Securities registered or to be registered pursuant to Section 12(b) of the Act.

Title of each class	Name of each exchange on which registered
Ordinary H Shares of par value RMB1.00 per share represented by American Depository Receipts	New York Stock Exchange, Inc.

Securities registered or to be registered pursuant to Section 12(g) of the Act.

None

(Title of Class)

(Title of Class)

SEC 1852
(05-06) Persons who respond to the collection of information contained in this form are not required to respond unless the form displays a currently valid OMB control number.

Securities for which there is a reporting obligation pursuant to Section 15(d) of the Act.

None

(Title of Class)

Indicate the number of outstanding shares of each of the issuer's classes of capital or common stock as of the close of the period covered by the annual report. 4,800,000,000 ordinary A Shares of par value RMB1.00 per share and 1,761,267,000 ordinary H Shares of par value RMB1.00 per share were issued and outstanding as of December 31, 2008.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

If this report is an annual or transition report, indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934.

Yes No

Note — Checking the box above will not relieve any registrant required to file reports pursuant to Section 13 or 15(d) of the Securities Exchange Act of 1934 from their obligations under those Sections.

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of “accelerated filer and large accelerated filer” in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer

Indicate by check mark which basis of accounting the registrant has used to prepare the financial statements included in this filing:

U.S. GAAP	International Financial Reporting	Other
<input type="radio"/>	Standards <input checked="" type="radio"/>	<input type="radio"/>
	as issued by the International	
	Accounting	
	Standards Board	

If "Other" has been checked in response to the previous question, indicate by check mark which financial statement item the registrant has elected to follow.

Item 17 Item 18

If this is an annual report, indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

FORWARD-LOOKING STATEMENTS

This Annual Report contains forward-looking statements. These statements appear in a number of different places in this Annual Report. A forward-looking statement is usually identified by the use in this Annual Report of certain terminology such as “estimates”, “projects”, “expects”, “intends”, “believes”, “plans”, “anticipates”, or their negatives or comparable words. Also look for discussions of strategy that involve risks and uncertainties. Forward-looking statements include statements regarding the outlook for the Company’s future operations, forecasts of future costs and expenditures, evaluation of market conditions, the outcome of legal proceedings (if any), the adequacy of reserves, or other business plans. You are cautioned that such forward-looking statements are not guarantees and involve risks, assumptions and uncertainties. The Company’s actual results may differ materially from those in the forward-looking statements due to risks facing the Company or due to actual facts differing from the assumptions underlying those forward-looking statements.

Some of these risks and assumptions, in addition to those identified under Item 3, “Key Information - Risk Factors,” include:

- general economic and business conditions in markets where the Company operates, including changes in interest rates;
- the effects of competition on the demand for and price of our services;
- natural phenomena;
- actions by government authorities, including changes in government regulations, and changes in the CAAC’s regulatory policies;
- the Company’s relationship with China Southern Air Holding Company (the “CSAHC”);
- uncertainties associated with legal proceedings;
- technological development;
- future decisions by management in response to changing conditions;
- the Company’s ability to execute prospective business plans;
- the availability of qualified flight personnel and airport facilities; and
- misjudgments in the course of preparing forward-looking statements.

The Company advises you that these cautionary remarks expressly qualify in their entirety all forward-looking statements attributable to the Company, the Group and persons acting on their behalf.

INTRODUCTORY NOTE

In this Annual Report, unless the context indicates otherwise, the “Company” means China Southern Airlines Company Limited, a joint stock company incorporated in China on March 25, 1995, the “Group” means the Company and its consolidated subsidiaries, and “CSAHC” means China Southern Air Holding Company, the Company’s parent company which holds a 50.38% controlling interest in the Company as of June 12, 2009.

References to “China” or the “PRC” are to the People’s Republic of China, excluding Hong Kong, Macau and Taiwan. References to “Renminbi” or “RMB” are to the currency of China, references to “U.S. dollars”, “\$” or “US\$” are to the currency of the United States of America (the “U.S.” or “United States”), and reference to “HK\$” is to the currency of Hong Kong. Reference to the “Chinese government” is to the national government of China. References to “Hong Kong” or “Hong Kong SAR” are to the Hong Kong Special Administrative Region of the People’s Republic of China. References to “Macau” or “Macau SAR” are to the Macau Special Administrative Region of the People’s Republic of China.

The Company presents its consolidated financial statements in Renminbi. The consolidated financial statements of the Company for the year ended December 31, 2008 (the “Financial Statements”) have been prepared in accordance with all applicable International Financial Reporting Standards (“IFRSs”), which collective term includes all applicable individual International Financial Reporting Standards, International Accounting Standards (“IAS”) and interpretations issued by the International Accounting Standards Board (the “IASB”).

Solely for the convenience of the readers, this Annual Report contains translations of certain Renminbi amounts into U.S. dollars at the rate of US\$1.00 = RMB6.8346, which is the average of the buying and selling rates as quoted by the People’s Bank of China at the close of business on December 31, 2008. No representation is made that the Renminbi amounts or U.S. dollar amounts included in this Annual Report could have been or could be converted into U.S. dollars or Renminbi, as the case may be, at any particular rate or at all. Any discrepancies in the tables included herein between the amounts listed and the totals are due to rounding.

GLOSSARY OF AIRLINE INDUSTRY TERMS

In this Annual Report, unless the context indicates otherwise, the following terms shall have the respective meanings set forth below.

Capacity Measurements

“available seat kilometers” or “ASKs” the number of seats made available for sale multiplied by the kilometers flown

“available ton kilometers” or “ATKs” the number of tons of capacity available for the transportation of revenue load (passengers and cargo) multiplied by the kilometers flown

Traffic Measurements

“cargo ton kilometers” the cargo load in tons multiplied by the kilometers flown

“revenue passenger kilometers” or “RPKs” the number of revenue passengers carried multiplied by the kilometers flown

“revenue ton kilometers” or “RTKs” the load (passenger and cargo) in tons multiplied by the kilometers flown

Yield Measurements

“average yield” revenue from airline operations (passenger and cargo) divided by RTKs

“cargo yield” revenue from cargo operations divided by cargo ton kilometers

“passenger yield” revenue from passenger operations divided by RPKs

“ton” a metric ton, equivalent to 2,204.6 pounds

Load Factors

“breakeven load factor” the load factor required to equate scheduled traffic revenue with operating costs assuming that total operating surplus is attributable to scheduled traffic operations

“overall load factor” RTKs expressed as a percentage of ATKs

“passenger load factor” RPKs expressed as a percentage of ASKs

Utilization

“utilization rate” the actual number of flight hours per aircraft per operating day

Equipment

“expendables” aircraft parts that are ordinarily used up and replaced with new parts

“rotables” aircraft parts that are ordinarily repaired and reused

Others

“ADR” American Depositary Receipt

“A Shares” Shares issued by the Company to investors in the PRC for subscription in RMB, with par value of RMB1.00 each

“CAAC” Civil Aviation Administration of China

“CAOSC” China Aviation Oil Supplies Company

“CSRC” China Securities Regulatory Commission

“H Shares” Shares issued by the Company, listed on the Stock Exchange of Hong Kong Limited and subscribed for and traded in Hong Kong dollars, with par value of RMB1.00 each

“Nan Lung” Nan Lung Holding Limited (a wholly-owned subsidiary of CSAHC)

“NDRC” National Development and Reform Commission of China

“SA Finance” China Southern Airlines Group Finance Company Limited

“SAFE” State Administration of Foreign Exchange of China

“SEC” United States Securities and Exchange Commission

ITEM 3. KEY INFORMATION.

Selected Financial Data

The following tables present selected financial data of the Company as of and for each of the years in the five-year period ended December 31, 2008. The selected consolidated statement of operations data for each of the years in the three-year period ended December 31, 2008 and selected consolidated balance sheet data as of December 31, 2008 and 2007, are derived from the consolidated financial statements of the Company, including the related notes, included elsewhere in this Annual Report. The selected consolidated statement of operations data for the years ended December 31, 2005 and 2004 and selected consolidated balance sheet data as of December 31, 2006, 2005 and 2004 are derived from the Company's audited consolidated financial statements that are not included in this Annual Report.

The IASB has issued certain new and revised IFRSs and interpretations that are first effective or available for early adoption for the current accounting period of the Group. The Group has early adopted IFRIC 13, Customer Loyalty Programmes, which is effective for accounting periods beginning on or after 1 July 2008. The changes in accounting policies have been applied retrospectively. Accordingly, the comparative financial data presented in this annual report for the years ended December 31, 2007, 2006, 2005 and 2004 have been restated, as applicable, to conform to the changed accounting policies. A detailed description is set forth in Note 3 to our consolidated financial statements.

Moreover, the selected financial data should be read in conjunction with our consolidated financial statements together with accompanying notes and "Item 5. Operating and Financial Review and Prospects" are included elsewhere in this Annual Report. Our consolidated financial statements are prepared and presented in accordance with International Financial Reporting Standards, or IFRSs.

Note 1: The comparative financial data have been restated upon the adoption of IFRIC 13.

Note 2: In 2008, the Company completed the issue of new shares by the conversion of share premium on the basis of five new shares for every ten existing shares of the Company then held (“Bonus Share Issue”). The calculation of basic and diluted earnings per share for all periods presented has been adjusted retrospectively.

Selected Operating Data

The following selected operating data of the Group for each of the years in the five-year period ended December 31, 2008 have been derived from consolidated financial statements prepared in accordance with IFRSs and other data provided by the Group which have not been audited.

The operating data and the profit analysis and comparison for other years below is calculated and disclosed in accordance with the statistical standards, which have been implemented by the Company since January 1, 2001. See “Glossary of Airline Industry Terms” at the front of this Annual Report for definitions of certain terms used herein.

Year ended December 31,

	2008	2007	2006	2005	2004

Exchange Rate Information

The following table sets forth certain information concerning exchange rates, based on the noon buying rates in New York City for cable transfers in foreign currencies, as certified for customs purposes by the Federal Reserve Bank of New York (the “Noon Buying Rate”), between Renminbi and U.S. dollars for the five most recent financial years.

Period	Period End	Average (1) (RMB per US\$)	High	Low
Annual Exchange Rate				
2004	8.2765	8.2765	8.2889	8.2641
2005	8.0694	8.1825	8.2767	8.0702
2006	7.8041	7.9723	8.0702	7.8041
2007	7.2946	7.6058	7.8127	7.2946

2008	6.8225	6.9477	7.2946	6.7800
------	--------	--------	--------	--------

(1) Determined by averaging the rates on the last business day of each month during the relevant period.

The following table sets out the range of high and low exchange rates, based on the Noon Buying Rate, between Renminbi and U.S. dollars, for the following periods.

6

Period	High	Low
Monthly Exchange Rate		
December 2008	6.8842	6.8225
January 2009	6.8403	6.8225
February 2009	6.8470	6.8241
March 2009	6.8438	6.8240
April 2009	6.8361	6.8180
May 2009	6.8326	6.8176
June 2009 (up to June 12, 2009, the latest practicable date)	6.8371	6.8264

Dividend Payments

No interim dividends were paid during the year ended December 31, 2008. The Board of Directors of the Company did not recommend the payment of a final dividend in respect of the year ended December 31, 2008.

Capitalization and Indebtedness

Not applicable.

Reasons for the Offer and Use of Proceeds

Not applicable.

Risk Factors

Risks Relating to the Company

The Company is indirectly majority owned by the Chinese government, which may exert influence in a manner that may conflict with the interests of holders of ADRs, H Shares and A Shares.

Major Chinese airlines are wholly- or majority-owned either by the Chinese government or by provincial or municipal governments in China. CSAHC, an entity wholly-owned by the Chinese government, holds and exercises the rights of ownership of 50.38% of the equity of the Company. The Company contemplates an additional capital injection from CSAHC directly, and indirectly through CSAHC's wholly-owned subsidiary, Nan Lung, in an aggregate amount of approximately RMB3 billion. The capital injection will be effected by way of non-public A Share subscription by CSAHC and non-public H Share subscription by Nan Lung, respectively ("Proposed Subscriptions"). Currently, the Proposed Subscriptions have been approved by shareholders of the Company. On June 3, 2009, the Company received the formal approval from CSRC for the proposed non-public issue of H Shares. Up to June 12, 2009, CSRC's formal approval for the proposed non-public issue of A Shares is pending. Upon completion of the subscriptions, CSAHC's direct and indirect ownership in the Company will increase to approximately 59.32% of the issued share capital of the Company. The interests of the Chinese government in the Company and in other Chinese airlines may conflict with the interests of the holders of the ADRs, H Shares and A Shares. The public policy considerations of the Chinese government in regulating the Chinese commercial aviation industry may also conflict with its indirect ownership interest in the Company. In addition, the Company may accept further capital injection from CSAHC through non-public subscriptions, which may have dilutive impact for other holders of ADRs, H Shares and A Shares.

Due to high degree of operating leverage and high fixed costs, a decrease in revenues of the Group could result in a proportionately higher decrease in its net income. The results of the Group's operations are also significantly exposed to fluctuations in foreign exchange.

The airline industry is generally characterized by a high degree of operating leverage. In addition, due to high fixed costs, the expenses relating to the operation of any flight do not vary proportionately with the number of passengers carried, while revenues generated from a flight are directly related to the number of passengers carried and the fare structure of such flight. Accordingly, a decrease in revenues could result in a proportionately higher decrease in net income. Moreover, as the Group has substantial obligations denominated in foreign currencies, its results of operations are significantly affected by fluctuations in foreign exchange rates, particularly for the U.S. dollar and the Japanese yen. The Company recorded a net exchange gain of RMB2,832 million and RMB2,592 million for 2007 and 2008, respectively, mainly as a result of Renminbi appreciation. A majority of this exchange gain was unrealized in nature.

The Group has significant committed capital expenditures in the next three years, but may face challenges and difficulties as it seeks to maintain liquidity.

As of December 31, 2008, the Group's current liabilities exceeded its current assets by RMB32,290 million. The Group generally maintains sound operating cash flow. However, both current ratio and quick ratio are below average, which have negatively impacted, or may in the future negatively impact our liquidity. In addition, the Group has significant committed capital expenditures in the next three years, due to aircraft acquisitions. In 2009 and thereafter, the liquidity of the Group primarily depends on its ability to maintain adequate cash inflows from operations to meet its debt obligations as they fall due and its ability to obtain adequate external financing to meet its committed future capital expenditures. However, the Group may not be able to meet its debt obligations as they fall due and committed future capital expenditures if certain assumptions about the operations and the availability of external financing on acceptable terms are inaccurate. In particular, our ability to access adequate external funding may be adversely impacted by the deepening economic downturn globally and the recent instability in worldwide capital markets.

As at December 31, 2008, the Group had banking facilities with several PRC commercial banks for providing loan finance up to approximately RMB125,265 million, of which approximately RMB47,125 million was utilized. The directors of the Company believe that sufficient financing will be available to the Group. However there can be no assurance that such loan financing will be available on terms acceptable to the Group.

The Company contemplates an additional capital injection from CSAHC directly, and indirectly through CSAHC's wholly-owned subsidiary, Nan Lung, in an aggregate amount of approximately RMB3 billion. The capital injection will be effected by way of non-public A Share subscription by CSAHC and non-public H Share subscription by Nan Lung, respectively ("Proposed Subscriptions"). Currently, the Proposed Subscriptions have been approved by shareholders of the Company. On June 3, 2009, the Company received the formal approval from CSRC for the proposed non-public issue of H Shares. Up to June 12, 2009, CSRC's formal approval for the proposed non-public issue of A Shares is pending. The directors of the Company believe that the liquidity status of the Group will be further enhanced upon completion of the capital injection.

CSAHC will continue to be the controlling shareholder of the Company, whose interests may conflict with those of the Company. CSAHC and certain of its associates will continue to provide certain important services to the Company. Any disruption of the provision of services by CSAHC or its associates could affect the Company's operations and financial conditions.

CSAHC will continue to be the controlling shareholder of the Company. CSAHC and certain of its associates will continue to provide certain important services to the Company, including the import and export of aircraft spare parts and other flight equipment, advertising services, provision of air catering, air ticket selling services, cleaning services, property management services, leasing of properties and financial services. In addition, Mr. Si Xian Min, the Chairman of the Board of Directors, also serves as President of CSAHC. The interests of CSAHC may conflict with those of the Company. In addition, any disruption of the provision of services by CSAHC's associates or a default by CSAHC of its obligations owed to the Company could affect the Company's operations and financial conditions. In particular, as part of its cash management system, the Company periodically places significant amount of demand deposits with SA Finance, a PRC authorized financial institution controlled by CSAHC and an associate of the Company. The Company has taken certain measures to monitor the fund flows between itself and SA Finance and the placement of funds by SA Finance. Such monitoring measures may help to enhance the safety of the Company's deposits with SA Finance. In addition, the Company has received a letter of undertakings from CSAHC dated March 31, 2009, in which, among other things, CSAHC warranted that the Company's deposits and loans with SA Finance were definitely secure and that SA Finance would continue to operate in strict compliance with the relevant rules and regulations. However, the deposits may be exposed to the risks associated with the business of SA Finance over which the Company does not exercise control. As of December 31, 2007 and 2008, the Group had deposits of

RMB906 million and RMB1,139 million, respectively, with SA Finance.

8

Certain transactions between the Company and CSAHC or its associates (as defined in the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited (the “Hong Kong Listing Rules”)) will constitute connected transactions of the Company under the Hong Kong Listing Rules and, unless exemptions are applicable or waivers are granted, will be subject to disclosure requirements and/or independent shareholders’ approval in a general meeting.

Both international and domestic economic fluctuations, Chinese government’s macroeconomic controls and large-scale natural disasters affect the demand for air travel, which will in turn cause volatility to the Group’s business and results of our operations.

The US subprime crisis meltdown is an ongoing economic problem manifesting itself through liquidity issues in the global banking system owing to foreclosures which accelerated in the United States in late 2006 and has an adverse impact on global economy in 2007 and 2008. The deepening global recession has continued into 2009. The aviation industry as a whole is experiencing significantly weaker demand for air travel driven by the severe downturn. The financial crisis and other global events may reduce consumer spending or cause shifts in spending. A general reduction or shift in discretionary spending can result in decreased demand for leisure and business travel and can also impact the Company’s ability to raise fares to counteract increased fuel and labour costs. No assurance can be given that capacity reductions or other steps we may take will be adequate to offset the effects of reduced demand.

The global economic slowdown has also negatively affected the growth rate of the Chinese economy. Chinese macroeconomic controls, taken to counteract such slowdown, such as financing adjustments, credit adjustments, price controls and exchange rate policies, would present unexpected changes to the aviation industry. As a result, the changing economic situation and Chinese macroeconomic controls may cause volatility to the Group’s business and results of our operations.

In 2008, a number of large-scale natural disasters occurred in China, such as the southern China snow storms in January and the May 12 earthquake in Sichuan province. Disasters such as these can affect the airline industry and the Company by reducing revenues and impacting travel behaviour.

In summary, both international and domestic economic fluctuations and Chinese macroeconomic controls affect the demand for air travel. Additionally, increasingly strict security measures make air travel a hassle in the eyes of some consumers. These factors can have an uncertain impact on the development of the aviation industry.

The Company could be adversely affected by an outbreak of a disease that affects travel behaviour.

The recent outbreak of the A/H1-N swine flu has had an adverse impact on the aviation industry globally (including the Company). The spread of the swine flu has been adversely affecting the Company’s international routes operations. If the swine flu spreads more widely, it could also affect the Company’s regional and domestic routes operations, and result in significant impact on our business operations. If there were another outbreak of a disease that affects travel behaviour in the future, it could have a material adverse impact on us.

Lack of adequate documentation for land use rights and ownership of buildings subjects the Company to challenges and claims by third parties with respect to the Company’s use of such land and buildings.

Although systems for registration and transfer of land use rights and related real property interests in China have been implemented, such systems do not yet comprehensively account for all land and related property interests. The land in Guangzhou on which the Company’s headquarters and other facilities are located and the buildings that the Company uses at its route bases in Wuhan, Haikou and Zhengzhou are leased by the Company from CSAHC. However, CSAHC lacks adequate documentation evidencing CSAHC’s rights to such land and buildings, and, as a consequence, the lease

agreements between CSAHC and the Company for such land have not been registered with the relevant authorities. As a result, such lease agreements may not be enforceable. Lack of adequate documentation for land use rights and ownership of buildings subjects the Company to challenges and claims by third parties with respect to the Company's use of such land and buildings.

The Company has been occupying all of the land and buildings described above without challenge or claim by third parties. CSAHC has received written assurance from the CAAC to the effect that CSAHC is entitled to continued use and occupancy of the land and certain related buildings and facilities. However, such assurance does not constitute formal evidence of CSAHC's right to occupy such lands, buildings and facilities or the right to transfer, mortgage or lease such real property interests. The Company cannot predict the magnitude of the adverse effect on its operations if its use of any one or more of these parcels of land or buildings were successfully challenged. CSAHC has agreed to indemnify the Company against any loss or damage caused by or arising from any challenge of, or interference with, the Company's right to use certain land and buildings.

Given the preliminary stage of direct flights arrangement between Taiwan and Mainland China, no assurance can be given that the Company will generate significant yields from such new route. In addition, any discontinuity or disruption in such arrangement may negatively affect the Company's results.

Further to temporary lifts of the ban on direct flights between Taiwan and Mainland China during certain festivals, as of July 4, 2008, the ban has been further liberalized to allow direct charter flights on weekends. The Company became the first Chinese carrier to fly non-stop from Mainland China to Taiwan. Previously, travellers between Taiwan and China have had to make use of intermediate stops in Hong Kong or elsewhere. As a result, the permitted direct flights may benefit the Company by shortening flights time, cutting fuel costs and reducing flight fares between Taiwan and Mainland China. However, given the preliminary stage of such direct flights arrangement, no assurance can be given that the Company will generate significant yields from the new route. In addition, the results of the Company's operations will be negatively impacted by any discontinuity or disruption in the direct flight arrangement, which in turn will be subject to a number of factors beyond our control.

Terrorist attacks or the fear of such attacks, even if not made directly on the airline industry, could negatively affect the Company and the airline industry as a whole. The travel industry continues to face on-going security concerns and cost burdens.

The aviation industry as a whole has been beset with high-profile terrorist attacks, most notably on September 11, 2001 in the United States. The issue could also affect China. Notably, on March 7, 2008, on a China Southern Airlines flight boarding in Urumqi, crew members discovered a suspected terrorist. Thereafter, the CAAC implemented increased security measures. Additional terrorist attacks, even if not made directly on the airline industry, or the fear of or the precautions taken in anticipation of such attacks (including elevated threat warnings or selective cancellation or redirection of flights) could materially and adversely affect the Company and the airline industry. Among possible effects that the Company could experience from terrorist attacks are substantial flight disruption costs caused by grounding of fleet, significant increase of security costs and associated passenger inconvenience, increased insurance costs, substantially higher ticket refunds and significantly decreased traffic and revenue per revenue passenger kilometer.

The Group could be adversely affected by a failure or disruption of our computer, communications or other technology systems.

The Group is increasingly dependent on technology to operate its business. In particular, to enhance its management of flight operations, the Group's computerized flight operations control system (SOC) began operation in May 1999. The system utilizes advanced computer and telecommunications technology to manage the Group's flights on a centralized, real-time basis. The Group believes that the system will assist it to enhance the efficiency of flight schedule, increase the utilization of aircraft and improve the coordination of the Group's aircraft maintenance and ground servicing functions. However, the computer and communications systems on which we rely could be disrupted due to various events, some of which are beyond our control, including natural disasters, power failures, terrorist attacks, equipment failures, software failures and computer viruses and hackers. The Group has taken certain steps to help reduce the risk of some of these potential disruptions. There can be no assurance, however, that the measures we have taken are adequate to prevent or remedy disruptions or failures of these systems. Any substantial or repeated failure of these systems could impact our operations and customer services, result in the loss of important data, loss of revenues, and increased costs, and generally harm our business. Moreover, a failure of certain of our vital systems could limit our ability to operate our flights for an extended period of time, which would have a material adverse impact on our operations and our business.

The Company's failure to achieve and maintain effective internal control over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and

negatively impact the trading prices of our ADRs, H Shares or A Shares.

The United States Securities and Exchange Commission, or the SEC, as required by Section 404 of the Sarbanes-Oxley Act of 2002, adopted rules requiring every public company in the United States to include a management report on such company's internal control over financial reporting in its annual report, which contains management's assessment of the effectiveness of the company's internal control over financial reporting. In addition, the Company's independent registered public accounting firm is required to report on the effectiveness of the Company's internal control over financial reporting. Our independent registered public accounting firm may not be satisfied with our internal controls, the level of which our controls are documented, designed, operated and reviewed, or our independent registered public accounting firm may interpret the requirements, rules and regulations differently from us, then it may conclude that our internal control over financial reporting are not effective. Although our management concluded that our internal control over financial reporting as of December 31, 2008 was effective, we may discover other deficiencies in the course of our future evaluation of our internal control over financial reporting and may be unable to remediate such deficiencies in a timely manner. If we fail to maintain the adequacy of our internal control over financial reporting, we may not be able to conclude that we have effective internal control over financial reporting on an ongoing basis, in accordance with the Sarbanes-Oxley Act. Moreover, effective internal control is necessary for us to produce reliable financial reports and is important to prevent fraud. As a result, our failure to achieve and maintain effective internal control over financial reporting could result in the loss of investor confidence in the reliability of our financial statements, which in turn could harm our business and negatively impact the trading prices of our ADRs, H Shares or A Shares.

The Company could be classified as a passive foreign investment company by the United States Internal Revenue Service and may therefore be subject to adverse tax impact.

Depending upon the value of our shares and ADRs and the nature of our assets and income over time, we could be classified as a passive foreign investment company, or PFIC, by the United States Internal Revenue Service, or IRS, for U.S. federal income tax purposes. The Company believes that it was not a PFIC for the taxable year 2008. However, there can be no assurance that the Company will not be a PFIC for the taxable year 2009 and/or later taxable years, as PFIC status is re-tested each year and depends on the facts in such year.

The Company will be classified as a PFIC in any taxable year if either: (1) the average percentage value of its gross assets during the taxable year that produce passive income or are held for the production of passive income is at least 50% of the value of its total gross assets (the "Asset Test") or (2) 75% or more of its gross income for the taxable year is passive income (such as certain dividends, interest or royalties) (the "Income Test"). For purposes of the Asset Test: (1) any cash, cash equivalents, and cash invested in short-term, interest bearing, debt instruments, or bank deposits that is readily convertible into cash, will generally count as producing passive income or held for the production of passive income and (2) the average value of the Company's gross assets is calculated based on its market capitalization.

If the Company were a PFIC, you would generally be subject to additional taxes and interest charges on certain "excess" distributions the Company makes regardless of whether the Company continues to be a PFIC in the year in which you receive an "excess" distribution or dispose of or are deemed to dispose of your ADRs. An excess distribution would be either (1) a distribution with respect to ADRs that is greater than 125% of the average of such distributions over the preceding three years, or (2) 100% of the gain from the disposition of shares/ADRs. For more information on the United States federal income tax consequences to you that would result from our classification as a PFIC, please see Item 10, "Taxation — United States Federal Income Taxation — U.S. Holders — Passive Foreign Investment Company".

Risks Relating to the Chinese Commercial Aviation Industry

The Company's business is subject to extensive government regulations, and there can be no assurance as to the equal treatment of all airlines under those regulations.

The Company's ability to implement its business strategy will continue to be affected by regulations and policies issued or implemented by the CAAC, which encompasses substantially all aspects of the Chinese commercial aviation industry, including the approval of domestic, regional and international route allocation, air fares, aircraft acquisition, jet fuel prices and standards for aircraft maintenance, airport operations and air traffic control. Such regulations and policies limit the flexibility of the Company to respond to market conditions, competition or changes in the Company's cost structure. The implementation of specific CAAC policies could from time to time adversely affect the Company's operations. The CAAC has confirmed in writing that the Company will be treated equally with other Chinese airlines with respect to certain matters regulated by the CAAC. Nevertheless, there can be no assurance that the CAAC will, in all circumstances, apply its regulations and policies in a manner that results in equal treatment of all airlines.

The Company's results may be negatively impacted by the fluctuation in domestic prices for jet fuel, and we would be adversely affected by disruptions in the supply of fuel.

The availability and cost of jet fuel have a significant impact on the Group's results of operations. The Group's jet fuel cost for 2008 accounted for 65.99% of its flight operations expenses. All of the domestic jet fuel requirements of Chinese airlines (other than at the Shenzhen, Zhuhai, Sanya, Haikou, Shanghai Pudong and other small airports) must be purchased from the exclusive providers, CAOSC and Bluesky Oil Supplies Company, companies controlled and supervised by the CAAC. Chinese airlines may also purchase their jet fuel requirements at the Shenzhen, Zhuhai, Sanya, Haikou, Shanghai Pudong and other small airports from joint ventures in which the CAOSC is a partner. Jet fuel obtained from the CAOSC's regional branches is purchased at uniform prices throughout China that are determined and adjusted by the CAOSC from time to time with the approval of the CAAC and the pricing department of the State Planning Commission (the predecessor of the NDRC) based on market conditions and other factors. As a result, the costs of transportation and storage of jet fuel in all regions of China are spread among all domestic airlines.

Given the constant fluctuation in global oil prices, there is no way to assure that domestic prices for jet fuel do not fluctuate as well. For example, prior to 1994, domestic jet fuel prices were generally below international jet fuel prices. From 1994 to 2006, however, CAOSC's domestic jet fuel prices were above international jet fuel prices, sometimes creating tensions over the fuel supply. In 2007 through the first half of 2008, the crude oil price in the international market reached its historic high level. In response to the pressure imposed by such rocketing price, NDRC increased the domestic price for jet fuel on November 1, 2007 and June 20, 2008, respectively. The increased fuel costs have significantly limited the Company's ability to generate operating profit. In the second half of 2008, the crude oil price in the international market began to decrease continuously. In order to cushion fuel cost pressure faced by Chinese airlines, on December 19, 2008 and January 1, 2009, respectively, NDRC approved reductions in domestic prices for jet fuel. However, the potential benefit of these lower fuel prices may be setoff, to a certain level, by the downward adjustment in fuel surcharges as approved by the NDRC (see "Item 4, "Information on the Company - Business Overview - "Fuel Surcharge" section below for further discussion).

In summary, given the recent volatile fuel price, no assurance can be given that the Company's results will not be negatively impacted by the fluctuation in domestic prices for jet fuel. While we seek to manage the risk of fuel price increases by using derivative contracts and the Company has gained, in 2008, aggregate profits of US\$6.23 million from fuel option contracts, there can be no assurance that, at any given time, the Company will have derivatives in place to provide any particular level of protection against increased fuel costs. Moreover, declines in fuel prices below the levels established in derivative contracts may require us to provide cash collateral to secure the loss positions on such contracts, and if such contracts close when fuel prices are below the applicable levels, we would be required to make payments to close such contracts; these payments would be treated as additional fuel expense.

In addition, jet fuel shortages have occurred in China and, on some rare occasions prior to 1993, required the Company to delay or even cancel flights. Although such shortages have not materially affected the Company's operations since 1993, there can be no assurance that such a shortage will not occur in the future. If such a shortage occurs in the future and the Company is forced to delay or cancel flights due to fuel shortage, its operational reputation among passengers as well as its operations may suffer.

A change in annual average price of US\$1 per tonne of jet fuel affects the Group's annual fuel costs by approximately RMB21 million, assuming no change in volume of fuel consumed. Accordingly, even if the jet fuel supply remains uninterrupted, increases in jet fuel prices will nevertheless adversely impact our financial results.

The Company's net incomes may suffer from an unexpected volatility caused by any fluctuation in the level of fuel surcharges.

The level of fuel surcharges, which is determined by Chinese government, affects domestic customers' air travel demand as well as the Group's ability to generate net incomes. Following a suspension period of more than one year, in 2005, the CAAC and the NDRC decided to resume the imposing of fuel surcharges by Chinese airlines for domestic routes. The level of fuel surcharges, and any adjustment of which, are determined by the CAAC and the NDRC based on such factors as jet fuel price, route miles and the location of destination. Recently, due to the downward trend in domestic fuel prices, the CAAC and the NDRC decided, on December 25, 2008, to reduce fuel surcharges for both domestic and international routes. Thereafter, the CAAC and the NDRC called for a stop on imposing fuel surcharges by Chinese airlines with effect from January 15, 2009. There can be no assurance that the imposing of fuel surcharges will be resumed again in the future.

The Company's net incomes may suffer from an unexpected volatility caused by any fluctuation in the level of fuel surcharges, which in turn may be affected by a number of factors beyond our control. Recent suspension of fuel surcharge may have an impact of stimulating the weakened air travel demand driven by the economic downturn. However, it may also reduce the Company's revenues and therefore cause a shrink in its net incomes. In addition, no assurance can be given that the fuel surcharge suspension will be able to maintain a sustainable increase in air traffic volume, which would be adequate to setoff any resulted reduction of revenues the Company may suffer from.

The Group's results of operations tend to be volatile and fluctuate due to seasonality.

The Group's operating revenue is substantially dependent on the passenger and cargo traffic volume carried, which is subject to seasonal and other changes in traffic patterns, the availability of appropriate time slots for the Group's flights and alternative routes, the degree of competition from other airlines and alternate means of transportation, as well as other factors that may influence passenger travel demand and cargo and mail volume. In particular, the Group's airline revenue is generally higher in the second and third quarters than in the first and fourth quarters. As a result, the Company's results tend to be volatile and subject to rapid and unexpected change.

The Company's operations may be adversely affected by insufficient aviation infrastructure in Chinese commercial aviation industry.

