NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

1. Business

Tompkins Trustco, Inc. ("Tompkins" or the "Company"), is the corporate parent to three community bank subsidiaries, Tompkins Trust Company ("Trust Company"), The

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

Bank of Castile and The Mahopac National Bank, which together operate 35 banking offices in New York State, and to one insurance agency subsidiary, Tompkins Insurance Agencies, Inc. ("Tompkins Insurance"). Unless the context otherwise requires, the term "Company" refers collectively to Tompkins Trustco, Inc. and its subsidiaries.

Headquartered in Ithaca, New York, Tompkins is registered as a Financial Holding Company with the Federal Reserve Board under the Bank Holding Company Act of 1956, as amended. Tompkins was organized in 1995, under the laws of the State of New York, as a bank holding company for the Trust Company, a commercial bank that has operated in Ithaca and surrounding communities since 1836. Through its community banking subsidiaries, the Company provides traditional banking and related financial services. Tompkins offers trust and investment services through Tompkins Investment Services, a division of the Trust Company. The Company also offers insurance services through Tompkins Insurance, an independent insurance agency with a history of over 100 years of service to individual and business clients throughout Western New York. At year-end 2004, Tompkins Insurance expanded its geographic presence through its acquisition of Banfield & Associates, Inc., an insurance agency in Ithaca, New York. Each Tompkins subsidiary operates with a community focus, meeting the needs of the unique communities served.

2. Basis of Presentation

The unaudited condensed consolidated financial statements included in this quarterly report have been prepared in accordance with accounting principles generally accepted in the United States of America. In the application of certain accounting policies management is required to make assumptions regarding the effect of matters that are inherently uncertain. These estimates and assumptions affect the reported amounts of certain assets, liabilities, revenues, and expenses in the unaudited condensed consolidated financial statements. Different amounts could be reported under different conditions, or if different assumptions were used in the application of these accounting policies. The accounting policy management considers critical in this respect is the determination of the reserve for loan/lease losses.

In management's opinion, the unaudited condensed consolidated financial statements reflect all adjustments of a normal recurring nature. The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the full fiscal year ending December 31, 2005. The unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and the notes thereto in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2004. The consolidated financial information included herein combines the results of operations, the assets, liabilities, and shareholders' equity of the Company and its subsidiaries. Amounts in the prior period's consolidated financial statements are reclassified when necessary to conform to the current period's presentation. All significant intercompany balances and transactions are eliminated in consolidation. Share and per share data have been retroactively adjusted to reflect a 10% stock dividend paid on February 15, 2005.

The Company applies Accounting Principles Board Opinion (APB Opinion) No. 25, "Accounting for Stock Issued to Employees," and related interpretations in accounting for its stock option plan. Accordingly, compensation expense is recognized only if the exercise price of the option is less than the fair value of the underlying stock at the grant date. Since the Company grants options with the exercise price equal to the fair value of the underlying stock at the grant date, there is no compensation expense recorded in net income. Statement of Financial Accounting Standards (SFAS) No. 123, "Accounting for Stock-Based Compensation," requires companies not using a fair value based method of

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

accounting for stock options to provide pro forma disclosure of net income and earnings per share as if the fair value method of accounting had been applied. Had the Company determined compensation cost based on the fair value of its stock options at the grant date under SFAS No. 123, the Company's net income and earnings per share would have been reduced to pro forma amounts indicated in the following table.

7

(in thousands except per share data)	Three months ended		Nine
	09/30/2005	09/30/2004	09/30/2004
<hr/>			
Net Income:			
As reported	\$ 7,110	\$ 6,784	\$ 20,4
Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of all related tax effects	211	217	6
<hr/>			
Pro forma	\$ 6,899	\$ 6,567	\$ 19,8
<hr/>			
Basic earnings per share:			
As reported	\$ 0.79	\$ 0.76	\$ 2.
<hr/>			
Pro forma	0.77	0.74	2.
<hr/>			
Diluted earnings per share:			
As reported	\$ 0.78	\$ 0.75	\$ 2.
<hr/>			
Pro forma	0.76	0.73	2.
<hr/>			

No stock options were granted in the first nine months of 2005. The per share weighted average fair value of the 199,000 stock options granted during the first nine months of 2004 was \$15.00. Fair values were arrived at using the Black Scholes option-pricing model with the following assumptions:

	2004
Risk-free interest rate	3.82%
Expected dividend yield	2.70%
Volatility	39.76%
Expected life (years)	5.00
<hr/>	

In December 2004, The FASB issued SFAS No. 123R, "Share-Based Payment." This Statement is a revision of SFAS No. 123, "Accounting for Stock-Based Compensation" and supersedes Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" and its related implementation guidance. SFAS No. 123R eliminates the ability to account for stock-based compensation using APB No. 25 and requires a public entity to measure the cost of employee services received in exchange for an award of equity instruments

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

based on the grant-date fair value of the award. The cost will be recognized over the period during which an employee is required to provide service in exchange for the award. The grant-date fair value of employee stock options and similar instruments will be estimated using option-pricing models adjusted for the unique characteristics of those instruments (unless observable market prices for the same or similar instruments are available). For equity awards that are modified after the grant date, incremental compensation cost will be recognized in an amount equal to the excess of the fair value of the modified award over the fair value of the original award immediately before the modification. In the future, the notes to consolidated financial statements will include information to assist users of financial information to understand the nature of share-based payment transactions and the effects of those transactions on the financial statements. On April 14, 2005, the Securities and Exchange Commission amended the date for compliance with SFAS No. 123R to the first interim or annual reporting period of the first fiscal year beginning on or after June 15, 2005. SFAS No. 123R is therefore effective for the Company beginning January 1, 2006. The Company's method of adoption has not yet been determined.

8

3. Earnings Per Share

The Company follows the provisions of SFAS No. 128, "Earnings per Share" ("EPS"). A computation of Basic EPS and Diluted EPS for the three-month and nine-month periods ending September 30, 2005 and 2004 is presented in the table below.

Three months ended September 30, 2005 (In thousands except share and per share data)	Net Income (Numerator)	Weighted Average Shares (Denominator)
Basic EPS		
Income available to common shareholders	\$ 7,110	8,956,84
Effect of dilutive securities (Stock options)		134,80
Diluted EPS		
Income available to common shareholders plus assumed conversions	\$ 7,110	9,091,65

Three months ended September 30, 2004 (In thousands except share and per share data)	Net Income (Numerator)	Weighted Average Shares (Denominator)
Basic EPS		
Income available to common shareholders	\$ 6,784	8,933,02
Effect of dilutive securities (Stock options)		132,78
Diluted EPS		
Income available to common shareholders plus assumed conversions	\$ 6,784	9,065,81

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

The effect of dilutive securities calculation for the three-month period ended September 30, 2004 excludes stock options of 218,049 because the exercise price of the options was greater than the average market value of the Company's common stock during the period.

