FAIRMARKET, INC.

Notes to Condensed Consolidated Financial Statements
(Unaudited)

1. Nature of Business and Recent Events

FairMarket, Inc. (FairMarket or the Company) provides private-label, Internet-based marketing and commerce solutions that incorporate dynamic pricing. The Company offers a range of services, technology and expertise to help large merchants maximize yield on clearance, excess and off-lease inventory and to realize process efficiencies. FairMarket's solutions enable merchants to sell to consumers or wholesale buyers on the merchants' own sites or to buyers on eBay. FairMarket's technology is designed to enable our customers to leverage their existing inventory, transaction and fulfillment infrastructures by integrating seamlessly with those systems.

On June 20, 2003, FairMarket, Inc. (FairMarket) and eBay Inc. (eBay) announced that they had entered into an Asset Purchase Agreement, dated as of that date (the Asset Purchase Agreement), which sets forth the terms and conditions pursuant to which FairMarket will sell substantially all of its technology and business assets to eBay for consideration of \$4.5 million in cash (the Asset Sale). Of this total, \$2.5 million will be paid to FairMarket at closing and \$2 million will be held in escrow for a period of two years following the closing in order to secure FairMarket's indemnification obligations under the Asset Purchase Agreement. In addition to purchasing specified assets, which include all of FairMarket's intellectual property and its rights under most of its customer contracts, eBay will assume certain of FairMarket's obligations under those existing customer contracts assumed by eBay. In connection with the Asset Sale, the parties have also entered into a Transition Services Agreement pursuant to which FairMarket will provide services to eBay after the closing of the Asset Sale to fulfill customer service obligations under the customer contracts assumed by eBay. eBay will pay FairMarket for providing such services, generally based on FairMarket's cost. Subject to earlier termination by eBay, the Transition Services Agreement will expire on December 31, 2003 or a later date at the election of eBay, but in no event later than January 31, 2004. In addition, FairMarket and eBay agreed to terminate, effective upon the closing of the Asset Sale, all existing commercial agreements solely between eBay and FairMarket, except with respect to certain continuing indemnification obligations.

The Asset Sale is subject to approval by FairMarket's stockholders and the satisfaction of other customary closing conditions. FairMarket has set Wednesday, September 3, 2003 as the meeting date for its special meeting of stockholders to approve the Asset Sale. At the special meeting, stockholders will also be asked to consider an amendment to FairMarket's amended and restated certificate of incorporation to change its name to Dynabazaar, Inc., and to elect each of Shikhar Ghosh and Lloyd I. Miller, III as a Class III director to its board of directors. FairMarket set August 4, 2003 as the record date for determining those stockholders eligible to vote at the special meeting. FairMarket expects the Asset Sale to close in September 2003.

In connection with the closing of the Asset Sale, eBay, Inc., the holder of FairMarket's Series B preferred stock, has provided notice to FairMarket that it has elected to receive a liquidation preference equal to approximately \$2 million in the aggregate, or \$2.10 per share, plus all accrued and unpaid dividends with respect to the Series B preferred stock. The liquidation preference on preferred stock has been classified as a current liability on the balance sheet at June 30, 2003. After such liquidation preference is paid, the holders of FairMarket's Series B preferred stock will only be entitled to a cash dividend payable quarterly at the rate of 6.5 % per annum and the right to participate pro rata on an as-converted basis in any dividend paid on FairMarket common stock and in any distribution of the remaining assets of FairMarket, including in the previously announced distribution of approximately \$38 million to FairMarket stockholders shortly following the closing of the asset sale.

On June 20, 2003, FairMarket announced that it plans to make a cash distribution to its stockholders of approximately \$38 million. FairMarket has not set a record or payment date for such distribution, but currently expects the distribution would be paid shortly after the closing of the eBay transaction.

We are currently reviewing alternatives for the use and disposition of our remaining assets following the term of the transition services that we will provide to eBay, which may include pursuing a plan of complete liquidation and dissolution (possibly including the sale of our remaining assets). Alternatively, we may decide to pursue selling our remaining assets outside of a liquidation and dissolution, to make additional distributions of cash to our stockholders, to explore other strategic alternatives such as a business combination with another party, and/or to continue as an independent stand-alone company focusing on business opportunities unrelated to our historical business. At this time, our board of directors has not made any decision to pursue any one of these options.

2. **Basis of Presentation**

The accompanying consolidated interim financial statements of FairMarket are unaudited and have been prepared on a basis substantially consistent with the Company's audited financial statements for the year ended

December 31, 2002. The consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information. Consequently, these statements do not include all disclosures normally required by generally accepted accounting principles for annual financial statements. These consolidated interim financial statements should be read in conjunction with the Company's audited consolidated financial statements for the year ended December 31, 2002, which are contained in FairMarket's Annual Report on Form 10-K, for the year ended December 31, 2002 filed with the Securities and Exchange Commission. The consolidated interim financial statements, in the opinion of management, reflect all adjustments (including all normal recurring accruals) necessary for a fair presentation of the results of operations and cash flows for the interim periods ended June 30, 2003 and 2002. The results of operations for the interim periods are not necessarily indicative of the results of operations to be expected for the fiscal year. The consolidated interim financial statements include the accounts of FairMarket, Inc. and its wholly owned subsidiaries, FairMarket UK Limited, The FairMarket Network Pty Ltd, FairMarket GmbH and FairMarket Securities Corporation. All intercompany transactions and balances have been eliminated in consolidation.

3. Accounting for Stock-Based Compensation

Statement of Financial Accounting Standards (SFAS) No. 123 as amended by SFAS No. 148, Accounting for Stock-Based Compensation, encourages but does not require companies to record compensation costs for stock-based employee compensation at fair value. The Company has chosen to account for stock-based compensation granted to employees using the intrinsic value method prescribed in Accounting Principles Board (APB) Opinion No. 25, Accounting for Stock Issued to Employees, and related interpretations. Accordingly, compensation costs for stock options granted to employees is measured as the excess, if any, of the fair value of the Company's stock at the date of the grant over the amount that must be paid by the employee to acquire the stock under the terms of the stock option. Subsequent changes to option terms can also give rise to compensation. Stock-based compensation issued to non-employees is measured and recorded using the fair value method prescribed in SFAS No. 123.

The Company follows the disclosure provisions of SFAS No. 123 and SFAS No. 148. Had compensation cost for the Company's stock-based compensation plans been determined based on the fair value at the grant dates as calculated in accordance with SFAS No. 123, the Company's net loss for the quarter and six months ended June 30, 2003 and 2002 would have increased to the pro forma amounts indicated below (in thousands, except per share amounts):

	Three Months Ended June 30, 2003	Three Months Ended June 30, 2002	Six Months Ended June 30, 2003	Six Months Ended June 30, 2002
Net loss attributable to common stockholders				
As reported	\$ (1,968)	\$ (7,205)	\$ (3,570)	\$ (19,045)
Add: Stock-based employee compensation expense included in reported results	38	60	90	236
Deduct: Total stock-based employee compensation expense determined under the fair-value-based method for all awards	(234)	(463)	(468)	(1,000)
Pro forma	\$ (2,164)	\$ (7,608)	\$ (3,948)	\$ (19,809)
Net loss per common share				
As reported	\$ (0.07)	\$ (0.25)	\$ (0.13)	\$ (0.65)

Pro forma	\$	(0.08)	\$	(0.26)	\$	(0.15)	\$	(0.68)
-----------	----	--------	----	--------	----	--------	----	--------

4. **Equity-related and Unutilized Space Charges**

Equity-related charges consist of the amortization of (i) deferred stock compensation resulting from the grant of stock options to employees at exercise prices subsequently deemed to be less than the fair value of the common stock on the grant date and (ii) the fair value of warrants issued to strategic customers and shares of Series D convertible

preferred stock issued to strategic customers at prices below their fair value. At June 30, 2003, on the consolidated balance sheet deferred stock compensation was \$26,000, net of equity-related charges of \$90,000 amortized to the consolidated statement of operations and canceled stock options valued at \$43,000. This \$26,000 is being amortized ratably over the vesting periods of the applicable stock options, typically four years, with 25% vesting on the first anniversary of the grant date and the balance vesting 6.25% quarterly thereafter. For the three and six month periods ended June 30, 2003 and 2002, related expense recognized was \$38,000 and \$60,000, and \$90,000 and \$236,000, respectively.

In the first quarter of 2002, we recorded a charge of \$4.5 million for unutilized office space at our Woburn, Massachusetts headquarters. This charge included rent and other related costs for a significant portion of our leased space, which has been vacated for the remaining lease term and the write-down of related leasehold improvements and furniture and fixtures. In the fourth quarter of 2002, we recorded a reversal of \$513,000 related to a sublease of approximately 11,000 square feet of the unutilized office space. During 2002, we paid \$746,000 against this accrual, which represented rent payments related to unutilized office space. In addition, we recorded \$1.2 million for the write-down of leasehold improvements and furniture and fixtures. During the six months ended June 30, 2003 we paid \$498,000 against this accrual for rent payments related to unutilized office space. As of June 30, 2003, \$1.6 million of the total charge remained accrued and unpaid for future rent payments related to unutilized office space.

	(in thousands)
Roll forward of activity for unutilized office space	
Initial charge recorded in March 2002	\$ 4,500
Non-cash write-down of leasehold improvements and furniture and fixtures	(1,161)
Cash payments made in 2002	(746)
Reversal of accrual in December 2002	(513)
Unutilized space accrual at December 31, 2002	2,080
Cash payments made during the six months ended June 30, 2003	(498)
Unutilized office space accrual at June 30, 2003	\$ 1,582

5. Net Loss per Share

Basic net loss per common share is computed using the weighted average number of common shares outstanding during the period. Diluted net loss per common share is computed using the weighted average number of common equivalent shares outstanding during the period plus the effect of any dilutive potential common shares. Dilutive potential common equivalent shares consist of the assumed exercise of stock options, the proceeds of which are then assumed to have been used to repurchase outstanding stock using the treasury stock method, and the assumed conversion of convertible preferred stock and warrants. Potential common shares were excluded from the calculation of net loss per common share for the periods presented since their inclusion would be anti-dilutive. For the three and six months ended June 30, 2003 and 2002, basic and diluted net loss per common share is computed based on the weighted-average number of common shares outstanding during the period because the effect of potential common equivalent shares would be anti-dilutive.

Certain securities were not included in the computation of diluted net loss per share for the quarters ended June 30, 2003 and 2002, because they would have had an anti-dilutive effect due to net losses for such periods. These securities include: (i) options to purchase 2,809,817 shares of common stock with exercise prices of \$0.10 to \$9.66 per share at June 30, 2003 and options to purchase 4,646,162 shares of common stock with exercise prices of \$0.10 to \$9.66 per share at June 30, 2002; and (ii) 952,380 shares of Series B preferred stock convertible into common stock on a one-for-one basis, subject to adjustment, at June 30, 2003 and 2002, respectively.

6. Comprehensive Loss

For the three and six months ended June 30, 2003 and 2002, total comprehensive loss was as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2003	2002	2003	2002
Net loss	\$ (1,919)	\$ (7,189)	\$ (3,472)	\$ (19,029)
Changes in other comprehensive loss:				
Foreign currency translation adjustments	46	60	54	39
Unrealized gain (loss) on marketable securities	(11)	97	5	(45)
Total comprehensive loss	\$ (1,884)	\$ (7,032)	\$ (3,413)	\$ (19,035)

7. Stock Option Exchange

On January 16, 2001, the Company implemented a one-time employee incentive program under which employees had the opportunity to exchange, on a one-for-one basis, their outstanding employee stock options with exercise prices of \$3.00 or more for new options with an exercise price of \$2.1875, the closing price of the Company's common stock on the January 16, 2001 exchange date. Options held by executive officers and directors were not included in the exchange. Under this program, options covering approximately 1,155,000 shares of the Company's common stock were exchanged for options covering an equal number of shares. Options granted under this program have special terms, with the options vesting quarterly over two years, beginning on the three-month anniversary of the grant date if the option exchanged was unvested, or vesting on the six-month anniversary of the grant date if the option exchanged was vested, and having a term of two and one-half years. For accounting purposes, the exchange constituted a repricing of the existing options and will require variable accounting for the new options granted in the exchange. As a result, the Company (i) will recognize a non-cash compensation charge each quarter with respect to vested options if and to the extent that the per share fair market value of the Company's common stock at the end of the quarter exceeds \$2.1875, the per share exercise price of the new options, and (ii) will adjust deferred compensation each quarter for unvested options. There is a potential for such a variable non-cash charge in each quarter until all of the new options are exercised or until the date the options expire (July 16, 2003) or otherwise terminate. The closing price of our common stock during 2002 and through June 30, 2003 was below \$2.1875, therefore no related charges were recognized during 2002 or for the three and six months ended June 30, 2003. All these options expired on July 16, 2003.

