics Ltd.

On August 12, 2010, the Company acquired (through AMSC Windtec), a 25 percent equity ownership position in Blade Dynamics Ltd. (Blade Dynamics), a designer and manufacturer of advanced wind turbine blades based on proprietary materials and structural technologies, for \$8.0 million in cash. The investment was recorded under the equity method of accounting and is included in other assets on the condensed consolidated balance sheet. The Company's minority interest in net losses of Blade Dynamics are included in other income (expense), net, on the condensed consolidated statements of income. The net investment activity for the nine months ended December 31, 2010 is as follows (in thousands):

Balance at April 1, 2010	\$
Purchase of minority investment	8,000
Minority interest in net losses	(578)
Net foreign exchange rate impact	320
Balance at December 31, 2010	\$ 7,742

13. Business Segment Information

The Company reports its financial results in two reportable business segments: AMSC Power Systems and AMSC Superconductors.

The AMSC Power Systems business segment produces a broad range of products to increase electrical grid capacity and reliability, supplies electrical systems used in wind turbines, provides power electronic products that interconnect wind farms and solar power plants to the power grid, licenses proprietary wind turbine designs to manufacturers of such systems, provides consulting services to the wind industry, and offers products that enhance power quality for industrial operations.

The AMSC Superconductors business segment manufactures Amperium high temperature superconductor (HTS) wire and coils; designs and develops superconductor products, such as power cables, fault current limiters and motors; and manages large-scale superconductor projects.

Table of Contents

The operating results for the two business segments are as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Revenues:				
AMSC Power Systems	\$112,114	\$77,026	\$305,582	\$219,513
AMSC Superconductors	2,079	3,633	7,350	8,818
Total	\$114,193	\$80,659	\$312,932	\$228,331

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Operating income:				
AMSC Power Systems	\$31,833	\$19,941	\$84,159	\$55,202
AMSC Superconductors	(6,878)	(5,941)	(19,322)	(17,085)
Unallocated corporate expenses	(3,485)	(3,560)	(11,342)	(10,956)
Total	\$21,470	\$10,440	\$53,495	\$27,161

The accounting policies of the business segments are the same as those for the consolidated Company. Certain corporate expenses which the Company does not believe are specifically attributable or allocable to either of the two business segments have been excluded from the segment operating income. Unallocated corporate expenses include stock-based compensation expense of \$3.4 million and \$3.5 million for the three months ended December 31, 2010 and 2009, respectively, and \$11.3 million and \$10.4 million for the nine months ended December 31, 2010 and 2009, respectively. Unallocated corporate expenses for the nine months ended December 31, 2009 included \$0.5 million of restructuring charges related primarily to the closure of the Company's facility in Westborough, Massachusetts.

For the three and nine months ended December 31, 2010, a substantial portion of the Company's revenues was derived from one customer: Sinovel Wind Co., Ltd., a manufacturer of wind turbines based in China. Sales to Sinovel represented 73% and 75% of total revenues for the three and nine months ended December 31, 2010, respectively, compared to 76% and 69% for the three and nine months ended December 31, 2009, respectively.

Total assets for the two business segments are as follows (in thousands):

	December 31, 2010	March 31, 2010
AMSC Power Systems	\$ 293,127	\$ 179,873
AMSC Superconductors	55,375	32,978
Corporate assets	291,939	187,333
Total	\$ 640,441	\$ 400,184

14. Stockholders Equity

Public Offering

In November 2010, the Company issued 4,600,000 shares of common stock at a price of \$35.50 per share in a follow-on public offering, which resulted in net proceeds to the Company of approximately \$155.2 million, after deducting the underwriting costs and offering expenses of \$8.1 million. The Company intends to use the net proceeds of the offering to expand its superconductor wire manufacturing capacity, to pursue strategic business relationships for the purpose of executing its growth and diversification strategies, including minority investments and acquisitions, and for other general corporate purposes.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended. For this purpose, any statements contained herein that relate to future events or conditions, including without limitation, the statements under Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations and in Part II, Item 1A. Risk Factors and located elsewhere herein regarding industry prospects or our prospective results of operations or financial position, may be deemed to be forward-looking statements. Without limiting the foregoing, the words believes, anticipates, plans, expects, and similar expressions are intended to identify forward-looking statements. Such forward-looking statements represent management's current expectations and are inherently uncertain. The important factors discussed under the caption Risk Factors in Part II. Item 1A and Part I. Item 1A of our Form 10-K for the fiscal year ended March 31, 2010, among others, could cause actual results to differ materially from those indicated by forward-looking statements made herein and presented elsewhere by management from time to time. Any such forward-looking statements represent management's estimates as of the date of this Quarterly Report on Form 10-Q. While we may elect to update such forward-looking statements at some point in the future, we disclaim any obligation to do so, even if subsequent events cause our views to change. These forward-looking statements should not be relied upon as representing our views as of any date subsequent to the date of this Quarterly Report on Form 10-Q.

