CONDENSED CONSOLIDATED STATEMENTS OF CASH FLOWS - Continued
(UNAUDITED)

Supplemental schedule of non-cash investing and financing activities:

During the nine months ended September 30, 2010:

- We satisfied a \$100,000 note payable through the issuance of a new convertible note payable.
- We allocated \$129,851 of the proceeds from the convertible notes payable to the warrants and beneficial conversion feature.

During the nine months ended September 30, 2009:

- We incurred an unrealized loss on marketable securities available-for-sale of \$34,237.

See accompanying Notes to Condensed Consolidated Financial Statements.

aVINCI MEDIA CORPORATION AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Description of Organization and Summary of Significant Accounting Policies

Organization and Nature of Operations

aVinci Media Corporation (the “Company”, “we”, “us”, “our”) was formed as a result of a merger transaction between Sequoia Media Group, LC (Sequoia), a Utah limited liability company, and Secure Alliance Holdings Corporation (SAH), a publicly held company, on June 6, 2008. We are a Delaware corporation that develops and sells an engaging way for anyone to tell their “Story” with personal digital expressions. Our products simplify and automate the process of creating professional-quality multi-media products using personal photos and videos.

Basis of Presentation

The accompanying condensed consolidated financial statements are presented in accordance with U.S. generally accepted accounting principles (US GAAP).

Unaudited Information

In the opinion of management, the accompanying unaudited condensed consolidated financial statements as of September 30, 2010 and for the three and nine months ended September 30, 2010 and 2009 reflect all adjustments (consisting only of normal recurring items) necessary to present fairly the financial information set forth therein. The consolidated balance sheet as of December 31, 2009, presented herein is derived from the audited consolidated balance sheet presented in our annual report on Form 10-K at that date. Certain amounts in the prior periods’ financial statements have been reclassified to conform to the current period presentation. Certain information and note disclosures normally included in financial statements prepared in accordance with US GAAP have been condensed or omitted pursuant to SEC rules and regulations, although we believe that the following disclosures, when read in conjunction with the annual financial statements and the notes included in our Form 10-K for the year ended December 31, 2009, are adequate to make the information presented not misleading. Results for the three and nine month periods ended September 30, 2010 are not necessarily indicative of the results to be expected for the year ending December 31, 2010.

Net Loss per Common Share

Basic earnings (loss) per share (EPS) is calculated by dividing income (loss) available to common stockholders by the weighted-average number of common shares outstanding during the period. Diluted EPS is similar to Basic EPS except that the weighted-average number of common shares outstanding is increased using the treasury stock method to include the number of additional common shares that would have been outstanding if the dilutive potential common shares had been issued. Such potentially dilutive common shares include stock options, warrants, convertible debt, and convertible preferred stock. Shares having an antidilutive effect on periods presented are not included in the computation of dilutive EPS.

As of September 30, 2010 and 2009, we had 17,543,627 and 16,229,854 potentially dilutive shares of common stock, respectively, not included in the computation of diluted net income (loss) per common share because it would have decreased the net income (loss) per common share. Stock options and warrants could be dilutive in the future.

Multiple Element Arrangement

Generally, we recognize revenue when persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable, and collectability is probable.

In October of 2009 we agreed to enter into an agreement to license our new archival DVD creation software for deployment in Walmart stores and received a nonrefundable initial payment of \$247,500. On March 24, 2010, we finalized the agreement, which provides a license to install the software in stores, initial training and annual maintenance (post-contract customer support or “PCS”) for \$300 per year per store in which the software is installed. The initial nonrefundable \$247,500 payment covers the first 825 annual store licenses. All elements relating to the initial nonrefundable payment were delivered as of March 31, 2010 except for PCS. We do not have vendor specific objective evidence (“VSOE”) for any of the elements of this agreement.

Although we do not have VSOE for the PCS, we meet the following criteria, which allows us to recognize revenue for the PCS upfront with the license revenue:

- The PCS fee is included with the initial licensing fee
- The PCS included with the initial license is for one year or less
- The estimated cost of providing PCS during the arrangement is insignificant
- Unspecified upgrades or enhancements offered during PCS arrangements historically have been and are expected to continue to be minimal and infrequent

We recognized the initial \$247,500 payment as revenue during the quarter ended March 31, 2010 and an additional \$782,700 in revenue during the quarter ended September 30, 2010 based upon the number of stores receiving the software deployment during the quarter. We recorded an accrual of \$6,000 for the estimated cost to provide PCS to Walmart.

Derivative Instruments

In connection with the sale of debt or equity instruments, we may sell warrants to purchase our common stock. In certain circumstances, these warrants may be classified as derivative liabilities, rather than as equity. Additionally, the debt or equity instruments may contain embedded derivative instruments, such as conversion options, which in certain circumstances may be required to be bifurcated from the associated host instrument and accounted for separately as a derivative asset or liability.

