**1. BASIS OF PRESENTATION**

The interim period financial statements have been prepared by the Company in conformity with generally accepted accounting principles in the United States of America. The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, and in the opinion of management these financial statements contain all adjustments necessary (consisting of normally recurring adjustments) to present fairly the financial information contained therein. Certain information and footnote disclosure normally included in the financial statements prepared in conformity with generally accepted accounting principles in the United States of America have been condensed or omitted. These interim period statements should be read together with the audited financial statements and the accompanying notes included in the Company's Form 10-KSB for the year ended December 31, 2004. The results of operations for the nine month period ended September 30, 2005 are not necessarily indicative of the results to be expected for the year ending December 31, 2005.

On September 9, 2005, the Registrant elected to begin filing all future periodic reports with the United States Securities and Exchange Commission (SEC) in accordance with the filing requirements and rules of a foreign private issuer. The election was made on the basis that the Registrant is incorporated in Canada and meets the definition of a "foreign private issuer" pursuant to SEC Rule 3b-4. Filings and rules that applied under the Registrant's previous system of filing using forms designated for U.S. domestic issuers, such as annual and quarterly reports under Forms 10-KSB and 10-QSB, and material change reports under Form 8-K will no longer apply to the Registrant.

**2. NATURE OF OPERATIONS**

The Company was incorporated under the laws of the Province of British Columbia and continued under the laws of the Yukon Territory. On May 27, 2005, the Company changed the governing jurisdiction from the Yukon Territory to British Columbia by continuing into British Columbia under the British Columbia *Business Corporation Act*. The Company's principal business activity is the exploration of mineral property interests. Effective October 10, 2002, pursuant to a special resolution passed by the shareholders of the Company, the Company changed its name from Entree Resources Inc. to Entree Gold Inc. and consolidated its share capital on a 2:1 basis (Note 6). In December 2003, the Company changed its fiscal year end from April 30 to December 31. To date, the Company has not generated significant revenues from its operations and is considered to be in the exploration stage.

All amounts are expressed in United States dollars, except for certain per share amounts denoted in Canadian dollars ("C\$").

**3. SIGNIFICANT ACCOUNTING POLICIES**

**Principles of consolidation**

These consolidated financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America and include the accounts of the Company and its wholly-owned Mongolian subsidiary, EntrEe LLC. All inter-company transactions and balances have been eliminated upon consolidation. These consolidated financial statements conform in all material respects with Canadian generally accepted accounting principles ("Canadian GAAP") except as described in Note 12.

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)**

**Asset retirement obligations**

The Company records the fair value of the liability for closure and removal costs associated with the legal obligations upon retirement or removal of any tangible long-lived assets in accordance with Statements of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations". The initial recognition of any liability will be capitalized as part of the asset cost and depreciated over its estimated useful life. To date, the Company has not incurred any asset retirement obligations.

**Escrow shares**

Shares placed in escrow in connection with an initial public offering which are to be released upon achievement of certain performance criteria are considered to be contingently issueable and compensatory in nature. Accordingly, the difference between the fair value of these shares, being the trading price of the Company's publicly traded common shares, at the time they are released from escrow and their original issue price is accounted for as compensation expense in the period of release.

As described in Note 6, certain of the Company's escrow shares were transferred to a Trustee for the benefit of future employees, officers and directors of the Company. As these performance escrow shares are considered compensatory in nature, the Company records a compensation benefit at fair value, being the trading price of the Company's publicly traded common shares, when a portion or all of these performance escrow shares are allocated to specific individuals and adjusts this compensation benefit to fair value at the end of each respective reporting period until the performance escrow shares are released from escrow.

**Stock-based compensation**

Statements of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123") encourages, but does not require, companies to record compensation cost for stock-based employee compensation plans at fair value. Prior to May 1, 2003, the Company chose to account for stock-based compensation, excluding escrow shares, using Accounting Principles Board Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25"). Accordingly, compensation cost for stock options is measured as the excess, if any, of the quoted market price of the Company's stock at the date of the grant over the amount an employee is required to pay for the stock. Effective for the eight month period ended December 31, 2003, the Company adopted Statements of Financial Accounting Standards No. 148, "Accounting for Stock-Based Compensation - Transition and

Disclosure - an amendment of FASB Statement No. 123" whereby the Company voluntary changed to the fair value based method of accounting for stock-based employee compensation on a prospective basis.

The Company accounts for stock-based compensation issued to non-employees in accordance with the provisions of SFAS 123 and the consensus in Emerging Issues Task Force No. 96-18, "Accounting for Equity Instruments that are Issued to Other Than Employees for Acquiring or in Conjunction with Selling, Goods or Services" ("EITF 96-18").