The Windtec logo and design is a registered European Union Community Trademark. All other brand names, product names, trademarks or service marks appearing in this Quarterly Report on Form 10-Q are the property of their respective holders.

Executive Overview

American Superconductor Corporation was founded in 1987. We offer an array of proprietary technologies and solutions spanning the electric power infrastructure from generation to delivery to end use. Our company is a leader in renewable energy, providing proven, megawatt-scale wind turbine designs and electrical control systems. We also offer a host of Smart Grid technologies for power grid operators that enhance the reliability, efficiency and capacity of the grid, and seamlessly integrate renewable energy sources into the power infrastructure. These technologies include superconductor power cable systems, grid-level surge protectors and power electronics-based voltage stabilization systems. Our technologies are protected by a broad and deep intellectual property portfolio consisting of hundreds of patents and licenses worldwide.

Our fiscal year begins on April 1 and ends on March 31. This document refers to fiscal 2010, which is defined as the period beginning on April 1, 2010 and concluding on March 31, 2011. The third quarter of fiscal 2010 began on October 1, 2010 and concluded on December 31, 2010.

Our revenues are primarily derived from our AMSC Power Systems business unit, which designs and licenses wind turbines and provides electrical systems and controls for those wind turbines; provides a range of products to increase electrical grid capacity and reliability; provides power electronic products that interconnect wind farms and solar power plants to the power grid; and provides products that enhance power quality for industrial operations. Most of the products offered by AMSC Power Systems utilize our proprietary power electronic converters and enabling software. These solutions increase the quantity, quality and reliability of electric power that is produced by renewable energy sources, transmitted by electric utilities or consumed by large industrial entities. The market for these solutions continues to be strong, particularly in Asia, where the production of wind turbines and demand for wind turbine electrical systems and controls continues to increase rapidly.

Our AMSC Superconductors business unit designs and develops superconductor products, such as power cables, fault current limiters, generators, motors and degaussing systems; and it manages large-scale superconductor

projects. AMSC Superconductors also manufactures the Amperium high temperature superconductor (HTS) wire that goes into superconductor products, providing these systems with compelling performance, efficiency, size and weight advantages compared with conventional electrical equipment. Many superconductor product demonstrations have been successfully completed to date and customer interest is increasing, particularly for superconductor power cables and superconductor wind turbine generators. While these systems have not yet been broadly commercialized, we received our first large-scale commercial wire contract in fiscal 2010.

Table of Contents

Our strategy for both AMSC Power Systems and AMSC Superconductors is to drive revenue growth and enhance operating results by increasing adoption of our products. We are targeting high-growth segments of the renewable energy and power grid markets with our advanced engineering capabilities, support services and power electronics and superconductor product offerings.

Our wind power products and services are marketed globally, with a particular focus on the Asia Pacific region and emerging economies where demand for local wind turbine manufacturing has been increasing significantly. Our power grid products and services have historically been marketed primarily in the United States. However, due to increasing grid interconnection requirements for renewable energy sites and rising demands for Smart Grid solutions overseas, our power grid activities and sales have increasingly become global in nature. Although we leverage strategic partnerships and reseller relationships to increase our revenue streams, we address market needs primarily with our direct sales force.

We currently have offices and operations in 11 countries around the world. Our Devens, Massachusetts facility serves as our corporate headquarters and our center of excellence for superconductor research, development and manufacturing. Our facilities in Wisconsin serve as our center of excellence for power electronics and controls research and development and power grid product manufacturing. Our facility in Suzhou, China serves as our center of excellence for wind turbine power electronics manufacturing. Our facility in Klagenfurt, Austria serves as our center of excellence for wind turbine design and engineering. Our other locations focus primarily on applications engineering, sales and/or field service.

As of December 31, 2010 and March 31, 2010, we had backlog of approximately \$883 million and \$588 million, respectively. The increase in backlog was primarily the result of a substantial new order received from our largest customer, Sinovel Wind Co., Ltd. (Sinovel), a manufacturer of wind turbines based in China. Based on this level of backlog and our pipeline of business, we believe we are well positioned to continue our growth.

