Public Company

PRESS RELEASE

Highlights of 2002, 3rd Quarter Results

(Rio de Janeiro, November 7, 2002) PETRÓLEO BRASILEIRO S.A. PETROBRAS, [BOVESPA: PETR3/PETR4, NYSE: PBR/PBRA, LATIBEX: XPBR/XPBRA], Brazil's biggest oil & gas, petrochemicals and energy company announces to the following is information concerning the financial statements for 3rd quarter 2002, according to generally accepted Brazilian accounting principles.

financing (1)Includes the indebtedness of Special Purpose Companies, which PETROBRAS has used to obtain on a project finance basis.

The 13% increase in crude oil and NGL production in relation to the same period of 2001, considerably higher than the industry average, was the highlight of the 3rd quarter 2002. This allowed export volumes of oil and oil derivatives to increase by 59% in relation to those of the same period last year.

This performance had a positive impact on net operating revenue, and gross profit, compensating partly for the effects of the Real devaluation in relation to the US Dollar.

In spite of the strong growth of net operating revenues and gross profit, there was a reduction in operating profit as a result of higher indirect taxes and administrative expenses, and non-reimbursable expenses with contractual contingencies related to thermal-electric plant consortia.

Net income reached R\$2,368 million, 45% higher than that of the 3rd Quarter 2001, pushed by the effect of currency devaluation on investments in foreign subsidiaries and by the positive tax effect of the provision for payment of interest on own capital.

Net debt on September 30 reached R\$28,730 million, an increase of 50% in relation to the amount as of June 30, principally as a result of the devaluation of the currency in comparison to the US dollar (37%).

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