The accounting for derivative instruments is complex. Our warrant derivative liability is re-valued at the end of each reporting period, with changes in the fair value of the derivative liability recorded as a charge or credit to other income (expense), in the period in which the changes in fair value occur. For warrants that are accounted for as derivative instrument liabilities, we determine the fair value of these instruments using the Black-Scholes option-pricing model. This model requires assumptions related to the expected term of the instrument and risk-free rates of return, the Company's current common stock price, expected dividend yield and the expected volatility corresponding to the expected life of the instrument.

Use of Estimates

The preparation of financial statements in conformity with US GAAP requires management to make estimates and assumptions that affect reported amounts and disclosures. Accordingly, actual results could differ from those estimates.

Income Taxes

At September 30, 2010, management had recorded a full valuation allowance against the net deferred tax assets related to temporary differences and net operating losses because there is significant uncertainty as to the realizability of the deferred tax assets. Based on a number of factors, the currently available, objective evidence indicates that it is more-likely-than-not that the net deferred tax assets will not be realized.

Recently Adopted Accounting Standards

In January 2010, the FASB issued Accounting Standards Update No. 2010-06 (FASB ASU 10-06), "Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements." This update requires entities to 1) disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers and 2) present separately (i.e. on a gross basis rather than as a net amount), information about purchases, sales, issuances, and settlements in the roll forward of changes in level 3 fair value measurements. The update requires fair value disclosures by class of assets and liabilities rather than by major category or line item in the statement of financial position. Disclosures regarding the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for assets and liabilities in both level 2 and level 3 are also required. For all portions of the update except the gross presentation of activity in the level 3 roll forward, this standard is effective for interim and annual reporting periods beginning after December 15, 2009. For the gross presentation of activity in the level 3 roll forward, this guidance is effective for fiscal years beginning after December 15, 2010. We have provided the additional required disclosures effective January 1, 2010.

Recent Accounting Standards Not Yet Adopted

In October 2009, the FASB issued Accounting Standards Update No. 2009-13 (FASB ASU 09-13), "Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements (a consensus of the FASB Emerging Issues Task Force)." FASB ASU 09-13 updates the existing multiple-element arrangement guidance currently in FASB Topic 605-25 (Revenue Recognition – Multiple-Element Arrangements). This new guidance eliminates the requirement that all undelivered elements have objective evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to the items that have already been delivered. Further, companies will be required to allocate revenue in arrangements involving multiple deliverables based on the estimated selling price of each deliverable, even though such deliverables are not sold separately by either the company itself or other vendors. This new guidance also significantly expands the disclosures required for multiple-element revenue arrangements. The revised guidance will be effective for the first annual period beginning on or after June 15, 2010. We may elect to adopt the provisions prospectively to new or materially modified arrangements beginning on the effective date or retrospectively for all periods presented. We are currently evaluating the impact FASB ASU 09-13 will have on our consolidated financial statements.

In October 2009, the FASB issued Accounting Standards Update No. 2009-14 (FASB ASU 09-14), "Certain Revenue Arrangements That Include Software Elements—a consensus of the FASB Emerging Issues Task Force," that reduces the types of transactions that fall within the current scope of software revenue recognition guidance. Existing software revenue recognition guidance requires that its provisions be applied to an entire arrangement when the sale of any products or services containing or utilizing software when the software is considered more than incidental to the product or service. As a result of the amendments included in FASB ASU No. 2009-14, many tangible products and services that rely on software will be accounted for under the multiple-element arrangements revenue recognition guidance rather than under the software revenue recognition guidance. Under this new guidance, the following components would be excluded from the scope of software revenue recognition guidance: the tangible element of the product, software products bundled with tangible products where the software components and non-software components function together to deliver the product's essential functionality, and undelivered components that relate to software that is essential to the tangible product's functionality. FASB ASU 09-14 also provides guidance on how to allocate transaction consideration when an arrangement contains both deliverables within the scope of software revenue guidance (software deliverables) and deliverables not within the scope of that guidance (non-software deliverables). This guidance will be effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. We may elect to adopt the provisions prospectively to new or materially modified arrangements beginning on the effective date or retrospectively for all periods presented. However, we must elect the same transition method for this guidance as that chosen for FASB ASU No. 2009-13. We are currently evaluating the impact FASB ASU 09-14 will have on our consolidated financial statements.

Reclassifications

Certain amounts in the 2009 financial statements have been reclassified to conform to the 2010 presentation.