**Foreign currency translation**

The functional currency of the Company and its wholly-owned subsidiary is the Canadian dollar. Accordingly, monetary assets and liabilities denominated in a foreign currency are translated at the exchange rate in effect at the balance sheet date while non-monetary assets and liabilities denominated in a foreign

currency are translated at historical rates. Revenue and expense items denominated in a foreign currency are translated at exchange rates prevailing when such items are recognized in the statement of operations. Exchange gains or losses arising on translation of foreign currency items are included in the statement of operations

The Company follows the current rate method of translation with respect to its presentation of these consolidated financial statements in the reporting currency, being the United States dollar. Accordingly, assets and liabilities are translated into U.S. dollars at the period-end exchange rates while revenue and expenses are translated at the prevailing exchange rates during the period. Related exchange gains and losses are included in a separate component of stockholder's equity as accumulated other comprehensive income.

**Net loss per share**

Basic net loss per share is computed by dividing the net loss for the period attributable to common stockholders by the weighted average number of shares of common stock outstanding during the period. Diluted net loss per share takes into consideration shares of common stock outstanding (computed under basic loss per share) and potentially dilutive shares of common stock. Diluted net loss per share is not presented separately from basic net loss per share as the conversion of outstanding stock options and warrants into common shares would be anti-dilutive. At September 30, 2005, the total number of potentially dilutive shares of common stock excluded from basic net loss per share was 20,876,880 (September 30, 2004 - 15,620,464).

Shares that remain in escrow are excluded from the weighted average number of shares of common stock. The number of shares held in escrow excluded from the weighted average number of shares of common stock was Nil (September 30, 2004 - 3,510,900).

**Recent accounting pronouncements**

In December 2004, FASB issued Statement of Financial Accounting Standards No. 153, "Exchanges of Nonmonetary Assets - an amendment of APB Opinion No. 29" ("SFAS 153") which amends Accounting Principles Board Opinion No. 29, "Accounting for Nonmonetary Transactions" to

eliminate the exception for nonmonetary exchanges of similar productive assets and replaces it with a general exception for exchanges of nonmonetary assets that do not have commercial substance. A nonmonetary exchange has commercial substance if the future cash flows of the entity are expected to change significantly as a result of the exchange. SFAS 153 is effective for nonmonetary asset exchanges occurring in fiscal periods beginning after June 15, 2005.

In December 2004, FASB issued Statement of Financial Accounting Standards No. 123R, "Share Based Payment" ("SFAS 123R"). SFAS 123R supersedes APB 25 and its related implementation guidance by requiring entities to recognize the cost of employee services received in exchange for awards of equity instruments based on the grant-date fair value of those awards (with limited exceptions) and revises SFAS 123 as follows:

**3. SIGNIFICANT ACCOUNTING POLICIES (cont'd)**

**Recent accounting pronouncements (cont'd)**

i. Public entities are required to measure liabilities incurred to employees in share-based payment transactions at fair value and nonpublic entities may elect to measure their liabilities to employees incurred in share-based payment transactions at their intrinsic value whereas under SFAS 123, all share-based payment liabilities were measured at their intrinsic value.

ii. Nonpublic entities are required to calculate fair value using an appropriate industry sector index for the expected volatility of its share price if it is not practicable to estimate the expected volatility of the entity's share price.

iii. Entities are required to estimate the number of instruments for which the requisite service is expected to be rendered as opposed to accounting for forfeitures as they occur.

iv. Incremental compensation cost for a modification of the terms or conditions of an award is measured by comparing the fair value of the modified award with the fair value of the award immediately before the modification whereas SFAS 123 required that the effects of a modification be measured as the difference between the fair value of the modified award at the date it is granted and the award's value immediately before the modification determined based on the shorter of (1) its remaining initially estimated expected life or (2) the expected life of the modified award.

SFAS 123R also clarifies and expands guidance in several areas, including measuring fair value, classifying an award as equity or as a liability and attributing compensation cost to reporting periods. SFAS 123R does not change the accounting guidance for share-based payment transactions with parties other than employees provided in SFAS 123 as originally issued and EITF 96-18. SFAS 123R also does not address the accounting for employee share ownership plans which are subject to Statement of Position 93-6, "Employers' Accounting for Employee Stock Ownership Plans". Public entities (other than those filing as small business issuers) will be required to apply SFAS 123R as of the first annual reporting period that begins after June 15, 2005. Public entities that file as small business issuers will be required to apply SFAS 123R in the first annual reporting period that begins after December 15, 2005. For nonpublic entities, SFAS 123R must be applied as of the beginning of the first annual reporting period beginning after December 15, 2005.