The rapid increase in air traffic volume in China in recent years has put pressure on many components of the Chinese commercial aviation industry, including China's air traffic control system, the availability of qualified flight personnel and airport facilities. Airlines, such as the Company, which have route networks that emphasize short- to medium-haul routes, are generally more affected by insufficient aviation infrastructure in terms of on-time performance and high operating costs due to fuel inefficiencies resulting from the relatively short segments flown, as well as the relatively high proportion of time on the ground during turnaround. All of these factors may adversely affect the perception of the service provided by an airline and, consequently, the airline's operating results. In recent years, the CAAC has placed increasing emphasis on the safety of Chinese airline operations and has implemented measures aimed at improving the safety record of the industry. The ability of the Company to increase utilization rates and to provide safe and efficient air transportation in the future will depend in part on factors such as the improvement of national air traffic control and navigation systems and ground control operations at Chinese airports, factors which are beyond the control of the Company.

The Company faces increasingly intense competition both in domestic aviation industry and in the international market.

The CAAC's extensive regulation of the Chinese commercial aviation industry has had the effect of managing competition among Chinese airlines. Nevertheless, competition has become increasingly intense in recent years due to a number of factors, including relaxation of certain regulations by the CAAC and an increase in the capacity, routes

and flights of Chinese airlines. Competition in the Chinese commercial aviation industry has led to widespread price-cutting practices that do not in all respects comply with applicable regulations. Until the interpretation of CAAC regulations limiting such price-cutting has been finalized and strictly enforced, discounted tickets from competitors will continue to have an adverse effect on the Company's sales.

The Company faces varying degrees of competition on its regional routes from certain Chinese airlines and Cathay Pacific Airways, Dragonair and Air Macau, and on its international routes, primarily from non-Chinese airlines, most of which have significantly longer operating histories, substantially greater financial and technological resources and greater name recognition than the Company. In addition, the public's perception of the safety and service records of Chinese airlines could adversely affect the Company's ability to compete against its regional and international competitors. Many of the Company's international competitors have larger sales networks and participate in reservation systems that are more comprehensive and convenient than those of the Company, or engage in promotional activities, that may enhance their ability to attract international passengers.

Due to limitation on foreign ownership imposed by Chinese government policies, the Company may have no meaningful access to the international equity capital markets.

Chinese government policies limit foreign ownership in Chinese airlines. Under these policies, the percentage ownership of the Company's total outstanding ordinary shares held by investors in Hong Kong and any country outside China ("Foreign Investors") may not in the aggregate exceed 49%. Currently, we estimate that 26.8% of the total outstanding ordinary shares of the Company are held by Foreign Investors. For so long as the limitation on foreign ownership is in force, the Company will have no meaningful access to the international equity capital markets.

Risks relating to the PRC

The Group has significant exposure to foreign currency risk as majority of the Group's lease obligations and bank and other loans are denominated in foreign currencies. Due to rigid foreign exchange control by Chinese government, the Company may face difficulties in obtaining sufficient foreign exchange to pay dividends or satisfy our foreign exchange liabilities.

Under current Chinese foreign exchange regulations, Renminbi is fully convertible for current account transactions, but is not freely convertible for capital account transactions. All foreign exchange transactions involving Renminbi must take place either through the People's Bank of China or other institutions authorized to buy and sell foreign exchange or at a swap centre.

The Group has significant exposure to foreign currency risk as substantially all of the Group's obligations under leases and bank and other loans are denominated in foreign currencies, principally US dollars and Japanese Yen. Depreciation or appreciation of the Renminbi against foreign currencies affects the Group's results significantly because the Group's foreign currency payments generally exceed its foreign currency receipts. The Group is not able to hedge its foreign currency exposure effectively other than by retaining its foreign currency denominated earnings and receipts to the extent permitted by SAFE, or subject to certain restrictive conditions, entering into forward foreign exchange contracts with authorized banks. However, SAFE may limit or eliminate the Group's ability to purchase and retain foreign currencies in the future. In addition, foreign currency transactions under the capital account are still subject to limitations and require approvals from SAFE. This may affect our ability to obtain foreign exchange through debt or equity financing, including by means of loans or capital contributions. No assurance can be given that the Group will be able to obtain sufficient foreign exchange to pay dividends or satisfy our foreign exchange liabilities.

The Group also has exposure to foreign currency risk in respect of net cash inflow denominated in Japanese Yen from ticket sales in overseas branch office after payment of expenses. The Group entered into certain foreign exchange forward option contracts to manage this foreign currency risk. However, like other derivative products, there can be no assurance that such option contracts can provide, at any given time, particular level of protection against foreign exchange risks.

The Company's operations are subject to immature development of legal system in China. Lack of uniform interpretation and effective enforcement of laws and regulations may cause significant uncertainties to the Company's operations.

The Company is organized under the laws of China. The Chinese legal system is based on written statutes and is a system, unlike common law systems, in which decided legal cases have little precedential value. Since 1979, the Chinese government has been developing a comprehensive system of commercial laws and considerable progress has been made in the promulgation of laws and regulations dealing with economic matters, such as corporate organization and governance, foreign investments, commerce, taxation and trade. These laws, regulations and legal requirements are relatively recent, and, like other laws, regulations and legal requirements applicable in China (including with respect to the commercial aviation industry), their interpretation and enforcement involve significant uncertainties.

The PRC new tax law has deprived, or may in the future deprive the Company of preferential income tax rates, which the Company previously enjoyed.

On March 16, 2007, the Fifth Plenary Session of the Tenth National People's Congress passed the Corporate Income Tax Law of the PRC which took effect on January 1, 2008. As a result of the new tax law, the statutory income tax rate adopted by the Company and its subsidiaries has been changed from 33% to 25% with effect from January 1, 2008. Prior to enactment of the new tax law, the headquarters of the Company was taxed at a preferential rate of 18% and the branches and subsidiaries were taxed at rates ranging from 15% to 33%. Pursuant to the new tax law, the income tax rates of entities that previously enjoyed preferential tax rates of 15% and 18% have been revised to 18%, 20%, 22%, 24% and 25% for 2008, 2009, 2010, 2011 and 2012 onwards respectively.

The PRC new tax law may have negative tax impact on holders of H Shares or ADRs of the Company, by requiring the imposition of a withholding tax on dividends paid by a Chinese company to a non-resident enterprise.

The new tax law generally provides for the imposition of a withholding tax on dividends paid by a Chinese company to a non-resident enterprise at a rate of 10%.

For individuals, Chinese tax law generally provides that an individual who receives dividends from the Company is subject to a 20% income tax. A 50% reduction of income tax is granted by Chinese tax law for an individual receiving dividends from a listed company on Shanghai Stock Exchange or Shenzhen Stock Exchange. As a result, the effective tax rate for dividends received by A Share individual holder is 10%. Currently, dividend income received by any foreign individual that holds overseas shares in any Chinese domestic enterprise is temporarily exempt from income tax. In the event that the exemption is discontinued, such payments will be subject to individual income tax at the 20% rate unless the holder is entitled to a tax waiver or a lower tax rate under an applicable double-taxation treaty.

ITEM 4. INFORMATION ON THE COMPANY.

History and Development of the Company

The Company is a joint stock company incorporated in China on March 25, 1995, and is 50.38% owned by CSAHC. The registered address of the Company is Guangzhou Economic & Technology Development Zone, People's Republic of China (telephone no: (86)20-8612-4462, website: www.csair.com).

On March 13, 2003, the Company obtained an approval certificate from the Ministry of Commerce to change to a permanent limited company with foreign investments and on October 17, 2003 obtained a business license for its new status, as a permanent limited company with foreign investments issued by the State Administration of Industry and Commerce of the People's Republic of China.

Pursuant to an extraordinary general meeting of shareholders held on May 21, 2002, a resolution was passed authorizing the Company to issue not more than 1,000,000,000 A Shares of par value of RMB1.00 each. The Company issued and listed its 1,000,000,000 A Shares with a par value of RMB1.00 each on the Shanghai Stock Exchange in July 2003.

Pursuant to a sale and purchase agreement dated November 12, 2004 between the Company, CSAHC, China Northern Airlines Company ("CNA") and Xinjiang Airlines Company ("XJA") which was approved by the Company's shareholders in an extraordinary general meeting held on December 31, 2004, the Company acquired the airline operations and certain related assets of CNA and XJA with effect from December 31, 2004 at a total consideration of RMB1,959 million.

On April 30, 2006, the Company acquired certain assets of CSAHC Hainan Co., Limited ("CSAHC Hainan"), a wholly-owned subsidiary of CSAHC, at a total consideration of RMB294 million.

On June 16, 2007, the Company together with an independent third party established Chongqing Airlines Company Limited ("Chongqing Airlines"), a non-wholly owned subsidiary of the Company. Up to December 31, 2008, the Company has transferred four aircraft to Chongqing Airlines as capital contribution.

On August 14, 2007, the Company signed an agreement to acquire a 51% equity interest of Nan Lung International Freight Company Limited beneficially owned by and registered in the name of Nan Lung Travel & Express (Hong Kong) Limited which is a wholly owned subsidiary of CSAHC and a 100% equity interest in Southern Airlines (Group) Catering Co., Limited, a wholly owned subsidiary of CSAHC for a total consideration of RMB112 million.

On August 14, 2007, the Company signed an agreement to dispose of its 90% equity interest in Guangzhou Aviation Hotel Company Limited to CSAHC at a consideration of RMB75 million.

On June 2, 2008, the Company entered into a framework agreement with Air Bleu Limited for the proposed formation of a foreign funded cargo airline joint venture company in the PRC. Air Bleu Limited is a company controlled by Air France-KLM Group, which is a leading international airlines services provider and has extensive operation experiences in and channel of recourses for its air cargo business. Pursuant to the framework agreement, the joint venture company will be initially held as to 75% by the Company and 25% by Air Bleu Limited. The duration of the joint venture will be thirty years, with the initial total amount of investment and the registered capital to be further agreed between the parties based on the business plan. The joint venture is contemplated to principally engage in domestic and international air cargo transportation and storage activities. The ultimate establishment of the joint venture is subject to the parties entering into a definitive joint venture agreement, and is pending approval from the relevant government authorities.

In August 2008, the Company entered into an agreement with China Post Group to dispose of all of its 49% equity interest in China Postal Cargo Airlines Limited, its jointly controlled entity which China Post Group is the other venturer, at a consideration of RMB210 million and recorded a gain on disposal of RMB143 million.

In December 2008, the Company acquired a 26% equity interest in the China Southern West Australian Flying College Pty Ltd. (the “Australian Pilot College”), a subsidiary of the Company, from CSAHC, and Australian Pilot College became a 91% owned subsidiary of the Company.

Aircraft Acquisitions

Pursuant to the Xiamen Aircraft Acquisition Agreement dated April 18, 2008 between Xiamen Airlines and Boeing, Xiamen Airlines will acquire 20 Boeing B737 series aircraft from Boeing. According to the information provided by Boeing, the aggregate catalogue price for those aircraft is around US\$1,500 million, including price for airframe and engines. The aggregate consideration for the acquisition will be partly payable in cash by Xiamen Airlines, and partly through financing arrangements with banking institutions. The Boeing aircraft will be delivered in stages to Xiamen Airlines during the period commencing from April 2014 to October 2015.

Capital Expenditure

The Group had RMB8,645 million, RMB9,832 million and RMB9,446 million capital expenditures in 2008, 2007 and 2006, respectively. Of such capital expenditures in 2008, RMB281 million was financed by capital leases, RMB7,633 million was financed by bank borrowings while the remaining RMB731 million was financed by internal resources. The capital expenditures were primarily incurred on the additional investments in aircraft and flight equipment under the Group's fleet expansion plans and, to a small extent, additional investments in other facilities and buildings for operations.

Business Overview

General

The Group provides commercial airline services throughout China, Hong Kong, Macau and Taiwan regions, Southeast Asia and other parts of the world. Based on the statistics from the CAAC, the Group is one of the largest Chinese airlines and, as of year end of 2008, ranked first in terms of passengers carried, number of scheduled flights per week, number of hours flown, number of routes and size of aircraft fleet. During the three years ended December 31, 2008, the Group's RPKs increased at a compound annual growth rate of 9.3% from 69,582 million in 2006 to 81,727 million in 2007, and to 83,184 million in 2008, while its capacity, measured in terms of ASKs, increased at a compound annual growth rate of 7.8%, from 97,059 million in 2006 to 109,733 million in 2007, and to 112,767 million in 2008. In 2008, the Group carried 58.24 million passengers and had passenger revenue of RMB50,412 million (US\$7,376 million).

The Group conducts a portion of its airline operations through its airline subsidiaries namely Xiamen Airlines, Shantou Airlines Company Limited ("Shantou Airlines"), Zhuhai Airlines Company Limited ("Zhuhai Airlines"), Guizhou Airlines Company Limited ("Guizhou Airlines") and Chongqing Airlines Company Limited ("Chongqing Airlines") (collectively, the "Airline Subsidiaries"). In 2008, the Airline Subsidiaries carried 14.27 million passengers and had passenger revenue of RMB11,120 million (US\$1,627 million) and accounted for 25% and 22% of the Group's passengers carried and passenger revenue, respectively.

The Group also provides air cargo and mail services. The cargo and mail revenue of the Group decreased by 5.3% to RMB3,501 million (US\$512 million) in 2008 as compared with that of 2007. The Group's airline operations are fully integrated with its airline-related businesses, including aircraft and engine maintenance, flight simulation and air catering operations.

As of the year end of 2008, the Group operated 653 routes, of which 522 were domestic, 103 were international and 28 were regional. The Group operates the most extensive domestic route network among all Chinese airlines. Its route network covers commercial centers and rapidly developing economic regions in Mainland China.

The Group's corporate headquarters and principal base of operations are located in Guangzhou, the capital of Guangdong Province and the largest city in southern China. Located in the rapidly developing Pearl River Delta region, Guangzhou is also the transportation hub of southern China and one of China's major gateway cities. Guangzhou's significance has increased as the transportation infrastructure of Guangdong Province has developed through the construction and development of expressways, an extensive rail network and the port cities of Guangzhou, Shenzhen, Zhanjiang, Zhuhai Shantou and etc.

In December 2005, the Company established a branch company in Beijing and has added wide-body airplanes to its operation base in Beijing, with the view to expanding its Beijing aviation business and building another main hub there in addition to its Guangzhou base. The establishment of Guangzhou and Beijing hubs will facilitate strategic refinement and enhancement of its route network operations, putting the Company in a better position to explore and seize the opportunities in the aviation market.

The Group's operations primarily focus on the domestic market. In addition, the Group also operates regional routes and international flights. As of the year end of 2008, the Group had 28 regional routes and 103 international routes. The Group's regional operations include flights between destinations in China and Hong Kong, Macau and Taiwan. The Group's international operations include scheduled services to the cities in Australia, Belgium, France, India, Iran, Japan, Kazakhstan, Korea, Kyrgyzstan, Nepal, Netherlands, Nigeria, Pakistan, Russia, Saudi Arabia, Tajikistan, UAE, USA and Southeast Asian destinations.

After joining Skyteam Alliance, the Group has established a network reaching 905 destinations globally, connecting 169 countries of regions and covering major cities around the world.

As of December 31, 2008, the Group had a fleet of 348 aircraft, consisting primarily of Boeing 737 series, 747, 757, 777, Airbus 320 series, 300, 330 and McDonnell Douglas 82 & 90. The average age of the Group's registered aircraft was 6.30 years as of the year end of 2008.

Restructuring and Initial Public Offering

As part of China's economic reforms in the 1980's, the PRC State Council directed the CAAC to separate its governmental, administrative and regulatory role from the commercial airline operations that were being conducted by the CAAC and its regional administrators. As a result, CSAHC was established on January 26, 1991 for the purpose of assuming the airline and airline-related commercial operations of the Guangzhou Civil Aviation Administration, one of the six regional bureaus of the CAAC. CSAHC was one of the 55 large-scale enterprises designated by the Chinese government to play a leading role in their respective industries.

CSAHC was restructured in 1994 and 1995 in anticipation of the initial public offering of the Company. The restructuring was effect through the establishment of the Company and the execution of the De-merger Agreement on March 25, 1995 by and between CSAHC and the Company. Upon the restructuring, the Company assumed substantially the entire airline and airline-related businesses, assets and liabilities of CSAHC, and CSAHC retained its non-airline-related businesses, assets and liabilities. All interests, rights, duties and obligations of CSAHC, whenever created or accrued, were divided between the Company and CSAHC based on the businesses, assets and liabilities assumed by each of them under the De-merger Agreement. Under the De-merger Agreement, CSAHC agreed not to conduct or participate or hold any interest in, either directly or indirectly, any business, activity or entity in or outside China that competes or is likely to compete with the commercial interests of the Group, although CSAHC may continue to hold and control its associates existing on the date of the De-merger Agreement and may continue to operate the businesses of such associates. Under the De-merger Agreement, CSAHC and the Company also agreed to indemnify each other against any and all losses, claims, damage, debts or expenses arising out of or in connection with the restructuring. As of the date of this Annual Report, no indemnity has been provided by either CSAHC or the Company.

In July 1997, the Company completed a private placement of 32,200,000 H Shares to certain limited partnership investment funds affiliated with Goldman Sachs & Co. and an initial public offering of 1,141,978,000 H Shares, par value RMB1.00 per share, and listing of the H Shares on the Stock Exchange of Hong Kong Limited (the "Hong Kong Stock Exchange") and ADRs on the New York Stock Exchange. Prior to the private placement and the initial public offering, all of the issued and outstanding shares of capital stock of the Company, consisting of 2,200,000,000 non-tradable Domestic Shares, par value RMB1.00 per share, were owned by CSAHC, which owned and exercised, on behalf of the Chinese government and under the supervision of the CAAC, the rights of ownership of such Domestic Shares. After giving effect to the private placement and the initial public offering, CSAHC maintained its ownership of the 2,200,000,000 Domestic Shares (representing approximately 65.2% of the total share capital of the Company), and were entitled to elect all the directors of the Company and to control the management and policies of the Group. Domestic Shares and H Shares are both ordinary shares of the Company.

In July 2003, the Company issued 1,000,000,000 A Shares with a par value of RMB1.00 each and listed these shares on the Shanghai Stock Exchange. Subsequent to the A Share issue, the shareholding of CSAHC in the Company was reduced from 65.2% to 50.30%.

Share Reform Scheme

Pursuant to relevant PRC laws, the Company launched the share reform scheme in May 2007, whereby all the 2,200,000,000 non-tradable Domestic Shares held by CSAHC shall be converted into tradable A Shares. Upon the completion of such scheme on June 20, 2008, all the non-tradable Domestic Shares have been successfully converted into tradable A Shares, subject to the restriction that CSAHC shall not transfer or trade these shares within 36 months after the commencement date of the share reform scheme (which is June 18, 2007).

Bonus Shares Issue by Conversion of Share Premium

On June 25, 2008, the shareholders of the Company approved a bonus share issue by way of conversion of share premium, and on August 14, 2008, the Ministry of Commerce approved the bonus share issue. The issue has been effected by conversion of share premium on the basis of 5 new shares, credited as fully paid, for every 10 existing shares. Upon the completion of the bonus share issue, which is based on 4,374,178,000 shares in issue as at December 31, 2007, the number of paid up shares has increased by 2,187,089,000 shares to 6,561,267,000 shares.

Non-Public Subscriptions

On December 10, 2008, the Company entered into an A Shares subscription agreement with CSAHC, pursuant to which CSAHC has conditionally agreed to subscribe and the Company has conditionally agreed to allot and issue 721,150,000 new A Shares for a consideration of RMB2,278,834,000, equivalent to the subscription price of RMB3.16 per new A Share.

Separately and on the same date, the Company and Nan Lung (a wholly-owned subsidiary of CSAHC) entered into a H Shares subscription agreement, pursuant to which Nan Lung has conditionally agreed to subscribe and the Company has conditionally agreed to allot and issue 721,150,000 new H Shares for a consideration of RMB721,150,000, equivalent to the subscription price of RMB1.00 (equivalent to approximately HK\$1.13) per new H Share. Upon the completion of both A Share and H Share subscriptions, CSAHC's direct and indirect ownership in the Company will be increased from 50.38% to approximately 59.32% of the issued share capital of the Company.

The subscription agreements were approved in the Extraordinary General Meeting and the respective Class Meetings of shareholders of A and H Shares on February 26, 2009. On June 3, 2009, the Company received the formal approval from CSRC for the proposed non-public issue of H Shares. Up to June 12, 2009, CSRC's formal approval for the proposed non-public issue of A Shares is pending.

Issuance of Short-term Financing Bills and Medium Term Notes

On April 18, 2008, the Company's Board approved the proposed issue of short-term financing bills in the principal amount of up to RMB4 billion in the PRC, and the submission of this proposal to the annual general meeting for the shareholders' approval. On June 25, 2008, shareholders of the Company approved such proposed bill issue at the annual general meeting for the year 2007. The Company believes that the bill issue will provide a further source of funding at an interest rate which is expected to be lower than that for loans from commercial banks, lower the financing cost of borrowings for the Company, and is in the interests of the Company and its shareholders as a whole. The Company has received the acceptance from National Association of Financial Market Institutional Investors to register the Company's short-term financing bills in the amount of RMB3.5 billion for a period up to September 10, 2010. The bills would be jointly underwritten by China CITIC Bank Cooperation Limited and Bank of China Limited. In October 2008, the Company issued short-term financing bills with total face value of RMB2 billion, bearing coupon interest rate at 4.7% with a maturity period of one year for funding of the business activities of the Company.

On May 28, 2008, the Board approved the proposed issue of medium term notes by the Company in the principal amount of up to RMB1.5 billion and the submission of such proposal to the shareholders for their consideration and approval. On June 25, 2008, shareholders of the Company approved such notes issue at the annual general meeting for the year 2007. The Company believes that the notes issue will provide a further source of medium to long term funding at an interest rate lower than the best lending rate for loans from commercial bank, lower the finance costs of borrowings for the Company and improve the debt structure of the Company.

Traffic

The following table sets forth certain statistical information with respect to the Group's passenger, cargo and mail traffic for the years indicated.

Year	Passenger carried		Cargo and Mail Carried (tons)		Total traffic (tons kilometers)	
	Total (in million)	Increase (decrease) over previous year (%)	Total (in thousand)	Increase (decrease) over previous year (%)	Total (in million)	Increase (decrease) over previous year (%)
2006	49.21	11.6	819.0	5.7	8,071.0	10.8
2007	56.90	15.6	872.0	6.5	9,250.0	14.6
2008	58.24	2.3	835.0	(4.2)	9,200.0	(0.5)

Route Network

Overview

The Group operates the most extensive route network among the Chinese airlines. As of December 31, 2008, the Group operated 653 routes consisting of 522 domestic routes, 28 regional routes and 103 international routes.

The Group continually evaluates its network of domestic, regional and international routes in light of its operating profitability and efficiency. The Group seeks to coordinate flight schedules with the Airline Subsidiaries on shared routes to maximize load factors and utilization rates. The acquisition of domestic, regional and international routes is subject to approval of the CAAC, and the acquisition of regional and international routes is also subject to the existence and the terms of agreements between the Chinese government and the government of the Hong Kong SAR, the government of the Macau SAR, the government of Taiwan province and the government of the proposed foreign destination.

In order to expand the Group's international route network, the Group has entered into code-sharing agreements with several international airlines, including Delta Airlines, Asiana Airlines, Japan Air System, Vietnam Airlines, KLM Royal Dutch Airlines and Garuda Indonesian. Under the code sharing agreements, the participating airlines are permitted to sell tickets on certain international routes operated by the Group to passengers using the Group's codes. Similarly, the Group is permitted to sell tickets for the other participating airlines using its "CZ" code. The code sharing agreements help increase the number of the Group's international sales outlets. After joining Skyteam Alliance, the Group has further established a network reaching 905 destinations globally, connecting 169 countries of regions and covering major cities around the world.

Route Bases

In addition to its main route bases in Guangzhou and Beijing, the Group maintains certain regional route bases in Zhengzhou, Wuhan, Changsha, Shenzhen, Shenyang, Changchun, Dalian, Harbin, Urumqi, Haikou, Zhuhai, Xiamen, Shanghai, Xi'an, Fuzhou, Nanning, Guilin, Shantou, Guiyang, Chongqing, Sanya and Beihai. Most of its regional route bases are located in provincial capitals or major commercial centers in the PRC.

The Group believes that its extensive network of route bases enable it to coordinate flights and deploy its aircraft more effectively and to provide more convenient connecting flight schedules and access service and maintenance facilities

for its aircraft. The Group believes that the number and location of these route bases may enhance the Group's ability to obtain the CAAC's approval of requests by the Group to open new routes and provide additional flights between these bases and other destinations in China. Current regulations of the CAAC generally limit airlines to operations principally conducted from their respective route bases.

Domestic Routes

The Group's domestic routes network serves substantially all provinces and autonomous regions in China, including Guangdong, Fujian, Hubei, Hunan, Hainan, Guangxi, Guizhou, Henan, Heilongjiang, Jilin, Liaoning and Xinjiang, and serves all four centrally-administered municipalities in China, namely, Beijing, Shanghai, Tianjin, and Chongqing. In 2008, the Group's most profitable domestic routes were between: Beijing-Guangzhou, Guangzhou-Beijing, Shenzhen-Beijing, Beijing-Shenzhen, Fuzhou-Beijing, Fuzhou-Shanghai, Guangzhou-Shanghai, Shenzhen-Shanghai, Sanya-Beijing, and Shanghai-Guangzhou.

Regional Routes

The Group offers scheduled service between Hong Kong and Guangzhou, Shenyang, Wu Yi Shan, Zhang Jia Jie, Changchun, Yinchuan, Xiamen, Shantou, Beijing, Guilin, Meixian, Haikou, Wuhan, Zhengzhou, Nanning, Changsha and Sanya; between Macau and Fuzhou, Hangzhou, Nanchang, Xiamen and Tianjin; between Taipei and Guangzhou, Shanghai, Fuzhou, Hangzhou; between Taichung and Xiamen. In 2008, the most profitable scheduled regional routes were between: Xiamen-Hong Kong, Hong Kong-Beijing, Guangzhou-Hong Kong, Hong Kong-Guangzhou, Hong Kong-Wuhan, Hong Kong-Guangzhou-Yinchuan, Hong Kong-Shantou, Shantou-Hong Kong, Hong Kong-Zhengzhou, and Wuhan-Hong Kong.

In 2008, the Group conducted a total of 13,382 flights on its regional routes, accounting for approximately 24.4% of all passengers carried by Chinese airlines on routes between Hong Kong, Macau or Taiwan and destinations in China according to CAAC statistics.

Previously, direct flights between Taiwan and Mainland China had only been available during certain festivals. And travelers between Taiwan and China have had to make use of intermediate stops in Hong Kong or elsewhere. Since July 4, 2008, however, the ban on direct flights has been further liberalized to allow direct charter flights on weekends. The Company became the first Chinese carrier to fly nonstop to Taiwan.

In order to further strengthen its presence in Taiwan, on June 23, 2008, the Company entered into a memorandum of cooperation with China Airlines, which is the largest carrier in Taiwan in terms of route network. Based on the memorandum, the scope of cooperation between the parties will cover passenger and cargo carrying, maintenance, and ground handling services.

International Routes

The Group is the principal Chinese airline serving Southeast Asian destinations, including Singapore and major cities in Indonesia, Thailand, Malaysia, the Philippines, Vietnam, Myanmar and Cambodia.

In addition, the Group also provides scheduled services to the cities in Australia, France, India, Iran, Japan, Kazakhstan, Korea, Kyrgyzstan, Nepal, Netherlands, Nigeria, Pakistan, Russia, Saudi Arabia, Tajikistan, Turkmenistan, UAE and USA.

After joining Skyteam Alliance, the Group has established a network reaching 905 destinations globally, connecting 169 countries of regions and covering major cities around the world.

In 2008, the Group's most profitable international routes were: Guangzhou-Beijing-Amsterdam, Seoul-Shenyang, Beijing-Guangzhou-Phnom Penh, Shenyang-Seoul, Seoul-Dalian, Guangzhou-Hanoi, Amsterdam-Beijing-Guangzhou, Dalian-Seoul, Phnom Penh-Guangzhou-Beijing, and Beijing-Dubai-Lagos.

Aircraft Fleet

The Group's fleet plan in recent years has emphasized expansion and modernization through the acquisition of new aircraft, in conjunction with our acquisition of China Northern Airlines Company and Xinjiang Airlines Company, and the retirement of less efficient, older aircraft. As of December 31, 2008, the Group operated a fleet of 348 aircraft with an average age of 6.3 years. Most aircraft of the Group are Boeing and Airbus aircraft. The Group has the largest fleet among Chinese airline companies. Among all the aircraft, 206 aircraft operated by the Group are leased pursuant to various types of leasing arrangements.

The following table sets forth certain information regarding the Group's fleet of 348 aircraft as of December 31, 2008.

Model	Number of Aircraft	Average age (years)	Average Passenger Capacity
Boeing 777-200	4	12.53	380
Boeing 777-21B	6	10.20	292
Boeing 757-200	28	9.89	200
Boeing 747F	2	6.42	n/a
Boeing 737-800	66	2.51	167
Boeing 737-700	43	4.58	138
Boeing 737-500	5	13.18	130
Boeing 737-300	25	14.14	145
Airbus 300-600	6	13.96	272
Airbus 319-100	33	3.24	128
Airbus 320-200	49	6.09	158
Airbus 321-200	31	2.76	182
Airbus 330-200	6	3.04	264
Airbus 330-300	8	0.55	292
McDonnell Douglas 82	12	16.04	144
McDonnell Douglas 90	13	10.85	157
Embraer 145 Jet	6	4.23	50
ATR-72	5	10.95	72
Total	348		

During 2008, the Group continued to expand and modernize its aircraft fleet. The Group's major aircraft transactions included:

In 2008, the Group exercised purchase options of three Boeing 777-200, three McDonnell Douglas 90, five Airbus 320-200 and one Airbus 300-600 upon expiry of the respective lease terms.

Six Airbus 330-300, seven Airbus 321-200 and eight Boeing 737-800 aircraft were acquired under operating lease; two Boeing 757-200 and three Boeing 737-500 aircraft under operating lease were returned during 2008. One Airbus A321-200 aircraft acquired in 2008 were financed by a combination of internal funds, long-term bank loans and capital lease agreements.

In 2008, the Group disposed of one Boeing 757-200 aircraft.

Aircraft Financing Arrangements

Overview

A significant portion of the Group's aircraft is acquired under long-term capital or operating leases or long-term mortgage loans with remaining terms to maturity ranging from one to twelve years. As of December 31, 2008, 60 of the Group's 348 aircraft were operated under capital leases, 146 were operated under operating leases, 42 were financed by long-term mortgage loans, while the remaining were acquired either with cash proceeds or acquired by exercising the purchase options upon expiry of the respective capital leases. The Group's planned acquisition of aircraft in the foreseeable future will generally be made pursuant to operating leases or capital leases. The Group's determination as to its acquisition strategy depends on the Group's evaluation at the time of its capacity requirements,

anticipated deliveries of aircraft, the Group's capital structure and cash flow, prevailing interest rates and other general market conditions.

The following table sets forth, as of December 31, 2008, the number of aircraft operated by the Group pursuant to capital and operating leases and the remaining terms, expressed in years, of such leases.

Model	Capital Lease	Operating Lease	Average Remaining Lease Term
Boeing 777-200 and 777-21B	1	4	3.34
Boeing 757-200	0	9	1.91
Boeing 737-700	9	15	6.29
Boeing 737-800	12	36	6.96
Boeing 737-500	0	5	0.56
Boeing 737-300	0	4	4.20
Airbus 319-100	6	27	6.82
Airbus 320-200	20	16	6.16
Airbus 321-100	7	20	9.25
Airbus 330-200	4	2	8.97
Airbus 330-300	0	8	11.71
McDonnell Douglas 90	1	0	0.15
Total	60	146	

Capital leases

The majority of the capital leases in respect to aircraft and related equipment have terms of ten to twelve years expiring during the years 2009 to 2018. As of December 31, 2008, the Group's aggregate future minimum lease payments (including future finance charges) required under its capital leases were RMB16,036 million. The Group's capital leases typically cover a significant portion of the relevant aircraft's useful life and transfer the benefits and risks of ownership to the Group. Under its capital leases, the Group generally has an option to purchase the aircraft at or near the end of the lease term. As is customary in the case of capital leases, the Group's obligations are secured by the related aircraft, as well as other collateral.

Operating Leases

As of December 31, 2008, the Group's aggregate future minimum lease payments required under its operating leases were RMB33,817 million. As of the year end of 2008, the Group's operating leases had original terms generally ranging from five to fifteen years from the date of delivery of the relevant aircraft, and the remaining terms of these leases ranged from one to twelve years. Pursuant to the terms of the operating leases, the Group is obligated to make rental payments based on the lease term, with no termination payment obligations or purchase option, and the lessor bears the economic benefits and risks of ownership. Under its operating leases, the Group has no option to purchase the aircraft and is required to return the aircraft in the agreed condition at the end of the lease term. Although title to the aircraft remains with the lessor, the Group is responsible during the lease term for the maintenance, servicing, insurance, repair and overhaul of the aircraft.

