FORM 10-K

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2018

or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF
1934

For the transition period from _____ to _____

Commission file number: 1-13461

Group 1 Automotive, Inc.

(Exact name of registrant as specified in its charter)

Delaware 76-0506313

(State or other jurisdiction of (I.R.S. Employer
incorporation or organization) Identification No.)

800 Gessner, Suite 500 (713) 647-5700
Houston, Texas 77024 (Registrant's telephone
(Address of principal executive number, including area code)
offices, including zip code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Name of exchange on which registered
---------------------	--------------------------------------

Common stock, par value \$0.01 per share	New York Stock Exchange
--	-------------------------

Securities registered pursuant to Section 12(g) of the Act: None.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes No

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K (§ 229.405 of this chapter) is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company" and "emerging growth company" in Rule 12b-2 of the Exchange Act. (Check one):
Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if that registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes No

The aggregate market value of common stock held by non-affiliates of the registrant was approximately \$1.2 billion based on the reported last sale price of common stock on June 30, 2018, which was the last business day of the registrant's most recently completed second quarter.

As of February 1, 2019, there were 18,340,482 shares of our common stock, par value \$0.01 per share, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Portions of the registrant's definitive proxy statement for its 2019 Annual Meeting of Stockholders, which will be filed with the Securities and Exchange Commission within 120 days of December 31, 2018, are incorporated by reference into Part III of this Form 10-K.

CAUTIONARY STATEMENT ABOUT FORWARD-LOOKING STATEMENTS

This Annual Report on Form 10-K (“Form 10-K”) includes certain “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (“Securities Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (“Exchange Act”). This information includes statements regarding our strategy, plans, goals or current expectations with respect to, among other things:

- our future operating performance;
- our ability to maintain or improve our margins;
- operating cash flows and availability of capital;
- the completion of future acquisitions and divestitures;
- the future revenues of acquired dealerships;
- future stock repurchases, refinancing of debt, and dividends;
- future capital expenditures;
- changes in sales volumes and availability of credit for customer financing in new and used vehicles and sales volumes in the parts and service markets;
- business trends in the retail automotive industry, including the level of manufacturer incentives, new and used vehicle retail sales volume, customer demand, interest rates and changes in industry-wide inventory levels;
- changes in regulatory practices, tariffs and taxes, including Brexit; and
- availability of financing for inventory, working capital, real estate and capital expenditures.

Although we believe that the expectations reflected in these forward-looking statements are reasonable when and as made, we cannot assure you that these expectations will prove to be correct or that future developments affecting us will be those that we anticipate. When used in this Form 10-K, the words “anticipate,” “believe,” “estimate,” “expect,” “intend,” “may” and similar expressions, as they relate to our company and management, are intended to identify forward-looking statements, which are generally not historical in nature. These forward-looking statements are based on our current expectations and beliefs concerning future developments and their potential effect on our existing operations and do not include the potential impact of any future acquisitions. Our forward-looking statements involve significant risks and uncertainties (some of which are beyond our control) and assumptions that could cause actual results to differ materially from our historical experience and our present expectations or projections. Known material factors that could cause our actual results to differ from those in the forward-looking statements are those described in Part I, “Item 1A. Risk Factors.”

Readers are cautioned not to place undue reliance on forward-looking statements, which speak only as of the date hereof. We undertake no responsibility to publicly release the result of any revision of our forward-looking statements after the date they are made, except as required by law.

PART I

Item 1. Business

General

Group 1 Automotive, Inc., a Delaware corporation organized in 1995, is a leading operator in the automotive retail industry. As of December 31, 2018, we owned and operated 238 franchises, representing 30 brands of automobiles, at 183 dealership locations and 47 collision centers worldwide. We own 152 franchises at 118 dealership locations and 29 collision centers in the United States of America (“U.S.”), 63 franchises at 47 dealership locations and 11 collision centers in the United Kingdom (“U.K.”) and 23 franchises at 18 dealership locations and seven collision centers in Brazil. Through our dealerships, we sell new and used cars and light trucks; arrange related vehicle financing; sell service and insurance contracts; provide automotive maintenance and repair services; and sell vehicle parts. Our operations are primarily located in major metropolitan areas in Alabama, California, Florida, Georgia, Kansas, Louisiana, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New Mexico, Oklahoma, South Carolina, and Texas in the U.S., in 32 towns in the U.K., and in key metropolitan markets in the states of Sao Paulo, Parana, Mato Grosso do Sul and Santa Catarina in Brazil.

As discussed in more detail in Note 2, “Summary of Significant Accounting Policies and Estimates”, within our Notes to Consolidated Financial Statements, all of our operating subsidiaries are aligned into one of three operating segments (or regions): the U.S., the U.K. and Brazil. The President of U.S. Operations reports directly to the Company's Chief Executive Officer and is responsible for the overall performance of the U.S. region, as well as for overseeing the market directors and dealership general managers. The operations of the Company's two international regions are structured similar to the U.S. region. Our financial information, including our revenues from external customers, a measure of profit or loss, and total assets, is segregated into our three operating segments and included in our Consolidated Financial Statements and related notes beginning on page F-1.

Business Strategy

Our business strategy primarily focuses on the performance of our existing dealerships to achieve growth, capture market share, and maximize the investment return to our stockholders. We are constantly evaluating opportunities to improve the overall profitability of our dealerships. For 2019, our priorities will be on three key areas as we continue to become a best-in-class automotive retailer. These areas are:

sustained growth of our higher margin parts and service business. Our focus on growth in our parts and service operations continues to hinge on the retention and expansion of our service professionals, targeted marketing efforts, strategic selling and operational efficiencies, as well as capital investments designed to support our growth targets; promotion of the customer experience and customer satisfaction, in all areas of our business; and improvement of operating efficiencies, through further development of our operating model that promotes commonality of processes, systems and training, to further leverage our cost base. We made significant changes in our operating model during the last five years, which were designed to reduce variable and fixed expenses. And, we continue our efforts to fully leverage our scale, reduce costs, enhance internal controls, and enable further growth. As our business grows in 2019 and beyond, we intend to manage our costs carefully and to look for additional opportunities to improve our processes and disseminate best practices. We believe that our management structure supports more rapid decision making and facilitates an efficient and effective roll-out of new processes.

A key to the execution of our business strategy is the leverage of what we believe to be one of our key strengths — the talent of our people. We believe that we have developed a distinguished management team with substantial industry expertise. With our management structure and level of executive talent, we plan to continue empowering the operators of our dealerships to make appropriate decisions to grow their respective dealership operations and to control fixed and variable costs. We believe this approach allows us to provide the best possible service to our customers, as well as attract and retain talented employees.

We will continue to focus on opportunities to enhance our current dealership portfolio by strategic acquisitions and improving or disposing any underperforming dealerships. We believe that substantial opportunities for growth through acquisitions remain in our industry in the U.S., the U.K. and Brazil. An absolute acquisition target has not been established for 2019, but we expect to acquire dealerships that provide attractive returns on investment. We believe that as of December 31, 2018, we have sufficient financial resources to support additional acquisitions. We plan to focus our future growth in geographically diverse areas with positive economic outlooks over the longer-term.

Further, we intend to critically evaluate our return on invested capital in our current dealership portfolio for disposition opportunities. In 2018, we completed the acquisition of five U.K. dealerships, inclusive of eight franchises, added one franchise and opened one additional dealership for one awarded franchise in the U.K., with expected aggregate annualized revenues of \$315.0 million, as estimated at the time of the

acquisitions. The Company acquired four dealerships in the U.S., inclusive of four franchises, and opened one additional dealership, representing one franchise with expected aggregate annualized revenues of \$230.0 million. Further, the Company acquired one dealership in Brazil, representing one franchise, and opened one additional dealership, representing one franchise, with expected aggregate annualized revenues of \$70.0 million. For more information on our acquisitions and dispositions, including those occurring in 2018, see “Acquisition and Divestiture Program” for further details.

Dealership Operations

Our operations are located in geographically diverse markets that extend domestically across 15 states aggregated into one U.S. region, and internationally in the U.K. and Brazil, representing our three reportable segments: U.S., U.K. and Brazil. See Note 21, “Segment Information” within the Notes to Consolidated Financial Statements for further financial information on our three reportable segments. For a discussion of the risks associated with our operations in the U.S., U.K. and Brazil, please see Part I, “Item 1A. Risk Factors.” The following table sets forth the regions and geographic markets in which we operate, the percentage of new vehicle retail units sold in each region in 2018 and the number of dealerships and franchises in each region:

Region	Geographic Market	Percentage of Our New Vehicle Retail Units Sold During the Year Ended December 31, 2018	As of December 31, 2018	
			Number of Dealerships	Number of Franchises
United States	Texas	36.4 %	56	74
	Oklahoma	6.3	13	20
	California	6.2	5	9
	Massachusetts	4.9	5	5
	Georgia	4.5	7	9
	Florida	2.7	4	4
	Louisiana	2.1	5	7
	New Hampshire	1.8	3	3
	South Carolina	1.6	3	3
	New Jersey	1.6	4	4
	Kansas	1.4	4	4
	Mississippi	1.2	3	3
	Alabama	0.7	2	2
	Maryland	0.5	2	2
	New Mexico	0.2	2	3
		72.1	118	152
International	United Kingdom	22.7	47	63
	Brazil	5.2	18	23
Total		100.0 %	183	238

Each of our local operations has a management structure designed to promote and reward entrepreneurial spirit and the achievement of team goals. The general manager of each dealership, with assistance from the managers of new vehicle sales, used vehicle sales, parts, service, collision and finance and insurance departments, is ultimately responsible for the operation, personnel and financial performance of the dealership. Our dealerships are operated as distinct profit centers, and our general managers have a reasonable degree of empowerment within our organization.

New Vehicle Retail Sales

In 2018, we sold 170,517 new vehicles in retail transactions at our dealerships, representing 32 brands. Our retail sales of new vehicles accounted for 18.0% of our gross profit in 2018. In addition to the profit related to the transactions, a typical new vehicle retail sale or lease may create the following additional profit opportunities for our dealerships:

- manufacturer dealer incentives;
- the resale of any used vehicle trade-in purchased by the dealership;

arrangement of third-party financing in connection with the retail sale;
the sale of vehicle service and insurance contracts;
the sale of vehicle parts, accessories or other after-market products; and

3

the service and repair of the vehicle both during and after the warranty period.

We consider brand diversity to be one of our strengths. The following table sets forth our consolidated new vehicle sales revenue by brand and number of new vehicle retail units sold in the year ended, as well as the number of franchises we owned as of December 31, 2018:

	New Vehicle Revenues	New Vehicle Unit Sales	% of Total Units Sold	Franchises Owned
	(In thousands)			
Toyota	\$ 1,104,381	36,687	21.5 %	19
BMW	744,436	15,881	9.3 %	27
Ford	693,030	18,361	10.8 %	18
Audi	599,885	15,402	9.0 %	14
Mercedes-Benz	418,784	7,692	4.5 %	12
Honda	382,597	13,796	8.1 %	13
Nissan	327,929	11,085	6.5 %	9
Lexus	317,914	6,345	3.7 %	4
Chevrolet	254,984	6,376	3.7 %	6
Volkswagen	146,640	5,572	3.3 %	12
Land Rover	137,619	2,146	1.3 %	8
MINI	124,866	4,653	2.7 %	18
Jeep	113,189	3,132	1.8 %	6
Acura	108,713	2,673	1.6 %	5
GMC	108,498	2,168	1.3 %	5
RAM	98,520	2,095	1.2 %	6
Kia	85,318	3,468	2.0 %	5
Hyundai	79,982	3,118	1.8 %	5
Cadillac	67,291	1,175	0.7 %	2
Subaru	66,774	2,231	1.3 %	3
Jaguar	52,473	1,003	0.6 %	7
Dodge	41,836	1,143	0.7 %	6

Chrysler	16,955	396	0.2 %	6
SEAT	12,485	1,631	1.0 %	1
Lincoln	11,153	197	0.1 %	3
Mazda	10,830	378	0.2 %	1
SKODA	7,039	300	0.2 %	2
Vauxhall	3,968	209	0.1 %	—
Smart	2,246	162	0.1 %	5
Volvo	1,161	25	— %	—
Total	\$ 6,181,371	170,517	100.0 %	238

Our diversity by manufacturer, based on new vehicle unit sales for the years ended December 31, 2018, 2017, and 2016, is set forth below:

	For the Years Ended December 31,					
	2018	% of Total	2017	% of Total	2016	% of Total
Toyota/Lexus	43,032	25.2 %	43,557	25.3 %	42,922	24.9 %
Volkswagen/Audi/Porsche/SEAT/SKODA	22,905	13.4	23,686	13.8	20,219	11.8
BMW/MINI	20,534	12.0	21,903	12.7	23,305	13.5
Ford/Lincoln	18,558	10.9	19,733	11.5	18,925	11.0
Honda/Acura	16,469	9.7	15,882	9.2	17,031	9.9
Nissan	11,085	6.5	12,729	7.4	12,256	7.1
Chevrolet/GMC/Buick/Cadillac	10,343	6.1	10,713	6.2	12,811	7.4
Mercedes-Benz/Smart/Sprinter	8,247	4.8	6,809	4.0	7,349	4.3
Chrysler/Dodge/Jeep/RAM	6,766	4.0	6,692	3.9	6,801	4.0
Hyundai/Kia	6,586	3.9	6,799	3.9	7,256	4.2
Jaguar/Land Rover	3,149	1.9	1,692	0.9	798	0.5
Other	2,843	1.6	2,005	1.2	2,380	1.4
Total	170,517	100.0 %	172,200	100.0 %	172,053	100.0 %

Our new vehicle unit sales mix was affected by, among other things, our acquisitions and dispositions during 2018, 2017 and 2016.

Some new vehicles we sell are purchased by customers under lease or lease-type financing arrangements with third-party lenders. New vehicle leases generally have shorter terms, bringing the customer back to the vehicle market, and our dealerships specifically, sooner than if the vehicle purchase was debt financed. In addition, lease or lease-type customer financing arrangements provide our dealerships with a steady supply of late-model, off-lease vehicles to be sold as used vehicles. Generally, leased vehicles remain under factory warranty, allowing the opportunity for our dealerships to provide maintenance and repair services for the contract term. However, the penetration rate for other finance and insurance product sales on leases and lease-type customer financing arrangements tends to be less than in other financing arrangements (such as debt financed vehicles). We do not guarantee residual values on lease transactions. Lease vehicle unit sales represented 14.6%, 14.6% and 16.7% of our total new vehicle retail unit sales for the years ended December 31, 2018, 2017 and 2016, respectively.

Used Vehicle Sales, Retail and Wholesale

We sell used vehicles at each of our franchised dealerships. In 2018, we sold 147,999 used vehicles at our dealerships, and sold 53,887 used vehicles in wholesale markets. Our retail sales of used vehicles accounted for 10.9% of our gross profit in 2018. Used vehicles sold at retail typically generate higher gross margins on a percentage basis than new vehicles primarily because of their relatively limited comparability, which is dependent on a vehicle's age, mileage and condition, among other things.

Valuations of used vehicles vary based on supply and demand factors, the level of new vehicle incentives, and the availability of retail financing and general economic conditions. Profit from the sale of used vehicles depends primarily on a dealership's ability to obtain a high-quality supply of used vehicles at reasonable prices and to effectively manage that inventory. Our new vehicle operations generally provide our used vehicle operations with a large supply of high-quality trade-ins and off-lease vehicles, and are the best source of high-quality used vehicles. Our dealerships supplement their used vehicle inventory with purchases at auctions, including manufacturer-sponsored auctions available only to franchised dealers. We continue to utilize used vehicle management software tools with the goal to enhance the management of used vehicle inventory, focusing on the more profitable retail used vehicle business and reducing our wholesale used vehicle business. This internet-based software tool is an integral part of our used vehicle process, enabling our managers to make used vehicle inventory decisions based on real time market valuation data. It also allows us to leverage our size and local market presence by expanding the pool from which used vehicles can be sold within a given market or region within the U.S., effectively broadening the demand for our used vehicle inventory. Further, this software supports increased oversight of our assets in inventory, allowing us to better

control our exposure to declines in used vehicle market valuations, the values of which typically decrease over time. In addition to active management of the quality and age of our used vehicle inventory, we are focused on increasing the total lifecycle profitability of our used vehicle operations by participating in manufacturer certification programs where

5

available. Manufacturer certified pre-owned (“CPO”) vehicles offer customers the opportunity to purchase a used vehicle that has passed a rigorous array of manufacturer-defined tests, and are eligible for manufacturer support, such as subsidized finance rates, the extension of manufacturer’s service warranty and other benefits. With the extended service warranty, the sale of CPO vehicles tends to generate better ongoing customer loyalty for maintenance and repair services at the selling dealership. CPO vehicles typically cost more to recondition, but sell at a premium compared to other used vehicles and are available only from franchised new vehicle dealerships. Our CPO vehicle sales represented 40.2% of total used retail sales in 2018.

In the first quarter of 2018 in the U.S., we launched a new sales program called “Val-U-Line®,” a strategic used vehicle initiative that targets a growing customer niche and enables the Company to retail lower cost, higher mileage units that would have otherwise been sent to the auction. Val-U-Line® leverages our operational discipline and existing assets to create standardized used vehicle policies, merchandising, and pricing options. Given our scale, internal on-line buying center, revamped internal auction capability, and new transportation infrastructure, the Val-U-Line® segment has provided incremental retail volume and represents approximately 10.3% of our U.S. retail used car business. As part of this initiative, the Company has revamped its compensation structure for used vehicle commissions, and has added a used car director and functional support team at the corporate level. We continue to believe that concentrating on the sale of used vehicles at our existing dealerships and utilizing state-of-the-art on-line digital marketing methods to enhance the sale of used cars is a better capital investment as opposed to the costs associated with opening free-standing used car facilities unrelated to a new car dealership location.

Parts and Service Sales

We sell replacement parts and provide both warranty and non-warranty (i.e., customer-pay) maintenance and repair services at each of our franchised dealerships, as well as provide collision repair services at the 47 collision centers that we operate. We also sell parts to wholesale customers. Our parts and service business accounted for 44.0% of our gross profit in 2018. Customer-pay maintenance and repair services, warranty maintenance and repair services, wholesale parts sales and collision repair services accounted for 45.6%, 20.7%, 20.6% and 13.1%, respectively, of the revenues from our parts and service business in 2018. Our parts and service departments also perform used vehicle reconditioning and new vehicle enhancement services in support of our new and used retail vehicle operations for which they realize a profit. However, the revenue for that internal work is eliminated from our parts and service revenue in the consolidation of our financial statements.

The automotive maintenance and repair industry is highly fragmented, with a significant number of independent maintenance and repair facilities in addition to those of the franchised dealerships. We believe, however, that the increasing complexity of new vehicles, especially in the area of electronics and technological advancements, is making it difficult for many independent repair shops to retain the expertise necessary to perform major or technical repairs. We have made investments in recruiting, training, and retaining qualified technicians and advisors to work in our service and repair facilities. And, we have made investments in state of the art diagnostic and repair equipment to be utilized by these technicians.

Vehicle manufacturers only permit warranty and recall work to be performed at franchised dealerships. Currently, a trend exists in the automobile industry towards longer new vehicle warranty periods and more diligence with manufacturer recalls. As a result, we believe that over time an increasing percentage of all repair work will be performed at franchised dealerships that have the sophisticated equipment and skilled personnel necessary to perform repairs and warranty work on today’s complex vehicles.

Our strategy to capture an increasing share of the available parts and service business and enhance profitability includes the following elements:

Invest in the Recruiting, Training and Retaining of Qualified Service Professionals. We are developing and implementing programs designed to more effectively identify and recruit service professionals, onboard and train these service professionals and improve our retention of these service professionals. We believe such efforts will improve customer satisfaction, reduce costs and allow us to grow our parts and service business.

Focus on Customer Relationships; Emphasize Preventative Maintenance. Our dealerships seek to retain customers of our new and used vehicles as ongoing clients of our parts and service departments. To accomplish this goal, we use computer systems that track the vehicle owners’ maintenance records and provide advance notice to them when their

vehicles are due for periodic service. Our use of computer-based customer relationship management tools increases the reach and effectiveness of our marketing efforts, allowing us to target our promotional offerings to areas in which service capacity is under-utilized or profit margins are greatest. We continue to train our service professionals to establish relationships with their service clients to promote a long-term business relationship. And, we are focused on enhancing access to our service facilities by providing patrons with readily-accessible means to schedule service appointments. We believe our parts and service activities are an integral part of the customer service experience, allowing us to maintain ongoing relationships with our dealerships' clients and, thereby, deepening customer loyalty to the dealership as a whole.

Sell Vehicle Service Contracts in Conjunction with Vehicle Sales. Our finance and insurance sales departments attempt to connect new and used vehicle customers with vehicle service contracts, and thereby enhance repeat customer business for our parts and service departments.

Efficient Management of Parts Inventory. Our dealerships' parts departments support their vehicle sales and service departments, selling factory-approved parts for the respective vehicle makes and models. Parts are either used in repairs made in the service department, sold at retail to customers, or sold at wholesale to independent repair shops and other franchised dealerships. Our dealerships also frequently share parts with each other. Our dealerships employ parts managers who oversee parts inventories and sales. Software programs are used to monitor parts inventory, maximize sales, avoid obsolete and unused parts, and make the best use of manufacturer return procedures.

Expansion of Collision Center Operations. We plan to continue to grow our collision center operations. Expansion in this segment of the business is not restricted by franchise agreements or manufacturer relationships. We believe that our concentration of dealership operations in certain of the markets in which we currently operate significantly enhances the profit model opportunities for our collision center operations.

Finance and Insurance Sales

Revenues from our finance and insurance operations consist primarily of fees for arranging financing and selling vehicle service and insurance contracts in connection with the retail purchase of a new or used vehicle. Our finance and insurance business accounted for 27.1% of our gross profit in 2018. We offer a wide variety of third-party finance, vehicle service and insurance products in a convenient manner and at competitive prices. To increase transparency to our customers, we offer all of our products on menus that display pricing and other information, allowing customers to choose the products that suit their needs.

Financing. We arrange third-party purchase and lease financing for our customers. In return, we receive a fee from the third-party finance company upon completion of the financing. These third-party finance companies include manufacturers' captive finance subsidiaries, selected commercial banks and a variety of other third-parties, including credit unions and regional auto finance companies. Generally, we do not retain substantial credit risk after a customer has received financing. The fees we receive from the third-party finance companies are subject to chargeback, or repayment, to the finance company in full or in part, if a customer defaults or prepays the financing contract, typically during some limited time period at the beginning of the contract term. We have negotiated incentive programs with some finance companies pursuant to which we receive additional fees upon reaching a certain volume of business.

Extended Warranty, Vehicle Service and Insurance Products. We offer our customers a variety of vehicle warranty and extended protection products in connection with purchases of new and used vehicles, including:

• extended warranties;

• maintenance, or vehicle service, products and programs;

• guaranteed asset protection insurance, which covers the shortfall between a customer's contract balance and insurance payoff in the event of a total vehicle loss; and

• lease "wear and tear" insurance.

The products our dealerships offer are generally underwritten and administered by independent third parties, including the vehicle manufacturers' captive finance subsidiaries. Under our arrangements with the providers of these products, we either sell these products on a straight commission basis, or we sell the product, recognize commission and participate in future underwriting profit, if any, pursuant to a retrospective commission arrangement. We do not retain the risk of loss for claims made under these contracts. However, the commissions that we earn may be subject to chargeback, in full or in part, if the contract is terminated prior to its scheduled maturity.

Our strategy to improve the customer experience and enhance profitability of our finance and insurance operations includes the following elements:

Continue to enhance our product offerings. We are constantly evaluating the mix of insurance products that we offer our customers to ensure that their needs are met. In addition, we regularly work with our current and prospective insurance product providers to assess new product offerings and match them with changing markets and customer demand. Further, we routinely consider our relationships with finance company and insurance product providers, as well as our marketing and other strategies to expand the accessibility and affordability of our product offerings to more of our clients.

Improve our processes within the dealership. We routinely consider software and other technological improvements that can make the process by which a customer finances a vehicle purchase and/or purchases an insurance product

7

more efficient. Further, we maintain a focus on compliance with our standard policies and procedures, as well as applicable laws and regulations, in order to optimize the customer experience and overall profitability of each transaction.

New and Used Vehicle Inventory Financing

See Note 12, "Credit Facilities" within our Notes to Consolidated Financial Statements, for a detailed description of our new and used vehicle inventory financing arrangements.

Acquisition and Divestiture Program

We pursue an acquisition and divestiture program focused on delivering an attractive return on investment.

Acquisition Strategy. We seek to acquire large, profitable, well-established dealerships and franchises that are leaders in their markets to:

- enhance brand and geographic diversity with primary focus on import and luxury brands;
 - expand into geographic areas we currently do not serve;
 - expand our brand, product, and service offerings in our existing markets;
- and/or

capitalize on economies of scale and cost savings opportunities in our existing markets in areas such as used vehicle sourcing, advertising, purchasing, data processing, personnel utilization, and the cost of floorplan financing, thereby, increasing operating efficiency.

We typically pursue dealerships with superior operational management, whom we seek to retain. By retaining existing personnel who have experience and in-depth knowledge of their local market, we believe that we can mitigate the risks involved with employing and training new and untested personnel. In addition, our acquisition strategy targets the purchase of the related real estate to provide maximum operating flexibility.

We focus on the acquisition of dealerships or groups of dealerships that we believe offer opportunities for higher returns, and particularly on brands which provide growth opportunities for our parts and service operations and strengthen our operations in geographic regions in which we currently operate with attractive long-term economic prospects.

Recent Acquisitions. In 2018, we acquired 5 dealerships in the U.K., inclusive of 8 franchises, added one franchise and opened one additional dealership for one awarded franchise. The Company also acquired four dealerships in the U.S., inclusive of four franchises and opened one additional dealership, representing one additional franchise. In addition, the Company acquired one dealership in Brazil, inclusive of one franchise, and opened one dealership, inclusive of one franchise. The expected aggregate annualized revenues, estimated at the time of acquisition, for these acquisitions, were \$615.0 million.

Divestiture Strategy. We continually review the investments in our dealership portfolio for disposition opportunities, based upon a number of criteria, including:

- the rate of return on our capital investment over a period of time;
- location of the dealership in relation to existing markets and our ability to leverage our cost structure;
- potential future capital investment requirements;
- the brand; and
- existing real estate obligations, coupled with our ability to exit those obligations or identify an alternate use for real estate.

While it is our desire to only acquire profitable, well-established dealerships, we have, at times, acquired dealerships that do not fit our acquisition strategy in connection with the acquisition of a larger dealership group. We acquire such dealerships with the understanding that we may need to divest some or all of them at some future time. The costs associated with such potential divestitures are included in our analysis of whether we acquire all dealerships in the same acquisition. Additionally, we may acquire a dealership whose profitability is marginal, but which we believe can be increased through various factors, such as: (a) change in management, (b) expansion or improvement in facility operations, (c) relocation of facility based on demographic changes, (d) reduction in costs, and/or (e) sales training. If, after a period of time, a dealership's profitability does not positively respond, we will seek to sell the dealership to a third party, or, in a rare case, surrender the franchise back to the manufacturer. In conjunction with the disposition of certain of our dealerships, we may also dispose of the associated real estate. Management constantly monitors the

performance of all of our dealerships, and routinely assesses the need for divestiture. In connection with divestitures, we are sometimes required to incur additional charges associated with lease

terminations or the impairment of long-lived and/or intangible, indefinite-lived assets. We continue to rationalize our dealership portfolio and focus on increasing the overall profitability of our operations.

Recent Dispositions. During 2018, we disposed of two dealerships in the U.S., representing three franchises, terminated one additional franchise in the U.S., disposed of one dealership in the U.K., representing one franchise, and terminated one additional franchise in the U.K. These dispositions represented aggregate annual revenues of approximately \$195.0 million.

Competition

We operate in a highly competitive industry. In each of our markets, consumers have a number of choices when deciding where to purchase a new or used vehicle and how the purchase will be financed. Consumers also have options for the purchase of related parts and accessories, as well as the maintenance and repair of vehicles. In the U.S., according to the National Automobile Dealers Association, there were approximately 16,802 franchised automobile dealerships as of January 1, 2018, which was up from 16,708 as of January 1, 2017. In the U.K., according to the National Franchised Dealers Association, there were approximately 4,240 franchised dealerships as of January 1, 2018, which was up from 4,184 as of January 1, 2017. In Brazil, according to The National Association of Automobile Manufacturers, there were approximately 4,287 franchised automobile dealerships as of January 1, 2018, which was down from 4,393 as of January 1, 2017.

Our competitive success depends, in part, on national and regional automobile-buying trends, local and regional economic factors, and other regional competitive pressures. Conditions and competitive pressures affecting the markets in which we operate, or in any new markets we enter, could adversely affect us, although the retail automobile industry as a whole might not be affected. Some of our competitors may have greater financial, marketing and personnel resources, and lower overhead and sales costs than we do. We cannot guarantee that our operating performance and our acquisition or disposition strategies will be more effective than the strategies of our competitors. New and Used Vehicles. We believe the principal competitive factors in the automotive retailing business are location, suitability of the facility, on-site management, the acceptance of a franchise to the market in which it is located, concentration of same franchises in the surrounding markets, service, price, and selection. In the new vehicle market, our dealerships compete with other franchised dealerships in their market areas, as well as auto brokers, leasing companies, and internet companies that provide referrals to, or broker vehicle sales with, other dealerships or customers. We are subject to competition from dealers that sell the same brands of new vehicles that we sell and from dealers that sell other brands of new vehicles that we do not sell in a particular market. Our new vehicle dealer competitors also have franchise agreements with the various vehicle manufacturers and, as such, generally have access to new vehicles on the same terms as we do. We do not have any cost advantage in purchasing new vehicles from vehicle manufacturers, and our franchise agreements do not grant us the exclusive right to sell a manufacturer's product within a given geographic area.

In the used vehicle market, our dealerships compete both in their local market and nationally, including over the internet, with other franchised dealers, large multi-location used vehicle retailers, local independent used vehicle dealers, automobile rental agencies, and private parties for the supply and resale of used vehicles.

Parts, Service and Collision Businesses. We believe the principal competitive factors in the parts and service business are the quality of customer service, the use of factory-approved replacement parts, familiarity with a manufacturer's brands and models, accessibility and convenience for potential customers, access to and use of technology required for certain repairs and services (e.g., software patches, diagnostic equipment, etc.), location, price, the competence of technicians, and the availability of training programs to enhance such expertise. In the parts and service market, our dealerships compete with other franchised dealers to perform warranty maintenance and repairs, conduct manufacturer recall services and sell factory replacement parts. Our dealerships also compete with other automobile dealers, franchised and independent service center chains, and independent repair shops for non-warranty repair and maintenance business. In addition, our dealerships sell replacement and aftermarket parts both locally and nationally over the internet in competition with franchised and independent retail and wholesale parts outlets. A number of regional or national chains offer selected parts and services at prices that may be lower than ours. Our collision centers compete with other large, multi-location companies, as well as local, independent, collision service operations.

Finance and Insurance. We believe the principal competitive factors in the finance and insurance business are convenience, interest rates, product availability and affordability, product knowledge and flexibility in contract length. We face competition in arranging financing for our customers' vehicle purchases from a broad range of financial institutions. Many financial institutions now offer finance and insurance products over the internet, which may reduce our profits from the sale of these products.

Acquisitions. We compete with other national dealer groups and individual investors for acquisitions. Increased competition, especially for certain luxury and import brands, may raise the cost of acquisitions. In the future, we cannot guarantee that there will be opportunities to complete acquisitions, nor are we able to guarantee that we will be able to complete acquisitions on terms acceptable to us.

Relationships and Agreements with our Manufacturers

Each of our U.S. dealerships operates under one or more franchise agreements with vehicle manufacturers (or authorized distributors). The franchise agreements grant the franchised automobile dealership a non-exclusive right to sell the manufacturer's or distributor's brand of vehicles and offer related parts and service within a specified market area. These franchise agreements also grant franchised dealerships the right to use the manufacturer's or distributor's trademarks in connection with their operations, and impose numerous operational requirements and restrictions relating to, among other things:

- inventory levels;
- working capital levels;
- the sales process;
- minimum sales performance requirements;
- customer satisfaction standards;
- marketing and branding;
- facility standards and signage;
- personnel;
- changes in management;
- change in control; and
- monthly financial reporting.

Our dealerships' franchise agreements are for various terms, ranging from one year to indefinite. Each of our franchise agreements may be terminated or not renewed by the manufacturer for a variety of reasons, including unapproved changes of ownership or management and performance deficiencies in such areas as sales volume, sales effectiveness, and customer satisfaction. In most cases, manufacturers have renewed the franchises upon expiration so long as the dealership is in compliance with the terms of the agreement. From time to time, certain manufacturers may assert sales and customer satisfaction performance requirements under the terms of our framework or franchise agreements. We work with these manufacturers to address any performance issues. Failure to meet such requirements could limit our ability to acquire future dealerships of such manufacturers.

In general, the U.S. jurisdictions in which we operate have automotive dealership franchise laws, providing that, notwithstanding the terms of any franchise agreement, it is unlawful for a manufacturer to terminate or not renew a franchise unless "good cause" exists. It generally is difficult for a manufacturer to terminate, or not renew, a franchise under these laws, which were designed to protect dealers. Though unsuccessful to date, manufacturers' lobbying efforts may lead to the repeal or revision of dealer laws. If dealer laws are repealed in the states in which we operate in the U.S., manufacturers may be able to terminate our franchises without providing advance notice, an opportunity to cure or showing of good cause. Without the protection of dealer laws, it may also be more difficult for our dealers to renew their franchise agreements upon expiration. Further, U.S. federal law, including any federal bankruptcy law, may preempt U.S. state law and allow manufacturers greater freedom to terminate or not renew franchises.

The U.K. generally does not have automotive dealership franchise laws and, as a result, our U.K. dealerships operate without these types of specific protections. However, similar protections may be available as a matter of general U.K. contractual law. In addition, our U.K. dealerships are subject to European Union ("EU") and U.K. antitrust rules prohibiting certain restrictions on the sale of new vehicles and spare parts and on the provision of repairs and maintenance across the EU. For example, authorized dealers are generally able to, subject to manufacturer facility requirements, relocate or add additional facilities throughout the EU, offer multiple brands in the same facility, allow the operation of service facilities independent of new car sales facilities and ease restrictions on cross supplies (including on transfers of dealerships) between existing authorized dealers within the EU. However, certain restrictions on dealerships may be permissible, provided the conditions set out in the relevant EU Block Exemption Regulations are met. On June 23, 2016, the British citizens voted on a referendum in favor of exiting the EU (commonly referred to as "Brexit"). Currently, representatives of both the U.K. and the EU are negotiating an agreement to set both the terms and conditions for the U.K.'s departure from the EU. Any such agreement must be approved by the British Parliament. To date, the British Parliament has not approved an agreement for the U.K. to exit from the EU. The inability of the U.K. and EU to reach such agreement, has created uncertainty in the regulatory environment

in the U.K. There has been no clear indication of how and when Brexit will occur or how it will ultimately impact our business operations.

The sale of vehicles in Brazil is regulated by federal law, commonly referred to in Brazil as the Ferrari Law. Such law sets forth the terms and conditions of distribution agreements executed among manufacturers and dealerships, specifically with regard to the distribution of cars, trucks, buses, tractors, motorbikes and similar vehicles. In addition, the Ferrari Law establishes the geographical area of a dealership, termination of distribution agreements and their consequences, among other things. Any contractual provision that conflicts with the Ferrari Law is considered void in Brazil. The distribution agreements contemplate the commercialization of vehicles and components fabricated by the manufacturer, the rendering of technical assistance relating to such products and the usage by the dealerships of the manufacturers' brand. According to the Ferrari Law, distribution agreements may be executed for either a determined or an undetermined term. In the case of a distribution agreement executed for a determined term, its initial term may not be less than 5 years. At the end of this initial 5 year term, such distribution agreement will be automatically converted into an undetermined term distribution agreement, unless any of the parties thereto expressly waives such right with 180 days prior notice. In the case of an early termination of a distribution agreement other than as a result of a persistent breach or force majeure, the Ferrari law entitles the non-breaching party to, among other things, certain termination payments.

The U.S. economic recession, that began in 2008, caused domestic manufacturers to critically evaluate their respective dealer networks and terminate certain brands, and, as a result, the respective franchises. For example, General Motors chose to discontinue the Pontiac brand and, as a result, both of our Pontiac franchises were terminated. In addition, Ford chose to discontinue the Mercury brand and, as a result, all four of our Mercury franchises were terminated. In each of these cases, state law required the manufacturer to repurchase new car inventory, parts and accessories, and certain tools and signage, but the dealership would still incur costs associated with such termination. Subject to similar future economic factors and material changes to the regulations discussed above, we generally expect our franchise agreements to survive for the foreseeable future and, when the agreements do not have indefinite terms, anticipate routine renewals of the agreements without substantial cost or modification.

Our dealership service departments perform vehicle repairs and service for customers under manufacturer warranties. We are reimbursed for the repairs and service directly from the manufacturer. Some manufacturers offer rebates to new vehicle customers that we are required, under specific program rules, to adequately document, support, and typically collect. In addition, some manufacturers provide us with incentives to order and/or sell certain models and/or volumes of inventory over designated periods of time. Under the terms of our dealership franchise agreements, the respective manufacturers are able to perform warranty, incentive, and rebate audits and charge us back for unsupported or non-qualifying warranty repairs, rebates or incentives.

In addition to the individual dealership franchise agreements discussed above, we have entered into framework agreements in the U.S. with most major vehicle manufacturers and distributors. These agreements impose a number of restrictions on our operations, including our ability to make acquisitions and obtain financing, and on our management. These agreements also impose change of control provisions related to the ownership of our common stock. For a discussion of these restrictions and the risks related to our relationships with vehicle manufacturers, please read "Item 1A. Risk Factors."

The following table sets forth the percentage of our new vehicle retail unit sales attributable to our top five manufacturers in terms of percent of new vehicle retail units sold:

Manufacturer Percentage of New Vehicle Retail Units Sold during the Year Ended December 31, 2018

Toyota	25.2%
Volkswagen	13.4%
BMW	12.0%
Ford	10.9%
Honda	9.7%

Governmental Regulations

Automotive and Other Laws and Regulations

We operate in a highly regulated industry. A number of U.S. state and federal laws and regulations affect our business and the business of our manufacturers. Similar laws and regulations affect our business operations in the U.K. and Brazil, including EU Block Exemption Regulations in the U.K. and the Ferrari Law in Brazil. In every state in which

we operate in the U.S., we must obtain various licenses in order to conduct our businesses, including dealer sales, finance and insurance licenses issued by state regulatory authorities. Numerous laws and regulations govern our conduct of business, including those relating to our sales, operations, financing, insurance, advertising and employment practices. These laws and regulations include franchise

laws and regulations, consumer protection laws, and other extensive laws and regulations applicable to new and used motor vehicle dealers, as well as a variety of other laws and regulations. These laws also include U.S. federal and state wage-hour, anti-discrimination and other employment practices laws.

Our financing activities with customers are subject to U.S. federal truth-in-lending, consumer leasing, and equal credit opportunity laws and regulations, as well as state and local motor vehicle finance laws, installment finance laws, usury laws, and other installment sales laws and regulations. Some states in the U.S. regulate finance fees and charges that may be paid as a result of vehicle sales. Claims arising out of actual or alleged violations of law may be asserted against us, or our dealerships, by individuals or governmental entities and may expose us to significant damages or other penalties, including revocation or suspension of our licenses to conduct dealership operations and fines.

Our U.S. operations are subject to the National Traffic and Motor Vehicle Safety Act, Federal Motor Vehicle Safety Standards promulgated by the United States Department of Transportation and the rules and regulations of various state motor vehicle regulatory agencies. The imported automobiles that we purchase in the U.S. are subject to U.S. customs duties, and in the ordinary course of our business, we may, from time to time, be subject to claims for duties, penalties, liquidated damages or other charges.

Our U.S. operations are subject to consumer protection laws known as Lemon Laws. These laws typically require a manufacturer or dealer to replace a new vehicle or accept it for a full refund within one year after initial purchase, if the vehicle does not conform to the manufacturer's express warranties and the dealer or manufacturer, after a reasonable number of attempts, is unable to correct or repair the defect. U.S. federal laws require various written disclosures to be provided on new vehicles, including mileage and pricing information. We are aware that several states in the U.S. are considering enacting consumer "bill-of-rights" statutes to provide further protection to the consumer which could affect our profitability in such states.

The Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Dodd-Frank Act") established the Consumer Financial Protection Bureau (the "CFPB") with broad regulatory powers. Although automotive dealers are generally excluded from the CFPB's regulatory authority, we are required to comply with regulations applicable to privacy notices, and the CFPB acted to regulate automotive financing activities through its regulation of automotive finance companies and other financial institutions that service the automotive industry. Refer to "We are subject to substantial regulations, which may adversely affect our business and results of operations" of Item 1A. Risk Factors for further discussion of the Dodd-Frank Act and its potential impact on us.

