**Wimm-Bill-Dann Continues to Invest in Modernizing
Ukrainian Production Base**

Press Release

Moscow, Russia February 25, 2005 Wimm-Bill-Dann Foods OJSC (NYSE: WBD) today announced that it completed the latest stage of the modernization at one of the largest Ukrainian milk processing plant, Kiev City Dairy Plant No. 3. As a result, a new dietetic products line and compressor station have been put into operation. The Company's total investments in this project amounted to approximately US\$2.7 million.

The new dietetic products line with a total area of 720 square meters, equipped with machines produced by MLEKOMAT Company (Poland), has been put into operation in the plant's whole milk department. The equipment consists of:

Pasteurization-cooling unit with deodorizer and homogenizer (production capacity 10 thousand liters per hour);

Group of normalization tanks (total capacity 36 thousand liters);

Group of fermentation tanks (total capacity 100 thousand liters);

Centralized cleaning station;

Packaging collector .

The modernization will allow the Company to improve product quality, increase the shelf life of products and enhance production volumes of pasteurized milk, kefir, ryazhenka, drinkable yogurts and cream. In addition, the production of new juice and milk products will be established at the plant. The cost of the project totalled over US\$ 1.3 million.

The installation of this modern, high-tech equipment opens up new possibilities for enhancing product quality and assimilating new technology, Tamara Homyschenko, the plant's Chief Technologist, said. In particular, the new system for product cooling after ripening allows fast cooling of natural fermented dairy products, which means their organoleptic indicators can be preserved for up to 14 days as

well as the improvement of microbiological characteristics.

The new compressor station has a total area of 216 square meters and is equipped with machines produced by York Refrigeration (Denmark). This equipment will enable significant reductions in energy costs, as well as provide additional capacity for the storage of dairy products. The investment in the project amounted to more than US\$1.38 million.

These investments were undertaken as part of a Company-wide program to modernize Wimm-Bill-Dann's production base. This program aims to meet consumer demand and enhance operating efficiencies through the introduction of leading-edge technology to the manufacturing of dairy products to meet world quality standards.