Nine months ended September 30, 2005 (In thousands except share and per share data)	Net Income (Numerator)	Weighted Average Share (Denominator)
Basic EPS		
Income available to common shareholders	\$ 20,471	8,953,77
Effect of dilutive securities (Stock options)		134,51
Diluted EPS		
Income available to common shareholders plus assumed conversions	\$ 20,471	9,088,28

9

3. Earnings Per Share (continued)

Nine months ended September 30, 2004 (In thousands except share and per share data)	Net Income (Numerator)	Weighted Average Share (Denominator)
Basic EPS		
Income available to common shareholders	\$ 19,035	8,962,95
Effect of dilutive securities (Stock options)		143,51
Diluted EPS		
Income available to common shareholders plus assumed conversions	\$ 19,035	9,106,47

The effect of dilutive securities calculation for the nine-month period ended September 30, 2004 excludes stock options of 123,206 because the exercise price of the options was greater than the average market value of the Company's common stock during the period.

* Share and per share data have been retroactively adjusted to reflect a 10% stock dividend paid on February 15, 2005.

Net periodic benefit cost	\$	846	\$	879	\$	493	\$	4
---------------------------	----	-----	----	-----	----	-----	----	---

The Company previously disclosed in its financial statements for the year ended December 31, 2004, included in its 2004 Annual Report on Form 10-K, that although it was not required to contribute to the pension plan in fiscal 2005, it may voluntarily contribute to the pension plan in fiscal 2005. There was no contribution to the pension plan through the first nine months of 2005. Subsequent to September 30, 2005, the Company contributed \$500,000 to the pension plan.

In December 2003, The Medicare Prescription Drug, Improvement and Modernization Act of 2003 ("Medicare Act") was signed into law. The Medicare Act introduced both a Medicare prescription-drug benefit and a federal subsidy to sponsors of retiree healthcare plans that provide a benefit at least "actuarially equivalent" to the Medicare benefit. These provisions of the Medicare Act will affect accounting measurements under SFAS No. 106.

In May 2004, the Financial Accounting Standards Board (FASB) issued Staff Position (FSP) No. FAS 106-2, "Accounting and Disclosure Requirements Related to the Medicare Prescription Drug, Improvement and Modernization Act of 2003", which supersedes FSP FAS 106-1 of the same title. The FSP clarifies the accounting for the benefits attributable to new government subsidies for companies that provide prescription drug benefits to retirees. The new accounting requirements became effective at the beginning of the third calendar quarter of 2004. In accordance with FSP FAS 106-1, the Company elected to defer accounting for the economic effects of the new Medicare Act, pending specific authoritative guidance on the accounting for the federal subsidy. The Company has reviewed the requirements of the Medicare Act relative to its post-retirement plan and has determined that the effects will not be material to the Company's financial condition or results of operations.

Effective October 1, 2005, the Company amended its benefit plan related to post-retirement medical coverage. The change includes a modification of the benefits available for active employees below the age of 55, and employees above the age of 55, with less than ten years of service. The modification includes the establishment of HRA accounts for the affected employees, which in effect, caps the Company's liability. Employees hired after December 31, 2004 do not participate in the Company's post-retirement benefit plan. It is expected that the modification to the plan will result in an annual savings of approximately \$250,000.

6. Financial Guarantees

FASB Interpretation No. 45 (FIN No. 45), Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others; an Interpretation of FASB Statements No. 5, 57, and 107 and rescission of FASB Interpretation No. 34 requires certain disclosures and potential liability recognition for the fair value at issuance of guarantees that fall within its scope. Based upon management's interpretation of FIN No. 45, the Company currently does not issue any guarantees that would require liability recognition under FIN No. 45, other than standby letters of credit. The Company extends standby letters of credit to its customers in the normal course of business. The standby letters of credit are generally short-term. As of September 30, 2005, the Company's maximum potential obligation under standby letters of credit was \$24.9 million. Management uses the same credit policies to extend standby letters of credit that it uses for on-balance sheet lending decisions and may require collateral to support standby letters of credit based upon its evaluation of the counterparty. Management does not anticipate losses as a result of these transactions.

7. Recent Accounting Standards

FASB Staff Position No. FAS 115-1 and FAS 124-1, "The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments" (the "FSP"), was issued on November 3, 2005 and addresses the determination of when an investment is considered impaired; whether the impairment is other than temporary; and how to measure an impairment loss. The FSP also addresses accounting considerations subsequent to the recognition of an other-than-temporary impairment on a debt security, and requires certain disclosures about unrealized losses that have not been recognized as other-than-temporary impairments. The FSP replaces the impairment guidance in EITF Issue No. 03-1 with references to existing authoritative literature concerning other-than-temporary determinations (principally Statement of Financial Accounting Standards No. 115 and SEC Staff Accounting Bulletin 59). Under the FSP, impairment losses must be recognized in earnings equal to the entire difference between the security's cost and its fair value at the financial statement date, without considering partial recoveries subsequent to that date. The FSP also requires that an investor recognize an other-than-temporary impairment loss when a decision to sell a security has been made and the investor does not expect the fair value of the security to fully recover prior to the expected time of sale. The FSP is effective for reporting periods beginning after December 15, 2005. The Company does not expect that the application of the FSP will have a material impact on its financial condition, results of operations or financial statement disclosures.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

BUSINESS

Tompkins Trustco, Inc. is a registered financial holding company ("Tompkins" or "the Company") incorporated in 1995 under the laws of the State of New York and its common stock is listed on the American Stock Exchange (Symbol: TMP). Tompkins is headquartered at The Commons, Ithaca, New York.

Tompkins's primary business is the operation of its three community banking subsidiaries, Tompkins Trust Company ("Trust Company"), The Bank of Castile and The Mahopac National Bank, and its insurance agency subsidiary, Tompkins Insurance Agencies, Inc. ("Tompkins Insurance"). Tompkins does not engage in any other substantial business activities. Unless the context otherwise requires, the term "Company" refers collectively to Tompkins Trustco, Inc. and its subsidiaries.

Through its community bank subsidiaries, the Company provides traditional banking and related financial services, which constitute the Company's only reportable business segment. Banking services consist primarily of attracting deposits from the areas served by the community bank subsidiaries' 35 banking offices and using those deposits to originate a variety of commercial loans, consumer loans, real estate loans (including commercial loans collateralized by real estate), and leases, and providing trust and investment related services. The Company's principal expenses are interest on deposits, interest on borrowings, and operating and general administrative expenses, as well as provisions for loan/lease losses. Funding sources, other than deposits, include borrowings, securities sold under agreements to repurchase, and cash flow from lending and investing activities. The Company provides trust and investment services through Tompkins Investment Services, including investment management

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

accounts, custody accounts, trusts, retirement plans and rollovers, estate settlement, and financial planning. Tompkins Insurance primarily provides services consisting of property and casualty insurance for individuals and businesses, which complement the services offered through the Company's community bank subsidiaries.

Tompkins Insurance has eight offices located in a geographic area that closely matches the footprint of The Bank of Castile. At year-end 2004, Tompkins Insurance expanded its geographic presence into the Ithaca, New York market with the acquisition of Banfield and Associates, Inc., an insurance agency in Ithaca, New York.