Environmental and Occupational Health and Safety Laws and Regulations

Our operations in the United States as well as the United Kingdom and Brazil involve the use, handling and storage of materials such as motor oil and filters, transmission fluids, antifreeze, refrigerants, paints, thinners, batteries, cleaning products, lubricants, degreasing agents, tires, and fuel. We contract for recycling and/or disposal of used fluids, filters and other waste materials generated by our operations. In the United States, our business is subject to numerous laws and regulations governing management and disposal of materials and wastes, protection of the environment and occupational health and safety. These laws and regulations affect many aspects of our operations, such as requiring the acquisition of permits or other governmental approvals to conduct regulated activities, restricting the manner in which we handle, recycle and dispose of our wastes, requiring capital and operating expenditures to construct, maintain and upgrade pollution control and containment equipment and facilities, imposing specific health and safety criteria addressing worker protection, and imposing substantial liabilities for pollution caused by our operations or attributable to former operations. Failure to comply with these laws and regulations may result in the assessment of sanctions, including administrative, civil and criminal penalties, imposition of investigatory, remedial and corrective action obligations or incurrence of capital expenditures, restrictions, delays or cancellations in permitting or in the performance of projects, and issuance of injunctions delaying, restricting or prohibiting some or all of our operations in affected areas. We may not be able to recover some or any of these costs from insurance.

Most of our dealerships utilize above-ground storage tanks, primarily for storing and dispensing petroleum-based products, and above-ground lifts used to raise vehicles. To a lesser extent, our dealerships use underground storage tanks and in-ground lifts. Storage tanks in the United States are subject to testing, containment, upgrading and removal requirements under the federal Resource Conservation and Recovery Act, or RCRA, and its state law counterparts. Similarly, below ground lifts may contain fluid reservoirs that may leak. RCRA imposes requirements

relating to the handling and disposal of hazardous and non-hazardous wastes and requires us to comply with stringent and costly requirements in connection with our storage and recycling or disposal of the various used fluids, paints, batteries, tires, and fuels generated by our operations. Clean-up or other remedial action may be necessary in the event of leaks or other unauthorized discharges from storage tanks or other equipment operated by us. In addition, water quality protection programs under the Federal Water Pollution Control Act (commonly known as the Clean Water Act) and comparable state and local programs in the United States govern certain wastewater and storm water discharges from our operations, which discharges may require permitting. Similarly, certain sources of air emissions from our operations including, for example, paint booths, may be subject to permitting, monitoring and reporting

requirements, pursuant to the federal Clean Air Act and related state and local laws. Certain health and safety standards imposed under the federal Occupational Safety and Health Act or otherwise promulgated by the Occupational Safety and Health Administration of the U.S. Department of Labor and related state agencies are also applicable to protection of the health and safety of our employees.

We generally conduct environmental studies on dealerships to be acquired regardless of whether we are leasing or acquiring the underlying real property, and as necessary, implement environmental management practices or remedial or corrective actions to reduce the risk of noncompliance with environmental laws and regulations. We currently own or lease, and in connection with our acquisition program anticipate in the future owning or leasing, properties that in some instances have been used for auto retailing and servicing for many years. Laws regarding the prevention of pollution or remediation of environmental contamination generally apply regardless of whether we lease or purchase the land and facilities. Although we, or our predecessors, may have utilized operating and disposal practices that were standard in the industry at the time, a risk exists that petroleum products and wastes such as new and used motor oil, transmission fluids, antifreeze, lubricants, solvents and motor fuels could have been spilled or released on, under or from the properties owned or leased by us or on, or under or from other locations where such materials were taken for recycling or disposal. Further, we believe that structures found on some of these properties may contain asbestos-containing materials, although in an undisturbed condition that requires management in place but does not require removal or other corrective action under applicable regulations. In addition, many of these properties have been operated by third parties whose use, handling and disposal of such petroleum products or wastes were not under our control. In the United States, these properties and the materials transported and disposed from, or released on, them may be subject to the federal Comprehensive Environmental Response, Compensation, and Liability Act (“CERCLA,” also known as the Superfund law), RCRA and analogous state laws in the U.S., pursuant to which we could be required to remove or remediate previously disposed wastes or property contamination or to perform remedial activities to prevent future contamination.

Vehicle manufacturers in the United States are subject to regulations adopted in 2012 by the U.S. Environmental Protection Agency (“EPA”) and the National Highway Traffic Safety Administration (“NHTSA”) that establish greenhouse gas (“GHG”) emissions and corporate average fuel economy (“CAFE”) standards applicable to light-duty vehicles for model years 2017 through 2021. In August 2018, the Department of Transportation (“DOT”) and EPA under the Trump administration proposed the Safer Affordable Fuel-Efficient (“SAFE”) Vehicles Rule. SAFE, if enacted into law, would amend existing CAFE and tailpipe carbon dioxide emissions standards for passenger cars and light-duty trucks and establish new standards covering model years 2021 through 2026. The proposal would retain the model year 2020 standards for both programs through model year 2026.

Legal controls similar to those used in the United States and relating to the management and disposal of materials and wastes, as well as protection of the environment exist in the United Kingdom and Brazil, where we also conduct operations. These legal controls as implemented and enforced in the United Kingdom and Brazil also affect many aspects of our operations in those countries. For example, with regards to the Paris Agreement, the United Kingdom and Brazil each signed that agreement in April 2016. We may incur significant capital expenditures, operational costs and risks of liability and sanction as we seek to comply with those foreign-country environmental legal requirements. In 2018, our supply of some brands of new vehicles in the U.K. experienced significant shortages caused by the introduction of the new Worldwide Harmonised Light Vehicle Test Procedure (“WLTP”) legislation. The WLTP is a global harmonized standard for determining the levels of pollutants and CO₂ emissions, fuel or energy consumption, and electric range from light-duty vehicles (passenger cars and light commercial vans). The tests have been developed by the United Nations Economic Commission for Europe (“UN-ECE”) Working Party on Pollution and Energy (“GRPE”). The WLTP replaces the New European Driving Cycle (“NEDC”) procedure for type approval testing of light-duty vehicles.

For further discussion, please see “Item 1A. Risk Factors”.

U.S. Federal Tax Laws

On December 22, 2017, the U.S. government enacted comprehensive tax legislation commonly referred to as the Tax Cuts and Jobs Act (the “Tax Act”). The Tax Act made broad and complex changes to the U.S. tax code, including, but not limited to, reducing the U.S. federal corporate tax rate from 35 percent to 21 percent, creating a territorial tax

system that generally eliminates U.S. federal income taxes on dividends from foreign subsidiaries, and requiring companies to pay a one-time transition tax on unrepatriated earnings of their foreign subsidiaries.

For further discussion, please see Note 8, "Income Taxes" within our Notes to Consolidated Financial Statements.

Insurance and Bonding

Our operations expose us to the risk of various liabilities, including:

claims by employees, customers or other third parties for personal injury or property damage resulting from our operations;
weather events, such as hail, tornadoes and hurricanes; and
potential fines and civil and criminal penalties resulting from alleged violations of federal and state laws or regulatory requirements.

The automotive retailing business is also subject to substantial risk of real and personal property loss as a result of the significant concentration of real and personal property values at dealership locations. Under self-insurance programs, we retain various levels of risk associated with aggregate loss limits, per claim deductibles and claims handling expenses, including property and casualty, automobile physical damage, and employee medical benefits. In certain cases, we insure costs in excess of our retained risk under various contracts with third-party insurance carriers. Risk retention levels may change in the future as a result of changes in the insurance market or other factors affecting the economics of our insurance programs. Although we believe our insurance coverage is adequate, we cannot assure that we will not be exposed to uninsured losses that could have a material adverse effect on our business, results of operations and financial condition.

We make provisions for retained losses and deductibles by reflecting charges to expense based upon periodic evaluations of the estimated ultimate liabilities on reported and unreported claims. Actuarial estimates for the portion of claims not covered by insurance are based on historical claims experience, adjusted for current trends and changes in claims-handling procedures. The insurance companies that underwrite our insurance require that we secure certain of our obligations for self-insured exposures with collateral. Our collateral requirements are set by the insurance companies and, to date, have been satisfied by posting surety bonds, letters of credit and/or cash deposits. Our collateral requirements may change from time to time based on, among other things, our total insured exposure and the related self-insured retention assumed under the policies. We are subject to potential premium cost fluctuations with the annual renewal of these programs.

Employees

We believe our relationship with our employees is favorable. As of December 31, 2018, we employed 14,570 (full-time, part-time and temporary) people in the U.S., U.K. and Brazil, of whom:

- 1,796 were employed in managerial positions;
- 3,658 were employed in non-managerial vehicle sales department positions;
- 6,848 were employed in non-managerial parts and service department positions; and
- 2,268 were employed in administrative support positions.

In Brazil, all employees are represented by a local union.

Because of our dependence on vehicle manufacturers, we may be affected by labor strikes, work slowdowns and walkouts at vehicle manufacturing facilities and/or their suppliers. Additionally, labor strikes, work slowdowns and walkouts at businesses participating in the distribution of manufacturers' products may also affect us.

For further discussion, please read "Item 1A. Risk Factors."

Seasonality

We generally experience higher volumes of vehicle sales and service in the second and third calendar quarters of each year in the U.S., in the first and third quarters in the U.K. and during the third and fourth quarters in Brazil. This seasonality is generally attributable to consumer buying trends and the timing of manufacturer new vehicle model introductions. The first quarter is generally the weakest in Brazil, driven by heavy consumer vacations and activities associated with Carnival. In addition, in some regions of the U.S., vehicle purchases decline during the winter months due to inclement weather. For the U.K., the first and third calendar quarters tend to be stronger, driven by plate change months of March and September. As a result of all these factors, our consolidated revenues and operating income are typically lower in the first and fourth quarters and higher in the second and third quarters. Other factors unrelated to seasonality, such as changes in economic conditions, inventory availability, manufacturer incentive programs, severe weather events, changes in currency exchange rates or shifts in governmental taxes or regulations may exaggerate seasonal or cause counter-seasonal fluctuations in our revenues and operating income.

For further discussion, please read "Item 1A. Risk Factors".

Internet Website and Availability of Public Filings

Our internet address is www.group1auto.com. We make the following information available free of charge on our internet website:

14

- Annual Report on Form 10-K;
- Quarterly Reports on Form 10-Q;
- Current Reports on Form 8-K;
- Amendments to the reports filed or furnished electronically with the Securities and Exchange Commission (“SEC”) pursuant to Section 13(a) or 15(d) of the Exchange Act;
- Our Corporate Governance Guidelines;
- The charters for our Audit, Compensation, Finance/Risk Management and Nominating/Governance Committees;
- Our Code of Conduct for Directors, Officers and Employees (“Code of Conduct”); and
- Our Code of Ethics for our Chief Executive Officer, Chief Financial Officer and Controller (“Code of Ethics”).

Within the time period required by the SEC and the NYSE, as applicable, we will post on our website any modifications to the Code of Conduct and Code of Ethics and any waivers applicable to senior officers as defined in the Code of Conduct or Code of Ethics, as applicable, as required by the Sarbanes-Oxley Act of 2002. We make our filings with the SEC available on our website as soon as reasonably practicable after we electronically file such material with, or furnish such material to, the SEC. The SEC also maintains an internet website at <http://sec.gov> that contains reports, proxy and information statements, and other information regarding our company that we file and furnish electronically with the SEC.

Item 1A. Risk Factors

Demand for and pricing of our products and services is subject to economic conditions and other factors, which have had and, in the future, could have a material adverse effect on our business and results of operations.

The automotive retail industry, and especially new vehicle unit sales, is influenced by general economic conditions, particularly consumer confidence, the level of personal discretionary spending, interest rates, fuel prices, technology and business model changes, supply conditions, consumer transportation preferences, unemployment rates and credit availability. During economic downturns, retail new vehicle sales typically experience periods of decline characterized by oversupply and weak demand. In addition, periods of economic uncertainty, as well as volatility in consumer preference around fuel-efficient vehicles in response to volatile fuel prices, and concern about manufacturer viability, may adversely impact future consumer spending and result in a difficult business environment. Any tightening of the credit markets and credit conditions may decrease the availability of automotive loans and leases and adversely impact our new and used vehicle sales and margins. In particular, if sub-prime finance companies apply higher credit standards or if there is a decline in the overall availability of credit in the sub-prime lending market, the ability of consumers to purchase vehicles could be limited, which could have a material adverse effect on our business and results of operations.

Volatile fuel prices may also continue to affect consumer preferences in connection with the purchase of our vehicles. Rising fuel prices may make consumers less likely to purchase larger, more expensive vehicles, such as sports utility vehicles or luxury automobiles, and more likely to purchase smaller, less expensive and more fuel efficient vehicles. Conversely, lower fuel prices could have the opposite effect. Sudden changes in customer preferences make maintenance of an optimal mix of large and small vehicle inventory a challenge. Further increases or sharp declines in fuel prices could have a material adverse effect on our business and results of operations.

In addition, local economic, competitive and other conditions affect the performance of our dealerships. Our results of operations depend substantially on general economic conditions and spending habits in those regions of the U.S. where we maintain most of our operations. Since a large concentration of our new vehicle sales are in the states of Texas and Oklahoma for the year ended December 31, 2018 which are dependent upon the oil and gas industry, declines in commodity prices have had and future declines could have an adverse effect on our business and results of operations in those regions.

We are subject to a concentration of risk in the event of financial distress, merger, sale or bankruptcy, including potential liquidation of, or other adverse economic impacts on, certain major vehicle manufacturers.

Toyota, Nissan, Honda, Ford, BMW, Volkswagen, Hyundai, Daimler, FCA US (formerly Chrysler), Jaguar/Land Rover, and General Motors dealerships represented approximately 100.0% of our total new vehicle retail units sold in 2018. In particular, sales of Toyota/Lexus new vehicles represented 25.2% of our new vehicle unit sales in 2018. The

success of our dealerships is dependent on vehicle manufacturers in several key respects. First, we rely exclusively on the various vehicle manufacturers for our new vehicle inventory. Our ability to sell new vehicles is dependent on a vehicle manufacturer's ability to produce and allocate to our dealerships an attractive, high quality, and desirable product mix at the right time in order to satisfy customer demand. Second, manufacturers generally support their franchisees by providing direct financial assistance in various areas, including, among others, incentives, floorplan assistance and advertising assistance. A discontinuation or

change in our manufacturers' warranty and incentive programs could adversely affect our business. Third, manufacturers provide product warranties and, in some cases, service contracts to customers. Our dealerships perform warranty and service contract work for vehicles under manufacturer product warranties and service contracts and we bill the manufacturer directly as opposed to invoicing the customer. In addition, we rely on manufacturers to varying extents for original equipment manufactured replacement parts, training, product brochures and point of sale materials, and other items for our dealerships. Fourth, manufacturers generally offer various financing programs and incentives for our new and used vehicle customers.

Vehicle manufacturers may be adversely impacted by economic downturns or recessions, significant declines in the sales of their new vehicles, increases in interest rates, adverse fluctuations in currency exchange rates, declines in their credit ratings, reductions in access to capital or credit, labor strikes or similar disruptions (including within their major suppliers), supply shortages, rising raw material costs, rising employee benefit costs, adverse publicity that may reduce consumer demand for their products (including due to bankruptcy), product defects, litigation, ability to keep up with technology and business model changes, poor product mix or unappealing vehicle design, governmental laws and regulations, natural disasters, or other adverse events. These and other risks could materially adversely affect the financial condition of any manufacturer and impact its ability to profitably design, market, produce or distribute new vehicles, which in turn could have a material adverse effect on our business, results of operations and financial condition.

We are dependent on our relationships with manufacturers and if we are unable to enter into new franchise agreements in connection with dealership acquisitions or maintain or renew our existing franchise agreements on favorable terms, our operations may be significantly impaired.

We are dependent on our relationships with manufacturers, which exercise a great degree of influence over our operations through the franchise agreements. For example, delays in obtaining, or failing to obtain, manufacturer approvals and franchise agreements for dealership acquisitions could adversely affect our acquisition program. In determining whether to approve an acquisition, manufacturers may consider many factors, including the moral character and business experience of the dealership principals, the financial condition, and ownership structure, as well as Customer Satisfaction Index scores, sales efficiency, and other performance measures of our other dealerships. Manufacturers may use these performance indicators, as well as sales performance numbers, as conditions for certain payments and as factors in evaluating applications for additional acquisitions. In unusual cases where performance indicators, such as the ones described above, are not met to the satisfaction of the manufacturer, certain manufacturers may either limit our ability to acquire additional dealerships or require the disposal of existing dealerships or both. From time to time, we have not met all of the manufacturers' requirements to make acquisitions and have received requests to dispose of certain of our dealerships. In the event one or more of our manufacturers sought to prohibit future acquisitions, or imposed requirements to dispose of one or more of our dealerships, our acquisition and growth strategy could be adversely affected.

A manufacturer may also limit the number of its dealerships that we may own or the number that we may own in a particular geographic area. For example, in the U.S., we may acquire only six primary Lexus dealerships or six outlets nationally. As of December 31, 2018, we owned three primary Lexus dealerships.

In addition, each of our franchise agreements may be terminated or not renewed by the manufacturer for a variety of reasons, including any unapproved changes of ownership or management, sales and customer satisfaction performance deficiencies and other material breaches of the franchise agreements. Manufacturers may also have a right of first refusal if we seek to sell dealerships. We cannot guarantee all of our franchise agreements will be renewed or that the terms of the renewals will be as favorable to us as our current agreements. In addition, we cannot guarantee that our manufacturers will not attempt to terminate our franchise agreements if they perceive that performance deficiencies exist. If such an instance occurs, although we are generally protected by automotive dealership franchise laws requiring "good cause" be shown for such termination, we cannot guarantee that the termination of the franchise will not be successful. Actions taken by manufacturers to exploit their bargaining position in negotiating the terms of renewals of franchise agreements could also have a material adverse effect on our results of operations. Further, the terms of certain of our real estate-related indebtedness require the repayment of all amounts outstanding in the event that the associated franchise is terminated. Our results of operations may be materially and adversely affected to the extent that our franchise rights become compromised or our operations restricted due to the terms of our franchise agreements or

if we lose substantial franchises.

Finally, our franchise agreements do not give us the exclusive right to sell a manufacturer's product within a given geographic area. Subject to state laws in the U.S. that are generally designed to protect dealers, a manufacturer may grant another dealer a franchise to start a new dealership near one of our locations, or an existing dealership may move its dealership to a location that would more directly compete against us. The location of new dealerships near our existing dealerships could have a material and adverse effect on our operations and reduce the profitability of our existing dealerships.

Our inability to acquire new dealerships and successfully integrate those dealerships into our business could adversely affect the growth of our revenues and earnings.

Growth in our revenues and earnings partially depends on our ability to acquire new dealerships and successfully integrate those dealerships into our existing operations. We cannot guarantee that we will be able to identify and acquire dealerships in the future. In addition, we cannot guarantee that any acquisitions will be successful or on terms and conditions consistent with past acquisitions. Restrictions by our manufacturers, as well as covenants contained in our debt instruments, may directly or indirectly limit our ability to acquire additional dealerships. In addition, increased competition for acquisitions may develop, which could result in fewer acquisition opportunities available to us and/or higher acquisition prices. And, some of our competitors may have greater financial resources than us. We will continue to need substantial capital in order to acquire additional automobile dealerships. We currently intend to finance future acquisitions by using cash generated from operations, borrowings under our Acquisition Line, proceeds from debt and/or equity offerings and/or issuing shares of our common stock as partial consideration for acquired dealerships. Access to funding through the debt or equity capital markets could become challenging in the future. Also, in the future, the cost of obtaining money from the credit markets could increase if lenders and institutional investors increase interest rates, enact tighter lending standards, refuse to refinance existing debt at maturity on terms similar to current debt or at all, and reduce or, in some cases, cease to provide funding to borrowers. Accordingly, our ability to complete acquisitions could be adversely affected if the price of our common stock is depressed or if our access to capital is limited.

In addition, managing and integrating additional dealerships into our existing mix of dealerships may result in substantial costs, diversion of our management's attention, delays, or other operational or financial problems.

Acquisitions involve a number of special risks, including, among other things:

- incurring significantly higher capital expenditures and operating expenses;
- failing to integrate the operations and personnel of the acquired dealerships;
- entering new markets with which we are not familiar;
- incurring undiscovered liabilities at acquired dealerships, generally, in the case of stock acquisitions;
- disrupting our ongoing business;
- failing to retain key personnel of the acquired dealerships;
- impairing relationships with employees, manufacturers and customers; and
- incorrectly valuing acquired entities.

These risks could have a material adverse effect on our business, results of operations and financial condition.

Although we conduct what we believe to be a prudent level of investigation regarding the operating condition of the businesses we purchase, in light of the circumstances of each transaction, an unavoidable level of risk remains regarding the actual operating condition of these acquired businesses.

We are subject to substantial regulations, which may adversely affect our business and results of operations.

A number of U.S. state and federal laws and regulations applicable to automotive companies affect our business. Similar laws and regulations affect our business operations in the U.K. and Brazil. We are also subject to laws and regulations relating to business corporations generally. Any failure to comply with these laws and regulations may result in the assessment of administrative, civil, or criminal penalties, the imposition of investigatory remedial obligations or the issuance of injunctions limiting or prohibiting our operations. In every jurisdiction in which we operate, we must obtain various licenses in order to operate our businesses, including dealer, sales, finance and insurance-related licenses issued by government authorities. These laws also regulate our conduct of business, including our advertising, operating, financing, employment and sales practices. Other laws and regulations include state franchise laws and regulations in the U.S., anti-trust laws and other extensive laws and regulations applicable to new and used motor vehicle dealers, as well as U.S. federal and state wage-hour, anti-discrimination and other employment practices laws. Though unsuccessful to date, manufacturers' lobbying efforts may lead to the repeal or revision of U.S. franchise laws. If U.S. franchise laws are repealed in the states in which we operate, manufacturers may be able to terminate our franchises without providing advance notice, an opportunity to cure or showing of good cause. Without the protection of U.S. franchise laws, it may also be more difficult for us to renew our franchise agreements upon expiration. Further, U.S. federal law, including any federal bankruptcy law, may preempt state law in the U.S. and allow manufacturers greater freedom to terminate or not renew franchises. Furthermore, some states have initiated consumer "bill of rights" statutes which involve increases in our costs associated with the sale of vehicles, or decreases in some of our profit centers.

A substantial amount of our business is related to the real estate we own or lease to conduct our various automotive operations. Often times, the success of such automotive operations is dependent upon our ability to locate, and purchase or lease suitable real estate on favorable terms. We are highly dependent upon the availability of real estate in each of our automotive markets. Additionally, real estate we are interested in acquiring will be subject to local municipal laws of county,

township, parish and other local municipalities that often times will govern what type of real estate we can purchase for our various automotive operations. Local ordinances, deed restrictions, zoning and other land use restrictions may prohibit the type of business permitted on a given leased or purchased property which can add to the challenge of locating appropriate real estate. The costs and length of time associated with changing the permitted use of a leased or purchased property may affect our ability to enter a market or expand our operations in an existing market. Our inability to locate, and lease or purchase additional suitable properties to meet the needs of our various automotive operations in multiple markets would adversely affect our business, results of operations and financial condition. Our financing activities with customers are subject to U.S. federal truth-in-lending, consumer leasing and equal credit opportunity laws and regulations, as well as state and local motor vehicle finance laws, installment finance laws, insurance laws, usury laws and other installment sales laws and regulations. Some states in the U.S. regulate finance fees and charges that may be paid as a result of vehicle sales. Claims arising out of actual or alleged violations of law may be asserted against us or our dealerships by individuals or governmental entities and may expose us to significant damages or other penalties, including revocation or suspension of our licenses to conduct dealership operations and fines.

Our operations are also subject to the National Traffic and Motor Vehicle Safety Act, the Magnusson-Moss Warranty Act, Federal Motor Vehicle Safety Standards promulgated by the United States Department of Transportation and various state motor vehicle regulatory agencies. The imported automobiles we purchase are subject to U.S. customs duties and, in the ordinary course of our business, we may, from time to time, be subject to claims for duties, penalties, liquidated damages, or other charges.

Our U.S. operations are subject to consumer protection laws known as Lemon Laws. These laws typically require a manufacturer or dealer to replace a new vehicle or accept it for a full refund within one year after initial purchase if the vehicle does not conform to the manufacturer's express warranties and the dealer or manufacturer, after a reasonable number of attempts, is unable to correct or repair the defect. Federal laws require various written disclosures to be provided on new vehicles, including mileage and pricing information.

In July 2010, the Dodd-Frank Act was signed into law and established the CFPB with broad regulatory powers in the U.S. Although automotive dealers are generally excluded from the CFPB's regulatory authority, we are required to comply with regulations applicable to privacy notices, and the CFPB acted to regulate automotive financing activities through its regulation of automotive finance companies and other financial institutions that service the automotive industry. The CFPB has issued regulatory guidance instructing financial institutions to monitor dealer loans for potential discrimination resulting from the system used to compensate dealers for assisting in the customer financing transaction. The CFPB has instructed lenders that, if discrimination is found, the lender would be required to change dealer compensation practices. If this initiative substantially restricts our ability to generate revenue from arranging financing for our customers for the purchase of vehicles, the result could have an adverse effect on our business and results of operations.

In addition, the Dodd-Frank Act established federal oversight and regulation of derivative markets and entities, such as us, that participate in those markets. The Dodd-Frank Act requires the Commodity Futures Trading Commission ("CFTC") and the SEC to promulgate rules and regulations implementing the Dodd-Frank Act. Although the CFTC has finalized certain regulations, others remain to be finalized or implemented and it is not possible at this time to predict when this will be accomplished.

Pursuant to the Dodd-Frank Act, the CFTC has designated certain interest rate swaps and credit default swaps for mandatory clearing and exchange trading. To the extent we engage in such transactions that are or become subject to such rules in the future, we will be required to comply or to take steps to qualify for an exemption to such requirements. In addition, the Dodd-Frank Act, the CFTC and banking regulators established margin rules for uncleared swaps. Although we believe that we qualify for the end-user exceptions to the mandatory clearing and margin requirements with respect to swaps entered to hedge our commercial risks, the application of such requirements to other market participants, such as swap dealers, may change the cost and availability of the swaps that we use for hedging. If any of our swaps do not qualify for the commercial end-user exception, clearing our transactions or posting of initial or variation margin could impact our liquidity and reduce cash available for capital expenditures, therefore reducing our ability to execute hedges to reduce risk and protect cash flows. In addition, the European Union and other non-U.S. jurisdictions are implementing regulations with respect to the derivatives market.

To the extent we transact with counterparties in foreign jurisdictions, we may become subject to such regulations. At this time, the impact of such regulations is not clear.

The full impact of the Dodd-Frank Act and related regulatory requirements upon our business will not be known until the regulations are implemented and the market for derivative contracts has adjusted. The Dodd-Frank Act and any new regulations could significantly increase the cost of derivative contracts, materially alter the terms of derivative contracts, or reduce our ability to monetize or restructure our existing derivative contracts. If we reduce our use of derivatives as a result of the Dodd-Frank Act and regulations, our results of operations may become more volatile and our cash flows may be less predictable, which could adversely affect our ability to plan for and fund capital expenditures. Any of these consequences

could have a material adverse effect on our financial condition, results of operations and cash available for distributions to our shareholders.

Currently, representatives of both the U.K. and the EU are negotiating an agreement to set forth the terms and conditions for the U.K.'s departure from the EU, following the U.K.'s June 23, 2016 majority vote in favor of Brexit. Any such agreement must be approved by the British Parliament. To date, the British Parliament has not approved an agreement for the U.K. to exit from the EU. The inability of the U.K. and EU to reach such agreement has created uncertainty in the regulatory environment in the U.K. There has been no clear indication of how and when Brexit will occur or how it will ultimately affect the regulatory environment, tariffs, imports, foreign trade, the U.K. economy and, ultimately, our U.K. business operations. But, if legislation related to Brexit results in a material reduction of sales in our U.K. dealerships, such events could have a material adverse effect on our revenues and business operations.

On April 14, 2016, the EU Parliament approved the General Data Protection Regulation (“GDPR”), which organizations were required to comply with by May 25, 2018. GDPR regulations replaced the UK Data Protection Act of 1998 for organizations doing business in the UK. The GDPR applies in all EU member states from May 25, 2018. The GDPR was designed to align data privacy laws across Europe, protect all EU citizens’ data by restricting third parties uses of such data without such individual’s permission, and change the way organizations approach the protection of data and preserving citizen’s privacy. Unlike previous EU data privacy regulations, the GDPR applies to all organizations storing or processing the data of EU citizens, regardless of the location of the company. It provides for strict rules and requirements for EU and non-EU organizations, including requiring organizations to report data breaches within 72 hours and to conduct impact assessments to identify vulnerabilities. Moreover, the GDPR applies a tiered penalty approach, which provides for heavy fines. If an organization seriously infringes the GDPR, the organization can be fined up to 4% of annual global turnover or 20 million euros, whichever is greater. Any future failure by us to comply with the GDPR could have a material adverse effect on our business, results of operations or financial condition. Our U.K. finance operations also arrange for the sale of various contracts for products and services in connection with the sale of new and used vehicles. Those activities in the U.K. are regulated by the Financial Conduct Authority (“FCA”). The FCA is an independent watchdog that regulates financial services of our dealerships. The FCA was created in the wake of the financial crisis as a result of passage of the Financial Services Act of 2012 (the “FSA Act”). The FSA Act sets out a system for regulating financial services in order to protect and improve the U.K.’s economy. Its purpose was to make sure markets work well by confirming that financial services maintain and ensure the integrity of the markets, regulate financial services firms so that they give consumers a fair deal and ensure the financial services market is competitive.

The Patient Protection and Affordable Care Act, signed into law in the U.S. on March 23, 2010, has and may continue to increase our annual employee health care costs that we fund. We cannot predict the extent of the effect that this statute, or any future state or federal healthcare legislation or regulation, will have on us. However, any additional expansion in government’s role in the U.S. healthcare industry could result in significant long-term costs to us, which could in turn adversely affect our business, results of operations and financial condition.

Possible penalties for violation of any of these laws or regulations include revocation or suspension of our licenses and/or civil or criminal fines and penalties. In addition, many laws may give customers a private cause of action. Violation of these laws, the cost of compliance with these laws, or changes in these laws could have a material adverse effect on our business and results of operations.

See also discussion of tariffs, import product restrictions, and foreign trade risks that may impair our ability to sell foreign vehicles profitably under the section subtitled Tariff and Trade Risks below.

Our operations are subject to environmental laws and regulations that may expose us to significant costs and liabilities.

In the course of our operations in the United States, United Kingdom and Brazil, we generate, handle, store and recycle or dispose of various used products and wastes. These business activities are subject to stringent federal, regional, state and local laws, regulations and other controls governing the release of materials into the environment or otherwise relating to environmental protection. These laws, regulations and controls may impose numerous obligations upon our operations including the acquisition of permits to conduct regulated activities, the imposition of restrictions on where or how to manage or dispose of used products and wastes, the incurrence of capital expenditures

to limit or prevent releases of such material, and the imposition of substantial liabilities for pollution resulting from our operations. Failure to comply with these laws, regulations, and permits may result in the assessment of sanctions, including administrative, civil, and criminal penalties, the imposition of investigatory remedial and corrective action obligations or increase of capital expenditures, restrictions, delays and cancellations in permitting or in the performance of projects and the issuance of injunctions limiting or preventing some or all of our operations in affected areas.

There is a risk of incurring significant environmental costs and liabilities in the operations of our automotive dealerships due to our handling of regulated used products and wastes, because of releases arising in the course of our

operations, including from storage tanks and in-ground lifts, and due to contamination arising from historical operations and waste disposal practices, including by predecessor operators or owners over whom we had no control or supervision. We could be subject to joint and several, strict liability for the removal or remediation of previously released materials or property contamination regardless of whether we were responsible for the release or contamination or if the operations were in compliance with all applicable laws at the time those actions were taken. The trend in environmental regulation is to place more restrictions and limitations on activities that may affect the environment, and thus any changes in environmental laws and regulations that result in more stringent and costly requirements with respect to pollution control equipment, waste management and disposal activities, or increased fuel economy and reduced vehicle emissions for light-duty vehicles could have a material adverse effect on our business, results of operation and financial condition. For instance, in the United States pursuant to a 2012 rulemaking, vehicle manufacturers are subject to federal regulations requiring GHG reduction and CAFE standards for light-duty vehicles for model years 2017 through 2025. Comparable laws and regulations apply in the U.K. and Brazil.

Under these regulations in the U.S., most manufacturers are required to modify their vehicle platforms and powertrains to achieve a fleet-wide average fuel efficiency equivalent of 44.7 miles per gallon by model year 2021. However, pursuant to the 2012 joint final rulemaking by the EPA and NHTSA, the EPA was obligated to conduct a mid-term evaluation by no later than April 1, 2018 to determine whether GHG emission standards established for the model years 2017-2025 light-duty vehicles remained appropriate. In January 2017, the EPA Administrator under the Obama Administration signed a final determination that the standards remained appropriate and no changes were necessary. After the inauguration of President Trump, the EPA announced in April 2018 its decision to withdraw the January 2017 midterm evaluation and, in August 2018, the EPA and NHTSA announced a proposed rule that would amend existing GHG and CAFE program standards for passenger cars and light trucks covering model years 2021 through 2026. More specifically, under the proposed rule, the NHTSA is proposing new CAFE standards for model years 2022 through 2026 and amending its 2021 model year CAFE standards, and the EPA is proposing to amend its carbon dioxide emissions standards for model years 2021 through 2025 in addition to establishing new standards for model year 2026. Under the proposed rule, the preferred option of the agencies is to retain the model year 2020 standards for both programs during model years 2021 through 2026, but that option was subject to public comment. Whether the proposed rule will be finalized as initially proposed or with changes to the proposed model year 2021 through 2026 standards, is uncertain at this time. Additionally, the Trump Administration has proposed to preempt the state of California's authority to enforce more stringent vehicle GHG rules, and it remains unclear whether the Administration will continue to pursue this course of action and be successful in its efforts. The existence of uncertainty as to what GHG and CAFE program standards will be authorized for model years 2021 through 2026 as well as whether California or other states may be granted waivers under the Clean Air Act to promote more stringent requirements, which more stringent requirements may or may not be consistent with national standards imposed by the EPA and NHTSA for model years 2021 through 2026, may delay or otherwise adversely affect the ability of vehicle manufacturers to manufacture and make timely delivery of vehicles to operators in the automotive retail industry, such as ourselves, which developments could have a material adverse effect on our business, results of operations and financial condition.

Whereas the CAFE standards are designed to improve vehicle fuel economy in the United States, the GHG standards are based on determinations made by the EPA that emissions of GHGs present an endangerment to public health and the environment because emissions of such gases are, according to the EPA, contributing to warming of the Earth's atmosphere and other climatic changes. Congress and numerous states have from time to time considered and — in the case of some states, adopted — legislation and implementing regulations to restrict GHG emissions. These laws and regulations generally take the form of cap and trade programs, requiring large sources of GHG emissions to purchase allowances or take steps to reduce emissions to comply with the cap. Climate-change legal requirements are also being considered on an international level. For example, in December 2015, the United States joined other countries of the United Nations, at that time, in preparing an agreement requiring member countries to review and establish goals for limiting GHG emissions. This Paris Agreement was signed by the United States, the United Kingdom and Brazil in April 2016 and the agreement entered into force in November 2016. However, this agreement did not create any binding obligations for nations to limit their GHG emissions but, rather includes pledges to voluntarily limit or reduce future emissions. However, in August 2017, the U.S. State Department informed the United Nations of the

intent of the United States to withdraw from the Paris Agreement. The Paris Agreement provides for a four-year exit process beginning when it took effect in November 2016, which would result in an effective exit date of November 2020. The United States' adherence to the exit process and/or the terms on which the United States may re-enter the Paris Agreement or a separately negotiated agreement are unclear at this time. As another example, the U.K. government announced in July 2017 that it would ban the sale of new petrol- and diesel-powered vehicles beginning in 2040. In addition, beginning 2020, new pollution taxes will be levied on diesel drivers who use certain congested highways. The adoption of any laws or regulations requiring significant increases in fuel economy requirements or new federal or state restrictions on emissions of the GHGs on vehicles and automotive fuels in the U.S., the U.K. or Brazil could adversely affect prices of and demand for the vehicles we sell, which could adversely affect our revenues and earnings. The trend in environmental regulation is to often place more restrictions and limitations on activities that may affect the

environment, and thus any changes in environmental laws and regulations that result in more stringent and costly requirements with respect to pollution control equipment, waste management and disposal activities, or increased fuel economy and reduced vehicle emissions for light-duty vehicles could have a material adverse effect on our business, results of operation and financial condition.

Please see “Item 1. Business — Governmental Regulations — Environmental and Occupational Health and Safety Laws and Regulations” for more information.

Final Regulations relating to and interpretations of the Tax Act may vary from our current interpretation of such legislation and could adversely affect our financial position, results of operations and cash flows.

The Tax Act is highly complex and subject to interpretation. The presentation of our financial position and results of operations is based upon our current interpretation of the provisions contained in the Tax Act and available guidance. The U.S. Treasury Department and the Internal Revenue Service are expected to issue final regulations and additional interpretive guidance with respect to the Tax Act. Any significant variance of our current interpretation of such provisions from any future interpretive guidance could adversely affect our financial position, results of operations and cash flows.

If we lose key personnel or are unable to attract additional qualified personnel, our business could be adversely affected because we rely on the industry knowledge and relationships of our key personnel.

We believe our success depends to a significant extent upon the efforts and abilities of our executive officers, senior management and key employees, including our regional vice presidents. The unexpected or unanticipated loss of the services of one or more members of our senior management team could have an adverse effect on our business and impair the efficiency and productivity of our operations. We do not have key man insurance for any of our executive officers or key personnel. In addition, the market for qualified employees in the industry and in the regions in which we operate, particularly for general managers and sales and service personnel, is highly competitive and may subject us to increased labor costs during periods of low unemployment. We do not have employment agreements with our dealership general managers and other key dealership personnel. Accordingly, the inability to retain key employees or the failure to attract qualified personnel could have an adverse effect on our business and may impact the ability of our dealerships to conduct their operations in accordance with our standards.

Substantial competition in automotive sales and services may materially and adversely affect our results of operations due to our need to lower prices to sustain sales.

The automotive retail industry is highly competitive. Depending on the geographic market, we compete with: franchised automotive dealerships in our markets that sell the same or similar makes of new and used vehicles that we offer, occasionally at lower prices than we do;

- other national or regional affiliated groups of franchised dealerships and/or of used vehicle dealerships;
- private market buyers and sellers of used vehicles;
- internet-based vehicle brokers that sell vehicles obtained from franchised dealers directly to consumers;
- auto parts retailers;
- local, regional and national collision centers;
- service center chain stores; and
- independent service and repair shops.

We do not have any cost advantage in purchasing new vehicles from vehicle manufacturers and typically rely on advertising, merchandising, sales expertise, service reputation, product demand and dealership location in order to sell new vehicles. Our franchise agreements do not grant us the exclusive right to sell a manufacturer’s product within a given geographic area. If competing dealerships expand their market share or are awarded additional franchises by manufacturers it could have a material and adverse effect on our business and results of operations.

In addition to competition for vehicle sales, our dealerships compete with franchised dealerships to perform warranty maintenance and repair services and with other automotive dealers, franchised and independent service center chains and independent garages for non-warranty repair and routine maintenance business. Our parts operations compete with other automotive dealers, service stores and auto parts retailers. We believe the principal competitive factors in the parts and service business are the quality of customer service, the use of factory-approved replacement parts, familiarity with a manufacturer’s brands and models, convenience, access to and use of technology required for certain repairs and services, location, price, the competence of technicians and the availability of training programs to

enhance such expertise. A number

21

of regional or national chains offer selected parts and services at prices that may be lower than our dealerships' prices. We also compete with a broad range of financial institutions in arranging financing for our customers' vehicle purchases.

The internet has also become a significant part of the advertising and sales process in our industry. Customers are using the internet as part of the sales process to compare pricing for cars and related finance and insurance services, which may reduce gross profit margins for new and used cars and profits for related finance and insurance services. Some retailers offer vehicles for sale over internet websites without the benefit of having a dealership franchise, although they must currently source their vehicles from a franchised dealer. One or more companies are currently manufacturing electric vehicles for sale solely through the internet without using the traditional dealer-network, and circumventing the state franchise laws of several states in the United States. If more states where we do business eliminate or lessen their laws prohibiting retail sales by non-dealer companies, and if those companies are successful in selling their vehicles without the requirements of establishing a dealer-network, they may be able to have a competitive advantage over the traditional dealers, which could adversely affect our sales in those states. If internet new vehicle sales are allowed to be conducted without the involvement of franchised dealers, or if dealerships are able to effectively use the internet to sell outside of their markets, our business could be materially adversely affected. Our business would also be materially adversely affected to the extent that internet companies acquire dealerships or align themselves with our competitors' dealerships.

Please see "Item 1. Business — Competition" for more discussion of competition in our industry.

A cybersecurity breach, including a breach of personally identifiable information ("PII") about our customers or employees, could negatively affect operations and result in high costs.

There has been a substantial increase in attempts by third parties with bad intentions to steal data from numerous businesses world-wide, including our dealerships, by highly sophisticated means. If a third party is successful in obtaining such confidential information of our dealerships or our customers or disrupting our operations through high-tech security breaches and hacking methods, we could have substantial liability in connection with such security breaches. While we attempt to implement state of the art technological defenses to thwart such activities, there is no guarantee that we will be able to keep up with the ever evolving sophisticated methods of breaching security systems and continue to combat such attempts to breach our own data systems. Failure to do so could ultimately have a material adverse effect on our business operations.