Pursuant to capital leases or operating leases, the Group is obligated to indemnify the lessors against any withholding or similar taxes that may be imposed on the lessors by taxing authorities in China with regard to payments made pursuant to such leases. In accordance with relevant PRC tax regulations, a PRC lessee is liable to pay PRC withholding tax in respect of any lease payments regularly made to an overseas lessor. Depending on the circumstances, this tax is generally imposed at a fixed rate ranging from 10% to 20% of the lease payments, or in certain cases, the interest components of such payments. Pursuant to an approval document from the State Taxation Bureau, lease arrangements executed prior to September 1, 1999 are exempt from PRC withholding tax. The PRC

withholding tax payable in respect of the operating leases executed after September 1, 1999 of RMB142 million, RMB143 million and RMB60 million during 2008, 2007 and 2006 respectively, have been included as part of the operating lease charges.

In August 2008, Xiamen Airlines, a non wholly-owned subsidiary of the Company entered into an operating lease agreement with GE Commercial Aviation Services, and such agreement has been approved by the Board of the Company on August 18, 2008. Pursuant to the agreement, Xiamen Airlines plans to lease seven Boeing B737-800 aircraft by way of operating lease. The term of the lease is eight years from 2011 to 2019, with the price for the operating lease to be determined by the two parties with reference to the prevailing market price. The Board believes that the introduction of new aircraft under the operating lease is beneficial to the implementation of the Group's development strategy, will improve the Group's operating capacity to accommodate the continuous growth in demand for aviation services in the PRC, serve passengers with better services, and enhance the competitiveness of the Group.

Aircraft Flight Equipment

The jet engines used in the Group's aircraft fleet are manufactured by General Electric Corporation, Rolls-Royce plc, United Technologies International, Inc., CFM International, Inc. and International Aviation Engines Corporation. The Group had 66 and 71 spare jet engines for its fleet as of the year end of 2008 and 2007, respectively. The Group determines its requirements for jet engines based on all relevant considerations, including manufacturers' recommendations, the performance history of the jet engines and the planned utilization of its aircraft. Acquisition of rotables and certain of the expendables for the Group's aircraft are generally handled by Southern Airlines (Group) Import & Export Trading Corporation ("SAIETC"), a subsidiary of CSAHC acting as agent for the Group, in consideration of an agency fee. The Group arranges the ordering of aircraft, jet engines and other flight equipment for the Airline Subsidiaries and keeps an inventory of rotables and expendables for the Airline Subsidiaries.

Aircraft Maintenance

A major part of the maintenance for the Group's fleet other than overhauls of jet engines is performed by GAMECO, a jointly controlled entity established by the Company, Hutchison Whampoa ("Hutchison") and South China International Aircraft Engineering Company Limited, consistent with the Group's strategy to achieve fully integrated airline operations and to assure continued access to a stable source of high quality maintenance services. The remaining part of the maintenance for the Group's fleet other than overhauls of jet engines is performed by service providers in China and overseas. GAMECO performs all types of maintenance services, ranging from maintenance inspections performed on aircraft ("line maintenance services") to major overhaul performed at specified intervals. GAMECO was the first of three aircraft maintenance facilities in China having been certified as a repair station by both the CAAC and the Federal Aviation Administration. In March 1998, GAMECO received an approval certificate from the United Kingdom Civil Aviation Authority for the repair and maintenance of aircraft and aircraft engines.

The Group believes that GAMECO performs major maintenance checks on the Group's aircraft within time periods generally consistent with those of large international airline maintenance centers. GAMECO's repair and maintenance capabilities include overhaul of more than 65% of the Group's aircraft. Although rotables for the Group's aircraft are generally imported through SAIETC, a portion of expendables and other maintenance materials are directly imported by GAMECO. GAMECO also provides line maintenance services to 13 other Chinese airlines and 19 international airlines. GAMECO provides heavy maintenance services to 6 other Chinese airlines and 11 international airlines.

The Company and GAMECO had entered into an Aircraft Maintenance and Engineering Agreement for the provision of aircraft repair and maintenance services. On May 17, 1996, the Company and GAMECO entered into an agreement regarding the fee arrangement for the provision of such repair and maintenance services. Pursuant to such fee agreement and other subsequent agreements, GAMECO charged the Company for expendables at cost plus 16%, and labor costs at US\$31 per hour during 2008. The amounts incurred by the Group for such repair and maintenance services were RMB746 million, RMB661 million, and RMB686 million for the years ended December 31, 2008, 2007 and 2006, respectively.

Overhauls of jet engines are performed by MTU Maintenance Zhuhai Co., Ltd., a jointly controlled entity of the Company and MTU Aero Engines GmbH, and also by overseas qualified service providers in Germany, Malaysia, Canada and England. Repair fees amounting to RMB383 million, RMB386 million and RMB497 million were paid to MTU Zhuhai for the years ended December 31, 2008, 2007 and 2006, respectively.

Safety

The Group endeavors to maintain strict compliance with all laws and regulations applicable to flight safety. In addition, the Group has adopted measures to eliminate or minimize factors that may impair flight safety, including specialized training programs and safety manuals. The Air Safety Management Department of the Company implements safety-related training programs on an ongoing basis in all of the Group's operations to raise the safety awareness of all employees. As a result, overall flight safety has gradually improved. There were no serious incidents involving casualty or flight damage throughout the three years ended December 31, 2008. For minor "incidents" which include various events and conditions prescribed by the CAAC which do not involve serious personal injury or material damage to flight equipment, the Group has kept the number consistently below the standard prescribed by the CAAC. For example, the Company's "Accident Signs Per Ten Thousands Hours Ratio" was 0.064, 0.065 and 0.064 in 2008, 2007 and 2006, respectively. In comparison, CAAC's published maximum acceptable Accident Signs Per Ten Thousands Hours Ratio was 0.7 in 2008, 2007 and 2006. This ratio is defined as the occurrence of one incident for every 10,000 hours of flight time. In 2008, the Group strengthened its flight safety management as per the internal and external safety requirements. By July 2008, the Group's continuous safe flight span totaled to 5 million hours, for which the Group received the "Five-Star Flight Safety Award" from CAAC, making it the first in the aviation industry to receive such a great honor. That also set a new safe flight record in the aviation industry in China.

Jet Fuel

Jet fuel costs typically represent a major component of an airline's operating expenses. The Group's jet fuel costs accounted for 37.4%, 34.6% and 35.2% of the Group's operating expenses for the years ended December 31, 2008, 2007 and 2006, respectively. Like all Chinese airlines, the Group is generally required by the Chinese government to purchase its jet fuel requirements from regional branches of CAOSC and Bluesky Oil Supplies Company, except at the Shenzhen, Zhuhai, Sanya, Haikou, Shanghai Pudong and other small airports where jet fuel is supplied by Sino-foreign joint venture in which CAOSC is a joint venture partner. CAOSC is a State-owned organization controlled and supervised by the CAAC that controls the importation and distribution of jet fuel throughout China.

Jet fuel obtained from CAOSC's regional branches is purchased at uniform prices throughout China that are determined and adjusted by CAOSC from time to time with the approval of the CAAC and the pricing department of the NDRC based on market conditions and other factors. As a result, the costs of transportation and storage of jet fuel in all regions of China are spread among all domestic airlines. Jet fuel costs in China are influenced by costs at State-owned oil refineries and limitations in the transportation infrastructure, as well as by insufficient storage facilities for jet fuel in certain regions of China.

Prior to 1994, domestic jet fuel prices were generally below international jet fuel prices. The Chinese government had gradually increased domestic jet fuel prices in order to reflect more accurately the costs of supplying jet fuel in China. As a result, domestic jet fuel prices have become higher than those in the international market since the beginning of 1994. In 2007 through the first half of 2008, the crude oil prices in the international market reached historic highs. In response to the pressure imposed by such rocketing prices, on November 1, 2007 and June 20, 2008, respectively, NDRC increased the domestic price for jet fuel. Thereafter, in order to cushion fuel cost pressure faced by Chinese airlines, on December 19, 2008 and January 1, 2009, respectively, NDRC approved reductions in domestic prices for jet fuel.

The average cost paid for jet fuel by the Group in 2008 was RMB7,497 per ton, which represents a 26% increase from that of 2007.

In addition to purchases of jet fuel from CAOSC, the Group is also permitted by the Chinese government to purchase a portion of its jet fuel requirements for its international flights from foreign fuel suppliers located outside China at

prevailing international market prices. Jet fuel purchased from such sources outside China accounted for approximately 9% and 12% of the Group's total jet fuel consumption in 2008 and 2007, respectively.

Fuel Surcharge

According to the relevant regulations promulgated by the NDRC and the CAAC, domestic airlines imposed fuel surcharges for all the domestic routes (excluding those from the mainland PRC to Hong Kong and Macau) with effect from August 1, 2005 (based on flight time). The imposition of the fuel surcharge helped relieve, to a certain extent, the burden of high jet fuel cost, on the Group. The level of fuel surcharges, and any adjustment of which, are determined by CAAC and NDRC based on such factors as jet fuel price, route miles and the location of destination. Recently, due to the downward trend in domestic fuel prices, on December 19, 2008, the CAAC and the NDRC decided, on December 25, 2008, to reduce fuel surcharges for both domestic and international routes. Thereafter, the CAAC and the NDRC called for a stop on imposing fuel surcharges by Chinese airlines with effect from January 15, 2009. Such suspension on imposing fuel surcharge is designed to stimulate the weakened air travel demand driven by recent economic downturn, but may limit the Group's ability to generate revenues and net incomes. No timetable has been given by the CAAC or the NDRC as to the resumption of imposing fuel surcharge by Chinese airlines.

Flight Operations

Flight operations for the Group's flights originating in Guangzhou are managed by the Company's flight operations and marketing divisions, which are responsible for formulating flight plans and schedules consistent with route and flight approvals received from the CAAC. The Company's flight operations center in Guangzhou is responsible for the on-site administration of flights, including the dispatch and coordination of flights, deployment of aircraft, ground services and crew staffing. In addition, each of the Airline Subsidiaries maintains flight operations centers at all servicing airports for on-site administration of their flights. The Company's general dispatch offices are responsible for monitoring conditions on the Group's route network, administering the Group's flight plans, collecting and monitoring navigation data and analyzing and monitoring airport conditions.

To enhance its management of flight operations, the Group's computerized flight operations control system (SOC) began operation in May 1999. The system utilizes advanced computer and telecommunications technology to manage the Group's flights on a centralized, real-time basis. The Group believes that the system will assist it to (i) compile flight schedules more efficiently; (ii) increase the utilization of aircraft; (iii) allow real-time tracking of all of the Group's flights; and (iv) improve coordination of the Group's aircraft maintenance and ground servicing functions.

Training of Pilots and Flight Attendants

The Group believes that its pilot training program which was established in cooperation with the CAAC affiliated Beijing Aeronautics and Aviation University (the "BAAU") has significantly improved the quality of the training received by the Group's pilots and has helped maintain the quality of the Group's staff of pilots at a level consistent with the expansion of operations called for by the Group's business strategy.

In the Group's pilot training program, trainees have two years of theoretical training at the BAAU. After successful completion of academic and physical examinations, the trainees receive flight training for a period of approximately 20 months at Australian Pilot College, a company that is 91% owned by the Company and 9% owned by CSAHC. Each trainee at the Australian Pilot College is required to fly at least 230 hours before being awarded a flight certificate. Graduates of the BAAU and the Australian Pilot College are hired by the Group as trainee pilots after passing a CAAC-administered examination to obtain a pilot license. The total training period for the Group's trainee pilots is approximately four years. The Group has about 1,900 trainees as at the end of April 2009, about 400 trainees are expected to graduate in 2009.

As part of the pilot training program, trainee pilots receive their initial training in the operation of a specific aircraft with Zhuhai Xiang Yi Aviation Technology Company Limited ("Zhuhai Xiang Yi"), a jointly controlled entity between the Company and CAE International Holdings Limited, which also provides training to pilots from other Chinese

airlines. Zhuhai Xiang Yi is equipped with simulators for all models of aircraft currently operated by the Group and provides flight simulation training services to the Group.

The Group's pilots are required to be licensed by the CAAC, which requires an annual recertification examination. The Group's pilots attend courses in simulator training twice annually and in simulator emergency procedures annually. The Group also conducts regular advanced training courses for captains and captain candidates. Pilots advance in rank based on number of hours flown, types of aircraft flown and their performance history.

The Group used to fund the training of its recruited pilots in previous years and, as a result, incurred significant costs over the years. Recently, there has been a trend in the financing of pilot training worldwide from employer-sponsored to self-sponsored scheme. Such a change will not only cut down the Group's training expenses significantly, but also ensures the long-term dedicated service of the pilots. Starting from 2007, the Group began to recruit pilots under the self-sponsored training arrangement. On August 27, 2008, the Board approved the Company to provide a guarantee with joint liability for the loans incurred under the self-sponsored pilot training program of 2008 in an aggregate amount of RMB213,600,000. As at December 31, 2008, the Group has provided a guarantee with joint liability for the loans of such self-sponsored pilots in an aggregate amount of RMB90,858,000, under which an aggregate of personal bank loans of RMB13 million were drawn down from the banks. Under the program, the self-sponsored pilots are bound to enter into service contracts with the Group when they finish their training courses. They have the choices to repay their loans in advance or in instalments.

The Group conducts theoretical and practical training programs for its flight attendants at its Flight Attendants Training Center in Guangzhou (the "Guangzhou Training Center"). The Guangzhou Training Center is equipped with computerized training equipment, as well as simulator cabins for all models of aircraft currently operated by the Group. At the Guangzhou Training Center, flight attendants of the Group receive comprehensive training in areas such as in-flight service, emergency evacuation and water rescue.

Ground Services

The Group makes arrangements with airport authorities, other airlines or ground services companies for substantially all ground facilities, including jet-ways, waiting areas, ticket counters and support services buildings, at each airport that it serves. The Group pays landing, parking and other fees to such airports, including Guangzhou Baiyun Airport. At domestic airports, such fees are generally determined by the CAAC.

At Guangzhou Baiyun Airport, the Group operates its own passenger check-in, cargo, mail and baggage handling, aircraft maintenance and cleaning services. The Group also provides such services to other airlines that operate in Guangzhou Baiyun Airport.

Ground services at the airports in Shenzhen, Changsha, Wuhan, Zhengzhou, Haikou, Zhuhai, Xiamen, Fuzhou, Guilin, Shantou, Guiyang and Beihai are primarily operated directly by the Group. Ground services at the airport in Beijing are primarily provided by Beijing Southern Airlines Ground Services Company Limited, a jointly controlled entity between the Company and Beijing Aviation Ground Services Co. Ltd., since April 2004. Ground services at other airports in China are provided to the Group by local airport authorities or local airlines pursuant to various service agreements. Ground services and other services at airports outside China are provided to the Group by foreign services providers pursuant to various service agreements with such parties. All such agreements of the Group are short-term and otherwise on terms that are customary in the industry.

Air Catering

The Company owns a 55% equity interest in Guangzhou Nanland Air Catering Company Limited ("Nanland") as of December 31, 2008. Nanland provides in-flight meals, snacks, drinks and related services for all of the Group's flights originating in Guangzhou and substantially all other flights departing from Guangzhou Baiyun Airport. The Group contracts with various air catering suppliers with respect to in-flight catering services for flights originating from other airports, generally on an annual basis and otherwise on terms that are customary in the industry. In January 2008, the Company disposed of a 20% equity interest in Nanland to Cie Exploitation Des Services Auxiliaires Aeriens Servair with a consideration of EUR5.8 million.

To facilitate the Company to optimize its assets structure, better tightening its cost control, reduce the number of connected transactions and enhance the independence of the Company's operations in the long-run, the Company

acquired 100% interest in Southern Airlines Group Air Catering Company Limited (“SAG Air Catering”) on August 31, 2007 from CSAHC. SAG Air Catering mainly provides in-flight meals to airlines for different flights of the Company originating or stopping at the domestic airports, mainly in northern China and Xinjiang regions.

Cargo and Mail

The Group also provides air cargo and mail services. A significant portion of these services are combined with passenger flights services. Currently, the Group has two Boeing 747-400 freighters mainly servicing four international cargo routes, Shenzhen to Shanghai to Anchorage to Chicago, Shenzhen to Anchorage to Chicago, Shanghai to Anchorage to Chicago and Shenzhen to Shanghai to Amsterdam.

Currently, the Group conducts its cargo business primarily through its cargo division in Shenzhen.

Sales, Reservations and Marketing

Passenger Ticket Sales and Reservations

The Group's ticket sales and reservations are conducted by or through independent sales agents and the Group's own network of exclusive sales offices as well as the CAAC's sales offices and CSAHC's associates. The Group has sales offices in Guangzhou and its other route bases. In addition, the Group maintains regional sales offices in other cities in China, including Beijing and Shanghai. The Group maintains international sales offices in Almaty, Amsterdam, Ashkhabad, Astana, Baku, Bangkok, Bishkek, Daejeon, Delhi, Dushanbe, Fukuoka, Hanoi, Ho Chi Minh City, Islamabad, Irkutsk, Jakarta, Jeddah, Khabarovsk, Kathmandu, Kuala Lumpur, Lagos, Los Angeles, Luanda, Manila, Melbourne, Moscow, Novosibirsk, Osaka, Osh, Paris, Penang, Phnom Penh, Pusan, Sapporo, Seoul, Sharjah, Singapore, Sydney, Taegu, Tashkent, Teheran, Tokyo, Vientiane, Vladivostok and Yangon.

The Group has agency agreements with airlines in the Asia-Pacific region, Europe, the United States and Africa for the processing of ticket sales and reservations on a reciprocal basis. In 2008, approximately 8.15% of all ticket sales for the Group's scheduled flights were made by the Group's network of sales offices and CSAHC's associates. The Group also sells tickets and accepts reservations through an extensive network of non-exclusive independent sales agents. Under the agency agreements with these sales agents, the Group pays commissions based on the value of tickets sold. The Group pays independent sales agents a commission of 1.5%-9% of the ticket price. Sales agents are typically permitted to withhold their commission from the proceeds of ticket sales that are remitted to the Group. In 2008, independent sales agents accounted for approximately 91.85% of the Group's ticket sales for its scheduled flights.

Substantially all of the Group's sales offices and agents in China are linked electronically to the CAAC's computerized ticketing and reservations system, which is in turn linked to all domestic airlines for flights throughout China. The Group has also entered into membership agreements with several international reservation systems, including ABACUS in Southeast Asia, SABRE and GALILEO in the United States, AMADEUS in Europe and INFINI in Japan. These systems facilitate reservations and sales of tickets for the Group's international flights. During 2008, the Group further improved and optimized its online sales network, and launched Tencent sales counters in cooperation with Tencent Technology Limited, thus expanded the consumer sales network of the Group. Meanwhile, the Group upgraded and reconstructed the SMS platform, and launched the 95539 services hotlines, which provide SMS information services on mileage, flight schedule, flight status, and air ticket price.

Cargo

The Group's cargo and mail services are promoted through its own cargo divisions and independent cargo agents both within and outside China that track available space among all airlines. In particular, the Group employs a number of cargo agents in the Pearl River Delta region. The Group generally pays such agents a commission of 4% - 5% of the relevant cargo freight rate for domestic and international services.

On June 2, 2008, the Company entered into a framework agreement with Air Bleu Limited for the proposed formation of a foreign funded cargo airline joint venture company in the PRC. Air Bleu Limited is a company controlled by Air France-KLM Group, which is a leading international airlines services provider and has extensive operation experiences in and channel of resources for its air cargo business. Pursuant to the framework agreement, the joint venture will be initially held as to 75% by the Company and 25% by Air Bleu Limited. It is intended that the joint venture will principally engage in domestic and international air cargo transportation and storage activities. The Board believes that, through the co-operation, the Company can, among other things, leverage on Air France-KLM Group's leading market position in air cargo business and reduce the operation risk of its air cargo business. However, the ultimate establishment of the joint venture is subject to the entering into the joint venture agreement by the Company and Air Bleu Limited, and is pending approval from the relevant government authorities. The Company will, if required or as otherwise considered appropriate, make further announcement when the formation of the joint venture takes place.

Promotional and Marketing Activities

The Group engages in regular promotional and marketing activities in an effort to increase its market share. The Group's promotional and marketing activities for domestic routes emphasize safety, passenger comfort and the frequency of the Group's flights. The Group's promotional and marketing activities for international and regional passengers emphasize the Group's quality of service, extensive route network in China and greater frequency of flights relative to other Chinese airlines. In addition, the Group also promotes and markets its regional and international routes on the basis of price.

The Group has been seeking to increase its name recognition by offering new services to passengers. For example, the Group was the first Chinese airline to provide off-airport check-in services. The Group also offers transfer and baggage "through-handling" services to passengers connecting to other airlines, including passengers connecting in Hong Kong for flights to Taiwan. The Group widened its use of information technology and introduced new services such as cell phone check-in, and SMS platforms. During the Beijing Olympic Games, the Group launched a special promotion known as "Welcome the Olympic Games with Gold Medal Services" and successfully fulfilled its duties to deliver quality services for the Beijing Olympic Games and Paralympics Games.

On the wake of permitted direct flights on weekends between Taiwan and Mainland China starting from July 4, 2008, the Company became the first Chinese carrier to fly nonstop to Taiwan. By taking advantage of such further liberalized air travel policy between Taiwan and Mainland China, the Company has taken measures to explore opportunities presented by and increase its name recognition in Taiwan market. On June 23, 2008, the Company entered into a memorandum of cooperation with China Airlines, which is the largest carrier in Taiwan by route network. Based on the memorandum, the scope of cooperation between the parties will cover passenger, cargo, maintenance, and ground handling services. The Company believes that its strategic collaboration with China Airlines will be beneficial to both parties, expand their route network worldwide, increase their freight load factors, reduce labor and operating costs, and enhance the competitiveness of both airlines in the global air travel market.

To enhance relationships with its passengers, the Group has launched two frequent flyer programs, namely the "China Southern Airlines Sky Pearl Club", and the "Egret Mileage Plus". By the end of 2008, the Group had approximately 6,340,000 members under these programs.

Regulation

The Chinese commercial aviation industry is subject to a high degree of regulation and oversight by the CAAC. Regulations and policies issued or implemented by the CAAC encompass substantially all aspects of airline operations, including the approval of domestic, regional and international route allocation, published air fares, aircraft acquisition, jet fuel prices and standards for aircraft maintenance, airport operations and air traffic control. The Civil Aviation Law, which became effective in March 1996, provides a framework for regulation of many of these aspects of commercial aviation activities. Although China's airlines operate under the supervision and regulation of the CAAC, they are accorded an increasingly significant degree of operational autonomy, including with respect to the application for domestic, regional and international routes, the allocation of aircraft among routes, the purchase of flight equipment, the pricing of air fares within a certain range, the training and supervision of personnel and their day-to-day operations.

As an airline providing services on international routes, the Group is also subject to a variety of bilateral civil air transport agreements that provide for the exchange of air traffic rights between China and various other countries. In addition, China is a contracting state, as well as a permanent member, of the International Civil Aviation Organization (the "ICAO"), an agency of the United Nations established in 1947 to assist in the planning and development of international air transport, and is a party to many other international aviation conventions. The ICAO establishes technical standards for the international aviation industry. The Group believes that it, in all material respects, complies

with all such technical standards.

29

Route Rights

Domestic Routes. The right of any Chinese airline to carry passengers or cargo on any domestic route must be obtained from the CAAC. Non-Chinese airlines are not permitted to provide domestic air service between destinations in China. The CAAC's policy is to assign a domestic route to the Chinese airline that is best suited to serve the route based, in part, on the location of the airline's main or regional base at the point of origin. Under current regulations, airlines are generally expected to operate mainly from their route bases, and flights within a particular region are expected to be served by airlines based in that region. The Group believes that these regulatory parameters benefit airlines, such as the Group, that have a large number of regional route bases. The CAAC also considers other factors that may make a particular airline suitable to operate a domestic route, including the applicant's general operating authority, compliance with pricing regulations and regulations applicable to safety and service quality, market demand, the ability of the applicant in terms of its existing routes, and airport facilities and related support services.

The CAAC considers market conditions for a domestic route in determining whether the route should be allocated to one or more airlines. Generally, the CAAC requires the passenger load factor on certain route should be above the average rate of the whole market in the last flight season before additional flights and participants may be put on that route.

Regional Routes. Hong Kong and Macau routes and landing rights are derived from agreements between the Chinese government and the government of the Hong Kong SAR, and between the Chinese government and the government of Macau SAR. Such rights are allocated by the CAAC among the four Chinese airlines permitted to fly to Hong Kong or Macau. The Group understands that the criteria for determining whether a Hong Kong and Macau route will be allocated to a particular airline include market demand, the ability of the airline to service the route and the appropriateness of the airline's aircraft for such route.

A number of Hong Kong routes are operated by Chinese airlines on a "charter" flight basis. Permission to operate these flights is in theory subject to monthly review by the CAAC and the Hong Kong Civil Aviation Department. The CAAC has informally indicated that it primarily considers market demand and airline capability in granting permission for such flights.

Previously, direct flights between Taiwan and Mainland China had only been available during certain festivals. Since July 4, 2008, however, the ban on direct flights has been further liberalized to allow direct charter flights on weekends. The Company became the first Chinese carrier to fly nonstop to Taiwan. Previously, travelers between Taiwan and China have had to make use of intermediate stops in Hong Kong or elsewhere.

International Routes. International route rights, as well as the corresponding landing rights, are derived from air services agreements negotiated between the Chinese government, through the CAAC, and the government of the relevant foreign country. Each government grants to the other the right to designate one or more domestic airlines to operate scheduled service between certain destinations within each of such countries. Upon entering into an air services agreement, the CAAC determines the airline to be awarded such routes based on various criteria, including the availability of appropriate aircraft, flight and management personnel, safety record, the overall size of the airline, financial condition and sufficiency of assets to bear civil liabilities in international air services. These route rights may be terminated by the CAAC under special circumstances.

The criteria for determining whether an international route will be allocated to a second airline generally include (i) the terms of the relevant bilateral civil aviation agreement; (ii) consistency with overall national plans and the national interest and the enhancement of reasonable competition; and (iii) whether the international airports to be used are sufficient for the aircraft flown and employ security measures consistent with international standards.

In addition, if the relevant bilateral civil aviation agreement permits more than one Chinese airline to operate a particular international route, the CAAC will only permit a second airline to operate on such route if the number of passengers carried annually exceeds 100,000 and if there is a minimum average load factor of 68% for routes with at least five weekly flights by Chinese airlines, or 80% for routes with four or fewer weekly flights by Chinese airlines.

Air Fare Pricing Policy

Pursuant to “Pricing Reform of Domestic Civil Aviation” as approved by the State Council of the PRC effective on April 20, 2004, prices on domestic routes now fluctuate freely within a predetermined range. Instead of direct supervision by setting prices of air tickets through a local price bureau, the government now provides guidance on domestic flights and domestic civil aviation is controlled by the government indirectly. Market-oriented pricing policy was introduced and pricing system has been adjusted as a result of the above pricing reform.

Published air fares of Chinese airlines for the Hong Kong and Macau routes are determined by the CAAC and the relevant civil aviation authorities in Hong Kong or Macau, subject to consultation between the relevant Chinese airlines and Hong Kong or Macau airlines. Airlines may offer discounts on flights on their Hong Kong regional routes. With respect to the Taiwan routes, the air fares are currently determined by Chinese airlines at their own discretion and may be subject to certain pricing guidance to be issued by the CAAC in the future.

Published air fares of Chinese airlines for international routes are determined through consultation between the relevant Chinese airlines and foreign airlines in accordance with the civil aviation agreements between the Chinese government and the relevant foreign government, taking into account the international air fare standards established through the International Air Transport Association. All air fares for international routes must be approved by the CAAC. Discounting of published international air fares is permitted.

Acquisition of Aircraft and Flight Equipment

The CAAC requires all Chinese airlines to acquire their aircraft through China Aviation Supplies Import and Export Corporation (“CASC”), an entity controlled by the CAAC. If a Chinese airline plans to acquire an aircraft, the airline must first seek approval from the CAAC and NDRC. The airline must, as a condition of approval, provide specific acquisition plans, which are subject to modification by the CAAC and NDRC. If the CAAC and NDRC approve an aircraft acquisition, the airline negotiates the terms of the acquisition with the manufacturer together with CASC because CASC possesses the license required to import or export aircraft, and CASC receives a commission in respect thereof. Most Chinese airlines are also required to acquire their aircraft engines, spare parts and other flight equipment through CASC. The Company and a few other Chinese airlines are permitted to import jet engines and other flight equipment for their own use without the participation of CASC. In the case of the Company, SAIETC acts as its import agent and is paid an agency fee for its services.

Jet Fuel Supply and Pricing

CAOSC and Bluesky Oil Supplies Company, companies controlled and supervised by the CAAC, are the only jet fuel supply companies in China, with the exception of the joint venture jet fuel supply companies that supply the Shenzhen, Zhuhai, Sanya, Haikou, Shanghai Pudong and other small airports, in each of which CAOSC is a partner. Airlines are generally not permitted to buy jet fuel from other suppliers in their domestic operations, since the direct import of jet fuel for domestic purposes is prohibited. As a result, all Chinese airlines purchase their domestic jet fuel supply requirements (other than the above mentioned exceptions) from the seven regional branches of CAOSC. Jet fuel obtained from such regional branches is purchased at uniform prices throughout China that are determined and adjusted by CAOSC from time to time with the approval of the CAAC and the pricing department of the NDRC based on market conditions and other factors.

Safety

The CAAC has made the improvement of air traffic safety in China a high priority and is responsible for the establishment of operational safety, maintenance and training standards for all Chinese airlines. The Chinese airlines are required to provide monthly flight safety reports to the CAAC, including reports of flight or other incidents or accidents and other safety related problems involving such airline’s aircraft occurring during the relevant reporting period. The CAAC periodically conducts safety inspections on individual airlines.

The CAAC oversees the standards of all Chinese airline pilots through its operation of the CAAC Aviation College. The CAAC Aviation College is a monitoring unit located in Tianjin which implements a uniform pilot certification process applicable to all Chinese airline pilots and is responsible for the issuance, renewal, suspension and cancellation of pilot licenses. Every pilot is required to pass CAAC-administered examinations before obtaining a pilot license and is subject to an annual recertification examination.

All aircraft operated by Chinese airlines, other than a limited number of leased aircraft registered in foreign countries, are required to be registered with the CAAC. All aircraft operated by Chinese airlines must have a valid certificate of airworthiness, which is issued annually by the CAAC. In addition, maintenance permits are issued to a Chinese airline only after its maintenance capabilities have been examined and assessed by the CAAC. Such maintenance permits are renewed annually. All aircraft operated by Chinese airlines may be maintained and repaired only by CAAC-certified maintenance facilities, whether located within or outside China. Aircraft maintenance personnel must be certified by the CAAC before assuming aircraft maintenance posts.

Security

The CAAC establishes and supervises the implementation of security standards and regulations for the Chinese commercial aviation industry. Such standards and regulations are based on Chinese laws, as well as standards developed by international commercial aviation organizations. Each airline and airport in China is required to submit to the CAAC an aviation security handbook describing specific security procedures established by such airline or airport for the day-to-day operations of commercial aviation and procedures for staff training on security. Such security procedures must be based on relevant CAAC regulations and international commercial aviation treaties. Chinese airports and airlines that operate international routes must also adopt security measures in accordance with the requirements of the relevant international agreements.

Noise and Environmental Regulation

All airlines in China must comply with the noise and environmental regulations of the PRC State Environmental Protection Agency. Applicable regulations of the CAAC permit Chinese airports to refuse take-off and landing rights to any aircraft that does not comply with noise regulations.

Chinese Airport Policy

The CAAC supervises and regulates all civilian airports in China. The local government of the PRC manages the administration of most civilian airports in China, including the Guangzhou Baiyun Airport with limited exceptions. Airports in China are also subject to regulation and ongoing review by the CAAC, which determines take-off and landing charges, as well as charges for the use of airports and airport services.

Competition

The CAAC's extensive regulation of the Chinese commercial aviation industry has had the effect of managing competition among Chinese airlines. Nevertheless, competition has become increasingly intense in recent years due to a number of factors, including relaxation of certain regulations by the CAAC, an increase in the number of Chinese airlines and an increase in the capacity, routes and flights of Chinese airlines.

In the Chinese aviation industry, the three dominant airlines are the Group, Air China and China Eastern Airlines. In 2008, these three airlines together controlled approximately 67.4% of the commercial aviation market in China as measured by passengers carried.

Most major Chinese airlines have in recent years significantly expanded their fleets, while at the same time passenger traffic has not increased proportionately. This has resulted in a reduction in the passenger load factors for most Chinese airlines. As a result, Chinese airlines are required to be more competitive with respect to, for example, quality of service, including ticketing and reservations, in-flight services, flight scheduling and timeliness.

The Group expects that competition in China's commercial aviation industry will continue to be intense. The Group will also face increasing competition from alternative means of transport, such as highway and rail, as China's

transportation infrastructure improves.

Relative to other Chinese airlines, however, the Group believes that it possesses certain competitive advantages. The Group has the most extensive route network and the largest number of regional route bases among Chinese airlines, which the Group believes places it in a favorable position in the route allocation process. The Group also has the largest aircraft fleet of any Chinese airline, which, together with the Group's planned aircraft acquisitions, will permit the Group to expand its operations and to improve the deployment of the aircraft in its fleet. The Group also believes that its dominant presence in the populous and economically developed southern and central regions of China provides it with a competitive advantage in attracting new customers and that its fully integrated flight training, aircraft and engine maintenance, and air catering operations enable it to achieve and maintain high quality service to its customers.

According to CAAC statistics, the following table sets forth the Group's market share of passengers carried, cargo and mail carried and total traffic of Chinese airlines for the years indicated.