Our cash requirements depend on numerous factors, including successful completion of our product development activities, ability to commercialize our product prototypes, and the rate of customer and market adoption of our products. Significant deviations to our business plan with regard to these factors, which are important drivers to our business, could have a material adverse effect on our operating performance, financial condition, and future business prospects. We expect to pursue the expansion of our operations through internal growth and potential strategic alliances and acquisitions.

Critical Accounting Policies and Estimates

The preparation of condensed consolidated financial statements requires that we make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. We base our estimates on historical experience and various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ under different assumptions or conditions. There were no significant changes in the third quarter of fiscal 2010 in our critical accounting policies as disclosed in our Form 10-K for fiscal 2009, which ended on March 31, 2010.

Derivative Contracts

Our foreign currency risk management strategy is principally designed to mitigate the potential financial impact of changes in the value of transactions and balances denominated in foreign currency resulting from changes in foreign currency exchange rates. Our foreign currency hedging program uses both forward contracts and currency options to manage the foreign currency exposures that exist as part of its ongoing business operations. We recognize all derivatives, including forward currency-exchange contracts, in the balance sheet at fair value.

Cash Flow Hedges

We hedge a portion of our intercompany sales of inventory over a maximum period of 15 months using forward foreign exchange contracts accounted for as cash flow hedges to mitigate the impact of volatility associated with foreign currency transactions.

For forward foreign exchange contracts that are designated as cash flow hedges, if they are effective in offsetting the variability of the hedged cash flows, and otherwise meet the hedge accounting criteria, changes in the derivatives value are not included in current earnings but are included in other comprehensive income in stockholders

equity. The changes in fair value will subsequently be reclassified into earnings as a component of cost of revenues, as applicable, when the forecasted transaction occurs. To the extent that a previously forecasted transaction is no longer an effective hedge, any ineffectiveness measured in the hedging relationship is recorded in earnings in the period it occurs. We do not enter into derivative instruments for trading or speculative purposes. Realized gains and losses resulting from these cash flow hedges offset the foreign exchange gains and losses on the underlying transactions being hedged. Gains and losses on derivatives not

Table of Contents

designated for hedge accounting or representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in other income (expense), net.

Balance Sheet Hedges

In addition to cash flow hedges, we also enter into foreign currency forward exchange contracts to mitigate the impact of foreign exchange risk related to certain non-functional currency receivable balances in our foreign entities. We do not elect hedge accounting treatment for these hedges, consequently, changes in the fair value of these contracts are recorded within other income (expense), net, in the period which they occur.

Revenue Recognition

In October 2009, the FASB issued Accounting Standards Update (ASU) No. 2009-13, *Multiple-Deliverable Revenue Arrangements* pertaining to the accounting for revenue arrangements with multiple deliverables. Specifically, the new standard requires an entity to allocate consideration at the inception of an arrangement to all of its deliverables based on their relative selling prices. In the absence of the vendor-specific objective evidence (VSOE) or third-party evidence (TPE) of the selling prices, consideration must be allocated to the deliverables based on management s best estimate of the selling prices. In addition, the new standard eliminates the use of the residual method of allocation.

For sales that involve the delivery of multiple elements, we allocate revenue to each undelivered element based on the element s fair value as determined by VSOE, which is the price charged when that element is sold separately, or TPE. When VSOE and TPE are unavailable, fair value is based on our best estimate of selling price. When our estimates are used to determine fair value, management makes its estimates using reasonable and objective evidence to determine the price. We review VSOE and TPE at least annually. If we conclude we are unable to establish fair values for one or more undelivered elements within a multiple-element arrangement using VSOE then we use TPE or our best estimate of the selling price for that unit of accounting, being the price at which the vendor would transact if the unit of accounting were sold by the vendor regularly on a standalone basis.

The new accounting standard supersedes the prior multiple element revenue arrangement accounting rules that were previously used by us. We adopted this new accounting standard on April 1, 2010 using the prospective method and the adoption did not have a material impact on our condensed consolidated financial statements.