The protection of customer, employee, and our data is critical to our business. The regulatory environment surrounding information security and privacy is increasingly demanding, with the frequent imposition of new and constantly changing requirements across business units. In addition, customers have a high expectation that we will adequately protect their PII from cyber-attack or other security breaches. A significant breach of customer, employee, or our data could attract a substantial amount of media attention, damage our customer relationships and reputation, and result in lost sales, fines, or lawsuits.

In the ordinary course of business, we and our business affiliates receive significant PII about our customers in order to complete the sale or service of a vehicle and related products. We also receive PII from our employees. Numerous state and federal regulations in the U.S., as well as payment card industry and other vendor standards, govern the collection and maintenance of PII from consumers and other individuals. Although many companies across many industries are affected by malicious efforts to obtain access to PII, news reports suggest that the automotive dealership industry is a particular target of identity thieves. Moreover, there are numerous opportunities for a data security breach, including cyber-security breaches, burglary, lost or misplaced data, scams, or misappropriation of data by employees, vendors or unaffiliated third parties. We have spent to date, and will continue to spend, significant resources to combat and protect against cyber-attacks and other forms of security breaches. Despite the security measures we have in place and any additional measures we may implement or adopt in the future, our facilities and systems, and those of our third-party service providers, could be vulnerable to security breaches, computer viruses, lost or misplaced data, programming errors, scams, burglary, human errors, acts of vandalism, or other events. Alleged or actual data security breaches can increase costs of doing business, negatively affect customer satisfaction and loyalty, expose us to negative publicity, individual claims or consumer class actions, administrative, civil or criminal investigations or actions, and infringe on proprietary information, any of which could have a material adverse effect on our business, results of operations or financial condition.

Our business is sensitive to manufacturer recalls, and the effects such recalls have on the reputation of our manufacturers.

Our business is highly dependent on consumer demand and brand preferences of our manufacturer's products. Manufacturer recall campaigns are a common occurrence that have accelerated in frequency and scope over the last several years. Manufacturer recall campaigns could adversely affect our new and used vehicle sales or customer residual trade-in valuations, could cause us to temporarily remove vehicles from our inventory available for sale, could force us to incur increased costs and could expose us to litigation and adverse publicity related to the sale of recalled vehicles, which could have a material adverse effect on our business, sales and results of operations.

The impairment of our goodwill, indefinite-lived intangibles and other long-lived assets has had, and could in the future have, a material adverse effect on our results of operations.

We assess goodwill and other indefinite-lived intangibles for impairment on an annual basis, or more frequently when events or circumstances indicate that an impairment may have occurred. We assess the carrying value of our long-lived assets when events or circumstances indicate that an impairment may have occurred.

Based on the organization and management of our business, we determined that each of our regions represents a reporting unit for the purpose of assessing goodwill for impairment. In evaluating goodwill, we compare the carrying value of our reporting units to their respective fair values. To determine the fair value of our reporting units we use a combination of the discounted cash flow and market approaches. In addition, we evaluate the carrying value of our indefinite-lived, intangible franchise rights at a dealership level using a discounted cash flow based approach. Both these analyses are based upon a series of assumptions. See Part II, "Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations — Critical Accounting Policies and Accounting Estimates — Goodwill" and "Intangible Franchise Rights" for additional information regarding the assumptions that underlie our analysis.

Performance issues at individual dealerships, as well as broader economic and retail automotive industry trends can result in changes to the assumptions in our fair value estimates. In addition, until the full effect of our business practices, scale leverage and other cost savings initiatives can be realized, the carrying value of goodwill and other intangibles associated with an acquisition are generally more subject to impairment in the years immediately following the acquisition. For example, the decline in the Brazilian economy and retail auto industry since our acquisition of the initial Brazil dealerships in March 2013 adversely impacted the results of the impairment test performed in the fourth quarter of 2015. As a result, in our fourth quarter 2015 impairment analysis, we determined that there had been material changes to the previous assumptions underlying the amount of goodwill and/or intangible assets associated with our Brazilian dealerships, and we wrote down the value of those assets, which resulted in a material non-cash impairment charge.

On June 23, 2016, the British Citizens voted on a referendum in favor of exiting the EU. The majority vote in favor of Brexit has created uncertainty in the global markets and in the regulatory environment, tariffs, imports and foreign trade in the U.K., as well as the overall EU. As of January 31, 2019, the British parliament had not yet approved legislation on the terms of the U.K.'s withdrawal from the European Union. The impact on the U.K. economy and our financial results and operations may not be known for some time, but could be adverse. In addition, automotive dealers in the U.K. rely on the legislative doctrine of "Block Exemption" to govern market representation activities of competing dealers and dealer groups. To date, there continues to be no clear indication of how such legislation may be affected by Brexit, but a change to such legislation could be adverse. If, as a result of the clarification of any of these uncertainties, the estimates, assumptions and inputs utilized in our annual impairment test for goodwill and intangible franchise rights change or fail to materialize, the resulting decline in the estimated fair market value of such assets could result in a material non-cash impairment charge. While we are not aware of any changes in circumstances that have resulted in a decline in fair value of these assets at this time, we continue to closely monitor the situation.

We are required to evaluate the carrying value of our long-lived assets at the lowest level of identifiable cash flows. To test the carrying value of assets to be sold, we generally use independent, third-party appraisals or pending transactions as an estimate of fair value. In the event of an adverse change in the real estate market, the resulting decline in our estimated fair value could result in a material non-cash impairment charge to the associated long-lived assets.

Changes in interest rates could adversely impact our results of operations.

Borrowings under our credit facilities and various other notes payable bear interest based on a floating rate. Therefore, our interest expense would increase with any rise in interest rates. A rise in interest rates may also have the effect of depressing demand in the interest rate sensitive aspects of our business, particularly new and used vehicle sales, because many of our customers finance their vehicle purchases. As a result, a rise in interest rates may have the effect of simultaneously increasing our costs and reducing our revenues. To mitigate the impact, we have entered into derivative transactions to convert a portion of our variable-rate debt to fixed rates to partially mitigate this risk. In addition, we receive interest assistance from certain automobile manufacturers, which is reflected as a reduction in cost of sales on our statements of operations. Please see Part II, "Item 7A. Quantitative and Qualitative Disclosures About Market Risk" for a discussion regarding our interest rate sensitivity.

Natural disasters and adverse weather events can disrupt our business.

Some of our dealerships are concentrated in states and regions in the U.S., U.K. and Brazil in which actual or threatened natural disasters and severe weather events (such as hurricanes, earthquakes, snow storms, flooding, and hail storms) have in the past, and may in the future, disrupt our dealership operations. A disruption in our operations may adversely impact our business, results of operations, financial condition and cash flows. In addition to business interruption, the automotive retailing business is subject to substantial risk of property loss due to the significant concentration of property

value at dealership locations. Natural disasters and severe weather events have in the past and may in the future impair the value of our dealership property. Although we have, subject to certain limitations and exclusions, substantial insurance, including business interruption insurance, we may be exposed to uninsured losses that could have a material adverse effect on our business, results of operations and financial condition.

Our insurance does not fully cover all of our operational risks, and changes in the cost of insurance or the availability of insurance could materially increase our insurance costs or result in a decrease in our insurance coverage.

The operation of automobile dealerships is subject to compliance with a wide range of laws and regulations and is subject to a broad variety of risks. While we have insurance on our real property, comprehensive coverage for our vehicle inventory, general liability insurance, workers' compensation insurance, employee dishonesty coverage, employment practices liability insurance, pollution coverage and errors and omissions insurance in connection with vehicle sales and financing activities, we are self-insured for a portion of our potential liabilities. We purchase insurance policies for worker's compensation, liability, auto physical damage, property, pollution, employee medical benefits and other risks consisting of large deductibles and/or self-insured retentions.

In certain instances, our insurance may not fully cover an insured loss depending on the magnitude and nature of the claim. Additionally, changes in the cost of insurance or the availability of insurance in the future could substantially increase our costs to maintain our current level of coverage or could cause us to reduce our insurance coverage and increase the portion of our risks that we self-insure.

Vehicle technology advancements and ownership model changes.

With the advancement in the technology of semi and fully autonomous electric-powered vehicles, several new business models are in early stage development to create high mileage, self-driving and/or co-ownership vehicle opportunities. These autonomous-electric vehicles may be manufactured by existing automotive manufacturers or other companies who do not presently manufacture hydrocarbon or alternative fuel source vehicles. Even with the current highway and road infrastructure challenges and the large number of existing internal combustion engines currently in service and to be in service for many years to come, which will create obstacles to the wide-spread implementation of such autonomous-electric vehicles in the immediate future, many in the automotive industry believe that it will only be a matter of time until such vehicles will be available to the automotive consumer at low usage costs. Such industry participants believe projected low usage costs of autonomous-electric vehicles may entice many vehicle owners, particularly in larger, highly populated areas, to abandon individual car ownership in favor of multiple co-ownership ride-sharing opportunities. If such autonomous-electric vehicles can be mass produced at a reasonable production and operating cost and sold by companies not required to conduct their business in accordance with state franchise laws and thereby circumvent the current dealer-network, and/or if the ride-sharing subscription business model becomes widely popular, such events could adversely affect industry new and used vehicle sales volumes and the growth of our earnings and revenues.

Additionally, with a potential increase in demand by consumers for electric-powered vehicles, our manufacturers will need to adapt their product plans and production capabilities accordingly to meet these demands. As more electric vehicles potentially enter the market, and more combustible engine vehicle production is reduced, our ability to adapt to such changes, particularly in regard to our ability to sell and service these units effectively, will be necessary to meet the consumer demands and support the profitability of our dealerships. Furthermore, while in the short term we do not believe there will be a significant difference in maintenance costs incurred by a vehicle owner of a combustible engine versus maintenance costs of a vehicle owner of a new electric-powered vehicle, that may not be the case as technology advancements are made in the development of electric-powered vehicles. If such maintenance costs by a consumer of an electric-powered vehicle were to substantially decrease, that could have a material adverse effect on our parts and service revenues.

Our indebtedness and the associated covenants could materially adversely affect our ability to obtain additional financing, including for acquisitions and capital expenditures, limit our flexibility to manage our business, prevent us from fulfilling our financial obligations and restrict our use of capital.

Our indebtedness could impact us, in the following ways:

- our ability to obtain additional financing for acquisitions, capital expenditures, working capital or general corporate purposes may be impaired in the future;

-

a portion of our current cash flow from operations must be dedicated to the payment of principal and interest on our indebtedness, thereby reducing the funds available to us for our operations and other corporate purposes; some of our borrowings are and will continue to be at variable rates of interest, which exposes us to the risk of increasing interest rates;

- we may be more leveraged than some of our competitors, which may place us at a relative competitive disadvantage and make us more vulnerable to changing market conditions and regulations; and

during periods of economic downturn, we may be more susceptible to a breach of our debt covenants and default on our indebtedness.

Our debt instruments contain numerous covenants that limit our discretion with respect to business matters, including mergers or acquisitions, paying dividends, repurchasing our common stock, international investments, incurring additional debt or disposing of assets. A breach of any of these covenants could result in a default under the applicable agreement or indenture. In addition, a default under one agreement or indenture could result in a default and acceleration of our repayment obligations under the other agreements or indentures under the cross default provisions in those agreements or indentures. If a default or cross default were to occur, we may be required to renegotiate the terms of our indebtedness, which would likely be on less favorable terms than our current terms and cause us to incur additional fees to process. Alternatively, we may not be able to pay our debts or borrow sufficient funds to refinance them. As a result of this risk, we could be forced to take actions that we otherwise would not take, or not take actions that we otherwise might take, in order to comply with the covenants in these agreements and indentures.

Tariff and Trade Risks

Increased tariffs, import product restrictions, and foreign trade risks may impair our ability to sell foreign vehicles profitably. In May 2018, the Trump Administration threatened to add up to 25% tariffs on foreign vehicles or parts and instructed the U.S. Department of Commerce to begin an inquiry to determine if the importation of foreign vehicles or parts adversely impacts U.S. national security. During the third quarter of 2018, the U.S. Department of Commerce announced that the time line for implementation of tariffs on foreign vehicles will be delayed. An agreement has been drafted between Canada, Mexico and the United States to replace the current North America Free Trade Agreement, which is expected to include potential implementation or elimination of trade tariffs by and among those countries. No formalized treaty has been adopted or ratified by any of the countries' respective governments at this time. No further announcements regarding other trade discussions pertaining to tariffs on foreign vehicles imported or exported by the United States have been made as of the date hereof. Should the U.S. Department of Commerce determine that foreign vehicles imported by one or more countries do pose such a threat or create anti-competitive markets in the United States, the Trump Administration may impose up to 25% tariffs on foreign vehicles and parts. There continues to be substantial uncertainty regarding, among other factors: (i) the ultimate outcome of the implementation and effects of trade tariffs, as well as whether "foreign" vehicles include those made by non-U.S. based manufacturers in the U.S. or parts made outside the U.S. but included in U.S. assembled vehicles; and (ii) the retaliatory response by foreign governments to such trade tariffs. The June 23, 2016 majority vote in favor of Brexit has created uncertainty in the regulatory environment in the U.K. To date, there has been no clear indication of how the Brexit vote will ultimately affect tariffs, imports and foreign trade applicable to the U.K. and, consequently, the U.K. economy and our business operations. Should import tariffs be implemented or increased, we expect the price of many new vehicles we sell to increase and foreign trade depressed, which may adversely affect our new vehicle retail sales revenues and related finance, insurance and other revenues.

We are subject to risks associated with our non-U.S. operations that could have a material adverse effect on our business, results of operations and financial condition.

Over the past several years, we have significantly increased our operations outside the U.S. market. Expanding our operations in the U.K. and Brazil are important elements of our growth strategy. Operations outside of the U.S. are subject to various risks which may not be present or as significant for operations within U.S. markets, and our exposure to these risks increases as we expand. Government actions, both in terms of policy-setting, as well as actions directly affecting our operations, and economic uncertainty in some geographic regions in which we operate, such as emerging markets, could result in the disruption of markets and negatively affect our results of operations and cash flows in those areas.

Risks inherent in our international operations include, but are not limited to:

- exposure to local economic conditions;
- wage inflation in emerging markets;
- social plans that prohibit or increase the cost of certain restructuring actions;
- increases in working capital requirements related to long supply chains or regional terms of business;
- currency exchange controls;
- exposure to currency exchange rate fluctuations;

- variations in protection of legal rights;
- import or export licensing requirements;
- the difficulty of enforcing agreements and collecting receivables through certain foreign legal systems;

- restrictions on transfer or repatriation of funds and trade protection matters, including antidumping duties, tariffs, embargoes and other laws and regulations creating tax inefficiencies and prohibitions or restrictions on acquisitions or joint ventures;
- increased risk of corruption;
- changes in laws and regulations, including the laws and policies of the U.S. affecting trade and foreign investment;
- more expansive legal rights of foreign labor unions;
- the potential for nationalization of enterprises;
- exposure to local public health concerns and the resultant impact on economic and political conditions;
- transparency issues in general and, more specifically, the U.S. Foreign Corrupt Practices Act of 1974, as amended (the “FCPA”), the U.K. Bribery Act, and other anti-corruption compliance laws and issues;
- unsettled social and political conditions, in general, and possible terrorist attacks, drug cartel related violence or acts of war, civil unrest, expansion of hostilities and other political risks; and
- lack of franchise protection, which creates greater competition.

The likelihood of these occurrences and their potential effect on us vary from country to country and are unpredictable. These and other factors may have a material adverse effect on our international operations and, therefore, on our business, results of operations and financial condition, which may become more pronounced as we expand our international presence.

Our Consolidated Financial Statements reflect that our results of operations and financial position are reported in local currency and are converted into U.S. dollars at the applicable currency rate. Fluctuations in such currency rates may have a material effect on our results of operations or financial position as reported in U.S. dollars. Management evaluates the Company’s results of operations on both an as reported and a constant currency basis. See Part II, “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” for additional information on constant currency basis. See Part II, “Item 7A. Quantitative and Qualitative Disclosures About Market Risk — Foreign Currency Exchange Rates” for additional information on foreign currency exchange rate sensitivity.

We may be exposed to liabilities under the FCPA and similar anti-corruption laws, and any determination that we violated such laws could have a material adverse effect on our business.

We are subject to the FCPA, Brazil’s clean company and anti-corruption act, the U.K. anti-bribery act and similar anti-bribery and anti-corruption laws that generally prohibit companies and their personnel and intermediaries from offering, authorizing, or making improper payments to government officials for the purpose of obtaining or retaining business, or securing some improper advantage in business or engaging in conduct involving money-laundering. We do business and may do additional business in the future in countries and regions where strict compliance with anti-bribery laws may not be customary. Our personnel and intermediaries may face, directly or indirectly, corrupt demands by government officials, political parties and officials, tribal or insurgent organizations, or private entities in the countries in which we operate or may operate in the future. As a result, we face the risk that an unauthorized payment or offer of payment could be made by one of our employees or intermediaries, even if such parties are not always subject to our control or are not themselves subject to the FCPA or other anti-bribery laws to which we may be subject. Existing compliance safeguards and any future improvements may not prevent all such conduct, and it is possible that our employees and intermediaries may engage in conduct for which we might be investigated by U.S. and other authorities, and held responsible. Violations of the FCPA and other anti-bribery and other anticorruption laws (either due to our acts or our inadvertence) may result in criminal and civil sanctions and could subject us to other liabilities in the U.S. and elsewhere. Even allegations of such violations could disrupt our business and result in a material adverse effect on our business and operations.

Our growth in emerging markets, such as Brazil, is subject to special risks that could have a material adverse effect on our operations.

In February 2013, we acquired UAB Motors Participações S.A. (“UAB Motors”), which allowed us to enter the Brazilian market. At the time we entered the Brazilian market, it was an emerging growth market. Since then, Brazil experienced a significant economic downturn and has been in the midst of a recession. Since February 2013, Brazil has also experienced significant currency fluctuations. And, while recent data is beginning to show signs of a recovery, there is no assurance that our future growth strategies in Brazil will be successful or that Brazil’s economy will continue its recovery. If the Brazil financial recovery is longer than expected, it could have a material adverse

effect on our business, results of operations and financial condition. See also “We are subject to risks associated with our non-U.S. operations that could have a material adverse effect on our business, results of operations and financial condition.” Further, our growth in emerging markets by acquisition of existing dealerships, such as our acquisition of UAB Motors, is subject to additional risk as

discussed under “Our ability to acquire new dealerships and successfully integrate those dealerships into our business could adversely affect the growth of our revenues and earnings” above.

Certain restrictions relating to our management and ownership of our common stock could deter prospective acquirers from acquiring control of us and adversely affect our ability to engage in equity offerings.

As a condition to granting their consent to our previous acquisitions and our initial public offering, some of our manufacturers have imposed other restrictions on us. These restrictions prohibit, among other things:

- the removal of a non-employee director from office, except for cause;
- any one person or entity, who in the opinion of the manufacturer is unqualified to own its franchised dealership or has interests incompatible with the manufacturer, from acquiring more than a specified percentage of our common stock (ranging from 20% to 50% depending on the particular manufacturer’s restrictions) and this trigger level can fall to as low as 5% if another vehicle manufacturer is the entity acquiring the ownership interest or voting rights;
- certain material changes in our business or extraordinary corporate transactions, such as a merger or sale of a material amount of our assets;
- the removal of a dealership general manager without the consent of the manufacturer; and
- a change in control of our Board of Directors or a change in management.

Our manufacturers may also impose additional similar restrictions on us in the future. Actions by our stockholders or prospective stockholders, which would violate any of the above restrictions, are generally outside our control. If we are unable to comply with or renegotiate these restrictions, we may be forced to terminate or sell one or more franchises, which could have a material adverse effect on our business. These restrictions may prevent or deter prospective acquirers from acquiring control of us and, therefore, may adversely impact the value of our common stock. These restrictions also may impede our ability to acquire dealership groups, to raise required capital or to issue our stock as consideration for future acquisitions.

Our certificate of incorporation, bylaws and franchise agreements contain provisions that make a takeover of us difficult.

Our certificate of incorporation and bylaws could make it more difficult for a third party to acquire control of us, even if such change of control would be beneficial to our stockholders. These include provisions:

- allowing only the Board of Directors to set the number of non-employee directors;
- requiring super-majority or class voting to affect certain amendments to our certificate of incorporation and bylaws;
- limiting the persons who may call special stockholders’ meetings;
- limiting stockholder action by written consent; and
- establishing advance notice requirements for nominations for election to the Board of Directors or for proposing matters that can be acted upon at stockholders’ meetings.

In addition, our certificate of incorporation authorizes us to issue “blank check” preferred stock, the designation, number, voting powers, preferences, and rights of which may be fixed or altered from time to time by our Board of Directors. Accordingly, the Board of Directors has the authority, without stockholder approval, to issue preferred stock with rights that could materially adversely affect the voting power or other rights of the common stockholders or the market value of the common stock and prevent a change of our control.

Finally, certain of our franchise agreements prohibit the acquisition of more than a specified percentage of our common stock without the consent of the relevant manufacturer. These terms of our franchise agreements could also make it more difficult for a third party to acquire control of us.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

We presently lease our corporate headquarters, which is located at 800 Gessner, Suite 500, Houston, Texas, as well as our regional headquarters in Brazil. In addition, as of December 31, 2018, we had 238 franchises situated in 183 dealership locations throughout the U.S., U.K. and Brazil. As of December 31, 2018, we leased 82 of these dealership locations and owned the remainder. We have one location in Massachusetts, one location in Alabama, one location in California, one location in

Texas and two in Brazil where we lease the land, but own the building facilities. These locations are included in the leased column of the table below.

Region	Geographic Location	Dealerships	
		Owned	Leased
United States	Texas	31	26
	Oklahoma	8	5
	Georgia	6	—
	Massachusetts	4	1
	New Jersey	4	—
	Florida	4	—
	Kansas	4	—
	Mississippi	3	—
	South Carolina	3	—
	New Mexico	2	—
	Maryland	2	—
	New Hampshire	2	1
	California	—	5
	Louisiana	3	2
	Alabama	1	1
		77	41
International	United Kingdom	20	27
	Brazil	4	14
Total		101	82

We use a number of facilities to conduct our dealership operations. Each of our dealerships may include facilities for (1) new and used vehicle sales, (2) vehicle service operations, (3) retail and wholesale parts operations, (4) collision business operations, (5) storage and (6) general office use. Prior to 2005, we tried to structure our operations so as to avoid the ownership of real property. Since 2005, we have strategically increased the number of purchased properties particularly in relation to dealership acquisition activity to enhance our flexibility in managing performing and underperforming dealerships and control our costs. As a result, we own 55.2% of our dealership properties as of December 31, 2018, an increase from 53.2% as of December 31, 2017. See Note 19, “Operating Leases”, within the Notes to Consolidated Financial Statements.

Since 2005, Group 1 Realty, Inc., one of our wholly-owned subsidiaries, has typically acquired the property in connection with our U.S. dealership acquisitions and relocations and acts as the landlord for those dealership operations. On a consolidated basis for the year ended December 31, 2018, we acquired \$53.8 million of real estate, of which \$22.4 million was purchased in conjunction with our dealership acquisitions. With these acquisitions, the capitalized value of the real estate used in operations that we own was \$1,141.5 million as of December 31, 2018. Of this capitalized value, \$761.9 million was mortgaged through our real estate related borrowing arrangements. The related mortgage indebtedness outstanding as of December 31, 2018 was \$420.1 million, excluding unamortized debt issuance costs of \$0.6 million.

We do not believe that any single facility is material to our operations and, if necessary, we would obtain a replacement facility.

Item 3. Legal Proceedings

From time to time, our dealerships are named in various types of litigation involving customer claims, employment matters, class action claims, purported class action claims, as well as claims involving the manufacturer of automobiles, contractual disputes and other matters arising in the ordinary course of business. Due to the nature of the automotive retailing business, we may be involved in legal proceedings or suffer losses that could have a material adverse effect on our business. In the normal course of business, we are required to respond to customer, employee and other third-party complaints. Amounts that have been accrued or paid related to the settlement of litigation are included in Selling, General and Administrative expenses (“SG&A”) in our Consolidated Statements of Operations. In

addition, the manufacturers of the vehicles that we sell and service have audit rights allowing them to review the validity of amounts claimed for incentive, rebate or warranty-related items and charge us back for amounts determined to be invalid payments under the manufacturers' programs, subject to our

right to appeal any such decision. Amounts that have been accrued or paid related to the settlement of manufacturer chargebacks of recognized incentives and rebates are included in cost of sales in our Consolidated Statements of Operations, while such amounts for manufacturer chargebacks of recognized warranty-related items are included as a reduction of revenues in our Consolidated Statements of Operations.

We are not party to any legal proceedings, including class action lawsuits that, individually or in the aggregate, are reasonably expected to have a material adverse effect on our results of operations, financial condition or cash flows. However, the results of these matters cannot be predicted with certainty and an unfavorable resolution of one or more of these matters could have a material adverse effect on our results of operations or financial condition.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II

Item 5. Market for Company's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
Our common stock is listed on the New York Stock Exchange under the symbol "GPI." There were 46 holders of record of our common stock as of February 1, 2019. A substantially greater number of holders of our common stock are "street name" or beneficial holders, whose shares are held of record by banks, brokers, and other financial institutions.

Performance Graph

The following performance graph and related information shall not be deemed "soliciting material" or "filed" with the SEC, nor shall such information be incorporated by reference into any future filing under the Securities Act or the Exchange Act except to the extent that we specifically incorporate it by reference into such filing.

The graph compares the performance of our common stock to the S&P 500 Index and to an industry peer group for our last five fiscal years. The members of the peer group are Asbury Automotive Group, Inc., AutoNation, Inc., Lithia Motors, Inc., Penske Automotive Group, Inc. and Sonic Automotive, Inc. The source for the information contained in this table is Zack's Investment Research, Inc.

The returns of each member of the peer group are weighted according to each member's stock market capitalization as of the beginning of each period measured. The graph assumes that the value of the investment in our common stock, the S&P 500 Index and the peer group was \$100 on the last trading day of December 2013, and that all dividends were reinvested. Performance data for Group 1 Automotive, Inc., the S&P 500 Index and for the peer group is provided as of the last trading day of each of our last five fiscal years.

COMPARISON OF 5 YEAR CUMULATIVE TOTAL RETURNS

AMONG GROUP 1 AUTOMOTIVE, INC., S&P 500 INDEX AND A PEER GROUP

TOTAL RETURN BASED ON \$100 INITIAL INVESTMENT & REINVESTMENT OF DIVIDENDS

Measurement Date	Group 1 Automotive, Inc.	S&P 500	Peer Group
December 2013	\$100.00	\$100.00	\$100.00
December 2014	127.32	113.69	118.87
December 2015	108.61	115.26	114.43
December 2016	113.49	129.05	111.10
December 2017	104.82	157.22	112.72
December 2018	79.08	150.33	87.72

Purchases of Equity Securities by the Issuer

The following table provides information about purchases of equity securities that are registered by us pursuant to Section 12 of the Exchange Act during the three months ended December 31, 2018:

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (In thousands, excluding commissions) (1)
October 1 - October 25, 2018 ⁽²⁾	399,872	\$ 62.52	399,872	\$ 18,277
October 26 - October 31, 2018	42,700	\$ 57.53	42,700	\$ 97,543
November 1 - November 30, 2018	580,099	\$ 56.52	580,099	\$ 64,753
December 1 - December 31, 2018	291,115	\$ 51.69	291,115	\$ 49,706
Total	1,313,786	\$ 57.31	1,313,786	

⁽¹⁾ In October 2018, the Board of Directors authorized an increase of the previously authorized repurchase amount that was remaining under the plan to \$100.0 million. Under both the previous and updated authorizations, we repurchased 2,849,652 shares during 2018 at an average price of \$63.75 per share, for a total of \$181.7 million, leaving \$49.7 million available for future repurchases. Future repurchases are subject to the discretion of our Board of Directors after considering our results of operations, financial condition, cash flows, capital requirements, existing debt covenants, outlook for our business, general business conditions and other factors. During the three months ended December 31, 2018, 1,313,786 shares were repurchased for a total cost of \$75.3 million.

⁽²⁾ Shares repurchased under the Rule 10b5-1 trading plan that was effective from October 1, 2018 to October 25, 2018.

Item 6. Selected Financial Data

The following selected historical financial data as of December 31, 2018, 2017, 2016, 2015, and 2014, and for the five years in the period ended December 31, 2018, have been derived from our audited Consolidated Financial Statements. This selected financial data should be read in conjunction with “Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations” and the Consolidated Financial Statements and related notes included elsewhere in this Annual report on Form 10-K.

We account for all of our dealership acquisitions by applying the acquisition method. As a result, we do not include in our financial statements the results of operations of these dealerships prior to the date we acquired them, which may impact the comparability of the financial information presented. Also, as a result of the effects of our acquisitions, dispositions, and other potential factors in the future, the historical financial information described in the selected financial data is not necessarily indicative of our results of operations and financial position in the future or the results of operations and financial position that would have resulted had such transactions occurred at the beginning of the periods presented in the selected financial data.

⁽²⁾ Includes immediately available funds of \$0.1 million, \$22.5 million, \$25.5 million, \$25.5 million, and \$22.5 million as of December 31, 2018, 2017, 2016, 2015, and 2014, respectively, that we temporarily invest as an offset to the gross outstanding borrowings.

⁽³⁾ Includes the 5.00% Notes, 5.25% Notes, 3.00% Notes, 2.25% Notes, Acquisition Line, real estate related and other long-term debt and excludes short-term financing.

⁽⁴⁾ ASU 2014-09, Revenue from Contracts with Customers (Topic 606), was adopted utilizing the modified retrospective method applied to those contracts that were not completed as of January 1, 2018. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with historical accounting policies under Topic 605, Revenue Recognition.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

You should read the following discussion in conjunction with Part I, including the matters set forth in "Item 1A. Risk Factors," and our Consolidated Financial Statements and notes thereto included elsewhere in this Annual Report on Form 10-K.

In the preparation of our financial statements and reporting of our operating results in accordance with United States generally accepted accounting principles ("U.S. GAAP"), certain non-core business items are required to be presented. Examples of items that we consider non-core include non-cash asset impairment charges, gains and losses on dealership, franchise or real estate transactions, and catastrophic events such as hail storms, hurricanes, and snow storms. In order to improve the transparency of our disclosures, provide a meaningful presentation of results from our core business operations and improve period-over-period comparability, we have included certain adjusted financial measures that exclude the impact of non-core business items. These adjusted measures are not measures of financial performance under U.S. GAAP, but are instead considered non-GAAP financial performance measures.

Our results, which are reported in U.S. dollars, are impacted by fluctuations in exchange rates relating to our operations in the U.K. and Brazil. For example, if the British pound sterling were to weaken against the U.S. dollar, our U.K. results of operations would translate into less U.S. dollar reported results. During the twelve months ended December 31, 2018, the British pound sterling strengthened against the U.S. dollar as the average exchange rate increased 3.5% as compared to the same period in 2017 from 0.78 to 0.75. During the twelve months ended December 31, 2018, the Brazilian real weakened against the U.S. dollar as the average exchange rate decreased 14.4% as compared to the same period in 2017 from 3.19 to 3.65. During the twelve months ended December 31, 2017, the British pound sterling weakened against the U.S. dollar as the average rate decreased 4.9%, as compared to the same period in 2016. During the twelve months ended December 31, 2017, the Brazilian real strengthened against the U.S. dollar as compared to the same period in 2016 as the average rate increased 8.5%. As such, management evaluates the Company's results of operations on both an as reported and a constant currency basis. The constant currency presentation, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our underlying business and results of operations, consistent with how we evaluate our performance. We calculate constant currency percentages by converting our current period reported results for entities reporting in currencies other than U.S. dollars using comparative period exchange rates rather than the actual exchange rates in effect during the respective periods. The constant currency performance measures should not be considered a substitute for, or superior to, the measures of financial performance prepared in accordance with U.S. GAAP.

Our management uses these adjusted measures in conjunction with U.S. GAAP financial measures to assess our business, including communication with our Board of Directors, investors and industry analysts concerning financial performance. Therefore, we believe these adjusted financial measures are relevant and useful to users of the following financial information. For further explanation and reconciliation to the most directly comparable U.S. GAAP measures, see "Non-GAAP Financial Measures" below.

Overview

We are a leading operator in the automotive retail industry. Through our dealerships, we sell new and used cars and light trucks; arrange related vehicle financing; sell service and other insurance contracts; provide automotive maintenance and repair services; and sell vehicle parts. Our operations are aligned into three geographic regions: the U.S. Region, the U.K. Region, and the Brazil Region. Our President of U.S. Operations reports directly to our Chief Executive Officer and is responsible for the overall performance of the U.S. region, as well as for overseeing the market directors and dealership general managers. The operations of our two international regions are structured similar to the U.S. region. As such, our three reportable segments are the U.S., which includes the activities of our corporate office, the U.K. and Brazil.

As of December 31, 2018, we owned and operated 238 franchises, representing 30 brands of automobiles, at 183 dealership locations and 47 collision centers worldwide. We own 152 franchises at 118 dealerships and 29 collision centers in the U.S., 63 franchises at 47 dealerships and 11 collision centers in the U.K., and 23 franchises at 18 dealerships and seven collision centers in Brazil. Our operations are primarily located in major metropolitan areas in Alabama, California, Florida, Georgia, Kansas, Louisiana, Maryland, Massachusetts, Mississippi, New Hampshire,

New Jersey, New Mexico, Oklahoma, South Carolina and Texas in the U.S., in 32 towns of the U.K. and in key metropolitan markets in the states of Sao Paulo, Parana, Mato Grosso do Sul and Santa Catarina in Brazil.

Our typical acquisition strategy is to acquire large, profitable, well-established and well-managed dealerships that are leaders in their respective market areas. From January 1, 2014 through December 31, 2018, we have purchased 72 franchises with expected annual revenues, estimated at the time of acquisition, of \$2.8 billion and granted ten new franchises by our manufacturer partners, with expected annual revenues, estimated at the time of acquisition, of \$175.0 million. In 2018, we acquired five U.K. dealerships, inclusive of eight franchises, added one franchise and opened one additional dealership, for one

awarded franchise in the U.K. The Company also acquired four dealerships in the U.S., inclusive of four franchises and opened one additional dealership, representing one additional franchise. In addition, the Company acquired one dealership in Brazil, inclusive of one franchise, and opened one dealership, inclusive of one franchise. The expected aggregate annualized revenues, estimated at the time of acquisition, for these acquisitions, were \$615.0 million. We make disposition decisions based principally on the rate of return on our capital investment, the location of the dealership, our ability to leverage our cost structure, the brand, future capital investments required and existing real estate obligations. From January 1, 2014 through December 31, 2018, we disposed of or terminated 36 franchises with annual revenues of approximately \$1.0 billion. Specifically, during 2018, the Company disposed of two dealerships in the U.S., representing three franchises, terminated one additional franchise in the U.S., disposed of one dealership in the U.K., representing one franchise, and terminated one additional franchise in the U.K., with aggregate annual revenues of approximately \$195.0 million.

We account for our dealership acquisitions by applying the acquisition method of accounting. As a result, we do not include in our financial statements the results of operations of these dealerships prior to the date we acquired them, which may impact the comparability of the financial information presented. Also, as a result of the effects of our acquisitions, dispositions, and other potential factors in the future, our historical financial information is not necessarily indicative of our results of operations and financial position in the future or the results of operations and financial position that would have resulted had such transactions occurred at the beginning of the periods presented. In the following discussion and analysis, we report certain performance measures of our newly acquired and disposed dealerships separately from those of our existing dealerships.

Our operating results reflect the combined performance of each of our interrelated business activities, which include the sale of new vehicles, used vehicles, finance and insurance products, and parts, as well as maintenance and repair business. Historically, each of these activities has been directly or indirectly impacted by a variety of supply/demand factors, including vehicle inventories, consumer confidence, consumer transportation preferences, discretionary spending levels, availability and affordability of consumer credit, manufacturer incentives, weather patterns, fuel prices, and interest rates. For example, during periods of sustained economic downturn or significant supply/demand imbalances, new vehicle sales may be negatively impacted as consumers tend to shift their purchases to used vehicles. Some consumers may even delay their purchasing decisions altogether, electing instead to continue to maintain and repair their existing vehicles. In such cases, however, we believe the new vehicle sales impact on our overall business is mitigated by our ability to offer other products and services, such as used vehicles and parts, as well as maintenance, repair and collision business. In addition, our ability to expediently adjust our cost structure in response to changes in new vehicle sales volumes also tempers any negative impact of such sales volume changes.

According to U.S. industry experts, the annual new light vehicle unit sales for 2018 increased 0.2%, to 17.3 million units as compared to the same period a year ago. The U.K. economy represents the fifth largest economy in the world. Vehicle registrations in the U.K. decreased 6.8% to 2.4 million during 2018 as compared to the same period in 2017. The U.K. industry's new vehicle sales have experienced more volatility than normal following the Brexit vote in 2016. The announcement of Brexit caused significant exchange rate fluctuations that resulted in the weakening of the British pound sterling, in which we conduct business in the U.K., against the U.S. dollar and other global currencies. The weakening of the British pound sterling since the initial Brexit vote has and may continue to adversely affect our results of operations, as well as have a negative impact on the pricing and affordability of the vehicles in the U.K. Volatility in exchange rates is expected to continue in the short term, at least until there is a clear path forward in response to Brexit.

The Brazilian economy represents the eighth largest economy in the world. The Brazilian economy has been in an extended recession, but is starting to show some early signs of recovery. During 2018, new vehicle registrations in Brazil increased 18.2%, to 2.6 million units as compared to the same period in 2017. We expect macro-economic conditions to continue to improve in Brazil. Longer term, we expect sustained improvements in industry sales volumes and are utilizing a strategy of aligning with growing brands, in order to most effectively capitalize on that industry growth.

Key Performance Indicators

On a consolidated basis for the year ended December 31, 2018, our total revenues increased 4.3% from 2017 to \$11.6 billion and gross profit improved 4.8% to \$1.7 billion. For the years ended December 31, 2017 and 2016, total revenues were \$11.1 billion and \$10.9 billion, respectively. For the years ended December 31, 2017 and 2016, gross profits were \$1.6 billion and \$1.6 billion, respectively. We generated net income of \$157.8 million, or \$7.83 per diluted common share, for the year ended December 31, 2018, compared to \$213.4 million, or \$10.08 per diluted share, for the year ended December 31, 2017 and \$147.1 million, or \$6.67 per diluted share, for the year ended December 31, 2016. In addition, the following table highlights additional key performance indicators we use to manage our business:

⁽¹⁾ See "Non-GAAP Financial Measures" for more details.

In addition to the matters described above, the following factors impacted our financial condition and results of operations in 2018, 2017, and 2016:

Year Ended December 31, 2018:

Non-cash Asset Impairments: Due to our determination that the fair value of indefinite-lived intangible franchise rights related to certain of our franchises did not exceed their carrying value, we recorded a \$38.7 million pretax non-cash impairment charge, of which \$38.2 million related to intangible franchise rights in our U.S. reporting unit and \$0.5 million related to intangible franchise rights in our U.K. reporting unit. In addition, primarily in conjunction with dealership disposition activity, an additional \$5.1 million of non-cash asset impairments were recognized, related to real estate and other long-term assets.

Real Estate and Dealership Transactions: We disposed of six franchises: four in the U.S. segment and two in the U.K. segment. Primarily as a result of these dispositions, a net pre-tax gain of \$25.2 million was recognized for the year ended December 31, 2018.

•

Catastrophic Events: Our results were negatively impacted by several catastrophic events. Insurance deductibles and other related expenses totaling \$5.3 million were recognized as SG&A expenses primarily as a result of vehicle damages from hailstorms in the U.S. during the year.

Settlement: We recognized a net pre-tax loss of \$5.0 million associated with legal settlements in our U.S. and Brazil segments.

Year Ended December 31, 2017:

Non-cash Asset Impairments: Due to our determination that the fair value of indefinite-lived intangible franchise rights related to certain of our franchises did not exceed their carrying value, we recorded a \$19.3 million pretax non-cash impairment charge, of which \$12.6 million related to intangible franchise rights in our U.S. reporting unit and \$6.7 million related to intangible franchise rights in our Brazil reporting unit.

Catastrophic Events: Our results were negatively impacted by several catastrophic events. Most significantly, insurance deductibles and other related expenses totaling \$8.8 million were recognized as SG&A expenses and \$6.6 million of chargeback expense reserves associated with finance and insurance revenues were recognized, as a result of vehicle and property damage suffered from Hurricanes Harvey and Irma in the U.S.

OEM Settlement: We recognized a net pretax gain of \$1.1 million associated with the Audi diesel emissions claims settlement, in connection with our ownership of Audi dealerships in the U.S.

Tax Rate Changes: We recognized a tax benefit of \$73.0 million based upon the re-measurement of net deferred tax liabilities associated with the reduction in the corporate income tax rate enacted by the U.S. government, commonly referred to as the Tax Act.

