UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended September 30, 2013

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Mechanical Technology, Incorporated

(Exact name of registrant as specified in its charter)

New York - 000-06890 - 14-1462255
(State or other jurisdiction) (Commission File Number) (IRS Employer)
of incorporation or organization Identification No.)

325 Washington Avenue Extension, Albany, New York 12205

Edgar Filing: MECHANICAL TECHNOLOGY INC - Form 10-Q

(Address of principal executive offices)

(Zip Code)

(518) 218-2550

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act (check one):

Large accelerated filer Accelerated filer Non-accelerated filer (Do not check if a smaller reporting company)

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The number of shares of common stock, par value of \$0.01 per share, outstanding as of November 1, 2013 was 5,256,883.

MECHANICAL TECHNOLOGY, INCORPORATED AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

Notes to Condensed Consolidated Financial Statements (Unaudited)

1. Nature of Operations

Description of Business

Mechanical Technology, Incorporated (MTI or the Company), a New York corporation, was incorporated in 1961. MTI operates in two segments, the Test and Measurement Instrumentation segment, which is conducted through MTI Instruments, Incorporated (MTI Instruments), a wholly-owned subsidiary, and the New Energy segment, which is conducted through MTI MicroFuel Cells Incorporated (MTI Micro), a variable interest entity (VIE) that is included in these condensed consolidated financial statements and described further below in Note 2.

MTI Instruments was incorporated in New York on March 8, 2000 and is a worldwide supplier of precision non-contact physical measurement solutions, portable vibration measurement and balancing systems, wafer inspection tools and precision contact measurement of material tensile strength. MTI Instruments uses a comprehensive array of technologies to solve complex, real world applications in numerous industries including industrial manufacturing, semiconductor, solar, commercial and military aviation, automotive and research and development centers. MTI Instruments products consist of: electronic gauging instruments for position, displacement, vibration applications within the research, design, test, manufacturing/production processes; wafer characterization of semi-insulating and semi-conducting wafers, both in the semiconductor and solar industries; tensile stage systems for materials testing at academic and industrial settings; and engine vibration analysis systems for both military and commercial aircraft as well as industrial power engines.

MTI Micro was incorporated in Delaware on March 26, 2001, and, until its operations were suspended in late 2011, had been developing Mobion[®], a handheld energy-generating device to replace current lithium-ion and similar rechargeable battery systems in many handheld electronic devices for the military and consumer markets. Although MTI Micro continues to believe in the potential of its Mobion[®] based power solutions, operations continue to remain suspended at MTI Micro until such time as market demand and other deciding factors, including obtaining additional external financing, the successful completion of customer trials, a new development program with a government agency, and/or a customer order, come to fruition. MTI Micro will continue to seek additional capital from external sources to resume operations and fund future development, as warranted. If MTI Micro is unable to secure additional financing, a new development program or customer order, the MTI Micro Board of Directors will assess other options for MTI Micro, including the sale of its intellectual property portfolio and/or remaining assets. As of September 30, 2013, the Company owned approximately 47.6% of MTI Micro's outstanding common stock.

Liquidity

The Company has incurred significant losses primarily due to its past efforts to fund MTI Micro's direct methanol fuel cell product development and commercialization programs, and has an accumulated deficit of approximately \$121.8 million and working capital of approximately \$2.0 million at September 30, 2013. The Company restructured its operations during the second half of 2012, which included the departure of its then CEO, staffing adjustments to its MTI Instrument's sales force and reduction in MTI Instrument's production and development personnel.

Based on the Company's projected cash requirements for operations and capital expenditures for 2013, its current available cash of \$970 thousand (excluding MTI Micro available cash), the \$400 thousand available from its existing line of credit at MTI Instruments, current cash flow requirements and revenue and expense projections, management believes it will have adequate resources to fund its active operations and capital expenditures for at least the next twelve months.

However, the Company may need to do one or more of the following to raise additional resources or reduce its cash requirements:

- 1) Reduce its current expenditure run rate;
- 2) Defer its capital expenditures;
- 3) Defer its hiring plans; and
- 4) Secure additional debt or equity financing.

There is no guarantee that, if needed, such resources will be available to the Company on terms acceptable to it, or at all, or that such resources will be received in a timely manner, if at all, or that the Company will be able to reduce its expenditure run-rate, defer its capital expenditures or hiring plans without materially and adversely effecting its business.

The Company suspended operations at MTI Micro in late 2011 and, as of September 30, 2013, MTI Micro's available cash is approximately \$37 thousand.

2. Basis of Presentation

In the opinion of management, the Company's condensed consolidated financial statements reflect all adjustments, which are of a normal recurring nature, necessary for a fair statement of the results for the periods presented in accordance with United States of America Generally Accepted Accounting Principles (U.S. GAAP) and with the instructions to Form 10-Q in Article 10 of the Securities and Exchange Commissions (SEC) Regulation S-X. The results of operations for the interim periods presented are not necessarily indicative of results for the full year.

Certain information and footnote disclosures normally included in the annual consolidated financial statements prepared in accordance with U.S. GAAP have been condensed or omitted. These unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

The information presented in the accompanying condensed consolidated balance sheet as of December 31, 2012 has been derived from the Company's audited consolidated financial statements. All other information has been derived from the Company's unaudited condensed consolidated financial statements for the three and nine months ended September 30, 2013 and September 30, 2012.

Principles of Consolidation

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary, MTI Instruments and its VIE, MTI Micro. The Company is the primary beneficiary of the VIE. All inter-company balances and transactions are eliminated in consolidation. The Company reflects the impact of the equity securities issuances in its investment in a VIE and additional paid-in-capital accounts for the dilution or anti-dilution of its ownership interest in the VIE.

The Company has performed an analysis under the VIE model and determined that MTI Micro is a VIE. One of the criteria for determining whether an entity is a VIE is determining if the entity, MTI Micro, has equity at risk. Management has concluded that MTI Micro does not have equity at risk to fund operations into its next phase of development. Further, the Company has determined that it is the primary beneficiary of MTI Micro, and therefore should include MTI Micro's results of operations in the Company's consolidated financial statements.

