## VALMONT INDUSTRIES, INC. AND SUBSIDIARIES

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Dollars in thousands, except per share amounts)

(Unaudited)

**1. Summary of Significant Accounting Policies***Condensed Consolidated Financial Statements*

The Condensed Consolidated Balance Sheet as of September 24, 2011, the Condensed Consolidated Statements of Operations for the thirteen and thirty-nine week periods ended September 24, 2011 and September 25, 2010, the Condensed Consolidated Statements of Cash Flows and Shareholders' Equity for the thirty-nine week periods then ended have been prepared by the Company, without audit. In the opinion of management, all necessary adjustments (which include normal recurring adjustments) have been made to present fairly the financial statements as of September 24, 2011 and for all periods presented.

Certain information and footnote disclosures normally included in financial statements prepared in accordance with accounting principles generally accepted in the United States of America have been condensed or omitted. These Condensed Consolidated Financial Statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended December 25, 2010. The accounting policies and methods of computation followed in these interim financial statements are the same as those followed in the financial statements for the year ended December 25, 2010. The results of operations for the periods ended September 24, 2011 are not necessarily indicative of the operating results for the full year.

*Inventories*

At September 24, 2011, approximately 36% of inventory is valued at the lower of cost, determined on the last-in, first-out (LIFO) method, or market. All other inventory is valued at the lower of cost, determined on the first-in, first-out (FIFO) method or market. Finished goods and manufactured goods inventories include the costs of acquired raw materials and related factory labor and overhead charges required to convert raw materials to manufactured and finished goods. The excess of replacement cost of inventories over the LIFO value was \$50,775 and \$42,559 at September 24, 2011 and December 25, 2010, respectively.

Inventories consisted of the following:

	September 24, 2011	December 25, 2010
Raw materials and purchased parts	\$ 193,469	\$ 133,380
Work-in-process	28,939	25,891
Finished goods and manufactured goods	205,892	163,511
Subtotal	428,300	322,782
LIFO reserve	50,775	42,559
Net inventory	\$ 377,525	\$ 280,223

*Stock Plans*

The Company maintains stock-based compensation plans approved by the shareholders, which provide that the Human Resource Committee of the Board of Directors may grant incentive stock

Table of Contents

(Unaudited)

**1. Summary of Significant Accounting Policies (Continued)**

options, nonqualified stock options, stock appreciation rights, non-vested stock awards and bonuses of common stock. At September 24, 2011, 861,939 shares of common stock remained available for issuance under the plans. Shares and options issued and available are subject to changes in capitalization.

Under the plans, the exercise price of each option equals the market price at the date of the grant. Options vest beginning on the first anniversary of the grant in equal amounts over three to six years or on the fifth anniversary of the grant. Expiration of grants is from six to ten years from the date of grant. The Company's compensation expense (included in selling, general and administrative expenses) and associated income tax benefits related to stock option for the thirteen and thirty-nine weeks ended September 24, 2011 and September 25, 2010, respectively, were as follows:

	Thirteen Weeks Ended September 24, 2011	Thirteen Weeks Ended September 25, 2010	Thirty-nine Weeks Ended September 24, 2011	Thirty-nine Weeks Ended September 25, 2010
Compensation expense	\$ 1,265	\$ 1,218	\$ 3,732	\$ 3,675
Income tax benefits	487	469	1,437	1,415

*Fair Value*

The Company applies the provisions of Accounting Standards Codification 820, *Fair Value Measurements* ("ASC 820") which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. The provisions of ASC 820 apply to other accounting pronouncements that require or permit fair value measurements. As defined in ASC 820, fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

ASC 820 establishes a three-level hierarchy for fair value measurements based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. Inputs refers broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Financial assets and liabilities carried at fair value will be classified and disclosed in one of the following three categories:

Level 1: Quoted market prices in active markets for identical assets or liabilities.

Level 2: Observable market based inputs or unobservable inputs that are corroborated by market data.

Level 3: Unobservable inputs that are not corroborated by market data.

The categorization within the valuation hierarchy is based upon the lowest level of input that is significant to the fair value measurement.

Following is a description of the valuation methodologies used for assets and liabilities measured at fair value.

## NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

(Dollars in thousands, except per share amounts)

(Unaudited)

**1. Summary of Significant Accounting Policies (Continued)**

Trading Securities: The assets and liabilities recorded for the investments held in the Valmont Deferred Compensation Plan represent mutual funds, invested in debt and equity securities, classified as trading securities in accordance with Accounting Standards Codification 320, *Accounting for Certain Investments in Debt and Equity Securities*, considering the employee's ability to change investment allocation of their deferred compensation at any time. Quoted market prices are available for these securities in an active market and therefore categorized as a Level 1 input.

	Carrying Value September 24, 2011	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Trading Securities	\$ 18,051	\$ 18,051	\$	\$

	Carrying Value December 25, 2010	Fair Value Measurement Using:		
		Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets:				
Trading Securities	\$ 18,433	\$ 18,433	\$	\$

*Accumulated Other Comprehensive Income (Loss)*

Results of operations for foreign subsidiaries are translated using the average exchange rates during the period. Assets and liabilities are translated at the exchange rates in effect on the balance sheet dates. "Accumulated other comprehensive income (loss)" consisted of the following at September 24, 2011 and December 25, 2010:

	September 24, 2011	December 25, 2010
Foreign currency translation adjustment	\$ 16,278	\$ 34,693
Actuarial gain in defined benefit pension plan	28,925	28,952
Loss on cash flow hedge	(3,435)	
	\$ 41,768	\$ 63,645

*Derivative Instrument*

During the second quarter of 2011, the Company executed a contract to lock in the treasury rate related to the issuance of the \$150,000 of principal amount of senior notes due in 2020. The contract, for a notional amount of \$130,000, was executed to hedge the risk of potential fluctuations in the treasury rates which would change the amount of net proceeds received from the debt offering. As the benchmark rate component of the fixed rate debt issuance and the cash flow hedged risk is based on

(Unaudited)

**1. Summary of Significant Accounting Policies (Continued)**

that same benchmark, this was deemed an effective hedge at inception. On June 8, 2011, this contract was settled with the Company paying approximately \$3,568 to the counterparty. The Company recorded the \$3,568 in accumulated other comprehensive income and is amortizing this loss to interest expense over the term of the debt.