Year Ended December 31, 2016:

Non-cash Asset Impairments: Due to our determination that the fair value of indefinite-lived intangible franchise rights related to certain of our franchises did not exceed their carrying value, we recorded a \$30.0 million pretax non-cash impairment charge, of which \$19.9 million related to intangible franchise rights in our two U.S. reporting units and \$10.1 million related to intangible franchise rights in our Brazil reporting unit. We also recognized a total of \$2.8 million in pre-tax non-cash asset impairment charges related to impairment of various real estate holdings and other long-lived assets.

Catastrophic Events: Our results were negatively impacted by several catastrophic events. Insurance deductibles and other related expenses totaling \$5.9 million were recognized as SG&A expenses as a result of vehicle damage from hailstorms and flooding in the U.S., during the year.

Real Estate and Dealership Transactions: We disposed of ten franchises: five in the U.S. segment, four in the Brazil segment and one in the U.K. segment. Primarily as a result of these dispositions, a net pre-tax gain of \$2.7 million and net pre-tax losses of \$0.8 million and \$0.3 million, respectively, were recognized for the year ended December 31, 2016.

OEM Settlement: We recognized a net pre-tax gain of \$11.7 million associated with the Volkswagen diesel emissions claims settlement, in connection with our ownership of Volkswagen dealerships in the U.S.

Severance Costs: Negatively impacting our results was \$2.0 million of severance costs paid to employees.

Foreign deferred income tax benefit: We recognized a tax benefit of \$1.7 million associated with a dealership disposition in Brazil.

In addition to the key performance indicators presented above, we also reference numerous Same Store metrics as key indicators of results and trends occurring within our business. Those Same Store metrics, results and trends are discussed in more detail in the "Results of Operations" section that follows.

Recent Accounting Pronouncements

Refer to Note 2, "Summary of Significant Accounting Policies and Estimates", within our Notes to Consolidated Financial Statements for a discussion of those most recent pronouncements that impact us.

Critical Accounting Policies and Accounting Estimates

The accounting policies and estimates that we believe to be the most difficult, subjective and complex include those related to: revenue recognition, goodwill, intangible franchise rights, income taxes, fair value of assets acquired and liabilities assumed, derivative financial instruments and self-insured medical, property and casualty reserves. The preparation of our financial statements in conformity with U.S. GAAP requires management to make certain estimates and assumptions, including those associated with the difficult, subjective and complex areas described above. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the balance sheet date and the amounts of revenues and expenses recognized during the reporting period.

We analyze our estimates based on our historical

37

experience and various other assumptions that we believe to be reasonable under the circumstances. However, actual results could differ from such estimates.

For example, if any of our assumptions change, or fail to materialize, in a negative manner, the resulting decline in its estimated fair market value of intangible franchise rights could result in a material non-cash impairment charge. To illustrate, we performed two separate sensitivity analyses on its 2018 annual impairment assessment of goodwill and intangible franchise rights. If our assumptions regarding the risk-free rate and cost of debt differed such that the estimated WACC used in its 2018 assessment increased by 200 basis points, and all other assumptions remained constant, an additional \$25.8 million of non-cash franchise rights impairment charges would have resulted, excluding franchises acquired since the previous annual test. This additional impairment would have consisted of \$23.5 million in the U.S. and \$2.3 million in the U.K. In this sensitivity scenario, all Regions passed the Step One goodwill impairment test. Our second sensitivity analysis represented a recessionary sales environment that assumes the U.S. SAAR dips to levels experienced in 2009, or a SAAR of 10.5 million units, in 2020 from a forecasted SAAR in 2019 of 16.8 million and marginally rebounds to a SAAR of 13.5 million units in 2023. The recessionary case includes similar adjustments to the forecast assumptions relative to the U.K. Region for the periods 2020 through 2022. Relative to Brazil, the recessionary case forecasted sales to be flat in 2020 and 2021 at 2.45 million units, and increase to 2.55 million units in years 2022 and 2.65 million units in 2023. In this second sensitivity analysis, an additional \$42.9 million of non-cash franchise rights impairment charges would have resulted, including \$40.3 million and \$2.6 million for the U.S. and the U.K., respectively. In this scenario, none of the Company's reporting units would have failed the step one impairment test for goodwill.

In addition, we receive commissions from finance and insurance providers, under the terms of its contracts with such providers, for the arrangement of vehicle financing and the sale of service and other insurance products. We may be charged back for unearned financing, insurance contract or vehicle service contract fees in the event of early termination of the contracts by customers. A reserve for future amounts estimated to be charged back is recorded, as a reduction of Finance, insurance and other revenue, net in the accompanying Consolidated Statement of Operations, based on our historical chargeback results and the termination provisions of the applicable contracts. While chargeback results vary depending on the type of contract sold, a 10% increase in the historical chargeback experience used in determining estimates of future amounts that might be charged back would have increased the reserve at December 31, 2018 by \$4.6 million.

Further, at least annually, we engage a third-party actuary to conduct a study of the exposures under the self-insured portion of our worker's compensation and general liability insurance programs for all open policy years. In the interim, we review the estimates within the study and monitors actual experience for unusual variances. The appropriate adjustments are made to the accrual, based upon these procedures. Actuarial estimates for the portion of claims not covered by insurance are based on historical claims experience adjusted for loss trending and loss development factors. Changes in the frequency or severity of claims from historical levels could influence our reserve for claims and our financial position, results of operations and cash flows. A 10% increase in the actuarially determined estimate of aggregate future losses would have increased the reserve for these losses at December 31, 2018, by \$1.9 million. See Note 2, "Summary of Significant Accounting Policies and Estimates", within our Notes to Consolidated Financial Statements, for further discussion of these accounting policies and estimates that are of particular importance to the portrayal of our financial position, results of operations and cash flows.

Results of Operations

The "Same Store" amounts presented below include the results of dealerships for the identical months in each period presented in the comparison, commencing with the first full month in which the dealership was owned by us and, in the case of dispositions, ending with the last full month it was owned by us. For example, for a dealership acquired in June 2017, the results from this dealership will appear in our Same Store comparison beginning in 2018 for the period July 2018 through December 2018, when comparing to July 2017 through December 2017 results. Depending on the periods being compared, the dealerships included in Same Store will vary. For this reason, the 2017 Same Store results that are compared to 2018 differ from those used in the comparison to 2016. Same Store results also include the activities of our corporate headquarters.

The following table summarizes our combined Same Store results for the year ended December 31, 2018 as compared to 2017 and for the year ended December 31, 2017 compared to 2016.

Edgar Filing: GROUP 1 AUTOMOTIVE INC - Form 10-K

⁽¹⁾ The Scion brand was discontinued by Toyota during the third quarter of 2016.

Our new vehicle business is influenced by general economic conditions, consumer confidence, interest rates, fuel prices, supply conditions, relative attractiveness of our brand portfolio, consumer transportation preferences, unemployment rates and credit availability, as well as the level of manufacturer incentives. The level of retail sales, as well as our own ability to retain or grow market share during any future period, is difficult to predict.

Year Ended December 31, 2018 compared to 2017

In total, our Same Store new vehicle retail unit sales decreased 5.9% for the year ended December 31, 2018, as compared to the same period in 2017. The decrease was driven by decreases of 4.8%, 11.1%, and 0.3% in the U.S., U.K., and Brazil, respectively. Our Same Store U.S. new vehicle unit sales decrease was primarily driven by difficult prior year comparisons in our Houston and Beaumont markets, reflecting strong replacement demand during the tail end of 2017 following Hurricane Harvey, which damaged hundreds of thousands of vehicles in the region. The impacted Houston and Beaumont markets experienced a combined decline of 10.9% versus 2017. Further contributing to the 4.8% decrease in Same Store U.S. new vehicle unit sales was an overall decline in new vehicle retail demand in the industry compared to 2017. Our Same Store U.S. new vehicle retail unit sales, excluding Houston and Beaumont, declined 2.5% against the same prior year period, generally in line with an industry decline in retail unit sales of 2.0% for 2018. Our Same Store U.K. new vehicle unit sales decrease of 11.1% was driven by supply constraints and lingering uncertainties around Brexit. The supply constraints stemmed from delays by various OEM partners in passing the new WLTP emissions standards that became effective on September 1, 2018 that, in conjunction with the impact of Brexit uncertainty on consumer confidence, drove the 6.8% decline in total U.K. industry sales for 2018 as compared to the same period last year. Sales of our brands were disproportionately affected by the inventory constraints resulting from WLTP emissions standards testing, especially our Audi models which declined 25.3% from 2017 levels. In Brazil, as the result of ongoing economic recovery, industry sales increased 13.7%. Our brand mix did not suffer as large of declines during the recession and did not have the same rebound in 2018 as the general market. In addition, we made an operational decision to prioritize margin over volume growth. As a result, we realized a 0.3% decline in our Same Store new vehicle retail unit sales.

Our total Same Store revenues from new vehicle retail sales decreased 4.4% for the year ended December 31, 2018, as compared to the same period in 2017, driven by declines in the U.S., U.K., and Brazil, respectively. The 3.1% decrease in U.S. Same Store new vehicle revenue was primarily due to the decline in new vehicle retail units of 4.8% noted above, but was partially offset by a 1.9% increase in average retail sales price to \$38,118. The increase in our

U.S. Same Store average retail sales price for the year ended December 31, 2018 was primarily a result of the continuing mix shift in sales from cars to trucks. U.S. new vehicle retail truck sales represented 65.5% of total Same Store new vehicle retail units sold for the year ended December 31, 2018, as compared to 61.1% for the same period last year. Our U.K. Same Store new vehicle revenues declined 8.8% for the twelve months ended December 31, 2018 as compared to 2017, primarily explained by the decline of 11.1% in

new vehicle retail unit sales in the U.K., partially offset by an increase in the average new vehicle sales price of 2.6%, which is explained by a change in exchange rates between periods. On a constant currency basis, U.K. average new vehicle sales price declined 0.9%, mostly explained by a temporary brand mix change due to supply constraints affecting relatively higher-value Audi sales. Our Brazil Same Store new vehicle revenues declined 9.0%, which was more than explained by the change in the exchange rate between periods. On a constant currency basis, our Brazil Same Store new vehicle revenues increased 3.6%, as a 3.8% increase in average retail sales price on a constant currency basis, more than offset the 0.3% decline in new vehicle retail units noted above.

Our total Same Store new vehicle gross profit decreased 7.2% for the year ended December 31, 2018, as compared to the same period in 2017, reflecting declines in the U.S. and U.K., that were partially offset by an increase in Brazil. In the U.S., Same Store new vehicle gross profit declined 7.5%, as the 4.8% decline in unit sales was compounded by a 2.8% decrease in gross profit per retail unit (PRU). The decrease in gross profit PRU was primarily driven by the impact on 2017 of temporarily inflated new vehicle gross profit PRU due to replacement demand in the aftermath of Hurricane Harvey at the end of that year. Same Store new vehicle gross profit in the U.K. decreased 8.7%, primarily explained by the decline in new vehicle retail unit sales, partially offset by a 2.7% increase in gross profit PRU. In Brazil, Same Store new vehicle gross profit rose 3.1% for the year ended December 31, 2018 compared to 2017. On a constant currency basis, Brazil same store new vehicle gross profit and gross profit PRU increased 18.0% and 18.3%, respectively, as compared to the same period in 2017, driven by our efforts to prioritize margins. Our total Same Store new vehicle gross margin declined 10 basis points to 5.1% for the year ended December 31, 2018, as compared to 5.2% for the same period in 2017. The decline was driven by the 20 basis point decrease in the U.S. to 4.9% from 5.1% for the same period a year ago.

Year Ended December 31, 2017 compared to 2016

In total, our Same Store new vehicle retail unit sales decreased 1.5% for the year ended December 31, 2017, as compared to the same period in 2016. The decrease was primarily driven by decreases of 1.7% and 6.8% in the U.S. and Brazil, respectively. The decline in our U.S. new vehicle retail unit sales was in line with the overall U.S. industry sales which decreased by 1.9% to 17.2 million units for the year ended December 31, 2017 from 17.5 million units in 2016. Our new vehicle unit sales were depressed by softness in our energy-dependent markets, such as Oklahoma and Texas. This softness was partially offset by replacement demand in our Houston and Beaumont markets following flooding from Hurricane Harvey that damaged hundreds of thousands of vehicles in the region. In addition, our U.S. new vehicle sales volume lagged the prior year as our operating team placed a heightened focus on improving new vehicle margins, resulting in lower unit sales volume. We experienced a 6.8% decline in our Same Store new vehicle retail unit sales in Brazil, which was weaker than the overall industry. This decline reflected our intentional efforts to prioritize margins over volume. Partially offsetting the declines in the U.S. and Brazil was a 1.1% increase in our U.K. Same Store new vehicle retail unit sales for the year ended December 31, 2017 compared to a year ago. This increase was despite a decline in industry sales in the U.K. of 5.7% to 2.5 million units for the year ended December 31, 2017, down from 2.7 million units in 2016. The strong performance in the U.K. compared to 2017 industry results is primarily attributable to our brand portfolio and management team.

Our total Same Store revenues from new vehicle retail sales increased 0.2% for the year ended December 31, 2017, as compared to the same period in 2016, driven by increases in the U.S. and Brazil that were partially offset by a decline in the U.K. The 0.4% increase in U.S. Same Store new vehicle revenue was primarily due to a 2.1% increase in average retail sales price to \$37,483, which was partially offset by the decline in new vehicle retail units of 1.7% noted above. The increase in our U.S. Same Store average retail sales price for the year ended December 31, 2017 was primarily a result of our operating team's focus on improving new vehicle margins noted above and a mix shift in sales from cars to trucks, which was driven by continued relatively low gas prices, as well as an increase in the demand for trucks in the hurricane impacted markets of the U.S. during the second half of 2017. U.S. new vehicle retail truck sales represented 61.0% of total Same Store new vehicle retail units sold for the year ended December 31, 2017, as compared to 56.9% for the same period last year. Our Brazil Same Store new vehicle revenues increased 6.0%, which was more than explained by the change in the exchange rate between periods. On a constant currency basis, our Brazil Same Store new vehicle revenues declined 2.2%, as a 5.0% increase in the average retail sales price was more than offset by the 6.8% decline in new vehicle retail units noted above. The increases in total Same Store new vehicle retail

revenues in the U.S. and Brazil were partially offset by a 2.5% decline in our U.K. Same Store new vehicle revenues for the twelve months ended December 31, 2017 as compared to 2016. The increase of 1.1% in new vehicle retail unit sales in the U.K. was more than offset by the deterioration in the average new vehicle sales price of 3.6%. This decline is more than explained by the change in exchange rates between periods as on a constant currency basis, new vehicle revenue per retail unit increased 1.1% when compared to the same period a year ago.

Our total Same Store new vehicle gross profit decreased 0.1% for the year ended December 31, 2017, as compared to the same period in 2016, reflecting declines in the U.K. that were almost fully offset by increases in the U.S. and Brazil. In the U.S., Same Store new vehicle gross profit increased 0.7%, as the decline in retail units discussed above was more than offset by

a 2.5% increase in gross profit PRU to \$1,919, which was driven by the operating team's initiatives to improve new vehicle margin and the additional demand in our Houston and Beaumont markets as a result of the impact of Hurricane Harvey. As noted above, the U.S. gross profit PRU was further bolstered by increased demand for trucks across the U.S. In Brazil, Same Store new vehicle gross profit rose 6.5% for the year ended December 31, 2017. The increase in gross profit in Brazil is more than explained by a favorable change in exchange rates. On a constant currency basis, Same Store new vehicle gross profit decreased 1.7%, as compared to the same period in 2016, as a 6.8% decrease in Same Store new vehicle retail units outpaced a 5.5% increase in gross profit per retail unit on a constant currency basis. Same Store new vehicle gross profit in the U.K. decreased 5.3%, primarily explained by a decline in gross profit PRU of 6.3% to \$1,705. The decline in gross profit PRU was partially explained by the change in exchange rates between periods and the mix in volume-based manufacturer incentives as compared to last year. Our total Same Store new vehicle gross margin remained unchanged at 5.2% for the year ended December 31, 2017, as compared to the same period in 2016.

Most manufacturers offer interest assistance to offset floorplan interest charges incurred in connection with inventory purchases. This assistance varies by manufacturer, but generally provides for a defined amount, adjusted periodically for changes in market interest rates, regardless of our actual floorplan interest rate or the length of time for which the inventory is financed. We record these incentives as a reduction of new vehicle cost of sales as the vehicles are sold, impacting the gross profit and gross margin detailed above. The total assistance recognized in cost of sales during the twelve-month periods ended December 31, 2018, 2017, and 2016 was \$47.3 million, \$48.9 million, and \$49.2 million, respectively. The amount of interest assistance that we recognize in a given period is primarily a function of: (a) the mix of units being sold, as U.S. domestic brands tend to provide more assistance, (b) the specific terms of the respective manufacturers' interest assistance programs and market interest rates in effect at the time, (c) the average wholesale price of inventory sold, and (d) our rate of inventory turnover. Over the past three years, manufacturers' interest assistance as a percentage of our total consolidated floorplan interest expense has ranged from approximately 77.1% of our quarterly floorplan interest expense in the fourth quarter of 2018 to 116.6% for the third quarter of 2016. In the U.S., manufacturer's interest assistance was 87.8% of floorplan interest expense for the year ended December 31, 2018.

We increased our new vehicle inventory levels by \$84.2 million, or 7.1%, from \$1,194.6 million as of December 31, 2017 to \$1,278.9 million as of December 31, 2018, primarily as a result of a shift to more costly truck and SUV inventory in addition to relatively low inventory levels at the end of 2017 following strong replacement demand in the wake of Hurricane Harvey. Our consolidated days' supply of new vehicle inventory was 66 days as of December 31, 2018, which is up from 61 days on December 31, 2017.

In addition to factors such as general economic conditions and consumer confidence, our used vehicle business is affected by the level of manufacturer incentives on new vehicles and new vehicle financing, the number and quality of trade-ins and lease turn-ins, the availability of consumer credit, and our ability to effectively manage the level and quality of our overall used vehicle inventory.

Year Ended December 31, 2018 compared to 2017

Our total Same Store used vehicle retail revenues increased \$188.7 million, or 6.8%, for the twelve months ended December 31, 2018, as compared to 2017, reflecting a 7.8% increase in total Same Store used vehicle retail unit sales partially offset by a 0.9% decrease in average used vehicle retail selling price to \$21,316. On a regional basis, Same Store used vehicle retail revenues improved 5.3% and 15.0% in the U.S. and U.K., respectively, that was partially offset by a 5.8% decrease in Brazil. In the U.S., Same Store used vehicle retail revenues increased \$114.1 million, or 5.3%, reflecting an 8.8% increase in Same Store used vehicle retail unit sales partially offset by a 3.2%, or \$683, decrease in Same Store average used vehicle retail sales price to \$20,629. The improvements in Same Store used vehicle retail unit sales were driven by the launch of Val-U-Line® during the first quarter of 2018. Val-U-Line® is a proprietary brand for older model, higher mileage, pre-owned vehicles that targets customer demand for lower cost units. Selling those units at retail keeps them from going to auction and allows us to yield more total gross profit via additional reconditioning work and finance and insurance income. Our Val-U-Line® products were approximately 10% of U.S. Same Store used vehicle retail units for the twelve months ended December 31, 2018. The decrease in the U.S. Same Store average used vehicle retail sales price also reflected the launch of our Val-U-Line® brand that shifted the mix of units sold, specifically lower-priced units, from wholesale to retail sales. In addition, absolute U.S. CPO volumes declined 0.5%, while U.S. CPO mix decreased 240 basis points, on a percentage of total retail units sold, to 24.8% of our total used vehicle retail unit sales for the year ended December 31, 2018, as compared to 27.2% for the same period in 2017. In the U.K., Same Store used vehicle retail revenues increased by \$79.8 million, or 15.0%, for the year ended December 31, 2018 as compared to the same period last year. The increase in Same Store used vehicle retail revenue was driven by a 9.7% increase in Same Store average used vehicle retail sales price, coupled with a 4.8% increase in Same Store used vehicle retail unit sales in the U.K., reflecting strong performance by our operating team that focused on growing the used vehicle portion of our business as an offset to the decline in U.K. new vehicle unit sales. In Brazil, for the twelve months ended December 31, 2018, Same Store used vehicle retail revenues decreased 5.8%, reflecting a 5.9% decline in Same Store average used vehicle retail selling price. The decline in Same Store used vehicle retail revenue and Same Store average used vehicle retail selling price can be more than explained by the unfavorable change in exchange rates between periods. On a constant currency basis, Brazil Same Store used vehicle retail revenue and average used vehicle retail selling price increased 6.9% and 6.8%, respectively, as compared to the same period last year. These increases reflect improved market conditions, inventory management initiatives, and ongoing process improvements.

In total, our Same Store used vehicle retail total gross profit for the year ended December 31, 2018, decreased 1.0%, compared to the same period in 2017, reflecting declines in the U.S. and Brazil that were partially offset by an improvement in the U.K. In the U.S., Same Store used vehicle gross profit decreased by 3.3%, driven by a decline in Same Store used vehicle gross profit PRU of 11.1%, or \$158, partially offset by an increase in Same Store used vehicle retail unit sales of 8.8%. The decline in our U.S. Same Store used vehicle gross profit PRU was primarily the result of the growth in our Val-U-Line® brand that focuses on moving more of our lower valued used vehicles to retail customers versus selling at auction. As described below, improved wholesale profitability more than offset this deterioration. In Brazil, the 21.7% decrease in Same Store used vehicle retail gross profit resulted from a 21.7% decline in Same Store used vehicle retail gross profit PRU, as we strategically sacrificed margin to manage inventory levels. The decrease in Same Store used retail gross profit PRU was also impacted by an unfavorable exchange rate between periods as, on a constant currency basis, our Brazil used vehicle retail gross profit and gross profit PRU declined 11.1% and 11.2%, respectively. As a partial offset to the declines in the U.S. and Brazil, the U.K. Same Store used vehicle retail gross profit increased 16.6% for the year ended December 31, 2018, as compared to the same period last year. This improvement can be explained by an increase of 11.2% in Same Store used vehicle gross profit PRU, coupled with the 4.8% increase in Same Store used vehicle retail unit sales. The increase in Same Store used vehicle retail unit sales was the result of heightened used vehicle demand reflecting supply constraints on many new

vehicle models as a result of the WLTP legislation as well as a strong performance by our operating team. During the twelve months ended December 31, 2018, total Same Store used vehicle wholesale revenue decreased 15.0%, as compared to the same period in 2017, driven by a decline in the U.S. and partially offset by increases in the U.K. and Brazil. In the U.S., the 29.8% decrease in Same Store used vehicle wholesale revenue for the year ended December 31, 2018, was the result of a 20.0% decrease in used wholesale vehicle unit sales, coupled with a 12.3% decrease in Same Store used vehicle wholesale average sales price. The decline in both was primarily driven by the success of our Val-U-Line® initiative, which was launched in the first quarter of 2018 to sell more of our older model, higher mileage vehicles through retail channels and lower our reliance on the auction markets, leaving the relatively lower valued units to be sold in the auction markets. In the U.K., Same Store used vehicle wholesale revenue increased 8.1%, which was driven by an 8.0% increase in Same Store used vehicle wholesale average sales price on relatively flat Same Store wholesale used vehicle unit sales. The increase in Same Store used vehicle wholesale average sales price was due to the brand mix of vehicles sold at auction as compared to last year.

In Brazil, Same Store used vehicle wholesale revenue increased 30.1%, primarily as a result of a 43.3% increase in Same Store wholesale unit sales, as we focused on faster inventory turns. This was partially offset by a 9.2% decrease in Same Store wholesale used vehicle average sales price. The decline in Same Store wholesale used vehicle average sales price was the result of an unfavorable change in exchange rates as, on a constant currency basis, our Brazil Same Store used vehicle average wholesale price increased 4.6%.

Our total Same Store used vehicle wholesale gross profit increased 191.9% from a loss of \$2.6 million for the year ended December 31, 2017, to a profit of \$2.4 million for the comparable period in 2018 driven by an increase in the U.S. and partially offset by decreases in the U.K. and Brazil. The increase in the U.S. primarily reflects lower reliance on the used vehicle wholesale markets and, in addition, was positively impacted by the 4.7% increase in average market prices during the period as reflected in the Manheim Index. In the U.K., the decline in Same Store used vehicle wholesale gross profit was driven by a decrease in Same Store used vehicle wholesale gross profit per unit from a loss of \$61 for the twelve months ended December 31, 2017 to a loss of \$109 for the same period in 2018. In Brazil, the 26.5% decline in Same Store used vehicle wholesale gross profit was driven by a decrease in Same Store used vehicle wholesale gross profit per unit of 48.7% for the twelve months ended December 31, 2018 as compared to the same period last year, partially offset by an increase of 43.3% in Same Store used vehicle wholesale unit sales as a result of our efforts to manage inventory levels.

Year Ended December 31, 2017 compared to 2016

Our total Same Store used vehicle retail revenues decreased \$28.8 million, or 1.1%, for the twelve months ended December 31, 2017, as compared to 2016, reflecting a 1.8% decrease in total Same Store used vehicle retail unit sales partially offset by a 0.7% increase in average used vehicle retail selling price to \$21,594. In the U.S., Same Store used vehicle retail revenues decreased \$70.9 million, or 3.2%, reflecting a 3.7% decrease in Same Store used vehicle retail unit sales partially offset by a 0.6%, or \$120, increase in Same Store average used vehicle retail sales price. The decline in Same Store used vehicle retail unit sales was driven by a 5.1% decline in sales in our energy dependent markets of Texas and Oklahoma. While Hurricane Harvey replacement demand lifted our used vehicle retail unit sales in certain U.S. markets for the fourth quarter of 2017, it was not enough to fully offset the impact of depressed oil prices in those markets for the full year. Our U.S. Same Store CPO volume decreased 1.6% to 27,345 units sold for the twelve months ended December 31, 2017, as compared to the same period in 2016. As a percentage of total U.S. Same Store used vehicle retail unit sales, CPO units increased 60 basis points to 27.2% for the year ended December 31, 2017 as compared to the same period in 2016. In the U.K., Same Store used vehicle retail revenues increased 6.8% for the year ended December 31, 2017 as compared to same period in the prior year. This increase in Same Store used vehicle retail revenue was driven by an 8.7% increase in Same Store used vehicle retail unit sales, partially offset by a 1.8% decrease in Same Store average used vehicle retail sales price to \$22,809. The decline in the U.K. Same Store used vehicle average sales price was more than explained by the change in exchange rates between periods, as on a constant currency basis, Same Store average used vehicle retail sales price increased 3.3%. The increase in used vehicle retail unit sales and average used vehicle retail sales price in the U.K. was primarily driven by a strong performance from our operating team, as well as the road tariff that went into effect in April 2017 that lowered associated taxes on used vehicles relative to new vehicles, shifting consumer demand towards used vehicles. In Brazil, for the twelve months ended December 31, 2017, Same Store used vehicle retail revenues increased 19.0% as compared to 2016, reflecting a 15.5% increase in the average used vehicle retail selling price, coupled with 3.0% increase in Same Store used vehicle retail unit sales. This improvement reflects an increased focus by our operations team and enhanced processes that are being implemented.

In total, our Same Store used vehicle retail total gross profit for the year ended December 31, 2017, decreased 4.2%, compared to the same period in 2016, reflecting a decline in the U.S. that was partially offset by improvements in the U.K. and Brazil. In the U.S., Same Store used vehicle gross profit decreased by 6.6%, driven by the unit decline discussed previously, coupled with a decrease in Same Store used vehicle gross profit PRU of 3.1%, or \$45. In the U.K., Same Store used vehicle retail gross profit increased 3.7%, reflecting an improvement of 8.7% in Same Store used vehicle retail unit sales partially offset by a 4.6% decrease in Same Store used vehicle gross profit PRU. This decline in gross profit PRU is more than explained by the change in the exchange rate between periods as on a constant currency basis, Same Store used vehicle gross profit PRU in the U.K. increased 0.8% over the same

comparable period. The increases in the U.K. were primarily a result of improving used vehicle demand and a strong performance by our operating team. In Brazil, the increase of 43.1% in Same Store used vehicle retail gross profit resulted from the increase of 39.0% and 3.0% in the Same Store used vehicle retail gross profit PRU and unit sales, respectively. The improvement in Brazil is primarily a result of increased focus on used vehicle operations and the implementation of new and improved sales processes by our local operating team.

During the twelve months ended December 31, 2017, total Same Store used vehicle wholesale revenue decreased 4.6%, as compared to the same period in 2016, driven by declines in the U.S. and U.K., which were partially offset by an increase in Brazil. In the U.S., the 8.7% decrease in Same Store used vehicle wholesale revenue for the year ended December 31, 2017, was the result of a 7.3% decrease in used wholesale vehicle unit sales coupled with 1.5% decrease in Same Store used vehicle wholesale average sales price. The decline in U.S. used vehicle wholesale unit sales volume was primarily driven by the execution of strategic initiatives designed to sell more vehicles through retail channels and reduce our reliance on the wholesale

auction markets. In the U.K., Same Store used vehicle wholesale revenue declined 2.9%, more than explained by the change in exchange rates between periods. On a constant currency basis, Same Store used vehicle wholesale sales in the U.K. improved 1.9%, as the increase in unit sales outpaced a 1.0% decline in Same Store used vehicle wholesale average sales price. In Brazil, Same Store used vehicle wholesale revenue increased primarily as a result of an improvement in Same Store used vehicle wholesale average sales price, coupled with a 6.7% increase in Same Store wholesale used vehicle unit sales.

Our total Same Store used vehicle wholesale gross profit improved 37.2% from a loss of \$3.9 million for the year ended December 31, 2016, to a loss of \$2.4 million for the comparable period in 2017. This improvement was driven by a \$24 improvement in our Same Store used vehicle wholesale gross profit per unit from a loss of \$70 per unit for the twelve months ended December 31, 2016, to a loss of \$46 per unit for the same period this year, coupled with a decrease in total Same Store used vehicle wholesale units of 4.4%. In the U.S., Same Store used vehicle wholesale gross profit improved 17.3% for the year ended December 31, 2017, primarily as a result of a 9.6% improvement in Same Store wholesale gross profit per unit from a loss of \$73 for the year ended 2016 to a loss of \$66 for the comparable period in 2017, coupled with a 7.3% decrease in used vehicle wholesale units from the same period. The improvement in used vehicle wholesale gross profit for the year ended 2017, corresponds with a 3.6% increase in the Same Store used vehicle average market prices during 2017, as reflected in the Manheim index. In the U.K., the 25.9% improvement in profitability was driven by a 28.2% improvement in Same Store used vehicle gross profit per unit, from a loss of \$78 for the twelve months ended December 31, 2016 to a loss of \$56 for the same period in 2017, which was partially offset by a 3.0% increase in Same Store used vehicle wholesale units as compared to the same period in 2016. In Brazil, the increase in Same Store used vehicle wholesale gross profit for the year ended 2017, was driven by the increase in Same Store used vehicle wholesale gross profit per unit coupled with a 6.7% increase in Same Store used vehicle wholesale units.

As of December 31, 2018, our used vehicle inventory levels totaled \$350.2 million and were flat when compared to December 31, 2017. Our consolidated days' supply of used vehicle inventory remained constant at 39 days as of December 31, 2018, when compared to the same period last year.

Year Ended December 31, 2018 compared to 2017

Our total Same Store parts and service revenues increased 2.8% to \$1,359.5 million for the year ended December 31, 2018, as compared to the same period in 2017, more than explained by growth in the U.S. and U.K., but partially offset by a decline in Brazil. For the twelve months ended December 31, 2018, our U.S. Same Store parts and service revenues increased 2.2%, or \$24.2 million, reflecting a 4.5% increase in customer-pay parts and service revenues and a 5.0% increase in wholesale parts revenues, partially offset by a 3.7% decline in warranty parts and service revenues and a 0.2% decline in collision parts and service revenues, when compared to the same period in 2017. The growth in our customer-pay parts and service revenue in the U.S. was supported by continued implementation of numerous aftersales initiatives, including the rollout of a 4 day work week service schedule that has increased capacity in a significant number of our service departments, by allowing us to improve our recruiting and retention efforts with our service technician and service advisor professionals. The increase in wholesale parts revenues was primarily due to increased focus and better overall management of this portion of our business in a few key markets. The decline in warranty parts and service revenue in the U.S. was driven by a wind-down of two major recall campaigns: the Takata

airbag recall campaign that stretched across several brands and a large dashboard replacement campaign for Toyota and Lexus brands. The decline in collision parts and service revenue can be partially attributed to the spike in collision repair activity in the aftermath of Hurricane Harvey, which impacted some of our most densely populated regions. Our U.K. Same Store parts and service revenues increased 9.5%, or \$15.4 million in 2018, as compared to 2017. On a constant currency basis, U.K. Same Store parts and service revenues increased 6.1%, representing a 6.0% increase in customer-pay revenues, a 10.0% increase in warranty parts and service revenues, a 10.5% increase in wholesale parts revenues, partially

offset by a 7.0% decline in collision parts and service revenues for the year ended December 31, 2018, as compared to the same period a year ago. The increase in customer-pay revenue was due to the strategic expansion of service capacity in several of our service departments, as well as the implementation of improved processes and procedures within recent dealership acquisitions. The improvement in our wholesale parts revenue was primarily the result of initiatives executed to enhance our sales processes and increase productivity. Our increase in warranty parts and service revenues was primarily due to an increase from several recall campaigns and expanded capacity in several service departments.

Our Same Store parts and service revenues in Brazil declined 5.6%, or \$2.6 million, in 2018 compared to 2017, driven by fluctuations in foreign exchange rates between periods. On a constant currency basis, Same Store parts and service revenues in Brazil increased 7.5%, driven primarily by an increase of 9.8% in customer pay parts and service revenues and a 12.5% increase in warranty parts and service revenue, partially offset by a 7.5% decrease in collision parts and service revenues.

Our total Same Store parts and service gross profit for the year ended December 31, 2018 increased 2.0%, as compared to the same period in 2017. The increase in gross profit was driven by a 7.0% increase in the U.K. and a 1.5% increase in the U.S. that was partially offset by an 8.1% decline in Brazil. The increase in the U.S. reflects continued efforts to improve our processes and increase aftersales capacity. The increase in the U.K. was driven by further assimilation of recent acquisitions and implementation of enhanced policies and procedures. In Brazil, the decline was more than explained by fluctuations in foreign currency exchange rates between periods. On a constant currency basis, Same Store parts and service gross profit increased 4.6%, primarily reflecting the implementation of new and enhanced processes.

Our total Same Store parts and service gross margin declined 40 basis points for the year ended December 31, 2018 as compared to the same period in 2017. The decrease in gross margin was driven by a 30 basis point decline in the U.S., a 130 basis point decline in the U.K., and a 120 basis point decline in Brazil. The decline in the U.S. primarily reflects a relative strengthening of our relatively lower-margin wholesale parts business compared to our relatively higher-margin warranty parts and service business for the year ended December 31, 2018 as compared to the same period in 2017. The decline in the U.K. primarily reflects a decrease in internal work between our parts and service departments of our dealerships and the new and used vehicle departments, as a result of a decline in total retail vehicle sales volumes for the year ended December 31, 2018 as compared to the same period in 2017, as well as a deterioration of our margins in our collision business. The decline in Same Store parts and service gross margin in Brazil was primarily explained by a shift in mix of business, as a high volume of relatively lower-margin recall campaigns, particularly in our Honda brand dealerships, surpassed the growth in our customer-pay parts and service revenue.

Year Ended December 31, 2017 compared to 2016

Our total Same Store parts and service revenues increased 5.1% to \$1,302.8 million for the year ended December 31, 2017, as compared to the same period in 2016, more than explained by growth in all three regions, with currency changes a partial offset. For the twelve months ended December 31, 2017, our U.S. Same Store parts and service revenues increased 5.3%, or \$56.3 million, reflecting a 9.8% increase in warranty parts and service revenues, a 4.9% increase in wholesale parts revenues, a 3.8% increase in collision parts and service revenues, and a 3.8% increase in customer-pay parts and service revenues, when compared to the same period in 2016. The growth in our warranty and customer-pay parts and service revenue in the U.S. was supported by the continued progress we are making in adding service technicians and advisors, expanding shop capacity where applicable, and improving accessibility via better customer contact handling and expanded hours. In addition, the increase in warranty parts and service revenue in the U.S. was driven by high volume recall campaigns within our Nissan, Ford, and Lexus brands. The increase in collision revenue was primarily attributable to the continued addition of technicians to increase operating capacity, as well as the expansion of our collision facilities and direct repair programs with insurance companies.

Our U.K. Same Store parts and service revenues increased 0.2%, or \$0.3 million. On a constant currency basis, U.K. Same Store parts and service revenues increased 5.0%, representing a 10.0% increase in warranty parts and service revenues, a 5.9% increase in collision parts and service revenues, a 4.7% increase in wholesale parts and service revenues and a 2.9% increase in customer-pay parts and service revenues for the year ended December 31, 2017, as

compared to the same period a year ago. Our increase in warranty parts and service revenues was primarily due to an increase in recalls from BMW and Audi during 2017. Additionally, the growth in collision revenues in the U.K. was primarily a result of management initiatives to enhance processes and increase productivity.

Our Same Store parts and service revenues in Brazil increased 16.0%, or \$6.3 million, primarily driven by an increase of 37.6% in warranty revenues, a 17.9% increase in collision revenues and a 12.2% increase in customer-pay parts and service revenues, partially offset by a strategic decision to exit the wholesale parts business in Brazil at the end of 2016.

Our total Same Store parts and service gross profit for the year ended December 31, 2017 increased 4.6%, as compared to the same period in 2016. The increase in gross profit was driven by a 4.0% increase in the U.S., a 31.0% increase in Brazil and

a 3.7% increase in the U.K. In Brazil, on a constant currency basis, Same Store parts and service gross profit increased 21.1%, primarily reflecting improvements in our warranty parts and service revenue due to an implementation of new and enhanced processes. The increase in the U.S. was driven by growth in each of our parts and service business sectors, primarily reflecting continued efforts to improve our processes. The increase in the U.K. was driven by improvements in our warranty parts and service revenue, primarily due to an increase in high volume recalls within our BMW and Audi brands as noted above.

Our total Same Store parts and service gross margin declined 30 basis points, for the year ended December 31, 2017 as compared to the same period in 2016. The decrease in gross margin was driven by a 70 basis point decline in the U.S., partially offset by improvements in Brazil and the U.K. The decline in the U.S. primarily reflects a decrease in internal work between parts and service departments of our dealerships and the new and used vehicle departments, as a result of a decline in total retail vehicle sales volumes for the year ended December 31, 2017 as compared to the same period in 2016. The improvement in Same Store parts and service gross margin in Brazil was the result of improved profitability in our warranty parts and service, wholesale parts, and customer-pay parts and service businesses as a result of strategic initiatives implemented by our operating team. The improvement in the U.K. is a result of improved internal work and higher labor rates charged on customer-pay and warranty parts and service sales.

Year Ended December 31, 2018 compared to 2017

Our efforts to improve our finance and insurance business processes have continued to generate growth across all three regions. Our total Same Store finance and insurance revenue increased by \$22.3 million, or 5.3%, to \$446.1 million for the year ended December 31, 2018, as compared to the same period in 2017. In the fourth quarter of 2018, the Company reversed the remaining \$1.1 million of the \$6.6 million reserve that was estimated and recognized in the third quarter of 2017, in association with expected finance and insurance product cancellations on vehicles sold by the Company and damaged by flooding from Hurricane Harvey. After adjusting for the impact of this reserve activity related to Hurricane Harvey in both periods, our adjusted total Same Store finance and insurance revenue increased \$14.7 million, or 3.4%, to \$445.1 million for the year ended December 31, 2018 compared to 2017. Our adjusted U.S. Same Store finance and insurance revenue grew \$12.2 million, or 3.2%, primarily driven by a 1.2% increase in Same Store retail unit sales and higher income per contract in our vehicle service contracts and retail finance fees, but was partially offset by a decline in our penetration rates for our retail finance fees, GAP insurance and other U.S. product offerings. In the U.K., our Same Store finance and insurance revenue increased \$2.2 million, or 5.1%, for the year ended December 31, 2018, as compared to 2017, reflecting improvements in our income per contract and penetration rates for most of our U.K. product offerings and more than offsetting a 4.7% decline in Same Store retail unit sales. Our Brazil Same Store finance and insurance revenue increased 4.2%, or \$0.3 million, for the year ended December 31, 2018, as compared to 2017, despite an unfavorable change in exchange rates between periods. On a constant currency basis, our Same Store finance and insurance revenues increased 19.7%, primarily as a result of an increase in commissions on fleet sales for our BMW, Honda, and Toyota brands and improvements in our income per contract and penetration rates on our retail finance fees. Our total Same Store finance and insurance revenue PRU increased

5.3% for the year ended December 31, 2018, to \$1,493, as compared to the same period in 2017. On an adjusted basis, our total Same Store finance and insurance revenue PRU improved 3.5% to \$1,490, as compared to 2017. The improvement reflects increases in PRU for all of our segments as compared to last year.