In May 2005, FASB issued Statement of Financial Accounting Standards No. 154 Accounting Changes and Error Corrections - A Replacement of APB Opinion No. 20 and FASB Statement No. 3

("SFAS 154"), which is effective for fiscal years ending after December 15, 2005. SFAS 154 requires that changes in accounting policy be accounted for on a retroactive basis.

The adoption of these new pronouncements are not expected to have a material effect on the Company's consolidated financial position or results of operations.

**5. MINERAL PROPERTY INTERESTS**

Title to mineral property interests involves certain inherent risks due to the difficulties of determining the validity of certain claims as well as the potential for problems arising from the frequently ambiguous conveyancing history characteristic of many mineral property interests. The Company has investigated title to its mineral property interests and, to the best of its knowledge, title to the mineral property interests are in good standing.

Under the terms of an option agreement completed in July, 2002, the Company had the right to acquire up to a 60% interest in three mineral concessions (collectively, the "Lookout Hill Property"), located in southern Mongolia, from Mongol Gazar Co., Ltd. ("Mongol Gazar"), the Mongolian owner. In November 2003, pursuant to an amended purchase agreement which replaced the previous option agreement and all obligations thereunder, the Company acquired from Mongol Gazar a 100% interest in the Lookout Hill Property, free of all royalties. As consideration, the Company paid \$5,500,000, issued 5,000,000 common shares at a value of \$3,806,000 and agreed to pay Mongol Gazar the amount, if any, by which the net proceeds from the sale of the 5,000,000 shares issued to Mongol Gazar in this transaction is less than \$5,000,000 (the "Minimum Price Guarantee").

For the above purchase price, the Company also acquired a 100% interest in a fourth mineral concession (the "Ulziit Uul Property") located in southern Mongolia.

On April 20, 2004, subject to TSX Venture Exchange ("TSX-V") regulatory approval which was received on June 14, 2004, the Company agreed to issue non-transferable warrants to purchase up to 250,000 shares of the Company (issued) at a price of C\$1.05 per share for two years to Mongol Gazar, in satisfaction of the Minimum Price Guarantee previously provided to Mongol Gazar. The fair value of the warrants was estimated to be \$129,266. In addition, Mongol Gazar has agreed to transfer to the Company's subsidiary, EntrEe LLC, its 100% interest in an exploration licence located in Khanbogd, Omnogovi, Mongolia (the "Khatsavch Property").

Property and may acquire up to an 80% interest in mineralization below a depth of 560 metres and a 70% interest in mineralization above a depth of 560 metres by spending \$35 million. Thereafter, the Company has the right to require Ivanhoe to fund its share of subsequent project costs through to production, to be recovered from production cash flow. The agreement with Ivanhoe also provided for Ivanhoe to subscribe for 4,600,000 units of the Company at a price of C\$1.00 per unit (completed in November 2004).

The Company's exploration licenses begin to expire in March 2008 through to October 2010. The total estimated annual fees in order to maintain these licenses in good standing is approximately \$280,000 payable in March 2006 for the ensuing 12 month period.

**6. COMMON STOCK (cont'd)**

**Share issuances (cont'd)**

During the three month period ended June 30, 2005, the Company issued 245,000 common shares for aggregate cash proceeds of \$151,590 on the exercise of stock options.

In July 2005, the Company completed a non-brokered private placement consisting of 1,876,680 units at a price of C\$2.20 per unit for gross proceeds of \$3,367,890. Each unit consisted of one common share and one non-transferable share purchase A warrant and one non-transferable share purchase B warrant. Two A warrants entitle the holder to purchase one common share of the Company at a price of C\$2.75 for a period of two years. Two B warrants entitle the holder to purchase one common share of the Company at a price of C\$3.00 for a period of two years. Pursuant to an agreement with the Company, the placee, Kennecott Canada Exploration Inc. (an indirect wholly-owned subsidiary of Rio Tinto plc) has the right to acquire additional securities and participate in future financings by the Company so as to maintain its proportional equity in the Company.

During the three month period ended September 30, 2005, the Company issued 997,000 common shares for aggregate cash proceeds of \$1,069,135 on the exercise of warrants.

During the three month period ended September 30, 2005, the Company issued 162,000 common shares for aggregate cash proceeds of \$149,455 on the exercise of stock options.

**Escrow shares**

Included in issued capital stock at December 31, 2004 were 3,510,900 common shares which were subject to escrow agreements and may not be released, transferred or assigned without the consent of the regulatory authorities at the TSX-V. On March 3, 2005, the Company became a Tier 1 Issuer on the TSX-V and as a result 2,280,900 shares were released from escrow.