The Company completed construction of Tompkins Financial Center in Batavia, New York in the first quarter of 2005. The building houses the management of The Bank of Castile and Tompkins Insurance. Additionally, representatives of Tompkins Investment Services, a division of Tompkins Trust Company, have office space available to them at this facility.

12

The banking industry is highly competitive, as deregulation has opened the industry to nontraditional commercial banking companies. Competition for commercial banking and other financial services is strong in the Company's market area. Competition includes other commercial banks, savings and loan associations, credit unions, finance companies, mutual funds, insurance companies, brokerage and investment companies, and other financial intermediaries. The Company differentiates itself from its competitors through its full complement of banking and related financial services, and through its community commitment and involvement in its primary market areas, as well as its commitment to quality and personalized banking services. The banking industry is also highly regulated. As a financial holding company of three community banks, the Company is subject to examination and regulation from the Federal Reserve Board, the Federal Deposit Insurance Corporation, the Office of the Comptroller of Currency, and the New York State Banking Department.

Other external factors affecting the Company's operating results are market rates of interest, the condition of financial markets, and both national and regional economic conditions. The Company's community bank subsidiaries operate, in the aggregate, 35 banking offices, including one limited-service office, serving communities in many upstate New York markets. Economic climates in these markets vary by region. The Western New York market served by The Bank of Castile has been the most challenging in recent years, due to cutbacks and layoffs by some major employers in Rochester, New York. Conditions in this market appear to have improved recently. The economic climates in the Central New York markets served by Tompkins Trust Company and the lower Hudson Valley markets served by Mahopac National Bank remain favorable.

The following discussion is intended to provide the reader with a further understanding of the consolidated financial condition and results of operations of Tompkins for the third quarter ended September 30, 2005. It should be read in conjunction with the Company's audited consolidated financial statements and the notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2004, and the unaudited condensed consolidated financial statements and notes included elsewhere in this Quarterly Report on Form 10-Q.

Forward-Looking Statements

The Company is making this statement in order to satisfy the "Safe Harbor" provision contained in the Private Securities Litigation Reform Act of 1995. Statements contained in this Quarterly Report on Form 10-Q that are not

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

statements of historical fact may include forward-looking statements that involve a number of risks and uncertainties. Such forward-looking statements are made based on management's expectations and beliefs concerning future events impacting the Company and are subject to certain uncertainties and factors relating to the Company's operations and economic environment, all of which are difficult to predict and many of which are beyond the control of the Company, that could cause actual results of the Company to differ materially from those expressed and/or implied by such forward-looking statements. The following factors are among those that could cause actual results to differ materially from the forward-looking statements: changes in general economic, market and regulatory conditions; the development of an interest rate environment that may adversely affect the Company's interest rate spread, other income or cash flow anticipated from the Company's operations, investment and/or lending activities; changes in laws and regulations affecting banks, insurance companies, bank holding companies and/or financial holding companies; technological developments and changes; the ability to continue to introduce competitive new products and services on a timely, cost-effective basis; governmental and public policy changes, including environmental regulation; protection and validity of intellectual property rights; reliance on large customers; and financial resources in the amounts, at the times and on the terms required to support the Company's future businesses. In addition, such forward-looking statements could be affected by general industry and market conditions and growth rates, general economic and political conditions, including interest rate and currency exchange rate fluctuations, and other factors.

Critical Accounting Policy

In the course of the Company's normal business activity, management must select and apply many accounting policies and methodologies that lead to the financial results presented in the consolidated financial statements of the Company. Some of these policies are more critical than others. Management considers the accounting policy relating to the reserve for loan/lease losses (the "reserve") to be a critical accounting policy because of the uncertainty and subjectivity inherent in estimating the levels of reserve needed to cover probable credit losses within the Company's loan portfolio and the material effect that these estimates can have on the Company's results of operations.

The Company has developed a methodology to measure the amount of estimated loan loss exposure inherent in the loan portfolio to ensure that an adequate reserve is maintained. The methodology includes an estimate of exposure for the following: specifically reviewed and graded loans, historical loss experience by product type, past due and nonperforming loans, and other internal and external factors such as local and regional economic conditions, growth trends, and credit policy

13

and underwriting standards. The methodology includes a review of loans considered impaired in accordance with the Statement of Financial Accounting Standards (SFAS) No. 114, "Accounting by Creditors for Impairment of a Loan", as well as other commercial loans and commercial mortgage loans that are evaluated using an internal rating system. An estimated exposure amount is assigned to these internally reviewed credits based upon a review of the borrower's financial condition, payment history, collateral adequacy, and business conditions. For commercial loans and commercial mortgage loans not specifically reviewed, and for more homogenous loan portfolios such as residential mortgage loans and consumer loans, estimated exposure amounts are assigned based upon historical loss experience as well as past due status. Lastly, an additional reserve is maintained based upon management's judgment and assessment of other quantitative and qualitative factors such as regional and local economic

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

conditions and portfolio growth trends.

Since the methodology is based upon historical experience and trends as well as management's judgment, factors may arise that result in different estimations. Significant factors that could give rise to changes in these estimates may include, but are not limited to, changes in economic conditions in the local area, concentration of risk, and declines in local property values. While management's evaluation of the reserve for loan/lease losses as of September 30, 2005, considers the reserve to be adequate, deterioration in credit quality, worsening loss factors, and other assumption changes could result in the need to increase the reserve.

All accounting policies are important and the reader of the Company's financial statements should review these policies, described in Note 1 to the notes to consolidated financial statements to the Company's audited consolidated financial statements contained in the Company's Annual Report on Form 10-K for the year ended December 31, 2004, and in Note 1 to the notes to the Company's unaudited condensed consolidated financial statements in this Quarterly Report on Form 10-Q, to gain a greater understanding of how the Company's financial performance is reported.

OVERVIEW

For the third quarter ended September 30, 2005, net income was \$7.1 million, an increase of 4.8% compared to net income of \$6.8 million for the same period in 2004. Diluted earnings per share were \$0.78 for the third quarter of 2005, compared to \$0.75 for the same period in 2004. For the nine months ended September 30, 2005, net income was up 7.5% to \$20.5 million compared to \$19.0 million for the nine months ended September 30, 2004. Diluted earnings per share were \$2.25 for the first nine months of 2005 compared to \$2.09 for the same period in 2004. The increase in net income for the third quarter and year-to-date 2005 is a result of increases in net interest income and noninterest income, and lower provisions for loan and lease losses. Net interest income increased as a result of an improved net interest margin, growth in average interest-earning assets (primarily loans) and growth in noninterest-bearing deposits. The primary driver of noninterest income growth was a strong increase in insurance commissions and fees, which was due in part to the year-end 2004 acquisition of Banfield & Associates, Inc., an insurance agency in Ithaca, New York. The Company's strategies include a commitment to community banking and a diversification of revenue sources, by offering a strong suite of products and services, including trust and investment services, insurance sales, card services, and other banking and related financial services, in addition to the interest and fees generated from loans and securities.