Results of Operations**Three and nine months ended December 31, 2010 compared to the three and nine months ended December 31, 2009****Revenues**

Total revenues increased by 42% and 37% to \$114.2 million and \$312.9 million for the three and nine months ended December 31, 2010, respectively, from \$80.7 million and \$228.3 million for the three and nine months ended December 31, 2009, respectively. Our revenues are summarized as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Revenues:				
AMSC Power Systems	\$ 112,114	\$ 77,026	\$ 305,582	\$ 219,513
AMSC Superconductors	2,079	3,633	7,350	8,818
Total	\$ 114,193	\$ 80,659	\$ 312,932	\$ 228,331

Revenues in our AMSC Power Systems business unit consist of revenues from wind turbine electrical systems and core components, wind turbine license and development contracts as well as D-VAR®, D-VAR RT, SVC, and PowerModule product sales, service contracts, and consulting arrangements. We also engineer, install and commission our products on a turnkey basis for some customers. Our AMSC Power Systems business unit accounted for 98% of total revenues for both of the three and nine months ended December 31, 2010, compared to 95% and 96% for the three and nine months ended December 31, 2009, respectively. Revenues in the AMSC Power Systems business unit

increased 46% and 39% to \$112.1 million and \$305.6 million in the three and nine months ended December 31, 2010, respectively, from \$77.0 million and \$219.5 million in the three and nine months ended December 31, 2009, respectively. The increases in AMSC Power Systems business unit revenues were primarily due to greater sales of wind turbine electrical control systems and core components,

Table of Contents

primarily to customers in China. Based on the average Euro and renminbi exchange rates for the third quarter of fiscal 2010, revenues denominated in these foreign currencies translated into U.S. dollars were \$1.8 million higher compared to the translation of these revenues using the average exchange rates of these currencies for the third quarter of fiscal 2009.

For the three and nine months ended December 31, 2010, a substantial portion of our revenues was derived from one customer, Sinovel. Sales to Sinovel represented 73% and 75% of total revenues for the three and nine months ended December 31, 2010, respectively, compared to 76% and 69% for the three and nine months ended December 31, 2009, respectively.

On May 17, 2010, we announced an extension of our supply of core electrical components for 1.5 megawatt (MW) wind turbines to Sinovel through late 2013 under a new contract valued at approximately \$445 million.

Revenues in our AMSC Superconductors business unit consist of contract revenues, sales of our Amperium HTS wire, revenues under government-sponsored electric utility projects and other prototype development contracts. Our AMSC Superconductors business unit revenues are primarily recorded using the percentage-of-completion method. Our AMSC Superconductors business unit accounted for 2% of total revenues for both the three and nine months ended December 31, 2010, respectively, compared to 5% and 4% for the three and nine months ended December 31, 2009, respectively. Our AMSC Superconductors business unit revenues decreased 43% and 17% to \$2.1 million and \$7.4 million in the three and nine months ended December 31, 2010, respectively, from \$3.6 million and \$8.8 million for the three and nine months ended December 31, 2009, respectively. Revenues from significant AMSC Superconductors government-funded contracts are summarized as follows (in thousands):

Project name	Expected total contract value	Revenue earned through December 31, 2010	Revenue earned for the three months ended		Revenue earned for the nine months ended	
			December 31, 2010	2009	December 31, 2010	2009
HYDRA	\$ 24,908	\$ 10,194	\$ 112	\$ 196	\$ 621	\$ 1,025
LIPA I and II	40,141	37,360	861	1,115	3,009	2,754
DOE-FCL	7,898	5,964	571	403	1,558	980
NAVSEA Motor Study	6,511	6,464	103	133	252	207
Total	\$ 79,458	\$ 59,982	\$ 1,647	\$ 1,847	\$ 5,440	\$ 4,966

These significant projects represented 79% and 74% of AMSC Superconductors business unit revenues for the three and nine months ended December 31, 2010, respectively, compared to 51% and 56% for the three and nine months ended December 31, 2009, respectively.

Project HYDRA is a contract with Consolidated Edison, Inc. which is being partially funded by the U.S. Department of Homeland Security (DHS). DHS is expected to invest up to a total of \$24.9 million in the development of a new high temperature superconductor power grid technology called FaultBlocker cable systems. FaultBlocker cable systems are designed to utilize customized Amperium HTS wires, and ancillary controls to deliver more power through the grid while also being able to suppress power surges that can disrupt service. Of the total \$24.9 million in funding expected from DHS, it has committed funding of \$12.6 million to us as of December 31, 2010. Consolidated Edison and Southwire Company are subcontractors to us on this project.

LIPA I, completed in the first quarter of fiscal 2009, was a project to install an HTS power cable system at transmission voltage using our first generation HTS wire for the Long Island Power Authority. LIPA II is a project to

install an HTS power cable utilizing our Amperium wire for the Long Island Power Authority. DOE-FCL is a project to develop and demonstrate a transmission voltage SuperLimiter fault current limiter (FCL). The NAVSEA Motor Study is a project designed to test the 36.5 MW superconductor motor developed for the U.S. Navy.