The remaining 1,230,000 common shares that were subject to escrow agreement were released in April, 2005 upon meeting additional performance requirements relating to exploration expenditures on the Company's mineral property interests.

*Performance escrow shares*

During the year ended April 30, 2000, 270,000 performance escrow shares of 3,000,000 shares originally placed in escrow in connection with an initial public offering with a value of \$41,593 were released from escrow.

During the year ended April 30, 2003, the Company, a Trustee and the owner of the remaining 2,730,000 performance escrow shares entered into a Share Purchase Agreement and Trust Deed whereby these performance escrow shares were transferred to the Trustee, on behalf of the Company, for the purpose of making the performance escrow shares available to present and future principals of the Company. In November 2003, the Company, Trustee and owner entered into a Restated Share Purchase Agreement and Trust Deed that clarified and corrected the terms and intent of the original agreement. Pursuant to these agreements, the Company acquired and immediately transferred these performance escrow shares to the Trustee for the benefit of current and future employees, officers and directors of the Company (the "2,730,000 Trustee Shares").

**6. COMMON STOCK (cont'd)**

In July 2002, the Company entered into an agreement with the president of the Company for the receipt of certain escrow shares in exchange for services provided to the Company. The agreement was replaced with an employment agreement dated November 1, 2003. At December 31, 2004, under the terms of the agreements, a cumulative total of 625,000 performance escrow shares of the 2,730,000 Trustee Shares had been allocated to the president of the Company. In May 2004, 310,439 performance escrow shares allocated to the president of the Company were released from escrow and marked-to-market at the date of release at a final value of \$252,246. In August 2004, an additional 310,439 performance escrow shares allocated to the president of the Company were released from escrow and marked-to-market at the date of release at a final value of \$129,559.

During the eight month period ended December 31, 2003, the Trustee allocated an additional 905,000 performance escrow shares of the 2,730,000 Trustee Shares to directors of the Company. In May 2004, 109,891 performance escrow shares allocated to directors were released from escrow and marked-to-market at the date of release at a final value of \$89,291. In August 2004, an additional 109,891 performance escrow shares allocated to the directors were released from escrow and marked-to-market at the date of release at a final value of \$44,241.

In October, 2004 the Company allocated the final 1,200,000 performance escrow shares of the 2,730,000 Trustee Shares to directors, officers and employees of the Company.

In April 2005, the remaining 1,230,000 performance escrow shares allocated to the president of the Company and to the directors and employees were released from escrow and marked-to-market at the date of release at a final total value of \$1,028,001.

At September 30, 2005, all performance escrow shares had been released from escrow. At December 31, 2004 there were 1,230,000 performance escrow shares that, although allocated, had not been released from escrow of which 4,122 performance escrow shares allocated to the president under employment agreement had a value of \$4,902 and 1,225,878 performance escrow shares allocated to directors and employees had a value of \$1,458,682.

The total escrow compensation expense (recovery) has been recorded in the consolidated financial statements as follows with corresponding additional paid-in capital recorded in stockholders' equity:

**12. DIFFERENCES BETWEEN UNITED STATES AND CANADIAN GENERALLY  
ACCEPTED ACCOUNTING PRINCIPLES (cont'd)**

**Mineral property interests**

Under United States GAAP, costs of acquisition, exploration, carrying and retaining unproven properties are expensed as incurred.

Under Canadian GAAP, mineral property interests, which consist of the right to explore for mineral deposits, are recorded at cost. Deferred exploration costs, which consist of costs attributable to the exploration of mineral property interests, are recorded at cost. All direct and indirect costs relating to the acquisition and exploration of mineral property interests are capitalized on the basis of specific claim blocks until the mineral property interests to which they relate are placed into production, the mineral property interests are disposed of through sale or where management has determined there to be an impairment. If a mineral property interest is abandoned, the mineral property interest and deferred exploration costs are written off to operations in the period of abandonment. On an ongoing basis, the capitalized costs are reviewed on a property-by-property basis to consider if there is any impairment on the subject mineral property interest. Management's determination of impairment is based on: i) whether the Company's exploration programs on the mineral property interests have significantly changed, such that previously identified resource targets are no longer being pursued; ii) whether exploration results to date are promising and whether additional exploration work is being planned in the foreseeable future or iii) whether remaining lease terms are insufficient to conduct necessary studies or exploration work. Based on the foregoing criteria, management determined that no impairment to the Company's current mineral property interests had taken place at September 30, 2005.