Year	Passenger carried		Cargo and Mail Carried (tons)		Total traffic (ton kilometers)	
	Industry Total (in millions)	Group's Share (% of total)	Industry Total (in thousands)	Group's Share (% of total)	Industry Total (in billion)	Group's Share (% of total)
2004	121.2	23.3	2,770	19.7	23.1	20.2
2005	138.3	31.8	3,067	25.3	26.1	27.9
2006	159.7	30.8	3,494	23.4	30.6	26.4
2007	185.8	30.6	4,018	21.7	36.5	25.3
2008	192.5	30.3	4,076	20.5	37.7	24.4

Domestic Routes

The Group competes against its domestic competitors primarily on the basis of flight schedule, route network, quality of service, safety, type and age of aircraft and, to a lesser extent and until recently, price. The Group competes against 10 other Chinese airlines in its various domestic route markets. Of these competitors, the largest are two airlines owned or controlled by the Chinese government, and the remaining eight airlines are operated by or under the control of various Chinese provincial or municipal governments.

The following table sets forth the Group's market share of the passengers carried, cargo and mail carried on departing flights and total departing flights at the ten busiest airports in China, based on passenger volume data from CAAC statistics, in 2008.

Airport	Passenger carried	Cargo and Mail Carried	Departing flight
	(% of total)	(% of total)	(% of total)
Beijing	18.59%	12.20%	17.80%
Shanghai Pudong	8.84%	2.67%	9.21%
Guangzhou	48.71%	36.90%	48.06%
Shanghai Hongqiao	16.59%	20.40%	15.73%
Shenzhen	29.62%	22.66%	27.88%
Chengdu	14.47%	14.24%	12.75%
Kunming	17.15%	20.63%	16.03%
Hangzhou	39.02%	32.78%	36.45%
Xi'an	18.62%	21.58%	16.53%
Chongqing	26.23%	28.76%	24.36%

The following table sets forth the Group's market share of the passengers carried, cargo and mail carried on departing flights and total departing flights at eight busiest airports in southern and central China (excluding Guangzhou and Shenzhen, which are included in the table above), based on passenger volume data from CAAC statistics, in 2008.

Airport	Cargo and Mail		
	Passenger carried (% of total)	Carried (% of total)	Departing flight (% of total)
Wuhan	42.84%	52.00%	37.57%
Changsha	49.83%	68.59%	49.64%
Haikou	25.59%	24.55%	25.47%
Sanya	34.12%	34.28%	35.39%
Zhengzhou	51.89%	61.32%	47.72%
Guilin	39.21%	42.41%	37.35%
Nanning	40.82%	39.00%	34.50%
Zhang Jia Jie	43.19%	76.76%	42.68%

Regional Routes

In 2008, the Group conducted a total of 13,382 flights on its regional routes, accounting for approximately 24.4% of all passengers carried by Chinese airlines on routes between Hong Kong, Macau or Taiwan and destinations in China. The Group faces less competition on regional routes than that on domestic and international, and earns higher operating margin. Air China, Eastern Airlines, Air Macau, Dragon Air and Cathay Pacific Airways compete with the Group in the regional traffic markets.

International Routes

The Group competes with Air China, China Eastern and many well-established foreign airlines on its international routes. Most of these international competitors have significantly longer operating histories, substantially greater financial and technological resources and greater name recognition than the Group. In addition, the public's perception of the safety and service records of Chinese airlines may adversely affect the Group's ability to compete against its regional and international competitors. Many of the Group's international competitors have larger sales networks and participate in reservation systems that are more comprehensive and convenient than those of the Group, or engage in promotional activities that may enhance their ability to attract international passengers.

Air China has the most extensive international route network among Chinese airlines. Beijing, the hub of Air China's operations, has been the destination for most international flights to China. The Group competes against, among other airlines, Thai Airways International, Singapore Airlines, Malaysian Airlines System, Air China and China Eastern on flights to Southeast Asian destinations. In the case of its European routes, the Group's competitors include Cathay Pacific Airways. The Group faces competition on its international routes from Air China and China Eastern, each of which operates several routes between destinations in China and the United States, as well as international airlines that fly to Los Angeles from Hong Kong. The Group competes in the international market primarily on the basis of safety, price, timeliness and convenience of scheduling.

Airline Subsidiaries

The Airline Subsidiaries are joint ventures established by the Company and local companies in the provinces or special economic zones where the Airline Subsidiaries are based and are engaged in providing airline and related services. The Company owns a 60% equity interest in each of the Airline Subsidiaries.

As of December 31, 2008, Xiamen Airlines operated under its own “MF” code with a fleet of 49 aircraft on 132 domestic routes, 11 international routes and 7 regional routes. In 2008, Xiamen Airlines carried a total of about 9.63 million passengers, or approximately 16.52% of the passengers carried by the Group in that year, and had RMB7,666 million in traffic revenue.

As of December 31, 2008, Shantou Airlines operated under the Group's "CZ" code with a fleet of nine aircraft. In 2008, under the centralized allocation of flight routes of the Group, Shantou Airlines carried a total of about 1.71 million passengers, or 2.94% of the passengers carried by the Group in that year. Total traffic revenue of Shantou Airlines for the year ended December 31, 2008 was RMB1,372 million.

As of December 31, 2008, Chongqing Airlines operated under the "OQ" code with a fleet of four aircraft. In 2008, under the centralized allocation of flight routes of the Group, Chongqing Airlines carried a total of about 0.78 million passengers, or 1.35% of the total number of passengers carried by the Group in that year. Total traffic revenue of Chongqing Airlines for the year ended December 31, 2008 was RMB489 million.

As of December 31, 2008, Zhuhai Airlines operated under the "CZ" code with a fleet of five aircraft. In 2008, under the centralized allocation of flight routes of the Group, Zhuhai Airlines carried a total of about 0.81 million passengers, or approximately 1.40% of the total number of passengers carried by the Group in that year. Total traffic revenue of Zhuhai Airlines for the year ended December 31, 2008 was RMB744 million.

As of December 31, 2008, Guizhou Airlines operated under the "CZ" code with a fleet of eight aircraft. In 2008, under the centralized allocation of flight routes of the Group, Guizhou Airlines carried a total of about 1.34 million passengers, or approximately 2.30% of the total number of passengers carried by the Group in 2008. Total traffic revenue of Guizhou Airlines was approximately RMB1,224 million for the year ended December 31, 2008.

Insurance

The CAAC maintains fleet and legal liability insurance on behalf of the Group and all other Chinese airlines with PICC Property and Casualty Company Limited, or PICCP&C, and China Pacific Property Insurance Company Ltd., under the PICCP&C master policy. The Group maintains aviation hull all risks, spares and airline liability insurance, aircraft hull all risks and spare engines deductible insurance, aviation hull war and allied perils policy of the type and in the amount customary in the Chinese aviation industry.

Under the relevant PRC laws, civil liability of Chinese airlines for death or injuries suffered by passengers on domestic flights is limited to RMB400,000 (approximately US\$58,526) per passenger. As of July 31, 2006, the Convention for the Unification of Certain Rules for International Carriage by Air of 1999, or Montreal Convention, became effective in China. Under the Montreal Convention, carriers of international flights are strictly liable for proven damages up to 100,000 Special Drawing Rights and beyond that, carriers are only able to exclude liability if they can prove that the damage was not due to negligence or other wrongful act of the carrier (and its agents), or the damage arose solely from the negligence or other wrongful act of a third party. The Group believes that it maintains adequate insurance coverage for the civil liability that can be imposed in respect of death or injuries to passengers under Chinese law, the Montreal Convention and any agreement which the Group is subject to.

The CAAC allocates insurance premiums payable in respect of the PICCP&C master policy to each participating airline based on the value of the airline's insured aircraft or, in the case of leased aircraft, based on the amount required by the terms of the lease. Insurance claims made by any participating airline may cause the premiums paid by the Group under the PICCP&C master policy to increase. PICCP&C's practice has been to reinsure a substantial portion of its aircraft insurance business through reinsurance brokers on the London reinsurance market.

Intellectual Property

The Group's businesses and operations, other than the businesses and operations of Xiamen Airlines and Chongqing Airlines, are conducted under the names "China Southern" and "China Southern Airlines" in both English and Chinese. The Group uses as its logo a stylized rendition of a kapok plant. Xiamen Airlines conducts its businesses and operations under the name of "Xiamen Airlines" in English and Chinese and uses its own logo depicting a stylized

rendition of an egret. Chongqing Airlines conducts its business and operations under the name of “Chongqing Airlines” in English and Chinese and uses its own logo depicting a cross of two rivers.

35

The names “China Southern” and “China Southern Airlines” contain Chinese words of common usage and are therefore not eligible for registration as tradenames under current Chinese law. The kapok logo is a trademark registered in China and recorded with the International Air Transport Association (“IATA”), the rights to which are owned by CSAHC. The Company and CSAHC have entered into a trademark license agreement (the “Trademark License Agreement”), pursuant to which CSAHC has licensed to the Group the right to use the names “China Southern” and “China Southern Airlines” in both English and Chinese and granted the Company a 10-year renewable license from 1997 to use the kapok logo on a world-wide basis. CSAHC has retained the right to use the kapok logo in connection with its non-airline related businesses conducted as of the date of the Trademark License Agreement and to permit its associates that do not compete, directly or indirectly, with the Group to use the kapok logo. Unless CSAHC gives a written notice of termination three months before the expiration of the agreement, the agreement will be automatically renewed for another ten-year term. In May of 2007, the Trademark License Agreement has been renewed by the two parties for another ten-year term ending 2017. Xiamen Airlines owns all rights to its egret logo, which is a trademark registered in China, and recorded with the IATA. Chongqing Airlines also owns all rights to its logo, which is a trademark registered in China, and recorded with the IATA.

The Company owns all rights to three trademarks, being SKY PEARL CLUB, the logo relating to Easy Cargo 5000 and “SKY PEARL CARD” which are registered in China, and recorded with Trademark Office of the State Administration for Industry and Commerce. Zhuhai Airlines Company Limited owns all rights to the airline logo which is registered with the Trademark Office of the State Administration for Industry and Commerce.

Organizational Structure

The following chart illustrates the corporate structure of the Group as of December 31, 2008 and the aggregate effective equity interest of the Company in each of its principal subsidiaries, associates and jointly controlled entities.

Note a: Including 13% ownership interest held by CSA's subsidiaries.

The particulars of the Company's principal subsidiaries as of December 31, 2008 are as follows:

Name of company	Place and date of establishment /operation	Proportion of ownership interest held by the Company
Shantou Airlines Company Limited	PRC July 20, 1993	60%
Zhuhai Airlines Company Limited	PRC May 8, 1995	60%
Xiamen Airlines Company Limited	PRC August 11, 1984	60%
Guizhou Airlines Company Limited	PRC November 12, 1991	60%
Chongqing Airlines Company Limited	PRC June 16, 2007	60%
Guangzhou Air Cargo Company Limited	PRC March 31, 2004	70%
Guangzhou Nanland Air Catering Company Limited	PRC November 21, 1989	55%
China Southern West Australian Flying College Pty Limited	Australia January 26, 1971	91%
Guangzhou Baiyun International Logistics Company Limited	PRC July 23, 2002	61%
Xinjiang Civil Aviation Property Management Limited	PRC February 12, 2002	51.8%
Southern Airlines Group Air Catering Company Limited	PRC December 25, 2003	100%
Nanlung International Freight Company Limited	Hong Kong October 1, 1996	51%

The particulars of the Group's principal associates and jointly controlled entities as of December 31, 2008 are as follows:

Name of company	Place and date of establishment /operation	Group effective interest	Proportion of ownership interest held by	
			The Company	Subsidiaries
Guangzhou Aircraft Maintenance Engineering Company Limited	PRC October 28, 1989	50%	50%	—

Property, Plant and Equipment

For a discussion of the Group's aircraft, see Item 4, "Information on the Company — History and development of the Company — Aircraft Acquisitions."

The Group's headquarters in Guangzhou occupy an area of approximately 460,601 square meters of land and a total gross floor area of approximately 563,335 square meters. The Group leases from CSAHC the land in Guangzhou on which the Group's headquarters and other facilities are located. The Group also leases from CSAHC certain buildings mainly at the Haikou, Wuhan, Nanyang, Shenyang, Dalian, Jilin, Harbin and Xinjiang.

The Company's principal properties are located at its headquarters site and at its route bases. The following table sets forth certain information with respect to the Company's properties at its headquarters in Guangzhou and certain route bases as of the date hereof.

	Land		Buildings	
	(in square meters)		(in square meters)	
	Owned	Leased	Owned	Leased
Guangzhou	330,163	130,438	556,058	7,277
Shenzhen	208,740	—	54,093	—
Zhuhai	170,062	—	18,791	—
Changsha	138,949	—	52,552	—
Zhengzhou	290,841	—	66,542	—
Haikou	5,265	—	67,664	19,633
Wuhan	—	31,061	17,335	22,831
Nanyang	—	—	12,156	60,003
Sanya	106,680	—	16,968	—
Shenyang	—	167,502	79,626	93,445
Dalian	—	14,403	20,290	33,597
Jilin	—	65,076	34,110	7,767
Harbin	—	286,871	36,925	3,188
Xinjiang	17,460	545,146	177,710	4,135
Guilin	72,563	—	73,379	139

The following table sets forth certain information with respect to the properties of the Airline Subsidiaries as of the date hereof.

	Land		Buildings	
	(in square meters)		(in square meters)	
	Owned	Leased	Owned	Leased
Xiamen	581,401	—	511,847	26,044
Shantou	36,931	53,000	61,468	2,773
Zhuhai	99,306	—	57,730	1,800
Guizhou	259,879	—	106,245	3,425
Chongqing	—	—	6,766	2,691

As systems for registration and transfer of land use rights and related real property interests in China have been implemented relatively recently, such systems do not yet comprehensively account for all land and related property interests. The land in Guangzhou on which the Group's headquarters and other facilities are located and the buildings that the Group uses at its route base in Wuhan and Haikou are leased by the Company from CSAHC. However, CSAHC lacks adequate documentation evidencing CSAHC's rights to such land and buildings, and, as a consequence, the lease agreements between CSAHC and the Company for such land may not be registered with the relevant authorities. Lack of registration may affect the validity of such lease agreements. There are certain other parcels of land and buildings owned or used by the Group that lack adequate documentation. Lack of adequate documentation for land use rights and ownership of buildings may impair the ability of the Group to dispose of or mortgage such land use rights and buildings. As of June 12, 2009, the Group was in the process of applying for the land use right certificates and property title certificates in respect of the properties located in Guangzhou Baiyun International Airport, Xiamen, Heilongjiang, Hainan, Jilin, Dalian, Hunan and Xinjiang, in which the Group has interests and for which such certificates have not been granted. The directors of the Company are of the opinion that the use of and the conduct of operating activities at the properties referred to above are not affected by the fact that the Group has not yet obtained the relevant land use right certificates and property title certificates.

ITEM 4A. UNRESOLVED STAFF COMMENTS.

Not applicable.

ITEM 5. OPERATING AND FINANCIAL REVIEW AND PROSPECTS.

The following discussion and analysis should be read in conjunction with the Financial Statements of the Group contained elsewhere in this Annual Report. The Group maintains its books and accounts in accordance with PRC Accounting Standards for Business Enterprises (“PRC GAAP”) and prepares its financial statements in accordance with both PRC GAAP and IFRSs. The Financial Statements contained elsewhere in this Annual Report have been prepared in accordance with IFRSs.

The discussion and analysis of the Group’s financial condition and results of operations are based on the consolidated financial statements, which have been prepared in accordance with IFRSs. The comparative financial data presented in the discussion and analysis below has been restated upon the adoption of IFRIC 13.

Critical Accounting Policies

The preparation of the consolidated financial statements requires the Group to make estimates and judgments that affect the reported amount of assets and liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities at the date of the consolidated financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and potentially result in materially different results under different assumptions and conditions. Our principal accounting policies are set forth in Note 2 to the consolidated financial statements. The Group believes that the following critical accounting policies involve the most significant judgments and estimates used in the preparation of our financial statements.

Impairment for long-lived assets

If circumstances indicate that the net book value of a long-lived asset may not be recoverable, this asset may be considered “impaired”, and an impairment loss may be recognized in accordance with IAS 36 “Impairment of Assets”. The carrying amounts of long-lived assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to recoverable amount. The recoverable amount is the greater of the net selling price and the value in use. In determining the value in use, expected cash flows generated by the asset are discounted to their present value, which requires significant judgment relating to level of traffic revenue and amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions and projections of traffic revenue and amount of operating costs.

Depreciation

Property, plant and equipment are depreciated on a straight-line basis over their estimated useful lives, after taking into account the estimated residual value. The Group reviews the estimated useful lives of the assets regularly in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group’s historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous

estimates.

40

Recently Pronounced International Financial Reporting Standards

Information relating to the recently pronounced IFRSs is presented in Note 53 to the consolidated financial statements.

Overview

In 2008, the Group strived to promote its development strategy of internationalization and network establishment. By improving the construction of hub network, marketing network and service network, the Group leveraged on the economies of scale attained through network development and achieved a fundamental change in modes of growth. During the reporting period, the Company sped up the construction of its dual hubs, re-designed its overall traffic capacity, and adjusted schedules of its flights, in an effort to promote continuous development of its hub network, progressive expansion of its marketing network, and constant improvement of its service level. In addition, as part of its continuous efforts to deepen the reform and innovation, the Group implemented centralized controls and effective management of capital. Also, it has been seeking for new service methods and forms, for example, it widened the application of information technology, introduced new services such as cell phone check-in, and SMS platforms. Through all these efforts, the Group was able to lay a solid foundation for its future transformation and development.

In 2008, to cope with high aviation fuel prices, the Company, while proactively strengthened cost controls and cut energy consumption, engaged in certain aviation fuel hedging activities in a cautious manner in order to offset a part of aviation fuel costs. The Company also stayed alert on tackling hedging risks that may arise from a sharp fall of fuel prices.

In 2008, the Group focused on brand building for its services which underlined the construction and development of its service assurance network. The Group launched a special drive known as “Welcome the Olympic Games with Gold Medal Services” and successfully fulfilled its duties to deliver quality services toward the Beijing Olympic Games and Paralympics Games. Our effort to combat the snowstorm and earthquake also gained credits. In the meanwhile, the Group carried out the activity called “Year of Brand and Services” on a more extensive basis. Its brand-building movement mainly concerns four aspects, namely high-end services, ground services, in-flight services and transit services. For high-end services, the Group was committed to attracting high-end customers by establishing a high-end customer administration system and high-end customer service standards. In respect of ground services, the Group concentrated on improving check-in, first class and business class lounges and luggage transportation services, so as to give its customers a convenient and comfortable experience. For in-flight service, the Group carried out a “cabin revolution” to provide passengers with new in-flight experiences by enhancing the environment and service standards all-around. As to transit service, the Group regulated relevant service units, unified brand image, made full use of its network strengths, and tried its best to build up a transit service brand boasting efficiency and convenience.

In 2008, the Group followed the environment-friendly principle of “Green Flight” and promoted energy conservation and low emission in every possible way. For example, the Group upgraded its fleet, operated aircraft with higher fuel use efficiency as far as possible, and took various measures to reduce the weight of the aircraft. With all these measures, the Group achieved continuous reduction both in fuel consumption of aircraft and ground service related energy consumption. The Group has initiated discussion with suppliers for technological advancement to reduce noise pollution, proactively cooperated with airports and air traffic control authorities, and chose appropriate landing programs, thereby the noise pollution generated by taking off and landing made to local residential areas was substantially reduced. The Group aims to accomplish a major strategic reform and improve service level and brand awareness through strengthened technological innovation and enhanced management proficiency, system development and technological upgrades, so that diversified products and convenient, punctual and rapid services are provided to its customers.

In 2008, the Group further improved and optimized its online sales network, and launched Tencent sales counter in cooperation with Tencent Technology Limited, thus expanded the B2C sales network of the Group. Meanwhile the

Group upgraded and reconstructed the SMS platform, and launched the 95539 services hotlines, which provide SMS services of information on mileage, flight schedule, flight status, and air ticket price. In addition, the Group developed service system for high-end customers, realized functions such as instant membership for high-end customers, and made use of information technology to promote sophisticated management and scientific operation.

Nevertheless, the Group is facing pressures on its operations due to the result of the sub-prime crisis in the US, the slowing down of the world economy, the contracting credit policies of the People's Bank of China, fierce competition in the aviation industry and the fluctuations in fuel prices.

Since July 21, 2005, the PRC government has begun to adopt a managed floating exchange rate system based on market supply and demand of currencies, which is subject to adjustments with reference to a basket of currencies. The exchange rate of Renminbi would no longer be pegged to the U.S. dollar only and a more flexible exchange rate system was established. Because the Group finances its aircraft acquisitions mainly through capital leases or bank loans in U.S. dollars, and there are a substantial amount of transactions and obligations denominated in U.S. dollars in relation to its global purchases of jet fuel, lease and purchase of aviation equipment as well as major repairs, in addition to the landing fees of its international flights in the airports of other countries, the Group benefited from the RMB appreciation. RMB appreciation has brought a one-off exchange gain to the Group and reduced its operating costs which are denominated in foreign currencies. However, RMB appreciation also presents the Group with a challenge in price competition in international route operations.

The Group's operating revenue is substantially dependent on the passenger and cargo traffic volume carried, which is subject to seasonal and other changes in traffic patterns, the availability of appropriate time slots for the Group's flights and alternative routes, the degree of competition from other airlines and alternate means of transportation, as well as other factors that may influence passenger travel demand and cargo and mail volume. In particular, the Group's airline revenue is generally higher in the second and third quarters than in the first and fourth quarters.

Like most airlines, the Group is subject to a high degree of financial and operating leverage. A significant percentage of the Group's operating expenses are fixed costs that do not vary proportionally based on the Group's yields or the load factors. These fixed costs include depreciation expense, jet fuel costs, landing and navigation fees, financing costs, operating lease payments, aircraft maintenance costs and labor for flight crew, cabin crew and ground personnel. Thus, a minor change in the Group's yields or load factors would have a material effect on the Group's results of operations. In addition, certain of these expenses, primarily financing costs and operating lease payments, labor costs and depreciation do not vary based on the number of flights flown. Thus, the Group's operating results can also be substantially affected by minor changes in aircraft utilization rates. The Group is and will continue to be highly leveraged with substantial obligations denominated in foreign currencies and, accordingly, the results of its operations are significantly affected by fluctuations in foreign exchange rates, particularly for the U.S. dollar and the Japanese yen. The Group recognized a net exchange gain of RMB2,592 million and RMB2,832 million in 2008 and 2007, respectively. These amounts represented mainly unrealized exchange differences resulting from the retranslation of the foreign currency borrowings.

A number of other external variables, including political and economic conditions in China, tend to have a major impact on the Group's performance. The Group's financial performance is also significantly affected by factors arising from operating in a regulated industry. As substantially all aspects of the Group's airline operations are regulated by the PRC government, the Group's operating revenues and expenses are directly affected by the PRC government's policies with respect to domestic air fares, jet fuel prices and landing and navigation fees, among others. The nature and extent of airline competition and the ability of Chinese airlines to expand are also affected by CAAC's control over route allocations. Any changes in the PRC government's regulatory policies or any implementation of such policies could have a significant impact on the Group's future operations and its ability to implement its operating strategy.

Certain Financial Information and Operating Data by Geographic Region

The following table sets forth certain financial information and operating data by geographic region for the years ended December 31, 2008, 2007 and 2006:

Traffic	Year ended December 31,			2008 vs. 2007	2007 vs. 2006

Operating Results

The historical results of operations discussed below may not be indicative of the Group's future operating performance. In addition to the factors discussed under "Overview" above, the Group's future operations will be affected by, among other things, changes in the aviation market, the cost of jet fuel, aircraft acquisition and leasing costs, aircraft maintenance expenses, take-off and landing charges, wages, salaries and benefits and other operating expenses, foreign exchange rates and the rates of income taxes paid.

2008 compared with 2007

The loss attributable to equity shareholders of the Company of RMB4,823 million was recorded in 2008 as compared to a profit attributable to equity shareholders of the Company of RMB1,839 million in 2007. The Group experienced a slow down of growth in traffic revenue and rising operating expenses as a result of global financial crisis and increase of jet fuel cost. The Group's operating revenue increased by RMB887 million or 1.6% from RMB54,401 million in 2007 to RMB55,288 million in 2008. Passenger load factor decreased by 0.7 percentage point, from 74.5% in 2007 to 73.8% in 2008. Passenger yield (in passenger revenue per RPK) was RMB0.61, which was unchanged from 2007. Average yield (in traffic revenue per RTK) increased by 1.9% from RMB5.75 in 2007 to RMB5.86 in 2008. Operating expenses increased by RMB8,811 million or 16.6% from RMB52,956 million in 2007 to RMB61,767 million in 2008. As a result of the increase in operating expenses which outweighed the growth in revenue, operating loss of RMB6,538 million was recorded in 2008, as compared to operating profit of RMB1,575 million in 2007.

Operating revenue

Substantially all of the Group's operating revenue is attributable to its air transport and related operations. Traffic revenue accounted for 97.5% and 97.8% of the total operating revenue in 2008 and 2007 respectively. Passenger revenue and, cargo and mail revenue accounted for 93.5% and 6.5% respectively of the total traffic revenue in 2008. The other operating revenue is mainly derived from commission income, income from general aviation operations, fees charged for ground services rendered to other Chinese airlines and air catering services.

The increase in operating revenue was primarily due to a 1.8% rise in passenger revenue from RMB49,499 million in 2007 to RMB50,412 million in 2008 resulting from increase in fuel surcharge income. The total number of passengers carried increased by 2.3% to 58.24 million passengers in 2008. RPKs increased by 1.8% from 81,727 million in 2007 to 83,184 million in 2008, primarily as a result of the increase in number of passengers carried. Passenger yield per RPK was RMB0.61, which was unchanged from 2007.

The Group recorded an amount of fuel surcharge income in respect of passenger operation of RMB7,497 million (2007: RMB4,910 million). Excluding fuel surcharges, the passenger revenue of the Group decreased by 3.8%, from RMB44,589 million in 2007 to RMB42,915 million in 2008, and the passenger yield per RPK (excluding fuel surcharges) decreased from RMB0.55 in 2007 to RMB0.52 in 2008.

Domestic passenger revenue accounted for 83.0% of the total passenger revenue in 2008. Domestic passenger revenue increased by 2.8% from RMB40,717 million in 2007 to RMB41,854 million in 2008 (2007: increased by 19.6% from RMB34,037 million in 2006 to RMB40,717 million in 2007). The decrease in growth in domestic passenger revenue was mainly attributable to various unfavorable factors, including large-scale natural disasters occurred in China, such as the southern China snow storms in January 2008, the May 12 earthquake in Sichuan province, and the strict security measures and visa control for foreigners for the Beijing Olympic Games. Domestic passenger traffic in RPKs increased by 3.3%, mainly due to an increase in number of passengers carried. Domestic passenger yield per RPK decreased from RMB0.60 in 2007 to RMB0.59 in 2008.

Regional passenger revenue, which accounted for 1.9% of total passenger revenue, decreased by 11.4% from RMB1,074 million in 2007 to RMB952 million in 2008, as a result of strong competition from Cathay Pacific Airways and Dragonair for routes connecting Hong Kong and domestic cities of the PRC. For regional flights, passenger traffic in RPKs decreased by 3.5%, while passenger capacity in ASKs decreased by 4.8%, resulting in an increase in passenger load factor by 0.9 percentage point from 62.7% in 2007 to 63.6% in 2008. Passenger yield per RPK decreased from RMB0.91 in 2007 to RMB0.84 in 2008, mainly resulted from stronger competition in the region during the year.

International passenger revenue, which accounted for 15.1% of total passenger revenue, decreased by 1.3% from RMB7,708 million in 2007 to RMB7,606 million in 2008, as a result of the decreased market demand due to the visa restriction for foreigners during the Beijing Olympic Games period and the global financial crisis. For international flights, passenger traffic in RPKs decreased by 6.2%, while passenger capacity in ASKs decreased by 4.4%, resulting in a 1.3 percentage point decrease in passenger load factor from 2007. Passenger yield increased by 6.3% from RMB0.63 in 2007 to RMB0.67 in 2008, mainly due to the increase in fuel surcharge income.

Cargo and mail revenue, which accounted for 6.5% of the Group's total traffic revenue and 6.3% of total operating revenue, decreased by 5.3% from RMB3,697 million in 2007 to RMB3,501 million in 2008. The decrease was attributable to reduced cargo traffic demand under global financial crisis.

Other operating revenue increased by 14.1% from RMB1,205 million in 2007 to RMB1,375 million in 2008. The increase was primarily due to the general growth in income from various auxiliary operations.

Operating expenses

Total operating expenses in 2008 amounted to RMB61,767 million, representing an increase of 16.6% or RMB8,811 million over 2007, primarily due to the total effect of increases in jet fuel costs, operating lease charges of aircraft, servicing expenses, maintenance expenses and impairment losses on property, plant and equipment. Total operating expenses as a percentage of total operating revenue increased from 97.3% in 2007 to 111.7% in 2008.

Flight operations expenses, which accounted for 56.6% of total operating expenses, increased by 20.3% from RMB29,082 million in 2007 to RMB34,982 million in 2008, primarily as a result of increases in jet fuel costs and operating lease charges of aircraft. Jet fuel costs, which accounted for 66.0% of flight operations expenses, increased by 26.0% from RMB18,316 million in 2007 to RMB23,086 million in 2008 mainly as a result of increased fuel prices. Operating lease charges of aircraft increased by 11.5% from RMB3,735 million in 2007 to RMB4,166 million in 2008 primarily due to the additional rental payments for new aircraft under operating leases.

Maintenance expenses, which accounted for 7.9% of total operating expenses, increased by 5.3% from RMB4,643 million in 2007 to RMB4,890 million in 2008. The increase was mainly due to fleet expansion in recent years.

Aircraft and traffic servicing expenses, which accounted for 13.7% of total operating expenses, increased by 3.9% from RMB8,160 million in 2007 to RMB8,476 million in 2008. The increase primarily resulted from a 1.7% rise in landing and navigation fees from RMB6,030 million in 2007 to RMB6,135 million in 2008, due to an increase in number of flights.

Promotional and sales expenses, which accounted for 5.7% of total operating expenses, increased by 2.0% from RMB3,421 million in 2007 to RMB3,491 million in 2008.

General and administrative expenses, which accounted for 3.3% of the total operating expenses, increased by 8.9% from RMB1,874 million in 2007 to RMB2,041 million in 2008.

Impairment on property, plant and equipment, which accounted for 3.1% of the total operating expenses, increased by RMB1,775 million from RMB109 million in 2007 to RMB1,884 million in 2008. The impairment losses recognised in 2008 mainly comprise the following:

-During the year, in view of the age and operating efficiency of the Group's fleet of Boeing 777-200A aircraft, Airbus 300 aircraft and McDonnell Douglas 90 aircraft, the Group determined to dispose of these aircraft. The Group has commenced its process of seeking buyers for these aircraft. As a result, the Group assessed the recoverable amounts of these aircraft. Based on this assessment, the carrying amount of the aircraft and the related fleet assets was written down by RMB1,590 million. The estimates of recoverable amounts were based on the aircraft's fair value less costs to sell, determined by reference to the recent observable market prices for the respective model of aircraft.

-There has been a decrease in demand of cargo transportation services as a result of the current economic conditions. In addition, the operating efficiency of the Group's cargo freighters Boeing 747 is not satisfactory due to lack of economy of scale for the existing small fleet of cargo freighters. As such, the Group assessed the recoverable amounts of its cargo freighters and the related fleet assets. Based on this assessment, the carrying amount of the cargo freighters was written down by RMB291 million. The estimates of recoverable amounts were based on the aircraft's fair value less costs to sell, determined by reference to the recent observable market prices for the cargo freighters.

Depreciation and amortisation, which accounted for 9.3% of total operating expenses, increased by 3.5% from RMB5,554 million in 2007 to RMB5,746 million in 2008, mainly resulting from the additional depreciation charge on aircraft delivered in 2007 and 2008.

Operating (loss)/profit

Operating loss of RMB6,538 million was recorded in 2008 as compared to an operating profit RMB1,575 million in 2007. This was mainly because operating revenue increased by RMB887 million or 1.6% in 2008 while operating expenses increased by RMB8,811 million or 16.6% in the same period.

Others

Interest expense decreased by 13.3% from RMB2,291 million in 2007 to RMB1,987 million in 2008, mainly due to the decrease in average effective interest rate of bank and other loans and obligations under capital leases. Interest income increased by 41.1% from RMB73 million in 2007 to RMB103 million in 2008, mainly attributable to the increase in average bank deposits balances during 2008.

Net exchange gain decreased by 8.5% from RMB2,832 million in 2007 to RMB2,592 million in 2008. Such amount mainly represented an unrealised translation gain on retranslation of foreign currency denominated liabilities at the year end.

Taxation

Income tax expenses decreased by 92.7% from RMB847 million in 2007 to RMB62 million in 2008. This was mainly attributable to the net effect of the operating loss of the Group and the effect of certain deferred tax assets not

recognised.

2007 compared with 2006

The profit attributable to equity shareholders of the Company increased from RMB106 million in 2006 to RMB1,839 million in 2007. The scale of operations increased as a result of steady growth in China's economy and strong demand for air transportation. The Group's operating revenue increased by RMB8,320 million or 18.1% from RMB46,081 million in 2006 to RMB54,401 million in 2007. Passenger load factor increased by 2.8 percentage point, from 71.7% in 2006 to 74.5% in 2007. Passenger yield (in passenger revenue per RPK) increased by 1.7% to RMB0.61. Average yield (in traffic revenue per RTK) increased by 3.2% from RMB5.57 in 2006 to RMB5.75 in 2007. Operating expenses increased by RMB7,057 million or 15.4% from RMB45,899 million in 2006 to RMB52,956 million in 2007. As a result of improved passenger load factor and average yield, operating income was increased by RMB1,060 million, from RMB515 million in 2006 to RMB1,575 million in 2007.