8. Revenues and Long-lived Assets by Geographic Region

The table below presents revenues by principal geographic region for the three and six months ended June 30, 2003 and 2002 (in thousands):

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2003	2002	2003	2002
United States	\$ 1,144	\$ 971	\$ 2,119	\$ 1,921
United Kingdom	349	353	705	690
All other	23	22	49	46
Total	\$ 1,516	\$ 1,346	\$ 2,873	\$ 2,657

The table below presents long-lived assets by principal geographic region as of June 30, 2003 and December 31, 2002 (in thousands):

	June 30, 2003		December 31, 2002	
United States	\$	528	\$	1,253
United Kingdom		132		225

Total		\$	660	\$	1,478

9. Accounting for Consideration Given by a Vendor to a Customer

Effective January 1, 2002, the Company adopted Emerging Issues Task Force (EITF) Issue No. 01-09, Accounting for Consideration Given by a Vendor to a Customer (Including a Reseller of the Vendor's Products) (EITF 01-09). EITF 01-09 addresses whether a vendor should recognize consideration, including equity instruments, given to a customer as an expense or as an offset to revenue being recognized from that same customer.

Consideration given to a customer is presumed to be a reduction of revenue unless both the following conditions are met:

- (a) the vendor receives an identifiable benefit in exchange for the consideration, and the benefit is sufficiently separable from the customer's purchase of the vendor's products and services such that the customer could have purchased the products from another third party; and
- (b) the vendor can reasonably estimate the fair value of the benefit received.

If both criteria are met, consideration paid to the customer may be recognized as an expense. If consideration, including equity instruments, does not meet the above criteria, the vendor must characterize the recognition of such consideration as a reduction of revenue, to the extent there is cumulative revenue from such customer. Any recognition in excess of cumulative revenue for such consideration is recorded as an expense.

During the second quarter of 2002, the Company recorded a one-time charge of \$114,200 against revenue to reflect the amount by which the estimated fair value of the shares of the Company's Series B redeemable convertible preferred stock issued to eBay, Inc. in May 2002 exceeded the amount paid by eBay.

10. Commitments and Contingencies

We are subject to legal proceedings, claims, and litigation arising in the ordinary course of business. While the outcome of these matters is currently not determinable, we do not expect that the ultimate costs to resolve these matters will have a material adverse effect on our consolidated financial position, results of operations or cash flows.

FairMarket has been named as a defendant in certain purported class action lawsuits filed by individual shareholders in the U.S. District Court for the Southern District of New York against FairMarket, Scott Randall (former President, Chief Executive Officer and Chairman of the Board of FairMarket), John Belchers (former Chief Financial Officer of FairMarket), U.S. Bancorp Piper Jaffray, Inc., Deutsche Bank Securities, Inc. and FleetBoston Robertson Stephens, Inc. The lawsuits have been filed by individual shareholders who purport to seek class action status on behalf of all other similarly situated persons who purchased the common stock of FairMarket between March 14, 2000 and December 6, 2000. The lawsuits allege that certain underwriters of FairMarket's initial public offering solicited and received excessive and undisclosed fees and commissions in connection with that offering. The lawsuits further allege that the defendants violated the federal securities laws by issuing a registration statement and prospectus in connection with FairMarket's initial public offering, which failed to accurately disclose the amount and nature of the commissions and fees paid to the underwriter defendants. On or about October 8, 2002, the Court entered an Order dismissing the claims asserted against certain individual defendants in the consolidated actions, including the claims against Mr. Randall and Mr. Belchers, without any payment from these individuals or the Company. On or about February 19, 2003, the Court entered an Order dismissing with prejudice the claims asserted against the Company under Section 10(b) of the Securities Exchange Act of 1934. As a result, the only claims that remain against the Company are those arising under Section 11 of the Securities Act of 1934. The Company has entered into an agreement-in-principle to settle the remaining claims in the litigation. The proposed settlement will result in a dismissal with prejudice of all

claims and will include a release of all claims that were brought or could have been brought against the Company and its present and former directors and officers. It is anticipated that any payment to the plaintiff class and their counsel will be funded by the Company's directors & officers liability insurance and that no direct payment will be made by the Company. The proposed settlement is subject to a number of significant conditions and contingencies, including the execution of a definitive settlement agreement, final approval of the settlement by the Company's directors & officers liability insurance carriers and by the plaintiff class, and the approval of the settlement by the Court.

Indemnification Obligations

In November 2002, the FASB issued FIN No. 45 Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57 and 107 and rescission of FASB Interpretation No. 34 (FIN 45). FIN 45 requires that a guarantor recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken by issuing the guarantee. FIN 45 also requires additional disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under certain guarantees it has issued. The accounting requirements for the initial recognition of guarantees

are applicable on a prospective basis for guarantees issued or modified after December 31, 2002. The disclosure requirements were effective for all guarantees outstanding, regardless of when they were issued or modified, during the first quarter of fiscal 2003. The adoption of FIN 45 did not have an effect on the Company's consolidated financial statements. The following is a summary of the agreements that the Company has determined is within the scope of FIN 45.

As permitted under Section 145 of the Delaware General Corporation Law, the by-laws of FairMarket, Inc. provide that FairMarket shall, to the extent legally permitted, indemnify each person who was or is a party or is threatened to be made a party to any threatened, pending or completed action, suit or proceeding by reason of the fact that such person is or was, or has agreed to become, a director or officer of FairMarket, or is or was serving, or has agreed to serve, at the request of FairMarket, as a director, officer, trustee, partner, employee or agent of, or in a similar capacity with, another corporation, partnership, joint venture, trust, employee benefit plan or other enterprise. The indemnification provided for in the by-laws is expressly not exclusive of any other rights to which those seeking indemnification may be entitled under any law, agreement or vote of stockholders or disinterested directors or otherwise, and shall inure to the benefit of the heirs, executors and administrators of such persons. The term of the indemnification period is for the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have a director and officer insurance policy that enables us to recover a portion of any future amounts paid. As a result of our insurance policy coverage, we believe the estimated fair value of these indemnification agreements is minimal. We have no liabilities recorded for these agreements as of June 30, 2003.

Our customer contracts contain indemnification provisions as a standard term of those contracts. Generally, these indemnification provisions require that we indemnify, defend and hold harmless the customer and certain related parties for third party claims, liabilities and costs arising from the breach of any warranty, representation or covenant in the agreement by us or any claim that our technology or service infringes or violates any third party's copyright, patent, trade secret, trademark, right of publicity or right of privacy or contains any defamatory content. Generally, our aggregate potential liability under these indemnification provisions is capped at the total amount paid to us by the customer under the contract, although some customer contracts contain higher limits and some contain no limit for specified types of claims. The term of these indemnification provisions is generally perpetual from the time of execution of the agreement. Some of our other types of agreements with third parties contain similar provisions. We believe the estimated fair value of these indemnification agreements is minimal and we have no liabilities recorded for these provisions as of June 30, 2003.

11. Redeemable Convertible Preferred Stock

On May 17, 2002, the Company completed a private placement of 952,380 shares of its Series B redeemable convertible preferred stock, par value \$0.001 per share, to eBay, Inc. for an aggregate purchase price of \$2.0 million. The Series B preferred stock is entitled to cash dividends payable quarterly at the rate of 6.5% per annum in preference to any dividend on any other series of preferred stock or common stock. The dividends are cumulative and are entitled to participate on a pro rata basis in any dividend paid on the common stock on an as if converted basis. At June 30, 2003, the Company accrued \$32,500 for dividends payable. The Series B preferred stock is convertible into shares of common stock on a one-for-one basis, subject to certain adjustment mechanisms including a weighted average anti-dilution mechanism. In the event of any liquidation, dissolution or winding up of the Company (a "Liquidation"), the holders of the Series B preferred stock are entitled to receive, in preference to the holders of certain junior securities, as defined, a per share amount equal to \$2.10 plus all accrued and unpaid dividends (the "Liquidation Preference"). In the event of a Liquidation, after payment of the Liquidation Preference and any other liquidation preference on any other series of stock, the Series B preferred stock is entitled to participate on a pro rata basis with the common stock in the distribution of the remaining assets of the Company on an as if converted basis. Since May 17, 2003, the holders of the Series B preferred stock have had the right to require the Company to redeem the Series B preferred stock for cash at any time. The Company has the right, at any time after May 17, 2004, to redeem the outstanding Series B preferred stock at \$2.10 per share plus all accrued and unpaid dividends. The net proceeds from this offering, after issuance costs, totaled \$1.8 million. At the issuance date, the Company estimated the fair value of the Series B preferred stock to be in excess of the amount paid by eBay by \$114,200. As a result, the Company recorded an \$114,200 adjustment to increase the carrying value of this investment and decrease revenue in accordance with EITF 01-09 (see Note 9.) The Company has accreted the carrying value of the Series B preferred stock up to \$2.0 million through May 2003 in accordance with the redemption feature described above. We recorded \$57,000 in accretion during 2002 and \$32,000 for the six months ended June 30, 2003. At June 30, 2003, the carrying value of the Series B preferred

stock was \$2.0 million.

In connection with the closing of the Asset Sale, eBay, Inc., the holder of FairMarket's Series B preferred stock, has provided notice to FairMarket that it has elected to receive a liquidation preference equal to approximately \$2 million in the aggregate, or \$2.10 per share, plus all accrued and unpaid dividends with respect to the Series B preferred stock. The liquidation preference on preferred stock has been classified as a current liability on the balance sheet at June 30, 2003. After such liquidation preference is paid, the holders of FairMarket's Series B preferred stock will only be entitled to a cash dividend payable quarterly at the rate of 6.5 % per annum and the right to participate pro rata on an as-converted basis in any dividend paid on FairMarket common stock and in any distribution of the remaining assets of FairMarket, including in the previously announced distribution of approximately \$38 million to FairMarket stockholders shortly following the closing of the asset sale.

12. Recent Accounting Pronouncements

In July 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 146,

Accounting for Costs Associated with Exit or Disposal Activities (SFAS No. 146). The standard requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. Examples of costs covered by the standard include lease termination costs and certain employee severance costs that are associated with a restructuring, discontinued operation, plant closing or other exit or disposal activity. SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. The Company's adoption of SFAS No. 146, effective January 1, 2003, has had no material impact on the financial statements through June 30, 2003.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure (SFAS No. 148) which addresses financial accounting and reporting for the recording of expenses for the fair value of stock options. SFAS No. 148 provides alternative methods of transition for a voluntary change to a fair value based method of accounting for stock-based employee compensation. Additionally, SFAS No. 148 requires more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. The provisions of this statement are effective for fiscal years ending after December 15, 2002. While the Company has not elected to adopt fair value accounting for its stock-based compensation, it has complied with the new disclosure requirements under SFAS No. 148 and provided interim disclosure on the effects of stock-based compensation in this report.

In January 2003, the FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities, an Interpretation of ARB 51 (FIN 46). The primary objectives of FIN 46 are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights (variable interest entities or VIEs) and how to determine when and which business enterprise should consolidate the VIE. This new model for consolidation applies to an entity for which either: (a) the equity investors (if any) do not have a controlling financial interest; or (b) the equity investment at risk is insufficient to finance that entity's activities without receiving additional subordinated financial support from other parties. In addition, FIN 46 requires that both the primary beneficiary and all other enterprises with a significant variable interest in a VIE make additional disclosures. The Company is required to apply FIN 46 to all new variable interest entities created or acquired after January 31, 2003. For variable interest entities created or acquired prior to February 1, 2003, the Company is required to apply FIN 46 on July 1, 2003. The adoption of FIN 46 did not have an effect on the Company's financial statements.