**Asset retirement obligation**

Under United States GAAP, the Company records the fair value of the liability for closure and removal costs associated with the legal obligations upon retirement or removal of any tangible long-lived assets in accordance with Statements of Financial Accounting Standards No. 143, "Accounting for Asset Retirement Obligations". The initial recognition of any liability will be capitalized as part of the asset cost and depreciated over its estimated useful life. Under Canadian GAAP, asset retirement obligations are required to be recorded beginning January 1, 2004.

As of September 30, 2005, the Company has not incurred any asset retirement obligations under United States GAAP that would generate a difference.

**Escrow shares**

Under United States GAAP, the Company accounts for escrow shares as described in Note 3.

Under Canadian GAAP, shares placed in escrow in connection with an initial public offering which are to be released upon achievement of certain performance criteria are not considered to be contingently issueable and are not compensatory in nature. Accordingly, the difference between the fair value of these shares, being the trading price of the Company's publicly traded common shares, at the time they are released from escrow and their original issue price is not recorded. Further, as described in Note 6, certain of the Company's escrow shares were transferred to a Trustee for the benefit of future employees, officers and directors of the Company. Under Canadian GAAP, as these performance escrow shares were transferred from a principal stockholder to a Trustee, these performance escrow shares are considered compensatory in nature. Accordingly, the Company records a compensation benefit at fair value, being the trading price of

the Company's publicly traded common shares, when a portion or all of these performance escrow shares are allocated to specific individuals.

Thus, there is a difference between United States GAAP and Canadian GAAP on the accounting for escrow shares for the three month periods ended September 30, 2005 and 2004 in the amount of \$(nil) and \$(306,687) respectively. There is difference between United States GAAP and Canadian GAAP for escrow shares for the nine month periods ended September 30, 2005 and 2004 in the amount of \$(435,583) and \$(1,114,974) respectively.

**Stock-based compensation**

Under United States GAAP, the Company accounts for stock-based compensation as described in Note 3.

Under Canadian GAAP, effective May 1, 2002, the Company adopted CICA Handbook Section 3870 "Stock-Based Compensation and Other Stock-Based Payments" ("HB 3870"), which recommends the fair value-based methodology for measuring compensation costs, excluding escrow shares. HB 3870 also permits, and the Company adopted, the use of the intrinsic value-based method, which recognizes compensation cost for awards to employees and directors when the market price exceeds the exercise price at date of grant, but requires pro-forma disclosure of loss and loss per share as if the fair value method had been adopted. The granting of stock options to non-employees and direct awards of stock to employees and non-employees is accounted for using the fair value method of accounting. Effective May 1, 2003, the Company adopted prospectively the fair value-based methodology for measuring compensation costs under HB 3870 which requires the Company to recognize fair value compensation costs for the granting of all stock options and direct awards of stock.

Accordingly, there is no difference between United States GAAP and Canadian GAAP on the accounting for stock-based compensation for the nine month periods ended September 30, 2005 and 2004.

**Net loss per share**

Edgar Filing: ENTREE GOLD INC - Form 6-K

Under both United States GAAP and Canadian GAAP, basic net loss per share is calculated using the weighted average number of common shares outstanding during the year.

Under Canadian GAAP, the weighted average number of common shares outstanding includes any shares that remain in escrow. The weighted average number of shares outstanding under Canadian GAAP for the three month periods ended September 30, 2005 and 2004 were 66,603,384 and 46,258,066 respectively. The weighted average number of shares outstanding under Canadian GAAP for the nine month periods ended September 30, 2005 and 2004 were 58,251,602 and 46,162,427 respectively.

**New accounting pronouncements**

In June 2003, the CICA issued Accounting Guideline 15, "Consolidation of Variable Interest Entities", which will be effective for annual and interim periods beginning on or after November 1, 2004. This guideline addresses the application of consolidation principles to entities that are subject to control on a basis other than ownership of voting interests. Management is assessing the impact, if any, of the adoption of this guideline on the Company's consolidated financial statements. The adoption of this new pronouncement is not expected to have a material effect on the Company's consolidated financial position or results of operations.

## INTRODUCTION

This discussion and analysis of financial position and results of operations ("MD&A") and cash flows of EntrEe Gold Inc. (the Company) should be read in conjunction with the unaudited interim consolidated financial statements of the Company for the nine months ended September 30, 2005, and with the audited consolidated financial statements of the company for the year ended December 31, 2004. Additional information relating to the Company, including the Company's Annual Information Form is available on SEDAR at [www.sedar.com](http://www.sedar.com). The effective date of this MD&A is November 2, 2005.

The interim period financial statements have been prepared by the Company in conformity with generally accepted accounting principles in the United States of America ("US GAAP"). The preparation of financial data is based on accounting principles and practices consistent with those used in the preparation of annual financial statements, and in the opinion of management these financial statements contain all adjustments necessary (consisting of normally recurring adjustments) to present fairly the financial information contained therein. US GAAP differs in certain material respects from accounting principles generally accepted in Canada ("Canadian GAAP") (See Note 12 to the interim financial statements).