The Company's analysis to determine the primary beneficiary of MTI Micro focused primarily on determining which variable interest holder has the power to direct the activities that would have the most significant impact on the financial performance of MTI Micro. MTI Micro is governed by its own board of directors and significant decisions are determined by a majority vote of this board. MTI does not have control of the MTI Micro board of directors; however, as of September 30, 2013, the Company's board of directors and the MTI Micro board of directors consist of the same members, except for one additional director on the Company board. Under the Articles of Incorporation of MTI Micro, each share of MTI Micro stock is entitled to a vote, and further, holders of a majority of the shares of MTI Micro's common stock have the ability to reconstitute the board. As of September 30, 2013, MTI, Counter Point Ventures Fund II, LP (Counter Point) and Dr. Walter L. Robb, a member of the Company's and MTI Micro's board of directors own 47.6%, 45.2% and 5.1% of the common shares of MTI Micro, respectively. Counter Point is a venture capital fund sponsored and managed by Dr. Robb. Since no entity of the related parties has power but, as a group, the Company and its related parties have the power, then the party within the related party group that is most closely associated with the VIE, MTI Micro, is the primary beneficiary. Even though Dr. Robb and Counterpoint combined control a majority of the outstanding common stock, and they have the ability to elect the directors of MTI Micro and decide whether to continue to seek business opportunities for MTI Micro or instead seek opportunities to sell the intellectual property, they have not elected to do so. The Company continues to oversee the day to day operations, exercise management decision making, seek opportunities to sell intellectual property, and has a vested interest in the commercialization of MTI Micro's fuel cell technology. Since inception in 2001, the Company has made the largest investment and been the principal funder of MTI Micro. The Company has also been exposed to losses and has the ability to benefit from MTI Micro. Considering the facts and circumstances, management believes the Company is most closely associated with the VIE, MTI Micro, and therefore, it is the primary beneficiary.

Should there be a change in the facts and circumstances (such as undertaking additional activities, a change in governance or a change to the related party group) in the future, management will reassess whether the Company remains the primary beneficiary and should continue to consolidate MTI Micro in the Company's consolidated financial statements.

Non-controlling interests (NCI) are classified as equity in the consolidated financial statements. The consolidated statement of operations presents net income (loss) for both the Company and the non-controlling interests. The calculation of earnings per share is based on net income (loss) attributable to the Company.

3. Accounts Receivable

Accounts receivables consist of the following at:

(Dollars in thousands)	September 30, 2013	December 31, 2012
U.S. and State Government	\$ 408	\$ 874
Commercial	950	800
Total	\$ 1,358	\$ 1,674

For the nine months ended September 30, 2013 and 2012, the largest commercial customer represented 6.8% and 8.7%, respectively, and a U.S. governmental agency represented 31.5% and 18.0%, respectively, of the Company's Test and Measurement Instrumentation segment product revenue. As of September 30, 2013 and December 31, 2012, the largest commercial customer represented 29.2% and 9.7%, respectively, and a U.S. governmental agency represented 25.7% and 51.3%, respectively, of the Company's Test and Measurement Instrumentation segment accounts receivable.

As of September 30, 2013 and December 31, 2012, there were no outstanding receivables for the New Energy segment.

As of September 30, 2013 and December 31, 2012, the Company had no allowance for doubtful trade accounts receivable.

4. Inventories

Inventories consist of the following at:

(Dollars in thousands)	September 30, 2013	December 31, 2012
------------------------	--------------------	-------------------

Finished goods	\$	316	\$	265
Work in process		109		482
Raw materials		316		371
Total	\$	741	\$	1,118

5. Property, Plant and Equipment

Property, plant and equipment consist of the following at:

(Dollars in thousands)	September 30, 2013	December 31, 2012
Leasehold improvements	\$33	\$ 954
Computers and related software	1,553	1,709
Machinery and equipment	976	1,390
Office furniture and fixtures	149	271
	2,711	4,324
Less: Accumulated depreciation	2,582	4,195
	\$129	\$ 129

Depreciation expense was \$68 thousand and \$129 thousand for the nine months ended September 30, 2013 and the year ended December 31, 2012, respectively. In conjunction with the suspension of MTI Micro operations in late 2011, sales of certain surplus equipment on hand were made during 2013 and 2012. This resulted in a net gain on sale of \$13 thousand and \$130 thousand for the nine months ended September 30, 2013 and 2012. As of September 30, 2013 and December 31, 2012, all \$13 thousand and \$143 thousand, respectively in sales proceeds have been received.

6. Income Taxes

During the three months ended September 30, 2013, the Company's effective income tax rate was 43.6%. The projected annual effective tax rate is more than the Federal statutory rate of 35%, primarily due to permanent differences, the change in the valuation allowance and changes to estimated taxable income for 2013. For the three months ended September 30, 2012, the Company's effective income tax rate was 0%.

During the nine months ended September 30, 2013, the Company's effective income tax rate was 47.4%. The projected annual effective tax rate is more than the Federal statutory rate of 35%, primarily due to permanent differences and the change in the valuation allowance. For the nine months ended September 30, 2012, the Company's effective income tax rate was 0%.

The Company provides for recognition of deferred tax assets if the realization of such assets is more likely than not to occur in accordance with accounting standards that address income taxes. Significant management judgment is required in determining the period in which the reversal of a valuation allowance should occur. The Company has considered all available evidence, both positive and negative, such as historical levels of income and future forecasts of taxable income amongst other items, in determining its valuation allowance. In addition, the Company's assessment requires us to schedule future taxable income in accordance with accounting standards that address income taxes to assess the appropriateness of a valuation allowance which further requires the exercise of significant management judgment.

The Company released a portion of its valuation allowance against its deferred tax assets causing an incremental tax benefit of \$1.5 million that was recognized in the fourth quarter of 2011. The release of a portion of the valuation allowance was based upon a recent cumulative income history for MTI and its subsidiary exclusive of MTI Micro (MTI Micro files separate federal and state tax returns) causing the Company to evaluate what portion of the Company's deferred tax assets it believes are more likely than not to be realized. The Company has recognized a deferred tax expense of \$110 thousand for the third quarter of 2013, and year to date has recognized \$265 thousand, which represents the anticipated use of net operating losses to offset current tax liabilities due to the Company being in a net earnings position. The Company has determined that it continues to expect to generate sufficient levels of pre-tax earnings in the future to realize the remaining net deferred tax assets recorded on the balance sheet at September 30, 2013. The Company has projected such pre-tax earnings utilizing a combination of historical and projected results, taking into consideration existing levels of permanent differences, non-deductible expense and the reversal of significant temporary differences. The Company needs to generate sufficient taxable income prior to the expiration of net operating loss carry-forwards to ensure the realizability of the approximately \$1.3 million of deferred tax assets recorded on the condensed consolidated balance sheet at September 30, 2013.

The Company believes that the accounting estimate for the valuation of deferred tax assets is a critical accounting estimate, because judgment is required in assessing the likely future tax consequences of events that have been recognized in our financial statements or tax returns. The Company based the estimate of deferred tax assets and liabilities on current tax laws and rates and, in certain cases, business plans and other expectations about future outcomes. In the event that actual results differ from these estimates or the Company adjusts these estimates in future periods, the Company may need to adjust the recorded valuation allowance, which could materially impact our financial position and results of operations. The valuation allowance was \$17.8 million at September 30, 2013 and December 31, 2012. The Company will continue to evaluate the ability to realize its deferred tax assets and related

valuation allowances on a quarterly basis.

