ASX Announcement

Melbourne, Thursday 24 February 2005

The National reviewing APRA's discussion paper on International Financial Reporting Standards

Today, the Australian Prudential Regulation Authority (APRA) released a discussion paper outlining their proposed approach to fair value and other issues arising from the adoption of Australian equivalents to International Financial Reporting Standards.

APRA's proposals have potential impacts for the regulatory capital positions of all Australian Financial institutions. The National will be progressively adopting the new financial reporting standards from 1 October 2005. Once finalised APRA's intention is that any new regulatory capital treatments will take effect from 1 January 2006, subject to any transitional arrangements.

The proposals outlined in the APRA discussion paper are subject to a consultation process.

The National is currently assessing the potential impacts as a result of APRA's proposed treatment of these standards. It intends to provide further information on the impact of the proposed changes when it has had an opportunity to review the proposals in detail, discuss the framework further with APRA and quantify potential impacts.

ASX Announcement

Melbourne, Monday 7th February 2005

National to revitalise its UK banks

Group Chief Executive, John Stewart, has confirmed the National's commitment to growing its banking businesses in the United Kingdom following the sale of its Irish banks.

Mr Stewart told an analyst briefing in Sydney that the National proposes to revitalise its two UK banking franchises, Clydesdale Bank and Yorkshire Bank, and expand its operations throughout the south-east of England.

Following an extensive review, we have decided to stay and build our banking franchises, Clydesdale and Yorkshire, because the UK is an attractive market with a positive outlook, he said.

The UK is big enough for smaller banks to compete profitably in niche markets. It is three times the size of the Australian banking market and offers growth opportunities not available to our Australian competitors.

The National's European Chief Executive, Mrs Lynne Peacock, told analysts that Clydesdale and Yorkshire had followed an undifferentiated strategy from the major British High Street banks, with multiple legal entities and complex operating structures, significant inefficiencies and duplication, distribution limitations, product pricing out of step with the market and frequent management changes.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

In the past, our service delivery has not kept pace with customer trends, our distribution network did not extend into the south-east of England, we had no third party channels and limited direct channel capability, she said. In addition, we lacked common products, processes and systems and had separate banking and wealth management platforms.

Mrs Peacock said that Clydesdale and Yorkshire are becoming more nimble and customer focussed so that they can develop a sustainable presence in the UK banking market and provide adequate returns to National shareholders.

The change strategy we are implementing is building on the strong foundations of Clydesdale and Yorkshire which include quality brands that have secured a strong customer base in their natural market area, she said.

We also have good people with business and retail banking skills that are being leveraged across our current franchises and extended into our new banking business in the south-east of England.

The new Clydesdale and Yorkshire banking presence in the UK is based on:

a re-aligned High Street presence in the UK with a simplified and refreshed product set and small business banker support in flagship branches;

a new light infrastructure distribution network of integrated financial solutions centres based around our business and private customers;

simplifying our product range, more product support and actively managing our margins down to market levels;

third party distribution of mortgage products; and

a broad cost reduction program involving process simplification, centralising workloads, rationalising management structures and consolidating technology platforms.

Mrs Peacock said the National had recently completed the legal entity merger of Clydesdale and Yorkshire banks which will reduce duplication and improve efficiency, and opened 12 new integrated financial solutions centres in the south-east of England.

We will have over 30 integrated financial service centres across the south-east and converted 39 Clydesdale and Yorkshire locations in the midlands and northern UK into IFS centres by the end of the year, she said. We will also shortly commence the conversion of 50 existing Clydesdale and Yorkshire branches into flagship High Street centres, strengthen our e-business capability and improve processing of customer transactions.

Outlook

Mrs Peacock said UK earnings will be lower in 2005 because of the headwind created by margin decline, built-in cost growth and ongoing investment.

As part of our change strategy, we are aiming for a significant reduction in our cost base, improved productivity, higher volumes of new business and improved customer and staff satisfaction, she said.

We are already seeing some positive early results from implementation of the new strategy. Clydesdale and Yorkshire are recording a decrease in customer attrition and an increase in new customers. This gives us confidence that a two to three year turnaround is achievable.

Portfolio Review

John Stewart, MD & CEO National Australia Bank

7 February 2005

[GRAPHIC]

[LOGO]

Strategy Refreshed

Late 1980s to Early 1990s

**Build collection of regional
Franchises**

Full service bank

Managed for short term profit

... but increasingly challenged by lack of scale and leverage in UK - run as relatively autonomous banks

Mid 1990s to Early 2000s

Transformational Deal

Awaiting potential transformational deal

2002 to 2004

**Organic Strategy
+ Portfolio Review**

Doing the sensible fixes, but this was not enough

Hence, we developed a differentiated strategy and compared this value outcome to a range of portfolio options

Portfolio Review

Europe Banks
Portfolio Options

Pros

Cons

1. Retain All

GB: +CB +YB
Ireland: +NB +NIB

Regional coverage
Cost synergies from
integration

Complexity and delivery risk
Significant costs to implement
compliance and infrastructure programs

+ = Retain * = Sell

**Europe Banks
Portfolio Options**

Pros

Cons

2. Sell All

Refocus on core Australian operations

Not the highest value option

Removes exposure to larger and more stable growth of UK market

Makes any further international investment difficult

GB: *CB *YB
Ireland: *NB *NIB

+ = Retain * = Sell

**Europe Banks
Portfolio Options**

Pros

Cons

3. Shrink to Grow on a Single Franchise

GB: +CB OR +YB
Ireland: *NB *NIB

Reduces investment requirement and complexity

Significant complexity to undo the existing CB/YB integration

Reduced delivery risk profile

+ = Retain * = Sell

**Europe Banks
Portfolio Options**

Pros

Cons

4. Retain GB, Sell Irish

Greater management focus

Separation and transitional arrangements add complexity in short term

Ireland not central to new strategy

**GB: +CB +YB
Ireland: *NB *NIB**

GB market is attractive

Highest value option

+ = Retain * = Sell

Portfolio Outcome: Irish Banks Sold to Danske Bank

Sale announced December 2004 with sale proceeds of A\$2.5 billion (£967 million) in cash

Profit on sale expected to be c.A\$1.1 billion expected to complete during the first quarter of calendar year 2005

In relation to our remaining businesses in Great Britain

Transition arrangement at cost for up to 18 months, with annualised costs of c.£25 million p.a.

c. £15 million of costs currently recharged to the Irish banks will be absorbed by our remaining GB business

c.£50 million for the separation of the Irish businesses

The end result is a simplified business model with a focus on our Great Britain operations

Strategy for Differentiation

				Do what we do, but do it better
		Do what we do, but do it better		Differentiated GB business
		One efficient GB business		
	2002			Playing a different game

Overview of Business Banking

The Opportunity

Playing a Different Game

Progress to Date

Recent History Business Banking

[GRAPHIC]

Clydesdale Bank

#3 market share in business banking in Scotland

#3 ranked business bank by Forum of Private Business

Business Customers: 46,000

Business Centres: 27

Yorkshire Bank

#6 market share in business banking in natural marketing area

#2 ranked business bank by Forum of Private Business

Business Customers: 55,000

Business Centres: 23

Solid businesses contributing significant profit

The Opportunity Size of Target Segments

SME Market in UK

391,000 businesses with a turnover of > £500K

We currently only have 3% share

Private Banking Market in UK

700,000 individuals earning > £60K per annum

We currently have less than 2% share of these customers

Others qualify on the basis of assets

Profitable target segments

The Opportunity South of England

Profitable target segments

No presence in the South

[GRAPHIC]

60% of wealth in the UK & 20 million people

The Opportunity

Profitable target segments

No presence in the South of England

Need to protect market share in Scotland

Opportunities to grow market share in Yorkshire

Opportunities to grow Agribusiness

Opportunity to provide differentiated proposition in order to compete against large, established competitors

Unique opportunity for a differentiated offering

Playing a Different Game Integrated Financial Solutions

Relationship-based service out of Financial Solutions Centres

SME and Private Banking segment

Tailored products and pricing

Local decision-making

Professional partnership model

Creating value

Integrated

For the right customer the answer is Yes now what is the question?

Back to the Future

Playing a Different Game: Our Model

Playing a Different Game: Our Incentive Scheme

Business Model & Incentive Scheme Support Retention of Talent

Progress to Date: Principles / Operating

Achieved Since 1 March 04 (10 months)

Control/Compliance and Supervision Structure

Expansion 10 step, 278 day process

People 200 top Q talent in 10 months; 300 more to go

Credit 90% of decisions locally

Products, Pricing & Local Marketing

Alignment with Third Party Distribution

M.I. and Remuneration

Driving change for the benefit of the organisation

Progress to Date: Our Presence in 2003

[GRAPHIC]

60% of wealth in the UK

Progress to Date: Southern Expansion in 2004

[GRAPHIC]

12 sites in key locations

Progress to Date: Planned Expansion

[GRAPHIC]

South of England network of 30+ sites by end 2005

Progress to Date: National IFS / Leveraging

National IFS structure launched

Heads of IFS appointed in 8 regions

Managing Partners appointed

39 existing Clydesdale and Yorkshire business centres being turned into full/satellite Financial Solution Centres

Aiming for 80+ Financial Solutions Centres by 06/07

Leveraging the capabilities we have built

Progress to Date: National IFS

[GRAPHIC]

End of 05: 70+ sites

06/07: 80+ sites

7 FSCs (outside London) cover populations greater than Brisbane

The 8 FSCs in Yorkshire cover a population greater than Melbourne

The 9 London FSCs will cover population greater than Melbourne & Sydney combined

The 3 FSCs in Manchester/Merseyside cover a population greater than Sydney

The FSC in Glasgow covers a population greater than Perth

Light infrastructure model with national coverage

Progress to Date: Performance Management Culture

Pace and total personal accountability

P&Ls

Accurate MI

Trend Monitoring and ratios

Regular recognition and challenge and support

Cost to income ratio driven

Building a high performance culture 53% engagement

Building a high performance culture

Progress to Date: IFS Opportunity Pipeline Performance Metrics

Stock Value of Opportunity Pipeline

[CHART]

Opportunity Approvals

[CHART]

Monthly Drawdown Values

[CHART]