Year Ended December 31, 2017 compared to 2016

Our total Same Store finance and insurance revenue increased by \$3.9 million, or 0.9%, to \$417.9 million for the year ended December 31, 2017, as compared to the same period in 2016. After adjusting for \$6.6 million in chargeback expense for reserves associated with expected finance and insurance product cancellations on vehicles sold by the Company and damaged by flooding from Hurricane Harvey, our adjusted total Same Store finance and insurance revenue increased \$10.4 million, or 2.5%, to \$424.5 million for the year ended December 31, 2017. All of our segments generated improvements compared to the same period in 2016. Our adjusted U.S. Same Store finance and insurance revenue grew \$6.0 million, or 1.6%, as increases in income per contract and penetration rates for most of our major U.S. product offerings were partially offset by a 2.6% decline in our U.S. retail unit sales volume and an increase in our chargeback experience. In the U.K., our Same Store finance and insurance revenue increased \$2.2 million, or 6.1%, for the year ended December 31, 2017, as compared to 2016, primarily related to improvements in income per contract for our retail finance and vehicle service contract fees coupled with a 3.9% growth in total retail sales volume. The increases in the U.K. finance and insurance revenue were partially offset by declines in finance fee penetration rates and an increase in chargeback expense. Our Brazil Same Store finance and insurance revenue increased 39.1%, or \$2.3 million, for the year ended December 31, 2017, as compared to 2016. This improvement was related to increases in penetration rates and income per contract for our retail finance fees and also reflects an increase in vehicle insurance revenue. For the year ended December 31, 2017, our total Same Store finance and insurance revenue PRU increased 2.6% to \$1,443, as compared to the same period in 2016. On an adjusted basis, our total Same Store finance and insurance revenue PRU improved 4.1% to \$1,465, as compared to 2016. The improvement can be explained by increases in PRU for all of our segments as compared to last year.

⁽¹⁾ See “Non-GAAP Financial Measures” for more details.

Our SG&A consists primarily of salaries, commissions and incentive-based compensation, as well as rent and facility costs, advertising, insurance, benefits, utilities and other fixed expenses. We believe that the majority of our personnel, all of our advertising and a portion of certain other expenses are variable and can be adjusted in response to changing business conditions. We continue to aggressively pursue opportunities that take advantage of our size and negotiating leverage with our vendors and service providers in order to more effectively rationalize our cost structure. Year Ended December 31, 2018 compared to 2017

Our total Same Store SG&A increased \$15.3 million, or 1.3%, for the year ended December 31, 2018 as compared to the same period in 2017, explained by increases of 5.8% and 0.6% in the U.K. and the U.S., respectively, but partially offset by a decrease in Brazil of 1.3%. After adjusting for 2018 non-core Same Store SG&A charges of \$6.4 million for deductible charges related to catastrophic events and \$4.2 million in losses related to legal settlements, partially offset by a \$2.4 million gain related to dealership disposition activities and similar types of non-core items in 2017 (see “Non-GAAP Financial Measures” for more details), our adjusted total Same Store SG&A increased \$16.3 million,

or 1.4%, for the year ended December 31, 2018, as compared to the same period in 2017.

Our total Same Store personnel costs increased \$18.9 million, or 2.5%, for the year ended December 31, 2018, as compared to the same period in 2017, explained by increases of 3.1%, and 3.2% in the U.S. and the U.K., respectively, but partially offset by a decrease of 12.8% in Brazil. The increase in the U.S. is primarily related to variable commission payments, as a result of improved sales in Same Store retail used vehicle, and incremental headcount for increased service advisor capacity in the parts and service businesses, as well as the growth in U.S. Same Store total gross profit. The increase in the U.K. is a result of changes in foreign currency exchange rates between periods, as the personnel costs remained flat on a constant currency basis. The decrease in Brazil is related to continued efforts to rationalize cost and enhance our operating efficiency.

For the year ended December 31, 2018, our total Same Store advertising costs decreased 2.8% to \$71.3 million, explained by a decrease of 3.7% in the U.S., which was partially offset by increases of 3.3% and 17.8% in the U.K. and Brazil, respectively. The decrease in the U.S. is the result of efforts to rationalize and enhance the efficiency of our advertising spend, as well as capitalize on our size and negotiating leverage. The increase in the U.K. is due to changes in foreign currency exchange rates between periods, as advertising costs were essentially flat on a constant currency basis for the year ended December 31, 2018 when compared to 2017. The increase in Brazil is primarily the result of initiatives designed to grow our used vehicle and parts and service businesses.

Our consolidated Same Store rent and facility costs decreased 1.4% to \$107.6 million, explained by decreases of 6.3% and 9.2% in the U.S. and Brazil, respectively, which were partially offset by an increase of 21.8% in the U.K. The decrease in the U.S. is primarily attributable to our continued strategic efforts to own the real estate associated with our dealerships, thereby reducing rent expense. The decline in Brazil relates to changes in foreign currency exchange rates between periods, as on a constant currency basis, Same Store rent and facility costs in Brazil increased 3.2%. The increase in the U.K. was primarily related to septennial property rate adjustments that occurred in 2017, as well as additional rental costs associated with new and/or enhanced dealership facilities.

Our total Same Store other SG&A remained flat for the year ended December 31, 2018, as compared to the same period in 2017. There were increases of 5.4% and 24.6% in the U.K. and Brazil, respectively, that were offset by a decrease of 2.6% in the U.S. The decrease in the U.S. was primarily the result of the execution of strategies designed to rationalize and more efficiently control our variable costs. U.S. Same Store other SG&A for the year ended December 31, 2018 included non-core charges of \$6.4 million related to costs associated with catastrophic events and \$1.3 million in legal costs that were partially offset by a non-core gain of \$2.4 million related to real estate and dealership transactions. Non-core charges included in U.S. Same Store other SG&A for the comparable period of 2017 included \$8.8 million in costs associated with catastrophic events and \$0.8 million in losses on real estate and dealership transactions that was partially offset by a \$1.1 million gain related to legal settlements. The increase in Brazil for the year ended December 31, 2018, was primarily driven by a non-core charge of \$2.9 million related to legal settlements.

Our total Same Store SG&A as a percentage of gross profit for the year ended December 31, 2018, as compared to 2017, increased 20 basis points to 74.5%, reflecting increases of 220 basis points and 160 basis points in the U.K. and Brazil, respectively, that was partially offset by a 20 basis point improvement in the U.S. On an adjusted basis, total Same Store SG&A as a percentage of gross profit increased 50 basis points to 74.0% compared to the same period in 2017, reflecting a 40 basis point and 230 basis point increase in the U.S. and U.K., respectively, that was partially offset by a 320 basis point decline in Brazil.

Year Ended December 31, 2017 compared to 2016

Our total Same Store SG&A increased \$33.9 million, or 3.0%, for the year ended December 31, 2017, as compared to the same period in 2016, explained by increases of 2.2%, 18.9% and 3.8% in the U.S., Brazil and the U.K., respectively. After adjusting for non-core Same Store SG&A charges of \$8.8 million for deductible charges related to catastrophic events, \$0.8 million in losses related to real estate and dealership disposition transactions, \$0.5 million associated with severance costs and \$0.3 million of costs related to dealership acquisition activities, partially offset by a \$1.1 million gain associated with legal settlements and similar types of non-core items in 2016, our adjusted total Same Store SG&A increased 2.1% for the year ended December 31, 2017, as compared to the same period in 2016. Our total Same Store personnel costs increased \$13.4 million, or 1.8%, for the year ended December 31, 2017, as compared to the same period in 2016, explained by increases of 24.8%, 0.7% and 3.8% in Brazil, the U.S. and the

U.K., respectively. The increase in Brazil was primarily explained by increases in variable commission payments as a result of a 12.2% increase in revenues and profitability across our business sectors. The increase in Same Store personnel costs in the U.S. was primarily explained by an increase in variable commission payments relative to the growth in our parts and service business and improved retail new vehicle gross profit, largely driven by the high demand in our Houston and Beaumont markets, as a result of the impact of Hurricane Harvey, as well as the impact of non-core charges for disaster pay for our employees who were impacted by Hurricanes Harvey and Irma. The increase in total Same Store personnel costs in the U.K.

primarily relates to an increase in variable costs largely driven by an overall improvement in the profitability of our used vehicle and parts and service businesses.

For the year ended December 31, 2017, our total Same Store advertising costs decreased 3.4%, to \$71.4 million, explained by decreases of 2.9%, 5.8% and 24.3% in the U.S., the U.K. and Brazil, respectively. The decreases in both the U.S. and U.K. are the result of initiatives to control costs in response to the overall decline in sales in the retail automotive industry. The decrease in Brazil can also be explained by management's cost rationalization efforts through most of 2017.

Our total Same Store rent and facility costs increased 0.3% to \$104.5 million for the year ended December 31, 2017, as compared to the same period in 2016, reflecting increases of 17.0% and 2.1% in Brazil and the U.K., respectively, substantially offset by a decrease of 1.6% in the U.S. The increase in Brazil resulted from additional rent expense incurred following annual increases in rental rates during 2017. The increase in the U.K. was more than explained by an increase in property taxes, as well as rent expense, associated with new facilities. The decrease in the U.S. can be explained by management's strategy to own more real estate, thereby reducing rent costs, and ongoing initiatives to control costs, partially offset by an increase associated with non-core charges for building and property damage as a result of Hurricanes Harvey and Irma.

Our total Same Store other SG&A increased 9.5% to \$264.2 million for the year ended December 31, 2017, as compared to the same period in 2016, explained by increases of 10.1%, 5.8% and 11.8% in the U.S., the U.K. and Brazil, respectively. The increase in the U.S. can be partially attributed to the non-core charges for vehicle damage as a result of Hurricane Harvey. The increases in the U.K. and Brazil were primarily explained by increases in expenses that generally correlate to the overall growth in gross profit of 6.6% and 16.4%, respectively, on a constant currency basis.

For the year ended December 31, 2017, as compared to the same period in 2016, our total Same Store SG&A as a percentage of gross profit increased 90 basis points to 73.8% primarily driven by 170 and 80 basis point increases in the U.K. and U.S., respectively. Offsetting these increases, our Same Store SG&A as a percentage of gross profit in Brazil improved 520 basis points to 90.0%, primarily reflecting continued leverage of our cost structure realized with a growth in gross profit. On an adjusted basis, total Same Store SG&A as a percentage of gross profit improved by 10 basis points to 72.9%, as compared to the same period in 2016, driven by a 550 basis point improvement in Brazil and a 40 basis point improvement in the U.S. resulting from the further leveraging of our cost structure from revenue and gross profit growth and cost rationalization efforts that resulted in particular reductions in advertising and rent and facilities cost in the U.S. The improvements in Brazil and the U.S. were partially offset by an increase in the U.K. of 200 basis points.

Our total Same Store depreciation and amortization expense increased 12.0% and 10.8% for the years ended December 31, 2018 and 2017, respectively, as compared to the respective prior year periods, as we continue to strategically add dealership-related real estate to our investment portfolio, make acquisitions, add dealership locations and make improvements to our existing facilities that are designed to enhance the profitability of our dealerships and

the overall customer experience. We critically evaluate all planned future capital spending, working closely with our manufacturer partners to maximize the return on our investments.

Impairment of Assets

We perform an annual review of the fair value of our goodwill and indefinite-lived intangible assets during the fourth quarter. We also perform interim reviews for impairment of all of our long-lived and indefinite-lived assets when evidence

exists that the carrying value of such assets may not be recoverable. See Note 16, “Asset Impairments” within our Consolidated Financial Statements, for further discussion of our annual impairment assessments.

During the fourth quarters of 2018, 2017 and 2016, we performed our annual impairment assessment of the carrying value of our goodwill. The fair value of each of our reporting units exceeded the carrying value of the respective net assets (step one of the goodwill impairment test). Because no impairment indicators were identified, we were not required to conduct the second step of the impairment test for goodwill.

During 2018, 2017, and 2016, we determined that the carrying value of certain of our intangible franchise rights were greater than fair value. As a result, we recognized \$38.7 million, \$19.3 million and \$30.0 million of pre-tax non-cash impairment charges in 2018, 2017 and 2016, respectively. Also, in 2018, 2017, and 2016, we recognized \$5.1 million, \$0.2 million, and \$2.8 million, respectively, in pre-tax non-cash asset impairment charges, associated with various other long-lived assets that we determined the carrying value was no longer recoverable.

Floorplan Interest Expense

Our floorplan interest expense fluctuates with changes in borrowings outstanding and interest rates, which are based on LIBOR (or Prime rate in some cases) plus a spread in the U.S. and U.K. and a benchmark rate plus a spread in Brazil. To mitigate the impact of U.S. interest rate fluctuations, we employ an interest rate hedging strategy, whereby we swap variable interest rate exposure for a fixed interest rate over the term of the U.S. variable interest rate debt. During 2018 and 2017, our average notional amount of interest rate swaps in effect was \$804.7 million and \$822.2 million, respectively, that fixed our underlying one-month LIBOR at a weighted average rate of 2.62% and 2.53%, respectively. The 2018 average notional amount of interest rate swaps in effect represented 59.8% of our average total U.S. floorplan borrowings outstanding for the year ended December 31, 2018. The majority of the monthly settlements of these interest rate swap liabilities are recognized as floorplan interest expense. From time to time, we utilize excess cash on hand to pay down our floorplan borrowings, and the resulting interest earned is recognized as an offset to our gross floorplan interest expense.

Year Ended December 31, 2018 compared to 2017

Our total Same Store floorplan interest expense increased 11.6% to \$57.8 million for the year ended December 31, 2018, as compared to the same period in 2017. Our U.S. Same Store floorplan interest expense increased \$5.0 million, or 10.6%, for the year ended December 31, 2018, more than explained by the increase in LIBOR compared to the same period in 2017. This increase was partially offset by a decrease in our U.S. weighted average borrowings as compared to the same period last year. In the U.K., our Same Store floorplan interest expense grew 15.9% for the year ended December 31, 2018, as compared to the same period in 2017, more than explained by a \$19.5 million increase in our U.K. weighted average borrowings. Our Brazil Same Store floorplan interest expense increased by 71.2% for the year ended December 31, 2018. The increase in Brazil was primarily the result of the increases in both our weighted average rates and borrowings, reflecting our inventory and cash management strategies.

Year Ended December 31, 2017 compared to 2016

Our total Same Store floorplan interest expense increased 15.3% to \$51.3 million for the year ended December 31, 2017, as compared to the same period in 2016. The increase was primarily driven by our Same Store floorplan interest expense in the U.S. that grew \$6.7 million, or 16.6%, from the same period a year ago, which is more than explained by the increase in LIBOR interest rates since the fourth quarter of 2016. The increase was partially offset by a decline in our U.S. weighted average borrowings compared to the same period in 2016.

Other Interest Expense, net

Year Ended December 31, 2018 compared to 2017

Other interest expense, net consists of interest charges primarily on our 5.00% and 5.25% Notes, real estate related debt, working capital lines of credit and our other long-term debt, partially offset by interest income. For the twelve months ended December 31, 2018, other interest expense increased \$5.3 million, or 7.5%, to \$75.8 million, as compared to the same period in 2017. The increase was mainly attributable to the impact of rising interest rates in the U.S. on our variable-rate borrowings.

Year Ended December 31, 2017 compared to 2016

For the twelve months ended December 31, 2017, other interest expense, net consists of interest charges primarily on our 5.00% Notes and 5.25% Notes, real estate related debt, working capital lines of credit and our other long-term debt, partially offset by interest income. For the twelve months ended December 31, 2017, other interest expense increased \$2.6 million, or 3.8%, to \$70.5 million, as compared to the same period in 2016. The increase was primarily attributable to an increase in the weighted average interest rates associated with real estate and other long-term debt.

Provision for Income Taxes

For the year ended December 31, 2018, we recorded a tax provision of \$47.6 million. The 2018 effective tax rate of 23.2% increased from the 2017 effective tax rate of 2.5%, primarily resulting from the impact that was recorded in 2017 of the remeasurement of deferred taxes recorded in 2017 due to the Tax Act that reduced the U.S. corporate tax rate from 35.0% to 21.0%, as well as the valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil, partially offset by the employment tax credits and the enactment date adjustments from the Tax Act. On an adjusted basis, for the year ended December 31, 2018, our effective tax rate decreased to 23.4% from 35.7% in 2017.

For the year ended December 31, 2017, we recorded a tax provision of \$5.6 million. The 2017 effective tax rate of 2.5% decreased from the 2016 effective tax rate of 35.3%, primarily due to the remeasurement of deferred taxes based on the enactment of the Tax Act in the United States during 2017, as well as excess tax deductions for restricted stock resulting from the adoption of ASU 2016-09, partially offset by unrecognized tax benefits with respect to uncertain tax positions recorded in 2017. On an adjusted basis, for the year ended December 31, 2017, our effective tax rate decreased to 35.7% from 35.8% as compared to the same period in 2016.

We believe that it is more likely than not that our deferred tax assets, net of valuation allowances provided, will be realized, based primarily on the assumption of future taxable income. We expect our effective tax rate in 2019 will be approximately between 23.0% and 23.5%.

As of December 31, 2018, we had net deferred tax liabilities totaling \$131.1 million relating to the differences between the financial reporting and tax basis of assets and liabilities. This includes \$123.7 million of net deferred tax liabilities relating to intangibles for goodwill and franchise rights that are deductible for tax purposes and will not reverse until the related intangibles are disposed. We also had \$17.9 million of deferred tax assets for net operating losses in U.S. states, as well as \$37.6 million of deferred tax assets for foreign net operating losses. As of December 31, 2018, we had \$41.8 million of deferred tax assets relating to loss reserves and accruals. In addition, we had \$52.3 million of valuation allowances for net operating losses in certain U.S. states, as well as the deferred tax assets (including net operating losses) for certain entities in Brazil. Refer to Note 8, "Income Taxes" within our Notes to Consolidated Financial Statements for more details.

Liquidity and Capital Resources

Our liquidity and capital resources are primarily derived from cash on hand, cash temporarily invested as a pay down of Floorplan Line and FMCC facility levels, cash from operations, borrowings under our credit facilities, which provide vehicle floorplan financing, working capital and dealership and real estate acquisition financing, real estate mortgages, and proceeds from debt and equity offerings. Based on current facts and circumstances, we believe we will have adequate cash flow, coupled with available borrowing capacity, to fund our current operations, capital expenditures and acquisitions for 2019. If economic and business conditions deteriorate or if our capital expenditures or acquisition plans for 2019 change, we may need to access the private or public capital markets to obtain additional funding.

Cash on Hand. As of December 31, 2018, our total cash on hand was \$15.9 million. The balance of cash on hand excludes \$33.7 million of immediately available funds used to pay down our Floorplan Line and FMCC Facility as of December 31, 2018. We use the pay down of our Floorplan Line and FMCC Facility as a channel for the short-term investment of excess cash.

Cash Flows. With respect to all new vehicle floorplan borrowings in the normal course of business, the manufacturers of the vehicles draft our credit facilities directly with no cash flow to or from us. With respect to borrowings for used vehicle financing, we finance up to 85% of the value of our used vehicle inventory in the U.S., and the funds flow directly to us from the lender. All borrowings from, and repayments to, lenders affiliated with our vehicle

manufacturers (excluding the cash flows from or to manufacturer-affiliated lenders participating in our syndicated lending group) are presented within Cash Flows from Operating Activities on the Consolidated Statements of Cash Flows in conformity with U.S. GAAP. All borrowings from, and repayments to, the Revolving Credit Facility (including the cash flows from or to manufacturer-affiliated lenders participating in the facility) and other credit facilities in the U.K. and Brazil unaffiliated with our manufacturer partners (collectively, “Non-OEM Floorplan Credit Facilities”), are presented within Cash Flows from Financing Activities in conformity with U.S. GAAP. However, the incurrence of all floorplan notes payable represents an activity necessary to acquire inventory for resale, resulting in a trade payable. Our decision to utilize our Revolving Credit Facility does not substantially alter the process by which our vehicle inventory is financed, nor does it significantly impact the economics of our vehicle procurement activities. Therefore,

we believe that all floorplan financing of inventory purchases in the normal course of business should correspond with the related inventory activity and be classified as an operating activity. As a result, we use the non-GAAP measure “Adjusted net cash provided by/used in operating activities” and “Adjusted net cash provided by/used in financing activities” to evaluate our cash flows. We believe that this classification eliminates excess volatility in our operating cash flows prepared in accordance with U.S. GAAP and avoids the potential to mislead the users of our financial statements.

In addition, because the majority of our dealership acquisitions and dispositions are negotiated as asset purchases, we do not assume transfer of liabilities for floorplan financing in the execution of the transactions. Therefore, borrowings and repayments of all floorplan financing associated with dealership acquisition and disposition are characterized as either operating or financing activities in our statement of cash flows presented in conformity with U.S. GAAP, depending on the relationship described above. However, the floorplan financing activity is so closely related to the inventory acquisition process that we believe the presentation of all dealership acquisition- and disposition-related floorplan financing activities should be classified as investing activity to correspond with the associated inventory activity, and we have made such adjustments in our adjusted cash flow presentations.

The following tables sets forth selected historical information regarding cash flows from our Consolidated Statements of Cash Flows on a U.S. GAAP and on an adjusted, non-GAAP basis (in thousands). For further explanation and reconciliation to the most directly comparable U.S. GAAP measures see “Non-GAAP Financial Measures” below.

Sources and Uses of Liquidity from Operating Activities

For the twelve months ended December 31, 2018, we generated \$270.0 million of net cash flow from operating activities. On an adjusted basis for the same period, we generated \$309.8 million in net cash flow from operating activities, primarily consisting of \$157.8 million in net income, as well as non-cash adjustments related to depreciation and amortization of \$67.1 million, stock-based compensation of \$18.7 million, deferred income taxes of \$3.5 million and asset impairments of \$43.9 million, partially offset by a \$26.8 million gain on disposition of assets. Also included in adjusted net cash flow from operating activities was a \$41.4 million net change in operating assets and liabilities, consisting of cash inflows of \$78.2 million from a net increase in floorplan borrowings, \$2.9 million from the net decrease in accounts and notes receivable, \$39.5 million from decreases in vehicle receivables and contracts-in-transit, and \$18.4 million from increases in accounts payable and accrued expenses. These cash inflows were partially offset by cash outflows of \$80.6 million from the increase in inventory levels and \$16.3 million from the net increase in prepaid expenses and other assets.

For the twelve months ended December 31, 2017, we generated \$196.5 million of net cash flow from operating activities. On an adjusted basis for the same period, we generated \$282.3 million in net cash flow from operating activities, primarily consisting of \$213.4 million in net income, as well as non-cash adjustments related to depreciation

and amortization of \$57.9 million, stock-based compensation of \$18.9 million and asset impairments of \$19.5 million, partially offset by a \$46.1 million non-cash adjustment related to deferred income taxes, which includes the provisional deferred tax benefit of \$73.0 million recognized as a result of the Tax Act. Also included in adjusted net cash flow from operating activities was a \$16.1 million net change in operating assets and liabilities, consisting of cash inflows of \$77.4 million from a net increase in floorplan

borrowings and \$35.6 million from increases in accounts payable and accrued expenses. These cash inflows were partially offset by cash outflows of \$10.7 million from the net increase in accounts and notes receivable, \$44.0 million from the increase in inventory levels, \$33.5 million from increases in vehicle receivables and contracts-in-transit, and \$9.3 million from the net increase in prepaid expenses and other assets.

For the twelve months ended December 31, 2016, we generated \$384.1 million of net cash flow from operating activities. On an adjusted basis for the same period, we generated \$271.0 million in net cash flow from operating activities, primarily consisting of \$147.1 million in net income, as well as non-cash adjustments related to depreciation and amortization of \$51.2 million, stock-based compensation of \$21.1 million, deferred income taxes of \$14.2 million and asset impairments of \$32.8 million. Also included in adjusted net cash flow from operating activities was a \$2.5 million net change in operating assets and liabilities. Included in the adjusted net changes of operating assets and liabilities were cash inflows of \$79.3 million from a net decrease in inventory levels, \$76.1 million from increases in accounts payable and accrued expenses, and \$7.5 million from the net decrease in prepaid expenses and other assets. These cash inflows were partially offset by cash outflows of \$18.7 million from the net increase in accounts and notes receivable, \$125.7 million from a net decrease in floorplan borrowings, and \$15.6 million from increases in vehicle receivables and contracts-in-transit.

Working Capital. At December 31, 2018, we had \$15.8 million of working capital. Changes in our working capital are explained primarily by changes in floorplan notes payable outstanding. Borrowings on our new vehicle floorplan notes payable, subject to agreed upon pay-off terms, are equal to 100% of the factory invoice of the vehicles.

Borrowings on our used vehicle floorplan notes payable, subject to agreed upon pay-off terms, are limited to 85% of the aggregate book value of our used vehicle inventory, except in the U.K. and Brazil. At times, we have made payments on our floorplan notes payable using excess cash flow from operations and the proceeds of debt and equity offerings. As needed, we re-borrow the amounts later, up to the limits on the floorplan notes payable discussed above, for working capital, acquisitions, capital expenditures or general corporate purposes.

Sources and Uses of Liquidity from Investing Activities

For the twelve months ended December 31, 2018, we used \$168.0 million in net cash flow for investing activities. On an adjusted basis for the same period, we used \$176.0 million in net cash flow for investing activities, primarily consisting of \$119.0 million of cash outflows for dealership acquisition activity and \$141.0 million for purchases of property and equipment and to construct new and improve existing facilities. Within this total of property and equipment purchases, \$110.1 million was used for capital expenditures and \$31.4 million was used for the purchase of real estate associated with existing dealership operations, partially offset by a \$0.5 million net increase in the accrual for capital expenditures from the end of 2017. These cash outflows were partially offset by cash inflows of \$83.6 million related to dispositions of franchises and fixed assets.

For the twelve months ended December 31, 2017, we used \$312.6 million in net cash flow for investing activities. On an adjusted basis for the same period, we used \$297.9 million in net cash flow for investing activities, primarily consisting of \$94.3 million of cash outflows for dealership acquisition activity and \$215.8 million for purchases of property and equipment and to construct new and improve existing facilities. Within this total of property and equipment purchases, \$98.3 million was used for capital expenditures, \$110.4 million was used for the purchase of real estate associated with existing dealership operations and \$7.1 million represents the net decrease in the accrual for capital expenditures from the end of 2016. These cash outflows were partially offset by cash inflows of \$10.7 million related to dispositions of franchises and fixed assets and \$1.6 million of other items.

For the twelve months ended December 31, 2016, we used \$174.0 million in net cash flow for investing activities. On an adjusted basis for the same period, we used \$190.6 million in net cash flow for investing activities, primarily consisting of \$57.3 million of cash outflows for dealership acquisition activity and \$156.5 million for purchases of property and equipment and to construct new and improve existing facilities. Within this total of property and equipment purchases, \$100.6 million was used for capital expenditures, \$39.1 million was used for the purchase of real estate associated with existing dealership operations, and \$16.8 million was a net decrease in the accrual for capital expenditures from the end of 2015. These cash outflows were partially offset by cash inflows of \$20.2 million related to dispositions of franchises and fixed assets and \$3.0 million of other items.

Capital Expenditures. Our capital expenditures include costs to extend the useful lives of current facilities, as well as to start or expand operations. In general, expenditures relating to the construction or expansion of dealership facilities are driven by dealership acquisition activity, new franchises being granted to us by a manufacturer, significant growth in sales at an existing facility, relocation opportunities, or manufacturer imaging programs. We critically evaluate all planned future capital spending, working closely with our manufacturer partners to maximize the return on our investments. We forecast our capital expenditures for 2019 to be no more than \$120.0 million excluding expenditures related to future acquisitions, which could generally be funded from excess cash.

Acquisitions & Dispositions. We generally purchase businesses based on expected return on investment. Cash needed to complete our acquisitions generally comes from excess working capital, operating cash flows of our dealerships, and borrowings under our floorplan facilities, term loans and our Acquisition Line.

Sources and Uses of Liquidity from Financing Activities

For the twelve months ended December 31, 2018, we used \$109.5 million in net cash flow from financing activities. On an adjusted basis for the same period, we used \$141.4 million in net cash flow from financing activities, primarily related to cash outflows of \$183.9 million related to the repurchase of our Company's common stock, \$36.8 million of net payments on our real estate debt, and \$20.9 million for dividend payments. These outflows were partially offset by cash inflows of \$75.3 million in net borrowings on our Floorplan lines (representing the net cash activity in our floorplan offset accounts), \$6.9 million of net borrowings on our Acquisition Line and \$14.3 million of net borrowings of other debt.

For the twelve months ended December 31, 2017, we generated \$121.5 million in net cash flow from financing activities. On an adjusted basis for the same period, we generated \$21.0 million in net cash flow from financing activities, primarily related to cash inflows of \$25.8 million of net borrowings on our Acquisition Line, \$45.9 million of net borrowings of real estate debt, and \$29.2 million of net borrowings of other debt. These inflows were partially offset by cash outflows of \$40.1 million related to the repurchase our Company's common stock, \$23.9 million in net payments on our Floorplan lines (representing the net cash activity in our floorplan offset accounts), and \$20.5 million for dividend payments.

For the twelve months ended December 31, 2016, we used \$205.0 million in net cash flow from financing activities. On an adjusted basis for the same period, we used \$75.3 million in net cash flow from financing activities, primarily related to cash outflows of \$127.6 million to repurchase our Company's common stock and \$20.0 million for dividend payments. These outflows were partially offset by cash inflows of \$17.2 million of net borrowings of real estate debt, \$4.2 million of net borrowings of other debt, and \$50.8 million in net borrowings on our Floorplan lines (representing the net cash activity in our floorplan offset accounts).

Credit Facilities, Debt Instruments and Other Financing Arrangements. Our various credit facilities, debt instruments and other financing arrangements are used to finance the purchase of inventory and real estate, provide acquisition funding and provide working capital for general corporate purposes.

The following table summarizes the position of our U.S. credit facilities as of December 31, 2018, (in thousands):

U.S. Credit Facilities	As of December 31, 2018		
	Total Commitment	Outstanding	Available
Floorplan Line ⁽¹⁾	\$ 1,465,356	\$ 1,217,765	\$ 247,591
Acquisition Line ⁽²⁾	334,644	57,019	277,625
Total Revolving Credit Facility	1,800,000	1,274,784	525,216
FMCC Facility ⁽³⁾	300,000	160,686	139,314
Total U.S. Credit Facilities ⁽⁴⁾	\$ 2,100,000	\$ 1,435,470	\$ 664,530

⁽¹⁾ The available balance as of December 31, 2018 includes \$33.6 million of immediately available funds.

The outstanding balance of \$57.0 million is related to outstanding letters of credit of \$25.3 million and \$31.7 million in borrowings as of December 31, 2018. The borrowings outstanding under the Acquisition Line represent

⁽²⁾ 25.0 million British pound sterling translated at the spot rate on the day borrowed, solely for the purpose of calculating the Outstanding and Available borrowings under the Acquisition Line. The available borrowings may be limited from time to time, based on certain debt covenants.

⁽³⁾ The available balance as of December 31, 2018 includes \$0.1 million of immediately available funds.

⁽⁴⁾ The outstanding balance excludes \$298.2 million of borrowings with manufacturer-affiliates and third-party financial institutions for foreign and rental vehicle financing not associated with any of our U.S. credit facilities.

Revolving Credit Facility. The Revolving Credit Facility contains a number of significant covenants that, among other things, restrict our ability to make disbursements outside of the ordinary course of business, dispose of assets, incur additional indebtedness, create liens on assets, make investments and engage in mergers or consolidations. We are also required to comply with specified financial tests and ratios defined in the Revolving Credit Facility, such as the

fixed charge coverage and total adjusted leverage ratios. Further, the Revolving Credit Facility restricts our ability to make certain payments, such as dividends or other distributions of assets, properties, cash, rights, obligations or securities (“Restricted Payments”). As of December 31, 2018, the Credit Facility Restricted Payment Basket totaled \$72.4 million and we were in compliance with all our financial covenants, including:

As of
December 31,
2018
Required Actual

Total Adjusted Leverage Ratio	< 5.50	3.80
Fixed Charge Coverage Ratio	> 1.20	2.42

Based upon our current five year operating and financial projections, we believe that we will remain compliant with such covenants in the future.

Other Inventory Credit Facilities and Financing Arrangements. We have other credit facilities in the U.S., U.K. and Brazil with third-party financial institutions, most of which are affiliated with the automobile manufacturers that provide financing for portions of our new, used and rental vehicle inventories. In addition, we have outstanding debt instruments, including our 5.00% Notes and 5.25% Notes, as well as real estate related and other long-term debt instruments.

See Note 12, "Credit Facilities" and Note 13, "Long-Term Debt", within our Notes to Consolidated Financial Statements, for further discussion of our credit facilities, debt instruments and other financing arrangements existing as of December 31, 2018.

Stock Repurchases. From time to time, our Board of Directors gives authorization to repurchase shares of our common stock, subject to the restrictions of various debt agreements and our judgment. The Company issues new shares or treasury shares, if available, when restricted stock vests. With respect to shares issued under the Purchase Plan, the Company's Board of Directors has authorized specific share repurchases to fund the shares issuable under the Purchase Plan.

In October 2018, the Board of Directors authorized an increase to the previously authorized repurchase amount that was remaining under the plan to \$100 million. Under both of the authorizations, we repurchased 2,849,652 shares during 2018 at an average price of \$63.75 per share, for a total of \$181.7 million, leaving \$49.7 million available for future repurchases. During the three months ended December 31, 2018, 1,313,786 shares were repurchased for a total cost of \$75.3 million. Future repurchases are subject to the discretion of our Board of Directors after considering our results of operations, financial condition, cash flows, capital requirements, existing debt covenants, outlook for our business, general business conditions and other factors.

Dividends. The payment of dividends is subject to the discretion of our Board of Directors after considering the results of operations, financial condition, cash flows, capital requirements, outlook for our business, general business conditions, the political and legislative environments and other factors. Further, we are limited under the terms of the Revolving Credit Facility, certain mortgage term loans, 5.00% Notes and 5.25% Notes in our ability to make cash dividend payments to our stockholders and to repurchase shares of our outstanding common stock. As of December 31, 2018, the restricted payment baskets limited us to \$72.4 million in restricted payments. Generally, these restricted payment baskets will increase in future periods by 50.0% of our future cumulative net income, adjusted to exclude the Company's foreign operations, non-cash interest expense, non-cash asset impairment charges, and non-cash stock-based compensation, plus the net proceeds received from the sale of our capital stock, and decrease by the amount of future payments for cash dividends and share repurchases. For the twelve months ended December 31, 2018, we paid dividends of \$20.1 million to common stock shareholders and \$0.8 million to unvested restricted stock award holders.

Off-Balance Sheet Arrangements

We do not have any off-balance sheet arrangements as defined by Item 303(a)(4)(ii) of Regulation S-K.

Contractual Obligations

The following is a summary of our contractual obligations as of December 31, 2018 (in thousands):

	Payments Due by Period				
	Total	1 Year	2-3 Years	4-5 Years	Thereafter
Floorplan notes payable	\$1,676,639	\$1,676,639	\$—	\$—	\$—
Acquisition line payable	31,842	—	31,842	—	—
Estimated interest payments on floor plan notes payable (1)	19,134	15,211	3,923	—	—
Debt obligations (2)	1,322,461	112,340	110,338	957,732	142,051
Estimated interest payments on fixed-rate long-term debt obligations (3)	179,974	46,283	89,956	42,600	1,135
Estimated interest payments on variable-rate long-term debt obligations (4)	59,388	14,298	23,482	14,190	7,418
Capital lease obligations	48,612	6,165	7,460	7,490	27,497
Estimated interest on capital lease obligations	29,003	3,796	6,606	5,016	13,585
Operating lease obligations	296,543	38,298	65,608	50,975	141,662
Estimated interest payments on interest rate risk management obligations (5)	1,811	115	1,696	—	—
Purchase commitments (6)	10,932	8,609	2,297	26	—
Total	\$3,676,339	\$1,921,754	\$343,208	\$1,078,029	\$333,348

Calculated using the Floorplan Line outstanding balance and weighted average interest rate at December 31, 2018, and the assumption that these liabilities would be settled within 66 days, which approximates our weighted average

- (1) new vehicle inventory days outstanding. In addition, amounts include estimated commitment fees on the unused portion of the Floorplan Line through the term of the Revolving Credit Facility, assuming no additional Floorplan Line borrowings beyond 66 days.
- (2) Payments due within 1 year include \$25.3 million of outstanding letters of credit associated with the Acquisition Line of our Revolving Credit Facility.
- (3) Includes interest on our 5.00% Notes, 5.25% Notes and other real estate related debt.
- (4) Includes interest on letters of credit associated with the Acquisition Line of our Revolving Credit Facility, commitment fees on the unused portion of the Acquisition Line through the term of the Revolving Credit Facility, and estimated interest on our U.K. Notes, Brazil Note and other real estate related debt.
- (5) Amounts represent the estimated net future settlement of our obligation to pay a fixed interest rate and right to receive a variable interest rate, based upon a forecasted LIBOR forward curve and the maturity date of each obligation. The estimated fair value of these obligations as of December 31, 2018 was \$1.8 million. These amounts exclude the impact of estimated net future settlements of \$4.3 million, \$7.9 million, \$2.2 million and \$6.0 million, in which our right to receive a variable interest rate exceeds our obligation to pay a fixed interest rate for periods 1 year, 2-3 years, 4-5 years and thereafter, respectively.
- (6) Includes Information Technology commitments and other. See Note 15, "Commitments and Contingencies", within the Notes to Consolidated Financial Statements, for additional discussion of our contractual obligations.

Non-GAAP Financial Measures

In addition to evaluating the financial condition and results of our operations in accordance with U.S. GAAP, from time to time our management evaluates and analyzes results and any impact on the Company of strategic decisions and actions relating to, among other things, cost reduction, growth, and profitability improvement initiatives, and other events outside of normal, or "core," business and operations, by considering alternative financial measures not prepared in accordance with U.S. GAAP. In our evaluation of results from time to time, we exclude items that do not arise directly from core operations, such as non-cash asset impairment charges, gains and losses on dealership franchise or real estate transactions, and catastrophic weather events such as hail storms, hurricanes, and snow storms. Because these non-core charges and gains materially affect the Company's financial condition or results in the specific period in which they are recognized, management also evaluates, and makes resource allocation and performance evaluation decisions based on, the related non-GAAP measures excluding such items. This includes evaluating measures such as adjusted selling, general and administrative expenses, adjusted net income, adjusted diluted income

per share, adjusted cash flows from operating, investing and financing activities and constant currency. These adjusted measures are not measures of financial performance under U.S. GAAP, but are instead considered non-GAAP financial performance measures. Non-GAAP measures do not have definitions under U.S. GAAP and may be defined differently by, and not be comparable to, similarly titled measures used by other companies. As a result, any non-GAAP financial measures considered and evaluated by management are reviewed in conjunction with a review of the most directly comparable measures

calculated in accordance with U.S. GAAP. We caution investors not to place undue reliance on such non-GAAP measures, but also to consider them with the most directly comparable U.S. GAAP measures.

In addition to using such non-GAAP measures to evaluate results in a specific period, management believes that such measures may provide more complete and consistent comparisons of operational performance on a period-over-period historical basis and a better indication of expected future trends. Our management also uses these adjusted measures in conjunction with U.S. GAAP financial measures to assess our business, including communication with our Board of Directors, investors and industry analysts concerning financial performance. We disclose these non-GAAP measures, and the related reconciliations, because we believe investors use these metrics in evaluating longer-term period-over-period performance, and to allow investors to better understand and evaluate the information used by management to assess operating performance. The exclusion of certain expenses in the calculation of non-GAAP financial measures should not be construed as an inference that these costs are unusual or infrequent. We anticipate excluding these expenses in the future presentation of our non-GAAP financial measures.

In addition, we evaluate our results of operations on both an as reported and a constant currency basis. The constant currency presentation, which is a non-GAAP measure, excludes the impact of fluctuations in foreign currency exchange rates. We believe providing constant currency information provides valuable supplemental information regarding our underlying business and results of operations, consistent with how we evaluate our performance. We calculate constant currency percentages by converting our current period reported results for entities reporting in currencies other than U.S. dollars using comparative period exchange rates rather than the actual exchange rates in effect during the respective periods. The constant currency performance measures should not be considered a substitute for, or superior to, the measures of financial performance prepared in accordance with U.S. GAAP.

The following tables reconcile certain reported non-GAAP measures to the most comparable U.S. GAAP measure from our Statements of Operations by segment and on a consolidated basis (dollars in thousands, except per share amounts; may not foot due to rounding). Only adjusted amounts are reconciled below:

	U.S. Adjustments for Year Ended December 31, 2018						
	U.S. GAAP	Catastrophic events	Gain (loss) on real estate and dealership transactions	Legal settlements	Non-cash asset impairment	Tax rate changes	Non-GAAP Adjusted
Finance, insurance, and other revenues, net	\$401,271	\$(1,075)	\$—	\$—	\$—	\$—	\$400,196

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of market risks, including interest rate risk and foreign currency exchange rate risk. We manage a portion of our interest rate risks through the use of interest rate swaps. We do not currently hedge foreign exchange risk, as discussed further below. The following quantitative and qualitative information is provided about foreign currency exchange rates and financial instruments to which we are a party at December 31, 2018, and from which we may incur future gains or losses from changes in market interest rates. We do not enter into derivative or other financial instruments for speculative or trading purposes.