7. Stockholders Equity

Common Stock

The Company has one class of common stock, par value \$.01. Each share of the Company's common stock is entitled to one vote on all matters submitted to stockholders. As of September 30, 2013 and December 31, 2012, there were 5,256,883 shares of common stock issued and outstanding.

Changes in common shares issued and treasury stock outstanding are as follows:

	Nine Months Ended	Year Ended
	September 30, 2013	December 31, 2012
Common Shares		
Balance, beginning	6,261,975	6,259,975
Issuance of shares for common stock grants		2,000
Balance, ending	6,261,975	6,261,975
Treasury Stock		
Balance, beginning	1,005,092	1,005,092
Balance, ending	1,005,092	1,005,092

Reservation of Shares

The Company had reserved common shares for future issuance as follows as of September 30, 2013:

Stock options outstanding	587,256
Common stock available for future equity awards or issuance of options	139,500
Number of common shares reserved	726,756

Earnings (Loss) per Share

The Company computes basic income (loss) per common share by dividing net income (loss) by the weighted average number of common shares outstanding during the reporting period. Diluted income (loss) per share reflects the potential dilution, if any, computed by dividing income (loss) by the combination of dilutive common share equivalents, comprised of shares issuable under outstanding investment rights, warrants and the Company's share-based compensation plans, and the weighted average number of common shares outstanding during the reporting period. Dilutive common share equivalents include the dilutive effect of in-the-money stock options, which are calculated based on the average share price for each period using the treasury stock method. Under the treasury stock method, the exercise price of a stock option, the amount of compensation cost, if any, for future service that the Company has not yet recognized, and the amount of windfall tax benefits that would be recorded in additional paid-in capital, if any, when the stock option is exercised are assumed to be used to repurchase shares in the current period.

Not included in the computation of earnings per share, assuming dilution, for the three and nine months ended September 30, 2013, were options to purchase 232,506 and 424,756 shares, respectively of the Company's common stock. These potentially dilutive items were excluded even though the average market price of the common stock exceeded the exercise prices for a portion of the options because the calculation of incremental shares resulted in an anti-dilutive effect.

Not included in the computation of loss per share, assuming dilution, for the three and nine months ended September 30, 2012, were options to purchase 579,646 shares of the Company's common stock. These potentially dilutive items were excluded because the Company incurred a loss for this period and their inclusion would be anti-dilutive.

8. Issuance of Common Stock, Warrants and Stock Options by MTI Micro

As of September 30, 2013, the Company owned approximately 47.6% of MTI Micro's outstanding common stock, or 75,049,937 shares, and 53.3% of common stock and warrants issued, which includes 32,904,136 outstanding warrants. The number of shares of MTI Micro common stock authorized for issuance is 240,000,000 as of September 30, 2013.

Common Stock MTI Micro

The following table represents changes in ownership between the Company and non-controlling interests (NCI) in common shares of MTI Micro:

	Average Price	MTI		Non Controlling Interest (NCI)		Total Shares
		Shares	Ownership %	Shares	Ownership %	
Balance at 12/31/12	\$0.07	75,049,937	47.61	82,573,107	52.39	157,623,044
Balance at 9/30/13	\$0.07	75,049,937	47.61	82,573,107	52.39	157,623,044

Warrants Issued MTI Micro

On December 9, 2009, MTI Micro issued warrants to the then current shareholders of MTI Micro, including the Company, without consideration, to purchase 32,779,310 shares of MTI Micro Common Stock at an exercise price of \$0.07 per share. The warrants became exercisable on December 9, 2010 and expire on December 8, 2017. The warrants have been accounted for as an equity distribution of \$2.0 million, including warrants to the Company with a value of \$2.0 million, which were eliminated in consolidation.

On December 9, 2009, MTI Micro issued warrants to the Bridge Investors of MTI Micro, including the Company, to purchase 5,081,237 shares of MTI Micro Common Stock at an exercise price of \$0.07 per share. The MTI Micro Warrants became exercisable on December 9, 2009 and will expire on the earlier of: (i) April 15, 2014; (ii) immediately prior to a change in control; or (iii) immediately prior to an initial public offering of MTI Micro. The MTI Micro Warrants were issued without consideration and were accounted for as equity and a loss on extinguishment of debt was recorded in the amount of \$289 thousand, including warrants to the Company with a value of \$57 thousand, which were eliminated in consolidation.

Under the Purchase Agreement entered into on January 11, 2010, MTI Micro issued 5,714,286 MTI Micro Warrants to Counter Point to purchase shares of MTI Micro Common Stock at an exercise price of \$0.07 per share. The MTI Micro Warrants became exercisable on the date of issuance and will expire on the earlier of: (a) the five year anniversary of the Date of Issuance of the Warrant; (b) immediately prior to a change in control; or (c) the closing of a firm commitment underwritten public offering pursuant to a registration statement under the Securities Act of 1933, as amended (Securities Act). The MTI Micro Warrants were accounted for as equity.

Under Amendment No. 1 entered into on February 9, 2011, MTI Micro issued 1,285,715 MTI Micro Warrants to Counter Point to purchase shares of MTI Micro Common Stock at an exercise price of \$0.07 per share. The MTI Micro Warrants became exercisable on the date of issuance and will expire on the earlier of: (a) the five year anniversary of the Date of Issuance of the Warrant; (b) immediately prior to a change in control; or (c) the closing of a firm commitment underwritten public offering pursuant to a registration statement under the Securities Act. The MTI Micro Warrants were accounted for as equity.

Under Amendment No. 2 entered into on September 23, 2011, MTI Micro issued 240,000 MTI Micro Warrants to Counter Point to purchase shares of MTI Micro Common Stock at an exercise price of \$0.07 per share. The MTI Micro Warrants became exercisable on the date of issuance and will expire on the earlier of: (a) the five year anniversary of the Date of Issuance of the Warrant; (b) immediately prior to a change in control; or (c) the closing of a firm commitment underwritten public offering pursuant to a registration statement under the Securities Act. The MTI Micro Warrants were accounted for as equity.

Reservation of Shares MTI Micro

MTI Micro has reserved common shares for future issuance, broken down between the Company and NCI, as follows as of September 30, 2013:

	MTI	NCI	Total
Stock options outstanding		1,140,240	1,140,240
Warrants outstanding	32,904,136	12,196,411	45,100,547
Number of shares reserved for outstanding options and warrants	32,904,136	13,336,651	46,240,787

During the nine months ended September 30, 2013, there were 389,800 option cancellations. MTI Micro has 36,861,760 stock options available for issuance as of September 30, 2013.