*Recently Issued Accounting Pronouncements*

In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220)*, requiring entities to present net income and other comprehensive income in either a single continuous statement or in two separate, but consecutive, statements of net income and other comprehensive income. Reclassification adjustments between net income and other comprehensive income must be shown on the face of the statement(s), with no resulting change in net earnings. ASU 2011-05 is effective for statements issued by the Company after January 1, 2012. The Company will provide the required financial reporting presentation upon the effective date.

In September 2011, the FASB issued ASU No. 2011-08, *Testing Goodwill for Impairment*, permitting an entity to first assess qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in Accounting Standards Codification Topic 350. This guidance will become effective for annual or interim goodwill impairment tests for fiscal years beginning after December 15, 2011. The Company will adopt this starting in fiscal 2012 and it is not expected to have a significant effect on its financial position, results of operations or cash flows.

**2. Acquisitions**

On May 12, 2010, the Company acquired Delta, plc. ("Delta") a public limited company incorporated in Great Britain, and listed on the London Stock Exchange (LSE: DLTA). The price paid per share was 185 pence in cash for each Delta share, or £284,463, or \$436,736 based on the contracted average exchange rate of \$1.5353 / £. Delta has manufacturing operations employing over 2,500 people in Australia, Asia, South Africa and the United States. Delta's businesses include engineered steel products, galvanizing services and manganese materials.

The Company's pro forma results of operations for the thirty-nine weeks ended September 25, 2010, assuming that the acquisition occurred at the beginning of fiscal 2010 was as follows:

	Thirty-nine Weeks Ended September 25, 2010
Net sales	\$ 1,569,210
Net earnings	64,512
Earnings per share diluted	\$ 2.49

On June 24, 2011, the Company acquired the remaining 40% of Donhad Pty. Ltd. ("Donhad") that it did not own for \$25,253. As this transaction was the acquisition of the remaining shares of a

**2. Acquisitions (Continued)**

consolidated subsidiary with no change in control, it was recorded within shareholders' equity. On June 1, 2011, the Company acquired 60% of an irrigation monitoring services company for \$1,539. This acquisition did not have and is not expected to have a significant effect on the Company's fiscal 2011 financial results.

**3. Goodwill and Intangible Assets**

The Company's annual impairment testing of goodwill was performed and completed during the third quarter of 2011. As a result of that testing, it was determined that the goodwill on the Company's Condensed Consolidated Balance Sheet was not impaired. The Company continues to monitor changes in the global economy and its reporting units that could impact future operating results of its reporting units and related components.

*Amortized Intangible Assets*

The components of amortized intangible assets at September 24, 2011 and December 25, 2010 were as follows:

	As of September 24, 2011		Weighted Average Life
	Gross Carrying Amount	Accumulated Amortization	
Customer Relationships	\$ 155,651	\$ 47,083	13 years
Proprietary Software & Database	2,609	2,609	6 years
Patents & Proprietary Technology	9,524	3,486	8 years
Non-compete Agreements	1,683	1,236	6 years
	\$ 169,467	\$ 54,414	

	As of December 25, 2010		Weighted Average Life
	Gross Carrying Amount	Accumulated Amortization	
Customer Relationships	\$ 155,664	\$ 37,932	13 years
Proprietary Software & Database	2,609	2,568	6 years
Patents & Proprietary Technology	9,486	2,336	8 years
Non-compete Agreements	1,674	1,054	6 years
	\$ 169,433	\$ 43,890

(Unaudited)

**3. Goodwill and Intangible Assets (Continued)**

Amortization expense for intangible assets for the thirteen and thirty-nine weeks ended September 24, 2011 and September 25, 2010, respectively was as follows:

Thirteen Weeks Ended September 24, 2011	Thirteen Weeks Ended September 25, 2010	Thirty-nine Weeks Ended September 24, 2011	Thirty-nine Weeks Ended September 25, 2010
\$ 3,659	\$ 3,521	\$ 10,855	\$ 8,295

	Estimated Amortization Expense
2011	\$ 14,373
2012	13,886
2013	12,992
2014	12,569
2015	11,730

The useful lives assigned to finite-lived intangible assets included consideration of factors such as the Company's past and expected experience related to customer retention rates, the remaining legal or contractual life of the underlying arrangement that resulted in the recognition of the intangible asset and the Company's expected use of the intangible asset.

*Non-amortized intangible assets*

Intangible assets with indefinite lives are not amortized. The carrying values of trade names at September 24, 2011 and December 25, 2010 were as follows:

	September 24, 2011	December 25, 2010
Webforge	\$ 16,563	\$ 16,478
Newmark	11,111	11,111
Ingal EPS/Ingal Civil Products	8,794	8,795
Donhad	6,634	6,635
PiRod	4,750	4,750
Industrial Galvanizers	4,628	4,632
Other	7,413	7,591
	\$ 59,893	\$ 59,992

The Company's trade names were tested for impairment separately from goodwill in the third quarter of 2011. The values of the trade names were determined using the relief-from-royalty method. The Company has not completed its evaluation of trade names as of the end of the third quarter of 2011, as it is considering its future use of certain trade names. This evaluation is planned to be completed during the fourth quarter of 2011.