Hypothetical changes in interest rates and foreign currency exchange rates chosen for the following estimated sensitivity analysis are considered to be reasonable near-term changes generally based on consideration of past fluctuations for each risk category. However, since it is not possible to accurately predict future changes in interest rate and foreign currency exchange rates, these hypothetical changes may not necessarily be an indicator of probable future fluctuations.

The following information about our market-sensitive financial instruments constitutes a “forward-looking statement.” As of December 31, 2018, our 5.00% Notes, with an outstanding principal amount of \$550.0 million, had a fair value and carrying amount of \$521.6 million and \$543.7 million, respectively. Our 5.25% Notes, with an outstanding principal amount of \$300.0 million, had a fair value and carrying amount of \$286.5 million and \$296.7 million, respectively, at December 31, 2018. Our other fixed-rate debt, primarily consisting of real estate related debt, had outstanding borrowings of \$79.5 million and a fair value of \$76.2 million as of December 31, 2018.

Interest Rates. We have interest rate risk in our variable-rate debt obligations. Our policy is to monitor the effects of market changes in interest rates and manage our interest rate exposure through the use of a combination of fixed and floating-rate debt and interest rate swaps.

We use interest rate swaps to adjust our exposure to interest rate movements, when appropriate, based upon market conditions. As of December 31, 2018, we held interest rate swaps in effect with aggregate notional amounts of \$753.1 million that fixed our underlying one-month LIBOR at a weighted average rate of 2.4%. These hedge instruments are designed to convert floating rate vehicle floorplan payables under our Revolving Credit Facility and variable rate real estate related borrowings to fixed rate debt. We entered into these swaps with several financial institutions that have investment grade credit ratings, thereby minimizing the risk of credit loss. We reflect the current fair value of all derivatives on our Consolidated Balance Sheets. The fair value of interest rate swaps is impacted by the forward one-month LIBOR curve and the length of time to maturity of the swap contracts. The related gains or losses on these transactions are deferred in stockholders’ equity as a component of accumulated other comprehensive loss. As of December 31, 2018, net unrealized gain, net of income taxes, totaled \$8.9 million. These deferred gains and losses are recognized in income in the period in which the related items being hedged are recognized in expense. However, to the extent that the change in value of a derivative contract does not perfectly offset the change in the value of the items being hedged, that ineffective portion is immediately recognized in the results of operations. All of our interest rate hedges are designated as cash flow hedges and were determined to be effective. In addition to the \$753.1 million of swaps in effect as of December 31, 2018, we also held 5 interest rate swaps with forward start dates between January 2019 and December 2020 and expiration dates between December 2021 and December 2030. As of December 31, 2018, the aggregate notional amount of these swaps was \$275.0 million with a weighted average interest rate of 1.9%. The combination of these swaps is structured such that the notional value in effect at any given time through December 2030 does not exceed \$902.4 million.

A summary of our interest rate swaps, including those in effect, as well as forward-starting, follows (dollars in millions):

	2018	2019	2020	2021	2022	2023	2024	2025	2026	2027	2028	2029	2030
Average notional amount in effect during the	\$805	\$901	\$549	\$418	\$154	\$132	\$125	\$125	\$100	\$100	\$100	\$100	\$100

period
 Weighted
 average
 interest
 rate
 during
 the
 period

2.62 % 2.30 % 2.21 % 1.77 % 1.77 % 1.82 % 1.81 % 1.81 % 1.85 % 1.85 % 1.85 % 1.85 % 1.85 %

As of December 31, 2018, we had \$1.9 billion of variable-rate borrowings outstanding. Based on the average amount of variable-rate borrowings outstanding for 2018, and before the impact of our interest rate swaps described below, a 100 basis-point change in interest rates would have resulted in an approximate \$17.5 million change to our annual interest expense. After consideration of the average interest rate swaps in effect during 2018, a 100 basis-point change would have yielded a net annual change of \$9.3 million in annual interest expense. This interest rate sensitivity increased from the similar analysis prepared for 2017, primarily as a result of the increase in variable-rate floorplan borrowings, which was partially offset by an increase in the average notional swap amount outstanding between periods.

Our exposure to changes in interest rates with respect to our variable-rate floorplan borrowings is partially mitigated by manufacturers' interest assistance, which in some cases is influenced by changes in market based variable interest rates. We reflect interest assistance as a reduction of new vehicle inventory cost until the associated vehicle is sold. During the years ended December 31, 2018 and December 31, 2017, we recognized \$47.3 million and \$48.9 million of interest assistance as a reduction of new vehicle cost of sales, respectively. For the past three years, the reduction to our new vehicle cost of sales has ranged from 77.1% of our floorplan interest expense on a consolidated basis for the fourth quarter of 2018 to 116.6% in the third quarter of 2016. In the U.S., manufacturer's interest assistance was 85.7% of floorplan interest expense in the fourth quarter of 2018. Although we can provide no assurance as to the amount of future interest assistance, it is our expectation, based on historical practice of the OEMs, that an increase in prevailing interest rates would result in increased assistance from certain manufacturers over time.

Foreign Currency Exchange Rates. As of December 31, 2018, we had dealership operations in the U.K. and Brazil. The functional currency of our U.K. subsidiaries is the British pound sterling (£) and of our Brazil subsidiaries is the Brazilian real (R\$). We intend to remain permanently invested in these foreign operations and, as such, do not hedge against foreign currency fluctuations that may temporarily impact our investment in our U.K. and Brazil subsidiaries. If we change our intent with respect to such international investment, we would expect to implement strategies designed to manage those risks in an effort to mitigate the effect of foreign currency fluctuations on our earnings and cash flows. A 10% devaluation in average exchange rates for the British pound sterling to the U.S. dollar would have resulted in a \$221.6 million decrease to our revenues for the year ended December 31, 2018. A 10% devaluation in average exchange rates for the Brazilian real to the U.S. dollar would have resulted in a \$40.1 million decrease to our revenues for the year ended December 31, 2018. We believe that inflation rates over the last few years have not had a significant impact on our consolidated revenues or profitability. We do not expect inflation to have near-term material effects on the sale of our products and services on a consolidated basis; however, we cannot be sure there will be no such effect in the future. We finance substantially all of our inventory through various revolving floor plan arrangements with interest rates that vary based on various benchmarks. Such rates have historically increased during periods of increasing inflation.

Item 8. Financial Statements and Supplementary Data

See our Consolidated Financial Statements beginning on page F-1 for the information required by this Item and incorporated herein by reference.

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As required by Rule 13a-15(b) under the Exchange Act, we have evaluated, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) or 15d-15(e) under the Exchange Act) as of the end of the period covered by this Form 10-K. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed by us in reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure and is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the SEC. Based upon this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures were effective as of December 31, 2018 at the reasonable assurance level. Our management, including the principal executive officer and the principal financial officer, does not expect that our disclosure controls and procedures can prevent all possible errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that objectives of the control system are met. There are inherent limitations in all control systems, including the realities that judgments in decision-making can be faulty, and that breakdowns can occur because of simple errors or mistakes. Additionally, controls can be circumvented by the intentional acts of one or more persons. The design of any system of controls is based in part upon certain assumptions about the likelihood of future events, and while our disclosure controls and procedures are

designed to be effective under circumstances where they should reasonably be expected to operate effectively, there can be no assurance that any design will succeed in achieving its stated goals under all potential future conditions. Because of the inherent limitations in any control system, misstatements due to possible errors or fraud may occur and not be detected.

Changes in Internal Control over Financial Reporting

During the three months ended December 31, 2018, there was no change in our system of internal control over financial reporting (as defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Management's Annual Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act). Our internal control over financial reporting is a process designed by management, under the supervision of our principal executive officer and principal financial officer, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the U.S., and includes those policies and procedures that:

- (i) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of our assets;
- (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the U.S., and that our receipts and expenditures are being made only in accordance with authorizations of management and our directors; and
- (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of our assets that could have a material effect on our Consolidated Financial Statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies and procedures may deteriorate. Accordingly, even effective internal control over financial reporting can only provide reasonable assurance of achieving their control objectives.

Our management, under the supervision and with the participation of our principal executive officer and principal financial officer, assessed the effectiveness of our internal control over financial reporting as of December 31, 2018. In making this assessment, management used the 2013 framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO") in Internal Control-Integrated Framework.

Based on our evaluation under the framework in Internal Control-Integrated Framework, our management concluded that, as of December 31, 2018, our internal control over financial reporting was effective.

Ernst & Young LLP, the independent registered accounting firm who audited the Consolidated Financial Statements included in this Form 10-K, has issued an attestation report on our internal control over financial reporting. This report, dated February 19, 2019, appears on the following page.

Item 9B. Other Information

None.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Group 1 Automotive, Inc.

Opinion on Internal Control Over Financial Reporting

We have audited Group 1 Automotive, Inc. and subsidiaries' internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Group 1 Automotive, Inc. and subsidiaries (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated balance sheets of the Company as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes and our report dated February 19, 2019 expressed an unqualified opinion thereon.

Basis for Opinion

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Annual Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the US federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control Over Financial Reporting

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Executive Officers of Group 1

The following sets forth certain information regarding our executive officers as of February 19, 2019.

Name	Age	Position	Years with Group 1	Years of Automotive Experience
Earl J. Hesterberg	65	President and Chief Executive Officer	13.5	44
Daryl A. Kenningham	54	President, U.S. Operations	7.5	31
John C. Rickel	57	Senior Vice President and Chief Financial Officer	13	35
Frank Grese Jr.	66	Senior Vice President of Human Resources, Training, and Operations Support	14	44
Peter C. DeLongchamps	58	Senior Vice President, Manufacturer Relations, Financial Services and Public Affairs	14.5	36

Earl J. Hesterberg has served as our President and Chief Executive Officer and as a director since April 2005. Prior to joining us, Mr. Hesterberg had served as Group Vice President, North America Marketing, Sales and Service for Ford Motor Company, a global manufacturer and distributor of cars, trucks and automotive parts, since October 2004. From July 1999 to September 2004, he served as Vice President, Marketing, Sales and Service for Ford of Europe, and from 1999 until 2005, he served on the supervisory board of Ford Werke AG. Mr. Hesterberg has also served as President and Chief Executive Officer of Gulf States Toyota, an independent regional distributor of new Toyota vehicles, parts and accessories. He has also held various senior sales, marketing, general management, and parts and service positions with Nissan Motor Corporation in U.S.A. and Nissan Europe, both of which are wholly owned by Nissan Motor Co., Ltd., a global provider of automotive products and services. Mr. Hesterberg serves on the Board of Directors of Stage Stores, Inc., a national retail clothing chain with over 800 stores located in 42 states where he is a member of the Corporate Governance and Nominating Committee and Chairman of the Compensation Committee. He is a past member of the Board of Trustees of Davidson College. Mr. Hesterberg also serves on the Board of Directors of the Greater Houston Partnership, where he serves on the Executive Committee and is Chairman of the Business Issues Committee. Mr. Hesterberg received his B.A. in Psychology at Davidson College and his M.B.A. from Xavier University in 1978.

Daryl A. Kenningham has served as President, U.S. Operations since May 2017. Previously, he served as Regional Vice President of the West Region from February 2016 through April 2017 and as Regional Vice President of the East Region from April 2011 through January 2016. Prior to joining Group 1, he served as the Chief Operating Officer of Ascent Automotive in Houston and previously held a variety of sales, marketing, finance and automotive logistics positions with Gulf States Toyota. He also held various sales, marketing and vehicle distribution positions in the United States and Japan with Nissan Motor Corporation, where he began his career in 1988. Mr. Kenningham earned his Bachelor of Arts degree from the University of Michigan and his Master of Business Administration from the University of Florida.

John C. Rickel was appointed Senior Vice President and Chief Financial Officer in December 2005. From 1984 until joining Group 1, Mr. Rickel held a number of executive and managerial positions of increasing responsibility with Ford Motor Company, a global manufacturer and distributor of cars, trucks and automotive parts. He most recently served as Controller, Ford Americas, where he was responsible for the financial management of Ford's western hemisphere automotive operations. Immediately prior to that, he was Chief Financial Officer of Ford Europe, where he oversaw all accounting, financial planning, information services, tax and investor relations activities. From 2002 to 2004, Mr. Rickel was Chairman of the Board of Directors of Ford Russia, and a member of the Board of Directors and the Audit Committee of Ford Otosan, a publicly traded automotive company located in Turkey and owned 41% by Ford. In 2018, Mr. Rickel was appointed director of U.S. Xpress Enterprises, Inc., the nation's fifth largest asset-backed truckload carrier by revenue, providing services primarily throughout the United States, where he serves on the Audit Committee and is Chairman of the Governance Committee. Mr. Rickel received his B.S.B.A. and M.B.A. from The Ohio State University.

Frank Grese Jr. was appointed Senior Vice President of Human Resources, Training, and Operations Support effective February 1, 2016. Prior to that appointment, Mr. Grese served as Regional Vice President of the West Region from January 2006 to January 2016, and served as the Platform President of Group 1 Atlanta from December 2004 to December 2005. Mr. Grese began his automotive career in the Ford Management Training Program in 1974 where he progressed through various assignments in district offices, as well as Ford headquarters in Detroit. He joined Nissan in 1982, where he ultimately held the

position of National Dealer Advertising Manager. In 1986, Mr. Grese left the manufacturer side of the business and began working in various executive positions, including chief operating officer and district president, with large public and private dealer groups. He last served as Director of Dealership Operations, working extensively with underperforming stores, for a large private dealer group. Mr. Grese graduated from the University of Georgia with a degree in journalism.

Peter C. DeLongchamps has served as Group 1's Senior Vice President, Manufacturer Relations, Financial Services and Public Affairs since January 2018. He previously served as Group 1's Vice President, Manufacturer Relations, Financial Services and Public Affairs from January 2012 through December 2017, and as Vice President, Manufacturer Relations and Public Affairs from January 2006 through December 2011. Mr. DeLongchamps served as Vice President, Manufacturer Relations from July 2004 through December 2005. Mr. DeLongchamps began his automotive retailing career in 1980, having served as District Manager for General Motors Corporation and Regional Operations Manager for BMW of North America, as well as various other management positions in the automotive industry. Immediately prior to joining Group 1 in 2004, he was President of Advantage BMW, a Houston-based automotive retailer. Mr. DeLongchamps also serves on the Board of Directors of Junior Achievement of Southeast Texas. Mr. DeLongchamps received his B.B.A. from Baylor University.

Code of Ethics

We have adopted a Code of Ethics for Specified Officers, which is applicable to our principal executive officer and other senior financial officers, who include our principal financial officer, principal accounting officer or controller, and persons performing similar functions. The Code, which we refer to as our Financial Code of Ethics, is available on our internet website at www.group1auto.com. To the extent required by SEC rules, we intend to disclose any amendments to this code and any waiver of a provision of the code for the benefit of our principal executive officer, principal financial officer, principal accounting officer or controller, or persons performing similar functions, on our website within four business days following any such amendment of waiver, or within any other period that may be required under SEC rules from time to time.

Pursuant to Instruction G to Form 10-K, we incorporate by reference into this Item 10 the information to be disclosed in our definitive proxy statement prepared in connection with the 2019 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days of December 31, 2018.

Item 11. Executive Compensation

Pursuant to Instruction G to Form 10-K, we incorporate by reference into this Item 11 the information to be disclosed in our definitive proxy statement prepared in connection with the 2019 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days of December 31, 2018.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Pursuant to Instruction G to Form 10-K, we incorporate by reference into this Item 12, the information to be disclosed in our definitive proxy statement prepared in connection with the 2019 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days of December 31, 2018.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Pursuant to Instruction G to Form 10-K, we incorporate by reference into this Item 13, the information to be disclosed in our definitive proxy statement prepared in connection with the 2019 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days of December 31, 2018.

Item 14. Principal Accounting Fees and Services

Pursuant to Instruction G to Form 10-K, we incorporate by reference into this Item 14, the information to be disclosed in our definitive proxy statement prepared in connection with the 2019 Annual Meeting of Stockholders, which will be filed with the SEC within 120 days of December 31, 2018.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) List of documents filed as part of this Form 10-K:

(1) Financial Statements

The financial statements listed in the accompanying Index to Financial Statements are filed as part of this Form 10-K.

(2) Financial Statement Schedules

All schedules have been omitted since the required information is not present or not present in amounts sufficient to require submission of the schedule, or because the information required is included in the Consolidated Financial Statements and notes thereto.

(3) Index to Exhibits

Those exhibits required to be filed by Item 601 of Regulation S-K are listed in the Exhibit Index immediately preceding the exhibits filed herewith and such listing is incorporated herein by reference.

Item 16. Form 10-K Summary

None.

EXHIBIT INDEX

Exhibit Number	Description
<u>3.1</u>	Amended and Restated Certificate of Incorporation of Group 1 Automotive, Inc. (incorporated by reference to Exhibit 3.1 of Group 1 Automotive, Inc.'s Current Report on Form 8-K (File No. 001-13461) filed May 22, 2015)
<u>3.2</u>	Certificate of Designation of Series A Junior Participating Preferred Stock (incorporated by reference to Exhibit 3.2 of Group 1's Quarterly Report on Form 10-Q (File No. 001-13461) for the period ended March 31, 2007)
<u>3.3</u>	Third Amended and Restated Bylaws of Group 1 Automotive, Inc. (incorporated by reference to Exhibit 3.2 of Group 1 Automotive, Inc.'s Current Report on Form 8-K (File No. 001-13461) filed April 6, 2017)
<u>4.1</u>	Specimen Common Stock Certificate (incorporated by reference to Exhibit 4.1 of Group 1 Automotive, Inc.'s Registration Statement on Form S-1 (Registration No. 333-29893))
<u>4.2</u>	Indenture, dated as of June 2, 2014, by and among Group 1 Automotive, Inc., the guarantors party thereto and Wells Fargo Bank, National Association, as trustee (incorporated by reference to Exhibit 4.1 to Group 1 Automotive, Inc.'s Current Report on Form 8-K (File No. 001-13461) filed June 2, 2014)
<u>4.3</u>	Form of 5.000% Senior Notes due 2022 (included as Exhibit A to Exhibit 4.2)
<u>4.4</u>	Registration Rights Agreement, dated as of June 2, 2014, by and among Group 1 Automotive, Inc., the guarantors party thereto and J.P. Morgan Securities LLC, as representative of the initial purchasers named therein (incorporated by reference to Exhibit 4.3 to Group 1 Automotive, Inc.'s Current Report on Form 8-K (File No. 001-13461) filed June 2, 2014)
<u>4.5</u>	Registration Rights Agreement, dated as of September 9, 2014, by and among Group 1 Automotive, Inc., the guarantors party thereto and J.P. Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of Group 1 Automotive, Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Group 1 Automotive, Inc. and subsidiaries (the Company) as of December 31, 2018 and 2017, the related consolidated statements of operations, comprehensive income, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2018, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company at December 31, 2018 and 2017, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2018, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) and our report dated February 19, 2019 expressed an unqualified opinion thereon.

Adoption of Accounting Standards Update (ASU) No. 2014-09

As discussed in Note 2 to the consolidated financial statements, the Company changed its method of accounting for revenue in 2018 due to the adoption of ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606), and the related amendments.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

/s/ ERNST & YOUNG LLP

We have served as the Company's auditor since 2002.

Houston, Texas

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ANNUAL FINANCIAL INFORMATION

Business and Organization

Group 1 Automotive, Inc., a Delaware corporation, is a leading operator in the automotive retailing industry with business activities in 15 states in the United States of America (“U.S.”), 32 towns in the United Kingdom (“U.K.”), and four states in Brazil. Group 1 Automotive, Inc. and its subsidiaries are collectively referred to as the “Company” in these Notes to Consolidated Financial Statements. The Company, through its regions, sells new and used cars and light trucks; arranges related vehicle financing; sells service and insurance contracts; provides automotive maintenance and repair services; and sells vehicle parts.

As of December 31, 2018, the Company’s U.S. retail network consisted of 118 dealerships within the following states: Alabama, California, Florida, Georgia, Kansas, Louisiana, Maryland, Massachusetts, Mississippi, New Hampshire, New Jersey, New Mexico, Oklahoma, South Carolina, and Texas. The President of U.S. Operations reports directly to the Company’s Chief Executive Officer and is responsible for the overall performance of the U.S. region, as well as for overseeing the market directors and dealership general managers. In addition, as of December 31, 2018, the Company had two international regions: (a) the U.K., which consisted of 47 dealerships and (b) Brazil, which consisted of 18 dealerships. The operations of the Company’s international regions are structured similar to the U.S. region.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES AND ESTIMATES

Use of Estimates

The preparation of the Company’s financial statements in conformity with accounting principles generally accepted in the U.S. (“U.S. GAAP”) requires management to make certain estimates and assumptions. These estimates and assumptions affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the balance sheet date and the amounts of revenues and expenses recognized during the reporting period. Management analyzes the Company’s estimates based on historical experience and various other assumptions that are believed to be reasonable under the circumstances; however, actual results could differ from such estimates. The significant estimates made by management in the accompanying Consolidated Financial Statements relate to inventory market adjustments, reserves for future chargebacks on finance and vehicle service contract fees, self-insured property/casualty insurance exposure, the fair value of assets acquired and liabilities assumed in business combinations, the valuation of goodwill and intangible franchise rights, and reserves for potential litigation.

Basis of Presentation

All business acquisitions completed during the periods presented have been accounted by applying the acquisition method of accounting, and their results of operations are included from the effective dates of the closings of the acquisitions. The allocations of purchase price to the assets acquired and liabilities assumed are assigned and recorded based on estimates of fair value and are subject to change within the purchase price allocation period (generally one year from the respective acquisition date). All intercompany balances and transactions have been eliminated in consolidation.

Business Segment Information

The Company, through its regions, conducts business in the automotive retailing industry, including selling new and used cars and light trucks, arranging related vehicle financing, selling service and insurance contracts, providing automotive maintenance and repair services and selling vehicle parts. The Company has three reportable segments: the U.S., which includes the activities of the Company’s corporate office, the U.K., and Brazil. The reportable segments are the business activities of the Company for which discrete financial information is available and for which operating results are regularly reviewed by its chief operating decision maker to allocate resources and assess performance. The Company’s chief operating decision maker is its Chief Executive Officer. See Note 21, “Segment Information”, for additional details regarding the Company’s reportable segments.

Revenue Recognition

See discussion of revenue recognition in the Adoption of ASC Topic 606, "Revenue from Contracts with Customers" section of this Note 2 below, as well as Note 3, “Revenues”.

Cash and Cash Equivalents

Cash and cash equivalents include demand deposits and various other short-term investments with original maturities of three months or less at the date of purchase. As of December 31, 2018 and 2017, cash and cash equivalents excluded \$33.7

F-8

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

million and \$109.0 million, respectively, of immediately available funds used to pay down the Floorplan Line of the Revolving Credit Facility and the FMCC Facility (as defined in Note 12, “Credit Facilities”), which are the Company’s primary options for the short-term investment of excess cash. These amounts are reflected in the Company’s Consolidated Balance Sheets as the offset accounts related to Floorplan Notes Payable - Credit Facility and Floorplan Notes Payable - Manufacturer Affiliates.

Contracts-in-Transit and Vehicle Receivables

Contracts-in-transit and vehicle receivables consist primarily of amounts due from financing institutions on retail finance contracts from vehicle sales and dealer incentives due from manufacturers. Also included are amounts receivable from vehicle wholesale sales.

Inventories

New, used and demonstrator vehicle inventories are carried at the lower of specific cost or net realizable value and are removed from inventory using the specific identification method in the Consolidated Balance Sheets. Vehicle inventory cost consists of the amount paid to acquire the inventory, plus the cost of reconditioning, cost of equipment added and transportation cost. Additionally, the Company receives interest assistance from some of the automobile manufacturers. This assistance is accounted for as a vehicle purchase price discount and is reflected as a reduction to the inventory cost on the Company’s Consolidated Balance Sheets and as a reduction to cost of sales in its Statements of Operations as the vehicles are sold. At December 31, 2018 and 2017, inventory cost had been reduced by \$9.7 million and \$9.1 million, respectively, for interest assistance received from manufacturers. New vehicle cost of sales was reduced by \$47.3 million, \$48.9 million and \$49.2 million for interest assistance received related to vehicles sold for the years ended December 31, 2018, 2017 and 2016, respectively. The interest assistance over the past three years has ranged from approximately 77.1% of the Company’s quarterly floorplan interest expense in the fourth quarter of 2018 to 116.6% for the third quarter of 2016.

Since the market value of inventory typically declines over time, the Company establishes new and used vehicle reserves based on its historical loss experience and management’s considerations of current market trends. These reserves are charged to cost of sales and reduce the carrying value of inventory on hand. Used vehicles are complex to value as there is no standardized source for determining exact values and each vehicle and each market in which the Company operates is unique. As a result, the value of each used vehicle taken at trade-in, or purchased at auction, is determined based on industry data, primarily accessed via the Company’s used vehicle management software and the industry expertise of the responsible used vehicle manager. Valuation risk is partially mitigated by the speed at which the Company turns this inventory. At December 31, 2018 and 2017, the Company’s used vehicle days’ supply was 39 days.

Parts and accessories inventories are valued at lower of cost (determined on a first-in, first-out basis) or net realizable value in the Consolidated Balance Sheets. The Company incurs shipping costs in connection with selling parts to customers. The cost of shipping these parts is included in cost of sales on the Consolidated Statements of Operations.

Property and Equipment

Property and equipment are recorded at cost and depreciation is provided using the straight-line method over the estimated useful lives of the assets. Leasehold improvements are capitalized and amortized over the lesser of the estimated term of the lease or the estimated useful life of the asset. The amortization of assets recorded under capital leases is included with depreciation and amortization expense in the Consolidated Statement of Operations.

Expenditures for major additions or improvements, which extend the useful lives of assets, are capitalized. Minor replacements, maintenance and repairs, which do not improve or extend the lives of the assets, are expensed as incurred. Disposals are removed at cost less accumulated depreciation, and any resulting gain or loss is reflected in current operations. The Company reviews long-lived assets that are held-for-use for impairment at the lowest level of identifiable cash flows whenever there is evidence that the carrying value of these assets may not be recoverable (i.e., triggering events). This review consists of comparing the carrying amount of the asset with its expected future undiscounted cash flows without interest costs. If the asset’s carrying amount is greater than such cash flow estimate, then it is required to be written down to its fair value. Estimates of expected future cash flows represent management’s

best estimate based on currently available information and reasonable and supportable assumptions. See Note 16, "Asset Impairments", for additional details regarding the Company's impairment of long-lived assets.

Goodwill

Goodwill represents the excess, at the date of acquisition, of the purchase price of the business acquired over the fair value of the net tangible and intangible assets acquired. The Company is organized into three geographic regions, the U.S. region, the U.K. region and the Brazil region. The Company has determined that each region represents a reporting unit for the purpose of assessing goodwill for impairment. Annually in the fourth quarter, based on the carrying values of the Company's regions as of

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

October 31, the Company performs a fair value and potential impairment assessment of its goodwill. An impairment analysis is done more frequently if certain events or circumstances arise that would indicate an adverse change in the fair value of the intangible asset has occurred (i.e., an impairment indicator).

In evaluating its goodwill, the Company compares the carrying value of the net assets of each reporting unit to its respective fair value, which is calculated by using unobservable inputs based upon the Company's internally developed estimates of market participants' assumptions. This represents the first step of the impairment test. If the fair value of a reporting unit is less than the carrying value of its net assets, the Company proceeds to step two of the impairment test. Step two involves allocating the calculated fair value to all of the tangible and identifiable intangible assets of the reporting unit as if the calculated fair value were the purchase price in a business combination. The Company then compares the value of the implied goodwill resulting from this second step to the carrying value of the goodwill in the reporting unit. To the extent the carrying value of the goodwill exceeds its implied fair value under step two of the impairment test, a non-cash impairment charge equal to the difference is recorded.

The Company uses a combination of the discounted cash flow, or income approach (80% weighted), and the market approach (20% weighted) to determine the fair value of the Company's reporting units. Included in the discounted cash flow approach are assumptions regarding revenue growth rates, future gross margins, future selling, general and administrative expenses ("SG&A") and an estimated weighted average cost of capital ("WACC"). The Company also must estimate residual values at the end of the forecast period and future capital expenditure requirements.

Specifically, with regard to the valuation assumptions utilized in the income approach for the U.S. reporting unit (which represents the Company's largest reporting unit) as of October 31, 2018, the Company based its analysis on an estimate of industry sales of 16.8 million units in 2019, 16.7 million units in 2020 and declining approximately one hundred thousand units annually for the remainder of the forecasted years. For the market approach, the Company utilizes recent market multiples of guideline companies for both revenue and pretax net income weighted as appropriate by reporting unit. Each of these assumptions requires the Company to use its knowledge of (1) the industry, (2) recent transactions and (3) reasonable performance expectations for its operations. If any one of the above assumptions change or fails to materialize, the resulting decline in the estimated fair value could result in a material, non-cash impairment charge to the goodwill associated with the reporting unit(s). See Note 16, "Asset Impairments" and Note 17, "Intangible Franchise Rights and Goodwill", for additional details regarding the Company's goodwill.

Intangible Franchise Rights

The Company's only significant identifiable intangible assets, other than goodwill, are rights under franchise agreements with manufacturers, which are recorded at an individual dealership level. The Company expects these franchise agreements to continue for an indefinite period and, for agreements that do not have indefinite terms, the Company believes that renewal of these agreements can be obtained without substantial cost, based on the history with the manufacturer. As such, the Company believes that its franchise agreements will contribute to cash flows for an indefinite period and, therefore, the carrying amounts of the franchise rights are not amortized. Franchise rights acquired in business acquisitions prior to July 1, 2001, were recorded and amortized as part of goodwill in the U.S. reporting unit and remain as part of goodwill in the U.S. reporting unit at December 31, 2018 and 2017 in the accompanying Consolidated Balance Sheets. Since July 1, 2001, intangible franchise rights acquired in business combinations have been recorded as distinctly separate intangible assets. In accordance with guidance primarily codified within Accounting Standards Codification ("ASC") 350, Intangibles-Goodwill and Other, the Company evaluates these franchise rights for impairment annually in the fourth quarter, based on the carrying values of each of the Company's individual franchise rights as of October 31, or more frequently if events or circumstances indicate possible impairment has occurred.

In performing its impairment assessments, the Company tests the carrying value of each individual franchise right that was recorded by using a direct value method discounted cash flow model, or income approach, specifically the excess earnings method. Included in this analysis are assumptions, at a dealership level, regarding the cash flows directly attributable to the franchise rights, revenue growth rates, future gross margins and future SG&A expenses. Using an

estimated WACC, estimated residual values at the end of the forecast period and estimated future capital expenditure requirements, the Company calculates the fair value of each dealership's franchise rights. See Note 16, "Asset Impairments" and Note 17, "Intangible Franchise Rights and Goodwill", for additional details regarding the Company's intangible franchise rights.

Income Taxes

Currently, the Company operates in 15 different states in the U.S., in the U.K. and in Brazil, each of which has unique tax rates and payment calculations. As the amount of income generated in each jurisdiction varies from period to period, the Company's estimated effective tax rate can vary based on the proportion of taxable income generated in each jurisdiction.

The Company follows the liability method of accounting for income taxes in accordance with ASC 740, Income Taxes. Under this method, deferred income taxes are recorded based on differences between the financial reporting and tax basis of

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the underlying assets are realized or liabilities are settled. A valuation allowance reduces deferred tax assets when it is more likely than not that some or all of the deferred tax assets will not be realized. The Company has recognized deferred tax assets, net of valuation allowances, that it believes will be realized, based primarily on the assumption of future taxable income. As it relates to U.S. state net operating losses, as well as deferred tax assets primarily relating to net operating losses and goodwill for certain Brazil subsidiaries, a corresponding valuation allowance has been established to the extent that the Company has determined that net income attributable to certain jurisdictions may not be sufficient to realize the benefit. See Note 8, “Income Taxes” for additional details.

Fair Value of Financial Assets and Liabilities

The Company’s financial instruments consist primarily of cash and cash equivalents, contracts-in-transit and vehicle receivables, accounts and notes receivable, accounts payable, credit facilities, long-term debt and interest rate derivative instruments. The fair values of cash and cash equivalents, contracts-in-transit and vehicle receivables, accounts and notes receivable, accounts payable, credit facilities and variable-rate long-term debt approximate their carrying values due to the short-term nature of these instruments and/or the existence of variable interest rates.

However, the carrying value of the Company’s fixed-rate long-term debt differs from fair value.

For discussion on the fair value of the Company’s interest rate derivative instruments and fixed-rate long-term debt, see Note 5, “Derivative Instruments and Risk Management Activities” and Note 13, “Long-Term Debt”, for additional details.

Fair Value of Assets Acquired and Liabilities Assumed in Business Combinations

The fair values of assets acquired and liabilities assumed in business combinations are estimated using various assumptions. The most significant assumptions, and those requiring the most judgment, involve the estimated fair values of property and equipment and intangible franchise rights. The Company utilizes third-party experts to determine the fair values of property and equipment purchased, including real estate, and utilizes its fair value model as discussed under “Intangible Franchise Rights” above, supplemented with assistance from third-party experts, to determine the fair value of intangible franchise rights acquired.

Derivative Financial Instruments

One of the Company’s primary market risk exposures is increasing interest rates. Interest rate derivatives, designated as cash flow hedges, are used to adjust interest rate exposures, when determined appropriate based on current and forecasted future market conditions.

The Company follows the requirements of guidance primarily codified within ASC 815, Derivatives and Hedging (“ASC 815”) pertaining to the accounting for derivatives and hedging activities. ASC 815 requires the Company to recognize all cash flow hedges on its balance sheet at fair value. The related gains or losses on these interest rate derivatives are deferred in stockholders’ equity as a component of accumulated other comprehensive loss. These deferred gains and losses are recognized in income in the period in which the related items being hedged are recognized in expense. Monthly contractual settlements of these swap positions are recognized as floorplan or other interest expense in the Company’s accompanying Consolidated Statements of Operations. However, to the extent that the change in value of a derivative contract does not perfectly offset the change in the value of the items being hedged, that ineffective portion is immediately recognized in other income or expense. All of the Company’s interest rate hedges were designated as cash flow hedges and were deemed to be effective at December 31, 2018, 2017 and 2016. The Company measures the fair value of its interest rate derivative instruments utilizing an income approach valuation technique, converting estimated future amounts of cash flows to a single present value in order to obtain a transfer exit price within the bid and ask spread that is most representative of the fair value of its derivative instruments. In measuring fair value, the Company utilizes the option-pricing Black-Scholes present value technique for all of its derivative instruments. This option-pricing technique utilizes a one-month London Interbank Offered Rate (“LIBOR”) forward yield curve, obtained from an independent external service provider, matched to the identical maturity term of the instrument being measured. Observable inputs utilized in the income approach valuation technique incorporate identical contractual notional amounts, fixed coupon rates, periodic terms for interest payments and contract maturity.

The fair value estimate of the interest rate derivative instruments also considers the credit risk of the Company for instruments in a liability position or the counterparty for instruments in an asset position. The credit risk is calculated by using the spread between the one-month LIBOR yield curve and the relevant average 10 and 20-year rate according to Standard and Poor's.

The Company has determined the valuation measurement inputs of these derivative instruments to maximize the use of observable inputs that market participants would use in pricing similar or identical instruments and market data obtained from independent sources, which is readily observable or can be corroborated by observable market data for substantially the full

F-11

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

term of the derivative instrument. Further, the valuation measurement inputs minimize the use of unobservable inputs. Accordingly, the Company has classified the derivatives within Level 2 of the ASC 820, Fair Value Measurement and Disclosures (“ASC 820”), hierarchy framework in Note 14, “Fair Value Measurements”. The Company validates the outputs of its valuation technique by comparison to valuations from the respective counterparties. See Note 5, “Derivative Instruments and Risk Management Activities” and Note 14, “Fair Value Measurements”, for further details regarding the Company’s derivative financial instruments and fair value measurements.

Foreign Currency Translation

The functional currency for the Company’s U.K. subsidiaries is the British pound sterling (£) and of the Company’s Brazil subsidiaries is the Brazilian real (R\$). The financial statements of all the Company’s foreign subsidiaries have been translated into U.S. dollars. All assets and liabilities of foreign subsidiaries are translated into U.S. dollars using period-end exchange rates and all revenues and expenses are translated at average rates during the respective period. The difference in the U.S. dollar results that arise from the translation of all assets and liabilities are included in the cumulative currency translation adjustments in accumulated other comprehensive income/loss in stockholders’ equity and in other income/expense, when applicable. Upon disposition of the Company’s investment in a foreign subsidiary, the Company removes the accumulated translation adjustment attributable to that subsidiary from equity and recognizes it through earnings as a part of the gain or loss on the disposition transaction.

Factory Incentives

In addition to the interest assistance discussed above, the Company receives various dealer incentive payments from certain of the automobile manufacturers. These incentive payments are typically received on parts purchases from the automobile manufacturers and on new vehicle retail sales. These incentives are reflected as reductions of cost of sales in the Consolidated Statements of Operations, as the related inventory is sold. Factory incentive amounts related to parts and vehicles still in inventory as of the balance sheet date are reflected as a reduction of the carrying value of the inventory.

Earnings Per Share

The Company utilizes the two-class method for the computation of earnings per share (“EPS”). The two-class method requires a portion of net income to be allocated to participating securities, which are unvested awards of share-based payments with non-forfeitable rights to receive dividends or dividend equivalents. The Company’s restricted stock awards qualify as participating securities as each contain non-forfeitable rights to dividends. Income allocated to these participating securities is excluded from net earnings available to common shares. Basic EPS is computed by dividing net income available to basic common shares by the weighted average number of basic common shares outstanding during the period. Diluted EPS is computed by dividing net income available to diluted common shares by the weighted average number of dilutive common shares outstanding during the period.

Advertising

The Company expenses the costs of advertising as incurred. Advertising expense for the years ended December 31, 2018, 2017, and 2016, totaled \$75.2 million, \$74.1 million and \$75.3 million, respectively. The Company receives advertising assistance from some of the automobile manufacturers that the Company must spend on qualified advertising and is subject to audit and chargeback by the manufacturer. The assistance is accounted for as a reduction of advertising expense, which is included in SG&A expenses in the accompanying Consolidated Statements of Operations, as the assistance is earned. Advertising assistance amounts received related to vehicles still in inventory as of the balance sheet date are reflected in accrued expenses.

Advertising expense has been reduced by \$14.8 million, \$15.3 million and \$16.7 million for advertising assistance earned related to vehicles sold for the years ended December 31, 2018, 2017 and 2016, respectively.

Business and Credit Risk Concentrations

The Company owns and operates franchised automotive dealerships in the U.S., the U.K. and Brazil. Automotive dealerships operate pursuant to franchise agreements with vehicle manufacturers. Franchise agreements generally provide the manufacturers or distributors with considerable influence over the operations of the dealership. The success of any franchised automotive dealership is dependent, to a large extent, on the financial condition,

management, marketing, production and distribution capabilities of the vehicle manufacturers or distributors of which the Company holds franchises. The Company purchases substantially all of its new vehicles from various manufacturers or distributors at the prevailing prices to all franchised dealers. The Company's sales volume could be adversely impacted by the manufacturers' or distributors' inability to supply the dealerships with an adequate supply of vehicles. For the year ended December 31, 2018, Toyota (including Lexus and Toyota brands), Volkswagen (including Audi, Porsche, SEAT, SKODA and Volkswagen brands), BMW (including MINI

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

and BMW brands), Ford (including Ford and Lincoln brands), Honda (including Acura and Honda brands), Nissan, General Motors (including Chevrolet, GMC, Buick, and Cadillac brands), Daimler (including Mercedes-Benz, smart and Sprinter brands), FCA US (formerly Chrysler) (including Chrysler, Dodge, RAM and Jeep brands), Hyundai (including Hyundai and Kia brands) and Jaguar Land Rover accounted for 25.2%, 13.4%, 12.0%, 10.9%, 9.7%, 6.5%, 6.1%, 4.8%, 3.9%, 4.0%, and 1.8% of the Company's new vehicle sales volume, respectively. No other manufacturer accounted for more than 1.9% of the Company's total new vehicle sales volume in 2018. Through the use of an open account, the Company purchases and returns parts and accessories from/to the manufacturers and receives reimbursement for rebates, incentives and other earned credits. As of December 31, 2018, the Company was due \$105.1 million from various manufacturers (see Note 9, "Accounts and Notes Receivable"). Receivable balances from Toyota, General Motors, Daimler, Volkswagen, Ford, BMW, Nissan, Honda, FCA US (formerly Chrysler), Jaguar Land Rover and Hyundai, represented 15.1%, 14.7%, 12.8%, 12.5%, 10.3%, 7.4%, 5.9%, 4.3%, 4.0%, 3.2% and 2.6%, respectively, of this total balance due from manufacturers.