46

Operating revenue

Substantially all of the Group's operating revenue is attributable to airline and airline related operations. Traffic revenue accounted for 97.8% and 97.5% of total operating revenue in 2007 and 2006, respectively. Passenger revenue and, cargo and mail revenue accounted for 93.1% and 6.9%, respectively, of total traffic revenue in 2007. The other operating revenue is mainly derived from commission income, income from general aviation operations, fees charged for ground services rendered to other Chinese airlines and air catering services.

The increase in operating revenue was primarily due to a 19.5% rise in passenger revenue from RMB41,411 million in 2006 to RMB49,499 million in 2007 resulting from increased traffic volume. The total number of passengers carried increased by 15.6% to 56.90 million passengers in 2007. RPKs increased by 17.5% from 69,582 million in 2006 to 81,727 million in 2007, primarily as a result of the increase in passengers carried. Passenger yield increased slightly by RMB0.01.

Domestic passenger revenue, which accounted for 82.3% of the total passenger revenue in 2007, increased by 19.6% from RMB34,036 million in 2006 to RMB40,717 million in 2007. Domestic passenger traffic in RPKs increased by 17.6%, mainly due to an increase in passengers carried. Domestic passenger yield increased from RMB0.59 in 2006 to RMB 0.60 in 2007.

Regional passenger revenue, which accounted for 2.2% of total passenger revenue, decreased by 12.7% from RMB1,230 million in 2006 to RMB1,074 million in 2007. Owing to the keen competition in regional routes, the Group scheduled certain flight capacity to other domestic and international routes in 2007. For regional flights, passenger traffic in RPKs decreased by 23.4%, while passenger capacity in ASKs decreased by 23.5%, resulting in the passenger load factor of 62.7%, which is unchanged from 2006. Passenger yield increased from RMB0.80 in 2006 to RMB0.91 in 2007 mainly caused by the decrease of long distance routes such as Hong Kong – Beijing. Generally, long distance routes have a lower yield than short distance ones.

International passenger revenue, which accounted for 15.5% of total passenger revenue, increased by 25.4% from RMB6,145 million in 2006 to RMB7,708 million in 2007. For international flights, passenger traffic in RPKs increased by 22.8%, while passenger capacity in ASKs increased by 24.1%, resulting in decrease of a 0.7 percentage point in passenger load factor from 2006. Passenger yield increased by 1.6% from RMB0.62 in 2006 to RMB0.63 in 2007 mainly resulted from the continued growth of demand for international flights in the PRC.

Cargo and mail revenue, which accounted for 6.9% of the Group's total traffic revenue and 6.8% of total operating revenue, increased by 4.5% from RMB3,538 million in 2006 to RMB3,697 million in 2007. The increase was attributable to the increasing traffic demand.

Other operating revenue increased by 6.4% from RMB1,132 million in 2006 to RMB1,205 million in 2007. The increase was primarily due to the general growth in income from various auxiliary operations.

Operating expenses

Total operating expenses in 2007 amounted to RMB52,956 million, representing an increase of 15.4% or RMB7,057 million over 2006, primarily due to the total effect of increases in jet fuel costs, operating lease charges of aircraft, servicing expenses and maintenance expenses. Total operating expenses as a percentage of total operating revenue decreased from 99.6% in 2006 to 97.3% in 2007.

Flight operations expenses, which accounted for 54.9% of total operating expenses, increased by 16.2% from RMB25,022 million in 2006 to RMB29,082 million in 2007, primarily as a result of increases in jet fuel costs, operating lease charges of aircraft, catering expenses, and CAAC Infrastructure Development Fund Contributions. Jet fuel costs, which accounted for 63.0% of flight operations expenses, increased by 13.1% from RMB16,193 million in 2006 to RMB18,316 million in 2007 mainly as a result of increased fuel prices and fuel consumption. Operating lease charges of aircraft increased by 23.4% from RMB3,027 million in 2006 to RMB3,735 million in 2007 primarily due to the additional rental payments for new aircraft under operating leases. Catering expenses increased by 15.4% from RMB1,170 million in 2006 to RMB1,350 million in 2007 due to the increase in number of passengers carried. CAAC Infrastructure Development Fund Contributions increased by 10.9% from RMB1,127 million in 2006 to RMB1,250 million in 2007.

Maintenance expenses which accounted for 8.8% of total operating expenses, increased by 16.1% from RMB3,999 million in 2006 to RMB4,643 million in 2007. The increase was mainly due to fleet expansion in recent years.

Aircraft and traffic servicing expenses, which accounted for 15.4% of total operating expenses, increased by 15.5% from RMB7,063 million in 2006 to RMB8,160 million in 2007. The increase primarily resulted from a 12.9% rise in landing and navigation fees from RMB5,343 million in 2006 to RMB6,030 million in 2007, due to an increase in number of landing and takeoffs.

Promotional and sales expenses, which accounted for 6.5% of total operating expenses, increased by 22.0% from RMB2,803 million in 2006 to RMB3,421 million in 2007, mainly due to the increase in commission charges as a result of increase in traffic revenue by 18.3%.

Depreciation and amortization, which accounted for 10.5% of total operating expenses, increased by 11.7% from RMB4,971 million in 2006 to RMB5,554 million in 2007, mainly resulting from the additional depreciation charge on aircraft delivered in 2006 and 2007.

Other income/ (loss), net

Net gain on disposal of property, plant and equipment decreased by 61.0% from RMB333 million in 2006 to RMB130 million in 2007. The gain in 2007 was mainly due to the disposal of 11 MD82 aircraft to certain independent third parties.

Operating profit

The operating profit increased, from RMB515 million in 2006 to RMB1,575 million in 2007. This was mainly because operating revenue increased by RMB8,320 million or 18.1% in 2007 while operating expenses increased by RMB7,057 million or 15.4% in the same period.

Others

Interest expense increased by 10.7% from RMB2,070 million in 2006 to RMB2,291 million in 2007, mainly due to the increase in loans and obligations under capital leases. Interest income increased by 78.0% from RMB41 million in 2006 to RMB73 million in 2007, mainly attributable to the increase in average bank deposits balances during 2007.

The net exchange gain increased by 89.8% from RMB1,492 million in 2006 to RMB2,832 million in 2007, mainly resulting from Renminbi appreciation during 2007. The amount mainly comprised an unrealized translation gain on retranslation of foreign currency denominated liabilities at the year end.

Taxation

Income tax expense increased from RMB123 million in 2006 to RMB847 million in 2007. The effective tax rate decreased from 54.2% in 2006 to 29.4% in 2007. This was mainly attributable to the tax effect of the decrease of non-deductible expenses as a percentage to profit before taxation in 2007, which was offset to a lesser extent by the increase in deferred tax expenses recognized in 2007 resulting from the changes in tax rates in accordance with the new tax law effective from January 1, 2008.

Liquidity and Capital Resources

Prior to the initial public offering of the Company, the Group met its working capital and capital expenditure requirements through cash from its operations, the proceeds of certain long-term and short-term bank loans, capital lease financing and rebates available under certain of the Group's aircraft leases.

In July 1997, the Company received net proceeds of RMB5,459 million from its initial public offering. A majority part of these net proceeds was utilized to finance the Group's working capital and capital expenditure requirements. In July 2003, the Company issued 1,000,000,000 A Shares with a par value of RMB1.00 each at issue price of RMB2.70 by way of a public offering to natural persons and institutional investors in the PRC. The proceeds received by the Company of RMB2,641 million, net of the issuance costs of RMB59 million have been used for the purchase of Boeing 737-800 aircraft in accordance with the disclosure in the Prospectus for Offering of the A Shares.

As of December 31, 2008, the Group had banking facilities with several PRC commercial banks for providing loan finance up to an approximate amount of RMB125,265 million to the Group. As of December 31, 2008, an approximate amount of RMB47,125 million was utilized. As of December 31, 2008 and 2007, the Group's cash and cash equivalents totaled RMB4,469 million and RMB3,824 million, respectively.

Net cash inflows from operating activities in 2008, 2007 and 2006 were RMB1,155 million, RMB6,869 million and RMB2,297 million, respectively. Operating cash inflows of the Group are primarily derived from the provision of air transportation and related service for customers. The vast majority of tickets are purchased prior to the day on which transportation is provided. Operating cash outflows primarily are related to the recurring operating expenses, including flight operation, maintenance, aircraft and traffic servicing, etc. The decrease in net cash inflows from operating activities in 2008 was mainly due to the increased operating expenses as a result of increase of jet fuel costs and operating lease expenses of aircraft. Jet fuel costs increased significantly in 2008 by RMB4,770 million driven by record high fuel prices. Operating lease expenses of aircraft increased by RMB472 million as a result of increase in number of leases during the year. The increase in 2007 was mainly due to the increased cash flow from improved operating results and sales of tickets in advance of carriage as well as the increase in accrual balances as a result of increase in operation volume and delays in billings by certain suppliers when compared with 2006.

Net cash used in investing activities in 2008, 2007 and 2006 was RMB7,790 million, RMB4,844 million and RMB5,484 million, respectively. Cash capital expenditures in 2008, 2007 and 2006 were RMB8,364 million, RMB5,502 million and RMB6,044 million, respectively, reflecting predominantly additional investments in aircraft and flight equipment under the Group's fleet expansion plans and Guangzhou new airport, and, to a small extent, additional investments in other facilities and buildings used in operations.

Financing activities resulted in net cash inflows/ (outflows) of RMB7,460 million, RMB(465) million and RMB2,550 million in 2008, 2007 and 2006, respectively. Net cash inflow from new bank loans, short-term financing bills and repayments amounted to RMB9,667 million, RMB2,324 million and RMB5,870 million in 2008, 2007 and 2006, respectively. The additions of bank loan were used for capital expenditures and general working capital. Repayment of capital leases in 2008, 2007 and 2006 was RMB2,335 million, RMB3,021 million and RMB3,313 million, respectively, resulting from the aircraft acquisitions under capital leases.

As of December 31, 2008, the Group's aggregate long-term bank and other loans and obligations under capital leases (including loans and capital leases obligations due within one year) totaled RMB34,313 million. In 2009, 2010, 2011, 2012 and thereafter, amounts payable under such loans and obligations will be RMB5,727 million, RMB7,319 million, RMB9,818 million, RMB1,895 million and RMB9,554 million respectively. Such borrowings were denominated, to a larger extent, in United States dollars and, to a smaller extent, in Japanese yen and Hong Kong dollars, with a significant portion being floating interest rate borrowings. In the normal course of business, the Group is exposed to fluctuations in foreign currencies. The Group's exposure to foreign currencies primarily results from its foreign currency liabilities. Depreciation or appreciation of the Renminbi against foreign currencies affects the Group's results significantly because the Group's foreign currency payments generally exceed its foreign currency receipts. The Group is not able to hedge its foreign currency exposure effectively other than by retaining its foreign currency denominated earnings and receipts to the extent permitted by the State Administration of Foreign Exchange, or subject to certain restrictive conditions, entering into forward foreign exchange contracts with authorized banks.

As of December 31, 2008, the Group's short-term bank loans were RMB18,232 million. The Group's weighted average interest rate on short-term bank loans was 4.48% per annum as of December 31, 2008. The primary use of the proceeds of the Group's short-term bank loans is to finance working capital and capital expenditure needs. The Group has generally been able to arrange short-term bank loans with domestic banks in China as necessary and believes it can continue to obtain them based on its well-established relationships with various lenders.

As of December 31, 2008, the Group had short-term financing bills with total face value of RMB2,000 million, bearing coupon interest rate at 4.7% with a maturity period of one year for funding of the business activities of the Company.

As of December 31, 2008, the Group had obligations under operating leases totaling RMB33,817 million, predominately for aircraft. Of such amount, RMB4,357 million, RMB4,231 million, RMB4,131 million, RMB4,017 million, RMB3,449 million and RMB13,632 million, respectively, is due in 2009, 2010, 2011, 2012, 2013 and thereafter.

As of December 31, 2008, the Group had a working capital deficit of RMB32,290 million, as compared to a working capital deficit of RMB33,921 million as of December 31, 2007. Historically, the Group operated in a negative working capital position, relying on cash inflow from operating activities and renewal of short-term bank loans to meet its short-term liquidity and working capital needs. The decrease in the Group's working capital deficit from 2007 to 2008 was mainly because the Group sought increased long-term bank loans to finance its aircraft acquisitions. In 2009 and thereafter, the liquidity of the Group is primarily dependent on its ability to maintain adequate cash inflows from operations to meet its debt obligations as they fall due, and its ability to obtain adequate external financing to meet its committed future capital expenditure. At December 31, 2008, the Group entered into loan financing agreements with several PRC banks to provide financing up to RMB125,265 million, of which approximately RMB47,125 million was utilized. The directors of the Company believe that the liquidity status of the Group will be further enhanced upon completion of the non-public share subscriptions as discussed in Business Overview under Item 4. The directors of the Company believe that sufficient financing will be available to the Group.

As the Group is subject to a high degree of operating leverage, a minor decrease in the Group's yield and/or load factor could result in a significant decrease in its operating revenue and hence its operating cash flows. This could arise in such circumstances as where competition between Chinese airlines increases or where PRC aviation demand decreases. Similarly, a minor increase in the jet fuel prices, particularly in the domestic market, could result in a significant increase in the Group's operating expenses and hence a significant decrease in its operating cash flows. This could be caused by fluctuations in supply and demand in international oil market. Currently, the Group's existing loans and lease facilities do not contain any financial covenants. Nevertheless, as the Group is subject to a high degree of financial leverage, an adverse change in the Group's operating cash flows could adversely affect its financial health and hence weaken its ability to obtain additional loans and lease facilities and to renew its short-term bank loans facilities as they fall due.

As of December 31, 2008, the Group had capital commitments as follows:

	2009	2010	2011	2012	2013 and afterwards	Total
	(RMB million)					
Acquisition of aircraft and related equipment	15,777	19,167	15,142	13,893	11,660	75,639
Others	1,328	775	530	209	-	2,842
Total capital commitments	17,105	19,942	15,672	14,102	11,660	78,481

Others mainly represent airport and office facilities and equipment, overhaul and maintenance bases and training facilities.

As of December 31, 2008, the cash and cash equivalents of the Group totaled RMB4,649 million. Of such balance, 11.3% was denominated in US Dollars, Hong Kong Dollars, Australian Dollars, Japanese Yen and other foreign currencies.

In view of the unutilized bank facilities of RMB78,140 million, the non-public share subscription of RMB3,000 million and cash generated from operations, the Group expects that it will have sufficient funding sources to meet its cash requirements in the foreseeable future.

Contractual Obligations and Commitments

The following table sets forth the Group's obligations and commitments to make future payments under contracts and under commitments as of December 31, 2008.

	Total	As of December 31, 2008 Payment due by period				As of December 31, 2007
		Less than 1 year	1-3 years	3-5 years	After 5 years	Total
Short-term bank loans (note 1)	18,757	18,757	-	-	-	22,003
Long-term bank and other loans (note 1)	23,300	4,721	15,618	1,926	1,035	14,501
Short-term financing bills	2,094	2,094	-	-	-	-
Bills payable	148	148	-	-	-	-
Obligations under capital leases	16,036	2,390	3,499	3,098	7,049	19,499
Operating lease commitments	33,817	4,357	8,362	7,466	13,632	28,179
Aircraft purchase commitments (Note 2)	75,639	15,777	34,309	21,063	4,490	88,742
Other capital commitments	884	654	230	-	-	772
Investing commitments	-	-	-	-	-	133
Total	170,675	48,898	62,018	33,553	26,206	173,829

Note 1 Interest on variable rate loans was estimated based on the current rate in effect at December 31, 2008.

Note 2 Amounts shown are net of previously paid purchase deposits.

Notes:

(i) The above amounts included the salaries paid to these Directors as pilots of the Company.

Board Practices

Each Director's service contract with the Company or any of its subsidiaries provides prorated monthly salary upon termination of employment in accordance with his contract. The Director is entitled to paid leave in accordance with his contract. The term of office of a Director is three years. The term of office of the current Directors will end in 2010. A Director may serve consecutive terms upon re-election.

58

Audit Committee

The audit committee is appointed by the Board of Directors and consists of three independent non-executive Directors. The current members of the audit committee are Gong Hua Zhang, Wang Zhi and Sui Guang Jun. Gong Hua Zhang is the chairman of the audit committee. The term of office of each member is three years. The term for Messrs Wang Zhi and Sui Guang Jun will end in 2009. The term of Mr. Gong Hua Zhang will end in 2010. A member may serve consecutive terms upon re-election. At least once a year, the committee is required to meet with the Company's external auditors without any executive members of the Board in attendance. The quorum necessary for the transaction of any business is two committee members. The Audit Committee held ten meetings in 2008. Gong Hua Zhang, Wang Zhi attended all meetings, while Sui Guang Jun attended nine meetings in 2008.

The Audit Committee is required, amongst other things, to oversee the relationship with the external auditors, to review the Group's interim results and annual financial statements, to monitor compliance with statutory and listing requirements, to review the scope, if necessary, to engage independent legal or other advisers as it determines is necessary and to perform investigations. In addition, the Audit Committee also examines the effectiveness of the Company's internal controls, which involves regular reviews of the internal controls of various corporate structures and business processes on a continuous basis, and takes into account their respective potential risks and severity, in order to ensure the effectiveness of the Company's business operations and the realization of its corporate objectives and strategies. The scope of such examinations and reviews includes finance, operations, regulatory compliance and risk management. The Audit Committee also reviews the Company's internal audit plan, and submits relevant reports and concrete recommendations to the Board on a regular basis.

The Company has an internal audit department which reviews procedures in all major financial and operational activities. This department is led by the head of internal audit.

Remuneration and Assessment Committee

The Remuneration and Assessment Committee is comprised of three members. Currently, the Remuneration and Assessment Committee is chaired by independent non-executive Director Sui Guang Jun with independent non-executive Director Gong Hua Zhang and executive Director Wang Quan Hua as members. The term of office of each member is three years. The term of office of the current members will end in 2010. A member may serve consecutive terms upon re-election. The Remuneration and Assessment Committee met 4 times in 2008, which were attended by all members.

The responsibilities of the Remuneration and Assessment Committee are to make recommendations on the remuneration policy and structure for Directors and senior management of the Company, to establish regular and transparent procedures on remuneration policy development and improvement and submit the Company's "preliminary proposals on annual emoluments of the directors and senior management of the Group". In particular, the Remuneration and Assessment Committee has the duty to ensure that the Directors or any of their associates shall not be involved in the determination of their own remuneration packages.

The Remuneration and Assessment Committee consulted, when appropriate, the Chairman and/or the President about its proposals relating to the remuneration of other executive Directors. The Remuneration and Assessment Committee is provided with sufficient resources to discharge its duties and professional advice is available if necessary. The Remuneration and Assessment Committee is also responsible for assessing performance of executive Directors and approving the terms of executive Directors' service contracts. The Remuneration and Assessment Committee has performed all its responsibilities under its terms of reference in 2008.

Nomination Committee

The Nomination Committee was established on June 28, 2007. Before that, nomination of directors and other senior management was mainly undertaken by the Board. According to the Articles of Association, the Board has the authority to appoint from time to time any person as director to fill a vacancy or as additional director. In selecting candidate directors, the Board focuses on their qualifications, technical skills, experiences (in particular, the experience in the industry in which the Group operates in case of candidates of executive directors) and expected contributions to the Group.

As at December 31, 2008, the Nomination Committee consists of two members, Messrs Wang Zhi and Gong Hua Zhang. They are independent non-executive Directors of the Company. Mr. Liu Shao Yong resigned as the chairman of the Nomination Committee on December 12, 2008 due to change of offices and Mr. Si Xian Min was appointed as the chairman of the Nomination Committee on March 11, 2009. The responsibilities of the Nomination Committee are to make recommendations to the Board in respect of the size and composition of the Board based on the operational activities, assets and shareholding structure of the Company; study the selection criteria and procedures of Directors and executives and give advice to the Board; identify qualified candidates for Directors and executives; investigate and propose candidates for Directors and managers and other senior management members to the Board.

In accordance with relevant laws and regulations as well as the provisions of the Articles of Association of the Company, the Nomination Committee shall study and resolve on the selection criteria, procedures and terms of office for directors and managers with reference to the Company's actual situation. Any resolution made in this regard shall be filed and proposed to the Board for approval and shall be implemented accordingly. The Nomination Committee is provided with sufficient resources to discharge its duties and independently engages intermediate agencies to provide professional advice on its proposals if necessary.

The Nomination Committee held one meeting in 2008, which was attended by all members.

Employees

As of December 31, 2008, the Group had 46,209 employees, including 4,171 pilots, 5,838 flight attendants, 6,654 maintenance personnel, 5,681 sales and marketing personnel, 2,875 ground service personnel, 1,430 flight operation officers, 1,564 financial personnel and 10,006 administrative and 7,990 other personnel. All of the Group's pilots, flight attendants, maintenance personnel, administrative personnel and sales and marketing personnel are contract employees.

The Company's employees are members of a trade union organized under the auspices of the All-China Federation of Trade Unions, which is established in accordance with the Trade Union Law of China. A representative of the Company labor union currently serves on the Supervisory Committee of the Company. Each of the Company's subsidiaries has its own trade union. The Group has not experienced any strikes, slowdowns or labor disputes that have interfered with its operations, and the Group believes that its relations with its employees are good.

All employees of the Group receive cash remuneration and certain non-cash benefits. Cash remuneration consists of salaries, bonuses and cash subsidies provided by the Group. Salaries are determined in accordance with the national basic wage standards. The total amount of wages payable by the Group to its employees is subject to a maximum limit based on the profitability of the Group and other factors. Bonuses are based on the profitability of the Group. Cash subsidies are intended as a form of cost-of-living adjustment. In addition to cash compensation, the Group's contract employees receive certain non-cash benefits, including housing, education and health services, and the Group's temporary employees receive limited health services, but not housing or education.

Employee benefits

Employee benefits are all forms of considerations given and other related expenditures incurred in exchange for services rendered by employees. Except for termination benefits, employee benefits are recognised as a liability in the period in which the associated services are rendered by employees, with a corresponding increase in cost of relevant assets or expenses in the current period.

(a) Retirement benefits

Pursuant to the relevant laws and regulations of the PRC, the Group has joined a defined contribution basic retirement scheme for the employees arranged by local Labor and Social Security Bureaus. The Group makes contributions to the retirement scheme at the applicable rates ranging from 9% to 24% (2007: 9% to 24%) as required by the government organization. The contributions are charged to profit or loss on an accrual basis. When employees retire, the local Labor and Social Security Bureaus are responsible for the payment of the basic retirement benefits to the retired employees.

In addition, the Group has established a supplementary defined contribution retirement scheme for the benefit of employees in accordance with relevant regulations in the PRC. Under such supplementary scheme, the Group is required to make contributions not exceeding one-twelfth of the prior year's total salaries.

(b) Housing fund and other social insurances

Besides the retirement benefits, pursuant to the relevant laws and regulations of the PRC, the Group has joined defined social security contributions for employees, such as a housing fund, basic medical insurance, unemployment insurance, injury insurance and maternity insurance. The Group makes contributions to the housing fund and other social insurances mentioned above at the applicable rates based on the employees' salaries. The contributions are recognized as cost of assets or charged to profit or loss on an accrual basis.

(c) Termination benefits

When the Group terminates the employment relationship with employees before the employment contracts have expired, or provides compensation as an offer to encourage employees to accept voluntary redundancy, a provision for the termination benefits provided, is recognized in profit or loss when both of the following conditions have been satisfied:

The Group has a formal plan for the termination of employment or has made an offer to employees for voluntary redundancy, which will be implemented shortly;

- The Group is not allowed to withdraw from termination plan or redundancy offer unilaterally.

Workers' Compensation

There is no workers' compensation or other similar compensation scheme under the Chinese labor and employment system. As required by Chinese law, however, the Group, subject to certain conditions and limitations, pays for the medical expenses of any contract employee who suffer a work-related illness, injury or disability and continues to pay the full salary of, and provides all standard cash subsidies to, such employee during the term of such illness, injury or disability. The Group also pays for certain medical expenses of its temporary employees.

Share Ownership

As of the date of this Annual Report, no Director, Senior Management or Supervisor of the Company is a beneficial owner of any shares of the Company's capital stock. As of the date of this Annual Report, no arrangement has been put in place involving issue or grant of options or shares or securities of the Company to any of the Director, Senior Management, Supervisor or employees of the Company.

ITEM 7. MAJOR SHAREHOLDERS AND RELATED PARTY TRANSACTIONS.

Major Shareholders

Share Capital Structure

As of June 12, 2009 the total share capital of the Company was divided into 6,561,267,000 shares, of which approximately 50.30% (3,300,000,000 A Shares) was directly held by CSAHC, approximately 22.86% (1,500,000,000 A Shares) was held by other domestic shareholders, and approximately 26.84% (1,761,267,000 H Shares) was held by Hong Kong and overseas shareholders (among which, approximately 0.08% (5,350,000 H Shares) was indirectly held by CSAHC). CSAHC owns, directly and indirectly, 50.38% of the total share capital of the Company, therefore it is entitled to exercise all the rights of a controlling shareholder, including the election of executive Directors.

Substantial Shareholders

As of June 12, 2009, the following shareholders had an interest of 5% or more in the Company's shares:

Name	Number of Shares	Approximate Percentage of the Total Number of Shares
CSAHC	3,300,000,000 A Shares(1)	50.30%
HKSCC Nominees Limited	1,739,874,398 H Shares(2)	26.52%

61

The table below sets forth, as of June 12, 2009, the following entities hold 5% or more of the total number of H Shares issued by the Company.

Name	Number of H Shares	Approximate Percentage of the Total Number of H Shares
HKSCC Nominees Limited	1,739,874,398(2)	98.79%

A Shares and H Shares have identical voting rights.

- (1) CSAHC has right to acquire 721,150,000 A Shares and through Nan Lung Holding Limited (a wholly-owned subsidiary of CSAHC), to acquire 721,150,000 H Shares, pursuant to the A Shares subscription agreement dated December 10, 2008 entered into between the Company and CSAHC and the H Shares subscription agreement dated December 10, 2008 entered into between the Company and Nan Lung Holding Limited, respectively. Both of the subscription agreements were approved by the shareholders of the Company. On June 3, 2009, the Company received the formal approval from CSRC for the proposed non-public issue of H Shares. Up to June 12, 2009, CSRC's formal approval for the proposed non-public issue of A Shares is pending.
- (2) Among the 1,739,874,398 H Shares held by HKSCC Nominees Limited, CSAHC had an interest in an aggregate of 5,350,000 H Shares through Asia Travel Investment Company Limited, a wholly-owned subsidiary of CSAHC in Hong Kong (representing approximately 0.3% of the then total issued H Shares).

Among the 1,739,874,398 H Shares held by HKSCC Nominees Limited, J.P. Morgan Fleming Asset Management Holdings Inc. had an interest in an aggregate of 106,368,000 H Shares, representing approximately 6.04% of its then total issued H Shares.

Among the 1,739,874,398 H Shares held by HKSCC Nominees Limited, Baring Asset Management Limited (or certain of its directly or indirectly controlled subsidiaries) had an interest in a lending pool of an aggregate of 105,126,000 H Shares, representing 5.96% of the then total issued H Shares.

Related Party Transactions

The Company enters into transactions from time to time with CSAHC and its associates. For a description of such transactions, see Note 42 to the Financial Statements. In particular, the following arrangements, which the Company believes are material to its operations, have been made between the Company and CSAHC and its associates during the year ended December 31, 2008 and up to the latest practicable date. The Company believes that these arrangements have been entered into by the Group in the ordinary course of business and in accordance with the agreements governing such transactions.

Arrangements with CSAHC

Non-Public Subscriptions

On December 10, 2008, the Company entered into that certain A Shares subscription agreement with CSAHC, pursuant to which CSAHC has conditionally agreed to subscribe and the Company has conditionally agreed to allot and issue 721,150,000 new A Shares for a consideration of RMB2,278,834,000, equivalent to a subscription price of RMB3.16 per new A Share.

Separately and on the same date, the Company and Nan Lung (a wholly-owned subsidiary of CSAHC) entered into that certain H Shares subscription agreement, pursuant to which, Nan Lung has conditionally agreed to subscribe and the Company has conditionally agreed to allot and issue 721,150,000 new H Shares for a consideration of RMB721,150,000, equivalent to a the subscription price of RMB1.00 (equivalent to approximately HK\$1.13) per new H Share.

Upon the completion of both A Share and H Share subscriptions, CSAHC's direct and indirect ownership in the Company will be increased from 50.38% to approximately 59.32% of the issued share capital of the Company. Currently, both non-public subscriptions have been approved by shareholders of the Company. On June 3, 2009, the Company received the formal approval from CSRC for the proposed non-public issue of H Shares. Up to June 12, 2009, CSRC's formal approval for the proposed non-public issue of A Shares is pending.

Trademark License Agreement

The Company and CSAHC entered into a ten year trademark license agreement dated May 22, 1997 pursuant to which CSAHC acknowledges that the Company has the right to use the name "China Southern" and "China Southern Airlines" in both Chinese and English, and grants the Company a renewable royalty free license to use the kapok logo on a worldwide basis in connection with the Company's airline and airline-related businesses. As CSAHC did not give a written notice of termination three months before the expiration of the agreement, the agreement is automatically renewed for another ten year term. In May of 2007, the Trademark License Agreement has been renewed by the two parties for another ten-year term till 2017.

Leases

The Company as lessee and CSAHC as lessor have entered into the following lease agreements:

(1) On December 19, 2006, the Company entered into a master lease agreement with CSAHC. The agreement is valid from January 1, 2006 to December 31, 2008. Under such agreement, the Company leased CSAHC's certain parcels of land, properties and buildings at various locations at Guangzhou, Haikou, Wuhan, Hengyang, Shashi (currently known as "Jingzhou") and Nanyang. This lease agreement takes effect retrospectively on January 1, 2006, and is valid for a term of three years, the total rent payable is RMB86,029,619.01, of which, the annual rents payable for the year 2006, 2007 and 2008 are RMB27,543,606.01, RMB28,657,966.99 and RMB29,828,046.01 respectively.

For the year ended December 31, 2008, the property management fee incurred by the Group amounted to RMB29,828,046.01 pursuant to such lease agreement.

The Company renewed the Property Lease Agreement with CSAHC on December 29, 2008. The agreement is valid from January 1, 2009 to December 31, 2011. Under such agreement, the annual rents payable to CSAHC are RMB37,148,660, RMB39,006,093 and RMB40,956,397.65 respectively.

(2) The Company and CSAHC entered into an indemnification agreement dated May 22, 1997 in which CSAHC has agreed to indemnify the Company against any loss or damage caused by or arising from any challenge of, or interference with, the Company's right to use certain land and buildings.

(3) Due to the expiration on December 31, 2007 of the Land Use Rights Lease Agreement between the Company and CSAHC, the Property Lease Agreement between the Company and CSAHC, and China Northern Airlines, as well as the Property Lease Agreement between the Company and CSAHC and Xinjiang Airlines on November 12, 2004, and in order to ensure normal operation of the Company, the Company, based on the actual leasing conditions of both parties, consolidate the three agreements into two agreements by the type of the leased properties, namely the Land Lease Agreement and the Property Lease Agreement. Those two agreements were entered into between the Company and CSAHC on January 10, 2008 and effective for a period from January 1, 2008 to December 31, 2010. As provided for in the Land Lease Agreement and the Property Lease Agreement, the lease areas of the related lands and properties were changed to 1,104,209.69 square meters and 197,010.37 square meters respectively, and their annual rentals were adjusted to RMB21,817,145.00 and RMB48,474,632.77, or an aggregate of RMB70,291,777.77 for each of the years from 2008 to 2010. The rentals were determined by

reference to the market rents of the same district and on the basis that unit rental and payment terms remained unchanged.

For the year ended December 31, 2008, the rents for land lease and property lease incurred by the Group amounted to RMB21,817,145.00 and RMB48,474,632.77 respectively pursuant to such lease agreement.

Arrangements with CSAHC's Associates

Southern Airlines (Groups) Import and Export Trading Company ("SAIETC"), a wholly-owned subsidiary of CSAHC

On January 10, 2008, the Company entered into an Import and Export Agency Framework Agreement with SAIETC, pursuant to which the parties shall cooperate on the following business domains: import and export, customs clearance, customs declaration and inspection, tendering and agency, etc. The agreement is valid from January 1, 2008 to December 31, 2010, and the annual cap for the commission should not exceed RMB90,000,000.

For the year ended December 31, 2008, the expense incurred by the Group to SAIETC in respect of the import and export services was RMB49,867,000.

Southern Airlines Culture and Media Co., Ltd. ("SACM"), which is 50% owned by the Company and 50% owned by CSAHC

On April 12, 2007, the Company and SACM entered into an Advertising Agency Framework Agreement for a term of three years commencing from the date of the agreement. Under the agreement, SACM will produce advertisement script, graphic and music for the Company with the copyrights of such products belonging to the Company, subject to compliance with the relevant provisions of the Listing Rules. The parties have determined the various rates for providing advertising services after negotiations on a fair and equitable basis, and SACM has promised that the advertising fees for which they charged the Company were all based on the prevailing market prices for similar business which were accepted by the Company. As set forth in the agreement, the transaction cap for 2007, 2008 and 2009 were RMB16,000,000, RMB20,500,000 and RMB25,500,000, respectively.

For the year ended December 31, 2008, payments made by the Group to SACM for advertising services amounted to RMB19,706,000.