Cost-sharing funding

In addition to reported revenues, we also received funding of \$0.2 million and \$0.7 million for the three and nine months ended December 31, 2010, respectively, under U.S. government cost-sharing agreements with the U.S. Air Force and the Department of Energy, compared to \$0.4 million and \$1.6 million for the three and nine months ended December 31, 2009, respectively. The decrease in cost-sharing funding is primarily due to the completion of the NIST Advanced Technology Program. All of our cost-sharing agreements provide funding in support of development work on our Amperium HTS wires being done in our AMSC Superconductors business unit. We anticipate that a portion of our funding in the future will continue to come from cost-sharing agreements as we execute joint programs with government agencies.

Table of Contents

Funding from government cost-sharing agreements is recorded as an offset to research and development (R&D) and selling, general and administrative (SG&A) expenses, rather than as revenues.

Cost of Revenues and Gross Margin

Cost of revenues increased by 34% and 27% to \$67.7 million and \$186.2 million for the three and nine months ended December 31, 2010, respectively, compared to \$50.4 million and \$146.5 million for the three and nine months ended December 31, 2009, respectively. Gross margin was 40.7% and 40.5% for the three and nine months ended December 31, 2010, respectively, compared to 37.5% and 35.8%, respectively, for the same periods of fiscal 2009. The increases in gross margin in the three and nine months ended December 31, 2010 as compared to the same periods in fiscal 2009 were due primarily to a shift in the mix of products sold towards higher margin wind turbine core electrical component shipments; material cost reductions primarily resulting from the localization of component supply in China for our power electronic converters, which are now manufactured in China; as well as favorable foreign exchange effects. Based on the average Euro and renminbi exchange rates for the third quarter of fiscal 2010, cost of revenues denominated in these foreign currencies translated into U.S. dollars was \$0.6 million higher compared to the translation of cost of revenues using the average exchange rates of these currencies for the third quarter of fiscal 2009.

Operating Expenses**Research and development**

A portion of our R&D expenditures related to externally funded development contracts has been classified as cost of revenues (rather than as R&D expenses). Additionally, a portion of R&D expenses was offset by cost-sharing funding. Our R&D expenditures are summarized as follows (in thousands):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
R&D expenses per condensed consolidated statements of income	\$ 9,057	\$ 6,421	\$ 24,249	\$ 16,365
R&D expenditures reclassified as cost of revenues	3,862	1,832	11,582	4,679
R&D expenditures offset by cost-sharing funding	128	250	402	867
Aggregated R&D expenses	\$ 13,047	\$ 8,503	\$ 36,233	\$ 21,911

R&D expenses (exclusive of amounts classified as cost of revenues and amounts offset by cost-sharing funding) increased by 41% and 48% to \$9.1 million and \$24.3 million, or 8% of revenues, for each of the three and nine months ended December 31, 2010, respectively, from \$6.4 million and \$16.4 million, or 8% and 7% of revenues, for the three and nine months ended December 31, 2009, respectively. The increases in R&D expenses were driven primarily by increased headcount and related labor spending, as well as added material and overhead spending to support new product development in our AMSC Power Systems business unit. The increases in R&D expenditures reclassified to costs of revenue was a result of increased efforts under license and development contracts for wind turbine designs at AMSC Windtec compared to the prior year. Aggregated R&D expenses, which include amounts classified as cost of revenues and amounts offset by cost-sharing funding, increased 53% and 65% to \$13.0 million and \$36.2 million, or 11% and 12% of revenues for the three and nine months ended December 31, 2010, respectively, compared to \$8.5 million and \$21.9 million, or 11% and 10% of revenues, for the three and nine months ended December 31, 2009, respectively. The increases in fiscal 2010 were driven primarily by the net impact of the factors described above.

We present aggregated R&D, which is a non-GAAP measure, because we believe this presentation provides useful information on our aggregate R&D spending and because R&D expenses as reported on the condensed consolidated statements of income have been, and may in the future, be subject to significant fluctuations solely as a

result of changes in the level of externally funded contract development work, resulting in significant changes in the amount of the costs recorded as costs of revenues rather than as R&D expenses, as discussed above.

Selling, general, and administrative

SG&A expenses increased by 21% and 31% to \$15.6 million and \$47.9 million, or 14% and 15% of revenues, in the three and nine months ended December 31, 2010, respectively, from \$12.9 million and \$36.5 million, or 16% of revenues, for both the three and nine months ended December 31, 2009, respectively. The increases in SG&A expenses were due primarily to higher labor and related costs driven by headcount growth and costs incurred related to the implementation of our new ERP system.