Statements of Cash Flows

With respect to all new vehicle floorplan borrowings, the manufacturers of the vehicles draft the Company's credit facilities directly with no cash flow to or from the Company. With respect to borrowings for used vehicle financing in the U.S., the Company finances up to 85% of the value of the used vehicle inventory and the funds flow directly to the Company from the lender. In the U.K. and Brazil, the Company chooses which used vehicles to finance and the borrowings flow directly to the Company from the lender. All borrowings from, and repayments to, lenders affiliated with the vehicle manufacturers (excluding the cash flows from or to manufacturer affiliated lenders participating in the Company's syndicated lending group under the Revolving Credit Facility) are presented within Cash Flows from Operating Activities on the Consolidated Statements of Cash Flows. All borrowings from, and repayments to, the syndicated lending group under the Revolving Credit Facility (as defined in Note 12, "Credit Facilities") (including the cash flows from or to manufacturer affiliated lenders participating in the facility), as well as borrowing from, and repayments to, the Company's other credit facilities are presented within Cash Flows from Financing Activities. Cash paid for interest, including the monthly settlement of the Company's interest rate derivatives, was \$128.6 million, \$117.1 million and \$109.3 million in 2018, 2017 and 2016, respectively. Cash paid for taxes, net of refunds, was \$40.8 million, \$61.0 million and \$56.9 million in 2018, 2017 and 2016, respectively.

The following table provides a reconciliation of cash, cash equivalents and restricted cash reported on the Consolidated Balance Sheets to the total of the same amounts shown in the Consolidated Statements of Cash Flows (in thousands):

	Years Ended December		
	31,		
	2018	2017	2016
Cash and cash equivalents	\$ 15,932	\$ 28,787	\$ 20,992
Restricted cash, included in other assets	2,788	844	3,254
Total cash, cash equivalents and restricted cash	\$ 18,720	\$ 29,631	\$ 24,246

See Note 14, "Fair Value Measurements", for additional details regarding the Company's restricted cash balances.

Stock-Based Compensation

Stock-based compensation represents the expense related to stock-based awards granted to employees and non-employee directors. The Company measures stock-based compensation expense at grant date based on the estimated fair value of the award and recognizes the cost on a straight-line basis, net of estimated forfeitures, over the employee requisite service period. The Company estimates the fair value of its employee stock purchase rights issued pursuant to the Employee Stock Purchase Plan using a Black-Scholes valuation model. The expense for stock-based awards is recognized as a Selling, general and administrative expense in the accompanying Consolidated Statements of Operations.

Self-Insured Medical, Property and Casualty Reserves

The Company purchases insurance policies for worker's compensation, liability, auto physical damage, property, pollution, employee medical benefits and other risks consisting of large deductibles and/or self-insured retentions. The Company's U.S. auto physical damage insurance coverage is composed of a \$10.0 million per occurrence company deductible with an annual maximum aggregate deductible of \$30.0 million with no maximum payout. Under the Company's U.S. workers' compensation and general liability insurance coverage, its exposure per claim is limited to \$1.0 million per occurrence, with unlimited exposure on the number of claims up to \$1.0 million that may be

F-13

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

incurred. As of December 31, 2018, the Company had accrued \$19.3 million for its estimated liability on incurred worker's compensation and general liability claims.

At least annually, the Company engages a third-party actuary to conduct a study of the exposures under the self-insured portion of its worker's compensation and general liability insurance programs for all open policy years. In the interim, the Company reviews the estimates within the study and monitors actual experience for unusual variances. The appropriate adjustments are made to the accrual, based upon these procedures. Actuarial estimates for the portion of claims not covered by insurance are based on historical claims experience adjusted for loss trending and loss development factors. Changes in the frequency or severity of claims from historical levels could influence our reserve for claims and our financial position, results of operations and cash flows.

The Company's U.S. insurance coverage for employee medical benefits limits the Company's exposure to \$1.0 million per occurrence. The Company's U.S. property insurance includes coverage for building damage, content damage and business interruption. Deductibles for the U.S. property insurance vary depending on the cause of damage and the location.

The Company has insurance policies covering similar risks with smaller deductibles and/or self-insured retentions in both the U.K. and Brazil.

Recently Adopted Accounting Pronouncements

In August 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. The amendments in this update address several specific cash flow issues with the objective of reducing the diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows. The Company adopted ASU 2016-15 during the first quarter of 2018. The adoption of this ASU did not materially impact its net income, retained earnings, consolidated financial statements, results of operations or cash flows.

In November 2016, the FASB issued ASU 2016-18, Statement of Cash Flows (Topic 230): Restricted Cash, a consensus of the FASB Emerging Issues Task Force ("EITF"). The amendments in this update require that a statement of cash flows explain the change during the period in the total of cash, cash equivalents, and amounts generally described as restricted cash or restricted cash equivalents. Therefore, amounts generally described as restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period total amounts shown on the statement of cash flows. The Company adopted ASU 2016-18 during the first quarter of 2018. The adoption of this ASU did not materially impact its consolidated financial statements, results of operations or cash flows.

In January 2017, the FASB issued ASU 2017-01, Business Combinations (Topic 805): Clarifying the Definition of a Business. The amendments in this update clarify the definition of a business in order to assist entities with evaluating whether transactions should be accounted for as acquisitions (or disposals) of assets or businesses. The amendments in this ASU should be applied prospectively. The Company adopted ASU 2017-01 during the first quarter of 2018. The adoption of this ASU did not materially impact its consolidated financial statements or results of operations.

In May 2017, the FASB issued ASU 2017-09, Compensation - Stock Compensation (Topic 718): Scope of Modification Accounting. The amendments in this update provide clarity and reduce both diversity in practice and cost and complexity when applying the guidance of Topic 718 to a change to the terms or conditions of a share-based payment award. Under the new guidance, an entity will not apply modification accounting to a share-based payment award if all of the following are the same immediately before and after the change: 1) the award's fair value (or calculated value or intrinsic value, if those measurement methods are used), 2) the award's vesting conditions, and 3) the award's classification as an equity or liability instrument. The Company adopted ASU 2017-09 during the first quarter of 2018. The adoption of this ASU did not impact its consolidated financial statements or results of operations.

In February 2018, the FASB issued ASU 2018-02, Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income. The amendments in this update will permit entities to reclassify tax effects stranded in accumulated other comprehensive income as a result of tax legislation enacted by the U.S. government on December 22, 2017, commonly referred to as the Tax Cuts

and Jobs Act (the “Tax Act”), to retained earnings. The FASB gave entities the option to reclassify these amounts rather than require reclassification and the option to apply the guidance retrospectively or in the period of adoption. The amendments in this update are effective for interim and annual periods beginning after December 15, 2018 with early adoption permitted. The Company early adopted ASU 2018-02 as of July 1, 2018, and reclassified \$0.2 million of stranded tax effects from accumulated other comprehensive income to retained earnings.

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Adoption of ASC Topic 606, "Revenue from Contracts with Customers"

Effective January 1, 2018, the Company adopted ASU 2014-09, Revenue from Contracts with Customers (Topic 606) ("Topic 606"), and all subsequent amendments issued thereafter, that amend the accounting guidance on revenue recognition. The Company adopted Topic 606 using the modified retrospective method applied to those contracts that were not completed as of January 1, 2018, with a cumulative-effect adjustment to retained earnings recognized as of the date of adoption. Results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with the Company's historic accounting policies under Topic 605, Revenue Recognition.

The Company identified its material revenue streams to be the sale of new and used vehicles; arrangement of associated vehicle financing and the sale of service and other insurance contracts; the performance of vehicle maintenance and repair services; and the sale of vehicle parts. The Company concluded that no changes to the timing of revenue recognition for the sale of new and used vehicles, as well as vehicle parts are necessary. As it relates to the performance of vehicle maintenance and repair services recognized as a part of Parts and service sales in the accompanying Consolidated Statements of Operations, the Company identified a change in its accounting policies and procedures. Through December 31, 2017, the Company recognized revenue once the maintenance or repair services were completed and the vehicle was delivered to the customer. Under Topic 606, the Company determined that it has an enforceable right to payment during the course of the work being performed in certain jurisdictions and, thus, the Company changed its policy under Topic 606 for those jurisdictions to recognize revenue over time as the maintenance and repair services are performed. With regards to the revenue generated from the arrangement of vehicle financing and the sale of service and other insurance contracts recognized as a part of Finance, insurance and other, net in the accompanying Consolidated Statements of Operations, the Company also identified a change in the Company's accounting policies and procedures. Generally, the Company receives an upfront commission for these transactions from the finance or insurance provider and recognizes the associated revenue when the contract is executed. In some cases, the Company also earns retrospective commission income by participating in the future profitability of the portfolio of contracts sold by the Company. Through December 31, 2017, the Company's accounting policy was to recognize upfront commission income earned when the contract was executed and the amount was determinable, and to recognize retrospective commission income as the amounts were determined and realized. The Company concluded that this retrospective commission income represents variable consideration for which the Company's performance obligation is satisfied when the finance or insurance product contract is executed with the end user. Under the new standard, an estimate of variable consideration, subject to a constraint, is to be included in the transaction price and recognized when or as the performance obligation is satisfied. Therefore, the Company's accounting policy changed under Topic 606 such that the Company will estimate the amount of future earnings that it will realize from the ultimate profitability of the portfolio of contracts subject to a retrospective commission and recognize such estimate, subject to any constraint in the estimate, upfront when the contract is executed with the end user. The Company's estimates of the amount of variable consideration to be ultimately realized will be reassessed at the end of each reporting period and changes in those estimates will be adjusted through revenue. As a result of adopting Topic 606 and implementing the changes aforementioned, the Company recognized net, after-tax cumulative effect adjustments to increase retained earnings as of the date of adoption for maintenance and repair services of \$4.8 million and for the arrangement of associated vehicle financing and the sale of service and other insurance contracts of \$6.6 million.

Recently Issued Accounting Pronouncements

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), that amends the accounting guidance on leases. The standard establishes a right-of-use (ROU) model that requires a lessee to record an ROU asset and a lease liability on the balance sheet for all leases with terms longer than 12 months. Originally, entities were required to adopt this ASU using a modified retrospective transition method. The FASB subsequently issued amendments to the standard, including providing an additional transition method that allows entities the option of recognizing the cumulative effect of applying the new standard as an adjustment to beginning retained earnings in the year of adoption while continuing to present all prior periods under previous lease accounting guidance. This standard update along with the amendments, will be effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company will adopt this accounting standard update on January 1, 2019, as required, using the optional transition method with no restatement of comparative period and a cumulative effect adjustment, if any, recognized on the date of adoption. While the Company has not completed its assessment of the impacts of the ASU 2016-02, the Company expects that the adoption of this standard will have a significant impact on its consolidated balance sheet for real estate and equipment operating leases. Upon adoption, the Company expects to recognize additional operating liabilities ranging from \$200 million to \$300 million, with corresponding ROU assets of approximately the same amount based on the present value of the remaining minimum rental payments under current leasing standards for existing operating leases. As part of the Company's implementation process, the Company has assessed its lease agreements, evaluated accounting policy elections, and implemented software to meet the reporting requirements of the standard. The Company is also currently evaluating the changes in controls and processes that are necessary to implement the standard update, but does not expect material changes.

In June 2016, the FASB issued ASU 2016-13, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The amendment replaces the current incurred loss impairment methodology of recognizing credit losses when a loss is probable, with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to assess credit loss estimates. The standard will be effective for fiscal years beginning after December 15, 2019, with early adoption permitted for periods after December 15, 2018. The Company is currently evaluating the impact that the adoption of the provisions of the ASU will have on its consolidated financial statements or results of operations, but does not expect the

amendments in this ASU to materially impact its consolidated financial statements.

In January 2017, the FASB issued ASU 2017-04, Intangibles - Goodwill and Other (Topic 350): Simplifying the Test for Goodwill Impairment. The amendment eliminates the requirement to calculate the implied fair value of goodwill to measure a goodwill impairment charge. Instead, entities will record an impairment charge based on the excess of a reporting unit's carrying amount over its fair value. The amendments in this update should be applied prospectively and are effective for interim and annual periods beginning after December 15, 2019. Earlier application is permitted for interim or annual goodwill

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

impairment tests performed on testing dates after January 1, 2017. The impact of the adoption of the provisions of the ASU on the Company's consolidated financial statements will depend upon the significance of future impairments realized.

In August 2017, the FASB issued ASU 2017-12, Derivatives and Hedging (Topic 715): Targeted Improvements to Accounting for Hedging Activities. The amendments in this update better align an entity's risk management activities and financial reporting for hedging relationships through changes to both the designation and measurement guidance for qualifying hedging relationships and the presentation of hedge results. The guidance eliminates the requirement to separately measure and report hedge ineffectiveness and generally requires the entire change in the fair value of a hedging instrument to be presented in the same income statement line as the hedged item. The guidance also eases the administrative burden of hedge documentation requirements and assessing hedge effectiveness. The amendments to cash flow and net investment hedge relationships should be applied using a modified retrospective approach while the presentation and disclosure requirements are applied prospectively, effective for fiscal years beginning after December 15, 2018, with early adoption permitted. The Company is currently evaluating the impact that the adoption of the provisions of the ASU will have on its consolidated financial statements.

In August 2018, the FASB issued ASU 2018-13, Fair Value Measurement (Topic 820): Disclosure Framework - Changes to the Disclosure Requirements for Fair Value Measurement. The amendment modifies the disclosure requirements on fair value measurements by removing, modifying, or adding certain disclosures. The amendment will be effective for interim and annual periods beginning after December 15, 2019, with early adoption permitted. Certain disclosures in this standard are required to be applied on a retrospective basis and others on a prospective basis. The Company is currently evaluating the potential impact of adopting this guidance on its consolidated financial statements.

3. REVENUES

As discussed in Note 2, "Summary of Significant Accounting Policies and Estimates", the Company's material revenue streams are the sale of new and used vehicles; arrangement of associated vehicle financing and the sale of service and other insurance contracts; the performance of vehicle maintenance and repair services (including collision restoration); and the sale of vehicle parts.

The following table presents the Company's revenues disaggregated by revenue source (in thousands):

	Years Ended December 31,		
	2018	2017 ⁽¹⁾	2016 ⁽¹⁾
REVENUES:			
New vehicle retail sales	\$6,181,371	\$6,157,531	\$6,046,075

⁽¹⁾ As described in Note 2, "Summary of Significant Accounting Policies", results for reporting periods beginning after January 1, 2018 are presented under Topic 606, while prior period amounts are not adjusted and continue to be reported in accordance with historical accounting policies under Topic 605, Revenue Recognition.

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

New and Used Vehicle Sales

Specific to the sale of new and used vehicles, the Company has a single performance obligation associated with these contracts - the delivery of the vehicle to the customer, which is the point at which transfer of control occurs. Revenue from the sale of new and used vehicles is recognized upon satisfaction of the performance obligation (i.e., delivery of the vehicle to the customer). In some cases, the Company uses a third-party auction as an agent to facilitate delivery of used vehicles to the customer. Incidental items that are immaterial in the context of the contract are accrued at the time of sale. The transaction price for new and used vehicle sales (i.e., the amount that the Company has the right to under the terms of the sales contract with the customer) is the stand-alone sales price of each individual vehicle and is generally settled within 30 days of the satisfaction of the performance obligation. In many new and used vehicle sales transactions, a portion of the consideration applied by the customer to the satisfaction of the total transaction price is a used vehicle trade-in (i.e., noncash consideration). The Company measures such noncash consideration at fair value. Revenue recognized from the sale of new and used vehicles is reflected in New vehicle retail sales, Used vehicle retail sales, and Used vehicle wholesale sales in the accompanying Consolidated Statements of Operations. With respect to the cost of freight and shipping from its dealerships to its customers, the Company's policy is to recognize such cost in the corresponding cost of sales category. With respect to taxes assessed by governmental authorities that are imposed upon new and used vehicle sales transactions and collected by the Company from its customers, the Company's policy is to exclude such amounts from revenues.

Vehicle Parts Sales

Related to the sale of vehicle parts, the Company has a single performance obligation associated with these contracts - the delivery of the parts to the customer, which is the point at which transfer of control occurs. Revenue from the sale of vehicle parts is recognized upon satisfaction of the performance obligation (i.e., delivery of the parts to the customer). The transaction price for vehicle parts sales (i.e., the amount that the Company has the right to under the terms of the sales contract with the customer) is the stand-alone sales price of each individual part and is generally settled within 30 days of the satisfaction of the performance obligation. Revenue recognized from the sale of vehicle parts is reflected in Parts and service sales in the accompanying Consolidated Statements of Operations. With respect to the cost of freight and shipping to its customers, the Company's policy is to recognize such fulfillment cost in the corresponding cost of sales category. With respect to taxes assessed by governmental authorities that are imposed upon vehicle parts sales transactions and collected by the Company from its customers, the Company's policy is to exclude such amounts from revenues.

Maintenance and Repair Services

As it relates to vehicle maintenance and repair services (including collision restoration), the Company has a single performance obligation associated with these contracts - the completion of the services. The Company has an enforceable right to payment in certain jurisdictions and, as such, transfers control of vehicle maintenance and repair services to its customer over time. Therefore, satisfaction of the performance obligation associated with the vehicle maintenance and repair services occurs, and the associated revenue is recognized, over time. The Company uses the input method for the measurement of progress and recognition of revenue, utilizing labor hours and parts applied to the customer vehicle to estimate the services performed for which the Company has an enforceable right to payment. The transaction price for vehicle maintenance and repair services (i.e., the amount that the Company has the right to under the terms of the service contract with the customer) is the sum total of the labor and, if applicable, vehicle parts used in the performance of the service, as well as the margin above cost charged to the customer. The transaction price is typically settled within 30 days of the satisfaction of the performance obligation, which generally occurs within a short period of time from contract inception. Revenue recognized from vehicle maintenance and repair services is reflected in Parts and service sales in the accompanying Consolidated Statements of Operations. With respect to taxes assessed by governmental authorities that are imposed upon vehicle maintenance and repair service transactions and collected by the Company from its customer, the Company's policy is to exclude such amounts from revenues.

Arrangement of Vehicle Financing and the Sale of Service and Other Insurance Contracts

The Company receives commissions from finance and insurance providers, under the terms of its contracts with such providers, for the arrangement of vehicle financing and the sale of service and other insurance products. Within the context of the Company's contracts with the finance or insurance provider, the Company has determined that it is an agent for the finance or insurance provider and the finance or insurance provider is the Company's customer. The Company has a single performance obligation associated with these contracts for all commissions earned - the facilitation of the financing of the vehicle or sale of the insurance product. Revenue from these contracts is recognized upon satisfaction of the performance obligation, which is when the finance or insurance product contract is executed with the purchaser. The transaction price (i.e., the amount that the Company has the right to under the terms of the contract with the customer) consists of both fixed and variable consideration. With regards to the upfront commission for these contracts, the transaction price is the amount earned for each individual contract executed and is generally collected within 30 days of the satisfaction of the performance obligation. The Company may

F-20

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

be charged back for unearned financing, insurance contract or vehicle service contract fees in the event of early termination of the contracts by customers. A reserve for future amounts estimated to be charged back is recorded, as a reduction of Finance, insurance and other revenue, net in the accompanying Consolidated Statement of Operations, based on the Company's historical chargeback results and the termination provisions of the applicable contracts. In some cases, the Company also earns retrospective commission income by participating in the future profitability of the portfolio of product contracts sold by the Company. This consideration is variable (i.e., contingent upon the performance of the portfolio of contracts) and is generally settled over five to seven years from the satisfaction of the performance obligation. The Company utilizes the "expected value" method to predict the amount of consideration to which the Company will be entitled, subject to constraint in the estimate. Therefore, the Company estimates the amount of future earnings that it will realize from the ultimate profitability of the portfolio and recognizes such estimate, subject to any constraint in the estimate, upfront when the product contract is executed with the end user, which is when the performance obligation is satisfied. Changes in the Company's estimates of the amount of variable consideration to be ultimately realized are adjusted through revenue. Revenue recognized from the arrangement of vehicle financing and the sale of service and other insurance contracts is reflected in Finance, insurance and other, net, within the Consolidated Statements of Operations and as a contract asset reflected in Prepaid expenses and other current assets within the Consolidated Balance Sheets until the right to such consideration becomes unconditional, at which time amounts due are reclassified to accounts receivable.

4. ACQUISITIONS AND DISPOSITIONS

During the twelve months ended December 31, 2018, the Company acquired 5 dealerships, inclusive of 8 franchises, added one franchise and opened one additional dealership for one awarded franchise in the U.K.. The Company also acquired four dealerships in the U.S., inclusive of four franchises, and opened one additional dealership, representing one franchise. Further, the Company acquired one dealership in Brazil, representing one franchise, and opened one additional dealership, representing one franchise. Aggregate consideration paid for these dealerships totaled \$140.4 million, including the associated real estate and goodwill, as well as \$5.1 million of cash received in the acquisition of the dealerships. The purchase price of each dealership acquired has been allocated based upon the consideration paid and the estimated fair values of the assets acquired and liabilities assumed at the acquisition dates. The allocation of the purchase prices is based on estimates and assumptions, including the fair value of long-lived assets and intangible franchise rights. These estimates and assumptions are preliminary and, therefore, subject to change within the purchase price allocation periods (generally one year from the respective acquisition date). In addition, during the twelve months ended December 31, 2018, the Company disposed of two dealerships in the U.S., representing three franchises, terminated one additional franchise in the U.S., disposed of one dealership in the U.K., representing one franchise, and terminated one additional franchise in the U.K. As a result of these dispositions, the Company recognized a pretax gain of \$24.4 million during the twelve months ended December 31, 2018.

During the twelve months ended December 31, 2017, the Company acquired 12 U.K. dealerships, inclusive of 14 franchises, and opened one additional dealership for one awarded franchise in the U.K. In addition, the Company acquired three dealerships in the U.S., inclusive of four franchises, opened one dealership for one awarded franchise in the U.S. and added motorcycles to an existing BMW dealership in Brazil. Aggregate consideration paid for these dealerships totaled \$120.3 million, including the associated real estate and goodwill, as well as \$11.2 million of cash received in the acquisition of the dealerships. The purchase prices were allocated based upon the consideration paid and the estimated fair values of the assets acquired and liabilities assumed at the acquisition dates. In addition, during the twelve months ended December 31, 2017, the Company disposed of three dealerships: two in Brazil representing two franchises and one in the U.K. representing one franchise.

During the twelve months ended December 31, 2016, the Company acquired 12 U.K. dealerships, inclusive of 15 franchises, and opened two additional dealerships for two awarded franchises in the U.K. The Company also acquired one dealership in Brazil, representing one franchise, and opened two additional dealerships in Brazil representing two acquired and two previously awarded franchises. Aggregate consideration paid for these dealerships totaled \$61.2 million, including the associated real estate and goodwill, as well as \$3.9 million of cash received in the

acquisition of the dealerships. The purchase prices were allocated based upon the consideration paid and the estimated fair values of the assets acquired and liabilities assumed at the acquisition dates. In addition, during the twelve months ended December 31, 2016, the Company disposed of ten franchises: five in the U.S., four in Brazil and one in the U.K. Primarily as a result of these U.S., Brazil and U.K. dealership dispositions, a net pre-tax gain of \$2.7 million, a net pretax loss of \$0.8 million and a net pretax loss of \$0.3 million, respectively, were recognized for the twelve months ended December 31, 2016.

5. DERIVATIVE INSTRUMENTS AND RISK MANAGEMENT ACTIVITIES

The periodic interest rates of the Revolving Credit Facility (as defined in Note 12, "Credit Facilities") and certain variable-rate real estate related borrowings in the U.S. are indexed to the one-month LIBOR plus an associated company credit risk rate. In order to minimize the earnings variability related to fluctuations in these rates, the Company employs an interest

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

rate hedging strategy, whereby it enters into arrangements with various financial institutional counterparties with investment grade credit ratings, swapping its variable interest rate exposure for a fixed interest rate over terms not to exceed the related variable-rate debt.

In effect as of December 31, 2018 and December 31, 2017, the Company held interest rate derivative instruments with an aggregate notional value of \$753.1 million and \$623.0 million, respectively, that fixed its underlying one-month LIBOR at a weighted average rate of 2.4% and 2.5%, respectively. Of the \$753.1 million in notional value of swaps in effect as of December 31, 2018, \$300.0 million became effective during the year ended December 31, 2018. The following table presents the notional value of the annual expiration of swaps in effect as of December 31, 2018, excluding forward starting swaps (in millions):

	2019	2020	2021	2022	2023	2024
Notional amount of swaps expiring	\$353.0	\$253.0	\$111.3	\$18.1	\$13.6	\$4.2

In addition to the \$753.1 million of swaps in effect as of December 31, 2018, the Company held 5 additional interest rate derivative instruments with forward start dates between January 2019 and December 2020 and expiration dates between December 2021 and December 2030. As of December 31, 2018, the aggregate notional value of these 5 forward-starting swaps was \$275.0 million, of which \$150.0 million are to become effective by January 2, 2019, and the weighted average interest rate was 1.9%. The combination of the interest rate derivative instruments currently in effect and these forward-starting derivative instruments is structured such that the notional value in effect at any given time through December 2030 does not exceed \$902.4 million, which is less than the Company's expectation for variable rate debt outstanding during such period.

In aggregate, as of December 31, 2018 and December 31, 2017, the Company reflected liabilities from interest rate risk management activities of \$1.8 million and \$10.6 million, respectively, in its Consolidated Balance Sheets. In addition, as of December 31, 2018 and December 31, 2017, the Company reflected \$13.6 million and \$9.5 million, respectively, of assets from interest rate risk management activities, which is included in Other assets. Included in Accumulated other comprehensive income (loss) at December 31, 2018, were accumulated unrealized gains, net of income taxes, totaling \$8.9 million, related to these interest rate derivative instruments. At December 31, 2017 and 2016, accumulated unrealized losses, net of income taxes totaled \$0.7 million, and \$9.3 million, respectively, related to these interest rate derivative instruments. As of December 31, 2018 and 2017, all of the Company's derivative contracts that were in effect were determined to be effective. The Company had no gains or losses related to ineffectiveness or amounts excluded from effectiveness testing recognized in the Consolidated Statements of Operations for the years ended December 31, 2018, 2017 or 2016, respectively. The following table presents the impact during the current and comparative prior year periods for the Company's derivative financial instruments on its Consolidated Statements of Operations and Consolidated Balance Sheets.

The Company records the majority of the impact of the periodic settlements of these swaps as a component of floorplan interest expense. For the years ended December 31, 2018, 2017 and 2016, the impact of the Company's interest rate hedges in effect increased floorplan interest expense by \$4.7 million, \$10.3 million, and \$11.1 million, respectively. Total floorplan interest expense, inclusive of the aforementioned impact of the Company's interest rate hedges, was \$59.9 million, \$52.4 million, and \$44.9 million for the years ended December 31, 2018, 2017 and 2016, respectively.

The following tables present the impact for the Company's interest rate derivative instruments on its Consolidated Statements of Operations and Consolidated Balance Sheets (in thousands):

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Amount of Unrealized Income (Loss), Net of Tax, Recognized in OCI Years Ended December 31,		
	2018	2017	2016
Derivatives in Cash Flow Hedging Relationship			
Interest rate derivative instruments	\$6,546	\$1,034	\$1,728
	Amount of Income (Loss) Reclassified from OCI into Statement of Operations Years Ended December 31,		
	2018	2017	2016
Location of Income (Loss) Reclassified from OCI into Statements of Operations			
Floorplan interest expense	\$(4,671)	\$(10,272)	\$(11,097)
Other interest expense	(476)	(1,924)	(2,332)
The net amount of gain expected to be reclassified out of other comprehensive income (loss) into earnings as an offset to floorplan interest expense or other interest expense, net in the next twelve months is \$4.2 million.			

6. STOCK-BASED COMPENSATION PLANS

The Company provides stock-based compensation benefits to employees and non-employee directors pursuant to its 2014 Long Term Incentive Plan (the "Incentive Plan"), as well as to employees pursuant to its Employee Stock Purchase Plan, as amended (the "Purchase Plan", formerly named the 1998 Employee Stock Purchase Plan).

Long Term Incentive Plan

The Incentive Plan provides for the grant of options (including options qualified as incentive stock options under the Internal Revenue Code of 1986, as amended (the "Code") and options that are non-qualified), restricted stock, performance awards, bonus stock, and phantom stock to the Company's employees, consultants, non-employee directors and officers. The Incentive Plan expires on May 21, 2024. The terms of the awards (including vesting schedules) are established by the Compensation Committee of the Company's Board of Directors. As of December 31, 2018, there were 842,532 shares available for issuance under the Incentive Plan.

Restricted Stock Awards

Under the Incentive Plan, the Company grants to non-employee directors and certain employees restricted stock awards or, at their election, restricted stock units (to non-employee directors only) at no cost to the recipient. Restricted stock awards qualify as participating securities as each award contains non-forfeitable rights to dividends. As such, the two-class method is required for the computation of earnings per share. See Note 7, "Earnings Per Share" for further details. Restricted stock awards are considered outstanding at the date of grant, but are subject to vesting periods upon issuance of up to five years. Restricted stock units are considered vested at the time of issuance. However, they convey no voting rights, and therefore, not considered outstanding when issued. Restricted stock units settle in cash upon the termination of the grantees' employment or directorship. In the event an employee or non-employee director terminates his or her employment or directorship with the Company prior to the lapse of the restrictions, the shares, in most cases, will be forfeited to the Company. The Company issues new shares or treasury shares, if available, when restricted stock vests. Compensation expense for restricted stock awards is calculated based on the market price of the Company's common stock at the date of grant and recognized over the requisite service period. Forfeitures are estimated at the time of valuation and reduce expense ratably over the vesting period. This estimate is adjusted annually based on the extent to which actual or expected forfeitures differ from the previous estimate.

A summary of the restricted stock awards as of December 31, 2018, along with the changes during the year then ended, is as follows:

F-23

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Awards	Weighted Average Grant Date Fair Value
Nonvested at December 31, 2017	702,778	\$ 68.23
Granted	246,721	74.09
Vested	(236,334)	64.38
Forfeited	(31,365)	69.71
Nonvested at December 31, 2018	681,800	\$ 71.60

The total fair value of restricted stock awards which vested during the years ended December 31, 2018, 2017 and 2016, was \$15.2 million, \$19.2 million and \$16.5 million, respectively.

Employee Stock Purchase Plan

The Purchase Plan authorizes the issuance of up to 4.5 million shares of common stock and provides that no options to purchase shares may be granted under the Purchase Plan after May 19, 2025. The Purchase Plan is available to all employees of the Company and its participating subsidiaries and is a qualified plan as defined by Section 423 of the Internal Revenue Code. At the end of each fiscal quarter (the "Option Period") during the term of the Purchase Plan, employees can acquire shares of common stock from the Company at 85% of the fair market value of the common stock on the first or the last day of the Option Period, whichever is lower. As of December 31, 2018, there were 991,087 shares available for issuance under the Purchase Plan. During the years ended December 31, 2018, 2017 and 2016, the Company issued 148,007, 123,448, and 152,138 shares, respectively, of common stock to employees participating in the Purchase Plan. With respect to shares issued under the Purchase Plan, the Company's Board of Directors has authorized specific share repurchases to fund the shares issuable under the Purchase Plan.

The weighted average per share fair value of employee stock purchase rights issued pursuant to the Purchase Plan was \$15.15, \$16.51, and \$13.40 during the years ended December 31, 2018, 2017 and 2016, respectively. The fair value of stock purchase rights is calculated using the grant date stock price, the value of the embedded call option and the value of the embedded put option. Cash received from Purchase Plan purchases was \$7.6 million, \$7.1 million and \$7.1 million for the years ended December 31, 2018, 2017 and 2016, respectively.

Stock-Based Compensation

Total stock-based compensation cost was \$18.7 million, \$18.9 million, and \$21.1 million for the years ended December 31, 2018, 2017 and 2016, respectively. As of December 31, 2018, there was \$34.7 million of total unrecognized compensation cost related to stock-based compensation arrangements which is expected to be recognized over a weighted-average period of 3.2 years.

7. EARNINGS (LOSS) PER SHARE

The Company utilizes the two-class method for the computation of EPS. The two-class method requires a portion of net income to be allocated to participating securities, which are unvested awards of share-based payments with non-forfeitable rights to receive dividends or dividend equivalents. The Company's restricted stock awards qualify as participating securities as each contain non-forfeitable rights to dividends. Income allocated to these participating securities is excluded from net earnings available to common shares, as shown in the table below. Basic EPS is computed by dividing net income available to basic common shares by the weighted average number of basic common shares outstanding during the period. Diluted EPS is computed by dividing net income available to diluted common shares by the weighted average number of dilutive common shares outstanding during the period.

The following table sets forth the calculation of EPS for the years ended December 31, 2018, 2017, and 2016 (in thousands, except per share amounts):

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Years Ended December 31,		
	2018	2017	2016
Weighted average basic common shares outstanding	19,453	20,420	21,161
Dilutive effect of employee stock purchases, net of assumed repurchase of treasury stock	8	5	9
Weighted average dilutive common shares outstanding	19,461	20,425	21,170
Basic:			
Net income (loss)	\$157,772	\$213,442	\$147,065
Less: Earnings (loss) allocated to participating securities	5,416	7,512	5,871
Earnings (loss) available to basic common shares	\$152,356	\$205,930	\$141,194
Basic earnings (loss) per common share	\$7.83	\$10.08	\$6.67
Diluted:			
Net income (loss)	\$157,772	\$213,442	\$147,065
Less: Earnings (loss) allocated to participating securities	5,414	7,511	5,869
Earnings (loss) available to diluted common shares	\$152,358	\$205,931	\$141,196
Diluted earnings (loss) per common share	\$7.83	\$10.08	\$6.67

8. INCOME TAXES

The Company is subject to U.S. federal income taxes and income taxes in numerous U.S. states. In addition, the Company is subject to income tax in the U.K. and Brazil relative to its foreign subsidiaries. Income (loss) before income taxes by geographic area was as follows (in thousands):

	Years Ended December 31,		
	2018	2017	2016
Domestic	\$192,105	\$206,579	\$222,178
Foreign	13,298	12,424	5,193
Total income before income taxes	\$205,403	\$219,003	\$227,371

In accordance with SEC Staff Accounting Bulletin No. 118, Income Tax Accounting Implications of the Tax Cuts and Job Act (“SAB 118”), the Company made a reasonable estimate of the Tax Act’s impact and provisionally recorded this estimate in its results for the period ended December 31, 2017. As of December 31, 2018, the Company has completed its accounting for all aspects of the Tax Act and recorded a \$0.6 million adjustment as a reduction of income tax expense from continuing operations. The Company also determined that it does not have a transition tax liability for previously untaxed accumulated and current earnings and profits of foreign subsidiaries. The Company completed the evaluation of the impact of the Tax Act based on available guidance issued by the U.S. Treasury Department, the IRS, state tax authorities and other standard-setting bodies.

In February 2018, the FASB issued ASU 2018-02, requiring reporting entities to select an accounting policy regarding the classification of all stranded tax effects in Other Comprehensive Income (“OCI”) caused by the change in the federal corporate tax rate contained in the Tax Act. This standard takes effect for all entities in fiscal years beginning after December 15, 2018, with early adoption permitted. As of December 31, 2018, the Company elected to reclassify the income tax effects resulting from the Tax Act from OCI to Retained Earnings, recording a \$0.2 million increase in OCI and a corresponding reduction in Retained Earnings.

Federal, state and foreign income tax provisions (benefits) were as follows (in thousands):

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Years Ended December 31,		
	2018	2017	2016
Federal:			
Current	\$35,923	\$44,921	\$57,321
Deferred	2,600	(46,938)	18,704
State:			
Current	4,327	3,774	4,636

Deferred	(10)	(3,046)	(6,420)
Provision for income taxes	\$47,631	\$5,561	\$80,306

Actual income tax expense differed from income tax expense computed by applying the applicable U.S. federal statutory corporate tax rate of 21.0% in 2018 and of 35.0% in 2017 and 2016 to income before income taxes, as follows (in thousands):

	Years Ended December 31,		
	2018	2017	2016
Provision at the U.S. federal statutory rate	\$43,135	\$76,651	\$79,580
Increase (decrease) resulting from:			
State income tax, net of benefit for federal deduction	3,639	4,472	4,230
Foreign income tax rate differential	(259)	(2,443)	(2,799)
Employment credits	(1,327)	(862)	(821)
Changes in valuation allowances	3,442	629	749
Non-deductible goodwill	—	—	34
Tax Cuts and Jobs Act - Enactment date effect	(575)	(73,028)	—
Stock-based compensation	(74)	(136)	368
Other	(350)	278	(1,035)
Provision for income taxes	\$47,631	\$5,561	\$80,306

For the year ended December 31, 2018, the Company recorded a tax provision of \$47.6 million. This included the impact of the Tax Act that made broad and complex changes to the Code. Those changes include, but are not limited to, reducing the U.S. federal corporate tax rate from 35.0% to 21.0%, creating a territorial tax system that generally eliminates U.S. federal income taxes on dividends from foreign subsidiaries, requiring companies to pay a one-time transition tax on unrepatriated earnings of their foreign subsidiaries, creating a “minimum tax” on certain foreign earnings (i.e. global intangible low-taxed income, or “GILTI”), limiting the deduction for net interest expense incurred by U.S. corporations, and eliminating certain deductions, including deductions for certain compensation arrangements and certain other business expenses. The Company recognizes the tax on GILTI as a period expense in the period the tax is incurred. Under this policy, the Company has not provided deferred taxes related to temporary differences that upon their reversal will affect the amount of income subject to GILTI in the period. For the year ended December 31, 2018, the Company estimated it has no GILTI tax liability.

The Company's effective income tax rate was more than the U.S. federal statutory rate of 21.0%, due primarily to: (1) the taxes provided for in U.S. state jurisdictions; and (2) valuation allowances provided for net operating losses and other deferred tax assets in certain U.S. states and in Brazil, partially offset by: (1) income generated in the U.K., which is taxed at a 19.0% statutory rate; (2) employment tax credits; and (3) the enactment date adjustments from the Tax Act. As a result of these items recorded in 2018 compared to the 2017 items discussed below, the effective tax rate for the year ended December 31, 2018 increased to 23.2%, as compared to 2.5% for the year ended December 31, 2017.

During 2017, the Company recorded a tax provision of \$5.6 million. This included the tax benefit for the deferred tax impact of the Tax Act noted above, as well as excess tax deductions for restricted stock resulting from the adoption of ASU 2016-09, which were partially offset by certain expenses for stock-based compensation recorded in 2017 that were non-deductible for income tax purposes. For the year ended December 31, 2017, the Company also provided valuation allowances with respect to deferred tax assets primarily relating to goodwill and net operating losses of certain Brazil subsidiaries, as well

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

as state net operating losses in the U.S., based on expectations concerning their realizability. As a result of these items recorded in 2017 compared to the 2016 items discussed below, the effective tax rate for the year ended December 31, 2017 decreased to 2.5%, as compared to 35.5% for the year ended December 31, 2016.

During 2016, the Company recorded a tax provision of \$80.3 million. Certain expenses for stock-based compensation recorded in 2015 were non-deductible for income tax purposes. The Company provided valuation allowances with respect to goodwill and net operating losses of certain Brazil subsidiaries, as well as state net operating losses in the U.S., based on expectations concerning their realizability.

Deferred income tax provisions resulted from temporary differences in the recognition of income and expenses for financial reporting purposes and for tax purposes. The tax effects of these temporary differences representing deferred tax assets/liabilities resulted principally from the following (in thousands):

	December 31,	
	2018	2017
Deferred tax assets:

As of December 31, 2018, the Company had state NOL carryforwards in the U.S. of \$271.8 million that will expire between 2019 and 2038, and foreign NOL carryforwards of \$113.2 million that may be carried forward indefinitely. To the extent that the Company expects that net income will not be sufficient to realize these NOLs in certain jurisdictions, a valuation allowance has been established.

The Company believes it is more likely than not that its deferred tax assets, net of valuation allowances provided, will be realized, based primarily on our expectation of future taxable income, considering future reversals of existing taxable temporary differences.

As of December 31, 2018, the Company had two controlled foreign corporations that own its foreign operations (the “Foreign Subsidiaries”). The Company has not provided for U.S. deferred taxes on the outside basis differences of its Foreign Subsidiaries, as the Company has taken the position that its investment in the Foreign Subsidiaries will be permanently reinvested outside the U.S. The book basis for one of the Company’s Foreign Subsidiaries that consists of the Company’s U.K. operations exceeded the tax basis by approximately \$25.7 million, as of December 31, 2017. If a taxable event resulting in the recognition of these outside basis differences occurred, the resulting tax would not be material.

Based on the statutes of limitations in the applicable jurisdiction in which the Company operates, the Company is generally no longer subject to examinations by U.S. tax authorities in years prior to 2014, by U.K. tax authorities in

years prior to 2014 and by Brazil tax authorities in years prior to 2013.

F-27

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

A reconciliation of the Company's unrecognized tax benefits is as follows (in thousands):

	2018
BALANCE at January 1	\$1,151
Additions for current tax	562
Additions based on tax positions in prior years	—
Reductions for tax positions	—
Settlements with tax authorities	—
Reductions due to lapse of statutes of limitations	(115)
BALANCE, December 31	\$1,598

The Company had no unrecognized tax benefits as of December 31, 2016 with respect to uncertain tax positions and did not incur any interest and penalties for the year then ended. Included in the balance of unrecognized tax benefits as of December 31, 2018 and 2017, are \$1.4 million and \$1.0 million, respectively, of tax benefits that would affect the effective tax rate if recognized.

For both years ended December 31, 2018, and 2017 the Company recorded approximately \$0.2 million of interest and penalty related to its uncertain tax positions. Consistent with prior practice, the Company recognizes interest and penalties related to uncertain tax positions in income tax expense in the accompanying Consolidated Statements of Operations.