As of September 30, 2013, the Company owned an aggregate of approximately 47.6% of the outstanding shares of MTI Micro or 53.3% of the outstanding common stock and warrants issued of MTI Micro, and Counter Point and Dr. Robb owned approximately 45.2% and 5.1%, respectively of the outstanding shares of MTI Micro or 40.3% and 4.3%, respectively of the outstanding common stock and warrants issued of MTI Micro.

9. Fair Value Measurement

The Company performs a detailed analysis of financial assets and liabilities in determining the appropriate levels of classification. At each reporting period, all assets and liabilities for which the fair value measurements are based upon significant unobservable inputs are classified as Level 3. The Company had no Level 1, Level 2 or Level 3 assets and liabilities as of September 30, 2013 and December 31, 2012.

10. Segment Information

The Company operates in two business segments, Test and Measurement Instrumentation and New Energy. The Test and Measurement Instrumentation segment designs, manufactures, markets and services high performance test and measurement instruments and systems, wafer characterization tools for the semiconductor and solar industries, tensile stage systems for materials testing at academic and industrial settings, and computer-based balancing systems for aircraft and industrial power engines. The New Energy segment is focused on commercializing direct methanol fuel cells. The Company's principal operations are located in North America.

The accounting policies of the Test and Measurement Instrumentation and New Energy segments are similar to those described in the summary of significant accounting policies in the Company's Annual Report on Form 10-K (Note 2). The Company evaluates performance based on profit or loss from operations before income taxes. Inter-segment sales and expenses are not significant.

Summarized financial information concerning the Company's reportable segments is shown in the following tables. The "Other" column includes corporate related items and items such as income taxes or unusual items, which are not allocated to reportable segments. The "Reconciling Items" column includes non-controlling interests in a consolidated entity. In addition, segments' non-cash items include any depreciation in reported profit or loss. The New Energy segment figures include the Company's direct micro fuel cell operations. As a result of the suspension of the MTI Micro operations in late 2011, the New Energy segment will continue to be included in these tables as long as they remain in our consolidated operations.

(Dollars in thousands)	Test and Measurement Instrumentation	New Energy	Other	Reconciling Items	Condensed Consolidated Totals
<u>Three Months Ended September 30, 2013</u>

11. Commitments and Contingencies

Commitments:

Leases

The Company and its subsidiary lease certain manufacturing, laboratory and office facilities. The leases generally provide for the Company to pay either an increase over a base year level for taxes, maintenance, insurance and other costs of the leased properties or the Company's allocated share of insurance, taxes, maintenance and other costs of leased properties. The leases contain renewal provisions.

Future minimum rental payments required under non-cancelable operating leases (with initial or remaining lease terms in excess of one year) are (dollars in thousands): \$71 thousand remaining in 2013 and \$263 thousand in 2014.

Warranties

Product warranty liabilities are included in *Accrued liabilities* in the Condensed Consolidated Balance Sheets. Below is a reconciliation of changes in product warranty liabilities:

(Dollars in thousands)	Nine Months Ended	
	September 30, 2013	2012
Balance, January 1	\$ 20	\$ 26
Accruals for warranties issued	22	9
Settlements made (in cash or in kind)	(12)	(15)
Balance, end of period	\$ 30	\$ 20

Licenses

MTI Micro has residual royalty agreements with NYSERDA in conjunction with two contracts from 2002 and 2010. With operations currently suspended at MTI Micro, these licensing agreements are currently immaterial, and there are no amounts accrued in the condensed consolidated balance sheets as of September 30, 2013 and December 31, 2012 related to these royalty provisions.

Employment Agreement

The Company has an employment agreement with one employee that provides certain payments upon termination of employment under certain circumstances, as defined in the applicable agreement. As of September 30, 2013, the Company's potential minimum obligation to this employee was approximately \$62 thousand.

Contingencies:

Legal

We are subject to legal proceedings, claims and liabilities which arise in the ordinary course of business. We accrue for losses associated with legal claims when such losses are probable and can be reasonably estimated. These accruals are adjusted as additional information becomes available or circumstances change. Legal fees are charged to expense as they are incurred.

12. Line of Credit

On September 20, 2011, MTI Instruments entered into a working capital line of credit with First Niagara Bank, N.A., pursuant to the Demand Grid Note. MTI Instruments may borrow from time to time up to \$400 thousand to support its working capital needs. The note is payable upon demand, and the interest rate on the note is equal to the prime rate with a floor of 4.0% per annum. The note is secured by a lien on all of the assets of MTI Instruments and is guaranteed by the Company. The line of credit was renewed on September 23, 2013. The line of credit is subject to a review date of June 30, 2014. Under the line of credit, MTI Instruments is required to maintain a line balance of \$0 for thirty consecutive days during each calendar year. As of September 30, 2013 and December 31, 2012, there were no amounts outstanding under the line of credit.

13. Stock Based Compensation

The Mechanical Technology Incorporated 2012 Equity Incentive Plan (the 2012 Plan) was adopted by the Company's Board of Directors on April 14, 2012 and approved by stockholders on June 14, 2012. The 2012 Plan provides an initial aggregate number of 600,000 shares of common stock which may be awarded or issued. The number of shares which may be awarded under the 2012 Plan and awards outstanding can be subject to adjustment on account of any recapitalization, reclassification, stock split, reverse stock split and other dilutive changes in Common Stock. Under the 2012 Plan, the Board of Directors is authorized to issue stock options (incentive and nonqualified), stock appreciation rights, restricted stock, restricted stock units and other stock-based awards to employees, officers, directors, consultants and advisors of the Company and its subsidiaries. Incentive stock options may only be granted to employees of the Company and its subsidiaries.

During 2013, the Company granted 298,000 options to purchase the Company's common stock from the 2012 Plan, which generally vest 25% on each of the first four anniversaries of the date of the award. The exercise price of these grants was from \$0.46 to \$0.90 per share and was based on the closing market price of the Company's common stock on the dates of grant. Using a Black-Scholes Option Pricing Model, the weighted average fair value of these options was \$0.58 per share and was estimated at the date of grant.

During 2012, the Company granted 2,000 shares of the Company's common stock from the 2006 Plan, which immediately vested and the stock was issued to the holder. The shares were granted from the 2006 Plan before the 2012 Plan was approved by the shareholders. The fair value of this grant was \$0.31 per share and was based on the closing market price of the Company's common stock on the date of grant.

During 2012, the Company granted 224,500 options to purchase the Company's common stock from the 2012 Plan, which generally vest 25% on each of the first four anniversaries of the date of the award. The exercise price of these grants was \$0.29 per share and was based on the closing market price of the Company's common stock on the dates of grant. Using a Black-Scholes Option Pricing Model, the weighted average fair value of these options was \$0.27 per share and was estimated at the date of grant. During 2012, 62,000 options of the 2012 grants were cancelled before vesting occurred.