Key performance measurements for the Company include return on average assets and return on average shareholders' equity. Return on average assets for the third quarter ended September 30, 2005, was 1.38%, unchanged from the same period in 2004. Return on average shareholders' equity for the third quarter of 2005 was 15.95%, compared to 16.76% for the same period in 2004. Return on average assets for the nine months ended September 30, 2005, was 1.35%, compared to 1.32% for the same period in 2004. Return on average shareholders' equity for the nine months ended September 30, 2005 was 15.76%, compared to 15.77% for the same period in 2004. An improved net interest margin and growth in higher yielding earning assets contributed to the increased return on average assets.

The current interest rate environment of rising short-term rates and narrow spreads between short-term rates and long-term rates is a challenge to the Company's operating performance. The low interest rate environment over the past two years resulted in a decline in the Company's asset yields and cost of funds. As rates move upwards, the Company's funding sources, including deposits, are expected to reprice faster than its asset base, which could put pressure on the net interest margin over the short term.

Asset quality as of September 30, 2005, showed improvement when compared to the same period last year, with nonperforming assets decreasing to \$4.4 million at September 30, 2005, from \$8.1 million at September 30, 2004. The ratio of nonperforming assets to total assets improved from 0.41% at September 30, 2004, to 0.21% at September 30, 2005. Contributing to the decrease in nonperforming assets was the return to accruing status of a large commercial relationship as a result of a strengthened financial position. Net charge-offs in the third quarter and year-to-date 2005 were \$264,000, and \$996,000, respectively, compared to \$674,000 and \$1.8 million in the same periods in 2004. With the improvement in asset quality, the provision for loan and lease losses decreased to \$662,000 in the third quarter of 2005, from \$749,000 in the same period in 2004. For the year-to-date period, the provision for loan and leases losses decreased from \$2.3 million in 2004 to \$1.8 million in 2005.

Net Interest Income

The Average Consolidated Balance Sheet and Net Interest Analysis included at the end of Part I of this Quarterly Report on Form 10-Q illustrates the trend in average interest-earning assets and interest-bearing liabilities, and the corresponding yield or cost associated with each. The Company earned taxable-equivalent net interest income of \$19.8 million for the three months ended September 30, 2005, an increase of 6.1% over the same period in 2004. For the nine months ended September 30, 2005, the Company earned taxable-equivalent net interest income of \$58.4 million, an increase of 6.3% over \$55.0 million for the first nine months of 2004. Quarter-to-date and year-to-date increases in taxable-equivalent net interest income as compared to the same periods in 2004 are mainly a result of growth in average interest-earning assets (primarily loans) higher yields on loans, and growth in deposits, including noninterest-bearing deposits. Average interest-earning assets increased 4.4% and 5.0% for the three- and nine-month periods ended September 30, 2005, respectively, as compared to the same periods in 2004. Average noninterest bearing deposits increased 6.9% and 9.8% for the three- and nine-month periods ended September 30, 2005, respectively, as compared to the same periods in 2004.

Taxable-equivalent interest income was up 14.5% for the third quarter and 11.8% for the year-to-date over the comparable periods in 2004. The increase in taxable-equivalent interest income was mainly driven by the lending portfolio, which reflects higher yields and higher average volumes. Loan growth was concentrated in the commercial real estate, commercial and industrial, and residential real estate portfolios. Loan yields on commercial and industrial loans, and commercial real estate loans benefited from increases in benchmark market interest rates. Home equity loan yields were also higher as initial introductory rates repriced to fully indexed rates. The average yield on interest-bearing assets increased 51 basis points to 5.84% for the three months ended September 30, 2005, and 35 basis points to 5.73% for the nine months ended September 30, 2005, from the same periods in 2004.

Increases in taxable-equivalent interest income were partially offset by an increase in interest expense driven by the increase in short-term market interest rates. The average cost of interest-bearing liabilities increased 59 basis points to 2.17% for the three months ended September 30, 2005, and 40 basis points to 1.98% for the nine months ended September 30, 2005, from the same periods in 2004.

The net interest margin increased from 4.06% in the third quarter of 2004 to 4.12% in the third quarter of 2005. The net interest margin for the nine months ended September 30, 2005, was 4.15%, up from 4.10% for the same period in 2004. The net interest margin for the quarter and year-to-date period benefited from

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

the growth in loans, higher loan yields and the increase in noninterest-bearing liabilities. The spread between interest-earning assets and interest-bearing liabilities narrowed for both the quarter and year-to-date for 2005, compared to the same periods in 2004. The benefit of the growth in noninterest bearing deposits offset the narrower spread resulting in the higher net interest margin.

Average commercial real estate and commercial loans increased \$55.7 million and \$26.8 million, respectively, for the three months ended September 30, 2005 from the same period last year. Average balances for commercial real estate loans and commercial loans increased by \$56.5 million and \$21.7 million, respectively, for the nine months ended September 30, 2005 from the same period last year. Management continues to emphasize commercial services, as these commercial loan products are typically attractive to the Company from a yield and interest rate risk management perspective. Average residential real estate loans increased by \$41.9 million and \$36.6 million, respectively, for the three and nine month periods ended September 30, 2005, from the same periods in 2004.

Core deposits (total deposits, less brokered deposits, municipal money market deposits, and time deposits of \$100,000 or more) supported the growth in average assets in the three and nine month periods ended September 30, 2005, compared to the same periods in 2004. Average core deposits for the three and nine month periods ended September 30, 2005, increased by \$54.2 million and \$57.3 million, respectively, from the same periods last year. Core deposits represent the Company's largest and lowest cost funding source, with average core deposits representing 65.9% of average liabilities for the first nine months of 2005. This compares to 65.8% for the same period in 2004.

15

Non-core funding sources, which include time deposits of \$100,000 or more, brokered deposits, municipal money market deposits, Federal funds purchased, securities sold under agreements to repurchase (repurchase agreements), and other borrowings provide additional funding to support asset growth. Average balances on these non-core funding sources increased by \$19.7 million and \$22.8 million, respectively, in the three and nine months ended September 30, 2005, from the same periods in 2004. Time deposits over \$100,000 accounted for the majority of the growth in non-core funding sources over the periods, and represented the largest component of non-core funding sources at September 30, 2005, with a three and nine-month average balance of \$211.6 million and \$205.5 million, respectively.

Provision for Loan/Lease Losses

The provision for loan/lease losses represents management's estimate of the expense necessary to maintain the reserve for loan/lease losses at an adequate level. Management has developed a model to measure the amount of estimated loan loss exposure inherent in the loan portfolio to ensure that an adequate reserve is maintained. The provision for loan and lease losses for the third quarter and year-to-date period ended September 30, 2005, was lower than the provision for the same periods in 2004. The provision for loan and lease losses was \$1.8 million for the first nine months of 2005, down from \$2.3 million for the same period in 2004. The decrease in the provision for loan and lease losses in 2005 was a result of improved asset quality as evidenced by lower net charge-offs and a decrease in the dollar volume of nonperforming loans. Net charge-offs were \$996,000 for the first nine months of 2005, compared to \$1.8 million for the same period in 2004. In 2004, economic weakness in the Company's Western New York markets contributed to higher net charge-offs and provision for loan and lease losses. The impact of the recent positive trends in asset quality on the reserve for loan/lease losses, was offset by continued growth in the loan portfolio. The reserve for loan/lease losses as a percentage of period end loans was 1.07% at September 30, 2005, unchanged from that at December 31, 2004.