SA Finance which is 66% controlled by CSAHC, 21% owned by the Company and 13% owned in aggregate by four subsidiaries of the Company

On November 15, 2007, the Company renewed the Financial Services Framework Agreement with SA Finance, and presented the relevant resolution at the First Extraordinary General Meeting for the Year 2008 held on January 18, 2008 for review and approval of the Company's shareholders pursuant to the requirements of Rule 14A.35 and Rule 14A.48 of the Listing Rules.

Under such agreement, SA Finance agrees to provide to the Company deposit and loan services. According to the agreement, SA Finance shall pay interest to the Company regularly at a rate not lower than the current deposit rates set by the People's Bank of China. The Group's deposits placed with SA Finance were re-deposited in a number of banks. SA Finance has agreed that the loans it provided to CSAHC and its subsidiaries other than the Group should not exceed the aggregate of share capital, reserves and total deposits of other companies (excluding the Group). The rates should be determined on arm's length basis and based on fair market rate, and should not be higher than those available from independent third parties. The parties hereby agreed that the balance of the Group's deposits placed with SA Finance (including accrued interests) should not at any time exceed RMB2.6 billion, nor should the balance of loans borrowed from SA Finance at any time exceed the above-mentioned level. The annual cap of fees payable to SA Finance for the other financial services should not exceed RMB5 million. The agreement is valid from January 1,

2008 to December 31, 2010.

As of December 31, 2008, the Group's deposits placed with SA Finance amounted to RMB1,138,896,000.

China Southern West Australian Flying College Pty Ltd (the "Australian Pilot College"), which is 91% owned by the Company and 9% owned by CSAHC

CSAHC and the Australian Pilot College entered into an agreement dated October 7, 1993 for the provision of pilot training in Australia to the cadet pilots of the Group (the "Training Agreement"). The Training Agreement will remain in force unless terminated by either party upon 90 days' prior written notice to the other party. Pursuant to the De-merger Agreement, the Company has assumed all the interests, rights and obligations of CSAHC under the Training Agreement. The Company acquired a 26% equity interest in Australian Pilot College from CSAHC in December 2008, and Australian Pilot College became a 91% owned subsidiary of the Company.

For the year ended December 31, 2008, the amount payable by the Group to the Australian Pilot College for training services was RMB45,248,000.

Agency Agreement

The Company has entered into Ticket Agency Agreements for the sale of the Group's air tickets with a subsidiary of CSAHC (the "Agent"). The Agent charges commission on the basis of the rates stipulated by the CAAC and IATA and rates agreed on through negotiation between the parties. The Company has other air ticket sales agents in China who also charge commission at the same rates.

The Company and China Southern Airlines Group Passenger and Cargo Agent Company Limited ("PCACL"), a wholly-owned subsidiary of CSAHC have entered into the Framework Agreement on Expanded Businesses Including the Sale of Air Tickets, the Airfreight Forwarding Services, Chartered Flight and Pallets Agency Services, Delivery Services For the Outside Storage Area and the relevant Internal Operation Services For the Inside Storage Area of China Southern Airlines Company Limited dated January 10, 2008 (the "Agency Agreement"), which is valid from January 1, 2008 to December 31, 2010. Pursuant to the Freight Agency Agreement, the cooperative scope of both parties thereto mainly comprises extended businesses including air ticket sales agency services, airfreight forwarding sales agency services, chartered flight and pallets agency services, internal operation services for the inside storage area, and delivery services for the outside storage area and chartered flight and pallets sales agency business. The annual transaction cap of the sales value shall not exceed RMB250 million.

For the year ended December 31, 2008, the amount of ticket and cargo sales of the Group conducted through the above sales arrangement was RMB134,404,000.

Guangzhou China Southern Airlines Property Management Company Limited (the "GCSAPMC"), which is 100% owned by CSAHC

The Company and GCSAPMC entered into a Framework Agreement for the Engagement of Property Management ("Property Management Framework Agreement") dated January 1, 2006 to engage GCSAPMC to provide property management and improvement service for a term of three years from the date of this agreement. Pursuant to the agreement, the Company has appointed GCSAPMC to provide management and maintenance services for the Company's headquarters in Guangzhou and to provide maintenance and management services for the 110KV transformer substation to ensure the ideal working conditions of the Company's production and office facilities and physical environment, and the normal operation of equipment. The fee charging schedule (or charge standard) shall be determined on an arm's length basis between both parties, and shall not be higher than the one charged by any independent third parties in the similar industry. The annual cap for the Property Management Framework Agreement is set at RMB47,010,000. As such agreement expired on December 31, 2008, the Company renewed the Framework Agreement for the Engagement of Property Management with GCSAPMC on December 29, 2008 for a term of three years from January 1, 2009 to December 31, 2011, and there is no change in the scope of services and the annual caps.

For the year ended December 31, 2008, the property management and maintenance fee incurred by the Group amounted to RMB30,841,000 pursuant to the Property Management Framework Agreement.

Acquisition/Disposal of Assets

The Company entered into a License Agreement of Intangible Assets with SACM on November 11, 2008, pursuant to which the Company agreed to transfer the right to use the advertising resources to SACM for a period of 18 years exclusively. The agreement is valid from March 31, 2008 to March 30, 2026. Pursuant to a valuation report, the valuations of the advertising resources amounted to RMB35,036,600 and the transfer price determined by the Company based on the valuations was RMB35,036,600.

Others

The Company entered into the Supplemental Agreement to the Capital Contribution Agreement of SACM with CSAHC on July 15, 2008 pursuant to the resolution of the Board. Under the Supplemental Agreement, the Company and CSAHC agreed that the Company's form of contribution shall be changed to injection of RMB28,684,945 in cash. Upon the completion of contribution to registered capital in cash by the Company, the shareholding structure of SACM will remain unchanged, being held as to 50% equity interest each by the Company and CSAHC.

On May 7, 2009, the Company entered into the Airline Service Agreement with TravelSky Technology Limited ("TravelSky") for the period from January 1, 2009 to December 31, 2009. Mr. Wang Quan Hua, a director of the Company also serves directorship in TravelSky, which is a provider of information technology solutions for aviation and travel industry. Pursuant to the agreement, TravelSky agrees to provide to the Company with flight control system services, electronic travel distribution system services, ticket-reservation system extended services and civil aviation and commercial data network services. In return, the Company pays service fees to TravelSky with reference to the standard rate set by CAAC. Such transaction has been approved by the Board of the Company and will be submitted for approval at the General Meeting of the Shareholders. The total service fee paid by the Company to TravelSky for 2008 was RMB328.4 million.

All related party transactions have been approved by Independent Non-executive Directors.

ITEM 8. FINANCIAL INFORMATION.

Consolidated Statements and Other Financial Information

Our audited consolidated financial statements are set forth beginning on page F-1, which can be found after Item 19.

Significant Changes

No significant changes have occurred since the date of the financial statements.

Legal Proceedings

A writ of summons was issued on May 30, 2007 by the High People's Court of Guangdong Province relating to a claim that certain sales agents in Taiwan (the "plaintiffs") against the Company for the alleged breach of certain terms and conditions of a cooperative agreement (the "cooperative agreement"). The plaintiffs have made a claim against the Company for a total sum of approximately HKD107 million and an unspecified compensation for early termination of the cooperative agreement.

In May 2008, The High People's Court of Guangdong Province rejected the claims made by the plaintiffs, and the plaintiffs were ordered to bear all litigation expenses in respect of the first trial. The plaintiffs submitted an appeal to The Supreme People's Court of the People's Republic of China.

The directors considered that the claim was without merit and had no material adverse effect on the financial position of the Group, and accordingly no provision in respect of the claims was made in the financial statements.

In May 2009, the Company has received the civil judgment from the Supreme People's Court of the PRC, pursuant to which the plaintiffs were allowed to withdraw their appeal. Accordingly, the verdict brought in by the High People's Court of Guangdong Province became legally effective and such verdict is final and conclusive on the parties.

Dividend Information

No interim dividend was paid during the year ended December 31, 2008. The Board of Directors does not recommend the payment of a final dividend in respect of the year ended December 31, 2008.

ITEM 9. THE OFFER AND LISTING.

Offer and Listing Details

The principal trading market for the Company's H Shares is the Hong Kong Stock Exchange, and the Company's trading code is "1055". The Company completed its initial public offering of H Shares on July 30, 1997. The ADRs, each representing 50 H Shares, are evidenced by ADRs issued by the Bank of New York as the depository. The ADRs have been listed for trading on the New York Stock Exchange since July 31, 1997, under the symbol "ZNH".

The principal trading market for the Company's A Shares is the Shanghai Stock Exchange with trading code of "600029". On July 25, 2003, the Company completed its initial public offering of A Shares.

Set forth below for the periods indicated are the high and low sales prices of H Shares on the Hong Kong Stock Exchange, ADRs on the New York Stock Exchange and A Shares on the Shanghai Stock Exchange.

B. Memorandum and Articles of Association

The following is a summary of certain provisions of our Articles of Association. As this is a summary, it does not contain all the information that may be important to you. You and your advisors should read the text of our most updated Articles of Association for further information, which is filed as an exhibit to this Annual Report.

The Company is registered with and has obtained a business license from the State Administration Bureau of Industry and Commerce of the People's Republic of China on March 25, 1995.

On March 13, 2003, the Company obtained an approval certificate from the Ministry of Commerce to change to a permanent limited company with foreign investments.

Other Senior Administrative Officers

Pursuant to the Article 16 of the Articles of Association, other senior administrative officers of the Company refer to executive vice president, chief financial officer, the board secretary, chief economist, chief engineer, chief pilot, and chief legal adviser and chief information officer.

Objects and Purpose

Pursuant to the Article 18 of the Articles of Association, the scope of business of the Company includes: (I) provision of scheduled and non-scheduled domestic, regional and international air transportation services for passengers, cargo, mail and luggage; (II) undertaking general aviation services; (III) provision of aircraft repair and maintenance services; (IV) acting as agent for other domestic and international airlines; (V) provision of air catering services; (VI) provision of hotel business; (VII) acting as sale agent for aircraft leasing and aviation accident insurance; and (VIII) engaging in other airline or airline-related business, including advertising for such services.

Directors

Pursuant to Article 244 of the Articles of Association, where a Director of the Company is in any way, directly or indirectly, materially interested in a contract, transaction or arrangement or proposed contract, transaction or arrangement with the Company, (other than his contract of service with the Company), he shall declare the nature and extent of his interests to the Board of Directors at the earliest opportunity, whether or not the contract, transaction or arrangement or proposal is otherwise subject to the approval of the Board of Directors.

Pursuant to Article 174 of the Articles of Association, where a Director is interested in any resolution proposed at a board meeting, such Director shall not be present and shall not have a right to vote. Such Director shall not be counted in the quorum of the relevant meeting.

Pursuant to Article 252 of the Articles of Association, the Company shall, with the prior approval of shareholders in general meeting, enter into a contract in writing with a Director wherein his emoluments are stipulated. The aforesaid emoluments include, emoluments in respect of his service as Director, Supervisor or senior administrative officer of the Company or any subsidiary of the Company; emoluments in respect of the provision of other services in connection with the management of the affairs of the Company and any of its subsidiaries; and payment by way of compensation for loss of office, or as consideration for or in connection with his retirement from office.

Pursuant to Article 162(6) of the Articles of Association, the Board of Directors has the power to formulate proposals for increases or reductions in the Company's registered capital and the issue of debentures of the Company; such resolutions must be passed by more than two-thirds of all the Directors.

There is no mandatory retirement age for the Directors of the Company. The Directors of the Company are not required to hold shares of the Company.

Ordinary Shares

Pursuant to Article 26 of the Articles of Association, subject to the approval of the securities authority of the State Council, the Company may issue and offer shares to domestic investors or foreign investors for subscription. Foreign investors are those investors of foreign countries and regions of Hong Kong, Macau and Taiwan who subscribe for shares issued by the Company. Domestic investors are those investors within the territory of the PRC (excluding investors of the regions referred to in the preceding sentence) who subscribe for shares issued by the Company.

Pursuant to Article 27 of the Articles of Association, shares issued by the Company to domestic investors for subscription in Renminbi shall be referred to as "Domestic-Invested Shares". Shares issued by the Company to foreign investors for subscription in foreign currencies shall be referred to as "Foreign-Invested Shares". Foreign-Invested Shares which are listed overseas are called "Overseas-Listed Foreign-Invested Shares". The foreign currencies mean the legal currencies (apart from Renminbi) of other countries or districts which are recognized by the foreign exchange control authority of the state and can be used to pay the Company for the share price.

Pursuant to Article 28 of the Articles of Association, Domestic-Invested Shares issued by the Company shall be called “A Shares”. Overseas-Listed Foreign-Invested Shares issued by the Company and listed in Hong Kong shall be called “H Shares”. H Shares are shares which have been admitted for listing on The Stock Exchange of Hong Kong Limited, the par value of which is denominated in Renminbi and which are subscribed for and traded in Hong Kong dollars. H Shares can also be listed on a stock exchange in the United States of America in the form of ADR.

Following the completion of the bonus share issue by way of conversion of share premium, the Company has issued a total of 6,561,267,000 ordinary shares, of which (a) 3,300,000,000 are Domestic Shares held by CSAHC, (b) 1,761,267,000 are H Shares held by Hong Kong and overseas shareholders and (c) 1,500,000,000 are A Shares held by PRC shareholders.

Pursuant to Article 62 of the Articles of Association, the ordinary shareholders of the Company shall enjoy the following rights:

- (1) the right to attend or appoint a proxy to attend shareholders' general meetings and to vote thereat;
- (2) the right to dividends and other distributions in proportion to the number of shares held;
- (3) the right of supervisory management over the Company's business operations, and the right to present proposals or enquiries;
- (4) the right to transfer, donate or pledge his shares in accordance with laws, administrative regulations and provisions of these Articles of Association;
- (5) the right of knowledge and decision making power with respect to important matters of the Company in accordance with laws, administrative regulations and these Articles of Association;
- (6) the right to obtain relevant information in accordance with the provisions of these Articles of Association, including:
 - (i) the right to obtain a copy of these Articles of Association, subject to payment of the cost of such copy;
 - (ii) the right to inspect and copy, subject to payment of a reasonable charge;
 - (a) all parts of the register of shareholders;
- (b) personal particulars of each of the Company's directors, supervisors, president and other senior administrative officers, including:
 - (aa) present name and alias and any former name or alias;
 - (bb) principal address (residence);
 - (cc) nationality;
 - (dd) primary and all other part-time occupations and duties;
 - (ee) identification documents and their relevant numbers;
- (c) state of the Company's share capital;
- (d) reports showing the aggregate par value, quantity, highest and lowest price paid in respect of each class of shares repurchased by the Company since the end of last accounting year and the aggregate amount paid by the Company for this purpose;
- (e) minutes of shareholders' general meetings; and
- (f) interim and annual reports of the Company.

(7)

in the event of the termination or liquidation of the Company, to participate in the distribution of surplus assets of the Company in accordance with the number of shares held; and

(8) other rights conferred by laws, administrative regulations and these Articles of Association.

Pursuant to Article 67 of the Articles of Association, the ordinary shareholders of the Company shall assume the following obligations:

- (1) to abide by these Articles of Association;
- (2) to pay subscription monies according to the number of shares subscribed and the method of subscription;
- (3) no right to return shares to the Company unless laws and regulations provide otherwise; and
- (4) other obligations imposed by laws, administrative regulations and these Articles of Association.

Shareholders are not liable to make any further contribution to the share capital other than as agreed by the subscriber of the relevant shares on subscription.

Action necessary to change rights of shareholders

Pursuant to Article 152 of the Articles of Association, shareholders who hold different classes of shares are shareholders of different classes.

The holders of the Domestic Shares and holders of Overseas Listed Foreign Shares shall be deemed to be shareholders of different classes.

Pursuant to Article 153 of the Articles of Association, rights conferred on any class of shareholders in the capacity of shareholders (“class rights”) may not be varied or abrogated unless approved by a special resolution of shareholders in general meeting and by holders of shares of that class at a separate meeting.

Pursuant to Article 155 of the Articles of Association, shareholders of the affected class, whether or not otherwise having the right to vote at shareholders’ general meetings, shall nevertheless have the right to vote at class meetings in respect of the following matters: (i) to effect an exchange of all or part of the shares of such class into shares of another class or to effect an exchange or create a right of exchange of all or part of the shares of another class into the shares of such class; (ii) to restrict the transfer or ownership of the shares of such class or add to such restriction; (iii) to restructure the Company where the proposed restructuring will result in different classes of shareholders bearing a disproportionate burden of such proposed restructuring; and (iv) to vary or abrogate the provisions of these Articles of Association. However, interested shareholder(s) shall not be entitled to vote at class meetings.

Pursuant to Article 156 of the Articles of Association, resolutions of a class of shareholders shall be passed by votes representing more than two-thirds of the voting rights of shareholders of that class represented at the relevant meeting who are entitled to vote at class meetings.

Pursuant to Article 157 of the Articles of Association, written notice of a class meeting shall be given forty-five days before the date of the class meeting to notify all of the shareholders in the share register of the class of the matters to be considered, the date and the place of the class meeting. A shareholder who intends to attend the class meeting shall deliver his written reply concerning attendance at the class meeting to the Company twenty days before the date of the class meeting.

If the number of shares carrying voting rights at the meeting represented by the shareholders who intend to attend the class meeting reaches more than one half of the voting shares at the class meeting, the Company may hold the class

meeting; if not, the Company shall within five (5) days notify the shareholders again by public notice of the matters to be considered, the date and the place for the class meeting. The Company may then hold the class meeting after such publication of notice.

Pursuant to Article 158 of the Articles of Association, notice of class meetings need only be served on shareholders entitled to vote thereat.

Meeting of any class of shareholders shall be conducted in a manner as similar as possible to that of general meetings of shareholders. The provisions of these Articles of Association relating to the manner to conduct any shareholders' general meeting shall apply to any meeting of a class of shareholders.

Pursuant to Article 160 of the Articles of Association, the special procedures for voting at any meeting of a class of shareholders shall not apply to the following circumstances:

- (1) where the Company issues, upon the approval by special resolution of its shareholders in general meeting, either separately or concurrently once every twelve months, not more than 20 percent of each of its existing issued Domestic Shares and Overseas Listed Foreign Shares; and
- (2) where the Company's plan to issue Domestic Shares and Overseas Listed Foreign Shares at the time of its establishment is carried out within fifteen months from the date of approval of the competent securities authority of the State Council.

Meetings of shareholders

Shareholders' general meetings is the organ of authority of the Company and shall exercise its functions and powers, among other things, to decide on the Company's operational policies and investment plans, to elect and replace directors and decide on matters relating to the remuneration of directors, to examine and approve reports of the board of directors, etc.

There are two types of shareholders' general meetings: annual general meetings and extraordinary general meetings. Shareholders' general meetings shall be convened by the Board of Directors. Annual general meetings are held once every year and within six months from the end of the preceding financial year.

Under any of the following circumstances, the Board of Directors shall convene an extraordinary general meeting within two months:

- (1) when the number of Directors is less than the number of Directors required by the Company Law or two thirds of the number of Directors specified in the Articles of Association;
- (2) when the accumulated losses of the Company amount to one third of the total amount of its share capital;
- (3) when shareholder(s) holding 10 percent or more of the Company's issued and outstanding shares carrying voting rights request(s) in writing the convening of an extraordinary general meeting;
- (4) when deemed necessary by the Board of Directors or as requested by the Supervisory Committee;
- (5) More than one half of the independent directors propose to convene the meeting.

When the Company convenes a shareholders' general meeting, written notice of the meeting shall be given forty five days before the date of the meeting to notify all of the shareholders in the share register of the matters to be considered and the date and the place of the meeting. A shareholder who intends to attend the meeting shall deliver his written reply concerning the attendance of the meeting to the Company twenty days before the date of the meeting.

The Company shall, based on the written replies received twenty days before the date of the shareholders' general meeting from the shareholders, calculate the number of voting shares represented by the shareholders who intend to attend the meeting. If the number of voting shares represented by the shareholders who intend to attend the meeting reaches one half or more of the Company's total voting shares, the Company may hold the meeting; if not, then the Company shall within five days notify the shareholders again by public notice of the matters to be considered, the place and date for, the meeting. The Company may then hold the meeting after such publication of notice.

Limitation on right to own securities

The PRC Special Regulations on Overseas Offering and the Listing of Shares by Companies Limited by Share (the “Special Regulations”) and the Mandatory Provisions for Articles of Association of Companies to be Listed Overseas (the “Mandatory Provisions”) provide for different classes of shares to be subscribed for and traded by local and overseas investors respectively. Shares which can be traded by overseas investors must be in registered form and while denominated in Renminbi, they are traded in foreign currency with dividends payable in foreign currency. Local investors are prohibited from dealing in such shares.

Merger, acquisition or corporate restructuring

Pursuant to Article 291 of the Articles of Association, in the event of the merger or division of the Company, a plan shall be presented by the Company’s Board of Directors and shall be approved in shareholders’ general meeting and the relevant examining and approving formalities shall be processed as required by law. A shareholder who objects to the plan of merger or division shall have the right to demand the Company or the shareholders who consent to the plan of merger or division to acquire that dissenting shareholder’s shareholding at a fair price. The contents of the resolution of merger or division of the Company shall be made into special documents for shareholders’ inspection. Such special documents shall be sent by mail to holders of Overseas-Listed Foreign-Invested Shares.

The Articles of Association do not contain any provisions governing the ownership threshold above which shareholder ownership must be disclosed.

C. Material Contracts

The Company has not entered into any material contracts other than in the ordinary course of business and other than those described in this Item 10, Item 7, “Related Party Transactions”, Item 4, “Information on the Company” or elsewhere in this Annual Report on Form 20-F.

- (a) Pursuant to the Aircraft Acquisition Agreement dated July 16, 2007 between the Company and Airbus SNC, the Company will acquire 20 Airbus A320 series aircraft from Airbus SNC. The catalogue price for each of the Airbus A320 series aircraft is in the range from US\$66.5 to US\$85.9 million. Such catalogue price includes the price for airframe and engines. The aggregate consideration for the acquisition of the A320 aircraft will be partly payable by cash of the Company, and partly by financing arrangements with banking institutions. The A320 aircraft will be delivered in stages to the Company during the period commencing from March 2009 to August 2010.
- (b) Pursuant to the Xiamen Aircraft Acquisition Agreement dated July 16, 2007 between Xiamen Airlines and Boeing, Xiamen Airlines will acquire 25 Boeing B737 aircraft from Boeing. The catalogue price for each of the Boeing B737 aircraft is in the range from US\$70.5 to US\$79 million. Such catalogue price includes the price for airframe and engines. The aggregate consideration for the acquisition of the B737 aircraft will be partly payable by cash of Xiamen Airlines, and partly by financing arrangements with banking institutions. The B737 aircraft will be delivered in stages to Xiamen Airlines during the period commencing from July 2011 to November 2013.
- (c) Pursuant to the Aircraft Acquisition Agreement dated August 20, 2007 between the Company and Boeing, the Company will acquire 55 Boeing B737 series aircraft from Boeing, the catalogue price of a Boeing B737 series aircraft is in the range of US\$57 to US\$79 million. Such catalogue price includes price for airframe and engines. The aggregate consideration for the acquisition of the Boeing aircraft will be partly payable by cash of the Company, and partly by financing arrangements with banking institutions. The Boeing aircraft will be delivered in stages to the Company during the period commencing from May 2011 to October 2013.

(d) Pursuant to the Aircraft Acquisition Agreement dated October 23, 2007 between the Company and Airbus SNC, the Company will acquire ten Airbus A330-200 aircraft from Airbus SNC, the catalogue price of an Airbus A330-200 aircraft is in the range of US\$167.7 to 176.7 million. Such catalogue price includes price for airframe and engines. The aggregate consideration for the acquisition will be partly payable by cash of the Company, and partly by financing arrangements with banking institutions. The Airbus aircraft will be delivered in stages to the Company during the period commencing from March 2010 to August 2012.

(e) Pursuant to the Xiamen Aircraft Acquisition Agreement dated April 18, 2008 between Xiamen Airlines and Boeing, Xiamen Airlines will acquire 20 Boeing B737 series aircraft from Boeing. According to the information provided by Boeing, the aggregate catalogue price for the 20 Boeing B737 series aircraft is around US\$1,500 million. Such catalogue price includes price for airframe and engines. The aggregate consideration for the acquisition of the Boeing aircraft will be partly payable by cash of Xiamen Airlines, and partly by financing arrangements with banking institutions. The Boeing aircraft will be delivered in stages to Xiamen Airlines during the period commencing from April 2014 to October 2015.

D. Exchange Controls

Under current Chinese foreign exchange regulations, Renminbi is fully convertible for current account transactions, but is not freely convertible for capital account transactions. Current account foreign currency transactions can be undertaken without prior approval from the relevant Chinese government agencies by producing commercial documents evidencing such transactions, provided that they are processed through Chinese banks licensed to engage in foreign currency transactions. Conversion from Renminbi into a foreign currency or vice versa for purposes of capital account transactions requires prior approvals of relevant Chinese government agencies. This restriction on capital account transactions could affect the ability of the Company to acquire foreign currency for capital expenditures.

The Company is generally required by law to sell all its foreign currency revenues to Chinese banks. The Company may purchase foreign currency directly from Chinese banks for any current account transactions, such as trade transactions in its usual and normal course of business, including acquisition of aircraft, jet fuel and flight equipment (such acquisition requires approvals from the relevant Chinese government agencies). Payment of dividends by the Company to holders of the Company's H Shares and ADRs is also considered a current account transaction under Chinese law. Therefore, there is no legal restriction on the conversion of Renminbi into foreign currency for the purpose of paying dividends to such holders of H Shares and ADRs. In addition, the Company's Articles of Association require the Company to pay dividends to holders of the Company's H Shares and ADRs in foreign currency.

On July 21, 2005, the PRC government changed its policy of pegging the value of the Renminbi to the U.S. dollar so that the Renminbi is now permitted to fluctuate within a band against a basket of certain foreign currencies. On May 18 2007, the People's Bank of China announced that the floating band of Renminbi would be permitted to rise or fall by as much as 0.5%. The PRC government has stated publicly that it intends to further liberalize its currency policy, which could result in a further and more significant change in the value of the Renminbi against the U.S. dollar. Any significant revaluation of the Renminbi may have a material adverse effect on the Company's financial performance, and the value of, and any dividends payable on, the Company's H Shares and ADRs in foreign currency terms.

Other Limitations

There are no limitations on the right of non-resident or foreign owners to hold or vote H Shares or ADRs imposed by Chinese law or by the Articles of Association or other constituent documents of the Company. However, under current Chinese law, foreign ownership of the Company may not exceed 49%.

E. Taxation

Chinese Taxation

The following is a general summary of certain Chinese tax consequences of the acquisition, ownership and disposition of A Shares, H Shares and ADRs. This summary is based upon tax laws of China as in effect on the date of this

Annual Report, including the income tax treaty between the United States and China (the “U.S.-PRC Tax Treaty”), all of which are subject to change or different interpretation.

In general, for Chinese tax purposes, holders of ADRs will be treated as the owners of the H Shares represented by those ADRs, and exchanges of H Shares for ADRs, and ADRs for H Shares, will not be subject to taxation under the laws of China.

This summary does not purport to address all material tax consequences for holders or prospective purchasers of A Shares, H Shares or ADRs, and does not take into account the specific circumstances of such investors. Investors should consult their own tax advisors as to Chinese or other tax consequences of the acquisition, ownership and disposition of A shares, H Shares or ADRs.

As a result of the new corporate income tax law, the statutory corporate income tax rate currently adopted by the Company and its subsidiaries has been changed from 33% to 25% with effect from January 1, 2008. Pursuant to new corporate income tax law, the corporate income tax rates of entities that previously enjoyed preferential tax rates of 15% and 18% have been revised to 18%, 20%, 22%, 24% and 25% for 2008, 2009, 2010, 2011 and 2012 onwards, respectively.

Dividends

The new corporate income tax law generally provides for the imposition of a withholding tax on dividends paid by a Chinese company to a non-resident enterprise at a rate of 10%.

China currently has double-taxation treaties with a number of countries, including Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom and the United States. Under the U.S.-PRC Tax Treaty, China may tax a dividend paid by the Company to a U.S. holder up to a maximum of 10% of the gross amount of such dividend

For individuals, Chinese tax law generally provides that an individual who receives dividends from Chinese companies is subject to a 20% individual income tax. A 50% reduction of taxable income is granted by Chinese tax law for an individual receiving dividends from a listed company on Shanghai Stock Exchange or Shenzhen Stock Exchange. As a result, the effective tax rate for dividends received by A share individual holder is 10%. Currently, dividend income received by any foreign individual that holds overseas shares in any Chinese domestic enterprise is temporarily exempt from individual income tax. In the event that the exemption is discontinued, such payments will be subject to individual income tax at the 20% rate unless the holder is entitled to a tax waiver or a lower tax rate under an applicable double-taxation treaty.

Capital Gains from Transfer or Disposition of Shares

The new corporate income tax law generally provides that a non-resident enterprise is subject to a 10% capital gains tax for the transfer or disposition of shares of a Chinese company.

For individual shareholders, Chinese tax law generally provide that an individual who transfers or otherwise disposes of a company's shares of capital stock is subject to a 20% individual income tax on the capital gain, if any. Currently, all individuals are temporarily exempt from individual income tax on transfers of shares of joint stock companies listed on Shanghai Stock Exchange or Shenzhen Stock Exchange, such as the Company. Should such temporary exemption be discontinued, such holders may be subject to a 20% individual income tax on the capital gain, if any, unless reduced by an applicable double-taxation treaty.

United States Federal Income Taxation

This discussion describes general U.S. federal income tax consequences of the purchase, ownership and disposition of the Company's ADRs. This discussion does not address any aspect of U.S. federal gift or estate tax, or the state, local or foreign tax consequences of an investment in the Company's ADRs. This discussion applies to you only if you hold and beneficially own the Company's ADRs as capital assets for tax purposes. This discussion does not apply to you if you are a member of a class of holders subject to special rules, such as:

- dealers in securities or currencies;
- traders in securities that elect to use a mark-to-market method of accounting for securities holdings;

- banks or other financial institutions;
- insurance companies;
- tax-exempt organizations;
- partnerships and other entities treated as partnerships for U.S. federal income tax purposes or persons holding ADRs through any such entities;

- persons that hold ADRs as part of a hedge, straddle, constructive sale, conversion transaction or other integrated investment;
- U.S. Holders (as defined below) whose functional currency for tax purposes is not the U.S. dollar;
- persons liable for alternative minimum tax; or
- persons who actually or constructively own 10% or more of the total combined voting power of all classes of the Company's shares (including ADRs) entitled to vote.

This discussion is based on the U.S. Internal Revenue Code of 1986, as amended, which is referred to in this discussion as the Code, its legislative history, existing and proposed regulations promulgated thereunder, published rulings and court decisions, all as currently in effect. These laws are subject to change, possibly on a retroactive basis. In addition, this discussion relies on the assumptions regarding the value of the Company's shares and the nature of its business over time. Finally, this discussion is based in part upon the representations of the depositary and the assumption that each obligation in the deposit agreement and any related agreement will be performed in accordance with its terms. For U.S. federal income tax purposes, as a holder of ADRs, you are treated as the owner of the underlying ordinary shares represented by such ADRs.

The discussions and comments included herein are only a general description of the tax aspects and they do not constitute a tax advice or opinion. Therefore, you should consult your own tax advisor concerning the particular U.S. federal income tax consequences to you of the purchase, ownership and disposition of the Company's ADRs, as well as the consequences to you arising under the laws of any other taxing jurisdiction.

For purposes of the U.S. federal income tax discussion below, you are a "U.S. Holder" if you beneficially own ADRs and are:

- a citizen or resident of the United States for U.S. federal income tax purposes;
- a corporation, or other entity taxable as a corporation, that was created or organized in or under the laws of the United States or any political subdivision thereof;
- an estate the income of which is subject to U.S. federal income tax regardless of its source; or
- a trust if (a) a court within the United States is able to exercise primary supervision over its administration and one or more U.S. persons have the authority to control all substantial decisions of the trust, or (b) the trust has a valid election in effect to be treated as a U.S. person.

If you are not a U.S. person, please refer to the discussion below under "Non-U.S. Holders."

For U.S. federal income tax purposes, income earned through a foreign or domestic partnership or other flow-through entity is attributed to its owners. Accordingly, if a partnership or other flow-through entity holds ADRs, the tax treatment of the holder will generally depend on the status of the partner or other owner and the activities of the partnership or other flow-through entity.

U.S. Holders

Dividends on ADRs

Subject to the PFIC discussion below, if the Company makes distributions and you are a U.S. Holder, the gross amount of any distributions you receive on your ADRs will generally be treated as dividend income if the distributions are made from the Company's current or accumulated earnings and profits, calculated according to U.S. federal income tax principles. Dividends will generally be subject to U.S. federal income tax as ordinary income on the day you actually or constructively receive such income. However, if you are an individual and have held your ADRs for a sufficient period of time, dividend distributions on the Company's ADRs will generally constitute qualified dividend income taxed at a preferential rate (generally 15% for dividend distributions before January 1, 2009) as long as the Company's ADRs continue to be readily tradable on the New York Stock Exchange and certain other conditions apply. You should consult your own tax adviser as to the rate of tax that will apply to you with respect to dividend distributions, if any, you receive from us.

Distributions on the Company's ADRs, if any, will generally be taxed to you as dividend distributions for U.S. tax purposes. Even if you are a corporation, you will not be entitled to claim a dividends-received deduction with respect to distributions you receive from the Company. Dividends generally will constitute foreign source passive income for U.S. foreign tax credit limitation purposes.