Table of Contents*Amortization of acquisition related intangibles*

We recorded \$0.4 million and \$1.2 million in the three and nine months ended December 31, 2010, respectively, compared to \$0.5 million and \$1.4 million in the three and nine months ended December 31, 2009, respectively, in amortization expense related to our contractual relationships/backlog, customer relationships, core technology and know-how, trade names and trademark intangible assets.

We plan to continue to increase our operating expenses on a dollar basis for the rest of this fiscal year to provide a platform for growth in subsequent years, but expect them to decline as a percent of revenues compared to the year ended March 31, 2010.

Operating income

Our operating income is summarized as follows (in thousands):

	Three months ended		Nine months ended	
	December 31,		December 31,	
	2010	2009	2010	2009
AMSC Power Systems	\$ 31,833	\$ 19,941	\$ 84,159	\$ 55,202
AMSC Superconductors	(6,878)	(5,941)	(19,322)	(17,085)
Unallocated corporate expenses	(3,485)	(3,560)	(11,342)	(10,956)
Total	\$ 21,470	\$ 10,440	\$ 53,495	\$ 27,161

AMSC Power Systems operating income increased to \$31.8 million and \$84.2 million in the three and nine months ended December 31, 2010, respectively, from \$19.9 million and \$55.2 million in the three and nine months ended December 31, 2009, respectively. The increase in the three and nine months ended December 31, 2010 were primarily the result of greater sales, as described above.

AMSC Superconductors operating loss increased to \$6.9 million and \$19.3 million in the three and nine months ended December 31, 2010, respectively, from \$5.9 million and \$17.1 million in the three and nine months ended December 31, 2009, respectively. The increase in operating loss for the three and nine months ended December 31, 2010 is primarily due to lower sales, as described above.

Unallocated corporate expenses include stock-based compensation expense of \$3.4 million and \$11.3 million in the three and nine months ended December 31, 2010, respectively, compared to \$3.5 million and \$10.4 million in the three and nine months ended December 31, 2009, respectively. Unallocated corporate expenses for the nine months ended December 31, 2009 included \$0.5 million of restructuring charges related to the closure of the Company's facility in Westborough, Massachusetts.

Interest income (expense), net

Interest income (expense), net, was \$0.2 million and \$0.5 million in the three and nine months ended December 31, 2010, respectively, compared to \$0.2 million and \$0.6 million in the three and nine months ended December 31, 2009, respectively. Due to current economic conditions, yields are low for interest bearing assets.

Other income (expense), net

Other income (expense), net, was income of \$2.1 million and \$4.7 million in the three and nine months ended December 31, 2010, respectively, compared to income of \$0.2 million and expense of \$2.7 million for the three and nine months ended December 31, 2009, respectively. Other income (expense), net primarily relates to foreign currency translation gains, net of hedging activities, of \$2.6 million and \$5.7 million and losses on investments in Blade Dynamics and Tres Amigas of \$0.7 million and \$1.3 million for the three and nine months ended December 31, 2010, respectively.

Table of Contents**Income Taxes**

In the three and nine months ended December 31, 2010, we recorded income tax expense of \$7.8 million and \$23.6 million, respectively, compared to \$5.6 million and \$13.8 million in the three and nine months ended December 31, 2009, respectively. Income tax expense in all periods was driven primarily by income generated in foreign jurisdictions. We incurred losses in the U.S. during the three and nine months of fiscal 2010 and fiscal 2009.

Non-GAAP Measures

Generally, a non-GAAP financial measure is a numerical measure of a company's performance, financial position or cash flow that either excludes or includes amounts that are not normally excluded or included in the most directly comparable measure calculated and presented in accordance with GAAP. The non-GAAP measures included in this Form 10-Q, however, should be considered in addition to, and not as a substitute for or superior to, the comparable measure prepared in accordance with GAAP.