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

Noninterest Income

Although net interest income is the Company's primary revenue source, competitive, regulatory and economic conditions have led management to target noninterest income sources as important drivers of long-term revenue growth. Noninterest income for the three months ended September 30, 2005, was \$7.7 million, an increase of 5.6% over the same period in 2004. Noninterest income for the nine months ended September 30, 2005, was \$22.1 million, an increase of 5.4% over the same period in 2004. The growth in noninterest income for both the quarter and year-to-date periods in 2005 over the comparable periods in 2004 is mainly a result of strong growth in insurance commissions and fees, service charges on deposit accounts, and a gain on the sale of real estate. The real estate sale related to the relocation of The Bank of Castile's Warsaw, New York office to a newly renovated facility.

Trust and investment services income was \$1.2 million in the third quarter of 2005, a decrease of 2.5% from the same period in 2004. For the first nine months of 2005, trust and investment services income of \$3.9 million was flat compared with the same period in 2004. With fees largely based on the market value and mix of assets managed, the general direction of the stock market can have a considerable impact on fee income. The market value of assets managed by, or in custody of, Tompkins Investment Services was \$1.5 billion at September 30, 2005, up 5.3% from \$1.4 billion at September 30, 2004. These figures include \$423.3 million and \$412.8 million, respectively, of Company-owned securities where Tompkins Investment Services is custodian. Tompkins Investment Services generates fee income through managing trust and investment relationships, managing estates, providing custody services, and managing investments in employee benefits plans. Services are primarily provided to customers in the Trust Company's market area of Tompkins County; however, Tompkins Investment Services representatives also serve clients in The Bank of Castile and Mahopac National Bank markets. Trends for new business in trust and investments services remain positive. The number of accounts increased by 6.4% between September 30, 2005, and September 30, 2004.

Service charges on deposit accounts increased 7.7% to \$2.2 million in the third quarter of 2005 from \$2.1 million in the third quarter of 2004. For the nine months ended September 30, 2005, service charge on deposit accounts were \$6.1 million, a 4.6% increase over the same period in 2004. The largest component of this category is overdraft fees, which is largely dependent on customer behavior. A key factor affecting overdraft income is check volume, which has been trending downward as a result of increasing trends in electronic transactions. Increased fees in the third quarter of 2005 over the comparable period of 2004 benefited from an increase in the per item charge for overdrafts, and an increase in deposit accounts.

Insurance commissions and fees were \$2.0 million in the third quarter of 2005, an increase of 19.1% over the third quarter of 2004. For the first nine months of 2005, insurance commissions and fees were \$5.8 million, up 18.9% from \$4.9 million for the same period in 2004. The Banfield & Associates, Inc., insurance agency acquisition at year-end 2004 accounted for

16

approximately 59.0% and 59.6% of the revenue growth for the third quarter of 2005 and year-to-date 2005, respectively over the comparable periods in 2004. Also contributing to the revenue growth over prior year was continued efforts by Tompkins Insurance to offer services to bank customers, and by sharing certain offices with The Bank of Castile.

Card services income increased by 2.6% or \$17,000, to \$663,000 for the third quarter of 2005 over the same quarter in 2004. Card services income of \$1.9 million for the nine months ended September 30, 2005 was up 5.2% from \$1.8

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

million for the nine months ended September 30, 2004. The increase in income over prior year was concentrated in debit card income and reflects an increased number of cardholders, higher transaction volume and fee increases. Debit card income totaled \$454,000 for the three months ended September 30, 2005, compared to \$400,000 for the same period in 2004, and \$1.3 million for the nine months ended September 30, 2005, compared to \$1.1 million for the same period in 2004. Card services products include traditional credit cards, purchasing cards, debit cards, and automated teller machines. Card services continues to build revenues as technology has created opportunities to offer customers new products. This is a highly competitive business with many large national competitors.

Other services charges were down 2.5% in the third quarter of 2005 to \$793,000 from \$813,000 in the same period of 2004. For the year ended September 30, 2005, other service charges were down 8.5% to \$2.2 million from \$2.5 million in the same period of 2004. The decrease in the quarter-to-date period and year-to-date period ended September 30, 2005, from the same periods prior year, was largely due to lower income from merchant card processing. A decrease in loan related fees also contributed to the decrease in the year-to-date period.

Noninterest income for the third quarter of 2005 includes \$270,000 of income relating to increases in the cash surrender value of corporate owned life insurance (COLI). This compares to \$225,000 for the same period in 2004. The increase in the third quarter 2005 was partially due to additional investments in COLI in the second quarter 2005. For the year-to-date period COLI related income was \$786,000, down 2.6% from the same period in 2004. The COLI relates to life insurance policies covering certain executive officers of the Company. The Company's average investment in COLI was \$25.4 million for the nine-month period ended September 30, 2005, compared to \$23.2 million for the same period in 2004. Although income associated with the insurance policies is not included in interest income, increases in the cash surrender value produced a tax-equivalent return of 6.90% for the first nine months of 2005, compared to 7.42% for the same period in 2004.

Net gains on loan sales were \$47,000 in the third quarter of 2005, compared with a gain of \$66,000 during the same period last year. Year-to-date 2005 gains of \$168,000 are \$17,000 or 9.2% below year-to-date 2004. Current residential mortgage loan origination is predominately purchase volume and the majority of loans are being originated as portfolio loans since they meet the parameters for portfolio loans as established by the Company's Asset/Liability Management Committee.

Other income for the third quarter of 2005 was down \$72,000 over the same period in 2004. Other income increased from \$939,000 for the first nine months of 2004 to \$1.1 million for the same period in 2005. This increase in year-to-date 2005 over the same period in 2004 was largely driven by a \$207,000 gain on sale of real estate related to the relocation of The Bank of Castile's Warsaw Office to a newly renovated building and the sale of the former office building.

Noninterest Expenses

Total noninterest expenses for the third quarter of 2005 were \$15.6 million, up 8.5% over the prior year's third quarter. For the first nine months of 2005, noninterest expenses were \$46.2 million, an increase of 6.8% over noninterest expenses of \$43.2 million for the same period in 2004. Factors contributing to the expense growth in the current year include: the January 2005 acquisition of Banfield and Associates, Inc. (an Ithaca-based insurance agency), the March 2005 opening of the Tompkins Financial Center in Batavia, NY, and the first full year of expense associated with the Mt. Kisco Office of Mahopac National Bank, which opened in July 2004.