Sales and other dispositions of ADRs

Subject to the PFIC discussion below, when you sell or otherwise dispose of the Company's ADRs, you will generally recognize capital gain or loss in an amount equal to the difference between the amount realized on the sale or other disposition and your adjusted tax basis in the ADRs, both as determined in U.S. dollars. Your adjusted tax basis will generally equal the amount you paid for the ADRs. Any gain or loss you recognize will be long-term capital gain or loss if your holding period in the Company's ADRs is more than one year at the time of disposition. If you are an individual, any such long-term capital gain will be taxed at preferential rates. Your ability to deduct capital losses will be subject to various limitations.

Passive Foreign Investment Company

If the PFIC in any taxable year in which you hold the Company's ADRs, as a U.S. Holder, you would generally be subject to adverse U.S. tax consequences, in the form of increased tax liabilities and special U.S. tax reporting requirements.

The Company will be classified as a PFIC in any taxable year if either: (1) the average percentage value of its gross assets during the taxable year that produce passive income or are held for the production of passive income is at least 50% of the value of its total gross assets (the "Asset Test"); or (2) 75% or more of its gross income for the taxable year is passive income (such as certain dividends, interest or royalties)(the "Income Test"). For purposes of the Asset Test: (1) any cash, cash equivalents, and cash invested in short-term, interest bearing, debt instruments, or bank deposits that is readily convertible into cash, will generally count as producing passive income or held for the production of passive income; and (2) the average value of the Company's gross assets is calculated based on its market capitalization. In the case of publicly traded corporations, fair market value must be used for purposes of applying the Asset Test. In addition, regarding the above two tests, there are complex look-through rules to consider with respect to the assets and activities of related corporations from which the foreign corporation either receives income or in which it holds an interest. More specifically, certain adjustments are made to exclude certain income received from a related party or include income and assets held by a 25% or more owned subsidiary in determining whether a foreign company qualifies as a PFIC under the two tests. In particular: 1) passive income received from a related party is excluded if it is properly allocable to the nonpassive income of the related party, and 2) a foreign company that owns directly or indirectly 25% or more of the stock of another corporation is treated as if it owned directly a proportionate share of that corporation's assets and income.

The Company believes that it was not a PFIC for the taxable year 2008. However, there can be no assurance that the Company will not be a PFIC for the taxable year 2009 and/or later taxable years, as PFIC status is re-tested each year and depends on the facts in such year. For example, the Company would be a PFIC for the taxable year 2008 if the sum of its average market capitalization, which is its share price multiplied by the total amount of its outstanding shares, and its liabilities over that taxable year is not more than twice the value of its cash, cash equivalents, and other assets that are readily converted into cash.

If the Company were a PFIC, you would generally be subject to additional taxes and interest charges on certain "excess" distributions the Company makes regardless of whether the Company continues to be a PFIC in the year in which you receive an "excess" distribution or dispose of or are deemed to dispose of your ADRs. An excess distribution would be either (1) a distribution with respect to ADRs that is greater than 125% of the average of such distributions over the

preceding three years, or (2) 100% of the gain from the disposition of shares/ADRs.

To compute the tax on “excess” distributions or any gain, (1) the “excess” distribution or the gain would be allocated ratably to each day in your holding period, (2) the amount allocated to the current year and any tax year before the Company became a PFIC would be taxed as ordinary income in the current year, (3) the amount allocated to other taxable years would be taxable at the highest applicable marginal rate in effect for that year, and (4) an interest charge at the rate for underpayment of taxes for any period described under (3) above would be imposed with respect to any portion of the “excess” distribution or gain that is allocated to such period. In addition, if the Company were a PFIC, no distribution that you receive from the Company would qualify for taxation at the preferential rate discussed in the “Dividends on ADRs” section above.

If the Company were a PFIC in any year, as a U.S. Holder, you would be required to make an annual return on IRS Form 8621 “Return by a Shareholder of a Passive Foreign Investment Company or a Qualified Electing Fund.” However, the Company does not intend to generate, or share with you, information that you might need to properly complete IRS Form 8621. You should consult with your own tax adviser regarding reporting requirements with regard to your ADRs.

As described above, if the Company were a PFIC in any year, you would generally be able to avoid the “excess” distribution rules described above by making a timely so-called “mark-to-market” election with respect to your ADRs provided the Company’s ADRs are “marketable”. The Company’s ADRs will be “marketable” as long as they remain regularly traded on a national securities exchange, such as the New York Stock Exchange. If you made this election in a timely fashion, you would generally recognize as ordinary income or ordinary loss the difference between the fair market value of your ADRs on the first day of any taxable year and their value on the last day of that taxable year. Any ordinary income resulting from this election would generally be taxed at ordinary income rates and would not be eligible for the reduced rate of tax applicable to qualified dividend income. Any ordinary losses would be limited to the extent of the net amount of previously included income as a result of the mark-to-market election, if any. Your basis in the ADRs would be adjusted to reflect any such income or loss. You should consult with your own tax adviser regarding potential advantages and disadvantages to you of making a “mark-to-market” election with respect to your ADRs. Separately, if the Company were a PFIC in any year, you would be able to avoid the “excess” distribution rules by making a timely election to treat us as a so-called “Qualified Electing Fund” or “QEF”. You would then generally be required to include in gross income for any taxable year (1) as ordinary income, your pro rata share of the Company’s ordinary earnings for the taxable year, and (2) as long-term capital gain, your pro rata share of the Company’s net capital gain for the taxable year. However, the Company does not intend to provide you with the information you would need to make or maintain a “QEF” election and you will, therefore, not be able to make or maintain such an election with respect to your ADRs.

Non-US Holders

If you beneficially own ADRs and are not a U.S. Holder for U.S. federal income tax purposes (a “Non-US Holder”), you generally will not be subject to U.S. federal income tax or U.S. withholding tax on dividends received from the Company with respect to ADRs unless that income is considered effectively connected with your conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADRs, such dividends are attributable to a permanent establishment that you maintain in the United States. You generally will not be subject to U.S. federal income tax, including withholding tax, on any gain realized upon the sale or exchange of ADRs, unless:

- that gain is effectively connected with the conduct of a U.S. trade or business and, if an applicable income tax treaty so requires as a condition for you to be subject to U.S. federal income tax with respect to income from your ADRs, such gain is attributable to a permanent establishment that you maintain in the United States; or
- you are a non-resident alien individual and are present in the United States for at least 183 days in the taxable year of the sale or other disposition and either (1) your gain is attributable to an office or other fixed place of business that you maintain in the United States or (2) you have a tax home in the United States.

If you are engaged in a U.S. trade or business, unless an applicable tax treaty provides otherwise, the income from your ADRs, including dividends and the gain from the disposition of the Company’s ADRs, that is effectively connected with the conduct of that trade or business will generally be subject to the rules applicable to U.S. Holders discussed above. In addition, if you are a corporation, you may be subject to an additional branch profits tax at a rate of 30% or any lower rate under an applicable tax treaty.

U.S. information reporting and backup withholding rules

In general, dividend payments with respect to the ADRs and the proceeds received on the sale or other disposition of those ADRs may be subject to information reporting to the IRS and to backup withholding (currently imposed at a rate of 28%). Backup withholding will not apply, however, if you (1) are a corporation or come within certain other exempt categories and, when required, can demonstrate that fact or (2) provide a taxpayer identification number, certify as to no loss of exemption from backup withholding and otherwise comply with the applicable backup withholding rules. To establish your status as an exempt person, you will generally be required to provide certification on IRS Form W-9, W-8BEN or W-8ECI, as applicable. Any amounts withheld from payments to you under the backup withholding rules will be allowed as a refund or a credit against your U.S. federal income tax liability, provided that you furnish the required information to the IRS.

HOLDERS OF THE COMPANY'S ADRS SHOULD CONSULT WITH THEIR OWN TAX ADVISORS REGARDING THE APPLICATION OF THE U.S. FEDERAL INCOME TAX LAWS TO THEIR PARTICULAR SITUATIONS AS WELL AS ANY TAX CONSEQUENCES RESULTING FROM PURCHASING, HOLDING OR DISPOSING OF THE ADRS, INCLUDING THE APPLICABILITY AND EFFECT OF THE TAX LAWS OF ANY STATE, LOCAL OR FOREIGN JURISDICTION AND INCLUDING ESTATE, GIFT, AND INHERITANCE LAWS.

H. Documents on Display

The Company has filed this Annual Report on Form 20-F with the Securities and Exchange Commission under the Securities Exchange Act of 1934, as amended. Statements made in this Annual Report as to the contents of any document referred to are not necessarily complete. With respect to each such document filed as an exhibit to this Annual Report, reference is made to the exhibit for a more complete description of the matter involved, and each such statement shall be deemed qualified in its entirety by such reference.

The Company is subject to the informational requirements of the Exchange Act and file reports and other information with the Securities and Exchange Commission. Reports and other information which the Company filed with the Securities and Exchange Commission, including this Annual Report on Form 20-F, may be inspected and copied at the public reference room of the Securities and Exchange Commission at 450 Fifth Street N.W. Washington D.C. 20549.

You can also obtain copies of this Annual Report on Form 20-F by mail from the Public Reference Section of the Securities and Exchange Commission, 450 Fifth Street, N.W., Washington D.C. 20549, at prescribed rates. Additionally, copies of this material may be obtained from the Securities and Exchange Commission's Internet site at <http://www.sec.gov>. The Commission's telephone number is 1-800-SEC-0330. Copies of this material may also be obtained for the Company's website at <http://www.csair.com>.

I. Subsidiary Information

Not applicable.

ITEM 11. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

The Group's earnings are affected by changes in the price and availability of jet fuel. The Group uses approved derivative instruments such as swaps and options with approved counter-parties and within approved limits to manage the risk of fluctuations of jet fuel price. In addition, counter-party credit risk is generally restricted to any gains on changes in fair value at any time, and not the principal amount of the instrument. Therefore, the possibility of material loss arising in the event of non-performance by counter-party is considered to be unlikely. The fair values of derivative financial instruments of the Group at the balance sheet date are as follows:

79

At December 31, 2007, the Group had outstanding fuel options to buy approximately 3,300,000 barrels of crude oil at prices ranging from US\$42 to US\$64 per barrel. On the other hand, the Group sold fuel put options to approved counter-party and had outstanding options at December 31, 2007 of approximately 7,800,000 barrels of crude oil at prices ranging from US\$40 to US\$54 per barrel. All the fuel option contracts expired in 2008.

The Group is subject to market risks due to fluctuations in interest rates. The majority of the Group's borrowing is in the form of long-term fixed-rate and variable-rate debts with original maturities ranging from two to twelve years. Fluctuations in interest rates can lead to significant fluctuations in the fair value of such debt instruments. From time to time, the Group may enter into interest rate swaps designed to mitigate exposure relating to interest rate risks. No such contract was outstanding as of December 31, 2008.

The Group is also exposed to foreign currency risk as a result of its aircraft and flight equipment being sourced from overseas suppliers. Specifically, the Group's foreign currency exposure relates primarily to its foreign currency long-term bank and other loans used to finance such capital expenditures and its capital commitments. Subject to certain restrictive conditions imposed by the State Administration of Foreign Exchange, the Group may, from time to time, enter into forward foreign exchange contracts to mitigate its foreign currency exposures. As at December 31, 2008, the Group had two outstanding forward option contracts of notional amount ranging from US\$64 million to US\$128 million. The contracts are to buy US Dollars by selling Japanese Yen at certain specified rates on monthly settlement dates until the maturity of the contracts in 2011. At December 31, 2008, the fair value of these currency forward option contracts was liabilities of approximately RMB116 million.

As of December 31, 2008, the Group operated a total of 206 aircraft under operating leases and capital leases at rates that are substantially fixed. Such leases expose the Group to market risks; however, in accordance with Item 305 of Regulation S-K, such leases have been excluded from the following market risk tables. Commitments under capital leases and operating leases are disclosed in Note 32 and Note 47 to the Financial Statements, respectively.

The following table provides information regarding the Group's material interest rate sensitive financial instruments as of December 31, 2008 and 2007:

	As of December 31, 2008						As of December 31, 2007

Not applicable.

D. CHANGE OF TRUSTEES OR PAYING AGENTS FOR ANY REGISTERED SECURITIES

Not applicable.

E. Use of Proceeds

Not applicable.

ITEM 15. CONTROLS AND PROCEDURES.

(a) Disclosure controls and procedures

Our president and chief financial officer have evaluated the effectiveness of our disclosure controls and procedures (as defined in the Exchange Act Rules 13a-15(e) or 15d-15(e)), and concluded that, based on their evaluation, our disclosure controls and procedures are effective as of the end of the period covered by this Annual Report to ensure that information required to be disclosed by the Company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC's rules and forms.

(b) Management's annual report on internal control over financial reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of a company's assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that a company's receipts and expenditures are being made only in accordance with authorizations of a company's management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of a company's assets that could have a material effect on the consolidated financial statements. Our management has assessed the effectiveness of internal control over financial reporting based on the Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Our management has concluded that our internal control over financial reporting was effective as of December 31, 2008.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with policies or procedures may deteriorate.

(c) Attestation of the Registered Public Accounting Firm

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders of
China Southern Airlines Company Limited:

We have audited the internal control over financial reporting of China Southern Airlines Company Limited (the “Company”) as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management’s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, China Southern Airlines Company Limited maintained, in all material respects, effective internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control – Integrated Framework issued by the Committee of Sponsoring Organizations of The Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of China Southern Airlines Company Limited and its subsidiaries (collectively, the “Group”) as of December 31, 2008 and 2007, and the related consolidated statements of operations, consolidated statements of changes in equity, and consolidated cash flow statements for each of the years in the three-year period ended December 31, 2008, and our report dated April 14, 2009, except for Notes 48(b) and 49(a), which are as of June 3, 2009, expressed an unqualified opinion on those consolidated financial statements and

included an explanatory paragraph regarding the Group's adoption of IFRIC Interpretation 13, Customer Loyalty Programmes.

(d) Changes in internal control over financial reporting

During the year ended December 31, 2008, there have been no changes in our internal control over financial reporting that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 16. RESERVED

ITEM 16A. AUDIT COMMITTEE FINANCIAL EXPERT.

The Board of Directors has determined that Mr. Gong Hua Zhang qualifies as an audit committee financial expert in accordance with the terms of Item 16A of Form 20-F. Mr. Gong Hua Zhang satisfies as an “independent director” within the meaning of NYSE Manual Section 303A and meets the criteria for independence set forth in Section 10A(m)(3) of the US Securities Exchange Act of 1934, as amended, or the Exchange Act, and Rule 10A-3 under the Exchange Act. See “Item 6 Directors, Senior Management and Employees — Directors and Senior Management”.

ITEM 16B. CODE OF ETHICS.

The Company has adopted a code of ethics that applies to the Company’s principal executive officer, principal financial officer and principal accounting officer. Such code is included in the director service agreements, a form of which is incorporated by reference in this Annual Report in Exhibit 4.1. Each of the aforementioned senior corporate officers currently serves as a Director and all of our Directors are subject to the director service contracts with the Company. Pursuant to the director service agreements, among other things, Directors (i) owe fiduciary duties to the Company and shall perform their duties in compliance with applicable governmental laws, rules and regulations; (ii) shall not engage in any activities in competition with the Company’s business or carry out any activities detrimental to the interests of the Company; and (iii) shall be held liable for any loss or injury incurred to the Company as a result of such Director’s violation of applicable laws and regulations.

ITEM 16C. PRINCIPAL ACCOUNTING FEES AND SERVICES.

The following table sets forth the aggregate audit fees, audit-related fees, tax fees of the Company’s principal accountants and all other fees billed for products and services provided by the Company’s principal accountants other than the audit fees, audit-related fees and tax fees for each of the fiscal years 2007 and 2008:

	Audit Fees	Audit-Related Fees	Tax Fees	Other Fees
2007	RMB12.4 million	RMB4.5 million	RMB0.25 million	RMB2.8 million
2008	RMB10.8 million	RMB5.0 million	RMB0.55 million	-

Audit-related fees

Review of the Group’s 2007 interim financial report prepared under IFRSs and 2008 interim financial report prepared under IFRSs.

Tax fees

Services provided primarily consist of tax compliance services.

Other fees

Provision of Sarbanes Oxley Act of 2002 advisory services.

Prior to our principal accountant being engaged by the Company or our subsidiaries to render the audit or non audit services, the engagements have been approved by our audit committee.

ITEM 16D. EXEMPTIONS FROM THE LISTING STANDARDS FOR AUDIT COMMITTEE

Not applicable.

85

ITEM 16E. PURCHASES OF EQUITY SECURITIES BY THE ISSUER AND AFFILIATED PURCHASERS.

The Company and its associates have not purchased any issued common shares of the Company during 2008 and up to the date of this Annual Report.

ITEM 16F. CHANGES IN REGISTRANT’S CERTIFYING ACCOUNTANT.

Not applicable.

ITEM 16G. CORPORATE GOVERNANCE.

Set out below is a summary of any significant ways in which the Company’s corporate governance practices differ from those followed by domestic companies under the listing standards of the New York Stock Exchange (“NYSE”):

NYSE corporate governance rules	The Company’s governance practices
Director Independence	Director Independence
<p>A listed company must have a majority of independent directors on its board of directors. No director qualifies as “independent” unless the board of directors affirmatively determines that the director has no material relationship with the listed company (either directly or as a partner, shareholder or officer of an organization that has a relationship with the company). In addition, a director must meet certain standards to be deemed independent. For example, a director is not independent if the director is, or has been within the last three years, an employee of the listed company, or if the director has received, during any twelve-month period within the last three years, more than US\$100,000 in direct compensation from the listed company.</p>	<p>The Company has complied with the relevant Chinese corporate governance rules and has implemented internal rules governing the independence and responsibilities of independent directors. The Company determines the independence of independent directors every year.</p>
<p>The non-management directors of each listed company must meet at regularly scheduled executive sessions without management.</p>	<p>No similar requirements.</p>
<p>Nominating/Corporate Governance Committee</p>	<p>Nominating/Corporate Governance Committee</p>
<p>Listed companies must have a nominating/corporate governance</p>	<p>The Company has established a nominating committee. As at</p>

committee composed entirely of independent directors.

The nominating/corporate governance committee must have a written charter that addresses the committee's purposes and responsibilities which, at minimum, must be to: search for eligible people for the board of directors, select and nominate directors for the next session of the shareholders' annual meeting, study and propose corporate governance guidelines, supervise the evaluation of the board of directors and management, and evaluate the performance of the committee every year.

December 31, 2008, the Nomination Committee consists of two members, Messrs Wang Zhi and Gong Hua Zhang. They are independent non-executive Directors of the Company. Mr. Si Xian Min was appointed as the chairman of the Nomination Committee on March 11, 2009. The responsibilities of the Nomination Committee are to make recommendations to the Board in respect of the size and composition of the Board based on the operational activities, assets and shareholding structure of the Company; study the selection criteria and procedures of directors and executives and give advice to the Board; identify qualified candidates for directors and executives; investigate and propose candidates for directors and managers and other senior management members to the Board.

Compensation Committee

Listed companies must have a compensation committee composed entirely of independent directors.

The written charter of the compensation committee must state, at least, the following purposes and responsibilities: (1) review and approve the corporate goals associated with CEO's compensation, evaluate the performance of the CEO in fulfilling these goals, and based on such evaluation determine and approve the CEO's compensation level; (2) make recommendations to the board with respect to non-CEO executive officer compensation, and incentive-compensation and equity-based plans that are subject to board approval; (3) produce a committee report on executive compensation as required by the SEC to be included in the annual proxy statement or annual report filed with the SEC.

The charter must also include the requirement for an annual performance evaluation of the compensation committee.

Audit Committee

Listed companies must have an audit committee that satisfies the requirements of Rule 10A-3 of Exchange Act. It must have a minimum of three members, and all audit committee members must satisfy the requirements for independence set forth in Section 303A.02 of NYSE Corporate Governance Rules as well as the requirements of Rule 10A-3b (1) of the

Compensation Committee

The Company has established a remuneration committee consisting of three members. The remuneration committee is chaired by independent non-executive Director Sui Guang Jun with independent non-executive Director Gong Hua Zhang and executive Director Wang Quan Hua as members.

The responsibilities are similar to those stipulated by the NYSE rules, but the committee is not required to produce a report on the executive compensation or make an annual performance evaluation of the committee. The responsibilities of the remuneration committee are to approve the remuneration packages of Directors and senior management of the Group, and the Company's "preliminary proposals on annual emoluments of the directors and senior management of the Group". The remuneration committee is also responsible for assessing performance of executive director and approving the terms of executive directors' service contracts.

Audit Committee

The Board of Directors of the Company has established an audit committee that satisfies relevant domestic requirements and the audit committee has a written charter.

Exchange Act.

The written charter of the audit committee must specify that the purpose of the audit committee is to assist the board oversight of the integrity of financial statements, the company's compliance with legal and regulatory requirements, qualifications and independence of independent auditors and the performance of the listed company's internal audit function and independent auditors.

The written charter must also require the audit committee to prepare an audit committee report as required by the SEC to be included in the listed company's annual proxy statement as well as an annual performance evaluation of the audit committee.

The responsibilities of the audit committee are similar to those stipulated by the NYSE rules, but according to the domestic practices, the Company is not required to make an annual performance evaluation of the audit committee and the audit committee is not required to prepare an audit report to be included in the Company's annual proxy statement.

Shareholders must be given the opportunity to vote on equity-compensation plans and material revisions thereto, except for employment incentive plans, certain awards and plans in the context of mergers and acquisitions.

The relevant regulations of China require the board of directors to propose plans and types of director compensation for the shareholders' meeting to approve. The compensation plan of executive officers is subject to approval by the board and announced at the shareholders' meeting and disclosed to the public upon the approval of the board of directors. The approval of director compensation and compensation plan of executive officers of the Company satisfies relevant domestic requirements.

Corporate Governance Guidelines

Listed companies must adopt and disclose corporate governance guidelines, involving director qualification standards, director compensation, director continuing education, annual performance evaluation of the board of directors, etc.

Corporate Governance Guidelines

CSRC has issued the Corporate Governance Rules, with which the Company has complied.

Each listed company CEO must certify to the NYSE each year that he or she is not aware of any violation by the company of NYSE corporate governance listing standards and he or she must promptly notify the NYSE on writing of any material non-compliance with any applicable provisions of Section 303A.

There are no similar requirements under the domestic corporate governance rules in China.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of
China Southern Airlines Company Limited

We have audited the accompanying consolidated balance sheets of China Southern Airlines Company Limited (the “Company”) and its subsidiaries (collectively, the “Group”) as of December 31, 2008 and 2007, and the related consolidated statements of operations, consolidated statements of changes in equity, and consolidated cash flow statements for each of the years in the three-year period ended December 31, 2008. These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of China Southern Airlines Company Limited and its subsidiaries as of December 31, 2008 and 2007, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2008, in conformity with International Financial Reporting Standards issued by the International Accounting Standards Board.

As discussed in Note 3 to the consolidated financial statements, the Group has changed its method of accounting for its frequent flyer award programmes by the early adoption of IFRIC Interpretation 13, Customer Loyalty Programmes.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the Company’s internal control over financial reporting as of December 31, 2008, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated April 14, 2009 expressed an unqualified opinion on the effectiveness of the Company’s internal control over financial reporting.

/s/ KPMG

Notes to the Consolidated Financial Statements

(Prepared in accordance with International Financial Reporting Standards)

(Expressed in Renminbi)

1 Basis of presentation

China Southern Airlines Company Limited (the “Company”) and its subsidiaries (the “Group”) are principally engaged in the provision of domestic, Hong Kong, Macau and Taiwan and international passenger, cargo and mail airline services.

The Company was established in the People’s Republic of China (the “PRC” or “China”) on March 25, 1995 as a joint stock limited company as part of the reorganisation (the “Reorganisation”) of the Company’s holding company, China Southern Air Holding Company (“CSAHC”). CSAHC is a state-owned enterprise under the supervision of the PRC central government.

The Company’s H Shares and American Depositary Receipts (“ADR”) (each ADR representing 50 H Shares) have been listed on The Stock Exchange of Hong Kong Limited and the New York Stock Exchange, respectively since July 1997. In July 2003, the Company issued 1,000,000,000 A Shares which are listed on the Shanghai Stock Exchange.

The bonus share issue, approved in the Annual General Meeting for the year 2007, of 2,187,089,000 shares, by the conversion of share premium to share capital, was implemented in August 2008.

2 Principal accounting policies

(a) Statement of compliance

These financial statements have been prepared in accordance with all applicable International Financial Reporting Standards (“IFRSs”), which collective term includes all applicable individual International Financial Reporting Standards, International Accounting Standards (“IASs”) and interpretations issued by the International Accounting Standards Board (the “IASB”).

Note 3 provides information on the impact of the new and revised IFRSs and interpretations that are first effective for the current accounting period and the changes in accounting policies for the current and prior accounting periods reflected in these consolidated financial statements.

2

Principal accounting policies (continued)

(b) Basis of preparation of the consolidated financial statements

At December 31, 2008, the Group's current liabilities exceeded its current assets by RMB32,290 million, which includes bank and other loans repayable within one year of RMB22,178 million. In preparing the consolidated financial statements, the directors have considered the Group's sources of liquidity and believe that adequate funding is available to fulfil the Group's short-term obligations and capital expenditure requirements. Accordingly, the consolidated financial statements have been prepared on a basis that the Group will be able to continue as a going concern. Further details are set out in Note 46(a).

The consolidated financial statements for the year ended December 31, 2008 comprise the Company and its subsidiaries and the Group's interest in associates and jointly controlled entities.

The measurement basis used in the preparation of the consolidated financial statements is the historical cost basis except that the following assets and liabilities are stated at their fair value as explained in the accounting policies set out below:

- Certain property, plant and equipment (Note 2(h));
- Certain assets held under finance leases (Note 2(j));
- Derivative financial instruments (Note 2(g)); and
- Available-for-sale equity securities (Note 2(f)).

The preparation of consolidated financial statements in conformity with IFRSs requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets and liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRSs that have significant effect on the consolidated financial statements and estimates with a significant risk of material adjustment in the next year are discussed in Note 51.

2

Principal accounting policies (continued)

(c) Subsidiaries and minority interests

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account.

An investment in a subsidiary is consolidated into the consolidated financial statements from the date that control commences until the date that control ceases. Intra-group balances and transactions and any unrealised profits arising from intra-group transactions are eliminated in full in preparing the consolidated financial statements. Unrealised losses resulting from intra-group transactions are eliminated in the same way as unrealised gains but only to the extent that there is no evidence of impairment.

Minority interests represent the portion of the net assets of subsidiaries attributable to interests that are not owned by the Company, whether directly or indirectly through subsidiaries, and in respect of which the Group has not agreed any additional terms with the holders of those interests which would result in the Group as a whole having a contractual obligation in respect of those interests that meets the definition of a financial liability. Minority interests are presented in the consolidated balance sheet within equity, separately from equity attributable to the equity shareholders of the Company. Minority interests in the results of the Group are presented on the face of the consolidated statements of operations as an allocation of the total profit or loss for the year between minority interests and the equity shareholders of the Company.

Where losses applicable to the minority exceed the minority's interest in the equity of a subsidiary, the excess, and any further losses applicable to the minority, are charged against the Group's interest except to the extent that the minority has a binding obligation to, and is able to, make additional investment to cover the losses. If the subsidiary subsequently reports profits, the Group's interest is allocated all such profits until the minority's share of losses previously absorbed by the Group has been recovered.

Loans from holders of minority interests and other contractual obligations towards these holders are presented as financial liabilities in the consolidated balance sheet in accordance with Notes 2(o) or (p) depending on the nature of the liability.

F-13

2 Principal accounting policies (continued)

(d) Associates and jointly controlled entities

An associate is an entity in which the Group or the Company has significant influence, but not control or joint control, over its management, including participation in the financial and operating policies.

A jointly controlled entity is an entity which operates under a contractual arrangement between the Group or the Company and other parties, where the contractual arrangement establishes that the Group or Company and one or more of the other parties share joint control over the economic activities of the entity.

An investment in an associate or a jointly controlled entity is accounted for in the consolidated financial statements under the equity method and is initially recorded at cost and adjusted thereafter for the post acquisition change in the Group's share of the associate's or the jointly controlled entity's net assets. The consolidated statements of operations include the Group's share of the post-acquisition, post-tax results of the associates and jointly controlled entities for the year, including any impairment loss recognised for the year (Notes 2 (1)).

When the Group's share of losses exceeds its interest in the associate or the jointly controlled entity, the Group's interest is reduced to nil and recognition of further losses is discontinued except to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate or the jointly controlled entity. For this purpose, the Group's interest in the associate or the jointly controlled entity is the carrying amount of the investment under the equity method together with the Group's long-term interests that in substance form part of the Group's net investment in the associate or the jointly controlled entity.

Unrealised profits and losses arising from transactions between the Group and its associates and jointly controlled entities are eliminated to the extent of the Group's interest in the associate or jointly controlled entity, except where unrealised losses provide evidence of an impairment of the asset transferred, in which case they are recognised immediately in profit or loss.

(e) Goodwill

Goodwill represents the excess of the cost of a business combination or an investment in an associate or a jointly controlled entity over the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities.

Goodwill is stated at cost less accumulated impairment losses. Goodwill is allocated to cash-generating units and is tested annually for impairment (Note 2(1)). In respect of associates or jointly controlled entities, the carrying amount of goodwill is included in the carrying amount of the interest in the associate or jointly controlled entity.

Any excess of the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities over the cost of a business combination or an investment in an associate or a jointly controlled entity is recognised immediately in profit or loss.

On disposal of a cash generating unit, an associate or a jointly controlled entity during the year, any attributable amount of purchased goodwill is included in the calculation of the profit or loss on disposal.

2 Principal accounting policies (continued)

(f) Other investments in equity securities

The Group's policies for investments in equity securities, other than investments in subsidiaries, associates and jointly controlled entities, are as follows:

Investments in equity securities are initially stated at cost. Cost includes attributable transaction costs, except where indicated otherwise below. These investments are subsequently accounted for as follows, depending on their classification:

Available-for-sale equity securities are those non-derivative financial assets that are designated as available for sale. At each balance sheet date the fair value is remeasured, with any resultant gain or loss being recognised directly in equity, except foreign exchange gains and losses resulting from changes in the amortised cost of monetary items which are recognised directly in profit or loss. Dividend income from these investments is recognised in accordance with the policy set out in Note 2(v)(iv). When these investments are derecognised or impaired (Note 2(1)), the cumulative gain or loss previously recognised directly in equity is recognised in profit or loss.

The Group's other investments in equity securities represent unlisted equity securities of companies established in the PRC. They do not have a quoted market price in an active market and whose fair value cannot be reliably measured. Accordingly, they are recognised in the consolidated balance sheet at cost less impairment losses (Note 2(1)).

Investments are recognised / derecognised on the date the Group commits to purchase / sell the investments or they expire.

(g) Derivative financial instruments

Derivative financial instruments are recognised at fair value. At each balance sheet date the fair value is remeasured. The gain or loss on remeasurement to fair value is charged immediately to profit or loss.

(h) Property, plant and equipment

(i) Investment property

Investment properties are land and/or buildings which are owned or held under a leasehold interest (Note 2(j)) to earn rental income and/or for capital appreciation.

Investment properties are stated in the consolidated balance sheet at cost, less accumulated depreciation and impairment losses (Note 2(1)). Depreciation is calculated to write off the cost of items of investment property, less their estimated residual value, if any, using the straight line method over their estimated useful lives. Rental income from investment properties is accounted for as described in Note 2(v)(iii).

- 2 Principal accounting policies (continued)
- (h) Property, plant and equipment (continued)
- (ii) Other property, plant and equipment

Items of property, plant and equipment are initially stated at cost. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to working condition and location for its intended use and the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located.

Subsequent to the revaluation of the Group's property, plant and equipment as at December 31, 1996 (Note 18(b)), which was based on depreciated replacement costs, the Group's property, plant and equipment are carried at revalued amount, being the fair value at the date of the revaluation less any subsequent accumulated depreciation and impairment losses (Note 2(l)).

Revaluations are performed with sufficient regularity to ensure that the carrying amount of the property, plant and equipment does not differ materially from that which would be determined using fair value at the balance sheet date.

Changes arising on the revaluation of property, plant and equipment are generally dealt with in reserves. The only exceptions are as follows:

- When a deficit arises on revaluation, it will be charged to profit or loss to the extent that it exceeds the amount held in the reserve in respect of that same asset immediately prior to the revaluation; and
- When a surplus arises on revaluation, it will be credited to profit or loss to the extent that a deficit on revaluation in respect of that same asset had previously been charged to profit or loss.

The cost of self-constructed items of property, plant and equipment includes the cost of materials, the initial estimate, where relevant, of the costs of dismantling and removing the items and restoring the site on which they are located, and an appropriate proportion of production overheads and borrowing costs (Note 2(y)).

Gains or losses arising from the retirement or disposal of an item of property, plant and equipment are determined as the difference between the net disposal proceeds and the carrying amount of the item and are recognised in profit or loss on the date of retirement or disposal. Any related revaluation surplus is transferred from the revaluation reserve to retained profits.

Depreciation is calculated to write off the cost or valuation of items of property, plant and equipment, less their estimated residual value, if any, using the straight line method over their estimated useful lives as follows:

Buildings	30 to 35 years
Owned and leased aircraft	15 to 20 years
Other flight equipment	
- Jet engines	15 to 20 years
- Others, including rotatable spares	2.5 to 15 years
Machinery and equipment	4 to 10 years
Vehicles	6 to 8 years

Where parts of an item of property, plant and equipment have different useful lives, the cost or valuation of the item is allocated on a reasonable basis between the parts and each part is depreciated separately. Both the useful life of an asset and its residual value, if any, are reviewed annually.