2. Going Concern and Liquidity

Our financial statements have been prepared under the assumption that we will continue as a going concern. The report of our independent registered public accounting firm included in our Annual Report on Form 10-K for the year ended December 31, 2009, filed with the Securities and Exchange Commission, includes an explanatory paragraph expressing substantial doubt as to our ability to continue as a going concern. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

We have operated at a loss since inception and are not currently generating sufficient revenues to cover our operating expenses. We are continuing to work to obtain new customers and to increase revenues from existing customers. During the first quarter of 2010, we entered into a financing agreement with three current shareholders to refinance a \$100,000 note payable and to provide new financing of \$300,000 for operating capital through the issuance of convertible debt.

In October of 2009 we agreed to enter into an agreement to license our new archival DVD creation software for deployment in Walmart stores during 2010 and received a first payment of \$247,500. On March 24, 2010, we finalized the agreement and received additional advance payments of \$742,500 in March 2010 and \$22,200 in June 2010 to cover an annual per store license fee for stores that deploy the software. This license fee revenue model differs from our past model of generating royalty revenue on each product created. The widespread rollout of our archive product in Walmart stores occurred during September 2010. We anticipate that with the funds received in March 2010 and June 2010 under this agreement, and our expected monthly sales revenue from other sources throughout 2010 we will be able to fund operations throughout 2010. However, we may need to seek additional sources of financing should our monthly sales revenues be insufficient to fund operations at our current levels through 2011.

If new sources of financing are insufficient or unavailable, we will modify our growth and operating plans to the extent of available funding, if any. Any decision to modify our business plans would harm our ability to pursue our growth plans. If we cease or stop operations, our shares could become valueless. Historically, we have funded operating, administrative and development costs through the sale of equity capital or debt financing. If our plans and/or assumptions change or prove inaccurate, or we are unable to obtain further financing, or such financing and other capital resources, in addition to projected cash flow, if any, prove to be insufficient to fund operations, our continued viability could be at risk. To the extent that any such financing involves the sale of our equity, our current stockholders could be substantially diluted. There is no assurance that we will be successful in achieving any or all of these objectives in future periods.

3. Series A Convertible Preferred Stock

In March 2009, we initiated a private offering pursuant to Section 4(2) of the Securities Act of 1933, as amended, and Rule 506 promulgated thereunder. The investment was in the form of Series A convertible preferred shares, \$0.01 per share par value with a stated value of \$1.00 per share, convertible into common shares at the rate of \$0.20 per common share. For each Series A convertible preferred share, investors in the offering also received a warrant to purchase 1.25 shares of common stock at \$0.25 per share at any time within five years. We sold a total of 1,202,627 Series A convertible preferred shares pursuant to the offering. The Series A shares carry a cumulative dividend at an annual rate of 8%. Cumulative dividends not accrued or declared as of September 30, 2010 are \$128,567.

4. Equity-Based Compensation

We currently have a stock option plan that allows us to grant stock options, restricted stock and other equity based awards to employees, directors, and consultants.

Equity-based compensation expense, included in general and administrative expense in the consolidated statements of operations, totaled \$40,767 and \$539,807, respectively for the three months ended September 30, 2010 and 2009; and totaled \$211,586 and \$908,774, respectively for the nine months ended September 30, 2010 and 2009.

During the nine months ended September 30, 2010, 1,150,000 shares with a fair value of \$27,250 were issued for services from board members, consulting services, and for settlement of a dispute.

As of September 30, 2010, there was approximately \$168,816 of unrecognized equity-based compensation expense related to option grants that will be recognized over a weighted average period of 0.1 year.

5. Fair Value

FASB Topic 820, "Fair Value Measurements and Disclosures," establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. FASB Topic 820 describes three levels of inputs that we use to measure fair value:

- Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the entity has the ability to access as of the measurement date.
- Level 2: Level 1 inputs for assets or liabilities that are not actively traded. Also consists of an observable market price for a similar asset or liability. This includes the use of "matrix pricing" used to value debt securities absent the exclusive use of quoted prices.
- Level 3: Consists of unobservable inputs that are used to measure fair value when observable market inputs are not available. This could include the use of internally developed models, financial forecasting, etc.

Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability between market participants at the balance sheet date. When possible we look to active and observable markets to price identical assets or liabilities. When identical assets and liabilities are not traded in active markets, we look to observable market data for similar assets and liabilities. However, when certain assets and liabilities are not traded in observable markets we must use other valuation methods to develop a fair value.