Strong performance delivering results

Financial Expectations

New Sites

A typical new IFS centre is expected to have a cash flow payback of circa 23 months

Opportunity per new site represents circa £4m PBT in steady state

Targeting 40% cost / income ratio

Converted Sites

Some costs when retro-fitting to traditional centres

Opportunity per converted site represents circa £400k PBT

In Conclusion

We are confident that with IFS we will successfully develop a differentiated proposition to support sustainable growth

Our results to date are very encouraging and we are moving with pace to implement the organisational and cultural change required to drive our business forward

Competitors can't follow us easily

Opportunity to generate a business and a model with no baggage

Upside due to better geographical coverage, good staff, and the generation and leverage of best practice across the Group

Why Third Party Distribution and Size of the Opportunity

The Shift in Mortgage Origination in the UK

[CHART]

UK Mortgage Market , Gross Lending 2003 - £277bn

[CHART]

Mortgage is the Heart of the Consumer's Financial World

[CHART]

Source: John Malone - Head of Prudential Mortgage Club

NAB's History in the UK Intermediary Mortgage Market

Key reasons for not having succeeded previously:

1. Lack of market expertise
2. Local not national
3. Imported thinking

No credibility as a result

Intermediary Market Myths

Statement	Reality
Poor quality customers go to intermediaries	Financially aware customers seek professional advice
Quality of business is poor	Comparable risk profile to Retail business
Brokers are constantly churning	Less than 20% brokers actively manage customer base
High cost of customer acquisition	2002 KPMG study intermediary business cheaper
Shorter product life	Product life is not shorter it is the norm

Our Opportunity in the Intermediary Mortgage Market

The UK mortgage market is 3.5 times the size of Australian market

Ready to play in 65% of the market previously untapped

Mortgage has become the heart of the customer's financial world

The UK is a very professional regulated market

Acquisition of right type of customers

Low cost infrastructure

Key Elements of Third Party Strategy

Focused distribution

Create mortgage growth

Adapt a selective approach

Acquisition channel for IFS customers

European Investor Conference
Introduction to Second Session

Lynne Peacock, CEO Europe

7 February 2005

[GRAPHIC]

[LOGO]

Second Session Back Office Activities

Do What We Do But Do It Better	Impact
	Single efficient products delivery
Products - Simplified and refreshed product range	Products rationalised
Brands & Marketing - Refreshing brands and improved customer understanding	Products fit for purpose for each distribution business
	Margins in line with market given our mix of business
	Appropriate fees and charges
Back Office - Creating an efficient back office	Creating value from our brands
	High brand recognition
	Good customer understanding
	Consolidated efficient back office
	Cost base in line with competitors
	Integration complete, with systems convergence
	Delivery in-house where efficient, otherwise successfully outsourced processes

Note: Total Europe & FSE includes Ireland

Source: Annual reports

Net Interest Income FSE

FSE NII Developments 2002-2004

[CHART]

Historical high net interest margins have been reduced through re-pricing and change in business mix

Margin reductions resulted in circa £115m reduction in overall Total Europe net interest income between 2002 and 2004, the majority of which in FY04, while the changing mix contributed c.£40m

Notes:

Includes Ireland

IMS and Other indicate movement in NII between years

Other includes impact from hedging, funding and income from share capital

Summary Observations: Business Mix / Share of Wallet

**Attractive but
unsustainable
margins**

The historic mix of business
Skew to consumer finance
Small mortgage book
Business lending mix SME and Corporate
Low retail deposit book
Pricing strategy focused on revenue, not growth

**Attractive but
unsustainable
margins**

**Revenue
opportunities exist
from cross sell**

**Excluded ourselves
from attractive
parts of market**

Have not capitalised on product innovations
Gaps in competitive product range
Non-integrated sales approach
Slow pricing dynamics

CYB Customer Base by Banking Product Holdings

[CHART]

Customers With 1 Bank Product

[CHART]

Opportunity

Existing customers hold on average fewer products with the bank

Key Observation

Only a third of our customers hold more than one CYB bank product

Source: NAGE Customer Knowledge, Nov 2004

Summary Observations: Business Mix / Share of Wallet

**Attractive but
Unsustainable
Margins**

**Revenue
opportunities exist
from cross sell**

Excluded ourselves

**from attractive
parts of market**

Lack of presence in South of England
Limited development of products/systems to support non-Branch
distribution:
Direct channel offers
Off-shore deposit gathering
Third Party Distribution presence

Agenda

Situation analysis

Business Mix and Share of Wallet

Unit cost

Pricing

Product Strategy

Future mix of business and margin impact

Product Proliferation has Complicated the Business

2002 Product Set

[CHART]

95

Summary Observations: Proliferation of Products has Impacted Unit Cost

Multiple products	Proliferation of products	Confusion for customers Confusion for sales force Lack of differentiation Higher costs to support on-sale and off-sale products
	Inefficiencies	Multiple systems to maintain products multiple sales & illustration tools impact sales productivity complicates servicing and security no single view of customer holdings difficult to get customer profitability Stunted CRM and lead generation capability slow and expensive product development cycle

Agenda

Situation analysis

Business Mix and Share of Wallet

Unit cost

Pricing

Product Strategy

Future mix of business and margin impact

Summary Observations: Pricing

Pricing out of line with market

Relative pricing

Deliberate high pricing to maximise short term profit
Slow response to pricing moves in the market
High back book pricing
Absence from best buy tables

Relative Pricing: Basic Savings Accounts

**Online Savings Accounts
(May 2003)**

[CHART]

Rate - %

**Branch Savings Account
(May 2003)**

[CHART]

Rate - %

Historically poor position and no presence in remote channels

Source: Moneysupermarket.com

Summary Observations: Pricing

Relative pricing

Pricing Impacts on	Some of our historical actions had reverse outcomes
Customer	Putting up fees led to customers changing their behaviour
Behaviour	Ultimate change of behaviour was to leave bank - customer attrition impact

Pricing Impact on Customer Behaviour - Bad Fees

2002 Attrition Analysis

Reasons for Leaving

[CHART]

**. . . in particular
unauthorised overdraft fees . . .**

[CHART]

**. . . and specifically the
monthly overdraft fee**

[CHART]

Unauthorised overdraft fees and charges was the most important driver of attrition in 2002

increase volume

Rationalise and Align: CYB Product Portfolio

2002 Product Set

[CHART]

Rationalised Product Set

[CHART]

Agenda

Situation analysis

Product Strategy and Progress

Future mix of business and margin impact

Future Mix of Business

	FY04		Future
	Lending	Deposits	Lending
Personal	Consumer Finance Mortgages	Current Accounts Savings	Consumer Finance Mortgages
Business	Business Lending Corporate Lending	Business Deposits Corporate Deposits Net retail funding gap	Business Lending Corporate Lending
		Current Accounts Savings	Business Deposits Corporate Deposits Net retail funding gap

Current Competitive Positioning

[GRAPHIC]

Quartile comparison against direct competitors (not total market)

Positioning shows average position for book there are variances within products, in particular in the mortgage books, with better positioning for attractive customer segments

Agenda

Situation analysis

Product Strategy and Progress

Future mix of business and margin impact

Conclusion

In Conclusion

Reasonable progress on product strategy

Foundations of a range of competitive product offers in place

Significant pricing decisions taken

Residual margin issues more manageable

Still significant product rationalisation but simplified following Irish sale

European Investor Conference

Understanding Customers & Brand

Glenn King, GM Customer Strategy and Delivery

7 February 2005

[GRAPHIC]

[LOGO]

Key Customer Issues Driven from Non investment

- | | | |
|--------|------------------|--|
| 1. | Customer insight | Not differentiating products / services to customer needs
Poor systems and techniques for analysing customer behaviours |
| 2. | Brand | Brand metrics showed a deterioration in brand performance
Lack of common and consistent brand values |
| 3. | Direct Channels | Lacking in key channels and regional coverage |
| Result | | Many years of customer attrition
Insufficient customer acquisition
Higher cost to serve |

1. Customer Insight

Business Issue

Limited systematic use of customer information

Customer Impact

Poor segmentation, focus on wrong customers

Low product penetration of existing customers and high customer attrition

Solution

Commenced investment in single customer data warehouse and good analytical marketing capability

Built propensity, behavioural and profitability models and triggers

Results

Led to revised customer segmentation based on sustainable points of differentiation

Automatic customer lead generation leading to sustained income growth over 5 years

First six months shown promising signs with £5m income

Progress made

Addresses negative customer attrition and acquisition trends

2. Brand

Business Issue

Brands not supported and strengths dissipated

Mixed internal and external understanding of brand identity and promise

Customer Impact to 2003

Decline in brand loyalty, preference and awareness

Last and second last in key customer satisfaction surveys for Clydesdale and Yorkshire

Brand values not understood by staff

Solution - Four Phase Integrated Brand Strategy

Phase 1	Detailed customer and competitor research
Phase 2	Developed brand strategy and positioning programme
Phase 3	Internal brand staff immersion and education initiative
Phase 4	External brand positioning and sustained campaign delivery

2. Brand - Results of Brand Strategy on Lead Indicators

Key Metrics (Calendar 2004)

[CHART]

Increase in brand loyalty, advocacy and satisfaction metrics

Brand awareness increased from 12% to 18%

Customer satisfaction scores improved from last to second and third

80% of staff can nominate and deliver on brand values

Customer acquisition and attrition trends reversed

Source : PWC Brand Tracking Survey

3. Direct Channels

Business Issue

No sustained investment in direct channels resulting in sub optimal service

Separate ATM, Internet, Call Centre

Impact

Multiple call centres with duplication of costs and infrastructure

Less than 50% of branch network and customer base using centralised call centres

Less than 10% of our customers on Internet Banking service

Over 90% of consumer finance sales through branch network

Over 60% of transactions through branch network

Gaps in UK wide channel offer

Solution - commenced from mid 2004

Focussed and priority rebuild of direct distribution as part of customer strategy

3. Direct Channels - Progress and Early Results to Date

Call Centre

5 call centres rationalised to 2 integrated call centres

100% branch network and customer base migrated to call centre

Direct call centre operations accounting for 30% of consumer finance sales

Internet

June 2005 launch of new Internet Banking platform. Over 50% of customers on service by end of 2006