13. Recent Events

Edgar Filing: FAIRMARKET INC - Form 10-Q

On June 20, 2003, FairMarket, Inc. (FairMarket) and eBay Inc. (eBay) announced that they had entered into an Asset Purchase Agreement, dated as of that date (the Asset Purchase Agreement), which sets forth the terms and conditions pursuant to which FairMarket will sell substantially all of its technology and business assets to eBay for consideration of \$4.5 million in cash (the Asset Sale). Of this total, \$2.5 million will be paid to FairMarket at closing and \$2 million will be held in escrow for a period of two years following the closing in order to secure FairMarket s indemnification obligations under the Asset Purchase Agreement. In addition to purchasing specified assets, which include all of FairMarket s intellectual property and its rights under most of its customer contracts, eBay will assume certain of FairMarket s obligations under those existing customer contracts assumed by eBay. In connection with the Asset Sale, the parties have also entered into a Transition Services Agreement pursuant to which FairMarket will provide services to eBay after the closing of the Asset Sale to fulfill customer service obligations under the customer contracts assumed by eBay. eBay will pay FairMarket for providing such services, generally based on FairMarket s cost. Subject to earlier termination by eBay, the Transition Services Agreement will expire on December 31, 2003 or a later date at the election of eBay, but in no event later than January 31, 2004. In addition, FairMarket and eBay agreed to terminate, effective upon the closing of the Asset Sale, all existing

commercial agreements solely between eBay and FairMarket, except with respect to certain continuing indemnification obligations.

The Asset Sale is subject to approval by FairMarket's stockholders and the satisfaction of other customary closing conditions. FairMarket has set Wednesday, September 3, 2003 as the meeting date for its special meeting of stockholders to approve the Asset Sale. At the special meeting, stockholders will also be asked to consider an amendment to FairMarket's amended and restated certificate of incorporation to change its name to Dynabazaar, Inc., and to elect each of Shikhar Ghosh and Lloyd I. Miller, III as a Class III director to its board of directors. FairMarket set August 4, 2003 as the record date for determining those stockholders eligible to vote at the special meeting. FairMarket expects the Asset Sale to close in September 2003.

In connection with the closing of the Asset Sale, eBay, Inc., the holder of FairMarket's Series B preferred stock, has provided notice to FairMarket that it has elected to receive a liquidation preference equal to approximately \$2 million in the aggregate, or \$2.10 per share, plus all accrued and unpaid dividends with respect to the Series B preferred stock. The liquidation preference on preferred stock has been classified as a current liability on the balance sheet at June 30, 2003. After such liquidation preference is paid, the holders of FairMarket's Series B preferred stock will only be entitled to a cash dividend payable quarterly at the rate of 6.5 % per annum and the right to participate pro rata on an as-converted basis in any dividend paid on FairMarket common stock and in any distribution of the remaining assets of FairMarket, including in the previously announced distribution of approximately \$38 million to FairMarket stockholders shortly following the closing of the asset sale.

On June 20, 2003, FairMarket announced that it plans to make a cash distribution to its stockholders of approximately \$38 million. FairMarket has not set a record or payment date for such distribution, but currently expects the distribution would be paid shortly after the closing of the eBay transaction.

We are currently reviewing alternatives for the use and disposition of our remaining assets following the term of the transition services that we will provide to eBay, which may include pursuing a plan of complete liquidation and dissolution (possibly including the sale of our remaining assets). Alternatively, we may decide to pursue selling our remaining assets outside of a liquidation and dissolution, to make additional distributions of cash to our stockholders, to explore other strategic alternatives such as a business combination with another party, and/or to continue as an independent stand-alone company focusing on business opportunities unrelated to our historical business. At this time, our board of directors has not made any decision to pursue any one of these options.

14. ITEM 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify forward-looking statements by the use of the words believe, expect, anticipate, intend, estimate, assume and other similar expressions which predict or indicate future events and trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond our control. Our actual results could differ materially from those set forth in the forward-looking statements. Certain factors that might cause such a difference include the following: market acceptance of our online auction and other e-commerce services; growth of the market for dynamic e-commerce services; the competitive nature of the online markets in which we operate; economic conditions; our ability to generate significant revenue to reach profitability; our ability to retain existing customers and to obtain new customers; our ability to expand our operations in our geographic markets and the currency, regulatory and other risks associated with doing business in international markets; our ability to attract and retain qualified personnel; the operation and capacity of our network system infrastructure; our limited operating history; and the other risks and uncertainties discussed under the heading Factors that May Affect Results of Operations and Financial Condition on page 21 of this Form 10-Q. You should not place undue reliance on our forward-looking statements, and we assume no obligation to update any forward-looking statements.

The following discussion of our financial condition and results of operations should be read in conjunction with our financial statements and the notes to those statements included elsewhere in this Report and in our Annual Report on Form 10-K, for the year ended December 31, 2002 and in other reports filed by us with the Securities and Exchange Commission.

Overview

FairMarket is an online auction and promotions technology and service provider that enables marketers to create results-oriented rewards programs and helps commerce companies automate the process of selling their excess inventory online to wholesale and consumer buyers.

In the promotions area we offer a range of services, technology and expertise that enable large brands to quickly and easily create fun, innovative, interactive and customized marketing programs in conjunction with off-line sales and marketing initiatives. We work with leading brands and agencies to execute programs that help marketers engage customers, drive sales and leverage the eBay community through the exclusive marketing arrangement we entered into with eBay during the second quarter of 2002. Our promotion solution is effective either as the central program concept for a rewards promotion using newly created points currency or as a value added redemption module for use with an existing loyalty program. Our auction and promotions platform can help optimize the return on investment on marketing and promotional budgets and lead to the creation of a higher quality customer database to assist future marketing initiatives.

We also utilize our technology, services and expertise in the commerce area to help large merchants maximize yield on clearance, excess and off-lease inventory and to realize process efficiencies. Our solutions enable merchants to sell to their existing base of wholesale buyers or to buyers on eBay as well as to consumers on their own sites. Our technology is designed to enable our customers to leverage their existing inventory, transaction and fulfillment infrastructures by integrating seamlessly with those systems.

Our services are used in four primary areas: (1) retail and discount clearance; (2) promotions and interactive marketing; (3) business-to-business surplus; and (4) outsourced auctions and e-commerce to portals and other web communities. We provide a broad suite of dynamic pricing and

Edgar Filing: FAIRMARKET INC - Form 10-Q

points based formats, including auctions, our primary format, as well as fixed price transaction formats for commerce and promotions, falling price formats for commerce, and integrated marketing capability, to create a comprehensive e-business selling and marketing service offering.

We offer our commerce customers the ability to distribute their listings to other sites through two methods. First, through our MarketSelect service, we enable customers (with or without their own FairMarket-hosted dynamic pricing site) to list, manage and transact sales on eBay. Second, because we host our customer's dynamic pricing sites on our central systems, we have the ability to aggregate listings of goods and services available for sale on our customer's FairMarket-hosted sites and make those listings available for display and sale on other FairMarket-hosted customer sites.

We provide an array of operational and support services to customers. In addition to hosting, customer support and end-user support services, our professional services group provides our customers with a range of business applications, technical customization, integration, e-marketing, usability and other consulting services related to our product offerings.

We believe our success is dependent in large part on increasing our customer base and further enhancing the breadth and functionality of our service offerings, as well as on the volume of our customer's sales on their FairMarket-hosted sites and through our MarketSelect service. We intend to continue to invest in the further enhancement of our service offerings and technology and in the promotion of our service offerings.

Because of our limited operating history, there is limited operating and financial data about our business upon which to base an evaluation of our performance. During 2002, our net losses and negative operating cash flows improved during each quarter. For 2003, we expect our operating losses and negative operating cash flows to improve as we continue in our effort to achieve operating cash flow breakeven. Period-to-period comparisons of operating results should not be relied upon as an indicator of future operating results.

Recent Events

On June 20, 2003, FairMarket, Inc. (FairMarket) and eBay Inc. (eBay) announced that they had entered into an Asset Purchase Agreement, dated as of that date (the Asset Purchase Agreement), which sets forth the terms and conditions pursuant to which FairMarket will sell substantially all of its technology and business assets to eBay for consideration of \$4.5 million in cash (the Asset Sale). Of this total, \$2.5 million will be paid to FairMarket at closing and \$2 million will be held in escrow for a period of two years following the closing in order to secure FairMarket's indemnification obligations under the Asset Purchase Agreement. In addition to purchasing specified assets, which include all of FairMarket's intellectual property and its rights under most of its customer contracts, eBay will assume certain of FairMarket's obligations under those existing customer contracts assumed by eBay. In connection with the Asset Sale, the parties have also entered into a Transition Services Agreement pursuant to which FairMarket will provide services to eBay after the closing of the Asset Sale to fulfill customer service obligations under the customer contracts assumed by eBay. eBay will pay FairMarket for providing such services, generally based on FairMarket's cost. Subject to earlier termination by eBay, the Transition Services Agreement will expire on December 31, 2003 or a later date at the election of eBay, but in no event later than January 31, 2004. In addition, FairMarket and eBay agreed to terminate, effective upon the closing of the Asset Sale, all existing commercial agreements solely between eBay and FairMarket, except with respect to certain continuing indemnification obligations.

The Asset Sale is subject to approval by FairMarket's stockholders and the satisfaction of other customary closing conditions. FairMarket has set Wednesday, September 3, 2003 as the meeting date for its special meeting of stockholders to approve the Asset Sale. At the special meeting, stockholders will also be asked to consider an amendment to FairMarket's amended and restated certificate of incorporation to change its name to Dynabazaar, Inc., and to elect each of Shikhar Ghosh and Lloyd I. Miller, III as a Class III director to its board of directors. FairMarket set August 4, 2003 as the record date for determining those stockholders eligible to vote at the special meeting. FairMarket expects the Asset Sale to close in September 2003.

In connection with the closing of the Asset Sale, eBay, Inc., the holder of FairMarket's Series B preferred stock, has provided notice to FairMarket that it has elected to receive a liquidation preference equal to approximately \$2 million in the aggregate, or \$2.10 per share, plus all accrued and unpaid dividends with respect to the Series B preferred stock. The liquidation preference on preferred stock has been classified as a current liability on the balance sheet at June 30, 2003. After such liquidation preference is paid, the holders of FairMarket's Series B preferred stock will only be entitled to a cash dividend payable quarterly at the rate of 6.5 % per annum and the right to participate pro rata on an as-converted basis in any dividend paid on FairMarket common stock and in any distribution of the remaining assets of FairMarket, including in the previously announced distribution of approximately \$38 million to FairMarket stockholders shortly following the closing of the asset sale.

On June 20, 2003, FairMarket announced that it plans to make a cash distribution to its stockholders of approximately \$38 million. FairMarket has not set a record or payment date for such distribution, but currently expects the distribution would be paid shortly after the closing of the eBay transaction.

We are currently reviewing alternatives for the use and disposition of our remaining assets following the term of the transition services that we will provide to eBay, which may include pursuing a plan of complete liquidation and dissolution (possibly including the sale of our remaining assets). Alternatively, we may decide to pursue selling our remaining assets outside of a liquidation and dissolution, to make additional distributions of cash to our stockholders, to explore other strategic alternatives such as a business combination with another party, and/or to continue as an independent stand-alone company focusing on business opportunities unrelated to our historical business. At this time, our board of directors has not made any decision to pursue any one of these options.

Sources of Revenue

We derive revenue from: (1) application fees, which consist of implementation and fixed monthly hosting, support and operating fees; (2) transaction fees; and (3) professional services fees, which include fees for the development of business applications, technical customization and integration (including as part of the implementation process), and e-marketing, usability and other consulting services.