In this MD&A, all monetary amounts are expressed in the United States dollars, unless otherwise specified. In this quarterly report, unless otherwise specified, all dollar amounts are expressed in United States dollars, unless otherwise specified such as "Cdn \$" or "C\$" for Canadian dollars. All references to "common shares" refer to the common shares in our capital stock.

As used in this quarterly report, the terms "we", "us", "our", the "Company" and "EntrEe" mean Entree Gold Inc. and our wholly-owned Mongolian subsidiary EntrEe LLC, unless otherwise indicated.

This MD&A contains forward-looking statements. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled "Risk Factors" that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements.

**OUR CURRENT BUSINESS**

We are an exploration stage resource company engaged in exploring mineral resource properties. Our current mineral properties consist of five mineral exploration licenses granted by the Mineral Resources and Petroleum Authority of Mongolia, a division of the government of Mongolia. All of these mineral exploration licenses have been registered in the name of our Mongolian subsidiary EntrEe LLC.

There is no assurance that a commercially viable mineral deposit exists on any of our properties, and further exploration is required before we can evaluate whether any exist and, if so, whether it would be economically and legally feasible to develop or exploit those resources. Even if we complete our current exploration program and we are successful in identifying a mineral deposit, we would be required to spend substantial funds on further drilling and engineering studies before we could know whether that mineral deposit will constitute a reserve (a reserve is a commercially viable mineral deposit). Please refer to the section of this quarterly report entitled 'Risk Factors', beginning at page 43, for additional information about the risks of mineral exploration.

*Equity Participation and Earn-In Agreement with Ivanhoe Mines Ltd.*

We entered into an 'arms length' Equity Participation and Earn-In Agreement dated as of October 15, 2004, with Ivanhoe Mines Ltd. ("Ivanhoe"), an unrelated Yukon corporation which owns a mineral exploration property known as Oyu Tolgoi, or 'Turquoise Hill', which is located adjacent to our Lookout Hill property. This agreement provided that, upon satisfaction of certain conditions, Ivanhoe Mines Ltd. would:

•

subscribe for 4,600,000 units from our company for Cdn \$1.00 per unit, with each unit consisting of one common share of our company and one share purchase warrant entitling the holder to purchase one additional common share of our company for a purchase price of Cdn \$1.10 for two years from the date of purchase.

•

have the right, during an earn-in period beginning on closing of the subscription for units and ending, at the latest, on the eighth anniversary of that closing date (subject to earlier expiration as specified in the agreement), to earn a participating interest in a mineral exploration and, if warranted, development and mining project to be conducted by

Ivanhoe Mines Ltd. on a portion of our company's Lookout Hill property consisting of approximately 40,000 hectares, or approximately 22% of the land area of our Lookout Hill property shown on the map below. The amount of the participating interest in the project will vary depending on the amount of money that Ivanhoe Mines Ltd. expends on the project during the earn-in period, but the agreement provides that Ivanhoe can earn a 51% interest by expending an aggregate of at least \$20,000,000 during the earn-in period, a 60% interest by expending an aggregate of at least \$27,500,000 during the earn-in period, or a sliding percentage interest, depending on the depth from which minerals are extracted from the project, of between 70% and 80% by expending an aggregate of at least \$35,000,000 during the earn-in period.

- 

have the right to nominate one member of our Board of Directors until the earlier to occur of (a) the expiration of the earn-in period, or (b) the date upon which Ivanhoe ceases to own at least ten

percent (10%) of our issued and outstanding common shares (assuming the exercise by Ivanhoe of all securities convertible into our common shares).

In addition, the Equity Participation and Earn-In Agreement gives to Ivanhoe a pre-emptive right to such percentage of any offering of securities of our company as will enable them to preserve their ownership percentage in our company which, after the acquisition of the 4,600,000 units, would be approximately 9% prior to exercise of any of their share purchase warrants and could, upon the exercise of the latter, go as high as 17% of our issued and outstanding common shares. In June 2005, Ivanhoe exercised its 4,600,000 share purchase warrants (see below).

The portion of our property subject to the Equity Participation and Earn-In Agreement, which is referred to in the agreement as the "Project Property", is shown below:

**ENTREE GOLD INC.**

**MANAGEMENT DISCUSSION AND ANALYSIS**

**For the Nine Months Ended September 30, 2005**

**(In United States Dollars unless stated otherwise)**

We closed the private placement described in the Equity Participation and Earn-In Agreement on November 9, 2004, at which time Ivanhoe purchased the 4,600,000 units described above.