Launched new Internet product purchase and information services

UK wide outlet service

Launched UK wide Post Office banking service for Clydesdale personal and business customers

Summary - Sustained Profitable Customer Growth

Improved customer insight	+	Brand revitalisation	+	Direct channel development
		=		
Sustained Profitable Customer Growth

**European Investor Conference
Cutting the Cost of Production**

Tom Burns, GM Operations

7 February 2005

[GRAPHIC]

[LOGO]

Objective Cut the Cost of Production

5 Point Plan

Centralisation of workload

Streamlining of processes

Rationalisation of management structure

Reduction in property usage

Convergence of technology platform

The Problem - Cost Base Too High

FY 2002

	Cost / Average Assets (%)	Ranking	PBT / FTE (£ 000)	Ranking	Average Assets / FTE (£m)	Ranking
Best						
Northern Rock	0.64	1	85.6	1	7.7	1
HBOS	1.13	2	45.5	3	5.2	3
Abbey National	1.64	3	-33.6	n/a	7.4	2
Barclays	1.74	4	41.5	5	4.9	4
Bradford & Bingley	1.96	5	31.0	8	3.2	7
Alliance & Leicester	1.99	6	50.3	2	4.3	5
Lloyds TSB	2.01	7	31.7	7	3.0	8
Royal Bank of Scotland	2.40	8	42.0	4	3.4	6
Worst						
National Australia Group Europe	2.41	9	40.8	6	2.4	9

Uncompetitive

Cost base too high and too fixed

Lack of common systems, processes and automation

Cost overlap ...

... Hence massive opportunity

Note: Costs are inclusive of goodwill and exclusive of provisions

Source: Company publications, internal data

Centralisation of Workload

		Centralised Processing	Consolidation of processing centres
[GRAPHIC]	+	Selective Outsourcing	Selective outsourcing
			Simplified management structure
			Geographic concentration
			Rationalised common product set
2002		2004 / 05	2006 / 07

Streamline of Process

[GRAPHIC]

2002

[GRAPHIC]

2004 / 05

[GRAPHIC]

2006/ 07

Rationalisation of Management Structure

		Rationalise middle & senior management
	FSE Operations	Streamlined leadership teams for Operations and Technology
		Geographic concentration of management and activities
WME Operations	Consumer Finance Operations	Clearer and simpler lines of control
		Senior manager on the ground in each geographic region
		Reduced travel and communication costs

Reduction in Property Usage

Number of Network & Non-Network Sites

[CHART]

Target of nine non-network sites (c100,000 sq ft) for exit

Glasgow project will result in 45,000 sq.ft reduction in
FY05

Opportunity to align branch footprint

Target savings of £11m per annum by FY07

What Will Success Look Like?

Simple efficient **products** delivery

Consolidated efficient **back office**

Creating value from **brands**

A national **Refocused Retail** business

Differentiated **IFS** and **Third Party**

Status Retail

Results so far

Impact

Increase in new customers and decrease in customer attrition

Above systems growth in core products

Increase in insurance cross sales

Further Increases in cross sales levels

Increased variable pay

Productivity improvements

Reduced cost to serve

Work still to do

Branch realignment

Transaction migration

Increase sales effectiveness

Status IFS

Results so far

12 sites opened in the South East
Over 200 hires circa 65% external

Attractive incentive system

Impact

Payback timeframe for new sites circa 2 years
Expect PBT per new site of £4m per annum in
steady

state

Expect a significant improvement in converted sites

Work still to do

Development of another 20 sites in the South East
Complete retro-fitting of IFS into Clydesdale and
Yorkshire Business Banking activities

Status Third Party Distribution

Results so far

Capability built
£125m business written in FY04 since launch in
April
2004

Impact

Expect Third Party channel to contribute £800m +
mortgage growth in current year

Well established channel with strong broker
relationships

Key introduction source of premium customers to
IFS

Work still to do

Increase volumes
Further development of products tailored for Third
Party channel
Improved processing

Status Products

Results so far

Margins managed down

New products fit for purpose

Products rationalised

Sale of National Australia Life / L&G alliance

Impact

Margin contraction to continue through current financial year

Volume growth to offset margin decline over time
Single and simple product set

Work still to do

Continue margin management

Further product rationalisation

Develop new products

Status Marketing

Results so far

Impact

Developed and rolled out National Leads
Development of outbound call centre lead generation
Introduction of CVM to improve customer
understanding
Brand revitalisation and brand values

Improved direct channel capability
Improved customer acquisition and attrition
Positive brand metrics

Incremental lead generation

Work still to do

Improve customer understanding and analytics
On-going brand reinvigoration
Upgrade on-line channels
Franchise marketing models for IFS centres allowing
greater local control

Status Operations

Results so far

Legal entity merger
Centralisation of processes and workload removal
Selective outsourcing
Technology Front End / platform upgrade

Impact

Improved processing efficiencies
£60m in cost savings identified to date
Increased flexibility
Products quicker to market

Work still to do

Complete work on restructuring initiatives
Complete CYB convergence
Move to more variable cost basis
Processes aligned across CYB from 17% to 95%
In branch processing reduced from 75% to <40%
workload

Performance Outlook

Targeting return to sector growth rates and profitability

Facing headwinds from several issues in current year

Ongoing margin decline

Built in costs and ongoing investment

Early results are positive but 05 earnings are expected to show a decline on 04

2 to 3 year turnaround timeframe remains achievable

Further details on provisioning and costs saves to be provided in May

Summary

UK market is attractive

Developing business will create more value than selling

Why we will be successful

Leadership team with proven track record in UK market

Clear and differentiated strategy

NATIONAL AUSTRALIA BANK LIMITED

SCRIPT FOR THE

ANNUAL GENERAL MEETING

31 JANUARY 2005

Good afternoon ladies and gentlemen.

My name is Graham Kraehe and I am the Chairman of the National.

It is now 2 o'clock, this is a properly constituted meeting and a quorum is present.

I therefore declare this Annual General Meeting of National Australia Bank Limited open.

I welcome you here today.

I also welcome those shareholders viewing on the internet.

The National was the first financial institution in Australia to broadcast its AGM over the internet, that was more than five years ago.

It enables us to communicate directly with shareholders who cannot be present today, including those who live in other parts of Australia and overseas.

The National has nearly 400,000 shareholders who have invested directly in the Company.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

This is an increase of almost 60,000 shareholders since last year.

In addition, there are many thousands who have invested indirectly through funds management products.

The number of shareholders present here today, and the many who have

returned their completed proxy forms, demonstrates a real interest in the Company's affairs.

(Pause)

At last year's AGM, a number of shareholders expressed concern that too many companies were holding their AGMs in the week prior to Christmas.

With a September year end, we are not able to hold the meeting earlier in December but we have taken on board the comments of shareholders, and accordingly changed the date of the AGM from the week before Christmas to today.

We have also taken on board the comments of shareholders from last year's AGM concerning the voting process.

Accordingly, at the meeting today, shareholders will have an opportunity to express their views through a vote on a show of hands.

(Pause)

I would now like to introduce to you the people here on stage with me today.

Seated on my far right -

First we have Robert Elstone.

Robert joined the Board in September last year.

He is a member of the Board's Nomination and Risk Committees.

Robert and all of the Directors standing for election for the first time today will address the meeting later.

Next to Robert is Ahmed Fahour.

Ahmed joined the National in September last year and is now Executive Director and Chief Executive Officer, Australia.

Next is Danny Gilbert.

Danny joined the Board last September and is also a member of the Audit and Nomination Committees.

Next we have Geoff Tomlinson.

Geoff was appointed as a Director in March 2000.

He is the Chairman of our wholly owned subsidiary, National Wealth Management Holdings Limited, which includes MLC, and is the Chairman of the Human Resources Committee and a member of the Nomination Committee.

Next we have Michael Chaney.

Michael joined the Board last month and is also a member of the Nomination Committee.

Next we have our corporate governance officer, the Company Secretary Garry Nolan.

Moving now to the other side, we have the Group Managing Director and Chief Executive Officer John Stewart.

Next we have Michael Ullmer.

Michael joined the National last September as the Group Chief Financial Officer and is now an executive director responsible for finance and risk.

Next to Michael we have John Thorn.

John joined the Board in October 2003 and is now Chairman of the Audit Committee and a member of the Human Resources and Nomination Committees.

Next we have Paul Rizzo.

Paul joined the Board last September.

He is a member of the Audit and Risk Committees and acts as the non-executive link between the two committees.

In addition, he is a member of the Nomination Committee.

Next to Paul is Peter Duncan.

Peter joined the Board in November 2001 and is Chairman of the Risk Committee and a member of the Nomination Committee.

Next we have Jillian Segal.

Jillian joined the Board last September and is a member of the Human Resources and Nomination Committees.

Next we have Malcolm Williamson.

Malcolm joined the Board in May last year and is the Non-Executive Chairman of the National's United Kingdom operations.

He is also a member of the Nomination Committee.

In addition, we have the Chief General Counsel, David Krasnostein.

I would also like to introduce in the audience, Brian Greig, a Partner with the Auditors KPMG, and Steve Aldersley, a Partner with Ernst & Young.

We now turn to the matters before the meeting.

All shareholders have received the Notice of the Annual General Meeting which, with your agreement, I propose be taken as read.

(PAUSE)

Let me now make some comments on the past year.

2004 was clearly a year of unprecedented challenges and changes for the National with unacceptable performance for shareholders.

I know many shareholders are concerned about the events that affected the National's performance and share price during 2004.

On behalf of the Board and management I express our sincere apology to shareholders for the performance during this period.

I believe we have accepted our shortcomings and wholeheartedly embraced a change program that addresses the underlying issues.

We have commenced a journey to change the leadership, structure and culture of the company to set the foundations for a new National.

We started at the top with sweeping leadership change.

We appointed six new non-executive directors and two new executive directors as part of the Board renewal process which is one of the most comprehensive reviews undertaken by a major Australian company.

Following John Stewart's appointment as the new Chief Executive, we have reviewed and changed the senior management team including the appointment of a new Chief Financial Officer and new head of our Australian business.