The following table presents financial assets and liabilities measured at fair value as of September 30, 2010:

Description	Balance at September 30, 2010	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

(Level 1)

Current assets:

Available-for-sale securities	\$7,142	\$7,142	—	—
-------------------------------	---------	---------	---	---

Current liabilities:

Warrant derivative liability	\$22,028	—	—	\$ 22,028
------------------------------	----------	---	---	-----------

The following table presents financial assets and liabilities measured at fair value as of December 31, 2009:

Description	Balance at December 31, 2009	Fair Value Measurements at Reporting Date Using		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Current assets:				
Available-for-sale securities	\$30,585	\$30,585	—	—

Our warrant derivative liability is re-valued at the end of each reporting period, with changes in the fair value of the derivative liability recorded as a charge or credit to other income (expense), in the period in which the changes in fair value occur. For warrants that are accounted for as derivative instrument liabilities, we determine the fair value of these instruments using the Black-Scholes option-pricing model. This model requires assumptions related to the expected term of the instrument and risk-free rates of return, the Company's current common stock price, expected dividend yield and the expected volatility corresponding to the expected life of the instrument. The following table presents the fair value reconciliation of Level 3 liabilities measured at fair value during the nine months ended September 30, 2010:

	Fair Value Measurements Using Significant Unobservable Inputs (Level 3) for the nine months ended September 30, 2010
Beginning balance, December 31, 2009	\$ —
Issuances:	
Warrant derivative issued in conjunction with convertible notes payable	67,386
Gain on derivatives included in earnings	(45,358)
Ending balance, September 30, 2010	\$ 22,028

6. Related Party Transactions

Board Compensation

On January 12, 2010 we issued 50,000 shares of common stock to John E. Tyson for services as a director during 2010. These shares had a fair value of \$1,750 and vested immediately.

Convertible Notes Payable

During the quarter ended March 31, 2010:

- We converted a \$100,000 note payable that was owed to the chairman of the board of directors to a convertible note payable with terms as disclosed in Note 7.
- We issued a \$250,000 convertible note payable to a majority shareholder of aVinci and an additional \$50,000 convertible note payable to a minority shareholder with terms as disclosed in Note 7.

7. Convertible Notes Payable and Derivatives

During the first quarter of 2010, we entered into a financing agreement with two current shareholders to refinance a \$100,000 note payable and to provide new financing of \$250,000 for operating capital. The notes bear interest at 8%, mature December 31, 2011 and are secured by our assets. An additional \$50,000 note was executed during the quarter ended March 31, 2010 with the same terms as the other notes above except that it is unsecured.

These notes and accrued interest are convertible at any time prior to maturity, at the option of the holder, into Series A convertible preferred stock at \$1 per share. The underlying Series A convertible preferred stock is convertible to common stock at \$.06 per share.

As part of the financing, the Company also issued warrants (the "Warrants") to purchase 3,333,217 shares of the Company's Common Stock at an exercise price of \$0.075 per share with expiration dates from January 5, 2015 to March 5, 2015.

We allocated \$67,386 of the \$400,000 total proceeds to the warrants and determined that there was a beneficial conversion feature totaling \$62,465 for a total debt discount of \$129,851. The debt discount is being amortized over the expected term of the loan agreement. Amortization of the debt discount totaled \$48,415 for the nine months ended September 30, 2010.

The following table summarizes the convertible notes payable balance at September 30, 2010:

	September 30, 2010
Total convertible debt outstanding	\$ 400,000
Less debt discount	(81,436)
Net convertible debt outstanding	\$ 318,564

The Warrants contain a provision which adjusts the exercise price of the Warrants if the Company issues or sells common stock or securities convertible into common stock at a price per share, or equivalent price per share lower than \$0.06. Because of this anti-dilution feature, the Warrants are subject to derivative accounting, and are valued at fair value at the date of issuance and each subsequent reporting period.

Upon issuance, the fair value of the derivatives on the Warrants was \$67,386. The Company recorded a warrant derivative liability for this amount. The fair value of the derivatives as of September 30, 2010, was \$22,028; therefore, the Company recorded a gain on derivatives of \$43,358. The fair values of the derivatives were determined using the Black-Scholes model based on the following assumptions:

Warrant Derivatives

	Upon Issuance		September 30, 2010	
Expected volatility	55.0	%	55.0	%
Expected life, range in years	5.0		4.2 – 4.4	
Expected dividend yield on stock	0.00	%	0.00	%
	2.43 -			
Risk free interest rate range	2.48	%	1.41	%

8. Legal Proceedings

The Company entered into a settlement agreement in August 2010 to resolve a legal proceeding as previously disclosed on the Company's Form 8-K filed September 2, 2010. The Company accrued the estimated settlement costs during the second quarter of 2010 and adjusted the estimate during the third quarter of 2010 upon the finalization of the agreement.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Some of the information in this filing contains forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as "may," "will," "expect," "anticipate," "believe," "estimate" and "continue," or similar words. You should read statements that contain these words carefully because they:

- discuss our future expectations;
- contain projections of our future results of operations or of our financial condition; and
- state other "forward-looking" information.