Personnel-related expenses comprise the largest segment of noninterest expense, representing 58.2% of noninterest expense for the first nine months of 2005 compared to 58.5% of noninterest expense for the first nine months of 2004. The

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

7.9% quarterly and 6.1% year-to-date increase in personnel-related expenses in 2005 as compared to the same periods in 2004, was primarily a result of higher salaries and wages related to an increase in average full time equivalents (FTEs) as well as annual salary adjustments. The increase in average FTEs is primarily a result of staffing requirements at the Company's newer offices, including the Banfield Agency acquisition by Tompkins Insurance in late 2004. Healthcare costs and other postretirement benefits were also up over the third quarter and year-to-date periods in 2004.

Expenses related to bank premises and furniture and fixtures totaled \$1.9 million in the third quarter of 2005, an increase of 7.9% over the third quarter of 2004. Expenses related to bank premises and furniture and fixtures totaled \$5.7 million for the

17

first nine months of 2005, an increase of 8.0% over the same period last year. Recent additions to the Company's branch network, including the Mount Kisco office of Mahopac National Bank, which opened in July 2004, and the opening of the Tompkins Financial Center in Batavia, New York, in early 2005, as well as higher real estate taxes, insurance and utility costs contributed to the increased expenses for bank premises and furniture and fixtures for the quarter and year-over-year periods.

Marketing expense is up 9.1% in the third quarter of 2005 over the same period in 2004, and 14.5% year-to-date 2005 over year-to-date 2004. Planned marketing initiatives for 2005 accounted for the increase in marketing expenditures over the prior year.

Software licenses and maintenance expenses were \$433,000 in the third quarter of 2005 compared to \$308,000 in the third quarter of 2004, an increase of 40.6%. For the first nine months of 2005, software licenses and maintenance expenses were up 32.6% to \$1.3 million. Increases in annual maintenance contracts contributed to the increase in this category, as did expenses related to the implementation of new systems.

Other operating expense amounted to \$2.7 million for the third quarter of 2005, up 10.5% from the same period 2004. The increase in other operating expense was in numerous expense categories including software amortization, donations, audits and examinations, and trust operations. For the year-to-date, other operating expenses of \$7.9 million are up 4.4% over the same period in 2004. The year-to-date increase included increases in the following expense categories: business development, printing and supplies, software amortization, professional fees and licenses, audits and examinations, and education and training.

Income Tax Expense

The provision for income taxes provides for Federal and New York State income taxes. The provision for the third quarter of 2005 was \$3.4 million, unchanged from the third quarter 2004. The Company's effective tax rate for the third quarter was 32.2% compared to 33.2% in the third quarter of 2004. The income tax provision for the nine months ended September 30, 2005, was \$9.9 million, compared to \$9.4 million for the same period in 2004. The Company's effective tax rate for the first nine months of 2005 was 32.4%, compared to 32.8% for the same period in 2004. The decrease in the effective rate in 2005 compared with 2004 is due to higher levels of tax-advantaged income, such as income from investments in municipal bonds, economic zone credits, and new market tax credits.

FINANCIAL CONDITION

The Company's total assets were \$2.1 billion at September 30, 2005, representing an increase of \$110.4 million over total assets reported at December 31, 2004.

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

Asset growth included a \$75.7 million increase in total loans and a \$3.8 million increase in the carrying value of securities. Loan growth during the period is net of \$11.8 million in sales of fixed rate residential mortgage loans during the first nine months of 2005. Loan growth was concentrated in the commercial real estate and residential real estate loan portfolios. Deposits were up \$61.1 million in the first nine months of 2005, to \$1.6 billion at September 30, 2005. The growth was concentrated in time deposits and non-interest bearing deposits.

Capital

Total shareholders' equity totaled \$179.8 million at September 30, 2005, an increase of \$8.8 million from December 31, 2004. Surplus increased \$42.5 million from \$75.8 million at December 31, 2004, to \$118.3 million at September 30, 2005; while undivided profits decreased \$29.8 million from \$94.5 million at December 31, 2004, to \$64.7 million at September 30, 2005, and accumulated other comprehensive income was down \$3.9 million over the same period. The increase in surplus and decrease in undivided profits reflects the 10% stock dividend paid on February 15, 2005. The decrease in accumulated other comprehensive income relates to an increase in unrealized losses on available-for-sale securities, largely due to recent increases in interest rates. Cash dividends paid in the first nine months of 2005 totaled approximately \$7.8 million, representing 38.2% of year to date earnings. Cash dividends of \$0.87 per share paid during the first nine months of 2005 were up from \$0.82 per share for the same period in 2004. Dividends per share were retroactively adjusted to reflect the 10% stock dividend paid on February 15, 2005.

On July 27, 2004, the Company's board of directors approved a stock repurchase plan (the "2004 Plan") to replace the 2002 Plan, which expired in July 2004. The 2004 Plan authorizes the repurchase of up to 440,000 (adjusted for the stock split) shares of the Company's outstanding common stock over a two-year period. As of September 30, 2005, the Company had repurchased 21,984 shares under the 2004 Plan, all during the second quarter 2005, with an average price of \$40.79.

18

The Company and its community bank subsidiaries are subject to various regulatory capital requirements administered by Federal banking agencies. Management believes the Company and its subsidiaries meet all capital adequacy requirements to which they are subject. The table below reflects the Company's capital position at September 30, 2005, compared to the regulatory capital requirements for "well capitalized" institutions.

REGULATORY CAPITAL ANALYSIS - September 30, 2005

(Dollar amounts in thousands)	Actual		Well Capitalized Requirement	
	Amount	Ratio	Amount	Ratio
Total Capital (to risk weighted assets)	\$ 184,303	13.7%	\$ 134,642	10.0%
Tier I Capital (to risk weighted assets)	\$ 170,919	12.7%	\$ 80,785	6.0%
Tier I Capital (to average assets)	\$ 170,919	8.4%	\$ 101,995	5.0%

As illustrated above, the Company's capital ratios on September 30, 2005, remain well above the minimum requirement for well capitalized institutions. As of September 30, 2005, the capital ratios for each of the Company's subsidiary community banks also exceeded the minimum levels required to be considered well

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

capitalized.

Reserve for Loan/Lease Losses and Nonperforming Assets

Management reviews the adequacy of the reserve for loan/lease losses (reserve) on a regular basis. Management considers the accounting policy relating to the reserve to be a critical accounting policy, given the inherent uncertainty in evaluating the levels of the reserve required to cover credit losses in the Company's portfolio and the material effect that assumption could have on the Company's results of operations. Factors considered in determining the adequacy of the reserve and the related provision include: management's approach to granting new credit; the ongoing monitoring of existing credits by the internal and external loan review functions; the growth and composition of the loan and lease portfolio; comments received during the course of independent examinations; current local economic conditions; past due and nonperforming loan statistics; estimated collateral values; and a historical review of loan and lease loss experience. Based upon consideration of the above factors, management believes that the reserve is adequate to provide for the risk of loss inherent in the current loan and lease portfolio. Activity in the Company's reserve for loan/lease losses during the first nine months of 2005 and 2004 is illustrated in the table below.