Accountability for past mistakes has been demonstrated by actions not words.

[Pause]

Despite the seriousness of the issues we confronted in 2004, the National still reported an annual profit of more than \$3 billion.

We have strong brands and financial services franchises, an excellent portfolio of businesses to provide improved returns to shareholders.

We have recognised there is much to be done to restore the National's reputation and regain shareholder confidence but we start from a solid base.

(Pause)

The title of this year's annual report is *the Year, the Facts, the Future*.

This title was chosen to demonstrate that the Board and senior management have accepted some hard home truths about the National, its performance and our collective responsibility for this.

It is also a useful framework for explaining to shareholders what happened during *the Year*, *the Facts* about the National's performance and our plans for *the Future*.

First - The Year

In January we announced the discovery of \$360 million in foreign currency options losses.

Comprehensive reports by PwC and APRA were released to provide shareholders with a full assessment of this issue.

In brief, these reports identified weaknesses in our systems and processes.

In the Markets Division there were shortcomings in a range of areas of supervision, financial control, risk management and culture.

In March, we announced a four-point action plan to address the issues raised.

The four actions were:

1. Principal Board renewal

2. Extensive management changes

3. Improved Risk and control frameworks, and

4. Changing the corporate culture.

Importantly, we also decided that we should use the crisis as a catalyst to drive wide-ranging change across the organisation - not just fix the Risk

Management systems and culture within the Markets Division.

To limit the change to the Markets Division would have been the quicker and easier approach but it would not have provided the basis for rebuilding the National and its reputation.

[Pause]

Shareholders will have noted that ASIC has brought criminal proceedings against the four traders involved in the unauthorised trading.

We have co-operated fully with our regulators in all aspects of the investigation that has led to this action.

Because of the court action, I can't comment further on this matter.

The PWC report was published in full, as was the subsequent report by APRA, and the enforceable undertakings agreed with ASIC.

The main impacts of these on our operations were:

Increased capital requirements,

a more conservative approach to calculating foreign exchange exposures and risk,

and

closure of the foreign exchange options trading desk to new business.

We believe that very good progress is being made on the remedial work and consultation with our regulators, that is a condition for the removal of these requirements.

We are determined to properly address all the issues and build and maintain strong relationships with our regulators and good progress has been made in this area.

The release of all the reports associated with the foreign exchange trading losses demonstrates the commitment of the Board to openness and

transparency.

Our commitment to lead the way to an open culture is also demonstrated by the very detailed remuneration report included in the Annual Report and the address at today's meeting by the Chair of the Human Resources Committee to give shareholders clarity on this important issue and an insight into how this Board committee works.

Following identification of the foreign exchange trading losses, the Chief Executive Frank Cicutto decided it was in the best interests of the National for him to resign.

John Stewart was appointed as Managing Director and Chief Executive.

He stepped into a very difficult situation at short notice and the last year has required much more of him than anyone would have predicted at the time.

Amongst all the difficulties the National experienced shareholders can be assured that John's impact has been very positive and the first step in our reform process.

He has worked tirelessly in shareholders' interests.

In mid-February, the Chairman Charles Allen also resigned and I was elected as Chairman.

In March, differences emerged between one director and the other directors concerning the PwC report into the foreign currency options trading losses.

These differences were not able to be resolved within the board and an Extraordinary General Meeting had been called.

This was the most demanding and difficult situation I have faced in my career. But it was eventually resolved without the need for an Extraordinary General Meeting.

The Board was then able to get on with the work required to strengthen the National's risk management systems and processes, implement the cultural change program, restore the National's reputation and build shareholder value.

[Pause]

But we do regret its occurrence and the damage the National suffered as a consequence of it.

[Pause]

Having taken time to discuss the year,

I would now like to hand over to John Stewart to talk about the Facts

of the National s performance in 2004.

I will then return to discuss the Future for the National.

end

(MR STEWART)

Thank you Graham and good afternoon.

Thank you Graham and good afternoon.

I attended our last AGM as an Executive Director responsible for the National's operations in Europe.

At that stage I was new to the National and still coming to terms with the issues I would have to address in the United Kingdom and Ireland.

It is a bit of an understatement to say a lot has happened since then.

In fact in a few days time it will be the first anniversary of my appointment as Chief Executive of the National and Graham has outlined the huge range of issues we have had to confront during the last year.

It was clear to me when I arrived that there was more wrong than just the foreign exchange issues

However, I was surprised by the full extent of the problems the bank faced.

Total shareholder return has lagged the industry over one, three and five years, our revenue growth had slowed, costs were increasing, there was a range of compliance issues and we did not have strong relationships with any of our stakeholders.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

For the year to September 2004 our cash earnings fell by 15 per cent to \$3.46 billion.

As I said at the time of the profit announcement this was a poor result and it is unacceptable for the National and its shareholders.

In overview our results showed a company with flat revenue, unsustainable cost growth, a complex and costly business structure, poor compliance processes and a lack of a clear cultural framework.

These underlying issues had been building up like water pressure behind a dam wall.

The foreign exchange losses broke through the dam wall and the other issues spilled out and were then plain for all to see.

With the benefit of hindsight, the foreign exchange losses provided a catalyst for change and highlighted the need to address these underlying problems.

Naturally shareholders will want to know what progress we have made in addressing these issues.

I hope by the end of my address that you will see that we have taken a good hard look at our problems and have started to build a renewed National that will serve its shareholders well.

Be assured, all of these problems are fixable.

We do have excellent business franchises especially here in Australia.

Let me now discuss the main issues facing the National and I will split them into four main areas:

They are:

People & Culture

Regulatory & Compliance

Business Inefficiency, and

Stalled Revenue

Starting with People and Culture

All companies need to get two things right if they are to be successful:

They need good people, and those people displaying the right behaviours - culture if you like.

You need strong leadership with a diverse blend of skills, role clarity, and accountability throughout the organisation.

If you achieve this then you have a happy and engaged workforce.

I have found during my career that happy staff makes happy customers makes happy shareholders.

Significant progress has been made towards this goal.

I have appointed a new leadership team that includes a blend of people with strong career track records both from inside the National and from other organisations.

I am very pleased with the quality of the team and I am sure they will create a more nimble and customer-focused organisation.

Two of the new leadership team join me on the Board as executive directors.

In Ahmed Fahour, our new CEO Australia, we have someone who has had a great deal of international experience especially in the areas of integration and cross-selling bank and wealth management products.

I am pleased to have been able to lure him back to his hometown of Melbourne with the challenge of integrating our banking and wealth management businesses and creating increased value from those two premier franchises.

Michael Ullmer is our new Group Chief Financial Officer and brings to the

National extensive Australian experience in banking, finance and risk management.

Michael has responsibility for both financial management and risk management and has aligned the finance and risk functions with our new regional business model.

As Graham mentioned we have created a new set of Corporate Principles as part of the culture change program.

These principles were the product of consultation with 5000 staff throughout the Group.

The new principles represent behaviours that are lived by our people and not simply hung on the wall without meaning.

Last week the Corporate Principles were a central part of a senior management workshop that looked closely at our culture change plans and how behaviours can be changed throughout the Group.

As it says in the Corporate Principles sent to every employee

We do not have room for people who do not live these principles.

In the new National it will not be good enough to meet business targets alone.

Performance against compliance gateways and behaviour standards will be a part of regular reviews and mandatory for participation in bonus plans.

However, a word of caution, cultural change takes time.

I have run similar programs at other banks and my experience is that the first 12 months is slow going while you lay the necessary foundations.

However, once you have built up traction among the workforce you then see a rapid change in the culture of the organisation.

In addition we have ensured that all senior members of staff are clear about

their roles and what exactly they are responsible and accountable for.

We have overhauled our reward strategy and our Performance Management Framework to make them much more aligned with creating shareholder value.

And we have put a lot of effort into our Talent Management so that hopefully in the future we will not again have to go outside for a CEO and so many other top executives.

Lynne Peacock put in place all of these changes to help us transform the National's culture and has now returned to the UK as CEO of our Banks across there.

Lynne and I have worked together for many years in the United Kingdom and she is one of the best retail bankers I have ever worked with. In my opinion our UK Banks could not be in better hands.

Elizabeth Hunter has replaced Lynne and I have every confidence that the change program will continue to gain momentum and flourish guided by Elizabeth.

Moving now to Regulatory and Compliance

The sad truth about compliance and quality failures is that the fix and the remedial work is always much more expensive than prevention.

Unfortunately the National has had to deal with a number of these failures.

The foreign currency options trading was the one that focussed market attention on our need to improve in this area.

Apart from the cost of the remedial actions there is also a large opportunity cost.

An organisation dealing with multiple compliance and quality failures cannot devote the same energy to business development and growing shareholder value.

Fortunately the National's core capability of credit assessment and

management remains very sound.

Now this is very important because poor credit risk management can really cause serious damage to a bank.

As I have mentioned one of the first steps was to bring financial control and risk management under one person Michael Ullmer.

I am pleased to say that, we have also appointed a new Group Chief Risk Officer, Mike Hamar, who is a member of my senior management team and also reports into the Principal Board Risk Committee.

Mike is another one of our external recruits and brings with him excellent experience in this area.

I know you will also want an update on the progress of the APRA and ASIC programs associated with the foreign currency options losses.

So far as APRA is concerned, we have now submitted 71 of the 81 required improvements.

Progress on the remainder is on schedule.

We have also submitted all 3 reports required under our enforceable undertaking with ASIC and they are now being reviewed.

As an organisation we are working hard to establish a sound on-going relationship with all our regulators.

Let me turn now to Business Inefficiency

There is a great opportunity to create sustainable growth in shareholder value at the National by simplifying our business processes and moving to a less complex business structure.

We are reducing the size and cost of the corporate centre and moving to a regional business model.

In each region in which we operate we are bringing together the retail bank, our wealth management business and corporate bank to create an

improved customer focus.

We will have four integrated businesses.

They are the three regionally based businesses in Australia, New Zealand and the United Kingdom and the fourth is our institutional bank that trades on a global basis.

Under this model instead of three customer offerings in the one region generated by separate retail banking, wealth management and corporate banking businesses will have one integrated offering supported by one streamlined infrastructure.