We believe it is important to communicate our expectations. However, there may be events in the future that we are not able to accurately predict or over which we have no control. Our actual results and the timing of certain events could differ materially from those anticipated in these forward-looking statements.

Overview

In October of 2009 we agreed to enter into an agreement to license our new archival DVD creation software for deployment in Walmart stores during 2010 and received a first payment of \$247,500. On March 24, 2010, we finalized the agreement and received advanced payments of \$742,500 in March 2010 and \$22,200 in June 2010 to cover an annual per store license fee for stores that deploy the software. This license fee revenue model differs from our past model of generating royalty revenue on each product created. The widespread rollout of our archive product in Walmart stores occurred in September 2010. We anticipate that with the funds received in March 2010 and June 2010 under this agreement, and our expected monthly sales revenue from other sources throughout 2010 we will be able to fund operations throughout 2010. However, we may need to seek additional sources of financing should our monthly sales revenues be insufficient to fund operations at our current levels through 2011.

Critical Accounting Policies and Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect reported amounts and disclosures. We base our assumptions, judgments and estimates on historical experience and various other factors that we believe to be reasonable under the circumstances. Accordingly, actual results could differ from those estimates.

We believe that the assumptions, judgments and estimates involved in the accounting for revenue recognition, and equity-based compensation have the greatest potential impact on our Condensed Consolidated Financial Statements. These areas are key components of our results of operations and are based on complex rules which require us to make judgments and estimates, so we consider these to be our critical accounting policies. Historically, our assumptions, judgments and estimates relative to our critical accounting policies have not differed materially from actual results.

With the exception of a new multiple element arrangement and the issuance of derivative instruments discussed below, there have been no significant changes in our critical accounting policies and estimates during the nine months ended September 30, 2010 as compared to the critical accounting policies and estimates disclosed in Management's Discussion and Analysis of Financial Condition and Results of Operations included in our Annual Report on

Form 10-K for the year ended December 31, 2009.

Multiple Element Arrangement

Generally, we recognize revenue when persuasive evidence of an arrangement exists, we have delivered the product or performed the service, the fee is fixed or determinable, and collectability is probable. Under our Walmart agreement, based upon meeting the requirements disclosed in footnote 1 of Item 1 above, we recognized the initial \$247,500 payment as revenue during the quarter ended March 31, 2010 and an additional \$782,700 in revenue during the quarter ended September 30, 2010 based upon the number of stores receiving the software deployment during the quarter. We recorded an accrual of \$6,000 for the estimated cost to provide PCS to Walmart.

Derivative Instruments

In connection with the sale of debt or equity instruments, we may sell warrants to purchase our common stock. In certain circumstances, these warrants may be classified as derivative liabilities, rather than as equity. Additionally, the debt or equity instruments may contain embedded derivative instruments, such as conversion options, which in certain circumstances may be required to be bifurcated from the associated host instrument and accounted for separately as a derivative asset or liability.

The accounting for derivative instruments is complex. Our warrant derivative liability is re-valued at the end of each reporting period, with changes in the fair value of the derivative liability recorded as a charge or credit to other income (expense), in the period in which the changes in fair value occur. For warrants that are accounted for as derivative instrument liabilities, we determine the fair value of these instruments using the Black-Scholes option-pricing model. This model requires assumptions related to the expected term of the instrument and risk-free rates of return, the Company's current common stock price, expected dividend yield and the expected volatility corresponding to the expected life of the instrument.

Results of Operations

For the first nine months of 2010, revenues increased 209% and operating losses decreased by 94% over the same period in 2009. For the nine months ended September 30, 2010, we had revenues of \$2,079,926, a gross profit of \$1,594,753, an operating loss of \$230,924, and a net loss of \$166,604. This compares to revenues of \$673,728, a gross profit of \$86,958, an operating loss of \$4,152,414, a net loss of \$4,170,561, and a net loss applicable to common stockholders of \$4,858,692 for the same period in 2009.

Revenues.

Total revenues increased \$797,054, or 254%, to \$1,110,838 for the three months ended September 30, 2010, as compared to \$313,784 for the same period in 2009. The increase in revenue during the three months ended September 30, 2010 over the same period in 2009 is primarily due to deployment of our archive software in Walmart stores during the third quarter of 2010 under a software license agreement. For the nine months ended September 30, 2010, total revenues increased \$1,406,198 or 209% to \$2,079,926 as compared to \$673,728 for the same period in 2009. The increase in revenue for the nine months ended September 30, 2010 is also due to the deployment of our archive software in Walmart stores during the third quarter of 2010; increasing sales in Walgreen's stores throughout the United States; and increasing sales volume of ESPN branded products.