14. New Accounting Pronouncements

There are no recently issued accounting standards or standards with pending adoptions that the Company's management currently anticipates will have any material impact upon its financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Unless the context requires otherwise, the terms we, us, and our refer to Mechanical Technology, Incorporated, a New York Corporation, MTI Instruments refers to MTI Instruments, Incorporated, a New York corporation and our wholly owned subsidiary, and MTI Micro refers to MTI MicroFuel Cells Incorporated, a Delaware corporation and variable interest entity that is included in these consolidated results. MTI Micro has a registered trademark in the United States for Mobion. Other trademarks, trade names, and service marks used in this Quarterly Report on Form 10-Q are the property of their respective owners.

The following discussion of our financial condition and results of operations should be read in conjunction with the condensed consolidated financial statements and the notes thereto included in Item 1 of Part I of this Quarterly Report on Form 10-Q and the audited consolidated financial statements and the notes thereto and Management's Discussion and Analysis of Financial Condition and Results of Operations for the year ended December 31, 2012 contained in our 2012 Annual Report on Form 10-K.

In addition to historical information, the following discussion contains forward-looking statements, which involve risk and uncertainties. Our actual results could differ materially from those anticipated in the forward-looking statements. Important factors that could cause actual results to differ include those set forth in Part I Item 1A-Risk Factors in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012, as filed on March 21, 2013 and elsewhere in this Quarterly Report on Form 10-Q. Readers should not place undue reliance on our forward-looking statements. These forward-looking statements speak only as of the date on which the statements were made and are not guarantees of future performance. Except as may be required by applicable law, we do not undertake or intend to update any forward-looking statements after the date of this Quarterly Report on Form 10-Q. Please see Statement Concerning Forward-Looking Statements below.

Overview

MTI operates in two segments: the Test and Measurement Instrumentation segment, which is conducted through MTI Instruments, Incorporated (MTI Instruments), a wholly-owned subsidiary, and the New Energy segment, which is conducted through MTI MicroFuel Cells, Incorporated (MTI Micro), a variable interest entity (VIE) as of September 30, 2013. MTI and MTI Micro currently share the same board of directors, except for one additional director on the Company board, while MTI also continues to oversee the day to day operations, exercise management decision making, seek opportunities to sell intellectual property, and have a vested interest in the commercialization of MTI Micro's fuel cell technology. Since inception in 2001, MTI has made the largest investment and been the principal funder of MTI Micro. MTI has also been exposed to losses and has the ability to benefit from MTI Micro. Considering the facts and circumstances, management believes MTI is most closely associated with the VIE, MTI Micro, and therefore, it is the primary beneficiary. Should there be a change in the facts and circumstances (such as a change in governance or a change to the related party group) management will reassess whether MTI remains the primary beneficiary and should continue to consolidate MTI Micro in MTI's condensed consolidated financial

statements.

Test and Measurement Segment MTI Instruments is a worldwide supplier of precision non-contact physical measurement solutions, portable vibration measurement and balancing systems, wafer inspection tools and precision contact measurement of material tensile strength. MTI Instruments uses a comprehensive array of technologies to solve complex, real world applications in numerous industries including industrial manufacturing, semiconductor, solar, commercial and military aviation, automotive and research & development centers. We are continuously working on ways to expand our sales reach, including expanded sales coverage throughout Europe and Asia as well as a focus on internet marketing.

Our test and measurement segment has three product groups: Precision Instruments; Semiconductor and Solar Metrology Systems; and Balancing Systems. Our products consist of: electronic gauging instruments for position, displacement, and vibration applications within the research, design, test, manufacturing/production processes; wafer characterization of semi-insulating and semi-conducting wafers, both in the semiconductor and solar industries; tensile stage systems for materials testing at academic and industrial settings; and engine vibration analysis systems for both military and commercial aircraft as well as industrial power engines.

New Energy Segment Until its operations were suspended in late 2011, MTI Micro had been developing an off-the-grid power solution for various portable electronic devices. Our patented proprietary direct methanol fuel cell (DMFC) technology platform, called Mobion[®], converts methanol fuel to usable electricity capable of providing continuous power as long as necessary fuel flows are maintained. Our proprietary fuel cell power solution consists of two primary components integrated into an easily manufactured device: the DMFC power engine, which we refer to as our Mobion[®] Chip, and methanol fuel cartridges.

Although MTI Micro continues to believe in the potential of its Mobion[®] based power solutions, operations have been suspended since late 2011 at MTI Micro until such time as market demand and other deciding factors, including obtaining additional external financing, the successful completion of customer trials, a new development program with a government agency, and/or a customer order come to fruition. MTI Micro will continue to seek additional capital from external sources to resume operations and fund future development, as warranted. If MTI Micro is unable to secure additional financing, a new development program or a customer order, the MTI Micro board of directors will assess other options for MTI Micro, including the sale of its intellectual property portfolio and/or remaining assets.

Recent Developments

On August 28, 2013, the Board of Directors of the Company appointed David C. Michaels to the Board of Directors. Mr. Michaels was also elected to the Governance, Compensation & Nominating Committee and the Audit Committee. Upon joining the Board, Mr. Michaels received options to purchase 12,500 shares of the Company's common stock with an exercise price equal to the closing market price of \$0.90 per share on the date of grant.

Results of Operations

Results of Operations for the Three and Nine Months Ended September 30, 2013 Compared to the Three and Nine Months Ended September 30, 2012.

Test and Measurement Instrumentation Segment

Product Revenue. Product revenue in our Test and Measurement Instrumentation segment for the three months ended September 30, 2013 increased by \$1.2 million, or 113.5%, to \$2.3 million from \$1.1 million for the same period in 2012. Sales of capacitance products and tensile stages contributed to a 100% rise in general instrumentation revenue as compared to the third quarter of last year. Also contributing to the overall revenue increase was an increase in shipments of aviation balancing systems and accessory kits to the military under existing contracts and to commercial customers. For the three months ended September 30, 2013, the largest commercial customer for the segment was an Asian customer, which accounted for \$461 thousand, or 20.0%, of the third quarter revenue. During the same period in 2012, the largest commercial customer for the segment was an aviation balancing system commercial customer, which accounted for \$79 thousand, or 7.3%, of the third quarter revenue. The U.S. Air Force was the largest government customer for the three months ended September 30, 2013 and accounted for \$719 thousand, or 31.1%, of the third quarter revenue. The U.S. Air Force was also the largest government customer for the quarter ended September 30, 2012 and accounted for \$495 thousand, or 21.3%, of the third quarter revenue.