In addition in all regions we have over-engineered many of our business processes.

For example a young business banker in Queensland told me he could approve less than 10 per cent of loans that fell within his delegated authority without first sending the paper work for further review.

Clearly such a process is unacceptable because it creates additional cost, it de-motivates the banker and reduces our chances of success with the customer if there are delays.

We are working very hard to streamline some of these cumbersome processes and give ownership and accountability to key staff.

Now this does not mean increasing the risk of doing business just simplifying the way we do business.

We have also experienced across the group stalled revenue

It is clear from the full year results that revenue growth was flat.

How did this happen? Well, there were a number of contributing factors.

Probably the biggest reason was associated with the September 11 attacks on the World Trade Centre buildings.

The National took a view after this that a global economic slowdown was

very likely.

In line with this view we reduced our credit risk appetite. However in practice we overshot our target and went to very restrictive settings that meant we were only lending when we had high levels of security.

When you do this the quality of your portfolio increases but you exclude yourself from a large part of the market.

And, of course, the safest loans generally provide lower margins and fees.

Now let me clear I am not suggesting that we should start taking substantially greater risks.

Only that we move back to more normal credit risk settings.

Another reason our growth stalled was we put in place some efficiency measures that successfully cut our costs but were unpopular with customers.

A good example of this would be taking business bankers out of the field and centralising this service. This was unpopular with business customers, especially in the sole proprietor area.

We are now addressing all these issues and focussing on our customer propositions.

In Australia we have launched a new credit card and transaction account with attractive customer terms.

In New Zealand we have been competitive in the fixed rate mortgage market.

In the United Kingdom we are seeing some encouraging signs of improvement, but it is still early days and we have much work to do as these banks have been run for many years to generate short term profits.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

In addition, in the UK, we are expanding our presence into the south of England with a light infrastructure business model that targets small to medium sized enterprises and high net worth customers.

We are also developing a third-party mortgage business in the United Kingdom.

These are just a few examples of ways in which we are looking to restart revenue growth.

It is early days in the recovery phase and I still expect the National's performance to bottom in the first half of 2005 and return to an acceptable growth profile over the second half and into 2006.

The initial work to adjust risk settings and improvements to our products and services is creating encouraging results but we have to ride out the flow-on affects of the problems we faced last year.

We are committed to keeping the market fully informed of our progress.

Next week we will hold a market briefing to outline our strategy in the United Kingdom following the sale of the Irish banks to Danske Bank.

This will be followed by our half-year results in May.

I know this has been a difficult period for shareholders but I am confident that I and the team I now have around me can not only restore the National's reputation. But will also create sustainable growth in shareholder value.

We have renewed our Board and executive teams, we have identified the problems and we know how to fix them

Culture change initiatives are well underway and our program to address the foreign currency remedial work is progressing well.

So finally, I also want to thank our staff for their hard work during these challenging times, our customers for their continuing support, and our shareholders for their patience while we put things right.

end

(MR KRAEHE)

Thank you John.

The Future

When I was elected Chairman I made three commitments to shareholders about how we would run the National in the future:

1. We would deal with the foreign currency options losses in an open and transparent manner.
2. We would accelerate the process of Board renewal, and;
3. We would lead by example in creating a new culture of openness and transparency.

I believe substantial progress has been made on each commitment and we have set the framework for building the new National.

[Pause]

Public release of the PwC and APRA reports on the foreign exchange currency trading losses met a high standard of disclosure.

Both reports were issued to the Australian Stock Exchange and copies are available via our website.

There has also been fundamental Board renewal.

As I have previously mentioned Charles Allen the former Chairman and Frank Cicutto the former Managing Director resigned from the Board in February last year. Mrs Walter resigned in May.

As part of the Board renewal process, Dr Moss and Dr Tweddell retired and Dr Brian Clark resigned due to his increased management commitments.

At this stage, it is appropriate to acknowledge the contribution of the Directors who left the organisation during the year.

(Pause)

There was a thorough and exhaustive process to select the new members of the Board from a large number of quality candidates, and I'm pleased with the outcome.

I know from meetings with shareholders that they are also supportive of the new appointments.

The new non-executive directors are of a high calibre and give the Board diversity of experience across different industries and geographies, and expertise in financial services, risk management, regulatory and not-for-profit organisations.

The expansion of the Board to include Ahmed Fahour and Michael Ullmer as executive directors in addition to John Stewart, the Managing Director, will further enhance open dialogue between the Board and management.

(Pause)

Apart from renewing the Board, there has been a review of Board and management committees, and Board processes, to ensure open and transparent reporting and to allow time for real discussion of key issues.

New Chairs of Board Committees have made a major input to this process, and I thank John Thorn, Audit, Peter Duncan, Risk, and Geoff Tomlinson, Human Resources.

Chairman-elect Michael Chaney attended his first Board meeting this morning and will takeover as Chairman in September this year after he retires as CEO of Wesfarmers and returns from a well-earned break.

Subject to shareholder approval, I look forward to working with Michael during the transition period and know that in Michael I will hand over the role to someone who will do an excellent job and has a great team to support him.

(Pause)

Finally, the Board and management has shown strong leadership in leading the culture change process at the National.

Thousands of employees participated in developing a new set of Corporate Principles and these have now been issued to all employees.

This has been supported by an awareness campaign throughout the National and a senior management workshop in Australia.

The Corporate Principles are clear but the statement: And we do not have room for people who do not live these principles is the toughest I have seen as part of a corporate principles statement and indicates our determination to drive cultural change through the National.

The Board itself has participated in a workshop in which the cultural leadership role of the Board and of directors was discussed in detail.

In addition, new behaviour and performance measures have been incorporated in annual management reviews and will be a requirement for participation in future bonus plans.

This will reinforce the cultural change message.

[Pause]

Since the end of the financial year we have announced several other important developments.

We announced the sale of our Irish banks, Northern Bank and National Irish Bank to Danske Bank Group of Denmark, late last year, for \$2.5 billion.

This represents a profit of just over a billion dollars.

This was an attractive price and will allow our management team to focus all their attention on our operations in the United Kingdom.

Unfortunately, following the sale announcement, Northern Bank was robbed of \$67 million.

We are co-operating with the Irish police in their investigation.

We are very relieved no staff or customers were physically harmed in the robbery.

Importantly, the sale process is not materially affected.

The sale of the Irish banks will allow us to focus on consolidating our Clydesdale and Yorkshire banks.

These banks will be an important part of our future growth plans together with the rollout of integrated financial services in the South of England.

(Pause)

Late in 2004 we celebrated the opening of our Australian offices at Docklands in Melbourne.

Docklands symbolises the new open culture in the National.

It is a magnificent new building and allows us to bring together our CBD-based wealth management and banking staff in Melbourne.

Integration of our banking and wealth management operations is an integral part of our change program and will facilitate improved service to customers in future.

[Pause]

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

In 2004, for the first time, we produced an externally audited, stand alone Corporate Social Responsibility Report which benchmarks economic, social and environmental performance against internationally recognised standards.

This is part of our commitment to corporate social responsibility and to open communication.

As part of the overall community programs, the National donated \$1.1 million to the Tsunami relief effort.

A large number of staff also participated in fund raising activities by volunteering to work in our call centre to assist with the televised appeal or by assisting in the collection of donations through our branch network.

To date a total of more than \$20 million has been raised via these efforts, including our own donation and those of our customers, shareholders and staff.

[Pause]

We also announced that we will sponsor the 2006 Commonwealth Games to be held in Melbourne that will attract athletes and sports fans from all the regions in which we operate.

Staff, customers and the communities we serve will all have an opportunity to share in this exciting sponsorship through a range of activities which will be outlined over the coming year.

We have deliberately linked the Commonwealth Games journey to our business turnaround, to highlight our commitment to excellence.

(Pause)

Outlook

So what lies ahead for the National?

Global economic conditions improved significantly in 2004 with a strong pick up in the United States and Asia.

Business conditions in Australia, New Zealand and the United Kingdom, the

countries in which we have the bulk of our assets, continued to do better than other industrialised economies.

This was primarily driven by the on-going strength in household spending.

Business investment spending was also quite strong in these regions.

The global outlook is for some moderation in economic growth during this financial year, resulting from higher interest rates especially in the United States and, to a lesser extent, increased oil prices.

In Australia, some moderation in household spending should be offset by gains in exports.

In New Zealand, tighter monetary conditions and slower immigration is expected to be reflected in slower growth.

In the United Kingdom, moderation in growth is also likely to result from increased interest rates.

Overall, we expect economic conditions to be similar to, or a touch weaker than in recent years, and our focus will be on the priorities John Stewart has just outlined.

Now let me turn to the performance of the National in the 2005 year.

Late last year we advised the market that we expected performance to bottom in the first half of 2005, and return to an acceptable growth profile over the second half of 2005 and into 2006.

In the first few months of this year, our results indicate that initial work to improve our products and services is showing encouraging signs, but it is early in the recovery phase and there is still work to be done.

However, I can confirm that we are on track in the recovery program, to the timetable we previously advised.

We expect the dividend to be maintained in the first half of this year. Beyond that, the Board is well aware of the importance shareholders attach to the dividend policy.

I would now like to thank John Stewart, my Board colleagues and staff for their efforts during a very difficult year and our customers for their continuing support.

It is much appreciated.

Let me conclude by saying that your Board believes that it has initiated a number of major changes which provide the framework for rebuilding the National to be the premier financial services organisation in Australia.

[Pause]

That completes my formal comments on the National's performance.

[Pause]

In preparation for this meeting, we invited shareholders to send in questions they would like addressed at the meeting today.

The questions sent in have been collated and there were several areas of common interest.

Some of these deal with Director and Executive remuneration issues.

The Notice of Annual General Meeting includes for the first time, an address by the Chairman of the Human Resources Committee, which will cover many of the questions raised in advance of the meeting.

Geoff Tomlinson assumed the role of Chairman of the Committee in August.

As part of the review of Board and Board Committee structures and processes, the Board asked the Human Resources Committee to review the Remuneration Strategy, with the objective of maximising the alignment of the interests of shareholders and executives.

In addition, given the major management changes in the past year, the Board asked the committee to review in detail, succession planning processes and broadened the role of the committee to include issues other than remuneration.