We generally charge a one-time set-up fee for the design, development and implementation of a customer's dynamic pricing or points based site or our MarketSelect service. Implementation also frequently entails customization and other professional services, for which we charge a professional service fee. The set-up fee and implementation-related professional services fees vary depending on the nature and the anticipated complexity of the service being implemented. These fees are generally payable upon execution of the contract, recorded as deferred revenue and recognized as revenue, ratably, over the contract period.

Fixed monthly fees are generally charged to customers whose dynamic pricing sites we host and cover hosting services, direct customer support services, end-user customer support services, services for online billing and collection of fees for community sites and other monthly operating services. Fixed monthly fees vary by customer depending on the number of software modules employed, the required level of services and the anticipated level of site activity. These fees are recognized as revenue in the month that the service is provided.

Our Professional Services Group offers our customers a range of business applications, technical customization, integration, e-marketing, usability and other consulting services related to our product offerings for which we may charge either a one-time or a monthly professional services fee, generally based on time and materials used, depending on the nature of the service. These fees are generally recorded as deferred revenue and recognized as revenue, ratably, over the contract period if the service provided is related to an ongoing service relationship, and are recognized as revenue in the period in which the service is provided if unrelated to an ongoing service relationship.

Merchant customers, including MarketSelect customers, pay transaction fees at varying percentages based on the gross proceeds from the sale of their listed products and services, whether sold on their sites, on eBay or on other FairMarket Network sites. For community customers, transaction fees consist of our share of success fees charged to sellers upon a completed sale, listing fees, and enhanced listing fees, which are fees charged for the prominent display of a particular seller or listing (such as under a list of Featured Merchants or Featured Listings). Community customers pay transaction fees calculated in one of two ways. Generally, under contracts entered into before 2000, these fees are calculated based on a percentage of the gross proceeds from the sale of the items that are listed through the community site and sold either on the community site or on other FairMarket Network sites. The fee percentages vary by customer depending on the anticipated level of activity on the customer's site and the level of the fixed monthly fees. These communities receive a percentage of the gross proceeds from the sale of items that are listed directly on other sites in the FairMarket Network and sold through the community site. Contracts entered into starting in early 2000 generally provide for payment by the community customer of transaction fees with respect to the sale of listings that are placed on the community site that are calculated as a percentage of the percentage transaction fee that the community charges to its end-users when the listing sells; similarly, for listings that are listed directly through other sites in the FairMarket Network and sold through the community site, the community site receives a percentage of the percentage transaction

fee that the listing site charges to the listing site's end-user when the listing sells. We record revenue net of amounts shared with our customers, which we recognize as revenue at the end of the listing period.

Beginning in the second half of 2001, we began to experience a shift in the nature of our revenue, from the fixed monthly fees we traditionally charge for hosting and maintaining customers' sites, to transaction-based fees. We believe that this revenue shift is partly a result of recent economic conditions and pricing competition, and partly a result of an increasing portion of our customers using our MarketSelect service (which we launched during the second quarter of 2001), the fees for which are primarily transaction-based. We are uncertain if this shift from monthly fixed revenue to transaction revenue is permanent in nature. Revenue derived from promotions customers is primarily fixed in nature and we expect an increase in revenue derived from promotions customers in the future.

At no point during the sale process do we take possession of either the products being sold or the buyers' payment for the item. Because merchants and individual sellers, rather than FairMarket, sell the items listed, we have no cost of goods sold, procurement, or carrying or shipping costs and no inventory risk related to the items sold.

Critical Accounting Policies

In December 2001, the SEC requested that all registrants discuss their most critical accounting policies in management's discussion and analysis of financial condition and results of operations. The SEC indicated that a critical accounting policy is one which is both important to the portrayal of the company's financial condition and results and requires management's most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. Our significant accounting policies are more fully described in Note 2, Summary of Significant Accounting Policies, to our consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2002. These critical accounting policies relate to revenue recognition, allowance for doubtful accounts, deferred tax assets and unutilized office space. No changes to these critical policies have taken place in during the three and six months ended June 30, 2003.

New Accounting Pronouncements

In July 2002, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 146, Accounting for Costs Associated with Exit or Disposal Activities (SFAS No. 146). The standard requires companies to recognize costs associated with exit or disposal activities when they are incurred rather than at the date of a commitment to an exit or disposal plan. Examples of costs covered by the standard include lease termination costs and certain employee severance costs that are associated with a restructuring, discontinued operation, plant closing or other exit or disposal activity. SFAS No. 146 is to be applied prospectively to exit or disposal activities initiated after December 31, 2002. The Company's adoption of SFAS No. 146, effective January 1, 2003, has had no material impact on the financial statements through June 30, 2003.

In December 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation-Transition and Disclosure (SFAS No. 148) which addresses financial accounting and reporting for the recording of expenses for the fair value of stock options. SFAS No. 148 provides alternative methods of transition for a voluntary change to a fair value based method of accounting for stock-based employee compensation. Additionally, SFAS No. 148 requires more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. The provisions of this statement are effective for fiscal years ending after December 15, 2002. While the Company has not elected to adopt fair value accounting for its stock-based compensation, it has complied with the new disclosure requirements under SFAS

Edgar Filing: FAIRMARKET INC - Form 10-Q

No. 148 and provided interim disclosure on the effects of stock-based compensation in this report.

In January 2003, the FASB issued Interpretation No. 46, Consolidation of Variable Interest Entities, an Interpretation of ARB 51 (FIN 46). The primary objectives of FIN 46 are to provide guidance on the identification of entities for which control is achieved through means other than through voting rights (variable interest entities or VIEs) and how to determine when and which business enterprise should consolidate the VIE. This new model for consolidation applies to an entity for which either: (a) the equity investors (if any) do not have a controlling financial interest; or (b) the equity investment at risk is insufficient to finance that entity s activities without receiving additional

subordinated financial support from other parties. In addition, FIN 46 requires that both the primary beneficiary and all other enterprises with a significant variable interest in a VIE make additional disclosures. The Company is required to apply FIN 46 to all new variable interest entities created or acquired after January 31, 2003. For variable interest entities created or acquired prior to February 1, 2003, the Company is required to apply FIN 46 on July 1, 2003. The adoption of FIN 46 did not have an effect on the Company's financial statements.

Results of Operations for the Three and Six Months Ended June 30, 2003 and 2002

For the three and six months ended June 30, 2003, our net loss was \$1.9 million, or \$(0.07) per share, and \$3.5 million, or \$(0.13) per share, respectively, compared to our net loss of \$7.2 million, or \$(0.25) per share, for the three months ended June 30, 2002 and a net loss of \$19.0 million, or \$(0.65) per share, for the six months ended June 30, 2002. The decrease in net loss for the three months ended June 30, 2003 compared to the same period of last year was due to an increase of revenue of \$170,000 and a decrease in total operating expenses of \$5.3 million partially offset by decrease other income, net, of \$196,000. The decrease in net loss for the six months ended June 30, 2003 compared to the same period of last year is primarily due to a decrease in total operating expenses of \$15.7 million partially offset by decrease in other income, net, of \$386,000 and an increase in revenue of \$216,000.

Revenue

Total revenue was \$1.5 million and \$2.9 million for the three and six months ended June 30, 2003, respectively, an increase of \$170,000, or 12.6%, and \$216,000, or 8.1%, compared to total revenue of \$1.3 million and \$2.7 million for the three and six months ended June 30, 2002, respectively. The increase in revenue for the three months ended June 30, 2003 compared to the same period of last year was due primarily to an increase in application fees received from our promotion contracts for fixed monthly hosting. The increase in revenue for the six months ended June 30, 2003 of \$216,000 was due to an increase in application fees of \$133,000 for fixed monthly hosting and an increase in transaction fees of \$121,000. These increases were offset by a slight decline in professional service fees of \$38,000 when compared to the six months ended June 30, 2002.

International revenue for the three and six months ended June 30, 2003 was \$372,000 and \$754,000, respectively (primarily from customers in the U.K.), representing 24.5% and 26.2% of total revenue for those periods, respectively. International revenue for the three and six months ended June 30, 2002 was \$374,000 and \$736,000, respectively (also primarily from customers in the U.K.), representing 27.8% and 27.7% of total revenue for those periods, respectively. There are risks inherent in doing business internationally, including, among others, fluctuating currency exchange rates, differing legal and regulatory requirements and differing accounting practices. We price, invoice and collect fees for our international services primarily in the local currency. To date, currency fluctuations have not had a material effect on our results of operations and financial condition.

We generally charge a one-time set-up fee for the design, development and implementation of our customers' dynamic pricing sites or our MarketSelect service. Implementation also frequently entails customization and other professional services, for which we charge a professional service fee. The set-up fee and implementation-related professional services fees vary depending on the nature and the anticipated complexity of the service being implemented. These fees are generally payable upon the execution of the contract, recorded as deferred revenue and recognized as revenue, ratably, over the contract period. At June 30, 2003 and 2002, there was \$917,000 and \$579,000, respectively, of deferred revenue primarily relating to set-up and professional service fees.

Edgar Filing: FAIRMARKET INC - Form 10-Q

We ended the second quarter of 2003 with 43 customers, compared to 50 customers at March 31, 2003 and 52 customers at June 30, 2002. For the three months ended June 30, 2003 and 2002, we had two customers that each accounted for more than 10% of total revenue; Sam's West, Inc. accounted for 12.5% and 13.2% and Microsoft Corporation accounted for 11.9% and 13.7%, respectively.

Average revenue per customer increased to \$35,254 for the second quarter of 2003 from \$24,900 for the second quarter of 2002 due primarily to the increase in fixed monthly hosting fees from our promotion contracts. Average revenue per customer for future periods will depend on a number of factors such as our customer mix, the mix of our service offerings, technological changes, our pricing strategies and pricing competition.

Operating Expenses

Cost of revenue consists of costs for direct customer support, end-user customer service, depreciation of network equipment, fees paid to network providers for bandwidth and monthly fees paid to third-party network providers. Cost of revenue was \$566,000 and \$1.3 million for the three and six months ended June 30, 2003, a decrease of \$452,000 and \$700,000 respectively, compared to \$1.0 million and \$2.0 million for the three and six months ended June 30, 2002, respectively. As a percentage of revenue, cost of revenue decreased to 37.3% and 46.1% for the three and six months ended June 30, 2003, respectively, compared to 75.6% and 76.9% for the three and six months ended June 30, 2002, respectively. The decrease of \$452,000 for the quarter ended June 30, 2003 compared to quarter ended June 30, 2002 was due to a reduction in salaries and related expenses of \$245,000 resulting from lower headcount, a decrease of \$62,000 paid to our network provider, and a reduction of \$145,000 due primarily to a decrease in depreciation expense as a result of certain assets being fully depreciated. The decrease of \$717,000 for the six months ended June 30, 2003 compared to the six months ended June 30, 2002 was due to a reduction in salaries and related expenses of \$360,000, a decrease of \$118,000 paid to our network providers, and a reduction of \$239,000 due primarily to a decrease in depreciation, as describe above.

Gross profit increased to 62.7% for the three months ended June 30, 2003 compared to 24.4% for the three months ended June 30, 2002. Gross profit increased to 53.9% for the six months ended June 30, 2003 compared to 23.1% for the six months ended June 30, 2002. The increase in gross profit for the three and six months ended June 30, 2003 as compared to June 30, 2002 was primarily attributable to the decreases in expenses as described above in cost of revenue. The gross profits reported above are not necessarily indicative of gross profits for future periods. Actual gross profits may vary significantly depending on, among other things, customer mix, product mix, price competition, technological changes and extraordinary costs. A significant portion of our cost of revenue components are fixed in nature and will continue to be fixed in the short term, as a result gross profit largely based on revenue results.

Sales and marketing expenses were \$581,000 and \$1.1 million for the three and six months ended June 30, 2003, a decrease of \$93,000, or 13.8%, and \$165,000, or 12.6%, compared to sales and marketing expenses of \$674,000 and \$1.3 million for the three and six months ended June 30, 2002, respectively. These decreases in sales and marketing expenses were due to a reduction in salaries and related expenses of \$129,000 and \$172,000 in the three- and six-month periods ended June 30, 2003, respectively, resulting from lower headcount, offset by increases primarily in contract services of \$36,000 and 7,000, respectively.