Product revenue in our Test and Measurement Instrumentation segment for the nine months ended September 30, 2013 increased by \$3.1 million, or 85.6%, to \$6.8 million from \$3.7 million for the same period in 2012. This increase in product revenue was attributed to a 113.9% increase in shipments of military and commercial aviation balancing systems and accessory kits. Also contributing to the overall increase was a 67.1% rise in general instrumentation revenue which was driven by higher capacitance product and tensile stage sales. For the nine months ended September 30, 2013, the largest commercial customer for the segment was an Asian customer, which accounted for \$461 thousand, or 6.8%, of the year-to-date revenue. For the nine months ended September 30, 2012, the largest commercial customer for the segment was an Asian distributor, which accounted for \$316 thousand, or 8.7%, of the year-to-date revenue. The U.S. Air Force was the largest government customer for the nine months ended September

Edgar Filing: MECHANICAL TECHNOLOGY INC - Form 10-Q

30, 2013 and accounted for \$2.1 million, or 31.5%, of the year-to-date revenue. The U.S. Air Force was also the largest government customer for the nine months ended September 30, 2012 and accounted for \$659 thousand, or 18.0%, of the year-to-date revenue.

Information regarding government contracts included in product revenue is as follows:

(Dollars in thousands)		Revenues for the				Revenues for the				Contract Revenues to Date			Total Contract Orders Received to Date		
		Three Months Ended				Nine Months Ended				September 30,			September 30,		
		2013		2012		2013		2012		2013			2013		
Contract ⁽¹⁾	Expiration														
Aviation Balancing Systems															
\$6.5 million U.S. Air Force Maintenance	09/27/2014 ⁽²⁾	\$	550	\$	225	\$	727	\$	337	\$		4,135	\$		4,180
\$4.1 million U.S. Air Force Systems	08/29/2015 ⁽²⁾	\$	57	\$		\$	399	\$	171	\$		1,254	\$		1,254
\$917 thousand U.S. Air Force Kit	09/30/2014 ⁽³⁾	\$		\$		\$	585	\$		\$		769	\$		769

(1) Contract values represent maximum potential values and may not be representative of actual results.

(2) Date represents expiration of contract, which includes the exercise of all four option extensions.

(3) Date represents expiration of contract, which includes the exercise of two option extensions.

Cost of Product Revenue. Cost of product revenue in our Test and Measurement Instrumentation segment for the three months ended September 30, 2013 increased by \$255 thousand, or 41.1%, to \$875 thousand from \$620 thousand for the same period in 2012 due to the 113.5% increase in product revenue. The cost of product revenue, however, rose proportionately less than the increase in product revenue due to reduced production overhead, lower product material costs and improved inventory management. Gross profit, as a percentage of product revenue, increased to 62.1%, compared to 42.7% for the same period in 2012 due to reduced production overhead, lower product material costs and improved inventory management.

Cost of product revenue in our Test and Measurement Instrumentation segment for the nine months ended September 30, 2013 increased by \$713 thousand, or 36.8%, to \$2.7 million from \$1.9 million for the same period in 2012 due to the 85.6% increase in product revenue. The cost of product revenue, however, rose proportionately less than the increase in product revenue due to reduced production overhead, lower product material costs and improved inventory management. Gross profit, as a percentage of product revenue, increased to 60.9%, compared to 46.9% for the same period in 2012 due to reduced production overhead, lower product material costs and improved inventory management.

Unfunded Research and Product Development Expenses. Unfunded research and product development expenses in our Test and Measurement Instrumentation segment for the three months ended September 30, 2013 decreased by \$26 thousand, or 7.8%, to \$301 thousand from \$327 thousand for the same period in 2012. This decrease was due to reduced external development spending.

Unfunded research and product development expenses in our Test and Measurement Instrumentation segment for the nine months ended September 30, 2013 decreased by \$90 thousand, or 8.7%, to \$948 thousand from \$1.0 million for the same period in 2012. This decrease was due to lower personnel costs and reduced external development spending.

Selling, General and Administrative Expenses. Selling, general and administrative expenses in our Test and Measurement Instrumentation segment for the three months ended September 30, 2013 increased by \$100 thousand, or 21.3%, to \$572 thousand from \$472 thousand for the same period in 2012. This increase is the result of increased commissions to external sales representatives and higher personnel costs.

Selling, general and administrative expenses in our Test and Measurement Instrumentation segment for the nine months ended September 30, 2013 increased by \$159 thousand, or 11.2%, to \$1.6 million from \$1.4 million for the same period in 2012. This increase is the result of additional staffing in the sales department, higher commissions to external sales representatives and increased international travel.

New Energy Segment

Selling, General and Administrative Expenses. Selling, general and administrative expenses in our New Energy segment decreased by \$16 thousand to \$25 thousand for the three months ended September 30, 2013, compared to \$41 thousand for the same period in 2012.

Selling, general and administrative expenses in our New Energy segment decreased by \$70 thousand to \$67 thousand for the nine months ended September 30, 2013, compared to \$137 thousand for the same period in 2012. Currently, MTI Micro has no employees and projects to spend between \$5 and \$10 thousand per month for operating activities including rent, limited sales efforts, patent fees to keep the patent portfolio current and minimal consultant costs to perform these initiatives.

Results of Consolidated Operations

Operating Income (Loss). Operating income for the three months ended September 30, 2013 was \$255 thousand compared to an operating loss of \$1.2 million for the same period in 2012. Operating income for the nine months ended September 30, 2013 was \$553 thousand compared to an operating loss of \$2.7 million for the same period in 2012. These increases in operating income were a result of the factors noted above as well as savings achieved from the cost reductions implemented in the second half of 2012.

Income Tax (Expense) Benefit. Income tax expense for the three and nine months ended September 30, 2013 was \$113 thousand and \$268 thousand, respectively. Income tax expense for both the three and nine months ended September 30, 2012 was \$6 thousand. During the nine months ended September 30, 2013, the Company's effective income tax rate was 47.4%. The projected annual effective tax rate is more than the Federal statutory rate of 35%, primarily due to permanent differences and the change in the valuation allowance. For the nine months ended September 30, 2012, the Company's effective income tax rate was 0%. The valuation allowance against our deferred tax assets was approximately \$17.8 million at September 30, 2013 and December 31, 2012. We will continue to evaluate the ability to realize our deferred tax assets and related valuation allowances on a quarterly basis.

Net Loss (Income) Attributed to Non-Controlling Interests (of MTI Micro). The net loss attributed to non-controlling interests for the three and nine months ended September 30, 2013 was \$18 thousand and \$52 thousand, respectively. This is the result of the net loss of MTI Micro of \$34 thousand and \$99 thousand, respectively for the three and nine months ended September 30, 2013. The net loss attributed to non-controlling interests was \$36 thousand for the three months ended September 30, 2012, which is the result of the net loss of MTI Micro of \$69 thousand in 2012. The net income attributed to non-controlling interests was \$10 thousand for the nine months ended September 30, 2012. This is the result of the net income of MTI Micro of \$19 thousand in 2012. During 2012, MTI Micro's operations were impacted by the suspension of operations in late 2011 and the money received from the sales of certain surplus equipment on hand.