I will now hand over to Mr Tomlinson.

end

(MR TOMLINSON)

Thank you Graham.

The HR Committee, as mentioned by Graham, has undergone significant change over the last year.

I was appointed Chairman in August 2004.

Besides myself, the new Committee members include:

- Mr John Thorn, appointed a NAB Director in 2003; and

- Ms Jillian Seagal, appointed a NAB Director in 2004.

These fresh faces have brought a new perspective to our deliberations.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

The Board of NAB decided to broaden the HR Committee's scope from just compensation-related matters to general people and employee matters.

It is important to note that the committee continually reviews and improves the policies and programs that fall within this scope.

It was decided that widening the scope of the Committee in this way would increase the quality and depth of the subsequent Board discussions.

The changes included such things as a review of the succession planning for senior executives and the monitoring of employee behaviours.

In other words, how things are done at the National.

We also decided to increase our level of disclosure about remuneration policies and practices.

I believe the details of our remuneration policies in the Concise Annual Report show that we are being open and transparent with shareholders.

This allows you to better understand what we do and why we do it.

I would like to talk a little about some of these issues.

Annual remuneration review

The Human Resource Committee annually reviews the National's remuneration policies and practices.

The 2004 review was extensive and updated Performance and Reward practices across the National.

As a result of the review, the Committee initiated three major improvements to the performance management framework.

The first thing we did was to clearly define what top performance looks like.

The second thing we did was to introduce a peer review or round table process that compares the performance of individuals against the performance of others in the same business unit, and between business units.

The peer review ensures that employee performance is evaluated consistently across the Group.

It will provide the best remuneration outcomes for employees with the best performance and potential, ensuring greater alignment with shareholder interests.

The peer review also identifies those employees who require development

and those who are poor performers.

The third thing we did was to introduce quality gates for every employee, starting with management this year, 2005, and all other employees next year, 2006.

The quality gates are basic measures of compliance and behaviours that reflect the National's new Corporate Principles introduced in August 2004.

The gates align an individual's principles and behaviours to the National's promise to shareholders of how we will behave.

The bottom line is that if an individual fails either a compliance or a behaviour gate, they will not be eligible for any incentives, and they must undergo remedial training.

The Committee also conducted a review of both the annual bonus, or Short-Term Incentive, and the Long-Term Incentive programs.

Short Term Incentive

In recent years, the pool of money from which annual bonuses or Short Term Incentives are paid has primarily been determined by growth in Economic Value Added, or EVA[®].

In simple terms, this has meant that employees were rewarded with a bigger cash bonus if the economic value of the company increased above a target level.

In practice, this has been a complex calculation that few employees or shareholders have fully understood.

As a result, we have decided to include a performance measure that employees and shareholders better understand - Earnings Per Share or EPS.

Under the new system, the overall pool of money that bonuses will be paid from will be calculated on a combination of EPS and EVA.

Seventy per cent of the bonus pool will now be based on our EPS performance and 30% remains based on EVA.

We consider this more clearly aligns annual cash bonuses with shareholder value.

I would like to emphasise that we will continue to review this calculation in future years.

For less senior employees, individual and local business unit performance is taken into account in calculating annual bonuses.

As a result, only the most outstanding performers - those who are performing well above target levels - will receive above average bonuses.

Also, wherever possible, employees who are performing above target - whether that is due to company performance or individual performance - will receive a component of their short term incentive in National shares rather than in cash.

Employees will generally not be able to trade those shares for at least a year, but will then have access to them provided that they pass the quality gates on compliance and behaviours in the following year.

We have also decided that the Managing Director and the two other Executive Directors will receive at least half of any short-term incentive payment in the form of National shares, which of course is subject to shareholder approval.

The Committee believes this will help to:

instil an appropriate focus on National performance beyond the current year

make certain that quality gates are consistently achieved, and

encourage a suitable level of shareholding by executives.

Long Term Incentive

The Committee also reviewed the long-term incentive program and how we reward employees who positively contribute to the National s performance capability.

We sought advice from external experts in the field and considered best practice in both the Australian and international markets to ensure we had the right approach.

The main purpose of long-term incentives is to foster and appropriately reward talented employees for their long-term contribution to the National s growth.

In the past, individual allocations have involved a significant amount of discretion by management.

We now have an Executive Talent Review process that provides a more consistent, transparent and objective basis for determining these rewards.

This Executive Talent Review now identifies and tracks high performance individuals, and is becoming an essential element of employee engagement and the motivation of our top talent.

The Executive Talent Review assesses individual executives against a matrix of: business outcomes, leadership behaviours, and potential capability.

The Committee will now review the talent and succession plans for the top two levels of management twice a year.

Long-term incentive rewards may be provided in the form of National shares (subject to various restrictions), or performance options and performance rights, or a combination of these.

Performance options and performance rights are rights to acquire National shares, if and when specified time and performance hurdles are achieved.

Performance rights were introduced in 2003, and have since become a desirable way to reward performance while limiting the number of securities issued as remuneration.

Shares issued as a long-term incentive are held in trust until various time and/or performance criteria are achieved.

The performance hurdles ensure that executive rewards are linked directly to the Total Shareholder Return of the National and are, therefore, aligned to the outcomes experienced by other shareholders over a specified timeframe.

Performance rights also allow for continued motivation of employees in times when the National outperforms its peers, but for reasons not related to performance, the share price may be low.

This year the Committee also decided to limit the maximum life of the performance options and performance rights.

Options and rights granted earlier this year had a maximum life of eight years, but from September 2004 this has been reduced to five years, with only two years for the National to achieve the performance hurdle, particularly compared with its competitors.

The Committee has also decided to tighten several aspects of the performance hurdle.

Comparative performance against fifty of the top ASX companies, which has been the only peer group for previous grants, will now determine vesting of only half of the performance options and performance rights.

The remaining half will vest based on comparative performance against the top ASX financial services companies.

The performance hurdle also now requires a sustained period of performance in the top half of each of the peer groups, with no vesting at all below the 51st percentiles.

The Committee has also reviewed and tightened the conditions under which

executives may be allowed to retain some or all performance options and performance rights (subject to the performance hurdle) when they cease employment with the Group.

Retention will generally only be considered in cases such as contract completion, redundancy, retirement, or due to death or total and permanent disablement.

We strongly believe that these changes to the National's remuneration policy are in line with the universally-accepted philosophy of pay for performance, and we will continue to review, and where necessary revise the policy to ensure it remains relevant.

Senior Executive Appointments

During the year, the National appointed two new Executive Directors:

Mr Ahmed Fahour, the Chief Executive Officer of Australia, and Mr Michael Ullmer, the Group Chief Financial Officer.

The day the appointments were announced, the National made a full and detailed disclosure on the contract terms and conditions of both executives, which was above the required disclosure standards at the time.

Given the extensive media coverage of Mr Fahour's contract, I would like to talk a little more about the process undertaken by the National that led to his appointment.

Attracting an executive from the world's largest financial institution, and a company that pays salaries in US dollars, meant that we had to consider the elements of a global reward strategy.

However, we were determined to ensure that any reward arrangements were broadly consistent with those prevailing in the Australian financial services sector.

Mr Fahour has the job of bringing together our three main businesses in Australia and substantially improving their performance.

These businesses include our retail banking operations, our Wealth Management and parts of the previous Corporate and Institutional Bank.

When combined, these businesses are similar in size to an Australian Top 10 company with:

annual revenue of approximately \$9 billion

assets managed exceeding \$250 billion; and

a net operating profit of approximately \$2.6 billion

[excluding significant items].

These numbers are similar to, and in the case of revenue, exceed those of the ANZ Group and Westpac Banking Corporation.

It is the normal practice of the Committee to take account of external and internal advice in relation to remuneration matters and forms an opinion about the quantum and composition of remuneration that is appropriate.

Mr Fahour's remuneration package has two distinct components - one-off and ongoing .

One-off

The first component of his remuneration package includes one-off payments to buy-out his previous contract.

These payments included:

a payment for bonuses foregone from his previous employer when he accepted his role at the National

National equity to replace the equity from his previous employer which was forgone by Mr Fahour on joining the National, and

relocation costs.

The compensation of executives for benefits forgone on resigning from a previous employer is an accepted practice, both in Australia and overseas.

The amounts paid to Mr Fahour were \$3.86 million for the bonus forgone from his previous employer, relocation benefits of \$435,000 and an allocation of National equity.

The allocation of equity is in three types:

160,000 performance options and 40,000 performance rights which had a financial value at grant of approximately \$1.455 million.

These performance options and rights are subject to the Total Shareholder Return hurdle;

\$2 million in restricted shares that vest progressively over the four-year life of Mr Fahour's contract; and

\$6 million in restricted shares that vest at the end of the contract.

For Mr Fahour to receive 100 per cent of the value of the total equity granted, the National would need to have a top quartile Total Shareholder Return over the vesting period of the performance options and performance rights.

The terms outlined above are more stringent than the original terms of the equity forgone by Mr Fahour.

That is, the equity previously held by Mr Fahour had no performance hurdles attached and had a greater value than that offered by the National.

Ongoing

Mr Fahour's ongoing annual remuneration is determined based on global salary levels in the banking industry and local conditions.

These were the two key factors in setting Mr Fahour's ongoing remuneration.

In this case, Mr Fahour worked for the world's largest financial institution

and has had a very successful career.

Taking this into account, his annual remuneration is based on three components:

1. \$1.5 million fixed salary,
2. an incentive target of 130 per cent of fixed salary or \$1.95 million, of which 50 per cent must be retained in National shares, and
3. an annual grant of performance options and performance rights of up to \$1.7 million per annum.

Any grant of equity in relation to Mr Fahour's ongoing remuneration is, of course, subject to shareholders' approval, and any recommended grant will be taken to the next AGM for approval.

I would like to point out that this annual remuneration package is significantly less than what Mr Fahour was earning at his previous employer.

It is also important to note that Mr Fahour's ongoing remuneration package is highly aligned to shareholder interests.

That is, more than half of his total remuneration is delivered in shares and, to further strengthen this, to achieve 100% of the long-term incentive, the National's performance must exceed the top quartile of total shareholder return performance of our peers.