Two customers accounted for a total of 93% of aVinci's revenues for the three months ended September 30, 2010 (individually 70% and 23%) compared to two customers accounting for 88% of the revenue for the same period in 2009 (individually 75% and 13%). Two customers accounted for a total of 87% of aVinci's revenues for the nine months ended September 30, 2010 (individually 50% and 37%) compared to two customers accounting for 79% of aVinci's revenue for the same period in 2009 (individually 58% and 21%). No other single customer accounted for more than 10% of aVinci's total revenues for the three and nine months ended September 30, 2010 or the same period in 2009.

Operating Expenses.

Cost of Goods Sold. Our cost of goods sold increased \$3,679, or 2%, to \$188,006 for the three months ended September 30, 2010, compared to \$184,327 for the same period in 2009. The increase in cost of goods sold is primarily due to a \$35,000 increase related to supplying an initial inventory of DVDs to Walmart as part of our new

agreement. The costs for music licenses increased by approximately \$13,400 as an adjustment was made in third quarter of 2010 to adjust estimated music royalties owed related to increasing sales. These increases were partially offset by a \$24,000 decrease in depreciation expense as some of the equipment related to fulfillment has reached the end of their depreciable lives. Additional decreases included a \$20,600 reduction in certain license fees. For the nine months ended September 30, 2010, cost of goods sold decreased \$101,597 or 17% to \$485,173 as compared to \$586,770 for the same period in 2009. The decrease in cost of goods sold is primarily due to decreasing licensing fees due to expiring minimum guaranteed license fees that were not renewed. Additional decreases include a \$37,000 decrease in depreciation as some equipment related to fulfillment have reached the end of their depreciable lives, a \$14,000 decrease in postage and delivery related to the elimination of shipping costs to Walgreens for supplies it now sources directly, and decreased costs associated with fulfillment of direct sales. These cost decreases were partially offset by an increase in royalties owed to ESPN and commissions earned by sales affiliates of approximately \$26,700.

Research and Development. Our research and development expense decreased \$53,833, or 31%, to \$118,830 for the three months ended September 30, 2010, compared to \$172,663 for the same period in 2009. The decrease is primarily due to a decrease in the average employee headcount during this period from year to year. The decrease in employee headcount accounts for a decrease of approximately \$48,000. For the nine months ended September 30, 2010, research and development decreased \$256,387, or 42% to \$357,730 as compared to \$614,117, for the same period in 2009. The decrease in research and development expenses for the nine month period is also primarily due to the decrease in average headcount from 2009 to 2010. The decrease in headcount accounts for approximately \$259,000 of the decrease.

Selling and Marketing. Our selling and marketing expense decreased \$147,746, or 69%, to \$67,538 for the three months ended September 30, 2010 compared to \$215,284 for the same period in 2009. The decrease is primarily due to a decrease in the average employee headcount during these periods from year to year. For the three months ended September 30, 2010, the decrease in employee headcount accounts for approximately \$120,000 of the decrease; and the decrease in the use of outside resources accounts for approximately \$10,000 of the decrease from 2009. Advertising expenses decreased by \$16,000 due to a reduction in direct marketing efforts for ESPN products during 2010. For the nine months ended September 30, 2010, selling and marketing decreased \$506,698, or 67% to \$249,765 compared to \$756,463, for the same period in 2009. For the nine months ended September 30, 2010, the decrease in headcount accounts for approximately \$308,000 of the decrease; and the decrease in the use of external resources accounts for \$97,000 of the decrease in expense. Marketing expenses decreased by approximately \$30,000 due to a reduced presence at the annual PMA trade show, \$26,000 as a result of reduced Internet advertising costs, \$25,000 due to a reduction in general marketing expenses, and \$14,000 as a result of reduced travel related costs.

General and Administrative. Our general and administrative expense decreased \$890,824, or 76%, to \$285,192 for the three months ended September 30, 2010, compared to \$1,176,016 for the same period in 2009. The decrease is primarily due to decreases in stock-based compensation of \$405,000 as this expense for 2009 included approximately \$308,000 of expense for former directors, and \$13,000 in expense for stock granted to employees. A further decrease of \$261,000 in expense resulted from stock and warrants being issued in 2009 for services that were not duplicated in 2010. Other general and administrative expense reductions included reductions of legal and accounting fees by \$65,000 related to better pricing and new service providers; and salaries and related company payroll taxes of \$37,000 plus benefits of \$14,000 related to reduced overall headcount. Our facilities expense decreased by \$39,000 as a result of subleasing office space beginning in December 2009, and our depreciation expense has decreased by approximately \$30,000 as many of our depreciable assets have reached the end of their depreciable lives. Additionally as a result of our decreased headcount, travel related expenses decreased by \$24,000 from 2009 to 2010.