During 2018, the Company incurred \$110.1 million of capital expenditures for the construction of new or expanded facilities and the purchase of equipment and other fixed assets in the maintenance of the Company's dealerships and facilities, excluding \$8.8 million of capital expenditures accrued as of December 31, 2017. As of December 31, 2018, the Company had accrued \$9.2 million of capital expenditures. In addition, in 2018, the Company purchased real estate (including land and buildings) associated with existing dealership operations totaling \$31.4 million. And, in conjunction with the acquisition of dealerships and franchises in 2018, the Company acquired \$22.4 million of real estate and other property and equipment. The Company recognized \$5.1 million in asset impairments related to property and equipment for the year ended December 31, 2018, all of which related to the Company's U.S. segment. Further, the Company had \$10.6 million of dealership related assets, including property and equipment and allocated goodwill, qualifying as held-for-sale assets as of December 31, 2018, because they were expected to be disposed of within the next twelve months. Such assets were reclassified to Prepaid expenses and other current assets on the Company's Consolidated Balance Sheets. All such held-for-sale assets related to the Company's U.S. segment. During 2017, the Company incurred \$98.3 million of capital expenditures for the construction of new or expanded facilities and the purchase of equipment and other fixed assets in the maintenance of the Company's dealerships and facilities, excluding \$15.9 million of capital expenditures accrued as of December 31, 2016. As of December 31, 2017, the Company had accrued \$8.8 million of capital expenditures. In addition, the Company purchased real estate (including land and buildings) associated with existing dealership operations totaling \$110.4 million. And, in conjunction with the acquisition of dealerships and franchises in 2016, the Company acquired \$29.0 million of real estate and other property and equipment. The Company recognized \$0.2 million in asset impairments related to property and equipment for the year ended December 31, 2017.

Depreciation and amortization expense, including amortization of capital leases, totaled \$67.1 million, \$57.9 million and \$51.2 million for the years ended December 31, 2018, 2017 and 2016, respectively. As of December 31, 2018 and 2017, \$68.8 million and \$77.4 million, respectively, of buildings under capital leases were recorded as property and equipment, before accumulated depreciation.

12. CREDIT FACILITIES

In the U.S., the Company has a \$1.8 billion revolving syndicated credit arrangement that matures on June 17, 2021 and is comprised of 24 financial institutions, including six manufacturer-affiliated finance companies ("Revolving Credit Facility"), consisting of two tranches. The Company also has a \$300.0 million floorplan financing arrangement ("FMCC Facility") with Ford Motor Credit Company ("FMCC") for financing of new Ford vehicles in the U.S. and other floorplan financing arrangements with several other automobile manufacturers for financing of a portion of its U.S. rental vehicle inventory. In the U.K., the Company has financing arrangements with BMW Financial Services NA, LLC ("BMWFS"), Volkswagen Finance, Toyota Motor Credit Corporation ("TMCC"), FMCC and a third-party financial institution for financing of its new, used, and rental vehicles. In Brazil, the Company has financing arrangements for new, used, and rental vehicles with several financial institutions, most of which are manufacturer affiliated. Within the

Company's Consolidated Balance Sheets, Floorplan notes payable - credit facility and other primarily reflects amounts payable for the purchase of specific new, used and rental vehicle inventory (with the exception of new and rental vehicle purchases financed through lenders affiliated with the respective manufacturer) whereby financing is provided by the Revolving Credit Facility. Floorplan notes payable - manufacturer affiliates reflects amounts related to the purchase of vehicles whereby financing is provided by the FMCC Facility, the financing of a portion of the Company's rental vehicles in the U.S. (through lenders affiliated with the respective manufacturer), as well as the financing of new, used, and rental vehicles with manufacturer affiliates in both the U.K. and Brazil. Payments on

F-29

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

the floorplan notes payable are generally due as the vehicles are sold. As a result, these obligations are reflected in the accompanying Consolidated Balance Sheets as current liabilities. The outstanding balances under these financing arrangements were as follows (in thousands):

	December 31,	
	2018	2017
Floorplan notes payable — credit facility and other		
New vehicles	\$1,063,710	\$1,019,511
Used vehicles	167,578	176,802
Rental vehicles	20,114	23,530

Floorplan notes payable — manufacturer affiliates		
FMCC Facility	\$160,786	\$152,984
Floorplan offset	(100)	(22,500)
Total FMCC Facility	160,686	130,484
Foreign and rental vehicles	257,138	244,199
Total floorplan notes payable — manufacturer affiliates	\$417,824	\$374,683

Revolving Credit Facility

The Revolving Credit Facility consists of two tranches, providing a maximum of \$1.75 billion for U.S. vehicle inventory floorplan financing (“Floorplan Line”), as well as a maximum of \$360.0 million and a minimum of \$50.0 million for working capital and general corporate purposes, including acquisitions (“Acquisition Line”). The Acquisition Line is not due until maturity of the Revolving Credit Facility and is therefore, classified as long-term debt in the accompanying Consolidated Balance Sheets. See further discussion of the Acquisition Line in Note 13, “Long-Term Debt”. The capacity under these two tranches can be re-designated within the overall \$1.8 billion commitment, subject to the aforementioned limits. Up to \$125.0 million of the Acquisition Line can be borrowed in either euros or British pound sterling. The Revolving Credit Facility can be expanded to a maximum commitment of \$2.1 billion, subject to participating lender approval. The Floorplan Line bears interest at rates equal to the LIBOR plus 125 basis points for new vehicle inventory and the LIBOR plus 150 basis points for used vehicle inventory. The Acquisition Line bears interest at the LIBOR plus 150 basis points plus a margin that ranges from zero to 100 basis points, depending on the Company’s total adjusted leverage ratio, for borrowings in U.S. dollars and a LIBOR equivalent plus 125 to 250 basis points, depending on the Company’s total adjusted leverage ratio, on borrowings in euros or British pound sterling. The Floorplan Line requires a commitment fee of 0.15% per annum on the unused portion. Amounts borrowed by the Company under the Floorplan Line for specific vehicle inventory are to be repaid upon the sale of the vehicle financed, and in no case is a borrowing for a vehicle to remain outstanding for greater than one year. The Acquisition Line also requires a commitment fee ranging from 0.20% to 0.45% per annum, depending on the Company’s total adjusted leverage ratio, based on a minimum commitment of \$50.0 million less outstanding borrowings. In conjunction with the Revolving Credit Facility, the Company has \$3.0 million of related unamortized costs as of December 31, 2018, which are included in Prepaid expenses and other current assets and Other assets on the accompanying Consolidated Balance Sheets and amortized over the term of the facility.

After considering the outstanding balance of \$1.2 billion at December 31, 2018, the Company had \$247.6 million of available floorplan borrowing capacity under the Floorplan Line. Included in the \$247.6 million available borrowings under the Floorplan Line was \$33.6 million of immediately available funds. The weighted average interest rate on the Floorplan Line was 3.7% and 2.7% as of December 31, 2018 and 2017, respectively, excluding the impact of the Company’s interest rate derivative instruments. With regards to the Acquisition Line, there was \$31.8 million borrowings outstanding as of December 31, 2018 and \$27.0 million borrowings outstanding as of December 31, 2017.

The interest rate on the Acquisition Line was 2.47% and 2.25% as of December 31, 2018 and 2017, respectively. After considering \$25.3 million of outstanding letters of credit and other factors included in the Company's available borrowing base calculation, there was \$277.6 million of available borrowing

F-30

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

capacity under the Acquisition Line as of December 31, 2018. The amount of available borrowing capacity under the Acquisition Line is limited from time to time based upon certain debt covenants.

All of the U.S. dealership-owning subsidiaries are co-borrowers under the Revolving Credit Facility. The Company's obligations under the Revolving Credit Facility are secured by essentially all of the Company's U.S. personal property (other than equity interests in dealership-owning subsidiaries), including all motor vehicle inventory and proceeds from the disposition of dealership-owning subsidiaries, excluding inventory financed directly with manufacturer-affiliates and other third-party financing institutions. The Revolving Credit Facility contains a number of significant covenants that, among other things, restrict the Company's ability to make disbursements outside of the ordinary course of business, dispose of assets, incur additional indebtedness, create liens on assets, make investments and engage in mergers or consolidations. The Company is also required to comply with specified financial tests and ratios defined in the Revolving Credit Facility, such as the fixed charge coverage and total adjusted leverage ratios. Further, the Revolving Credit Facility restricts the Company's ability to make certain payments, such as dividends or other distributions of assets, properties, cash, rights, obligations or securities ("Restricted Payments"). The Restricted Payments cannot exceed the sum of \$208.5 million plus (or minus if negative) (a) one-half of the aggregate consolidated net income for the period beginning on April 1, 2014 and ending on the date of determination and (b) the amount of net cash proceeds received from the sale of capital stock after June 2, 2014 and ending on the date of determination less (c) cash dividends and share repurchases after June 2, 2014 ("Credit Facility Restricted Payment Basket"). For purposes of the calculation of the Credit Facility Restricted Payment Basket, net income represents such amounts per the Consolidated Financial Statements adjusted to exclude the Company's foreign operations, non-cash interest expense, non-cash asset impairment charges, and non-cash stock-based compensation. As of December 31, 2018, the Credit Facility Restricted Payment Basket totaled \$72.4 million.

As of December 31, 2018 and 2017, the Company was in compliance with all applicable covenants and ratios under the Revolving Credit Facility.

Ford Motor Credit Company Facility

The FMCC Facility provides for the financing of, and is collateralized by, the Company's Ford new vehicle inventory in the U.S., including affiliated brands. This arrangement provides for \$300.0 million of floorplan financing and is an evergreen arrangement that may be canceled with 30 days' notice by either party. As of December 31, 2018, the Company had an outstanding balance of \$160.7 million under the FMCC Facility with an available floorplan borrowing capacity of \$139.3 million. Included in the \$139.3 million available borrowings under the FMCC Facility was \$0.1 million of immediately available funds. This facility bears interest at a rate of Prime plus 150 basis points minus certain incentives. The interest rate on the FMCC Facility was 7.00% and 6.00% before considering the applicable incentives as of December 31, 2018 and 2017, respectively.

Other Credit Facilities

The Company has credit facilities with BMWFS, Volkswagen Finance, TMCC, FMCC and a third-party financial institution for the financing of new, used and rental vehicle inventories related to its U.K. operations. These facilities are denominated in British pound sterling, are evergreen arrangements that may be canceled with notice by either party and bear interest at a base rate, plus a surcharge that varies based upon the type of vehicle being financed. As of December 31, 2018, borrowings outstanding under these facilities totaled \$159.2 million. Annual interest rates charged on borrowings outstanding under these facilities, after the grace period of zero to 30 days, ranged from 2.17% to 3.42%.

The Company has credit facilities with financial institutions in Brazil, most of which are affiliated with the manufacturers, for the financing of new, used and rental vehicle inventories related to its Brazilian operations. These facilities are denominated in Brazilian real and have renewal terms ranging from one month to twelve months. They may be canceled with notice by either party and bear interest at a benchmark rate, plus a surcharge that varies based upon the type of vehicle being financed. As of December 31, 2018, borrowings under these facilities totaled \$22.9 million. Annual interest rates charged on borrowings outstanding under these facilities, after the grace period of zero to 90 days, ranged from 10.81% to 16.63%.

Excluding rental vehicles financed through the Revolving Credit Facility, financing for U.S. rental vehicles is typically obtained directly from the automobile manufacturers. These financing arrangements generally require small monthly payments and mature in varying amounts over a period of two years. Rental vehicles are typically transferred to used vehicle inventory when they are removed from service and repayment of the borrowing is required at that time. As of December 31, 2018, borrowings outstanding under these rental vehicle facilities totaled \$116.1 million, with interest rates that vary up to 6.75%.

13. LONG-TERM DEBT

The Company carries its long-term debt at face value, net of applicable discounts and capitalized debt issuance costs. Long-term debt consisted of the following (in thousands):

F-31

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	December 31,	
	2018	2017

	\$1,281,489	\$1,318,184

Short-Term Financing

The Company includes short-term financing loans within Current maturities of long-term debt and short-term financing, in the Company's Consolidated Balance Sheets. As of December 31, 2018, the Company had a short-term financing arrangement in Brazil that totaled \$0.7 million, which represented borrowings of \$2.4 million and repayments of \$1.3 million during the twelve months ended December 31, 2018. At December 31, 2018, the Company had two short-term working capital loans with third-party financial institutions in the U.K. that totaled \$7.6 million, which represented borrowings of \$37.9 million and repayments of \$43.3 million during the twelve months ended December 31, 2018. At December 31, 2017, short-term borrowings under the U.K. third-party loans totaled \$13.3 million. In addition, current maturities of long-term debt and short-term financing as of December 31, 2017, included an unsecured loan agreement with a third-party financial institution in the U.S. that totaled \$24.7 million. During the twelve months ended December 31, 2018, the Company repaid the entire balance under the U.S. unsecured loan.

5.00% Senior Notes

On June 2, 2014, the Company issued 5.00% senior unsecured notes with a face amount of \$350.0 million ("5.00% Notes"). Subsequently, on September 9, 2014, the Company issued an additional \$200.0 million of 5.00% Notes at a discount of 1.5% from face value. The 5.00% Notes mature on June 1, 2022 with interest due semiannually, in arrears, on June 1 and December 1 of each year. The Company may redeem some or all of the 5.00% Notes at specified prices, plus accrued and unpaid interest. The Company may be required to purchase the 5.00% Notes if it sells certain assets or triggers the change in control provisions defined in the 5.00% Notes indenture. The 5.00% Notes are senior unsecured obligations and rank equal in right of payment to all of the Company's existing and future senior unsecured debt and senior in right of payment to all of its future subordinated debt. The 5.00% Notes are guaranteed by substantially all of the Company's U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of the Company's U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.00% Notes are structurally subordinated to the liabilities of its non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.00% Notes is the same as under the Credit Facility Restricted Payment Basket. The 5.00% Notes were registered with the Securities and Exchange Commission in June 2015. The 5.00% Notes are presented net of unamortized underwriters' fees, discount and debt issuance costs of \$6.3 million as of December 31, 2018, which are being amortized over the term of the 5.00% Notes.

5.25% Senior Notes

On December 8, 2015, the Company issued 5.25% senior unsecured notes with a face amount of \$300.0 million ("5.25% Notes"). The 5.25% Notes mature on December 15, 2023 with interest due semiannually, in arrears, on June 15 and December 15 of each year. The Company may redeem some or all of the 5.25% Notes at specified prices, plus accrued and unpaid interest. The Company may be required to purchase the 5.25% Notes if it sells certain assets or triggers the change in control provisions defined in the 5.25% Notes indenture. The 5.25% Notes are senior unsecured obligations and rank equal in right of payment to all of the Company's existing and future senior unsecured debt and senior in right of payment to all of its future subordinated debt. The 5.25% Notes are guaranteed by

substantially all of the Company's U.S. subsidiaries. The U.S. subsidiary guarantees rank equally in the right of payment to all of the Company's U.S. subsidiary guarantor's existing and future subordinated debt. In addition, the 5.25% Notes are structurally subordinated to the liabilities of its non-guarantor subsidiaries and are subject to customary covenants, including a restricted payment basket and debt limitations. The restricted payment basket calculation under the terms of the 5.25% Notes is the same as under the Credit Facility Restricted Payment Basket. The 5.25% Notes are

F-32

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

presented net of unamortized underwriters' fees, discount and debt issuance costs of \$3.3 million as of December 31, 2018, which are being amortized over the term of the 5.25% Notes.

Acquisition Line

The Revolving Credit Facility, which includes the Acquisition Line, has the total borrowing capacity of \$1.8 billion and matures on June 17, 2021. The Acquisition Line provides a maximum of \$360.0 million and a minimum of \$50.0 million for working capital and general corporate purposes, including acquisitions. See Note 12, "Credit Facilities," for further discussion on the Company's Revolving Credit Facility and Acquisition Line.

Real Estate Related and Other Long-Term Debt

The Company, as well as certain of its wholly-owned subsidiaries, has entered into separate term mortgage loans in the U.S. with three of its manufacturer-affiliated finance partners - TMCC, BMWFS and FMCC, as well as several third-party financial institutions (collectively, "U.S. Notes"). The U.S. Notes may be expanded for borrowings related to specific buildings and/or properties and are guaranteed by the Company. Each of the U.S. Notes was made in connection with, and is secured by mortgage liens on, the real property owned by the Company that is mortgaged under the loans. The U.S. Notes bear interest at fixed rates between 3.25% and 4.69%, and at variable indexed rates plus a spread between 1.50% and 2.50% per annum. The U.S. Notes consist of 60 term loans for an aggregate principal amount of \$420.1 million. As of December 31, 2018, borrowings outstanding under the U.S. Notes totaled \$343.8 million, with \$67.9 million classified as Current maturities of long-term debt and short-term financing in the accompanying Consolidated Balance Sheets, as compared to \$350.0 million outstanding with \$26.4 million classified as Current maturities of long-term debt and short-term financing as of December 31, 2017. During 2018, the Company made additional net borrowings and principal payments of \$42.7 million and \$48.9 million, respectively. The U.S. Notes are presented net of unamortized underwriters' fees, discount, and debt issuance costs of \$0.6 million as of December 31, 2018, which are being amortized over the terms of the mortgage loans. The agreements provide for monthly payments based on 15 or 20-year amortization schedules and mature between January 2019 and November 2032. The U.S. Notes are cross-collateralized and cross-defaulted with each other.

The Company has entered into 18 separate term mortgage loans in the U.K. with third-party financial institutions, which are secured by the Company's U.K. properties. These mortgage loans (collectively, "U.K. Notes") are denominated in British pound sterling and are being repaid in monthly installments that will mature by September 2034. As of December 31, 2018, borrowings under the U.K. Notes totaled \$73.8 million, with \$7.6 million classified as Current maturities of long-term debt and short-term financing in the accompanying Consolidated Balance Sheets, as compared to \$79.2 million outstanding with \$7.4 million classified as Current maturities of long-term debt and short-term financing as of December 31, 2017. During 2018, the Company made additional borrowings and principal payments of \$12.1 million and \$12.5 million, respectively, associated with the U.K. Notes. Additionally, during 2018, the Company has entered into an unsecured loan agreement in the U.K. with a third-party financial institution that matures in March 2028. As of December 31, 2018, borrowings under the agreement totaled \$18.5 million, with \$2.0 million classified as a Current maturities of long-term debt and short-term financing in the accompanying Consolidated Balance Sheets.

The Company has a separate term mortgage loan in Brazil with a third-party financial institution (the "Brazil Note"). The Brazil Note is denominated in Brazilian real and is secured by one of the Company's Brazilian properties, as well as a guarantee from the Company. The Brazil Note is being repaid in monthly installments that will mature by April 2025. As of December 31, 2018, borrowings under the Brazil Note totaled \$2.5 million, with \$0.3 million classified as a Current maturity of long-term debt and short-term financing in the accompanying Consolidated Balance Sheets. At December 31, 2017, borrowings under the Brazil Note totaled \$3.3 million, with \$0.4 million classified as a Current maturities of long-term debt and short-term financing in the accompanying Consolidated Balance Sheets. During 2018, the Company made no additional borrowings and made principal payments of \$0.5 million associated with the Brazil Note. The Company also has a working capital loan agreement with a third-party financial institution in Brazil. The principal balance on the loan is due by February 2020 with interest only payments being made until the due date. As of December 31, 2018 and 2017, borrowings under the Brazilian third-party loan totaled \$5.7 million and \$6.6

million, respectively. During 2018, the Company made no additional borrowings or principal payments.

Fair Value of Long-Term Debt

The Company's outstanding 5.00% Notes had a fair value of \$521.6 million and \$567.9 million as of December 31, 2018 and December 31, 2017, respectively. The Company's outstanding 5.25% Notes had a fair value of \$286.5 million and \$310.9 million as of December 31, 2018 and December 31, 2017, respectively. The carrying value of the Company's fixed interest rate borrowings included in Real estate related and other long-term debt totaled \$79.5 million and \$86.8 million as of December 31, 2018 and December 31, 2017, respectively. The fair value of such fixed interest rate borrowings was \$76.2 million and \$92.9 million as of December 31, 2018 and December 31, 2017, respectively.

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

The fair value estimates are based on Level 2 inputs of the fair value hierarchy available as of December 31, 2018 and December 31, 2017. The Company determined the estimated fair value of its long-term debt using available market information and commonly accepted valuation methodologies. Considerable judgment is required in interpreting market data to develop the estimates of fair value. Accordingly, these estimates are not necessarily indicative of the amounts that the Company, or holders of the instruments, could realize in a current market exchange. The use of different assumptions and/or estimation methodologies could have a material effect on estimated fair values. The carrying value of the Company's variable rate debt approximates fair value due to the short-term nature of the interest rates.

All Long-Term Debt

Total interest expense on the 5.00% Notes and 5.25% Notes for the years ended December 31, 2018, 2017, and 2016 was \$43.3 million, \$43.3 million, and \$43.3 million, respectively, excluding amortization of discounts and capitalized cost of \$2.2 million, \$2.2 million, and \$2.1 million, respectively.

Total interest expense on real estate related and other long-term debt, as well as the Acquisition Line, for the years ended December 31, 2018, 2017 and 2016, was \$20.3 million, \$15.0 million and \$13.7 million, respectively. These amounts exclude the impact of the interest rate derivative instruments related to various variable-rate, real estate related mortgage loans of \$0.5 million, \$1.9 million, and \$2.3 million for the years ended December 31, 2018, 2017, and 2016, respectively.

In addition, the Company recognized \$9.5 million, \$8.2 million and \$6.6 million of total interest expense related to capital leases and various other notes payable, net of interest income, for the years ended December 31, 2018, 2017 and 2016, respectively.

The Company capitalized \$1.3 million, \$1.6 million, and \$0.7 million of interest on construction projects in 2018, 2017 and 2016, respectively.

The aggregate annual maturities of long-term debt, excluding unamortized capitalized debt issuance costs of \$3.1 million, for the next five years are as follows (in thousands):

Years Ended December 31,	Total
2019	\$84,865
2020	56,408
2021	93,233
2022	593,389
2023	371,834
Thereafter	169,549
Total	\$1,369,278

14. FAIR VALUE MEASUREMENTS

ASC 820 defines fair value as the price that would be received in the sale of an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; requires disclosure of the extent to which fair value is used to measure financial and non-financial assets and liabilities, the inputs utilized in calculating valuation measurements, and the effect of the measurement of significant unobservable inputs on earnings, or changes in net assets, as of the measurement date; and establishes a three-level valuation hierarchy based upon the transparency of inputs utilized in the measurement and valuation of financial assets or liabilities as of the measurement date:

Level 1 — unadjusted, quoted prices for identical assets or liabilities in active markets;

Level 2 — quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, and inputs other than quoted market prices that are observable or that can be corroborated by observable market data by correlation; and

Level 3 — unobservable inputs based upon the reporting entity's internally developed assumptions that market participants would use in pricing the asset or liability.

The Company's financial instruments consist primarily of cash and cash equivalents, contracts-in-transit and vehicle receivables, accounts and notes receivable, investments in debt and equity securities, accounts payable, credit facilities, long-term debt and interest rate swaps. The fair values of cash and cash equivalents, contracts-in-transit and vehicle receivables,

F-34

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

accounts and notes receivable, accounts payable, and credit facilities approximate their carrying values due to the short-term nature of these instruments and/or the existence of variable interest rates. The Company evaluated its assets and liabilities for those that met the criteria of the disclosure requirements and fair value framework of ASC 820 and identified demand obligations, interest rate derivative instruments, and investment balances in certain financial institutions as having met such criteria.

The Company periodically invests in unsecured, corporate demand obligations with manufacturer-affiliated finance companies, which bear interest at a variable rate and are redeemable on demand by the Company. Therefore, the Company has classified these demand obligations as cash and cash equivalents in the accompanying Consolidated Balance Sheets. The Company determined that the valuation measurement inputs of these instruments include inputs other than quoted market prices, that are observable or that can be corroborated by observable data by correlation. Accordingly, the Company has classified these instruments within Level 2 of the hierarchy framework.

In addition, the Company maintains an investment balance with certain of the financial institutions in Brazil that provide credit facilities for the financing of new, used and rental vehicle inventories. The investment balances bear interest at a variable rate and are redeemable by the Company in the future under certain conditions. Certain restrictions exist related to the Company's use of such investment balances, as well as the timing of the Company's access to the funds. The Company has classified these investment balances as long-term assets in the accompanying Consolidated Balance Sheets. The Company determined that the valuation measurement inputs of these instruments include inputs other than quoted market prices, that are observable or that can be corroborated by observable data by correlation. Accordingly, the Company has classified these instruments within Level 2 of the hierarchy framework. Refer to Note 2, "Summary of Significant Accounting Policies and Estimates," for more information on fair value measurements of interest rate derivative instruments.

Asset and liabilities recorded at fair value, within Level 2 of the hierarchy framework, within the Consolidated Balance Sheets as of December 31, 2018 and 2017, respectively, were as follows (in thousands):

	As of December	
	31,	
	2018	2017
Assets:		
Investments	\$2,788	\$844
Demand obligations	13	13
Interest rate derivative financial instruments	13,576	9,501
Total	\$16,377	\$10,358
Liabilities:		
Interest rate derivative financial instruments	\$1,811	\$10,579
Total	\$1,811	\$10,579

15. COMMITMENTS AND CONTINGENCIES

From time to time, the Company's dealerships are named in various types of litigation involving customer claims, employment matters, class action claims, purported class action claims, as well as claims involving the manufacturer of automobiles, contractual disputes and other matters arising in the ordinary course of business. Due to the nature of the automotive retailing business, the Company may be involved in legal proceedings or suffer losses that could have a material adverse effect on the Company's business. In the normal course of business, the Company is required to respond to customer, employee and other third-party complaints. Amounts that have been accrued or paid related to the settlement of litigation are included in SG&A expenses in the Company's Consolidated Statements of Operations. In addition, the manufacturers of the vehicles that the Company sells and services have audit rights allowing them to review the validity of amounts claimed for incentive, rebate or warranty-related items and charge the Company back for amounts determined to be invalid payments under the manufacturers' programs, subject to the Company's right to appeal any such decision. Amounts that have been accrued or paid related to the settlement of manufacturer chargebacks of recognized incentives and rebates are included in cost of sales in the Company's Consolidated

Statements of Operations, while such amounts for manufacturer chargebacks of recognized warranty-related items are included as a reduction of revenues in the Company's Consolidated Statements of Operations.

F-35

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

Legal Proceedings

Currently, the Company is not party to any legal proceedings that, individually or in the aggregate, are reasonably expected to have a material adverse effect on the Company's results of operations, financial condition, or cash flows, including class action lawsuits. However, the results of current, or future, matters cannot be predicted with certainty, and an unfavorable resolution of one or more of such matters could have a material adverse effect on the Company's results of operations, financial condition, or cash flows.

Other Matters

The Company, acting through its subsidiaries, is the lessee under many real estate leases that provide for the use by the Company's subsidiaries of their respective dealership premises. Pursuant to these leases, the Company's subsidiaries generally agree to indemnify the lessor and other parties from certain liabilities arising as a result of the use of the leased premises, including environmental liabilities, or a breach of the lease by the lessee. Additionally, from time to time, the Company enters into agreements in connection with the sale of assets or businesses in which it agrees to indemnify the purchaser, or other parties, from certain liabilities or costs arising in connection with the assets or business. Also, in the ordinary course of business in connection with purchases or sales of goods and services, the Company enters into agreements that may contain indemnification provisions. In the event that an indemnification claim is asserted, liability would be limited by the terms of the applicable agreement. From time to time, primarily in connection with dealership dispositions, the Company's subsidiaries sublet to the dealership purchaser the Company's subsidiaries' interests in any real property leases associated with such dealerships and continue to be primarily obligated on the lease. In these situations, the Company's subsidiaries retain primary responsibility for the performance of certain obligations under such leases. To the extent that the Company remains primarily responsible under such leases, a quantification of such lease obligations is included in the Company's disclosure of future minimum lease payments for non-cancelable operating leases in Note 19, "Operating Leases". In certain instances, also in connection with dealership dispositions, the Company's subsidiaries assign to the dealership purchaser the Company's subsidiaries' interests in any real property leases associated with such dealerships. The Company's subsidiaries may retain secondary responsibility for the performance of certain obligations under such leases to the extent that the assignee does not perform, if such performance is required following the assignment of the lease. Additionally, the Company and its subsidiaries may remain subject to the terms of a guaranty made by the Company and its subsidiaries in connection with such leases. In these circumstances, the Company generally has indemnification rights against the assignee in the event of non-performance under these leases, as well as certain defenses. Although the Company has no reason to believe that it or its subsidiaries will be called upon to perform under any such assigned leases or subleases, the Company estimates that lessee rental payment obligations during the remaining terms of these leases were \$42.1 million as of December 31, 2018. The Company and its subsidiaries also may be called on to perform other obligations under these leases, such as environmental remediation of the leased premises or repair of the leased premises upon termination of the lease. However, potential environmental liabilities are generally known at the time of the sale of the dealership if not previously remediated. The Company does not have any known material environmental commitments or contingencies and presently has no reason to believe that it or its subsidiaries will be called on to so perform. Although not estimated to be material, the Company's exposure under these leases is difficult to estimate and there can be no assurance that any performance of the Company or its subsidiaries required under these leases would not have a material adverse effect on the Company's business, financial condition, or cash flows in the future.

16. ASSET IMPAIRMENTS

The Company performs its annual impairment assessment of the carrying value of its goodwill and intangible franchise rights as of October 31st of each year. The Company also performs interim reviews of all of its long-lived and indefinite-lived assets for impairment when evidence exists that the carrying value may not be recoverable. In the Company's 2018 annual goodwill assessment, the fair value of each of its reporting units exceeded the carrying value of its net assets (step one of the goodwill impairment test). As a result, the Company was not required to conduct the second step of the impairment test for goodwill. If, in future periods, the Company determines that the

carrying amount of its net assets exceeds the respective fair value of its goodwill for any or all of its reporting units, the Company could be required to recognize a material non-cash asset impairment charge to the goodwill associated with the reporting unit(s).

In the Company's 2018 interim and annual impairment assessments of long-lived assets and intangible franchise rights, the Company determined that the carrying values of certain of its intangible franchise rights were greater than the fair value, and as a result, recognized \$38.7 million in aggregate pre-tax non-cash asset impairment charges. In addition, the Company determined that the carrying value of various other long-lived assets were no longer recoverable, and recognized \$5.1 million in

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

pre-tax non-cash asset impairment charges, all of which are reflected in Asset impairments in the Consolidated Statements of Operations.

In the Company's 2017 annual goodwill assessment, the fair value of each of its reporting units exceeded the carrying value of its net assets (step one of the goodwill impairment test). As a result, the Company was not required to conduct the second step of the impairment test for goodwill. In the Company's 2017 interim and annual impairment assessments of long-lived assets and intangible franchise rights, the Company recorded the following non-cash asset impairment charges, all of which are reflected in Asset impairments within the Consolidated Statements of Operations:

The Company determined that the carrying values of certain of its intangible franchise rights were greater than the fair value and, as a result, recognized \$19.3 million in aggregate pre-tax non-cash asset impairment charges during the third and fourth quarters of 2017.

In addition, the Company determined that the carrying value of various other long-term assets was no longer recoverable, and recognized \$0.2 million in pre-tax non-cash asset impairment charges.

In the Company's 2016 annual goodwill assessment, the fair value of each of its reporting units exceeded the carrying value of its net assets (step one of the goodwill impairment test). As a result, the Company was not required to conduct the second step of the impairment test for goodwill. During 2016, the Company also completed other impairment assessments on an annual and interim basis, as applicable, and recorded the following non-cash asset impairment charges, all of which are reflected in asset impairments in the accompanying Consolidated Statements of Operations:

The Company determined that the carrying values of certain of its intangible franchise rights were greater than the fair value and, as a result, recognized a \$30.0 million pre-tax non-cash asset impairment charge.

In addition, the Company determined that the carrying amounts of various real estate holdings and other long-lived assets were no longer fully recoverable, and recognized \$2.8 million in pre-tax non-cash asset impairment charges.

17. INTANGIBLE FRANCHISE RIGHTS AND GOODWILL

The following is a roll-forward of the Company's intangible franchise rights and goodwill accounts by reportable segment (in thousands):

	Intangible Franchise Rights			
	U.S.	U.K.	Brazil	Total
BALANCE, December 31, 2016	\$260,534	\$17,337	\$7,005	\$284,876
Additions through acquisitions	8,035	10,133	—	18,168
Impairments	(12,588)	—	(6,744)	(19,332)
Currency translation	—	2,013	(93)	1,920
BALANCE, December 31, 2017	255,981	29,483	168	285,632
Additions through acquisitions	11,540	8,423	—	19,963
Disposals	(4,872)	—	—	(4,872)
Impairments	(38,255)	(485)	—	(38,740)
Currency translation	—	(2,329)	(24)	(2,353)
BALANCE, December 31, 2018	\$224,394	\$35,092	\$144	\$259,630

The decrease in the Company's intangible franchise rights in 2018 was primarily related to impairments above in the U.S. and U.K. The decrease was partially offset by the addition of franchise rights related to acquisitions. See Note 4, "Acquisitions and Dispositions", for additional information.

The increase in the Company's intangible franchise rights in 2017 was primarily related to the addition of franchise rights associated with the purchase of 12 dealerships in the U.K. and three dealerships in the U.S., offset by impairments in the U.S. and Brazil of \$12.6 million and \$6.7 million, respectively.

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Goodwill			
	U.S.	U.K.	Brazil	Total
BALANCE, December 31, 2016	\$805,935	\$57,054	\$13,774	\$876,763 ⁽¹⁾
Additions through acquisitions	29,332	2,575	95	32,002
Disposals	—	—	(933)	(933)
Currency translation	—	5,405	(203)	5,202
BALANCE, December 31, 2017	835,267	65,034	12,733	913,034 ⁽¹⁾
Additions through acquisitions	39,703	28,475	4,284	72,462
Purchase price allocation adjustments	19	—	—	19
Disposals and assets held for sale	(13,361)	—	—	(13,361)
Currency translation	—	(5,922)	(2,307)	(8,229)
BALANCE, December 31, 2018	\$861,628	\$87,587	\$14,710	\$963,925 ⁽¹⁾

⁽¹⁾ Net of accumulated impairments of \$97.8 million

The increase in the Company's goodwill in 2018 was primarily related to the goodwill associated with the Company's acquisitions. The increase was partially offset by disposals of certain dealerships in the U.S. and the reclassification of goodwill to Prepaid expenses and other current assets on the Company's Consolidated Balance Sheets related to three pending dispositions qualifying as held-for-sale assets. See Note 4, "Acquisitions and Dispositions", for additional information. The goodwill associated with the acquisitions in the U.S. and Brazil are expected to be deductible for tax purposes, while the goodwill associated with the acquisition in the U.K. is not expected to be deductible for tax purposes.

The increase in the Company's goodwill in 2017 was primarily related to the goodwill associated with the purchase of three dealerships in the U.S. and 12 dealerships in the U.K., and foreign currency translation adjustments in the U.K. and Brazil. The increase was partially offset by the disposal of two dealerships in Brazil.

18. EMPLOYEE SAVINGS PLANS

The Company has a deferred compensation plan to provide select employees and non-employee members of the Company's Board of Directors with the opportunity to accumulate additional savings for retirement on a tax-deferred basis ("Deferred Compensation Plan"). Participants in the Deferred Compensation Plan are allowed to defer receipt of a portion of their salary and/or bonus compensation, or in the case of the Company's non-employee directors, annual retainer and meeting fees earned. The participants can choose from various defined investment options to determine their earnings crediting rate. However, the Company has complete discretion over how the funds are utilized. Participants in the Deferred Compensation Plan are unsecured creditors of the Company. The balances due to participants of the Deferred Compensation Plan as of December 31, 2018 and 2017 were \$61.9 million and \$56.6 million, respectively, with \$0.8 million classified as current for both periods.

The Company offers a 401(k) plan to all of its employees and provides a matching contribution to employees that participate in the plan. For the years ended December 31, 2018 and 2017, the matching contributions paid by the Company totaled \$6.2 million and \$5.1 million, respectively.

19. OPERATING LEASES

The Company leases various facilities and equipment under long-term operating lease agreements. Generally, the Company's real estate and facility leases in the U.S. have 30-year total terms, with initial terms of 15 years and three additional five-year terms, at our option. In the U.K. and Brazil, the Company's real estate and facility leases generally have 20-year terms and 5-year terms, respectively.

Future minimum lease payments for non-cancelable operating leases as of December 31, 2018, are as follows (in thousands):

GROUP 1 AUTOMOTIVE, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS — (Continued)

	Total
Years Ended December 31,	
2019	\$38,298
2020	34,705
2021	30,903
2022	26,713
2023	24,262
Thereafter	141,662
Total ⁽¹⁾	\$296,543

⁽¹⁾ Includes \$2.9 million of future, non-cancelable sublease payments to be received.

Total rent expense under all operating leases was \$48.2 million, \$51.8 million, and \$53.8 million for the years ended December 31, 2018, 2017 and 2016, respectively.

20. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS)

Changes in the balances of each component of accumulated other comprehensive income (loss) for the years ended December 31, 2018, 2017 and 2016 are as follows (in thousands):

	Accumulated income (loss) on foreign currency translation	Accumulated income (loss) on interest rate swaps	Total
BALANCE, December 31, 2015	\$ (118,532)	\$ (19,452)	\$(137,984)

Other comprehensive income (loss), net of tax	(24,156)	9,760	(14,396)
Tax effects reclassified from accumulated other comprehensive income (loss)	—	(150)	(150)
BALANCE, December 31, 2018	\$ (146,708)	\$ 8,936	\$(137,772)

21. SEGMENT INFORMATION

As of December 31, 2018, the Company had three reportable segments: (1) U.S., (2) U.K., and (3) Brazil. Each of the reportable segments is comprised of retail automotive franchises that sell new and used cars and light trucks; arrange related vehicle financing; sell service insurance contracts; provide automotive maintenance and repair services; and sell vehicle parts. The vast majority of the Company's corporate activities are associated with the operations of the U.S. operating segment and therefore the corporate financial results are included within the U.S. reportable segment. Reportable segment revenues, gross profit, SG&A, depreciation and amortization expenses, asset impairments, floorplan interest expense, net, other interest expense, net, benefit (provision) for income taxes, net income (loss) and capital expenditures are as follows (in thousands):

Diluted earnings (loss) per share ⁽¹⁾	1.70	2.72	1.74	1.62	7.83
2017					
Total revenues	\$2,518,829	\$2,672,195	\$3,012,292	\$2,920,405	\$11,123,721
Gross profit	383,522	404,892	431,420	425,675	1,645,509
Net income (loss)	33,939	39,133	29,881	110,489	213,442
Basic earnings (loss) per share ⁽¹⁾	1.58	1.84	1.43	5.27	10.08
Diluted earnings (loss) per share ⁽¹⁾	1.58	1.84	1.43	5.27	10.08

⁽¹⁾ The sum of the quarterly income per share amounts may not equal the annual amount reported, as per share amounts are computed independently for each quarter and for the full year based on the respective weighted average common shares outstanding.

Net income for the second, third, and fourth quarters of 2018, includes approximately \$4.3 million, \$23.2 million and \$16.5 million, respectively, of pre-tax impairment charges related to intangible franchise rights and property and equipment write-offs. The second quarter also includes a pre-tax gain of approximately \$20.2 million related to real estate and dealership dispositions.

Net income for the third and fourth quarters of 2017, includes approximately \$9.5 million and \$10.0 million, respectively, of pre-tax impairment charges related to intangible franchise rights and property and equipment write-offs. The third quarter also included \$14.7 million related to chargeback expense for reserves associated with expected finance and insurance product cancellations and property damage as a result of Hurricanes Harvey and Irma. The fourth quarter also included a provisional tax benefit of approximately \$73.0 million related to the re-measurement of deferred tax assets and liabilities as a result of the U.S. tax reform bill enacted in December 2017. For more information on non-cash impairment charges, see Note 16, "Asset Impairments."

23. CONDENSED CONSOLIDATING FINANCIAL INFORMATION

The following tables include condensed consolidating financial information as of December 31, 2018 and 2017, and for each of the years in the three-year period ended December 31, 2018, for Group 1 Automotive, Inc.'s (as issuer of the 5.00% Notes), guarantor subsidiaries and non-guarantor subsidiaries (representing foreign entities). The condensed consolidating financial information includes certain allocations of balance sheet, statement of operations and cash flows items that are not necessarily indicative of the financial position, results of operations or cash flows of these entities had they operated on a stand-alone basis. In accordance with Rule 3-10 of Regulation S-X, condensed consolidated financial statements of non-guarantors are not required. The Company has no assets or operations independent of its subsidiaries. Obligations under the 5.00% Notes are fully and unconditionally and jointly and severally guaranteed on a senior unsecured basis by the Company's current 100%-owned domestic subsidiaries and certain of the Company's future domestic subsidiaries, with the exception of the Company's "minor" subsidiaries (as defined by Rule 3-10 of Regulation S-X). There are no significant restrictions on the ability of the Company or subsidiary guarantors for the Company to obtain funds from its subsidiary guarantors by dividend or loan. None of the subsidiary guarantors' assets represent restricted assets pursuant to SEC Rule 4-08(e)(3) of Regulation S-X.