Net Income (Loss) Attributed to MTI. Net income attributed to MTI for the three months ended September 30, 2013 was \$164 thousand compared to a net loss attributed to MTI of \$1.1 million for the same period in 2012. The increase in net income attributed to MTI of \$1.3 million is primarily attributable to an increase of MTI Instruments net income of \$1.1 million, which is a result of the factors discussed above.

Net income attributed to MTI for the nine months ended September 30, 2013 was \$350 thousand compared to a net loss attributed to MTI of \$2.5 million for the same period in 2012. The increase in net income attributed to MTI of \$2.9 million is primarily attributable to an increase of MTI Instruments net income of \$2.7 million, which is a result of the factors discussed above.

Liquidity and Capital Resources

Several key indicators of our liquidity are summarized in the following table:

(Dollars in thousands)	Nine Months Ended September 30, 2013	Nine Months Ended September 30, 2012	Year Ended Dec 31, 2012
Cash	\$ 1,007	\$ 531	\$ 289
Working capital	1,950	876	1,350
Net income (loss) attributed to MTI	350	(2,540)	(2,086)
Net cash provided by (used in) operating activities	773	(1,269)	(1,506)
Purchase of property, plant and equipment	(68)	(12)	(17)

The Company has historically incurred significant losses, until 2012 the majority stemming from the direct methanol fuel cell product development and commercialization programs of MTI Micro, and had a consolidated accumulated deficit of \$121.8 million as of September 30, 2013. During the nine months ended September 30, 2013, the Company

generated net income attributed to MTI of \$350 thousand, had cash provided by operating activities totaling \$773 thousand and had working capital of \$2.0 million, a \$600 thousand increase from December 31, 2012. This increase was the result of the cost saving initiatives that were implemented in the second half 2012. Management believes that the reorganized Company currently has adequate resources to avoid any other cost cutting measures which could adversely affect the business. As of September 30, 2013, we had no debt, no outstanding commitments for capital expenditures and approximately \$970 thousand (excluding MTI Micro available cash) of cash available to fund our active operations.

If production levels rise at MTI Instruments, additional capital equipment may be required in the foreseeable future. For the remainder of 2013, we expect to spend approximately \$32 thousand on capital equipment and \$427 thousand in research and development on MTI Instruments products. We expect to finance any future expenditures and continue funding our active operations from our current cash position and our projected 2013 cash flow pursuant to management's current plan. We may also seek to supplement our resources through sales of stock or assets, including our investment in MTI Micro. Besides the line of credit at MTI Instruments, we have no other commitments for funding future needs of the organization at this time and such additional financing during 2013 may not be available to us on acceptable terms, if at all.

While it cannot be assured, management believes that, due in part to our current working capital, the aforementioned cost reductions implemented in the second half of 2012, recent replacements in sales staff and projected inventory reductions, the Company should continue the positive cash flows it experienced in the first three quarters of 2013 to fund the Company's active operations for the foreseeable future. However, if near-term revenue estimates are delayed or missed, the Company may need to implement additional steps to ensure liquidity including, but not limited to, the deferral of planned capital spending, postponing anticipated new hires and/or delaying existing or pending product development initiatives. Such steps, if required, could potentially have a material and adverse effect on the business.

Although MTI Micro continues to believe in the potential of its Mobion® based power solutions, operations have been suspended since late 2011 at MTI Micro until such time as market demand and other deciding factors, including obtaining additional external financing, the successful completion of customer trials, a new development program with a government agency, and/or a customer order, come to fruition. MTI Micro will continue to seek additional capital from external sources to resume operations and fund future development, as warranted. If MTI Micro is unable to secure additional financing, a new development program or a customer order, the MTI Micro Board of Directors will assess other options for MTI Micro, including the sale of its intellectual property portfolio and/or remaining assets. As of September 30, 2013, MTI Micro's available cash is approximately \$37 thousand.

Line of Credit

On September 20, 2011, MTI Instruments entered into a working capital line of credit with First Niagara Bank, N.A., pursuant to the Demand Grid Note. MTI Instruments may borrow from time to time up to \$400 thousand to support its working capital needs. The note is payable upon demand, and the interest rate on the note is equal to the prime rate with a floor of 4.0% per annum. The note is secured by a lien on all of the assets of MTI Instruments and is guaranteed by the Company. The line of credit was renewed on September 23, 2013. The line of credit is subject to a review date of June 30, 2014. Under the line of credit, MTI Instruments is required to maintain a line balance of \$0 for thirty consecutive days during each calendar year. As of September 30, 2013 and December 31, 2012 there were no amounts outstanding under the line of credit.

Backlog, Inventory and Accounts Receivable

At September 30, 2013, our order backlog was \$417 thousand compared to \$1.5 million at September 30, 2012 and \$1.6 million at December 31, 2012. The decrease in backlog from December 2012 was due to lower bookings under existing contracts during the first nine months of the year.

Our inventory turnover ratios and accounts receivable days outstanding for the trailing twelve month periods and their changes at September 30, 2013 and 2012 are as follows:

	2013	2012	Change
Inventory turnover	3.6	2.4	1.2
Average accounts receivable days outstanding	41	43	(2)

The increase in inventory turns is due to a 14% decrease in average inventory balances on a 30% rise in sales during the comparable periods.

The average accounts receivable days outstanding for the last twelve months has been reduced two days due to higher government sales, which on average pay in less than thirty days.

Off-Balance Sheet Arrangements

The Company has no off balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market Risk

Market risk is the risk that changes in market conditions will adversely affect earnings or cashflow. We categorize our market risks as interest rate risk and credit risk. Immediately below are detailed descriptions of the market risks and explanations as to how each of these risks are managed.

Interest Rate Risk. Interest rate risk is the risk that changes in interest rates could adversely affect earnings or cashflows. The Company's cash equivalents are sensitive to changes in interest rates. Interest rate changes would result in a change in interest income due to the difference between the current interest rates on cash. Interest rate risk sensitivity analysis is used to measure interest rate risk by computing estimated changes in cashflow as a result of assumed changes in market interest rates. A 10% decrease in 2013 interest rates would be immaterial to the Company's consolidated financial statements.

Credit Risk. Credit risk is the risk of loss we would incur if counterparties fail to perform their contractual obligations. Financial instruments that subject the Company to concentrations of credit risk principally consist of cash equivalents, trade accounts receivable and unbilled contract costs.