For the nine months ended September 30, 2010, general and administrative expenses decreased \$1,650,610, or 58% to \$1,218,182 compared to \$2,868,792, for the same period in 2009. The decrease is primarily due to a decrease in stock-based compensation of \$633,000, a decrease in consulting and outside services of \$373,000, and a decrease in legal and accounting fees of \$195,000 due to both higher fees in 2009 and reduced services in 2010. The general and administrative headcount was reduced from 2009 to 2010 as well as the overall company headcount from year to year. These reductions reduced the general and administrative salaries and company payroll tax expenses by \$150,000, and benefits by \$69,000. Our facilities expense decreased by \$120,000 as a result of subleasing office space beginning in December 2009, and our depreciation and amortization costs have decreased by approximately \$98,000 as many of our depreciable assets have reached the end of their depreciable lives. As a result of the decreased headcount, travel related costs decreased by \$63,000, and telecommunications costs decreased by \$16,000. The costs associated with being a public company decreased by \$51,000 as a result of reducing external investor relations services and related costs associated with being a public company. All of these decreases were partially offset by settlement costs (see Note 8 above).

Income Tax Expense. For the three and nine months ended September 30, 2010 and 2009, no provisions for income taxes were required.

At September 30, 2010, management has recognized a valuation allowance for the net deferred tax assets related to temporary differences and net operating loss carryforwards. The valuation allowance was recorded because there is significant uncertainty as to the realizability of the deferred tax assets. Based on a number of factors, the currently available, objective evidence indicates that it is more-likely-than-not that the net deferred tax assets will not be realized.

Liquidity and Capital Resources

Statements of Cash Flows	Unaudited Nine Months Ended September 30,	
	2010	2009
Cash Flows from Operating Activities	\$(59,081)	\$(2,167,201)
Cash Flows from Investing Activities	124,737	9,317
Cash Flows from Financing Activities	212,558	1,092,967
Increase (Decrease) in cash and cash equivalents	307,057	(1,064,917)

Operating Activities. For the nine months ended September 30, 2010, net cash used by operating activities was \$59,081 compared to net cash used of \$2,167,201 for the same period in 2009. The change was primarily due to decreased operating expenses for the nine months ended September 30, 2010, primarily the result of decreased headcount and a conscious effort to reduce expenses, and increased revenue in 2010.

Investing Activities. For the nine months ended September 30, 2010, net cash provided by investing activities was \$124,737 compared to \$9,317 for the same period in 2009. The change was due to proceeds received from the sale of property and equipment of \$102,362, and from the sale of marketable securities of \$24,058 in 2010.

Financing Activities. For the nine months ended September 30, 2010, financing activities provided \$212,558 of cash compared to providing \$1,092,967 for the same period in 2009. During the nine months ended September 30, 2010, we received \$300,000 from promissory notes, and we used \$87,442 for principal payments under capital lease obligations. During the nine months ended September 30, 2009, we received \$1,202,627 from the sale of Series A convertible preferred stock and we used \$109,660 for principal payments under capital lease obligations.

We have operated at a loss since inception and are not currently generating sufficient revenues to cover our operating expenses. As of September 30, 2010, we have negative working capital of \$216,212 compared with negative working capital of \$799,334 at December 31, 2009. Based on these factors, among others, the report of our independent registered public accounting firm in our 2009 annual report on Form 10-K includes an explanatory paragraph expressing substantial doubt as to our ability to continue as a going concern. We are continuing to work to obtain new customers and to increase revenues from existing customers. We anticipate that with the funds received in March 2010 and June 2010 under the Walmart agreement, and our expected monthly sales revenue from other sources throughout 2010 we will be able to fund operations throughout 2010. However, we may need to seek additional sources of financing should our monthly sales revenues be insufficient to fund operations at our current levels through 2011.

If new sources of financing are insufficient or unavailable, we will modify our growth and operating plans to the extent of available funding, if any. Any decision to modify our business plans would harm our ability to pursue our aggressive growth plans. If we cease or stop operations, our shares could become valueless. Historically, we have funded operating, administrative and development costs through the sale of equity capital or debt financing. If our plans and/or assumptions change or prove inaccurate, or we are unable to obtain further financing, or such financing and other capital resources, in addition to projected cash flow, if any, prove to be insufficient to fund operations, our continued viability could be at risk. To the extent that any such financing involves the sale of our common stock or common stock equivalents, our current stockholders could be substantially diluted. There is no assurance that we will be successful in achieving any or all of these objectives in 2011.