Development and engineering expenses were \$298,000 and \$650,000 for the three and six months ended June 30, 2003, respectively, a decrease of \$377,000, or 55.9%, and \$819,000, or 55.8%, compared to development and engineering expenses of \$675,000 and \$1.5 million for the three and six months ended June 30, 2002, respectively. The decrease in each period was primarily due to a reduction in salaries and related expenses resulting from lower headcount.

General and administrative expenses were \$2.1 million and \$3.5 million for the three and six months ended June 30, 2003, respectively, an increase of \$413,000, or 24%, and a decrease of 312,000, or 8.1%, compared to general and administrative expenses of \$1.7 million and \$3.8 million for the three and six months ended June 30, 2002,

respectively. The increase for the three months ended June 30, 2003 compared to the three months ended June 30, 2002, was due primarily to higher legal expenses related to the proposed sale of certain assets of the company to eBay, Inc. The decrease for the six months ended June 30, 2003 compared to the six months ended June 30, 2002 was due to a decrease in depreciation expense as a result of certain assets being fully depreciated offset by an increase in legal expenses, as described above.

Unutilized office space charge. In the first quarter of 2002, we recorded a charge of \$4.5 million for unutilized office space at our Woburn, Massachusetts headquarters. This charge included rent and other related costs for a significant portion of our leased space, which has been vacated for the remaining lease term and the write-down of related leasehold improvements and furniture and fixtures. In the fourth quarter of 2002, we recorded a reversal of \$513,000 related to a sublease of approximately 11,000 square feet of the unutilized office space. During 2002, we paid \$746,000 against this accrual, which represented rent payments related to unutilized office space. In addition, we recorded \$1.2 million for the write-down of leasehold improvements and furniture and fixtures. During the six months ended June 30, 2003 we paid \$498,000 against this accrual for rent payments for unutilized office

space. As of June 30, 2003, \$1.6 million of the total charge remained accrued and unpaid relating to future rent payments related to unutilized office space.

	(in thousands)
Roll forward of activity for unutilized office space	
Initial charge recorded in March 2002	\$ 4,500
Non-cash write-down of leasehold improvements and furniture and fixtures	(1,161)
Cash payments made in 2002	(746)
Reversal of accrual in December 2002	(513)
Unutilized space accrual at December 31, 2002	2,080
Cash payments made during the six months ended June 30, 2003	(498)
Unutilized office space accrual at June 30, 2003	\$ 1,582

Equity-related charges consist of the amortization of (i) deferred stock compensation resulting from the grant of stock options to employees at exercise prices subsequently deemed to be less than the fair value of our common stock on the grant date and (ii) the fair value of warrants issued to certain strategic customers and shares of our Series D convertible preferred stock issued to certain strategic customers at prices below fair value.

At June 30, 2003, on the consolidated balance sheet deferred stock compensation was \$26,000, net of equity-related charges of \$90,000 amortized to the consolidated statement of operations and canceled stock options valued at \$43,000. This \$26,000 is being amortized ratably over the vesting periods of the applicable stock options, typically four years, with 25% vesting on the first anniversary of the grant date and the balance vesting 6.25% quarterly thereafter. For the three and six months ended June 30, 2003 and 2002, related expense recognized was \$38,000 and \$60,000, and \$90,000 and \$236,000, respectively.

Other Income, net

Other income, net, was \$183,000 for the three months ended June 30, 2003, a decrease of \$196,000 compared to other income, net, of \$379,000 for the three months ended June 30, 2002. Other income, net, was \$398,000 for the six months ended June 30, 2003, a decrease of \$386,000 compared to other income, net, of \$784,000 for the six months ended June 30, 2002. The decreases in other income, net for the three and six months ended June 30, 2003 was primarily the result of lower interest income from lower average balances of cash, cash equivalents and investments and lower interest rates compared to the same periods of prior year.

Liquidity and Capital Resources

At June 30, 2003, cash and cash equivalents, marketable securities and restricted cash (related to a lease deposit) totaled \$53.2 million.

Cash used in operating activities was \$2.1 million for the six months ended June 30, 2003 and \$4.0 million for the six months ended June 30, 2002. Net cash flows from operating activities for the six months ended June 30, 2003 reflect a net loss of \$3.5 million combined with a charge for unutilized office space, an increase in prepaid expenses, accrued expenses and other non-current liabilities offset by depreciation expense, amortization of deferred compensation and equity-related charges, accounts payable, accounts receivable, long-term prepaid and deferred revenue. Net cash flows from operating activities for the six months ended June 30, 2002 reflect a net loss of \$19.0 million combined with an increase in prepaid expenses and other current assets, partially offset by depreciation expense, amortization of deferred compensation and equity-related charges, loss on disposal of property and equipment, short- and long-term liabilities related to the unutilized space charge and an increase in accrued expenses.

Net cash used in investing activities was \$5.4 million for the six months ending June 30, 2003 compared with net cash provided by investing activities of \$7.0 million for the six months ended June 30, 2002. For the six months ended June 30, 2003 the net cash used in investing activities was due mainly to the purchase of marketable securities. Net cash provided by investing activities for the six months ended June 30, 2002 was primarily attributable to proceeds from the maturity of marketable securities.

For the six months ended June 30, 2003 net cash provided by financing activities was \$4,000 primarily from the issuance of common stock. Net cash provided by financing activities was \$1.8 million for the six months ended June 30, 2002, resulting primarily from the issuance of 952,380 shares of our Series B preferred stock to eBay in May 2002 as described above. Since May 17, 2003, the holders of the Series B preferred stock have had the right to require the Company to redeem the Series B preferred stock for cash at any time after the earlier of (a) May 17, 2003, and (b) the happening of a material adverse effect on the Company's business, as defined in the Series B preferred stock terms.

We believe, based on our present business plan, that our current cash, cash equivalents and marketable securities and our cash flows from operations will be sufficient to meet our working capital and operating resource expenditure requirements for at least the next twelve months. If the assumptions underlying our business plan regarding future revenue and expenditures change or if unexpected opportunities or needs arise, we may find it necessary to obtain additional equity or debt financing. If additional financing is required, we may not be able to raise it on acceptable terms or at all.

Factors that May Affect Results of Operations and Financial Condition

This Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. You can identify forward-looking statements by the use of the words believe, expect, anticipate, intend, estimate, assume and other similar expressions which predict or indicate future events and trends and which do not relate to historical matters. You should not rely on forward-looking statements, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond our control. Our actual results could differ materially from those set forth in the forward-looking statements.

Some of the factors that might cause these differences include those set forth below. You should carefully review all of these factors, and you should be aware that there may be other factors that could cause these differences. These forward-looking statements were based on information, plans and estimates at the date of this Form 10-Q, and we do not promise to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

Risks Related to Our Business

Our business is difficult to evaluate, our business strategy may not successfully address risks we face and your basis for evaluating us is limited.

We were formed in February 1997 and we began to execute our current business model involving the offering of outsourced, private-label auction solutions in December 1998, which we have since expanded to include additional transaction pricing and points based promotions and distribution capabilities. While a high percentage of our operating expenses have historically been, and are expected to continue to be, fixed in the short term, our operating expenses are largely based on unpredictable revenue trends. Because of our limited operating history, our business strategy may not successfully address all of the risks we face, and you have limited operating and financial data about our business upon which to base an evaluation of our performance.

We face the following risks, expenses and difficulties as a company seeking to develop a new Internet-based service:

Other Income, net

if we fail to attract and retain quality customers we may be unable to generate sufficient revenue to support our business;

if we fail to attract and retain qualified sales, engineering and other personnel we may be unable to maintain and expand our business;

if we fail to maintain and upgrade our service offerings and technology to keep pace with the rapidly growing Internet market we serve we may be unable to compete effectively; and

if we fail to raise additional capital if and when we need it, we may be unable to develop or sustain our business.

We expect to continue to incur substantial operating losses in the near future.

For the three and six months ended June 30, 2003, we incurred a net loss of approximately \$1.9 million and \$3.5 million, which represented approximately 126.5% and 120.8%, respectively, of our revenue for the same periods. As of June 30, 2003, we had an accumulated deficit of approximately \$135.4 million. We have not achieved profitability and we will continue to incur net losses until we can produce sufficient revenues to cover our costs, which may not occur. While it is our goal to achieve profitability, even if we achieve profitability, we may be unable to sustain or increase our profitability in the future because we intend to continue to invest in the further development of our service offerings and technology and in the promotion of our service offerings. Any such investment will depend on the availability of funds.

We expect to continue to have negative operating cash flow in the near future, and we may need to seek additional financing, which could be difficult to obtain.

We expect to continue to experience negative operating cash flows for the foreseeable future because we intend to continue to invest in the further enhancement of our service offerings and technology and in the promotion of our service offerings. We expect that we will fund these expenditures primarily from available cash.

We believe, based on our present business plan, that our current cash, cash equivalents and marketable securities and our cash flows from operations will be sufficient to meet our working capital and operating resource expenditure requirements for both the short-term and long-term. If the assumptions underlying our business plan regarding future revenue and expenditures change or if unexpected opportunities or needs arise, including potential acquisitions using cash, we may find it necessary to obtain additional equity or debt financing. If additional financing is required, we may not be able to raise it on acceptable terms or at all.

We may acquire other businesses or technologies, which could result in dilution to our stockholders, or operational or integration difficulties which could impair our financial performance.

If appropriate opportunities present themselves, we may acquire businesses, technologies, services or products that we believe will be useful in the growth of our business. We do not currently have any commitments or agreements with respect to any acquisition. We may not be able to identify, negotiate or finance any future acquisition successfully. Even if we do succeed in acquiring a business, technology, service or product, the process of integration may produce unforeseen operating difficulties and expenditures and may require significant attention from our management that would otherwise be available for the ongoing development of our business. Moreover, we have not made any acquisitions, have no experience in integrating an acquisition into our business and may never achieve any of the benefits that we might anticipate from a

future acquisition. If we make future acquisitions, we may issue shares of stock that dilute other stockholders, incur debt or assume contingent liabilities, any of which might harm our financial results and cause our stock price to decline. Any financing that we might need for future acquisitions may only be available to us on terms that restrict our business or that impose on us costs that reduce our revenue.

We may not be able to continue to attract new customers or retain existing customers.

The success of our business model depends in large part on our ability to increase our number of customers and to retain existing customers. The market for our services may grow more slowly than anticipated or become saturated with competitors, many of which may offer lower prices or broader distribution. In addition, the sales cycle for larger brand companies, retailers and manufacturers, where we currently focus our sales efforts, is generally longer than for the smaller companies and e-commerce companies that made up a larger part of our customer base in prior years. We also

believe that uncertain economic conditions during 2001 and 2002, and which have continued in 2003, have resulted in a longer decision-making and implementation process with customers and during 2001 and 2002 led in many cases to customer contract terminations as a result of the customer ceasing operations or focusing on other areas of their business. If we cannot continue to attract new customers on a timely basis or at all, or if we cannot maintain our existing customer base, our business and revenues would be adversely affected.

A loss of any client that accounts for a large portion of our revenues could cause our revenues to decline.

For the three months ended June 30, 2003, two of our customers accounted for approximately 24.4% of total revenue. If either of these contracts is not renewed or otherwise terminates, and if we are unable to replace it with other client agreements, our revenues would decline and our losses would likely increase.

Because our industry is highly competitive and has low barriers to entry, we may not be able to effectively compete.

The U.S. market for e-commerce services is extremely competitive. We expect competition to intensify as current competitors expand their product offerings and new competitors enter the market. In the surplus online auction market, in addition to competition from internally-developed solutions by individual organizations, we face competition for customers from third party online auction enablers, such as ChannelAdvisor and Auctionworks, that facilitate the distribution of listings to third party auction sites such as eBay and Yahoo! Auctions.

In the online loyalty program market, in addition to competition from internally-developed solutions by individual organizations, we face competition from third party providers in the following areas:

destination sites with loyalty auction programs, such as Yahoo! Auctions; and

third party loyalty program enablers such as SoftCoin, eDeals and Rocketcash who may extend their offerings to incorporate capabilities similar to those offered by our loyalty program service.