Our trade accounts receivable and fees are primarily from sales to commercial customers, the U.S. government and state agencies. We do not require collateral and have not historically experienced significant credit losses related to receivables or fees from individual customers or groups of customers in any particular industry or geographic area.

Our deposits are primarily in cash and deposited in commercial banks and investment companies. The Company has cash deposits in excess of federally insured limits.

Critical Accounting Policies and Significant Judgments and Estimates

The discussion and analysis of our financial condition and results of operations are based upon our consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. Note 2, Accounting Policies, to the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2012 includes a summary of our most significant accounting policies. There have been no material changes to the critical accounting policies previously disclosed in our Annual Report on Form 10-K for the year ended December 31, 2012. The preparation of these condensed consolidated financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of assets and liabilities. On an ongoing basis, we evaluate our estimates and judgments, including those related to revenue recognition, inventories, income taxes, stock-based compensation and derivatives. Management bases its estimates on historical experience and on various other factors that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. Periodically, we review our critical accounting estimates with the Audit Committee of our Board of Directors.

Recent Accounting Pronouncements

There are no recently issued accounting standards or standards with pending adoptions that the Company's management currently anticipates will have any material impact upon our financial statements.

Statement Concerning Forward-Looking Statements

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act and Section 21E of the Securities Exchange Act of 1934, as amended, or the Exchange Act. Any statements contained in this Form 10-Q that are not statements of historical fact may be forward-looking statements. When we use the words anticipate, estimate, plans, projects, continuing, ongoing, expects, management believe, we intend, should, could, may, will and similar words or phrases, we are identifying forward-looking statements. Such forward-looking statements include, but are not limited to, statements regarding:

- management's belief that it will have adequate resources to fund the Company's operations and capital expenditures over at least the next twelve months;
- anticipated levels of future earnings and continued positive cash flow;

- current plans of and projected spending by MTI Micro;
- the expectation that further cost-cutting measures will be avoided;
- future capital expenditures and spending on research and development;
- expected funding of future cash expenditures;
- projected inventory reductions; and
- the impact of pending legal proceedings.

Forward-looking statements involve risks, uncertainties, estimates and assumptions which may cause our actual results, performance or achievements to be materially different from those expressed or implied by forward-looking statements. Important factors that could cause these differences include the following:

- our inability to achieve profitability and improve liquidity;
- sales revenue growth of our test and measurement instrumentation business may not be achieved or maintained;
- the dependence of our test and measurement instrumentation business on a small number of customers and potential loss of government contracts particularly in light of expected defense department spending reductions resulting from the sequestration implemented in 2013 or cuts that may be imposed as a result of ongoing Congressional budget negotiations;
- our lack of long-term purchase commitments from our customers and the ability of our customers to cancel, reduce, or delay orders for our products;
- our inability to build and maintain relationships with our customers;
- our inability to develop and utilize new technologies that address the needs of our customers;
- intense competition in the instrumentation business;
- the cyclical nature of the electronics industry;

- significant periodic and seasonal quarterly fluctuations in our results of operations;
- the uncertainty of the U.S. and global economy;
- the impact of future exchange rate fluctuations;
- failure of our strategic alliances to achieve their objectives or perform as contemplated and the risk of cancellation or early termination of such alliance by either party;
- the loss of services of one or more of our key employees or the inability to hire, train, and retain key personnel;

- risks related to protection and infringement of intellectual property;
- product liability or defects;
- our dependence on sole suppliers or a limited group of suppliers for both business segments;

- our history of recurring net losses and the risk of continued net losses;

- our ability to generate income to realize our net operating losses

- risks related to the limitation of the use of our net operating losses in the event of certain ownership changes;
- our ownership position in MTI Micro may be reduced further as a result of our need to seek external financing for MTI Micro's operations;
- MTI Micro's need to raise additional financing; and

- other factors discussed under the heading "Risk Factors" in our Annual Report on Form 10-K for the fiscal year ended December 31, 2012.

Forward-looking statements speak only as of the date they are made. You should not put undue reliance on any forward-looking statements. We assume no obligation to update forward-looking statements to reflect actual results, changes in assumptions, or changes in other factors affecting forward-looking information, except to the extent required by applicable securities laws. If we do update one or more forward-looking statements, no inference should be drawn that we will make additional updates with respect to those or other forward-looking statements.

Item 4. Controls and Procedures

The certifications of our Chief Executive Officer and Chief Financial Officer attached as Exhibits 31.1 and 31.2 to this Quarterly Report on Form 10-Q include, in paragraph 4 of such certifications, information concerning our disclosure controls and procedures and internal control over financial reporting. Such certifications should be read in conjunction with the information contained in this Item 4 for a more complete understanding of the matters covered by such certifications.

(a) Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our Chief Executive Officer and our Chief Financial Officer, evaluated the effectiveness of MTI's disclosure controls and procedures as of September 30, 2013. The term "disclosure controls and procedures," as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, means controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is accumulated and communicated to the company's management, including its principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure. We recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving their objectives and we necessarily apply our judgment in evaluating the cost-benefit relationship of possible controls and procedures. Based on the evaluation of our disclosure controls and procedures as of September 30, 2013, our Chief Executive Officer and Chief Financial Officer concluded that, as of such date, our disclosure controls and procedures were effective at the reasonable assurance level.

(b) Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting, as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act, during our fiscal quarter ended September 30, 2013 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

At any point in time, we may be involved in various lawsuits or other legal proceedings. Such lawsuits could arise from the sale of products or services or from other matters relating to our regular business activities, compliance with various governmental regulations and requirements, or other transactions or circumstances. We do not believe there are any such proceedings presently pending that could have a material adverse effect on our financial condition. See Note 11, Commitments and Contingencies, to our condensed consolidated financial statements for further information.

Item 1A. Risk Factors

Part II, Item 1A (Risk Factors) of our most recently filed Annual Report on Form 10-K with the Securities and Exchange Commission (SEC), filed on March 21, 2013, sets forth information relating to important risks and uncertainties that could materially adversely affect our business, financial condition and operating results. Except to the extent that information disclosed elsewhere in this Quarterly Report on Form 10-Q relates to such risk factors (including, without limitation, the matters described in Part I, Item 2 (Management's Discussion and Analysis of Financial Condition and Results of Operations - Statement Concerning Forward Looking Statements), there have been no material changes to our risk factors disclosed in our most recently filed Annual Report on Form 10-K. However, those risk factors continue to be relevant to an understanding of our business, financial condition and operating results and, accordingly, you should review and consider such risk factors in making any investment decision with respect to our securities.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None

Item 3. Defaults Upon Senior Securities

None

Item 4. Mine Safety Disclosures

Not applicable.

Item 5. Other Information

None

Item 6. Exhibits

Exhibit No. Description