We define non-GAAP net income as net income before amortization of acquisition-related intangibles, restructuring and impairments, stock-based compensation, other unusual charges and any tax effects related to these items. We believe non-GAAP net income is an important measurement for management and investors given the effect that these non-cash or non-recurring charges have on our net income. We regard non-GAAP net income as a useful measure of operating performance which more closely aligns net income with cash earnings generated by continuing operations. A reconciliation of non-GAAP to GAAP net income is set forth in the table below (in thousands, except per share data):

	Three months ended December 31,		Nine months ended December 31,	
	2010	2009	2010	2009
Net income	\$ 16,004	\$ 5,179	\$ 35,161	\$ 11,311
Amortization of acquisition-related intangibles	393	473	1,154	1,378
Restructuring and impairments				451
Stock-based compensation	3,445	3,522	11,269	10,440
Tax effects	(88)	(96)	(255)	(277)
Non-GAAP net income	\$ 19,754	\$ 9,078	\$ 47,329	\$ 23,303
Non-GAAP earnings per share	\$ 0.40	\$ 0.20	\$ 1.01	\$ 0.52
Weighted average diluted shares out standing	49,017	45,566	47,076	45,072

We generated non-GAAP net income of \$19.8 million and \$47.3, million or \$0.40 and \$1.01 per diluted share, for the three and nine months ended December 31, 2010, compared to a non-GAAP net income of \$9.1 million and \$23.3 million, or \$0.20 and \$0.52 per diluted share, for the three and nine months ended December 31, 2009. The increase in non-GAAP net income was driven primarily by higher net income.

Liquidity and Capital Resources

At December 31, 2010, we had cash, cash equivalents, marketable securities and restricted cash of \$260.5 million, compared to \$155.1 million at March 31, 2010, an increase of \$105.4 million. In the quarter ended December 31, 2010, we completed a public offering of common stock in which we received net proceeds of \$155.2 million. Our cash and cash equivalents, marketable securities and restricted cash are summarized as follows (in thousands):

	December 31, 2010	March 31, 2010
Cash and cash equivalents	\$ 169,021	\$ 87,594

Edgar Filing: AMERICAN SUPERCONDUCTOR CORP /DE/ - Form 10-Q

Marketable securities (short and long-term)	86,071	61,811
Restricted cash	5,433	5,713
Total cash, cash equivalents, marketable securities and restricted cash	\$ 260,525	\$ 155,118

The increase in cash and cash equivalents, marketable securities and restricted cash at December 31, 2010 from March 31, 2010 was due primarily to the net proceeds from our public offering of common stock, offset by cash used for working capital, primarily an increase in accounts receivable, and capital expenditures made in support of our effort to scale up our Amperium wire capacity.

Table of Contents

For the nine months ended December 31, 2010, net cash used in operating activities was \$16.3 million compared to \$1.1 million in the nine months ended December 31, 2009. The increase in cash used in operations is due primarily to an increase in cash used for working capital of \$44.4 million, partially offset by our increase of net income of \$23.9 million and stock-based compensation of \$1.0 million.

For the nine months ended December 31, 2010, net cash used in investing activities was \$65.1 million compared to \$36.3 million in the nine months ended December 31, 2009. The increase in cash used in investing activities was driven primarily by an increase in capital expenditures and the purchased minority investment in Blade Dynamics during the nine months ended December 31, 2010.

For the nine months ended December 31, 2010, cash provided by financing activities was \$162.6 million compared to \$6.0 million in the same period of fiscal 2009. The increase in cash provided by financing activities is primarily due to the net proceeds from our public offering of \$155.2 million.

Although our cash requirements fluctuate based on a variety of factors, including customer adoption of our products and our research and development efforts to commercialize our products, we believe that our revenue from product sales together with existing resources, including the cash from our public offering, will be sufficient to fund our working capital, capital expenditures, and other cash requirements for at least the next twelve months.

We had unused, unsecured lines of credit consisting of \$18.2 million (approximately CNY 120.4 million) and \$2.7 million (approximately 2.0 million) as of December 31, 2010. We also had an additional \$3.8 million in bank guarantees and letters of credit supported by unsecured lines of credit. Recently, the Chinese government adopted various economic measures designed to restrict the availability of credit and contain inflation which may impact our ability to access unused lines of credit in China.

The possibility exists that we may pursue additional acquisition and joint venture opportunities in the future that may affect liquidity and capital resource requirements.

From time to time, we are involved in legal and administrative proceedings and claims of various types. We record a liability in our consolidated financial statements for these matters when a loss is known or considered probable and the amount can be reasonably estimated. We review these estimates each accounting period as additional information is known and adjust the loss provision when appropriate. If the loss is not probable or cannot be reasonably estimated, a liability is not recorded in our consolidated financial statements. At December 31, 2010, we did not have any material pending litigation.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements, as defined under SEC rules, such as relationships with unconsolidated entities or financial partnerships, which are often referred to as structured finance or special purpose entities, established for the purpose of facilitating transactions that are not required to be reflected on our balance sheet except as discussed below.

We occasionally enter into construction contracts that include a performance bond. As these contracts progress, we continually assess the probability of a payout from the performance bond. Should we determine that such a payout is likely, we would record a liability. As of December 31, 2010, there were no recorded performance-based liabilities.