(Dollars in thousands, except per share amounts)

(Unaudited)

**3. Goodwill and Intangible Assets (Continued)**

In its determination of these intangible assets as indefinite-lived, the Company considered such factors as its expected future use of the intangible asset, legal, regulatory, technological and competitive factors that may impact the useful life or value of the intangible asset and the expected costs to maintain the value of the intangible asset. The Company expects that these intangible assets will maintain their value indefinitely. Accordingly, these assets are not amortized.

*Goodwill*

The carrying amount of goodwill as of September 24, 2011 was as follows:

	Engineered Infrastructure Products Segment	Utility Support Structures Segment	Coatings Segment	Irrigation Segment	Other	Total
Balance December 25, 2010	\$ 152,062	\$ 77,141	\$ 64,868	\$ 2,064	\$ 18,712	\$ 314,847
Acquisition				939		939
Foreign currency translation	(478)		129	(155)	(142)	(646)
Balance September 24, 2011	\$ 151,584	\$ 77,141	\$ 64,997	\$ 2,848	\$ 18,570	\$ 315,140

**4. Cash Flows**

The Company considers all highly liquid temporary cash investments purchased with a maturity of three months or less to be cash equivalents. Cash payments for interest and income taxes (net of refunds) for the thirty-nine weeks ended were as follows:

	September 24, 2011	September 25, 2010
Interest	\$ 17,597	\$ 10,258
Income taxes	46,605	25,543

- 
- (a) The senior unsecured notes include an aggregate principal amount of \$450,000 on which interest is paid and an unamortized premium balance of \$14,437 at September 24, 2011. \$300,000 principal amount of the notes were issued in April 2010 and \$150,000 principal amount of the notes were issued in June 2011. The notes bear interest at 6.625% per annum and are due in April 2020. The premium will be amortized against interest expense as interest payments are made over the term of the notes. These notes may be repurchased at specified prepayment premiums. These notes and the senior subordinated notes are guaranteed by certain subsidiaries of the Company.
- (b) The \$150,000 of senior subordinated notes were redeemed on June 16, 2011 at a redemption price of 101.146% of the principal amount plus accrued and unpaid interest thereon. The redemption premium of approximately \$1,700 was recorded in interest expense.
- (c) The revolving credit agreement is with a group of banks for up to \$280,000. The Company may increase the credit agreement by up to an additional \$100,000 at any time, subject to the participating banks increasing the amount of their lending commitments. The interest rate on outstanding borrowings is, at the Company's option, either:
- (i) LIBOR (based on a 1, 2, 3 or 6 month interest period, as selected by the Company) plus 125 to 200 basis points (inclusive of facility fees), depending on the Company's ratio of debt to EBITDA, or;
- (ii) the higher of
- The higher of (a) the prime lending rate and (b) the Federal Funds rate plus 50 basis points plus, in each case, 25 to 100 basis points (inclusive of facility fees), depending on the Company's ratio of debt to EBITDA, or

revolving credit agreement has a termination date of October 16, 2013 and contains certain financial covenants that may limit additional borrowing capability under the agreement. At September 24, 2011, the Company had the ability to borrow an additional \$240,869 under this facility.

- (d) The Industrial Development Revenue Bonds were issued to finance the construction of a manufacturing facility in Jasper, Tennessee. Variable interest is payable until final maturity June 1, 2025. The effective interest rates at September 24, 2011 and December 25, 2010 were 0.31% and 0.50%, respectively.

The lending agreements include certain maintenance covenants, including financial leverage and interest coverage. The Company was in compliance with all debt covenants at September 24, 2011.

The minimum aggregate maturities of long-term debt for each of the four years following 2011 are: \$291, \$20,256, \$262 and \$275.

**7. Business Segments**

The Company aggregates its operating segments into four reportable segments. Aggregation is based on similarity of operating segments as to economic characteristics, products, production processes, types or classes of customer and the methods of distribution. Net corporate expense is net of certain service-related expenses that are allocated to business units generally on the basis of employee headcounts and sales dollars.

Reportable segments are as follows:

*ENGINEERED INFRASTRUCTURE PRODUCTS:* This segment consists of the manufacture of engineered metal structures and components for the global lighting and traffic, wireless communication, roadway safety and access systems applications;

*UTILITY SUPPORT STRUCTURES:* This segment consists of the manufacture of engineered steel and concrete structures for the global utility industry;

*COATINGS:* This segment consists of galvanizing, anodizing and powder coating services on a global basis; and

*IRRIGATION:* This segment consists of the manufacture of agricultural irrigation equipment and related parts and services for the global agricultural industry.

In addition to these four reportable segments, the Company has other businesses and activities that individually are not more than 10% of consolidated sales. These include the manufacture of forged steel grinding media for the mining industry, tubular products for industrial customers, the electrolytic manganese dioxide for disposable batteries and the distribution of industrial fasteners and are reported in the "Other" category.

In the fourth quarter of 2010, the Company reorganized its segment reporting structure to reflect the management structure as a result of the acquisition of Delta plc. The main business units of Delta are organized as follows in the reportable segment structure:

Engineered Infrastructure Products segment includes Delta's lighting, communication, access systems and roadway safety products;

Coatings segment includes Delta's galvanizing operations in the U.S., Australia and Asia;

Delta's forged steel grinding media and electrolytic manganese dioxide operations are included an "Other", and;

Delta's management administration expenses are included in "Net corporate expense".