New Accounting Standards

In January 2010, the FASB issued Accounting Standards Update No. 2010-06 (FASB ASU 10-06), "Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements." This update requires entities to 1) disclose separately the amounts of significant transfers in and out of level 1 and level 2 fair value measurements and describe the reasons for the transfers and 2) present separately (i.e. on a gross basis rather than as a net amount), information about purchases, sales, issuances, and settlements in the roll forward of changes in level 3 fair value measurements. The update requires fair value disclosures by class of assets and liabilities rather than by major category or line item in the statement of financial position. Disclosures regarding the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements for assets and liabilities in both level 2 and level 3 are also required. For all portions of the update except the gross presentation of

activity in the level 3 roll forward, this standard is effective for interim and annual reporting periods beginning after December 15, 2009. For the gross presentation of activity in the level 3 roll forward, this guidance is effective for fiscal years beginning after December 15, 2010. We have provided the additional required disclosures effective January 1, 2010.

In October 2009, the FASB issued Accounting Standards Update No. 2009-13 (FASB ASU 09-13), "Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements (a consensus of the FASB Emerging Issues Task Force)." FASB ASU 09-13 updates the existing multiple-element arrangement guidance currently in FASB Topic 605-25 (Revenue Recognition – Multiple-Element Arrangements). This new guidance eliminates the requirement that all undelivered elements have objective evidence of fair value before a company can recognize the portion of the overall arrangement fee that is attributable to the items that have already been delivered. Further, companies will be required to allocate revenue in arrangements involving multiple deliverables based on the estimated selling price of each deliverable, even though such deliverables are not sold separately by either company itself or other vendors. This new guidance also significantly expands the disclosures required for multiple-element revenue arrangements. The revised guidance will be effective for the first annual period beginning on or after June 15, 2010. We may elect to adopt the provisions prospectively to new or materially modified arrangements beginning on the effective date or retrospectively for all periods presented. We are currently evaluating the impact FASB ASU 09-13 will have on our consolidated financial statements.

In October 2009, the FASB issued Accounting Standards Update No. 2009-14 (FASB ASU 09-14), “Certain Revenue Arrangements That Include Software Elements—a consensus of the FASB Emerging Issues Task Force,” that reduces the types of transactions that fall within the current scope of software revenue recognition guidance. Existing software revenue recognition guidance requires that its provisions be applied to an entire arrangement when the sale of any products or services containing or utilizing software when the software is considered more than incidental to the product or service. As a result of the amendments included in FASB ASU No. 2009-14, many tangible products and services that rely on software will be accounted for under the multiple-element arrangements revenue recognition guidance rather than under the software revenue recognition guidance. Under this new guidance, the following components would be excluded from the scope of software revenue recognition guidance: the tangible element of the product, software products bundled with tangible products where the software components and non-software components function together to deliver the product’s essential functionality, and undelivered components that relate to software that is essential to the tangible product’s functionality. FASB ASU 09-14 also provides guidance on how to allocate transaction consideration when an arrangement contains both deliverables within the scope of software revenue guidance (software deliverables) and deliverables not within the scope of that guidance (non-software deliverables). This guidance will be effective for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010. We may elect to adopt the provisions prospectively to new or materially modified arrangements beginning on the effective date or retrospectively for all periods presented. However, we must elect the same transition method for this guidance as that chosen for FASB ASU No. 2009-13. We are currently evaluating the impact FASB ASU 09-14 will have on our consolidated financial statements.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital resources that is material to investors.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Not applicable.

ITEM 4. CONTROLS AND PROCEDURES

Disclosure Controls and Procedures

We maintain disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act of 1934 (the "Exchange Act")) designed to provide reasonable assurance that the information required to be disclosed in our reports under the Exchange Act is processed, recorded, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including our Principal Executive Officer and Principal Financial and Accounting Officer, as appropriate, to allow for timely decisions regarding required disclosure. In designing and evaluating the disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

As required by SEC Rule 13a-15(b), we carried out an evaluation, under the supervision and with the participation of our management, including our Principal Executive Officer and Principal Financial and Accounting Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of the end of the period covered by this Quarterly Report. Based on this evaluation, Chett P. Paulsen, our Principal Executive Officer, and Edward B. Paulsen, our Principal Financial and Accounting Officer, concluded that these disclosure controls and procedures were effective at the reasonable assurance level as of September 30, 2010.

Changes in Internal Control Over Financial Reporting

There have been no changes in our internal control over financial reporting identified in connection with the evaluation required by Rule 13a-15(d) or Rule 15d-15(d) under the Exchange Act that occurred during the quarter ended September 30, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II-OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

We are not aware of any material pending or threatened legal proceedings as of the filing date of this report. The Company entered into a settlement agreement in August 2010 to resolve a legal proceeding as previously disclosed on the Company's Form 8-K filed September 2, 2010.

ITEM 1A. RISK FACTORS