In addition, the Company has various contractual arrangements in which minimum quantities of goods or services have been committed to be purchased on an annual basis.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

We face exposure to financial market risks, including adverse movements in foreign currency exchange rates and changes in interest rates. These exposures may change over time as our business practices evolve and could have a material adverse impact on our financial results.

Cash and cash equivalents

Our exposure to market risk through financial instruments, such as investments in marketable securities, is limited to interest rate risk and is not material. Our investments in marketable securities consist primarily of government-backed securities and sovereign debt and are designed, in order of priority, to preserve principal, provide liquidity, and maximize income. Investments are monitored to limit exposure to mortgage-backed securities and similar instruments responsible for the recent turmoil in the credit markets. Interest rates are variable and fluctuate with current market conditions. We do not believe that a 10% change in interest rates would have a material impact on our financial position or results of operation.

Foreign currency exchange risk

Our foreign currency risk management strategy is principally designed to mitigate the potential financial impact of changes in the value of transactions and balances denominated in foreign currency, resulting from changes in foreign currency exchange rates. Our foreign currency hedging program uses both forward contracts and currency options to manage the foreign currency exposures that exist as part of its ongoing business operations. We recognize all derivatives, including forward currency-exchange contracts, in the balance sheet at fair value.

Cash Flow Hedges

We hedge a portion of our intercompany sales of inventory over a maximum period of 15 months using forward foreign exchange contracts accounted for as cash flow hedges to mitigate the impact of volatility associated with foreign currency transactions.

For forward foreign exchange contracts that are designated as cash flow hedges, if they are effective in offsetting the variability of the hedged cash flows, and otherwise meet the hedge accounting criteria, changes in the derivatives value are not included in current earnings but are included in other comprehensive income in stockholders equity. The changes in fair value will subsequently be reclassified into earnings as a component of cost of revenues, as applicable, when the forecasted transaction occurs. To the extent that a previously forecasted transaction is no longer an effective hedge, any ineffectiveness measured in the hedging relationship is recorded in earnings in the period it occurs. We do not enter into derivative instruments for trading or speculative purposes. Realized gains and losses resulting from these cash flow hedges offset the foreign exchange gains and losses on the underlying transactions being hedged. Gains and losses on derivatives not designated for hedge accounting or representing either hedge ineffectiveness or hedge components excluded from the assessment of effectiveness are recognized in other income (expense), net.

At December 31, 2010, we had forward contracts outstanding to hedge cash flow exposure at AMSC Windtec, with aggregate USD equivalent notional amounts of \$28.9 million. These contracts will expire at various dates through December 2011. The net gain or loss from these cash flow hedges reported in accumulated other comprehensive income will be reclassified to earnings and recorded in cost of revenues in our condensed consolidated statement of income when the related inventory is sold to third-party customers.

Balance Sheet Hedges

In addition to cash flow hedges, we also enter into foreign currency forward exchange contracts to mitigate the impact of foreign exchange risk related to certain non-functional currency receivable balances in its foreign entities. We do not elect hedge accounting treatment for these hedges, consequently, changes in the fair value of these contracts are recorded within other income (expense), net, in the period which they occur. At December 31, 2010, we had forward contracts outstanding with aggregate USD equivalent notional amounts of \$87.5 million. These contracts will expire at various dates through February 2011.

Table of Contents

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures as of December 31, 2010. The term disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934 (the Exchange Act), means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. Management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and management necessarily applies its judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of December 31, 2010, our chief executive officer and chief financial officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

Changes in Internal Control over Financial Reporting

No change in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) occurred during the quarter ended December 31, 2010 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

PART II OTHER INFORMATION

ITEM 1A. RISK FACTORS

Investing in our common stock involves a high degree of risk. You should carefully consider the risks and uncertainties described in our annual report on Form 10-K for the year ended March 31, 2010 in addition to the other information included in this quarterly report. If any of the risks actually occurs, our business, financial condition or results of operations would likely suffer. In that case, the trading price of our common stock could fall.

As of December 31, 2010, there have not been any material changes to the risk factors disclosed in our Annual Report on Form 10-K for the fiscal year ended March 31, 2010, although we may disclose changes to such risk factors or disclose additional risk factors from time to time in our future filings with the SEC.

ITEM 6. EXHIBITS

See the Exhibit Index on the page immediately preceding the exhibits for a list of exhibits filed as part of this quarterly report, which Exhibit Index is incorporated herein by this reference.