Fiscal 2010 figures have been reclassified to conform to the fiscal 2011 segment presentation.

The accounting policies of the reportable segments are the same as those described in Note 1. The Company evaluates the performance of its business segments based upon operating income and

**8. Guarantor/Non-Guarantor Financial Information**

On April 8, 2010, the Company issued \$300,000 of senior unsecured notes at a coupon interest rate of 6.625% per annum. In June 2011, the Company issued an additional \$150,000 principal amount of these notes to redeem the Senior Subordinated Notes that were issued in 2004. The notes are guaranteed, jointly, severally, fully and unconditionally by certain of the Company's current and future direct and indirect domestic and foreign subsidiaries (collectively the "Guarantors"), excluding its other current domestic and foreign subsidiaries which do not guarantee the debt (collectively referred to as the "Non-Guarantors"). All Guarantors are 100% owned by the parent company.

On May 4, 2004, the Company completed a \$150,000 offering of 6<sup>7</sup>/<sub>8</sub>% Senior Subordinated Notes. The notes were redeemed on June 16, 2011 at a redemption price of 101.146% of the principal amount plus accrued and unpaid interest thereon. The notes were guaranteed, jointly, severally, fully and unconditionally, on a senior subordinated basis by the Guarantors.

Condensed consolidated financial information for the Company ("Parent"), the Guarantor subsidiaries and the Non-Guarantor subsidiaries is as follows:

**VALMONT INDUSTRIES, INC. AND SUBSIDIARIES  
PART 1. FINANCIAL INFORMATION**

**Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

Management's discussion and analysis contains forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on assumptions that management has made in light of experience in the industries in which the Company operates, as well as management's perceptions of historical trends, current conditions, expected future developments and other factors believed to be appropriate under the circumstances. These statements are not guarantees of performance or results. They involve risks, uncertainties (some of which are beyond the Company's control) and assumptions. Management believes that these forward-looking statements are based on reasonable assumptions. Many factors could affect the Company's actual financial results and cause them to differ materially from those anticipated in the forward-looking statements. These factors include, among other things, risk factors described from time to time in the Company's reports to the Securities and Exchange Commission, as well as future economic and market circumstances, industry conditions, company performance and financial results, operating efficiencies, availability and price of raw materials, availability and market acceptance of new products, product pricing, domestic and international competitive environments, and actions and policy changes of domestic and foreign governments.

This discussion should be read in conjunction with the financial statements and the notes thereto, and the management's discussion and analysis, included in the Company's Annual Report on Form 10-K for the fiscal year ended December 25, 2010.

In the fourth quarter of 2010, we reorganized our segment reporting structure to reflect our management structure as a result of the acquisition of Delta plc. The main business units of Delta are organized as follows in our segment structure:

Engineered Infrastructure Products (previously referred to as Engineered Support Structures) segment includes Delta's lighting, communication, access systems and roadway safety products;

Coatings segment includes Delta's galvanizing operations in the U.S., Australia and Asia;

Delta's forged steel grinding media and electrolytic manganese dioxide operations are included an "Other", and;

Delta's management administration expenses are included in "Net corporate expense".

We reclassified fiscal 2010 to conform to the fiscal 2011 segment presentation.

Table of Contents***Acquisition of Delta plc***

On May 12, 2010, we acquired Delta plc (Delta). The total amount of the acquisition was \$436.7 million and was financed by a combination of cash, borrowings under our revolving credit agreement of \$85.0 million and \$300.0 million of senior unsecured notes.

We began consolidating Delta's financial results in our consolidated financial statements beginning on May 12, 2010. On a segment reporting basis, Delta's operations are included in our results as follows:

Engineered Infrastructure Products Segment manufacture of poles, roadway safety systems and access systems;

Coatings Segment galvanizing operations in Australia, the U.S. and Asia; and

Other manufacture of steel grinding media and electrolytic manganese dioxide

The increases in sales and operating income by segment attributable to a full year effect of Delta in fiscal 2011, as compared with fiscal 2010, were as follows (in millions):

	Thirty-nine weeks ended September 24, 2011	
	Net Sales	Operating Income
Engineered Infrastructure Products	\$ 79.0	\$ 4.8
Utility Support Structures	2.1	0.3
Coatings	61.9	8.2
Other	75.0	3.6
Net corporate expense		(4.4)
Total	\$ 218.0	\$ 12.5

***Overview***

On a consolidated basis, the increase in net sales in the third quarter and year-to-date fiscal 2011, as compared with 2010, were the result of improved sales in all reportable segments, part of which was the result of Delta's financial results being included in our consolidated financial statements for all of 2011.

For the company as a whole, our 2011 third quarter and, without consideration of Delta sales, our year-to-date sales increases over 2010 were mainly due to increased unit sales volumes. On a reportable segment basis, the most significant unit sales volume increases were in the Irrigation and Utility Support Structures (Utility) segments. Sales prices overall were up modestly in the third quarter and year-to-date of fiscal 2011, as compared with 2010, mainly in response to rising steel prices. The increase in net sales in the third quarter and year-to-date fiscal 2011, as compared with 2010, due to currency translation effects were approximately \$29 million and \$54 million, respectively.

The decrease in gross profit margin (gross profit as a percent of sales) for the third quarter and year-to-date fiscal 2011, as compared with 2010, was due to the following factors:

Raw material costs were higher in 2011 as compared with 2010. In particular, steel prices rose significantly in the first quarter of 2011 before moderating somewhat in the following two quarters. Average zinc costs also were higher in 2011 than in 2010. In the Utility and Irrigation segments, factory productivity due to higher volumes helped to offset the raw material inflationary impacts.

