TIMET RESPONDS TO TRADE DECISION

DENVER, COLORADO . . . September 10, 2004 . . . Titanium Metals Corporation (NYSE:TIE) ("TIMET" or the "Company") is pleased to report that the President of the United States has approved a petition filed by TIMET to eliminate a special tariff exemption for titanium wrought products imported into the United States from Russia under the Generalized System of Preferences ("GSP").

Under the GSP program, the President has the authority to suspend normal trade tariffs on imports of designated products from certain developing countries. Normal customs duties on titanium wrought products from Russia have been suspended since 1998. VSMPO, a Russian titanium producer, has used this tariff exemption to expand substantially its share of the United States titanium market, such that VSMPO now accounts for more than 60% of all wrought titanium imported into the United States.

J. Landis Martin, Chairman and CEO of TIMET, stated, "We are heartened by the Administration's recognition that VSMPO no longer needs special trade benefits to compete in the United States. This decision will help to restore competitive balance in our home market and insure that the United States has a vibrant domestic titanium industry capable of supplying America's commercial and military needs for this strategic metal. The President's actions will also keep jobs at home rather than unnecessarily shipping them to Russia."

Mr. Martin continued, "This would not have been possible without the strong support the U.S. titanium industry has received in this process from many Members of Congress on both sides of the aisle, from the Administration and from our employees. We are grateful for their support."

TIMET, headquartered in Denver, Colorado, is a leading worldwide producer of titanium metal products. Information on TIMET is available on the Company's website at <http://www.timet.com>.