(PAUSE)

We believe that this package was necessary to attract top talent such as Mr Fahour to run our businesses in Australia.

Most importantly, Mr Fahour will only get the rewards offered in this package, if he performs, and shareholders benefit.

(PAUSE)

It is important to remember that only Executive Directors receive Short and Long Term Incentive payments.

Non-Executive Directors, including the Chairman, only receive fees, a percentage of which are to be taken as National shares.

No retirement allowances are paid as they were discontinued following shareholder approval at the last AGM.

(PAUSE)

I would now like to hand back to the Chairman.

Thank you.

end

(MR KRAEHE)

Thank you Geoff.

As you can see, the HR Committee has been very busy.

We now move to the formal part of the meeting.

I remind those present today that this is a shareholders meeting.

Accordingly, only shareholders, attorneys and authorised representatives of shareholders, and proxy holders may raise questions and vote on the business before the meeting.

When you registered you were given a card.

Shareholders, proxy holders, attorneys and corporate representatives have

white cards.

In relation to joint shareholdings, only one shareholder may vote and the second and subsequent joint shareholders received non-voting green cards.

Shareholders with a green card may, if you wish, raise questions.

Visitors have yellow cards and are welcome at the meeting, but are not entitled to raise questions or to vote.

This will leave more time for the shareholders.

I now turn to the formal Reports.

The Australian Corporations Act requires the Annual Financial Report, the Report of the Directors and the Auditor's Report to be considered at the Annual General Meeting.

The Act does not require a vote of shareholders on this matter, but you will be given ample opportunity to raise questions and to comment on the Reports.

Shareholders may also address questions through the Chairman to the Auditor on the conduct of the audit and the preparation and contents of the Audit Report.

Brian Greig of KPMG will be available in this regard.

Shareholders holding white or green cards and wishing to raise a question or make a comment are asked to move to the seats immediately adjacent to one of the microphones.

Please give your name to the attendant who will introduce you to the meeting.

We ask that you be reasonably brief.

This will allow as many shareholders as possible an opportunity to raise questions.

After answering your question, I will move on to another shareholder.

If you have a further question on another matter I will try to return to you later.

As I mentioned earlier, we invited shareholders to submit questions in advance of the meeting.

Whilst shareholders here today are moving to the microphones, I will address some of the more frequently asked questions raised by shareholders.

There were some questions concerning the payment of bonuses to Directors.

As Geoff Tomlinson advised earlier, Non-Executive Directors do not receive any bonuses.

Other questions related to the bonus of the CEO.

2004 was an unusual year with the CEO joined half way during the financial year.

We therefore decided to place a lower than usual weighting on the financial performance, which was already largely locked in, and a higher weighting on risk management, organisational change, cultural change and the European strategy.

John performed extremely well on these non-financial measures which explains why he received 76% of his possible bonus.

A low rating on financial measures reflected the company's financial performance.

(Pause)

There have been a number of questions concerning the Board dispute and the FX issues.

The first group of questions were around the theme

why did the other directors call a General Meeting to remove a director?

These are matters that received wide exposure in the press, and the Board was very open about its reasons for calling an Extraordinary General Meeting at the time.

These meetings were called because all of the other directors had lost confidence and trust in one of the directors, as a consequence of conduct in respect of the PwC report, and their lack of confidence that the director would act within agreed Board processes.

A Shareholder s Meeting is the only way to resolve a situation where a Board is at an impasse about its own membership.

With Mrs Walter s resignation and the cancellation of the EGM, the Board was able to focus on rebuilding shareholder value.

(Pause)

A second group of questions was around the theme was there any validity in the criticisms of the PwC report?

The PwC report comprehensively examined the events which gave rise to the foreign currency options trading losses.

The Board believed that the PwC report was professional, thorough and credible, and that it was entitled to rely on the report.

The other non-executive directors carefully considered each of the criticisms of the report by Mrs Walter.

They disagreed with them.

Blake Dawson and Waldron were hired as probity consultants.

Their probity opinions concluded that the PwC report was impartial and unbiased.

APRA conducted its own independent investigation and delivered its report to the Board. APRA's findings were similar to, and consistent with, those contained in the PwC report.

It should also be pointed out that none of the present or previous members of the Board nor indeed anyone else has questioned the principle conclusions of these reports.

(Pause)

A number of people questioned whether the Board has considered action against 3rd parties to seek to recover losses.

The Board has given active consideration as to whether legal proceedings should be instigated by the National against any 3rd party to recover damages.

At this stage, we have not taken any action against 3rd parties. It is not currently contemplated that there be any proceedings against PwC. If it is considered to be in the best interests of the National and its shareholders to commence proceedings against 3rd parties, that will be done.

(Pause)

A number of people asked - Did the Board or its committees have information which should have enabled them to avert the foreign currency losses?

The answer is in that the PwC report which concluded that neither the Board nor any of its committees had specific information which might have enabled earlier action, but that that the Board shared responsibility for a culture which allowed the transgressions to take place.

One shareholder has asked specifically whether a letter from APRA to the then Executive General Manager, Risk, dated November 2003 which pointed to some aspects of this problem, was passed to the Board Risk Committee.

The answer is that this letter was not shown to the Risk Committee or the

Board until the after the currency losses had been discovered and made public.

As a concluding comment about the Board and the FX issues, I think that the completeness and openness of this investigation and the extent of the measures taken in response are probably without precedent for an organisation which is, after all, still very profitable and very sound financially. There comes a time when analysis of the past should be drawn to a close and we should concentrate on the future. I believe that this time has come.

[Pause]

There were a number of questions about Outsourcing of the Share Registry.

Until recently, the National was the only major listed company in Australia to maintain an in-house Share Registry.

The decision to outsource was in no way a reflection on the staff involved.

The Registry staff worked very diligently for the shareholders of the National and the majority have transferred to Computershare.

However, if we were to continue with the Registry in-house, it would have involved further investment in systems and it was considered to be in the best interest of shareholders, for those investment dollars to be spent on the core business.

We will closely monitor the service standards provided by Computershare to ensure that shareholders of the National continue to receive a high standard of service.

(Pause)

Other frequently asked questions related to the composition of the Board, the performance of the company, the FX losses and dividends, which I think have been covered, either in my address or the CEO.

Shareholders who have raised more frequently asked questions in this way and who are unable to be present at the meeting here today, have been able to hear the response to their question over the internet webcast, or be able to read it on the National's website.

[Pause]

I now turn to questions from the floor.

I ask shareholders if you could be brief in raising your questions in order to give as many as possible the opportunity to raise questions.

You will appreciate that this is not an appropriate forum for shareholders to raise personal issues.

Some shareholders have raised personal issues in the past, and although the matter may be important to you, it may not be relevant to the meeting as a whole.

You will also appreciate that I am bound by the confidential nature of the relationship between the bank and its customers not to go into any details concerning individual banking relationships.

If any shareholder who is also a customer, wishes to raise any such matters, we have established a Customer Desk in the foyer and experienced staff will be available after the meeting to help.

We have also established a Shareholder Desk and experienced staff will be available at that desk to help you with any personal matters after the meeting.

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I declare that the Reports have been considered at the meeting.

In accordance with the Notice of Meeting, I now move to the re-election and election of Directors.

The Company's Constitution provides that one third of the Directors must retire at each Annual General Meeting.

This number excludes the Managing Director and new Directors appointed since the last Annual General Meeting.

The new Directors must stand for election regardless of the one third requirement.

This year, one Director, being myself, retires at this meeting in accordance with the Company's Constitution, and being eligible, I offer myself for re-election.

I have agreed to stand down in September this year as part of the Board Renewal Program, but under the Constitution, I must stand for re-election today.

By September, I will have completed my commitment to the renewal of the Board and this timing will provide for a smooth transition to Michael Chaney, if shareholders elect Mr Chaney today.

You will recall that he is currently serving in a chief executive role and needs this time to complete his current commitments and an orderly transition.

As I have a direct interest in this resolution, I stand aside as Chairman of the Meeting for this item of business, and ask an independent Director who has been closely involved in the Board Renewal Program to chair this segment of the meeting.

Accordingly, I will invite Peter Duncan to act as Chairman for this item of business.

end

(MR DUNCAN)

Thank you Graham.

The item of business now before the meeting is to consider the re-election of Mr Graham Kraehe as a Director of the Company.

The Board undertook an evaluation of the performance of Graham Kraehe and based on the results of that evaluation, the Board unanimously recommend that shareholders vote in favour of Mr Kraehe's re-election.

Graham has led the Board Renewal Program and many other major change programs within the National since his appointment as Chairman in February last year.

He has done this with distinction and having regard to the highest standards of Corporate Governance.

He has achieved all of the objectives set for him as Chairman and, in our opinion, it would be in the best interests of the National for Graham Kraehe to be re-elected.

Shareholders with white cards or green cards may raise questions.

Any shareholder wishing to raise a question or comment is asked to move to the seats immediately adjacent to one of the microphones.

Please give your name to the attendant who will introduce you to the meeting.

Are there any questions or comments shareholders may wish to raise?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I will now move to the formal election process.

I should remind those present here today that as this is a shareholders meeting, only shareholders, proxy holders, and authorised representatives and attorneys of shareholders may vote on any motion before the meeting.

That is, the shareholders holding white cards.

I formally put the motion:

That Mr Kraehe be re-elected as a Director of the Company.

The votes cast in advance of the meeting by shareholders returning their Proxy Forms appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders present at the meeting today who are in favour of the resolution, please raise your white cards.

Thank you.

Would all shareholders voting against the motion please raise your white card.

(PAUSE)

The votes cast by the shareholders here today and by the shareholders who could not attend the meeting in person, give a clear indication of the will of the shareholders.

Accordingly, I declare the resolution carried.

[If vote lost on a show of hands - see separate script to call a poll]

(PAUSE)

Thank you, I will now hand the Chairmanship of the meeting back to Mr Kraehe.

end

(MR KRAEHE)

Thank you Peter.

I would also like to thank all of those shareholders who voted in favour of this resolution.

Your support is appreciated.

We now move to the election of the new Directors who were appointed since the last AGM.

They have been previously introduced.