Table of Contents

Competitive pricing environments in the Engineered Infrastructure Products (EIP), Utility and Irrigation segments despite higher raw material prices have pressured gross profit margins to some degree.

The results of our Australian operations were adversely impacted by heavy rains and flooding in the first quarter of 2011, which negatively affected sales volumes and factory utilization. While our operations themselves did not sustain material damage, the flooding disrupted our customers and suppliers which, in turn, adversely affected the results of our operations.

Selling, general and administrative (SG&A) spending for the third quarter and year-to-date of fiscal 2011, as compared with 2010, increased due to the following factors:

Year-to-date expenses related to the Delta operations (\$32.5 million), which was not included in our 2010 financial statements; and

Increased employee incentive accruals of \$5.2 million and \$10.5 million, respectively, due to improved operating results, and;

Increased compensation expenses of \$2.5 million and \$5.4 million, respectively, associated with increased employment levels and salary increases.

These increases were somewhat offset by \$12.9 million in lower acquisition and integration costs in the first three quarters of 2011, as compared with fiscal 2010, associated with the Delta acquisition.

On a reportable segment basis, the Irrigation, Utility and Coatings segments reported improved operating income in the third quarter and year-to-date 2011, as compared with 2010. The EIP segment operating income in 2011 was comparable to fiscal 2010. Currency translation effects also contributed to the increase in third quarter and year-to-date operating income in fiscal 2011, as compared with 2010, of approximately \$2.9 million and \$5.6 million, respectively.

The decrease in net interest expense in the third quarter of fiscal 2011, as compared with 2010, was mainly due to interest savings resulting from the refinancing of our senior subordinated debt in the second quarter of fiscal 2011 and increased interest income resulting from certain income tax refunds received in fiscal 2011. On a year-to-date basis, the increase in interest expense in fiscal 2011, as compared with 2010, was attributable to \$2.8 million of expense incurred when we redeemed our senior subordinated debt and the full year effect (approximately \$5.0 million) of interest expense associated with the \$300 million in senior unsecured notes issued in April 2010, less \$2.9 million of bank fees incurred in the first quarter of fiscal 2010 to provide the required bridge loan funding commitment for the Delta acquisition and the full impact of interest income from Delta's cash balances.

The increase in "Other" expense in the third quarter and first three quarters of fiscal 2011, as compared with 2010, was mainly due to investment losses in the assets held in our deferred compensation plan (\$1.5 million and \$1.8 million, respectively). The decreases in the value of these assets were offset by corresponding decreases in our deferred compensation liabilities, which were reflected as decreases in net corporate expense. Accordingly, there was no effect on net earnings from these investment losses.

Our effective income tax rate in third quarter of fiscal 2011 was higher than 2010, due to the reconciliation of our 2010 income tax returns and non-deductible currency losses incurred in our Mexican operation. On a year-to-date basis, the effective tax rate in fiscal 2011 was lower than 2010. This reduction was mainly due to the:

non-deductibility of a portion of the Delta acquisition expenses incurred in 2010 (\$3.2 million);

income tax benefits associated with our 2011 acquisition of the remaining 40% of Donhad that we did not own (\$4.1 million); and

Table of Contents

net effect of certain income tax contingencies that were reduced due to expiration of statutes of limitation (\$1.4 million).

Aside from these events that are non-recurring in nature, we believe our year-to-date effective tax rate in fiscal 2011 and 2010 would have been approximately 32.0-33.0%.

Our cash flows provided by operations were approximately \$64.1 million in 2011, as compared with \$85.3 million in 2010. While net earnings increased in 2011, as compared with 2010, higher levels of working capital to support increased business activity in the Utility and Irrigation segments in 2011 and contributions to the Delta Pension Plan of \$11.8 million in 2011 were the main reasons for the lower operating cash flow in 2011, as compared with 2010.

***Engineered Infrastructure Products (EIP) segment***

The increases in net sales in the third quarter and the first three quarters of 2011 as compared with 2010 were mainly due to currency translation effects (\$14.1 million and \$27.0 million, respectively) and improved international sales volumes. Year-to-date sales in fiscal 2011 were higher than 2010 due to these factors and the full year effect of the Delta operations. Global lighting markets continue to experience weak demand, resulting in increased price competition, despite higher raw material prices. In the Lighting product line, 2011 North American sales in the third quarter and first three quarters of the year were down slightly as compared with 2010. Market conditions in North America continue to be weak, especially in the transportation market, where funding is through federal, state and local governments. We believe sales demand in the transportation market was dampened by the lack of a long-term federal highway funding legislation and state budget deficits, as the lack of long-term funding legislation does not give the various states ample visibility to implement long-term initiatives. Furthermore, highway spending sponsored under the federal program requires the various states to provide part of required funding. Many states are in budget deficits, which may constrain their ability to access federal matching funds to implement roadway projects. Sales in other market channels helped to offset the lower transportation market sales in 2011, as compared with 2010. In Europe, sales were higher in the third quarter and first three quarters of 2011, as compared with 2010. However, sales pricing and product mix generally were unfavorable due to weak demand, as infrastructure spending in Europe has been affected by budget deficit control measures and public debt issues.

Communication product line sales in third quarter and first three quarters of fiscal 2011 were comparable to 2010. North America sales were lower in the third quarter of 2011, as compared with 2010 while year-to-date 2011 sales were slightly higher than 2010. While market conditions are generally more favorable in 2011 as compared with 2010, we believe uncertainty surrounding the AT&T/T-Mobile merger has caused demand for communication structures and components to slow down in the third quarter of 2011. In China, sales of wireless communication structures were higher in the third quarter and first three quarters of 2011, as compared with 2010. In 2010, annual supply contracts with Chinese wireless carriers were settled later than in the past and 2011 was more in line with what we believe is a more normal demand pattern.