The principal competitive factors include price, quality and breadth of services provided and potential for successful transaction activity. E-commerce and marketing technology markets are characterized by rapidly changing technologies, changing requirements of customers and frequent new product and service introductions. We may fail to introduce new online pricing formats and features on a timely basis or at all. If we fail to introduce new service offerings or to improve our existing service offerings in response to industry developments, or if our prices are not competitive, we could lose customers, which could lead to a loss of revenues.

Because there are relatively low barriers to entry in the e-commerce market, competition from other established and emerging companies may develop in the future. Many of our competitors may also have well-established relationships with our existing and prospective customers. Increased competition is likely to result, and in some cases has resulted, in fee reductions, reduced margins, longer sales cycles for our services

and a decrease or loss of our market share, any of which could harm our business, operating results or financial condition.

Many of our competitors have, and new potential competitors may have, more experience developing Internet-based software applications and integrated purchasing solutions, larger technical staffs, larger customer bases, more and longer-standing distribution channels, greater brand recognition and greater financial, marketing and other resources than we have. In addition, competitors may be able to develop products and services that are superior to ours or that achieve greater customer acceptance. We cannot assure you that the e-commerce solutions offered by our competitors now or in the future will not be perceived as superior to ours by either businesses or consumers.

Our customers may not successfully increase transactions on their dynamic pricing sites.

Beginning in the second half of 2001, we began to experience a shift in the nature of our revenue, from the fixed monthly fees we traditionally charge for hosting and maintaining customers' sites, to transaction-based fees. We

believe that this revenue shift is partly a result of recent economic conditions and pricing competition, and partly a result of an increasing portion of our customers using our MarketSelect service (which we launched during the second quarter of 2001), the fees for which are primarily transaction-based. To the extent this revenue shift continues, our success will increasingly depend on increases in the amount of user traffic and the number of transactions on our customers' FairMarket-hosted sites or on eBay through our MarketSelect service. For this to occur, our existing customers must drive sufficient numbers of users to their FairMarket-hosted sites, they must devote sufficient resources to making their sites attractive to buyers and sellers and there must be demand for the products being offered on those sites and on eBay through our MarketSelect service. We cannot assure you that our customers will be successful in accomplishing any of these objectives and their failure to do so could impede our growth and adversely affect our business and revenues.

We may not be successful in attracting or retaining key personnel.

We cannot assure you that we will be successful in hiring or retaining qualified personnel. Our inability to attract and retain qualified personnel on a timely basis, or the departure of key employees, could harm our existing business and ability to expand or maintain our operations.

We may not be successful in international markets.

A component of our strategy has been to attract customers outside the U.S. For the three months ended June 30, 2003 and 2002, revenue under contracts with customers outside the U.S. (primarily in the United Kingdom) represented approximately 24.5% and 27.8% and of our total revenue, respectively. During 2000, we opened offices in England, Australia and Germany. We completed the closing of our office in Germany during the third quarter of 2001 and the closing of our office in Australia during the first quarter of 2002. We continue to service our Australian customers out of our U.S. operations. We believe that significant opportunities exist in international markets, and we continue to evaluate our international strategy. Doing business in international markets requires significant management, financial, development, sales, marketing and other resources. We have limited experience in localizing our services, and some of our competitors have expanded or are undertaking expansion into foreign markets. We cannot assure you that we will expand into new, or continue our existing operations in, international markets or that we will be successful in international markets.

In addition to the uncertainty regarding our ability to generate revenues from foreign operations and expand or maintain our international presence, there are risks inherent in doing business internationally, including, among others:

different legal and regulatory requirements;

difficulties in staffing and managing foreign operations;

longer payment cycles;

different accounting practices;

fluctuating currency exchange rates;

problems in collecting accounts receivable;

legal uncertainty regarding liability, ownership and protection of intellectual property;

tariffs and other trade barriers;

seasonal reductions in business activity;

potentially adverse tax consequences; and

political instability.

Any of the above factors could adversely affect the success of our international operations. To the extent we expand our international operations; we will become more exposed to the above risks. To the extent we have increasing portions of our revenues denominated in foreign currencies, we will become subject to increased risks relating to foreign currency exchange rate fluctuations. We cannot assure you that one or more of the factors discussed above will not have a material adverse effect on our international operations and, consequently, on our results of operations and financial condition.

Buyers and sellers might not adopt online auction or other dynamic pricing solutions as a means for buying and selling goods and services.

Online auction and other dynamic pricing solutions are relatively new methods of buying and selling that market participants may not adopt at levels sufficient to sustain our business. Traditional purchasing is often based on long-standing relationships or familiarity with sellers. For online dynamic pricing solutions to succeed, buyers and sellers must adopt new purchasing practices. Buyers must be willing to rely less upon traditional relationships in making purchasing decisions, and businesses must be willing to offer products for sale through online dynamic pricing solutions. We cannot assure you that online dynamic pricing solutions will be adopted at levels sufficient to sustain our business.

We may need to enter into strategic alliances or license technologies to expand our business or service offerings but may not be successful in doing so.

In addition to internal development of new technologies, our future success may depend to a certain degree on our ability to enter into and implement strategic alliances to expand our product and service offerings and our distribution channels and/or to jointly market or gain market awareness for our service offerings. For example, during the second quarter of 2001 we expanded our auction service in the U.S. to provide customers with the opportunity to list, manage and transact sales through eBay. In the second quarter of 2002, we entered into an exclusive 18-month agreement with eBay to provide our loyalty marketing program technology platform to third parties. We may also expand our service offerings by licensing or purchasing complementary technologies from third parties. For example, during the first quarter of 2001 we announced that we licensed certain real-time e-business infrastructure software from TIBCO Software, Inc. to enable us to provide real-time messaging infrastructure. We cannot assure you that we will be successful in identifying, developing or maintaining such alliances and relationships or that such alliances and relationships will achieve their intended purposes.

Others may assert that our technology infringes their intellectual property rights.

The e-commerce industry is characterized by the existence of a large number of patents and frequent claims and litigation based on allegations of patent infringement and violation of other intellectual property rights. As the e-commerce market and the functionality of products in the industry continue to grow and overlap, we believe that the possibility of intellectual property claims against us will increase. For example, we may inadvertently infringe a patent of which we are unaware, or there may be patent applications now pending of which we are unaware which we may be infringing when they are issued in the future, or our service or systems may incorporate third party technologies that infringe the intellectual property rights of others. We have been and expect to continue to be subject to alleged infringement claims. The defense of any claims of infringement made against us by third parties, whether or not meritorious, could involve significant legal costs and require our management to divert time from our business operations. Either of these consequences of an infringement claim could have a material adverse

Edgar Filing: FAIRMARKET INC - Form 10-Q

effect on our operating results. If we are unsuccessful in defending any claims of infringement, we may be forced to obtain licenses or to pay royalties to continue to use our technology. We may not be able to obtain any necessary licenses on commercially reasonable terms or at all. If we fail to obtain necessary licenses or other rights, or if these licenses are costly, our operating results may suffer either from reductions in revenues through our inability to serve customers or from increases in costs to license third-party technologies.

Our business may suffer if we are not able to protect important intellectual property.

Our ability to compete effectively against other companies in our industry will depend, in part, on our ability to protect our proprietary technology and systems designs. While we have attempted to safeguard and maintain our proprietary rights, we cannot assure you that we have been or will be completely successful in doing so. Further, our competitors may independently develop or patent technologies that are substantially equivalent or superior to ours.

We have applied for patents on aspects of our technology and processes and those applications are pending with the U.S. Patent and Trademark Office. We cannot assure you that any patents will be issued. Even if some or all of these patents are issued, we cannot assure you that they will not be successfully challenged by others or invalidated, that they will adequately protect our technology and processes or that they will result in commercial advantages for us. FairMarket is a registered service mark in the U.S. We have applied for trademark registrations for some of our other brand names, and our marketing materials are copyrighted, but these protections may not be adequate. Effective patent, trademark, service mark, copyright and trade secret protection may not be available in every country where we provide services. We may, at times, have to incur significant legal costs and spend time defending our copyrights and, if issued, our service marks and patents. Any defense efforts, whether successful or not, would divert both time and resources from the operation and growth of our business.

We may not be able to maintain the confidentiality of our proprietary knowledge.

We rely, in part, on contractual provisions to protect our trade secrets and proprietary knowledge. These agreements may be breached, and we may not have adequate remedies for any breach. Our trade secrets may also be known without breach of such agreements or may be independently developed by competitors. Our inability to maintain the proprietary nature of our technology could harm our business, results of operations and financial condition by adversely affecting our ability to compete.

Our business may be adversely affected if we are unable to continue to license software that is necessary for our service offering.

Through distributors, we license a variety of commercially-available Microsoft technologies, including our database software and Internet server software, which is used in our services and systems to perform key functions. We also license other third party technology to perform certain functions of our service, such as our search functionality, which utilizes technology from Verity, Inc., and technology that we license from TIBCO Software, Inc., which we use in certain of our integration solutions. As a result, we are to a certain extent dependent upon those third parties continuing to maintain their technologies. We cannot assure you that we would be able to replace the functionality provided by these third party technologies on commercially reasonable terms or at all. The absence of or any significant delay in the replacement of certain functionalities could have a material adverse effect on our business, financial condition and results of operations.

Our systems infrastructure may not keep pace with the demands of our customers.

Interruptions of service as a result of a high volume of traffic and/or transactions could diminish the attractiveness of our services and our ability to attract and retain customers. We cannot assure you that we will be able to accurately project the rate or timing of increases, if any, in the use of our service, or that we will be able to expand and upgrade our systems and infrastructure to accommodate such increases in a timely manner.

Edgar Filing: FAIRMARKET INC - Form 10-Q

We currently maintain separate systems in the U.S. for our U.S., U.K. and Australia services. Any failure to expand or upgrade our systems could have a material adverse effect on our results of operations and financial condition by reducing or interrupting revenue flow and by limiting our ability to attract new customers. Any such failure could also have a material adverse effect on the business of our customers, which could damage our reputation and expose us to a risk of loss or litigation and potential liability. The majority of the server capacity of our systems for each of the countries named above is currently not utilized.

A system failure could cause delays or interruptions of service to our customers.

Service offerings involving complex technology often contain errors or performance problems. Many serious defects are frequently found during the period immediately following introduction and initial implementation of new services or enhancements to existing services. Although we attempt to resolve all errors that we believe would be considered serious by our customers before implementation, our systems are not error-free. Errors or performance problems could result in lost revenues or cancellation of customer agreements and may expose us to litigation and potential liability. We have from time to time discovered errors in our software or software of others used in our operating systems after its incorporation into our systems. We cannot assure you that undetected errors or performance problems in our existing or future services will not be discovered or that known errors considered minor by us will not be considered serious by our customers. We have experienced periodic minor system interruptions, which may continue to occur from time to time. Most of our contracts provide for the payment or credit to the customer of specified money damages (based on the monthly service fee paid by the customer) if we are unable to maintain specified levels of service based on downtime of either their FairMarket-hosted sites or our centralized service over a specified period, typically one month. The total dollar amount of our potential payment or credit obligations under these provisions if the service levels specified in all of those agreements were not met over the typical one month measurement period could be material. In addition, certain of our contracts also provide the customer with the right to terminate the contract if we are unable to maintain a minimum specified level of service. Performance problems in our technology could also damage our reputation, which could reduce market acceptance of our services and lead to a loss of revenues.

The functioning of our systems or the hosting facilities of third parties on which we rely could be disrupted by factors outside our control.

