AIRTRAX, INC.

(A Development Stage Company)

NOTES TO FINANCIAL STATEMENTS

June 30, 2002

(Unaudited)

1.

BASIS OF PRESENTATION

The unaudited interim financial statements of AirTrax, Inc. (the Company) as of June 30, 2002 and for the three month and six month periods ended June 30, 2002 and 2001, respectively, have been prepared in accordance with generally accepted accounting principles. In the opinion of management, such information contains all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation of the results for such periods. The results of operations for the quarter and six month period ended June 30, 2002 are not necessarily indicative of the results to be expected for the full fiscal year ending December 31, 2002.

Certain information and disclosures normally included in the notes to financial statements have been condensed or omitted as permitted by the rules and regulations of the Securities and Exchange Commission, although the Company believes the disclosure is adequate to make the information presented not misleading. The accompanying unaudited financial statements should be read in conjunction with the financial statements of the Company for the year ended December 31, 2001.

#

Item 2. Management's Discussion and Analysis.

The following discusses the financial results and position of the accounts of the Company for the periods indicated.

Forward Looking Statements.

Forward Looking Statements

Certain of the statements contained in this Quarterly Report on Form 10-QSB include "forward looking statements" within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended ("Exchange Act"). See the Company's Annual Report on Form 10-KSB for the period ending December 31, 2001 (Form 10-KSB) for additional statements concerning operations and future capital requirements. Certain risks exist with respect to the Company and its business, which risks include the need for additional capital, lack of commercial product, lack of determined product prices and impact on profit margins, and limited operating history, among other factors. Readers are urged to refer to the section entitled Cautionary Statements in the Company s Form 10-KSB for a broader discussion of such risks and uncertainties.

Results of Operations.

Six Months Ended June 30, 2002 compared with Six Months Ended June 30, 2001.

For the six month period ended June 30, 2002 and comparable period in 2001, the Company was a development stage company and the Company has not engaged in full-scale operations for these periods. The limited revenues for the periods have been derived from sales of a non omni-directional product, and from contracts with the United States Navy that relate to the research and potential application of omni-directional products for military use, and to a lesser extent the sale of omni-directional equipment to defense contractors. The period-to-period results presented and discussed below are not necessarily meaningful comparisons due to the Company s development stage status, and are not indicative of future results.

Revenues for the six months ended June 30, 2002 six Juwere \$244,566 compared with \$88,430 in revenues for the same period in 2001. Revenues for the 2002 period consisted of \$239,366 in contract revenues from the United States Navy and \$5,200 in sales of a non omni-directional product. Revenues for the 2001 period consisted of \$86,322 in

contract revenues from the United States Navy and \$2,108 in sales of a non omni-directional product.

Cost of goods sold for the 2002 and 2001 six month periods were \$104,414 and \$1,222, respectively. Of the amount for the 2002 period, \$69,951 represented parts and \$34,893 represented employee salaries. The amount for the 2001 period represented parts and manufacturing costs for the non omni-directional product. \$280,050 which

Operating and administrative expenses which includes administrative salaries and overhead for the six six month period June in 2002 totaled \$330,573 compared with \$438,933 for the same period in 2001. The decrease \$340,220 of \$108,360 from the 2001 period is principally due to reduced product marketing and promotional expenses and reduced development costs of the omni-directional technology, partially offset by increased professional fees. Income tax benefit is funds received from the State of New Jersey's technology tax transfer program which is designed to foster technology development in the State of New Jersey. Pursuant to this program, the Company is able to sell its net operating losses and research and development credits as calculated under state law to other businesses within the state in exchange for a cash payment equal to approximately 75% of such losses and credits. Income tax benefit accrued for the six month period in 2002 was \$28,177 contrasted with \$33,026 for the period in 2001.

consisted of administrative salaries and overhead expenses incurred during its development and initial operating phase which represents an increase of \$223,353 from the prior six month period ended June 30, 1996. Net loss accumulated during development stage for the six month period in 2002 applicable to common shareholders was \$176,149 or \$0.02 per common share, compared with a net loss applicable to common shareholders of \$333,928 or \$0.03 per common share for the prior period. (\$407,421).

Liquidity and Capital Resources.

Since its inception, the Company has financed its operations through the private placement of its common stock. During 2000 and 2001, the Company raised approximately \$430,858 and \$348,600, respectively, net of offering costs from the private placement of its common stock. June During the six month period in 2002, the Company raised \$199,502 net of offering costs from the private placement of 48,000 shares of its common stock. During this period in 2002, the Company received a shareholder loan in the amount of \$70,000 which is due upon demand. In addition, under the New Jersey tax transfer program discussed above, the Company has received \$183,573 since inception.

As of March 31, 2002, the Company's working capital deficit was \$186,051.

The Company anticipates that its cash requirements for the foreseeable future will be significant. In particular, management expects substantial expenditures for inventory and product production in anticipation of the rollout of its omni-directional forklift. Funds required to initiate production are estimated to be \$1,500,000. The Company intends to fund its operations through the issuance of equity and/or debt securities. Presently, the Company is seeking capital from one or more funding sources; however, at this time no arrangement has been finalized. No assurances can be given that the Company will be successful in obtaining sufficient capital to fund the initiation of its production activities. If the Company is unable to obtain sufficient funds in the near future, such event will delay the rollout of its product and likely will have a material adverse impact on the Company and its business prospects.

Total assets, net of accumulated depreciation, totaled \$553,632\$1,895,587 on June 30, 2002. Total assets, net of accumulated depreciation, totaled \$469,546 on December 31, 2001.