ANALYSIS OF THE RESERVE FOR LOAN/LEASE LOSSES (In thousands)

	September 30, 2005	September 30, 2004
Average Loans and Leases Outstanding Year to Date	\$ 1,210,789	
Beginning Balance		12,549
Provision for loan/lease losses	1,831	
Loans charged off	(1,600)	
Loan recoveries	604	
Net charge-offs		996
Ending Balance	\$ 13,384	

The reserve represented 1.07% of total loans and leases outstanding at September 30, 2005, up from 1.06% at September 30, 2004. The reserve coverage of nonperforming loans (loans past due 90 days and accruing, nonaccrual loans, and restructured troubled debt) increased to 3.11 times at September 30, 2005, from 1.52 times at September 30, 2004. Management is committed to early recognition of loan problems and to maintaining an adequate reserve.

The level of nonperforming assets at September 30, 2005, and 2004 is illustrated in the table below. Nonperforming assets of \$4.4 million as of September 30, 2005, reflect a decrease of \$3.7 million from \$8.1 million as of September 30, 2004. The current level of nonperforming assets is modest at 0.21% of total assets. Contributing to the decrease in nonperforming assets was an upgrade of a large commercial relationship to accruing status based upon improved operating performance. Approximately \$224,000 of the nonperforming loans at September 30, 2005, were secured by U.S. Government guarantees, while \$1.5 million were secured by one-to-four family residential properties.

Potential problem loans/leases are loans/leases that are currently performing, but where known information about possible credit problems of the related borrowers causes management to have doubt as to the ability of such borrowers to

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

comply with the present loan payment terms and may result in disclosure of such loans/leases as nonperforming at some time in the future. Management considers loans/leases classified as Substandard that continue to accrue interest to be potential problem

19

loans/leases. At September 30, 2005, the Company's internal loan review function had identified 33 commercial relationships totaling \$21.5 million, which it has classified as Substandard, which continue to accrue interest. As of December 31, 2004, the Company's internal loan review function had classified 25 commercial relationships totaling \$13.9 million, which continue to accrue interest, as Substandard. These loans remain in a performing status due to a variety of factors, including payment history, the value of collateral supporting the credits, and personal or government guarantees. These factors, when considered in the aggregate, give management reason to believe that the current loss exposure on these loans is not significant. The increase in the dollar amount of potential problem loans is mainly due to the recent inclusion of a larger commercial relationship. This relationship is largely secured by the guarantee of a U.S government agency. At September 30, 2005, approximately \$5.1 million of potential problem loans were backed by guarantees of U.S. government agencies. While in a performing status as of September 30, 2005, these loans exhibit certain risk factors, which have the potential to cause them to become nonperforming in the future. Accordingly, management's attention is focused on these credits, which are reviewed on at least a quarterly basis.

NONPERFORMING ASSETS (In thousands)

	September 30, 2005	September 30, 2004
Nonaccrual loans and leases	\$ 4,203	\$ 4,203
Loans past due 90 days and accruing	100	100
Troubled debt restructuring not included above	0	0
Total nonperforming loans	4,303	4,303
Other real estate, net of allowances	96	96
Total nonperforming assets	\$ 4,399	\$ 4,399
Total nonperforming loans/leases as a percent of total loans/leases	0.34%	0.34%
Total nonperforming assets as a percentage of total assets	0.21%	0.21%

Deposits and Other Liabilities

Total deposits of \$1.6 billion on September 30, 2005, were up \$61.1 million, or 3.9%, from December 31, 2004. The growth was predominately in time deposits as interest rates moved higher on targeted deposit accounts. Noninterest bearing demand deposits were up 3.5% from year-end 2004. The growth in these deposit categories was partially offset by lower savings and money market deposits, driven by lower municipal money market balances. Core deposits, which represent the primary funding source for the Company, were up 2.3% from year-end 2004. As of September 30, 2005, core deposits of \$1.23 billion represented 64.7% of total liabilities. This compares to core deposits of \$1.20 billion, representing 66.9% of total liabilities at December 31, 2004.

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

Non-core funding sources for the Company totaled \$641.1 million at September 30, 2005, up from \$575.9 million at December 31, 2004. Non-core funding at September 30, 2005, included municipal deposits, time deposits of \$100,000 or more, term advances and repurchase agreements with the Federal Home Loan Bank ("FHLB"), Federal funds purchased, and retail repurchase agreements. The growth in non-core funding between December 31, 2004, and September 30, 2005, was mainly in time deposits of \$100,000 or more, which were up \$104.4 million to \$254.5 million at September 30, 2005, from \$150.1 million at December 31, 2004. The growth was primarily due to an increase in interest rates on certain time deposit products.

The Company's liability for securities sold under agreements to repurchase ("repurchase agreements") amounted to \$167.8 million at September 30, 2005, an increase of \$14.1 million from \$153.7 million at December 31, 2004. Included in repurchase agreements at September 30, 2005, were \$95.0 million in FHLB repurchase agreements and \$72.8 million in retail repurchase agreements. Retail repurchase agreements are arrangements with local customers of the Company, in which the Company agrees to sell securities to the customer with an agreement to repurchase those securities at a specified later date.

The Company's other borrowings represent amounts owed to the FHLB. The Company increased its other borrowings from the FHLB by \$16.5 million, to \$79.7 million at September 30, 2005, from \$63.3 million at year-end 2004.

Included in the \$174.7 million in term advances and repurchase agreements with the FHLB are \$106.0 million of callable advances. The majority of the advances have call dates between 2005 and 2007 and are callable quarterly at the option of the FHLB.

20

Liquidity

Liquidity represents the Company's ability to efficiently and economically accommodate decreases in deposits and other liabilities, and fund increases in assets. The Company uses a variety of resources to meet its liquidity needs, which include cash and cash equivalents, short-term investments, cash flow from lending and investing activities, deposit growth, securities sold under repurchase agreements, and borrowings.

Cash and cash equivalents totaled \$68.8 million as of September 30, 2005, up from \$40.9 million at December 31, 2004. Short-term investments, consisting of securities due in one year or less, increased from \$33.8 million at December 31, 2004, to \$56.4 million on September 30, 2005. The Company also pledges securities as collateral for certain non-core funding sources. Securities carried at \$522.1 million at December 31, 2004, and \$531.1 million at September 30, 2005, were designated as pledged as collateral for public deposits or other borrowings, and pledged or sold under agreements to repurchase. Pledged securities represented 80.0% of total securities as of September 30, 2005, compared to 79.1% as of December 31, 2004.

Cash flow from the loan and investment portfolios provides a significant source of liquidity. These assets may have stated maturities in excess of one year, but have monthly principal reductions. Total mortgage-backed securities, at fair value, were \$270.1 million at September 30, 2005, compared with \$301.9 million at December 31, 2004. Using current prepayment assumptions, cash flow from the investment portfolio is estimated to be approximately \$157.6 million over the next 12 months. Investments in residential mortgage loans, consumer loans, and leases totaled approximately \$590.0 million at September 30, 2005. Aggregate amortization from monthly payments on these loan assets provides significant additional cash flow to the Company.