We believe that the Equity Participation and Earn-In Agreement represents a significant milestone in the development of our company. It has enabled us to raise money that we can use to pursue our exploration activities on the balance of our Lookout Hill property and elsewhere. It has the potential, depending on how much money Ivanhoe actually expends on the project during the earn-in period, to enable the exploration of that portion of our Lookout Hill property at little or no cost to our company. Finally, their commitment to explore our property demonstrates that Ivanhoe, an internationally recognized mineral exploration and development company, has sufficient confidence in our company and our Lookout Hill property to invest significant time, money and effort in our future.

*Investment by Rio Tinto plc*

In June 2005, Rio Tinto plc (one of the world's largest mining and exploration companies), through its wholly owned subsidiary, Kennecott Canada Exploration Inc (collectively, "Rio Tinto") completed a private placement into EntrEe, whereby they purchased 5,665,730 units at a price of \$C2.20 per unit, which consisted of one EntrEe common share and two warrants (one "A" warrant and one "B" warrant). Two "A" warrants entitle Rio Tinto to purchase one EntrEe common share for C\$2.75 within two years; two "B" warrants entitle Rio Tinto to purchase one EntrEe common share for C\$3.00 within two years. Proceeds from Rio Tinto's investment were \$10,170,207. Ivanhoe exercised its pre-emptive right to maintain proportional ownership of EntrEe's shares and thereby exercised its warrant for 4.6 million shares at C\$1.10, resulting in proceeds to EntrEe of \$4,069,214. In July Ivanhoe took part in the private placement, purchasing 1,235,489 units, resulting in further proceeds to EntrEe of \$2,217,209. Rio Tinto purchased an additional 641,191 units of the private placement to maintain proportional ownership, resulting in further proceeds of \$1,150,681.

Ivanhoe now owns approximately 16% of EntrEe's issued and outstanding shares with the potential to hold up to a total of 17% upon the exercise of warrants.

Rio Tinto now owns approximately 9% of EntrEe's issued and outstanding shares with the potential to hold up to a total of 17% upon the exercise of warrants.

Ivanhoe and Rio Tinto are required to vote these shares as our board of directors direct on all matters pertaining to the appointment of directors, the appointment and remuneration of our auditors and all other matters to be submitted to our shareholders except for "extraordinary" matters. "Extraordinary" matters are defined in the Equity Participation

and Earn-In Agreement to mean matters requiring a special majority (66.33%), the vote of a majority of disinterested shareholders and matters where Ivanhoe or Rio Tinto is precluded from voting.

The additional investment by Rio Tinto represents a strong endorsement by one of the world's largest mining companies of EntrEe's management and property holdings. EntrEe is in sound financial condition and well positioned to build upon the value of our company, both in terms of our arrangement with Ivanhoe and our exciting and promising prospects elsewhere. As part of our ongoing strategy, we are also actively seeking quality acquisitions to complement our existing portfolio.

**Lookout Hill**

Significant exploration was completed in the 3<sup>rd</sup> quarter and throughout 2005 on Lookout Hill.

In the Copper Flats area, which is subject to the joint EntrEe - Ivanhoe Agreement, drilling in the 2<sup>nd</sup> quarter of 2005 (April 14, 2005 news release) confirmed the extension of the Hugo North system of mineralization onto EntrEe's ground. Some of the richest mineralization encountered to date (608 metres averaging 3.24% copper and 0.82 g/t gold with a contained 322 metres averaging 4.59% copper and 1.07 g/t gold) in the entire Oyu Tolgoi area lies on EntrEe's ground immediately north of the joint border. This rich-copper gold zone of mineralization has now been traced for up to 625 metres along strike to the north of the property boundary and remains open. Ivanhoe continues to drill the potential continuation to the north and is simultaneously conducting closer-spaced infill drilling along the 625 metres of defined mineralization, with the goal of completing a resource calculation by early 2006.

Ivanhoe announced its Integrated Development Plan for Oyu Tolgoi in September 2005. In this study there were several key items that were specific to the potential development of EntrEe's Copper Flats area. These include:

- 

The Hugo North deposit is now recognized as the richest of its kind in history and the gold:copper ratios and overall metal values in the vicinity of the EntrEe-Ivanhoe property boundary are the highest in the entire deposit.

- 

The extension of the Hugo North deposit onto Copper Flats has now been traced for over 625 metres and remains open to the north and to depth.

- 

Ivanhoe has disclosed a targeted resource for current infill drilling at Copper Flats and it is expected that there will be sufficient drill density to estimate an inferred resource by early 2006 for the mineralized system delineated to date.