Our success depends on the efficient and uninterrupted operation of our computer and communications hardware systems. Substantially all of our computer hardware for operating our U.S., U.K. and Australia services is currently located at the facilities of NaviSite, Inc. in Andover, Massachusetts. The computer hardware for our end-user customer service system is also hosted by a third party. These systems are vulnerable to damage or interruption from natural disasters, fires, power loss, telecommunication failures, break-ins, sabotage, computer viruses, intentional acts of vandalism, acts of terrorism and similar events. All of our systems are located in the same facility and we do not currently have a backup system in place for any of these systems. Despite any precautions we take or plan to take, the occurrence of a natural disaster or other unanticipated problems at any third party hosting facility could result in interruptions in our services. In addition, if any third party hosting service fails to provide the data communications capacity we require, as a result of human error, natural disaster or other operational disruption, interruptions in our service could result. Any damage to or failure of our systems could result in reductions in, or terminations of, our service, which could have a material adverse effect on our business, results of operations and financial condition.

Our business may suffer if buyers and sellers do not make payments or deliver goods.

Our success may depend to some extent upon sellers on customer sites reliably delivering and accurately representing their listed goods and buyers paying the agreed purchase price. Our customers have received in the past, and we anticipate that they will receive in the future, communications from sellers and buyers who did not receive the purchase price or the goods that were to have been exchanged. Neither we nor our customers have the ability to require end-users to make payments or deliver goods or otherwise make end-users whole. Our customers also periodically receive complaints from buyers as to the quality of the goods purchased. We are unaware of any complaints that have materially impacted our customers' businesses in a detrimental manner. Neither we nor our customers have the ability to determine the level of such complaints that are made directly between buyers and sellers. We expect that both we and our customers will continue to receive requests from end-users requesting reimbursement or threatening legal action against either our customers or us if no reimbursement is made.

We may have to monitor or control activities on customer sites.

The law relating to the liability of providers of online services for the activities of users of their services is currently unsettled in the U.S. and in other countries. Our service automatically screens by key word all listings submitted by end-users for pornographic material. We also have notice and take-down procedures related to infringing and illegal goods. These procedures are not foolproof and goods that may be subject to regulation by U.S. local, state or federal authorities or local foreign authorities could be sold through our service. These goods include, for example,

firearms, alcohol and tobacco. We cannot assure you that we will be able to prevent the unlawful exchange of goods on our service or that we will successfully avoid civil or criminal liability for unlawful activities carried out by users through our service. The potential imposition of liability for unlawful activities of end-users of our customers could require us to implement measures to reduce our exposure to such liability, which may require us, among other things, to spend substantial resources and/or to discontinue one or more of our service offerings. Any costs incurred as a result of such liability or asserted liability would harm our results of operations.

Future government regulation of auctions and auctioneers may add to our operating costs.

Numerous U.S. jurisdictions have laws and regulations regarding the conduct of auctions and the liability of auctioneers, which were enacted for consumer protection many years ago. We believe that the U.S. laws and regulations do not apply to our online auction services. However, little precedent exists in this area, and one or more jurisdictions in the U.S. or in other countries in which we do business are attempting or may attempt to impose these laws and regulations on online auction providers and may attempt to impose these laws and regulations on our operations or the operations of our customers in the future. Certain states are currently considering whether to apply their auctioneer regulations to online auctions and at least one state has passed legislation that applies to the conduct of all auctions, including auctions conducted over the Internet. If any such statute or regulation is interpreted to apply to us or to our customers, we and/or those of our customers to whom the statute applies could be required to obtain a license. This could adversely affect our ability to attract and retain customers, could adversely affect our results of operations by decreasing activity on our customers' auction sites and could subject us or our customers to fines if we or our customers are unable to obtain the required licenses. In addition, as the nature of the products listed by our customers or their end-users changes, we may become subject to new regulatory restrictions. If we do become subject to these laws and regulations in the future, it could adversely affect our ability to attract and retain customers and could adversely affect our results of operations by decreasing activity on our customers' FairMarket-hosted sites.

Future sales of our common stock could adversely affect our stock price.

A substantial portion of our common stock is held by a small number of investors and can be resold or is subject to registration rights. Sales of substantial amounts of our common stock in the public market, or the perception that a large number of shares are available for sale, could cause the market price of our common stock to decline. In addition to the adverse effect a price decline could have on holders of our common stock, such a decline would likely impede our ability to raise capital through the issuance of additional shares of our common stock or other equity securities. Such a decline could also cause our common stock to trade at a per share price of less than \$1.00 which could lead to a de-listing of our common stock from Nasdaq.

The holders of approximately 9,757,029 shares of our common stock (including at least 952,380 shares of common stock issuable upon conversion of shares of Series B Preferred Stock), have rights, subject to some conditions, to require us to file registration statements covering their shares, or to include their shares in registration statements that we may file for FairMarket or other stockholders. Pursuant to the exercise of these rights, we have registered the resale of 9,757,029 shares of our common stock on a Form S-3 registration statement. By selling a large number of shares, these holders could cause the price of our common stock to decline. Furthermore, if we were to include in a FairMarket-initiated registration statement shares held by those holders pursuant to the exercise of their registration rights, those sales could impair our ability to raise needed capital by depressing the price at which we could sell our common stock.

Risks Related to Our Industry

Our success depends on the continued growth of the Internet and online commerce.

Other Income, net

Our future revenues and profits depend upon the widespread acceptance and use of the Internet and other online services as a medium for commerce by businesses and consumers. The use of the Internet and e-commerce may not continue to develop at past rates and a sufficiently broad base of business and individual customers may not adopt or continue to use the Internet as a medium of commerce. The market for the sale of goods and services over the Internet is an emerging market. Demand and market acceptance for online services and for the sale of goods and services over the

Internet are subject to a high level of uncertainty. Growth in our customer base depends on obtaining businesses and consumers who have historically used traditional means of commerce to purchase goods and services. For us to be successful, these market participants must accept and use novel ways of conducting business and exchanging information.

E-commerce may not prove to be a viable medium for purchasing for the following reasons, any of which could seriously harm our business:

the necessary infrastructure for Internet communications may not develop adequately;

our potential customers, buyers and suppliers may have security and confidentiality/privacy concerns;

complementary products, such as high-speed modems and high-speed communication lines, may not be developed;

alternative purchasing solutions may be implemented;

buyers may dislike the reduction in the human contact inherent in traditional purchasing methods;

use of the Internet and other online services may not continue to increase or may increase more slowly than expected;

the development or adoption of new technology standards and protocols may be delayed or may not occur;
and

new and burdensome governmental regulations may be imposed.

Our success depends on the continued reliability of the Internet.

Edgar Filing: FAIRMARKET INC - Form 10-Q

The Internet continues to experience significant growth in the number of users, frequency of use and bandwidth requirements. We cannot assure you that the infrastructure of the Internet and other online services will be able to support the demands placed upon them. Furthermore, the Internet has experienced a variety of outages and other delays as a result of damage to portions of its infrastructure, and could face such outages and delays in the future. These outages and delays could adversely affect the level of Internet usage and also the level of traffic and the processing of transactions. In addition, the Internet or other online services could lose their viability due to delays in the development or adoption of new standards and protocols required to handle increased levels of Internet or other online service activity, or due to increased governmental regulation. Changes in or insufficient availability of telecommunications services or other Internet service providers to support the Internet or other online services also could result in slower response times and adversely affect usage of the Internet and other online services generally and our service in particular. If use of the Internet and other online services does not continue to grow or grows more slowly than expected, if the infrastructure of the Internet and other online services does not effectively support growth that may occur, or if the Internet and other online services do not become a viable commercial marketplace, we will have to adapt our business model to the new environment, which would materially adversely affect our results of operations and financial condition.

Government regulation of the Internet may impede our growth or add to our operating costs.

Like many Internet-based businesses, we operate in an environment of tremendous uncertainty as to potential government regulation. The Internet has rapidly emerged as a commerce medium, and governmental agencies have not yet been able to adapt all existing regulations to the Internet environment. Laws and regulations have been introduced or are under consideration and court decisions have been or may be reached in the U.S. and other countries in which we do business that affect the Internet or other online services, covering issues such as pricing, user privacy, freedom of expression, access charges, content and quality of products and services, advertising, intellectual property rights and information security. In addition, it is uncertain how existing laws governing issues such as taxation, property ownership, copyrights and other intellectual property issues, libel, obscenity and personal privacy will be applied to the Internet.

The majority of these laws were adopted prior to the introduction of the Internet and, as a result, do not address the unique issues of the Internet. Recent laws that contemplate the Internet, such as the Digital Millennium Copyright Act in the U.S., the European Union Electronic Commerce Directive (the Electronic Commerce Directive) and the European Union Directive on Copyright in the Information Society (Copyright Directive), have not yet been fully interpreted by the courts and their applicability is therefore uncertain. The Digital Millennium Copyright Act provides certain safe harbors that limit the risk of copyright infringement liability for service providers such as FairMarket with respect to infringing activities engaged in by users of the service, such as end-users of our customers dynamic pricing sites. We have adopted policies and practices to qualify for one or more of these safe harbors, but we cannot assure you that our efforts will be successful since the Digital Millennium Copyright Act has not been fully interpreted by the courts and its interpretation is therefore uncertain. The European Union Electronic Commerce Directive has already been implemented in the United Kingdom, Spain and Germany. Other Member States should also be implementing this Directive in due course. The UK Electronic Commerce (EC Directive) Regulations contain informational requirements for online sellers, requirements for electronic communications and concluding contracts online and provisions limiting the liability of service providers for unlawful content in certain instances. These regulations may affect our operations in the U.K. if our customers or we, as applicable, do not adequately update our respective practices to comply with the new U.K. regulations implementing this EC Directive. Legislation implementing the Electronic Commerce Directive in other Member States may similarly affect us or our customers. In Australia, recent amendments have been made to the Copyright Act 1968 to regulate copyright issues arising in the context of the Internet. In addition, the Broadcasting Services Act 1992 has been recently amended to establish a notice and take-down procedure with respect to offensive or obscene content. These amendments provide specific immunities and/or defenses for Internet service providers. However, the full application of these immunities and defenses has not yet been tested. The Copyright Directive attempts to harmonize copyright in areas of digital transmission but has yet to be implemented in the Member States across Europe (including the U.K.). Although Member States should have implemented the Copyright Directive by December 22, 2002, this has not yet taken place. However implementation by Member States is expected to occur in the near future and this may impact on our and our customer s business.

In the area of user privacy, several states have proposed legislation that would limit the uses of personal user information gathered online or require online services to establish privacy policies. The Federal Trade Commission also has become increasingly involved in this area, and recently settled an action with one online service regarding the manner in which personal information is collected from users and provided to third parties. The European Union Directive on the Protection of Personal Data, as implemented in the relevant member states, may affect our operations in the U.K. if we or our customers do not afford adequate privacy to end-users of our customers sites. Additionally, the recently adopted European Union Directive on Protection of Privacy in the Electronic Communications sector, when implemented in the relevant Member States, may also affect our operations in the UK if we, or our customers, do not update our policies and practices accordingly. This Directive contains a number of provisions regulating unsolicited communications, including email. Member States have until October 31, 2003 to implement this Directive. The Australian Privacy Amendment (Privacy Sector) Act of 2000, which has an exemption for certain types of small businesses, became effective in December 2001 and may have a similar effect. We do not sell personal user information from our customers sites. Generally, as between FairMarket and our customers, the personal user information belongs to the customer, not FairMarket, and each site is governed by the respective customer s own privacy policy. We do use aggregated data for analyses regarding our services, and do use personal user information in the performance of our services for our customers. Since we do not control what our customers do with the personal user information they collect, we cannot assure you that our customers sites will be considered compliant.

As online commerce evolves, we expect that federal, state or foreign agencies will adopt regulations covering issues such as pricing, content, user privacy, hosting liability and quality of products and services. Any future regulation may have a negative impact on our business by restricting our methods of operation or imposing additional costs. Although many of these regulations may not apply to our business directly, we anticipate that laws regulating the solicitation, collection or processing of personal information could indirectly affect our business.