Operating income for the segment was comparable in the third quarter and first three quarters of fiscal 2011, as compared with 2010. While operating income was enhanced by the addition of the Delta operations, the impact of rising raw material costs and very competitive pricing conditions in most of our markets hampered operating income for the segment. The impact of lower North America sales on operating profit was mitigated to an extent by factory operational improvements. The operating income effect of the increased sales associated with the Delta operations was relatively minor, as we experienced generally increased sales pricing competition, including that from outside Australia resulting from the stronger Australian dollar. Operating income in the third quarter and first three quarters of fiscal 2011, as compared with 2010, was enhanced by currency translation effects of \$1.6 million and \$2.8 million, respectively. The increase in SG&A expense in the first three quarters of

Table of Contents

fiscal 2011 was mainly due to the acquisition of the Delta operations (\$14.3 million), offset to a degree by lower spending levels in North America and Asia.

***Utility Support Structures (Utility) segment***

In the Utility segment, the sales increases in the third quarter and first three quarters of fiscal 2011, as compared with 2010, were due to improved unit sales volumes in the U.S., offset to a degree by lower sales volumes in international markets. In U.S. markets, electrical utility companies are increasing their investment in the electrical grid over a relatively slow 2010. The sales pricing environment is slowly improving but continues to be very competitive. Our sales in 2011 were somewhat reflective of market conditions in 2010 when certain utility structures projects were awarded at relatively low prices. In international markets, the sales decrease was mainly due to lower project sales into emerging markets and lower sales volumes in China, offset to a degree by improved sales volumes in Australia.

Operating income in fiscal 2011, as compared with 2010, increased due to the substantial increase in North America sales volume and associated operational leverage. Gross profit margins were negatively affected by the competitive pricing environment in North America and higher raw material costs, offset to an extent by productivity gains due to increased production volumes. The increase in SG&A expense for the segment in fiscal 2011 was higher than in 2010, mainly due to increased employee incentives associated with the increase in operating income.

***Coatings segment***

Net sales in the Coatings segment increased in the third quarter of fiscal 2011, as compared with 2010, mainly due to currency translation effects. On a year-to-date basis, the sales increase resulted from the effect of the galvanizing operations acquired in the Delta transaction, currency translation effects (approximately \$7.5 million) and stronger unit sales demand in our operations.

The increase in segment operating income in the third quarter of fiscal 2011, as compared with 2010, was mainly due to the effects of currency translation. Higher average zinc costs in 2011, as compared with 2010, were largely recovered through sales price increases and productivity improvements. On a year-to-date basis, the increase in operating income also was due to the effect of the acquired Delta businesses, improved sales volume and currency translation effects (approximately \$0.8 million). SG&A expenses for the segment in the third quarter and first three quarters of 2011 were higher than the comparable periods in 2010, mainly due to the effect of the Delta businesses.

In 2011, a fire occurred at one of our galvanizing facilities in Australia. A property damage and business interruption claim was filed with our insurance carrier and settlement of the claim is ongoing. We are making the necessary capital expenditures to restore the facility and plan for operations to commence in the fourth quarter of 2011. We believe that the insurance claim proceeds will exceed the net book value of the assets damaged. The financial effect of this event will be reflected in our financial statements when the insurance claim is settled.

***Irrigation segment***

Irrigation segment net sales in the third quarter and first three quarters of fiscal 2011 substantially improved over 2010, mainly due to stronger sales volumes in both North American and international markets. In global markets, the sales growth was due to a very strong agricultural economy. Farm commodity prices are generally favorable and net farm income is projected to be strong in 2011. In addition, weather conditions in North America in 2011 were generally drier than 2010, further enhancing demand for irrigation machines and related service parts. In international markets, the sales improvement in fiscal 2011, as compared with 2010, was realized in most markets, particularly in Asia Pacific and South America.

Table of Contents

Operating income for the segment improved in 2011 over 2010, due to improved sales unit volumes in North America and the associated operational leverage. Rising raw material prices resulted in \$2.4 million in increased LIFO expense in the first three quarters of 2011, as compared with 2010, which negatively affected gross profit margins. SG&A expenses increased mainly due to employee compensation costs to support the increase in sales activity and future initiatives (\$1.3 million and \$3.7 million, respectively) and increased employee incentives due to improved operating performance in 2011 (\$1.7 million and \$2.7 million, respectively).

*Other*

This unit includes the Delta grinding media and electrolytic manganese operations and our industrial tubing and fasteners operations. The increase in sales in the third quarter of 2011, as compared with 2010, was mainly due improved sales volumes in all of these operations and currency translation effects (approximately \$5.6 million). Third quarter operating income improved due to improved operating results in the manganese dioxide and tubing operations and currency translation (approximately \$0.8 million). On a year-to-date basis, the full year affect of the Delta operations and currency translation effects (approximately \$9.1 million in sales and \$1.4 million in operating income) also contributed to the sales increase and operating income increase.

*Net corporate expense*

Net corporate expense in the third quarter of 2011 was comparable to 2010. Expense increases included increased incentive expense associated with improved profitability in 2011 (\$2.7 million), offset by lower deferred compensation expenses of \$1.5 million, and favorable experience in health insurance expenses (\$0.8 million).

On a year-to-date basis, the decrease in net corporate expense was due to Delta acquisition and integration costs that were incurred in 2010 (\$12.9 million) but not 2011 and lower deferred compensation expense (\$1.8 million). These decreases were offset somewhat by the full year effect of Delta's administration costs (\$5.2 million) and higher employee incentive expense associated with improved profitability in 2011 as compared with 2010 (\$5.9 million).