Details of their qualifications, careers, experience and other involvements are set out in the Notice of Meeting and in the Annual Report.

I will invite each of the Directors standing for election to address the meeting.

This process will take a little time, but I thought it important for shareholders to hear from the people you're being asked to vote for.

I hope you will find this process useful.

The first Director is Michael Chaney.

Michael, would you care to say a few words?

(MR CHANEY)

(MR KRAEHE)

Thank you Michael.

Are there any questions or comments shareholders may wish to raise?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Chaney be elected as a Director of the Company.

The votes cast in advance of the meeting by shareholders returning their Proxy Forms appear on the screen now.

It would be my intention to vote all undirected proxies in favour of the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Would all shareholders voting against the motion please raise your white card.

Thank you.

I declare the resolution carried.

(PAUSE)

Next is Robert Elstone.

Robert, would you care to say a few words?

(MR ELSTONE)

(MR KRAEHE)

Thank you Robert.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Elstone be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Would all shareholders voting against the motion please raise your white card.

I declare the resolution carried

(PAUSE)

Next is Ahmed Fahour.

Ahmed, would you care to address the meeting?

(MR FAHOUR)

(MR KRAEHE)

Thank you Ahmed.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Fahour be elected as a Director of the Company.

The votes cast in advance of the meeting by shareholders appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Would all shareholders voting against the motion please raise your white card.

I declare the resolution carried

(PAUSE)

Next is Danny Gilbert.

Danny, would you care to say a few words?

(MR GILBERT)

(MR KRAEHE)

Thank you Danny.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Gilbert be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

(PAUSE)

Next we have

Paul Rizzo.

Paul, would you care to address the meeting?

(MR RIZZO)

(MR KRAEHE)

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Rizzo be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the

Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

(PAUSE)

Next is

Jillian Segal.

Jillian, would you care to address the meeting?

(MS SEGAL)

(MR KRAEHE)

Are there any questions or comments from shareholders?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Ms Segal

be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried.

(PAUSE)

The next item of business is to consider the election of Michael Ullmer.

Michael, would you care to say a few words?

(MR ULLMER)

(MR KRAEHE)

Thank you Michael.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Ullmer be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

(PAUSE)

Next is Malcolm Williamson.

Malcolm, would you care to say a few words?

(MR WILLIAMSON)

(MR KRAEHE)

Thank you Malcolm.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion:

That Mr Williamson be elected as a Director of the Company.

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

(PAUSE)

The next item of business is item number 4 on the Notice of Annual General Meeting.

This is a resolution proposed by 179 shareholders acting through the Australian Shareholders Association.

A copy of a statement by the Shareholders Association was included with the Notice of Meeting.

We now invite the representative from the Shareholders Association to address the meeting.

(STATEMENT BY REP. OF ASA)

[MR KRAEHE]

Thank you . [John].

The Board supports the general principle that directors must have the time to contribute to the company and to properly perform their duties.

However, we believe that the ASA has adopted the wrong method to assess if a director has sufficient time to perform his or her duties.

This cannot be assessed from outside the Board using a formula which applies the same weighting for all companies, regardless of whether one company is large and complex, and another company is small and relatively straight forward.

The ASA s method also fails to take into account the valuable contribution a director makes from his experience on other boards.

The appropriate method to assess if a director has sufficient time to perform his or her duties, is for the Board itself to undertake a review of the individual s performance.

[Pause]

In relation to the resolution before the shareholders today, the Board undertook a review of Mr Tomlinson s performance before determining its recommendation to shareholders.

The Board review considered his knowledge of the business, his attendance record at Board Meetings, how well he is prepared for meetings, and his overall contribution.

On the basis of that performance review, the Board unanimously agreed to recommend to shareholders that you vote against the resolution.

I can assure shareholders that Mr Tomlinson is most diligent in the performance of his duties.

He is always well prepared and I would draw your attention to pages 55 and 56 of the Concise Annual Report for details of the number of formal meetings attended by Mr Tomlinson during the year under review.

If you add up the number of scheduled and unscheduled Board Meetings, the number of Committee Meetings and the number of Subsidiary Company Meetings, Mr Tomlinson attended 77 formal meetings.

In addition to his other duties, he recently took on the role of Chairman of the Human Resources Committee.

He would not have taken on this additional role if he did not have the time and capacity to do so.

I should also point out that he has in-depth experience in funds management, having been the CEO of the National Mutual Group, now AXA Asia Pacific.

His skills are particularly relevant and his role as Chairman of our wholly owned subsidiary National Wealth Management Holdings Limited, which includes MLC, is valued by the Board.

In addition, with such a relatively new Board, Mr Tomlinson's broad experience and his corporate memory are particularly important to the National at this time.

It is the strong view of the Board that if this resolution was passed, it would be detrimental to interests of shareholders.

Are there any questions or comments from shareholders?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion -

That the resolution set out in the Notice of Meeting as item number 4 under the heading - Resolution from shareholders, be considered as an ordinary resolution .

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, against the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution lost

[If vote passed on a show of hands - see separate script to call a poll]

(PAUSE)

The next item of business is item number 5, the appointment of the Auditor.

Details of the resolution are set out in the Notice of Meeting.

I confirm that ASIC has given its consent to the resignation of KPMG as Auditor of the National at this AGM, and that KPMG have tendered their resignation.

Ernst & Young have consented to act as Auditor.

Last year, we announced that we intended to change the external auditor.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

KPMG has been the National's external auditor for many years, and the decision was made to seek a new external auditor as part of the National's change program.

KPMG's replacement does not in any way call into question the quality of their audit, and KPMG has signed the accounts for 2004 without qualification.

I thank KPMG for their services to the National over many years.

Are there any questions or comments from shareholders?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I formally put the motion

That the resolution set out in the Notice of Meeting under item 5 - Appointment of Auditor, be passed as an ordinary resolution .

The votes cast in advance of the meeting appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution.

Would all shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

(PAUSE)

The next item of business is Item 6 - the share, performance option and performance rights for the Managing Director & Chief Executive Officer, John Stewart.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

Shareholder approval is required to grant shares, performance options and performance rights to John Stewart because he is a Director.

The resolution is described in the Notice of Meeting and was covered in some detail when we addressed the issue of executive remuneration earlier in the meeting.

We were very fortunate in being able to secure the services of John Stewart, a highly experienced United Kingdom banker with an impressive

track record.

What you are being asked to vote on today is an important part of the at risk element of his remuneration.

If he is successful, he will generate significant benefits for all shareholders.

If he is not successful, then the resolution that you are being asked to consider now, will provide him with no financial benefit.

Are there any questions or comments that have not already been raised, or already addressed?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I should point out that there is a voting exclusion in relation to this resolution.

The National must disregard any vote cast on resolution 6 by any Director of the National or any of their associates.

Accordingly, I ask Directors not to vote on this resolution.

I now formally put the motion:

That the resolution set out as item number 6 in the Notice of Annual General Meeting under the heading Shares, Performance Options and Performance Rights - Managing Director & Chief Executive Officer be passed as an ordinary resolution

The votes cast in advance of the meeting appear on the screen now.

Edgar Filing: NATIONAL AUSTRALIA BANK LTD - Form 6-K

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in favour of the resolution, if shareholders have marked the box appearing on the Proxy Form for this purpose.

If shareholders have given undirected proxies to the Chairman of the Meeting and not marked what has become known as the ASX box, such undirected proxies will be voted as abstain.

All shareholders in favour please raise your white cards.

Against.

I declare the resolution carried

[If vote lost on a show of hands - see separate script to call a poll]

(PAUSE)

The final item of business for today is item number 7 under the heading National Income Securities.

The resolution seeks the approval of shareholders for the buy-back of 20 million unpaid preference shares which form part of the National Income Securities.

The resolution is described in more detail in the Notice of Meeting, including the advantages and disadvantages of approving the proposed buy-back scheme.

If the resolution is passed, we will have the flexibility to replace the National Income Securities where we consider, we can replace them with a more efficient and cost effective source of funds.

No decision to replace the National Income Securities has been taken at this time.

Are there any questions or comments?

(PAUSE)

(QUESTIONS FROM THE FLOOR)

If there are no further questions, I should point out that there is a voting exclusion in relation to this resolution.

The National must disregard any vote cast on resolution 7 by any person who holds Preference Shares associated with the National Income Securities and whose Preference Shares may be bought back.

This voting exclusion also extends to associates of holders of National Income Securities.

I now formally put the motion:

That the resolution set out as item number 7 in the Notice of Annual General Meeting under the heading National Income Securities be passed as a special resolution

If you hold National Income Securities, or you are associated with a person or company that holds National Income Securities, I must ask you not to vote on this resolution.

The votes cast in advance of the meeting, excluding those votes which must be disregarded under the voting exclusion provisions, appear on the screen now.

It would be my intention to vote all undirected proxies granted to the Chairman of the Meeting, in accordance with the recommendation of the Board.

I hold National Income Securities and I did not take part in the Board's recommendation.

In addition, I will not vote personally on this resolution.

All shareholders in favour of the resolution, please raise your white cards.

Against.

I believe that we have well in excess of the 75% majority required to pass the resolution and accordingly I declare the resolution passed as a special resolution.

[If vote lost on a show of hands - see separate script to call a poll]

(PAUSE)

That now covers all of the business before the Annual General Meeting.

On behalf of the Directors and staff members of the National Australia Bank Group, I thank you for your attendance here today.

Your continued support of the Company is valued by your Directors and the staff.

Before closing, I would again like to thank John Stewart and all of the National staff around the world for their tireless efforts during a very difficult year in 2004.

I would also like to thank those shareholders who have taken an interest in the meeting via the internet broadcast.

I hope that you found it interesting, convenient and informative.

If you have not visited other sections of our internet sites, I encourage you to do so.

We now close our internet transmission.

Finally, I would like to thank all shareholders who took the time and effort to be here in person today.

It has been a difficult year, but we have initiated a number of major changes which provide a framework for rebuilding the National to be the premier financial services organisation in Australia.

I invite you to remain for refreshments which are to be served in the foyer and to take the opportunity to meet directors and senior management.

I now formally declare this Annual General Meeting closed.

end

31 January 2005