- 

The continued extension of the high-grade mineralization at Copper Flats could support the development of a mine on EntrEe's property.

Edgar Filing: ENTREE GOLD INC - Form 6-K

To the west of the 40,000 hectares that are subject to the EntrEe - Ivanhoe Agreement, EntrEe continued exploration on its 100% owned ground. Deep probing IP and MT geophysical surveys, soil geochemistry and geological mapping were completed over Zones I/II and III and these surveys were extended to the south of the zones down to the most southern property boundary. Similar surveys were completed over the Bayan Ovoo copper showing. Drilling is in progress, testing these geophysical and geochemical targets, with two drills currently in the area of Zones I/II and III and one drill in the Bayan Ovoo area.

Reconnaissance exploration continues over the remainder of this 139,000 hectare land package.

We are required to pay annual fees to the Mineral Resources and Petroleum Authority of Mongolia in order to maintain our five mineral exploration licenses. Over the 12 month period ending June 30, 2006, we will be required to pay an aggregate of \$269,250 for the Lookout Hill property.

**(In United States Dollars unless stated otherwise)**

**Ulziit Uul**

Deep probing IP and MT geophysical surveys along with geochemical soil sampling and geological mapping were conducted over a large portion of this licensed area. As part of the terms of the private placement by Rio Tinto plc in July 2005, Rio acquired a first right of refusal on Ulziit Uul and subsequently the overall exploration budget was increased to an estimated US\$1.9 million.

Drilling commenced on selected targets in September 2005 and is still in progress.

We are required to pay annual fees to the Mineral Resources and Petroleum Authority of Mongolia in order to maintain our five mineral exploration licenses. Over the next 12 months ending June 30, 2006, we will be required to pay \$10,500 for the Ikh Ulziit Uul property.

**Khatsavch**

No work was completed on the Khatsavch license in 2005.

We are required to pay annual fees to the Mineral Resources and Petroleum Authority of Mongolia in order to maintain our five mineral exploration licenses. Over the next 12 months ending June 30, 2006, we will be required to pay \$63 for the Khatsavch property.

**Other**

During 2004, we incurred \$30,160 in expenses related to due diligence on a potential acquisition in Khazakstan. The project did not meet our investment criteria.

**General and administrative**

For the quarter ended September 30, 2005, general and administrative expense before stock-based and escrow share compensation increased compared to the year ago quarter because of larger corporate offices, increased payroll, and an expanded investor relations program.

For the nine months ended September 30, 2005 general and administrative expense before stock-based and escrow share compensation increased compared to the year ago period because of larger corporate offices, increased payroll, additional legal expenses arising from contract negotiations and an expanded investor relations program.

**Stock-based compensation**

In March, 2005, the Company became a Tier I Issuer on the TSX-V and as a result all stock options previously granted became fully vested. Consequently, the fair value of all unvested options except those issued to investor relations consultants was expensed in the 1<sup>st</sup> quarter of 2005. The balance of stock-based compensation expense represents the fair value of stock options granted in 2005 less the unvested portion of options granted to investor relations consultants.

**ENTREE GOLD INC.****MANAGEMENT DISCUSSION AND ANALYSIS****For the Nine Months Ended September 30, 2005****(In United States Dollars unless stated otherwise)****Escrow shares compensation**

The Company records compensation expense for performance shares held in escrow on a mark-to-market basis. For the three and nine months periods ended September 30, 2005 and 2004, the relative market price of the Company's stock was decreasing, and therefore expense recoveries were recognized. At June 30, 2005, all performance escrow shares had been released from escrow and consequently there was no further escrow compensation expense or recovery.

**Interest income**

The Company earns income on its cash and cash equivalents. The increase in interest income in the current quarter arises from the investment of approximately \$20,000,000 generated by private placements, warrants exercise and options exercise.

**LIQUIDITY AND CAPITAL RESOURCES**

At September 30, 2005, the Company had working capital of \$20,907,682 compared with \$6,024,532 at December 31, 2004. In October, 2005, the Company raised approximately \$3,500,000 from the exercise of warrants and stock options. Budgeted expenditures for the 12 months ending September 30, 2006 total approximately \$10,900,000 for exploration and \$1,600,000 for administration and shareholder communications. Working capital on hand is expected to exceed cash requirements for the ensuing twelve months by approximately \$11,900,000.

**Operating activities**

Cash used in operations was \$5,887,937 (2004 - \$2,573,374) for the nine month period ended September 30, 2005 and represents expenditures on mineral property exploration and general and administrative expense as described above.

During the current period, the Company prepaid \$186,514 in exploration license fees for the ensuing year for the three Lookout Hill exploration licenses.