**Liquidity and Capital Resources**

*Cash Flows*

*Working Capital and Operating Cash Flows* Net working capital was \$831.7 million at September 24, 2011, as compared with \$747.3 million at December 25, 2010. The increase in net working capital in 2011 mainly resulted from increased inventories to support the increase in sales, especially in the Irrigation and Utility Support Structures segments. Operating cash flow was \$64.1 million in fiscal 2011, as compared with \$85.3 million for the same period in 2010. The decrease in operating cash flow in 2011 mainly was the result of the increase in working capital as compared with 2010 and the annual contribution we made to the Delta Pension Plan of \$11.8 million in fiscal 2011. In fiscal 2010, this contribution was made before we acquired Delta.

*Investing Cash Flows* Capital spending in the fiscal 2011 was \$46.4 million, as compared with \$20.3 million in 2010. The most significant capital spending projects in 2011 included our new plant in India (\$7.0 million), certain capacity expansions in the Utility segment (\$4.7 million) and our Australian galvanizing operations (\$3.9 million). We expect our capital spending for the 2011 fiscal year to be approximately \$70 to \$75 million. Investing cash flows for fiscal 2010 included \$436.7 million of cash (less \$198.8 million of cash acquired) for the Delta acquisition and an aggregate of \$7.5 million associated with increasing our ownership interest in West Coast Engineering, Ltd. from 70% to 80% and the additional purchase price paid to the former shareholders of Stainton related to the performance of the operation after its acquisition in November 2008.

Table of Contents

*Financing Cash Flows* Our total interest-bearing debt increased from \$477.7 million at December 25, 2010 to \$506.0 million as of September 24, 2011. The increase in borrowings in 2011 was a seasonal increase in borrowings due to the increase in working capital in the U.S. In the second quarter of fiscal 2011, we redeemed all of our \$150 million of senior subordinated notes that were due in May 2014 with the proceeds from the sale of \$150 million principal amount of senior unsecured notes. The senior unsecured notes became part of a series of senior unsecured notes previously issued in April 2010. The senior unsecured notes were issued at a premium of \$14.8 million in excess of the principal amount. We refinanced the senior subordinated notes to take advantage of a favorable interest-rate environment and to extend our long-term debt maturities. Financing cash flows in 2011 included approximately \$25.3 million to acquire the remaining 40% of the shares of Donhad Pty. Ltd. (a manufacturer of steel grinding media serving the Australian mining industry).

*Sources of Financing and Capital*

We have historically funded our growth, capital spending and acquisitions through a combination of operating cash flows and debt financing. We have an internal long-term objective to maintain long-term debt as a percent of invested capital at or below 40%. At September 24, 2011, our long-term debt to invested capital ratio was 27.1%, as compared with 26.7% at December 25, 2010. Subject to our level of acquisition activity and steel industry operating conditions (which could affect the levels of inventory we need to fulfill customer commitments), we plan to maintain this ratio below 40% in 2011.

Our debt financing at September 24, 2011 consisted primarily of long-term debt. We also maintain certain short-term bank lines of credit totaling \$51.7 million, \$45.2 million of which was unused at September 24, 2011. Our long-term debt principally consists of:

\$450 million of senior unsecured notes that bear interest at 6.625% per annum and are due in April 2020. \$300 million principal amount of the notes were issued in April 2010 and \$150 million principal amount of the notes were issued in June 2011. We are allowed to repurchase the notes at specified prepayment premiums. These notes are guaranteed by certain of our subsidiaries.

\$280 million revolving credit agreement with a group of banks. We may increase the credit facility by up to an additional \$100 million at any time, subject to participating banks increasing the amount of their lending commitments. The interest rate on our borrowings will be, at our option, either:

- (a) LIBOR (based on a 1, 2, 3 or 6 month interest period, as selected by us) plus 125 to 200 basis points (inclusive of facility fees), depending on our ratio of debt to earnings before taxes, interest, depreciation and amortization (EBITDA), or;
- (b) the higher of

The higher of (a) the prime lending rate and (b) the Federal Funds rate plus 50 basis points plus in each case, 25 to 100 basis points (inclusive of facility fees), depending on our ratio of debt to EBITDA, or

LIBOR (based on a 1 week interest period) plus 125 to 200 basis points (inclusive of facility fees), depending on our ratio of debt to EBITDA

At September 24, 2011, we had \$20.0 million in outstanding borrowings under the revolving credit agreement, at an annual interest rate of 2.94%, not including facility fees. The revolving credit agreement has a termination date of October 16, 2013 and contains certain financial covenants that may limit our additional borrowing capability under the agreement. At September 24, 2011, we had the ability to borrow an additional \$240.9 million under this facility.

Table of Contents

These debt agreements contain covenants that require us to maintain certain coverage ratios and may limit us with respect to certain business activities, including capital expenditures. Our key debt covenants are that interest-bearing debt is not to exceed 3.75x EBITDA of the prior four quarters and that our EBITDA over our prior four quarters must be at least 2.50x our interest expense over the same period. At September 24, 2011, we were in compliance with all covenants related to these debt agreements. The key covenant calculations at September 24, 2011 were as follows:

Interest-bearing debt	506,033
EBITDA last 12 months	324,966
Leverage ratio	1.56
EBITDA last 12 months	324,966
Interest expense last 12 months	34,784
Interest earned ratio	9.34

The calculation of EBITDA last 12 months (September 25, 2010 - September 24, 2011) is as follows:

Net cash flows from operating activities	\$	130,996
Interest expense		34,784
Income tax expense		70,712
Deferred income tax benefit		1,783
Noncontrolling interest		(7,744)
Equity in earnings/(losses) in nonconsolidated subsidiaries		4,961
Stock-based compensation		(6,404)
Pension plan expense		(10,418)
Contribution to pension plan		11,754
Payment of deferred compensation		393
Changes in assets and liabilities, net of acquisitions		95,544
Other		(1,395)

EBITDA	\$	324,966
--------	----	---------

Net earnings attributable to Valmont Industries, Inc.	\$	148,443
Interest expense		34,784
Income tax expense		70,712
Depreciation and amortization expense		71,027

EBITDA	\$	324,966
--------	----	---------

Our businesses are cyclical, but we have diversity in our markets, from a product, customer and a geographical standpoint. We have demonstrated the ability to effectively manage through business cycles and maintain liquidity. We have consistently generated operating cash flows in excess of our capital expenditures. Based on our available credit facilities, recent issuance of senior unsecured notes and our history of positive operational cash flows, we believe that we have adequate liquidity to meet our needs. We have not made any provision for U.S. income taxes in our financial statements on approximately \$388 million of undistributed earnings of our foreign subsidiaries, as we intend to reinvest those earnings. Therefore, if we need to repatriate foreign cash balances to the United States to meet our cash needs, income taxes would be paid to the extent that those cash repatriations were undistributed earnings of our foreign subsidiaries.

Table of Contents**Financial Obligations and Financial Commitments**

Other than our additional borrowings under our senior unsecured notes related to the redemption of our senior subordinated notes and revolving credit agreement related to the Delta acquisition, there have been no material changes to our financial obligations and financial commitments as described beginning on page 35 in our Form 10-K for the year ended December 25, 2010. We have future financial obligations related to (1) payment of principal and interest on interest-bearing debt, (2) Delta pension plan contributions, (3) operating leases and (4) purchase obligations. These obligations at September 24, 2011 were as follows (in millions of dollars):

<b>Contractual Obligations</b>	<b>Total</b>	<b>2011</b>	<b>2012</b>	<b>2013</b>	<b>2014</b>	<b>2015</b>	<b>After 2015</b>
Long-term debt	\$ 495.0	\$	\$ 20.5	\$	0.5	\$	474.0
Interest	270.0	15.1	60.2	59.8	134.9		
Delta pension plan contributions	78.8		22.5	22.5	33.8		
Operating leases	115.7	12.1	32.4	22.7	48.5		
Unconditional purchase commitments	35.4	35.4					
<b>Total contractual cash obligations</b>	<b>\$ 994.9</b>	<b>\$ 62.6</b>	<b>\$ 135.6</b>	<b>\$ 105.5</b>	<b>\$ 691.2</b>		

Long-term debt mainly consisted of \$450.0 million principal amount of senior unsecured notes. At September 24, 2011, we had \$20.0 million of outstanding borrowings under our bank revolving credit agreement. We also had various other borrowing arrangements aggregating \$10.6 million at September 24, 2011. Obligations under these agreements may accelerate in event of non-compliance with covenants. The Delta pension plan contributions are related to agreed-upon cash funding commitments to the plan with the plan's trustees, which are re-negotiated in conjunction with a triennial valuation. Operating leases relate mainly to various production and office facilities and are in the normal course of business.

Unconditional purchase obligations relate to purchase orders for zinc, aluminum and steel, all of which we plan to use in 2011, and certain capital investments planned for 2011. We believe the quantities under contract are reasonable in light of normal fluctuations in business levels and we expect to use the commodities under contract during the contract period.

At September 24, 2011, we had approximately \$50.0 million of various long-term liabilities related to certain income tax, environmental and other matters. These items are not scheduled above because we are unable to make a reasonably reliable estimate as to the timing of any potential payments.

**Off Balance Sheet Arrangements**

There have been no changes in our off balance sheet arrangements as described on page 36 in our Form 10-K for the fiscal year ended December 25, 2010 during the fiscal quarter and year-to-date periods ended September 24, 2011.

**Critical Accounting Policies**

There have been no changes in our critical accounting policies as described on pages 37-41 on our Form 10-K for the fiscal year ended December 25, 2010 during the fiscal quarter and year-to-date periods ended September 24, 2011.

**Item 3. Quantitative and Qualitative Disclosure about Market Risk**

There were no material changes in the company's market risk during the quarter ended September 24, 2011. For additional information, refer to the section "Risk Management" beginning on page 36 in our Form 10-K for the fiscal year ended December 25, 2010.

Table of Contents

**Item 4. Controls and Procedures**

The Company carried out an evaluation under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to Securities Exchange Act Rule 13a-15. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, the Company's disclosure controls and procedures are effective to provide reasonable assurance that information required to be disclosed by the Company in the reports the Company files or submits under the Securities Exchange Act of 1934 is (1) accumulated and communicated to management, including the Company's Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosures and (2) recorded, processed, summarized and reported, within the time periods specified in the Commission's rules and forms.

No changes in the Company's internal control over financial reporting occurred during the quarter covered by this report that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****Item 2. Unregistered Sales of Equity Securities and Use of Proceeds****Issuer Purchases of Equity Securities**

Period	(a) Total Number of Shares Purchased	(b) Average Price paid per share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Maximum Number of Shares that May Yet Be Purchased Under the Plans or Programs
June 26, 2011 to July 23, 2011	13,030	\$ 106.38		
July 24, 2011 to August 27, 2011				
August 28, 2011 to September 24, 2011				
Total	13,030	\$ 106.38		

During the third quarter, the only shares reflected above were those delivered to the Company by employees as part of stock option exercises, either to cover the purchase price of the option or the related taxes payable by the employee as part of the option exercise. The price paid per share was the market price at the date of exercise.