Title V of the Telecommunications Act of 1996, known as the Communications Decency Act of 1996, prohibited the knowing transmission of any comment, request, suggestion, proposal, image or other communication that is obscene or pornographic to any recipient under the age of 18. Substantial portions of the Communications Decency Act of 1996 regarding such communications have been held to be unconstitutional. Subsequent similar legislation, know

as the Child Online Protection Act, designed to comport with the constitutional concerns articulated by the Supreme Court, has been enacted; however, the constitutionality of that legislation is currently being litigated as well. As such, the prohibition's scope and the liability associated with a violation are currently unsettled. In addition, we cannot be certain that similar legislation will not be enacted and upheld in the future. It is possible that such legislation could expose companies involved in online commerce to liability, which could limit the growth of online commerce generally. Legislation like the Communications Decency Act could reduce the growth in Internet usage and decrease its acceptance as a communications and commerce medium.

The worldwide availability of Internet web sites often results in sales of goods to buyers outside the jurisdiction in which we or our customers are located, and foreign jurisdictions may claim that we or our customers are required to comply with their laws. As an Internet company, it is unclear which jurisdictions may find that we are conducting business therein. Our failure to qualify to do business in a jurisdiction that requires us to do so could subject us to fines or penalties and could result in our inability to enforce contracts in that jurisdiction.

Regulation of promotional programs and email marketing may restrict our operations or increase our operating costs.

We offer to our customers a variety of promotional and incentive programs including coupon and rebate programs as well as sweepstakes, contests and other games. These types of programs are subject to a variety of federal, state and local laws and regulations. Some of these states, including New York, Florida, Rhode Island and Arizona, require that sponsors of certain types of sweepstakes and contests register with the state and provide a bond to secure the prizes. In addition, a number of states have special disclosure and registration requirements for promotions offered in connection with certain industries, such as alcohol, gasoline, and milk or offered in conjunction with a charitable organization.

In addition, marketing via email continues to be an area of focus for both federal and state legislatures, and regulators. Presently, more than half the states have statutes regulating the sending of emails. Many of these states provide exemptions if the email is being sent to existing customers or to people who have consented to receive the emails. More states have legislation pending, some of which propose the establishment of an email do-not-solicit program, similar to the various state do-not-call programs established for solicitations via telemarketing.

These and the other applicable laws and regulations are very detailed and require extensive disclosures to consumers. However, some of the laws are conflicting or out of date. In addition, the applicable laws, cases and interpretations are often vague, inconsistent or incomplete and are subject to continual reinterpretation by attorneys general and other regulators. Furthermore, at almost all times there are relevant administrative rules or legislation pending which may become effective after a promotion commences making timely compliance extremely difficult. These laws and regulations could have a material impact on our business by restricting our method of operations or imposing additional compliance costs.

New taxes may be imposed on Internet commerce.

In the U.S., we do not collect sales or other similar taxes on goods sold by customers and users through customers' FairMarket-powered sites or service taxes on fees paid by end-users of those sites. The Internet Tax Freedom Act of 1998, which was extended through November 28, 2003 by the Internet Tax Non-Discrimination Act, prohibits the imposition of taxes on Internet access services and new taxes on electronic commerce by U.S. federal and state taxing authorities. If the moratorium is not extended past the November 28, 2003 deadline, states may seek to impose sales tax collection obligations on out-of-state companies which engage in or facilitate online commerce, and a number of proposals previously have been made at the state and local level that would impose additional taxes on the sale of goods and services through the Internet. Such proposals, if adopted, could substantially impair the growth of electronic commerce, and could adversely affect our opportunity to derive

Edgar Filing: FAIRMARKET INC - Form 10-Q

financial benefit from such activities. Many non-U.S. countries impose service tax (such as value-added tax) collection obligations on companies that engage in or facilitate Internet commerce. We do not collect sales or other similar taxes on goods sold by customers and/or users of our customers' sites in Australia or the U.K., it being the responsibility of our customers to do so if required. Our systems in each of those countries do enable value-added or goods and services taxes to be charged and collected with respect to

site usage fees, the determination of which is also the responsibility of our customers. A successful assertion by one or more states or any foreign country that we (rather than our customers) should collect sales or other taxes on the exchange of merchandise or site usage fees or other Internet-based taxes (or any failure of our customers to collect any such taxes if required to do so) could impair our revenue and our ability to acquire and retain customers.

There may be significant security risks and privacy concerns relating to online commerce.

A significant barrier to online commerce and communications is the secure transmission of confidential information over public networks. A compromise or breach of the technology used to protect our customers' and their end-users' transaction data could result from, among other things, advances in computer capabilities, new discoveries in the field of cryptography, or other events or developments. Any such compromise could have a material adverse effect on our reputation and, therefore, on our business, results of operations and financial condition. Furthermore, a party who is able to circumvent our security measures could misappropriate proprietary information or cause interruptions in our operations. We may be required to expend significant capital and other resources to protect against such security breaches or to alleviate problems caused by such breaches. Concerns over the security of transactions conducted on the Internet and other online services and the privacy of users may also inhibit the growth of the Internet and other online services generally, especially as a means of conducting commercial transactions. We currently have practices and procedures in place to protect the confidentiality of our customers' and their end-users' information. However, our security procedures to protect against the risk of inadvertent disclosure or intentional breaches of security might fail to adequately protect information that we are obligated to keep confidential. We may not be successful in adopting more effective systems for maintaining confidential information, and our exposure to the risk of disclosure of the confidential information of others may grow with increases in the amount of information we possess. To the extent that our activities involve the storage and transmission of proprietary information, such as credit card numbers, security breaches could damage our reputation and expose us to a risk of loss or litigation and possible liability. Our insurance policies may not be adequate to reimburse us for losses caused by security breaches.

We could be subject to potential product liability claims and third party liability claims related to products and services purchased through our customers' sites.

Any errors, defects or other performance problems in our services and systems could result in financial or other damages to our customers. Although our agreements with our customers typically contain provisions designed to limit our exposure to claims, existing or future laws or unfavorable judicial decisions could negate these limitation of liability provisions.

In addition, we may not be able to successfully avoid civil or criminal liability for problems related to the products and services sold on customer sites. Even if we are successful, any such claims or litigation could still require expenditure of management time and other resources to defend ourselves. Liability of this sort could require us to implement measures to reduce our exposure to this liability, which may require us, among other things, to expend substantial resources or to discontinue service offerings or to take precautions to ensure that certain products and services are not available on customer sites.

Moreover, deliveries of products purchased on customer sites that are nonconforming, late or are not accompanied by information required by applicable law or regulations, could expose us to liability or result in decreased adoption and use of those sites and therefore our services, which would lead to decreased revenue.

Our stock price is likely to be highly volatile.

Other Income, net

The stock market, and in particular the market for Internet-related stocks, has, from time to time, experienced extreme price and volume fluctuations. Many factors may cause the market price for our common stock to decline, perhaps substantially, including:

failure to meet our development plans;

the demand for our common stock;

changes in general market conditions;

technological innovations by competitors or in competing technologies; and

investor perception of our industry or our prospects.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Investment Portfolio

We do not use derivative financial instruments for investment purposes and only invest in financial instruments that meet high credit quality standards, as specified in our investment policy guidelines. This policy also limits the amount of credit exposure of any one issue, issuer, and type of investment. Due to the conservative nature of our investments, we do not believe that we have a material exposure to interest rate risk.

Foreign Currency Risk

International sales are made mostly from our foreign sales subsidiaries in the respective countries and are denominated in the local currency of each country. These subsidiaries also incur most of their expenses in the local currency. Accordingly, all foreign subsidiaries use the local currency as their functional currency. Our international business is subject to risks typical of an international business, including, but not limited to differing economic conditions, changes in political climate, differing tax structures, other regulations and restrictions, and foreign exchange rate volatility. Accordingly, our future results could be materially adversely impacted by changes in these or other factors. Our intercompany accounts are typically denominated in the functional currency of the foreign subsidiary in order to centralize foreign exchange risk with the parent company in the United States. We are also exposed to foreign exchange rate fluctuations as the financial results of foreign subsidiaries are translated into U.S. dollars in consolidation. As exchange rates vary, these results, when translated, may vary from expectations and adversely impact overall financial results. The effect of foreign exchange rate fluctuations on FairMarket for the three and six months ended June 30, 2003 and 2002 were not significant.

ITEM 4. CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including the our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the our disclosure controls and procedures. In designing and evaluating our disclosure controls and procedures, we recognize that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management necessarily was required to apply its judgment in evaluating and implementing possible controls and procedures. The effectiveness of our disclosure controls and procedures is necessarily limited by the staff and other resources available to us and, although we have designed our disclosure controls and procedures to address the geographic diversity of our operations, this diversity inherently may limit the effectiveness of those controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the Securities and Exchange Commission's rules and forms. In connection with the new rules, we will continue to review and document our disclosure controls and procedures, including our internal controls and procedures for financial reporting, and may from time to time make changes aimed at enhancing their effectiveness and to ensure that our systems evolve with our business.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

FairMarket has been named as a defendant in certain purported class action lawsuits filed by individual shareholders in the U.S. District Court for the Southern District of New York against FairMarket, Scott Randall (former President, Chief Executive Officer and Chairman of the Board of FairMarket), John Belchers (former Chief Financial Officer of FairMarket), U.S. Bancorp Piper Jaffray Inc., Deutsche Bank Securities Inc. and FleetBoston Robertson Stephens, Inc. The lawsuits have been filed by individual shareholders who purport to seek class action status on behalf of all other similarly situated persons who purchased the common stock of FairMarket between March 14, 2000 and December 6, 2000. The lawsuits allege that certain underwriters of FairMarket's initial public offering solicited and received excessive and undisclosed fees and commissions in connection with that offering. The lawsuits further allege that the defendants violated the federal securities laws by issuing a registration statement and prospectus in connection with FairMarket's initial public offering, which failed to accurately disclose the amount and nature of the commissions and fees paid to the underwriter defendants. On or about October 8, 2002, the Court entered an Order dismissing the claims asserted against certain individual defendants in the consolidated actions, including the claims against Mr. Randall and Mr. Belchers, without any payment from these individuals or the Company. On or about February 19, 2003, the Court entered an Order dismissing with prejudice the claims asserted against the Company under Section 10(b) of the Securities Exchange Act of 1934. As a result, the only claims that remain against the Company are those arising under Section 11 of the Securities Act of 1934. The Company has entered into an agreement-in-principle to settle the remaining claims in the litigation. The proposed settlement will result in a dismissal with prejudice of all claims and will include a release of all claims that were brought or could have been brought against the Company and its present and former directors and officers. It is anticipated that any payment to the plaintiff class and their counsel will be funded by the Company's directors & officers liability insurance and that no direct payment will be made by the Company. The proposed settlement is subject to a number of significant conditions and contingencies, including the execution of a definitive settlement agreement, final approval of the settlement by the Company's directors & officers liability insurance carriers and by the plaintiff class, and the approval of the settlement by the Court.

ITEM 2. CHANGES IN SECURITIES AND USE OF PROCEEDS

(d) Use of Proceeds

On March 17, 2000, we completed the initial public offering of our common stock. The shares of the common stock sold in the offering were registered under the Securities Act of 1933 on a Registration Statement on Form S-1 (No. 333-92677). The Securities and Exchange Commission declared the Registration Statement effective on March 13, 2000. We estimate that as of June 30, 2003, of the approximately \$89.1 million, net of offering expenses approximately \$31.9 million has been used for working capital purposes, including approximately \$5.1 million used for the purchase of equipment and \$4.0 million to repurchase 3.1 million shares of our common stock from our founder. At June 30, 2003, substantially all of the remaining net proceeds (approximately \$53.2 million) were held in investments in commercial paper, government bonds and other interest-bearing accounts.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.

ITEM 6. EXHIBITS AND REPORTS ON FORM 8-K

31.1 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.*

31.2 Certification pursuant to Section 302 of the Sarbanes-Oxley Act of 2002.*

32.1 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.*

32.2 Certification pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.*

(b) Reports on Form 8-K

On May 13, 2003, we filed a Current Report on Form 8-K dated May 9, 2003 with the Securities and Exchange Commission, reporting under Item 9 that we issued a press release announcing our financial results for the quarter ended March 31, 2003 and furnishing the press release as an Exhibit.

On June 26, 2003, we filed a Current Report on Form 8-K dated June 20, 2003 with the Securities and Exchange Commission, reporting under Item 5 our asset purchase agreement with eBay, Inc.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