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

Core deposits are a primary funding source and represent a low cost funding source obtained primarily through its branch network. In addition to core deposits, the Company uses non-core funding sources to support asset growth. These non-core funding sources include time deposits of \$100,000 or more, brokered time deposits, municipal money market accounts, securities sold under agreements to repurchase and term advances from the FHLB. Rates and terms are the primary determinants of the mix of these funding sources. Non-core funding sources, as a percentage of total liabilities, increased from 32.0% at December 31, 2004, to 33.8% at September 30, 2005. The increase in the dollar volume of non-core funding was concentrated in time deposits of \$100,000 or more. Rates on these products have moved up due to higher market interest rates and competitive market conditions.

Liquidity is enhanced by ready access to national and regional wholesale funding sources including Federal funds purchased, repurchase agreements, brokered certificates of deposit, and FHLB advances. Through its subsidiary community banks, the Company has borrowing relationships with the FHLB and correspondent banks, which provide secured and unsecured borrowing capacity. At September 30, 2005, the unused borrowing capacity on established lines with the FHLB was \$275.2 million. As members of the FHLB, the Company's subsidiary banks can use certain unencumbered mortgage-related assets to secure additional borrowings from the FHLB. At September 30, 2005, total unencumbered residential mortgage loans of the Company were \$281.1 million. Additional assets may also qualify as collateral for FHLB advances upon approval of the FHLB.

The Company has not identified any trends or circumstances that are reasonably likely to result in material increases or decreases in the Company's liquidity in the near term.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

Interest rate risk is the primary market risk category associated with the Company's operations. Interest rate risk refers to the volatility of earnings caused by changes in interest rates. The Company manages interest rate risk using income simulation to measure interest rate risk inherent in its on-balance sheet and off-balance sheet financial instruments at a given point in time. The simulation models are used to estimate the potential effect of interest rate shifts on net interest income for future periods. Each quarter the Asset/Liability Management Committee reviews the simulation results to determine whether the exposure of net interest income to changes in interest rates remains within board-approved levels. The Committee also discusses strategies to manage this exposure and incorporates these strategies into the investment and funding decisions of the Company. The Company has not made use of derivatives, such as interest rate swaps, to manage its interest rate risk exposure.

The Company's board of directors has set a policy that interest rate risk exposure will remain within a range whereby net interest income will not decline by more than 10% in one year as a result of a 200 basis point change in rates. Based upon the simulation analysis performed as of September 30, 2005, a 200 basis point upward shift in interest rates over a one-year

time frame would result in a one-year decline in net interest income of approximately 3.17%, while a 200 basis point decline in interest rates over a one-year period would result in a decrease in net interest income of 2.81%. This simulation assumes no balance sheet growth and no management action to address balance sheet mismatches. Over the past several years, balance sheet growth helped to offset the effects of a lower interest rate environment and to increase net interest income. The increase in the Prime-lending rate over the

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

past several years has also contributed to the increase in net interest income as the Company's adjustable rate loans have repriced upward. The negative exposure in a rising rate environment is mainly driven by the repricing assumptions of the Company's core deposit base and the lag in the repricing of the Company's non-adjustable rate assets. Longer-term, the impact of a rising rate environment is positive as the asset base continues to reset at higher levels, while the repricing of the rate sensitive liabilities moderates. The negative exposure in the 200 basis point decline scenario results from the Company's assets repricing downward more rapidly than the rates on the Company's interest-bearing liabilities, mainly deposits, as deposit rates are at low levels given the historically low interest rate environment over the past several years. The aforementioned percentage changes in net interest income are based on variations from our base case scenario, which assumes interest rates remain unchanged from the date of the simulation. Our most recent base case simulation showed a flat to lower net interest margin over the next 12 months.

Although the simulation model is useful in identifying potential exposure to interest rate movements, actual results may differ from those modeled as the repricing, maturity, and prepayment characteristics of financial instruments may change to a different degree than modeled. In addition, the model does not reflect actions that management may employ to manage its interest rate risk exposure. The Company's current liquidity profile, capital position, and growth prospects offer management a level of flexibility to take actions that could offset some of the negative effects of unfavorable movements in interest rates. Management believes the current exposure to changes in interest rates is not significant in relation to the earnings and capital strength of the Company.

The table below is a Condensed Static Gap Report, which illustrates the anticipated repricing intervals of assets and liabilities as of September 30, 2005.

Condensed Static Gap - September 30, 2005	Repricing Inter		
(Dollar amounts in thousands)	Total	0-3 months	3-6 months
Interest-earning assets	\$ 1,918,259	\$ 446,074	\$ 73,358
Interest-bearing liabilities	1,539,320	617,728	104,362
Net gap position		(171,654)	(31,004)
Net gap position as a percentage of total assets		(8.25%)	(1.49%)

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Company's management, including its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) as of September 30, 2005. Based upon that evaluation, the Company's Chief Executive Officer and Chief Financial Officer, concluded that as of the end of the period covered by this Report on Form 10-Q the Company's disclosure controls and procedures were effective in providing reasonable assurance that any information required to be disclosed by the Company in its reports filed or submitted under

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that material information relating to the Company and its subsidiaries is made known to management, including its Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding disclosure.

Changes in Internal Control Over Financial Reporting

There were no changes in the Company's internal control over financial reporting that occurred during the Company's third quarter ended September 30, 2005, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

- (1) Average balances and yields exclude unrealized gains and losses on available-for-sale securities.
- (2) Interest income includes the effects of taxable-equivalent adjustments using a blended Federal and State income tax rate of 40% to increase tax exempt interest income to a taxable-equivalent basis.
- (3) Nonaccrual loans are included in the average loans totals presented above. Payments received on nonaccrual loans have been recognized as disclosed in Note 1 to the Company's Annual Report on Form 10-K for its fiscal year ended December 31, 2004.

Edgar Filing: TOMPKINS TRUSTCO INC - Form 10-Q

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

None

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Issuer Purchases of Equity Securities

The following table includes all Company repurchases made on a monthly basis during the period covered by this Quarterly Report on Form 10-Q, including those made pursuant to publicly announced plans or programs.

Period	Total Number of Shares Purchased (a)	Average Price Paid Per Share (b)	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (c)
July 1, 2005 through July 31, 2005	1,420	\$43.70	0
August 1, 2005 through August 31, 2005	151	44.93	0
September 1, 2005 through September 30, 2005	0	0	0
Total	1,571	\$43.82	0

On July 27, 2004, the Company's board of directors approved a stock repurchase plan (the "Plan"), which authorizes the repurchase of up to 440,000 of Tompkins common stock over a two-year period. To date, 21,984 shares have been repurchased at an average cost of \$40.79.

Included above are shares acquired by the trustee of a rabbi trust established pursuant to the Company's Stock Retainer Plan For Eligible Directors of Tompkins Trustco, Inc., and Participating Subsidiaries. Shares purchased under the rabbi trust are not part of the Board approved stock repurchase plan. 1,420 shares were purchased in July 2005 at an average cost of \$43.70 and 151 shares were purchased in August 2005 at an average cost of \$44.93.