F-16

2

Principal accounting policies (continued)

(i) Construction in progress

Construction in progress represents office buildings, various infrastructure projects under construction and equipment pending installation, and is stated at cost less impairment losses (Note 2(l)). Capitalisation of these costs ceases and the construction in progress is transferred to property, plant and equipment when the asset is substantially ready for its intended use, notwithstanding any delay in the issue of the relevant commissioning certificates by the relevant PRC authorities.

No depreciation is provided in respect of construction in progress.

(j) Leased assets

An arrangement, comprising a transaction or a series of transactions, is or contains a lease if the Group determines that the arrangement conveys a right to use a specific asset or assets for an agreed period of time in return for a payment or a series of payments. Such a determination is made based on an evaluation of the substance of the arrangement and is regardless of whether the arrangement takes the legal form of a lease.

(i) Classification of assets leased to the Group

Assets that are held by the Group under leases which transfer to the Group substantially all the risks and rewards of ownership are classified as being held under finance leases. Leases which do not transfer substantially all the risks and rewards of ownership to the Group are classified as operating leases, except for land held for own use under an operating lease, the fair value of which cannot be measured separately from the fair value of a building situated thereon at the inception of the lease, is accounted for as being under a finance lease, unless the building is also clearly held under an operating lease. For these purposes, the inception of the lease is the time that the lease was first entered into by the Group, or taken over from the previous lessee.

(ii) Assets acquired under finance leases

Where the Group acquires the use of assets under finance leases, the amounts representing the fair value of the leased asset, or, if lower, the present value of the minimum lease payments, of such assets are included in property, plant and equipment and the corresponding liabilities, net of finance charges, are recorded as obligations under finance leases. Depreciation is provided at rates which write off the cost or valuation of the assets over the term of the relevant lease or, where it is likely the Group will obtain ownership of the asset, the life of the asset, as set out in Note 2(h)(ii). Impairment losses are accounted for in accordance with the accounting policy as set out in Note 2(l). Finance charges implicit in the lease payments are charged to profit or loss over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period.

(iii) Operating lease charges

Where the Group has the use of assets held under operating leases, payments made under the leases are charged to profit or loss in equal instalments over the accounting periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the leased asset. Lease incentives received are recognised in profit or loss as an integral part of the aggregate net lease payments made.

The cost of acquiring land held under operating lease is amortised on a straight-line basis over the respective periods of lease terms which ranged from 30 to 70 years.

F-17

2 Principal accounting policies (continued)

(j) Leased assets (continued)

(iv) Sale and leaseback transactions

Gains or losses on sale and leaseback transactions which result in finance leases are deferred and amortised over the terms of the related leases. Gains or losses on other aircraft sale and leaseback transactions which result in operating leases are recognised immediately if the transactions are established at fair value. Any difference between the sales price and the fair value is deferred and amortised over the period the assets are expected to be used.

(k) Deferred expenditure

Lump sum housing benefits payable to employees of the Group are deferred and amortised on a straight-line basis over a period of 10 years, which represents the benefit vesting period of the employees.

Deferred expenditure is stated at cost less impairment losses (Note 2(1)).

(l) Impairment of assets

(i) Impairment of investments in equity securities and other receivables

Investments in equity securities (other than investments in subsidiaries, associates and jointly controlled entities) and other current and non-current receivables that are stated at cost or amortised cost or are classified as available-for-sale equity securities are reviewed at each balance sheet date to determine whether there is objective evidence of impairment. Objective evidence of impairment includes observable data that comes to the attention of the Group about one or more of the following loss events:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation;
- significant changes in the technological, market, economic or legal environment that have an adverse effect on the debtor; and
- a significant or prolonged decline in the fair value of an investment in an equity instrument below its cost.

2 Principal accounting policies (continued)

(1) Impairment of assets (continued)

(i) Impairment of investments in equity securities and other receivables (continued)

If any such evidence exists, any impairment loss is determined and recognised as follows:

-For unquoted equity securities carried at cost, the impairment loss is measured as the difference between the carrying amount of the financial asset and the estimated future cash flows, discounted at the current market rate of return for a similar financial asset where the effect of discounting is material. Impairment losses for equity securities are not reversed.

-For trade and other current receivables and other financial assets carried at amortised cost, the impairment loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate (i.e. the effective interest rate computed at initial recognition of these assets), where the effect of discounting is material. This assessment is made collectively where financial assets carried at amortised cost share similar risk characteristics, such as similar past due status, and have not been individually assessed as impaired. Future cash flows for financial assets which are assessed for impairment collectively are based on historical loss experience for assets with credit risk characteristics similar to the collective group.

If in a subsequent period the amount of an impairment loss decreases and the decrease can be linked objectively to an event occurring after the impairment loss was recognised, the impairment loss is reversed through profit or loss. A reversal of an impairment loss shall not result in the asset's carrying amount exceeding that which would have been determined had no impairment loss been recognised in prior years.

-For available-for-sale equity securities, the cumulative loss that has been recognised directly in equity is removed from equity and is recognised in profit or loss. The amount of the cumulative loss that is recognised in profit or loss is the difference between the acquisition cost (net of any principal repayment and amortisation) and current fair value, less any impairment loss on that asset previously recognised in profit or loss.

Impairment losses recognised in profit or loss in respect of available-for-sale equity securities are not reversed through profit or loss. Any subsequent increase in the fair value of such assets is recognised directly in equity.

Impairment losses are written off against the corresponding asset directly, except for impairment losses recognised in respect of trade and other receivables, whose recovery is considered doubtful but not remote. In this case, the impairment losses for doubtful debts are recorded using an allowance account. When the Group is satisfied that recovery is remote, the amount considered irrecoverable is written off against trade and other receivables directly and any amounts held in the allowance account relating to that debt are reversed. Subsequent recoveries of amounts previously charged to the allowance account are reversed against the allowance account. Other changes in the allowance account and subsequent recoveries of amounts previously written off directly are recognised in profit or loss.

2 Principal accounting policies (continued)

(I) Impairment of assets (continued)

(ii) Impairment of other assets

Internal and external sources of information are reviewed at each balance sheet date to identify indications that the following assets may be impaired or, except in the case of goodwill, an impairment loss previously recognised no longer exists or may have decreased:

-	Property, plant and equipment;
-	Construction in progress;
-	Lease deposits;
-	Lease prepayments;
-	Deferred expenditure;
-	Investments in subsidiaries, associates and jointly controlled entities; and
-	Goodwill.

If any such indication exists, the asset's recoverable amount is estimated. For goodwill, the recoverable amount is estimated annually whether or not there is any indication of impairment.

- Calculation of recoverable amount

The recoverable amount of an asset is the greater of its net selling price and the value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of time value of money and the risks specific to the asset. Where an asset does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the smallest group of assets that generates cash inflows independently (i.e. a cash-generating unit).

- Recognition of impairment losses

An impairment loss is recognised in profit or loss whenever the carrying amount of an asset, or the cash-generating unit to which it belongs, exceeds its recoverable amount. Impairment losses recognised in respect of cash-generating units are allocated first to reduce the carrying amount of any goodwill allocated to the cash-generating unit (or group of units) and then, to reduce the carrying amount of the other assets in the unit (or group of units) on a pro-rata basis, except that the carrying value of an asset will not be reduced below its individual fair value less costs to sell, or value in use, if determinable.

- 2 Principal accounting policies (continued)
- (l) Impairment of assets (continued)
- (ii) Impairment of other assets (continued)
- Reversals of impairment losses

In respect of assets other than goodwill, an impairment loss is reversed if there has been a favourable change in the estimates used to determine the recoverable amount. An impairment loss in respect of goodwill is not reversed.

A reversal of an impairment loss is limited to the asset's carrying amount that would have been determined had no impairment loss been recognised in prior years. Reversals of impairment losses are credited to profit or loss in the year in which the reversals are recognised.

- (iii) Interim financial reporting and impairment

Impairment losses recognised in an interim period in respect of goodwill, available-for-sale equity securities and unquoted equity securities carried at cost are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the end of the financial year to which the interim period relates.

- (m) Inventories

Inventories, which consist primarily of expendable spare parts and supplies, are stated at cost less any applicable provision for obsolescence, and are charged to profit or loss when used in operations. Cost represents the average unit cost.

Inventories held for disposal are carried at the lower of cost and net realisable value. Net realisable value is the estimated selling price in the ordinary course of business less the estimated costs of completion and the estimated costs necessary to make the sale.

- (n) Trade and other receivables

Trade and other receivables are initially recognised at fair value and thereafter stated at amortised cost less allowance for impairment of bad and doubtful debts (Note 2(1)), except where the effect of discounting would be immaterial. In such cases, the receivables are stated at cost less allowance for impairment of bad and doubtful debts.

- (o) Interest-bearing borrowings

Interest-bearing borrowings are recognised initially at fair value less attributable transaction costs. Subsequent to initial recognition, interest-bearing borrowings are stated at amortised cost with any difference between the amount initially recognised and redemption value being recognised in profit or loss over the period of the borrowings, together with any interest and fees payable, using the effective interest method.

2

Principal accounting policies (continued)

(p) Trade and other payables

Trade and other payables are initially recognised at fair value and are subsequently stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at cost.

(q) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand, demand deposits with banks and other financial institutions having been within three months of maturity at acquisition. Bank overdrafts that are repayable on demand and form an integral part of the Group's cash management are also included as a component of cash and cash equivalents for the purpose of the consolidated cash flow statements.

(r) Financial guarantees issued, provisions and contingent liabilities

(i) Financial guarantees issued

Financial guarantees are contracts that require the issuer (i.e. the guarantor) to make specified payments to reimburse the beneficiary of the guarantee (the "holder") for a loss the holder incurs because a specified debtor fails to make payment when due in accordance with the terms of a debt instrument.

Where the Group issues a financial guarantee, the fair value of the guarantee (being the transaction price, unless the fair value can otherwise be reliably estimated) is initially recognised as deferred income within trade and other payables. Where consideration is received or receivable for the issuance of the guarantee, the consideration is recognised in accordance with the Group's policies applicable to that category of asset. Where no such consideration is received or receivable, an immediate expense is recognised in profit or loss on initial recognition of any deferred income.

The amount of the guarantee initially recognised as deferred income is amortised in profit or loss over the term of the guarantee as income from financial guarantees issued. In addition, provisions are recognised in accordance with Note 2(r)(ii) if and when (i) it becomes probable that the holder of the guarantee will call upon the Group under the guarantee, and (ii) the amount of that claim on the Group is expected to exceed the amount currently carried in trade and other payables in respect of that guarantee i.e. the amount initially recognised, less accumulated amortisation.

F-22

2 Principal accounting policies (continued)

(r) Financial guarantees issued, provisions and contingent liabilities (continued)

(ii) Provision and contingent liabilities

Provisions are recognised for other liabilities of uncertain timing or amount when the Group has a present legal or constructive obligation as a result of a past event, and it is probable that an outflow of economic benefits will be required to settle the obligations and a reliable estimate can be made. Where the time value of money is material, provisions are stated at the present value of the expenditures expected to settle the obligation.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

(s) Defeasance of long-term liabilities

Where long-term liabilities have been defeased by the placement of security deposits, those liabilities and deposits (and income and charge arising therefrom) are netted off in order to reflect the overall commercial effect of the arrangements. Such netting off has been effected where a right is held by the Group to insist on net settlement of the liability and deposit including in all situations of default and where that right is assured beyond doubt.

(t) Deferred benefits and gains

In connection with the acquisitions or operating leases of certain aircraft and engines, the Group receives various credits. Such credits are deferred until the aircraft and engines are delivered, at which time they are either applied as a reduction of the cost of acquiring the aircraft and engines, resulting in a reduction of future depreciation, or amortised as a reduction of rental expense for aircraft and engines under operating leases.

(u) Income tax

Income tax for the year comprises current and movements in deferred tax assets and liabilities. Current tax and movements in deferred tax assets and liabilities are recognised in profit or loss except to the extent that they relate to items recognised directly in equity, in which case they are recognised in equity.

Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the balance sheet date, and any adjustment to tax payable in respect of previous years.

Deferred tax assets and liabilities arise from deductible and taxable temporary differences respectively, being the differences between the carrying amounts of assets and liabilities for financial reporting purposes and their tax bases. Deferred tax assets also arise from unused tax losses and unused tax credits.

2

Principal accounting policies (continued)

(u)

Income tax (continued)

Apart from certain limited exceptions, all deferred tax liabilities, and all deferred tax assets to the extent that it is probable that future taxable profits will be available against which the asset can be utilised, are recognised. Future taxable profits that may support the recognition of deferred tax assets arising from deductible temporary differences include those that will arise from the reversal of existing taxable temporary differences, provided those differences relate to the same taxation authority and the same taxable entity, and are expected to reverse either in the same period as the expected reversal of the deductible temporary difference or in periods into which a tax loss arising from the deferred tax asset can be carried back or forward. The same criteria are adopted when determining whether existing taxable temporary differences support the recognition of deferred tax assets arising from unused tax losses and credits, that is, those differences are taken into account if they relate to the same taxation authority and the same taxable entity, and are expected to reverse in a period, or periods, in which the tax loss or credit can be utilised.

The limited exception to the recognition of deferred tax assets and liabilities are those temporary differences arising from goodwill not deductible for tax purposes, the initial recognition of assets or liabilities that affect neither accounting nor taxable profit (provided they are not part of a business combination), and temporary differences relating to investments in subsidiaries to the extent that, in the case of taxable differences, the Group controls the timing of the reversal and it is probable that the differences will not reverse in the foreseeable future, or in the case of deductible differences, unless it is probable that they will reverse in the future.

The amount of deferred tax recognised is measured based on the expected manner of realisation or settlement of the carrying amount of the assets and liabilities, using tax rates enacted or substantively enacted at the balance sheet date. Deferred tax assets and liabilities are not discounted.

The carrying amount of a deferred tax asset is reviewed at each balance sheet date and is reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow the related tax benefit to be utilised. Any such reduction is reversed to the extent that it becomes probable that sufficient taxable profits will be available.

F-24

2

Principal accounting policies (continued)

(u) Income tax (continued)

Current tax balances and deferred tax balances, and movements therein, are presented separately from each other and are not offset. Current tax assets are offset against current tax liabilities, and deferred tax assets against deferred tax liabilities, if the Group has the legally enforceable right to set off current tax assets against current tax liabilities and the following additional conditions are met:

-in the case of current tax assets and liabilities, the Group intends either to settle on a net basis, or to realise the asset and settle the liability simultaneously; or

-in the case of deferred tax assets and liabilities, if they relate to income taxes levied by the same taxation authority on either:

- the same taxable entity; or

-different taxable entities, which, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered, intend to realise the current tax assets and settle the current tax liabilities on a net basis or realise and settle simultaneously.

(v) Revenue recognition

Provided it is probable that the economic benefits will flow to the Group and the revenue and costs, if applicable, can be measured reliably, revenue is recognised in profit or loss as follows:

(i) Passenger, cargo and mail revenues

Passenger, cargo and mail revenues are recognised at the fair value of the consideration received or receivable when the transportation is provided. Ticket sales for transportation not yet provided are included in current liabilities as sales in advance of carriage. Revenues from airline-related business are recognised when services are rendered. Revenue is stated net of sales tax.

(ii) Frequent flyer revenue

The Group maintains two frequent flyer award programmes, namely, the China Southern Airlines Sky Pearl Club and the Egrets Mileage Plus, which provide travel and other awards to members based on accumulated mileages.

Revenue received in relation to mileage earning flights is allocated, based on fair value, between the flight and mileages earned by members of the Group's frequent flyer award programmes. The value attributed to the awarded mileages is deferred as a liability, within deferred revenue, until the mileages are ultimately utilised.

Revenue received from third parties for the issue of mileages under the frequent flyer award programmes is also deferred as a liability, within deferred revenue.

As members of the frequent flyer award programmes redeem mileages for an award, revenue is recorded in profit or loss. Revenue in relation to flight awards is recognised when the transportation is provided. Revenue is recognised at the point of redemption where non-flight rewards are selected.

The value attributed to mileages that are expected to expire is recognised as revenue, based on the number of mileages that have been redeemed relative to the total number expected to be redeemed.

F-25

2

Principal accounting policies (continued)

(v) Revenue recognition (continued)

(iii) Rental income receivable under operating leases is recognised in profit or loss in equal instalments over the periods covered by the lease term, except where an alternative basis is more representative of the pattern of benefits to be derived from the use of the leased asset. Lease incentives granted are recognised in profit or loss as an integral part of the aggregate net lease payments receivables.

(iv) Dividend income is recognised when the shareholder's right to receive payment is established.

(v) Government grants are recognised in the consolidated balance sheet initially when there is reasonable assurance that they will be received and that the Group will comply with the conditions attaching to them. Grants that compensate the Group for expenses incurred are recognised as revenue in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Group for the cost of an asset are deducted in arriving at the carrying amount of the asset and consequently are recognised in profit or loss over the useful life of the asset.

(vi) Interest income is recognised as it accrues using the effective interest method.

(w) Traffic commissions

Traffic commissions are expensed in profit or loss when the transportation is provided and the related revenue is recognised. Traffic commissions for transportation not yet provided are recorded on the balance sheet as a prepaid expense.

(x) Maintenance and overhaul costs

Routine maintenance, repairs and overhauls are charged to profit or loss as and when incurred.

In respect of owned and finance leased aircraft, components within the aircraft subject to replacement during major overhauls are depreciated over the average expected life between major overhauls. When each major overhaul is performed, its cost is recognised in the carrying amount of property, plant and equipment and is depreciated over the estimated period between major overhauls. Any remaining carrying amount of cost of previous major overhaul is derecognised and charged to the consolidated statements of operations.

In respect of aircraft held under operating leases, the Group has responsibility to fulfil certain return conditions under relevant lease agreements. In order to fulfil these return conditions, major overhauls are required to be conducted on a regular basis. Accordingly, estimated costs of major overhauls are accrued and charged to profit or loss over the estimated period between overhauls. After the aircraft has completed its last overhaul cycle prior to being returned, expected cost of overhaul to be incurred at the end of the lease is estimated and accrued over the remaining period of the lease. Differences between the estimated costs and the actual costs of overhauls are charged to profit or loss in the period when the overhaul is performed.

2

Principal accounting policies (continued)

(y) Borrowing costs

Borrowing costs are expensed in profit or loss in the period in which they are incurred, except to the extent that they are capitalised as being directly attributable to the acquisition or construction of an asset which necessarily takes a substantial period of time to get ready for its intended use.

The capitalisation of borrowing costs as part of the cost of a qualifying asset commences when expenditure for the asset is being incurred, borrowing costs are being incurred and activities that are necessary to prepare the asset for its intended use are in progress. Capitalisation of borrowing costs is suspended or ceases when substantially all the activities necessary to prepare the qualifying asset for its intended use are interrupted or complete.

(z) Short term employee benefits and contributions to defined contribution retirement schemes

Salaries, annual bonuses and contributions to defined contribution retirement schemes are accrued in the year in which the associated services are rendered by employees. Where payment or settlement is deferred and the effect would be material, these amounts are stated at their present values.

(aa) Termination benefits

Termination benefits are recognised when, and only when, the Group demonstrably commits itself to terminate employment or to provide benefits as a result of voluntary redundancy by having a detailed formal plan which is without realistic possibility of withdrawal.

(bb) Translation of foreign currencies

Foreign currencies transactions during the year are translated into Renminbi at the applicable rates of exchange quoted by the People's Bank of China ("PBOC") prevailing on the transaction dates. Monetary assets and liabilities denominated in foreign currencies are translated into Renminbi at the PBOC exchange rates prevailing on the balance sheet date. Exchange gains and losses are recognised in the consolidated statements of operations.

Non-monetary assets and liabilities that are measured in terms of historical cost in a foreign currency are translated into Renminbi at the PBOC exchange rates prevailing on the transaction dates. Non-monetary assets and liabilities denominated in foreign currencies that are stated at fair value are translated into Renminbi at the PBOC exchange rates prevailing on the dates the fair value was determined.

F-27

2

Principal accounting policies (continued)

(cc) Related parties

For the purposes of these financial statements, a party is considered to be related to the Group if:

(i) the party has the ability, directly or indirectly through one or more intermediaries, to control the Group or exercise significant influence over the Group in making financial and operating policy decisions, or has joint control over the Group;

(ii) the Group and the party are subject to common control;

(iii) the party is an associate of the Group or a joint venture in which the Group is a venturer;

(iv) the party is a member of key management personnel of the Group or the Group's parent, or a close family member of such an individual, or is an entity under the control, joint control or significant influence of such individuals;

(v) the party is a close family member of a party referred in (i) or is an entity under the control, joint control or significant influence of such individuals; or

(vi) the party is a post-employment benefit plan which is for the benefit of employees of the Group or of any entity that is a related party of the Group.

Close family members of an individual are those family members who may be expected to influence, or be influenced by, that individual in their dealings with the entity.

(dd) Segmental reporting

A segment is a distinguishable component of the Group that is engaged either in providing products or services (business segment), or in providing products or services within a particular economic environment (geographical segment), which is subject to risks and rewards that are different from those of other segments.

In accordance with the Group's internal financial reporting system, the Group has chosen business segment information as the primary reporting format and geographical segment information as the secondary reporting format for the purposes of these consolidated financial statements.

F-28

Changes in accounting policies

The IASB has issued certain new and revised IFRSs and interpretations that are first effective or available for early adoption for the current accounting period of the Group. The new interpretations and amendments that are first effective for the current accounting year of the Group have no significant impact to the principal accounting policies of the Group.

During the current accounting period, the Group has early adopted IFRIC Interpretation 13, Customer Loyalty Programmes (“IFRIC 13”), which is effective for accounting periods beginning on or after July 1, 2008. Other than this, the Group has not applied any new standard or interpretation that is not yet effective for the current accounting period (see Note 53).

Prior to the adoption of IFRIC 13, the Group accounted for the accumulated mileages under its frequent flyer award programmes using incremental cost method. The estimated incremental cost to provide free travel was recognised as an expense and accrued as a current liability when members accumulated mileages. When members redeemed awards or their entitlements expired, the incremental cost liability was reduced accordingly to reflect the outstanding obligations.

On adoption of IFRIC 13, revenue received in relation to mileage earning flights is allocated, based on fair value, between the flight and mileages earned by members of the Group’s frequent flyer programmes. The value attributed to the awarded mileages is deferred as a liability until the mileages are ultimately utilised. As members of the programmes redeem mileages for an award, revenue is recorded in profit or loss. Revenue in relation to flight awards is recognised when transportation is provided. Revenue is recognised at the point of redemption when non-flight awards are selected. Further details of the new policy are set out in note 2(v)(ii).

3 Change in accounting policies (continued)

(a) Restatement of prior periods and opening balances

The new accounting policy on adoption of IFRIC 13 has been applied retrospectively with comparatives restated. The impact of the adoption of IFRIC 13 to each of the line items in the consolidated statements of operations and consolidated cash flow statements for the years ended December 31, 2007 and 2006 and the consolidated balance sheet as at December 31, 2007 previously reported are set out as follows:

(i) Consolidated statement of operations for the year ended December 31, 2007

	2007 (as previously reported) RMB million	Effect of adoption of IFRIC 13 (increase/ (decrease) in profit for the year) RMB million	2007 (as restated) RMB million
Operating revenue			
Traffic revenue	53,297	(101)	53,196
Operating expenses			
Promotion and sales	3,478	(57)	3,421
Operating profit	1,619	(44)	1,575
Profit before taxation	2,923	(44)	2,879
Income tax expense	(858)	11	(847)
Profit for the year	2,065	(33)	2,032
Attributable to			
Equity shareholders of the Company	1,871	(32)	1,839
Minority interests	194	(1)	193
Earnings per share			
Basic (Note)	RMB 0.29	RMB (0.01)	RMB 0.28

Note: The calculation of basic earnings per share for the year ended December 31, 2007 has been adjusted for the bonus share issue implemented in 2008 (Notes 17 and 40).

3

Change in accounting policies (continued)

(a) Restatement of prior periods and opening balances (continued)

3 Change in accounting policies (continued)

(a) Restatement of prior periods and opening balances (continued)

(iv) Consolidated cash flow statement for the year ended December 31, 2007

	2007 (as previously reported) RMB million	Effect of adoption of IFRIC 13 RMB million	2007 (as restated) RMB million
Net cash inflows from operating activities			
Profit before taxation	2,923	(44)	2,879
Increase in sales in advance of carriage	449	2	451
Increase in accrued expenses	1,846	(56)	1,790
Increase in deferred revenue	-	98	98

(v) Consolidated cash flow statement for the year ended December 31, 2006

	2006 (as previously reported) RMB million	Effect of adoption of IFRIC 13 RMB million	2006 (as restated) RMB million
Net cash inflows from operating activities			
Profit before taxation	357	(130)	227
Increase in accrued expenses	568	(8)	560
Increase in deferred revenue	-	138	138

(b) Estimated effect of changes in accounting policies on the current year

The estimated effect on the Group's consolidated net loss for the year ended December 31, 2008 and consolidated net assets at December 31, 2008 is a decrease of RMB96 million and an increase of RMB498 million respectively, had the previous policies still been applied in the current year.

4

Turnover

Turnover comprises revenues from airline and airline-related business and is stated net of sales tax. An analysis of turnover is as follows:

	2008 RMB million	2007 RMB million (restated, note 3)	2006 RMB million (restated, note 3)
Traffic revenue			
Passenger	50,412	49,499	41,411
Cargo and mail	3,501	3,697	3,538
	53,913	53,196	44,949
Other operating revenue			
Commission income	317	281	238
General aviation income	133	108	91
Ground services income	250	241	184
Air catering income	107	81	50
Rental income	120	119	107
Others	448	375	462
	1,375	1,205	1,132
	55,288	54,401	46,081

Pursuant to various sales tax rules and regulations, the Group is required to pay sales tax (including business tax and other surcharges) to national and local tax authorities at the rate of approximately 3% of the traffic revenue in respect of domestic flights and outbound international, Hong Kong, Macau and Taiwan flights. Pursuant to the "Notice of exemption of business tax on fuel surcharge for airline companies" issued jointly by the PRC Ministry of Finance and the State Administration of Taxation, the Group is exempted from business tax on fuel surcharge income received during the period from January 1, 2008 to December 31, 2010. Sales tax incurred by the Group during the year ended December 31, 2008, netted off against revenue, amounted to RMB1,337 million (2007: RMB1,574 million; 2006: RMB1,300 million).

Less: borrowing costs capitalised	(674)	(558)	(459)
	1,987	2,291	2,070

The borrowing costs have been capitalised at rates ranging from 5.17% to 5.28% per annum in 2008 (2007: 5.30% to 5.84% per annum; 2006: 5.29% to 5.61% per annum).

F-36

13

Other (loss) / income, net

	2008	2007	2006
	RMB million	RMB million	RMB million
(Loss) / gain on sale of property, plant and equipment, net			
- Aircraft and spare engines	(20)	106	329
- Other property, plant and equipment	(39)	24	4
	(59)	130	333

In 2008, the loss on sale of property, plant and equipment mainly included a loss of RMB20 million on the sale of one Boeing 757-200 aircraft, to an independent third party, being the excess of the carrying amount of the asset and related disposal costs over the sale proceeds.

In 2007, the Group recognised a gain on sale of property, plant and equipment of RMB106 million on the sale of eleven MD82 aircraft, three MD82 spare engines and one Boeing 737-500 spare engine to certain independent third parties, being the excess of the sale proceeds over the carrying amounts of the assets and related disposal costs.

In 2006, the Group recognised a gain on disposal of property, plant and equipment of RMB329 million on selling of three Boeing 757-200 aircraft to certain independent third parties, being the excess of the sale proceeds over the carrying amounts of the assets and related disposal costs.

Income tax expense

(a) Income tax expense in the consolidated statements of operations

	2008 RMB million	2007 RMB million (restated, note 3)	2006 RMB million (restated, note 3)
PRC income tax			
Provision for the year	25	408	160
Over-provision in prior year	(6)	(58)	(16)
	19	350	144
Deferred tax			
Origination and reversal of temporary differences	232	301	-
Effect on deferred tax balances resulting from a change in tax rate	(189)	196	(21)
	43	497	(21)
Income tax expense	62	847	123

In respect of the Group's overseas airline activities, the Group has either obtained exemptions from overseas taxation pursuant to the bilateral aviation agreements between the overseas governments and the PRC government, or has sustained tax losses in these overseas jurisdictions. Accordingly, no provision for overseas tax has been made for each of the years in the three-year period ended December 31, 2008.

On March 16, 2007, the National People's Congress passed the Corporate Income Tax Law of the PRC ("new tax law") which took effect on January 1, 2008. As a result of the new tax law, the statutory income tax rate adopted by the Company and its subsidiaries has been changed from 33% to 25% with effect from January 1, 2008.

Prior to enactment of the new tax law, the headquarters of the Company was taxed at a preferential rate of 18% and the branches and subsidiaries were taxed at rates ranging from 7.5% to 33% in 2007 and from 15% to 33% in 2006.

Pursuant to the new tax law, the income tax rates of entities that previously enjoyed preferential tax rates of 15% and 18% have been revised to 18%, 20%, 22%, 24% and 25% for 2008, 2009, 2010, 2011 and 2012 onwards respectively.

F-41

15

Income tax expense (continued)

(b) Reconciliation between actual tax expense and calculated tax based on accounting profit at applicable tax rates

	2008 RMB million	2007 RMB million (restated, note 3)	2006 RMB million (restated, note 3)
(Loss) / profit before taxation	(4,724)	2,879	227
Notional tax on (loss)/profit before taxation, calculated at the rates applicable to (loss)/profit in the tax jurisdiction concerned (Note i)	(913)	474	31
Adjustments for tax effect of:			
Non-deductible expenses	64	250	127
Share of results of associates and jointly controlled entities	(38)	(36)	(22)
Tax losses not recognised (Note 24(b))	566	28	39
Deductible temporary differences not recognised (Note 24(b))	577	-	-
Effect of change in tax rate (Note (ii))	(189)	196	(21)
Over provision in prior years	(6)	(58)	(16)
Others	1	(7)	(15)
Actual tax expense	62	847	123

Notes:

(i) The statutory income tax rate in the PRC is 25% (2007 and 2006: 33%). The headquarters of the Company is taxed at 18% (2007 and 2006: 18%), and its branches are taxed at rates ranging from 18% to 25% (2007 and 2006: 15% to 33%). The subsidiaries of the Group are taxed at rates ranging from 15% to 30% (2007: 7.5% to 33%; 2006: 15% to 33%).

(ii) The deferred tax assets and liabilities as at December 31, 2008 and 2007 have been remeasured for the change in applicable tax rates as a result of enactment of regulations governing administration of income tax among headquarters and branches in 2008, and the new tax law and certain detailed implementation rules in 2007, respectively.

F-42

16

Dividends

The board of directors of the Company does not recommend the payment of a dividend in respect of the year ended December 31, 2008.

No dividend was paid in respect of the year ended December 31, 2007 and 2006.

17

(Loss)/earnings per share

The calculation of basic (loss)/earnings per share for the year ended December 31, 2008 is based on the loss attributable to equity shareholders of the Company of RMB4,823 million (2007 restated: profit of RMB1,839 million; 2006 restated: profit of RMB106 million) and the weighted average number of shares in issue during the year of 6,561,267,000 (2007 and 2006: 6,561,267,000 million after adjusting for bonus share issue in 2008 (Note 40)).

	2008 Million shares	2007 Million shares	2006 Million shares
Issued ordinary shares at January 1	4,374	4,374	4,374
Effect of bonus share issue (Note 40)	2,187	2,187	2,187
Weighted average number of ordinary shares at December 31	6,561	6,561	6,561

No diluted earnings per share information has been presented because the Company does not have any dilutive potential ordinary shares in issue for each of the years in the three-year period ended December 31, 2008.

Impairment losses (Note (h))	-	3	1,741	50	90	-	1,884
At December 31, 2008	136	1,416	17,363	4,069	6,924	2,451	32,359
Net book value:							
At December 31, 2008	640	4,992	24,081	18,053	4,195	1,276	53,237
At December 31, 2007	197	5,535	25,822	21,274	4,400	1,213	58,441

(a) Most of the Group's buildings are located in the PRC. The Group was formally granted the rights to use the thirty-one parcels of land in Guangzhou, Shenzhen, Zhuhai, Beihai, Changsha, Shantou, Haikou, Zhengzhou, Guiyang and Wuhan by the relevant PRC authorities for periods of 30 to 70 years, which expire between 2020 and 2073. For other land in the PRC on which the Group's buildings are erected, the Group was formally granted the rights to use such land for periods of one to three years pursuant to various lease agreements between the Company and CSAHC. In this connection, rental payments totalling RMB22 million were paid to CSAHC during 2008 (2007 and 2006: RMB22 million) in respect of these leases.

(b) In compliance with the PRC rules and regulations governing initial public offering of shares by PRC joint stock limited companies, the property, plant and equipment of the Group as at December 31, 1996 were revalued. This revaluation was conducted by a firm of independent valuers registered in the PRC, on a depreciated replacement cost basis, and approved by the China State-owned Assets Administration Bureau.

Subsequent to the 1996 revaluation, the property, plant and equipment of the Group are carried at revalued amount, being the fair value at the date of the revaluation less any subsequent accumulated depreciation and impairment losses. Revaluation is performed periodically to ensure that the carrying amount does not differ materially from which would be determined using fair value at the balance sheet date. Based on a revaluation performed as of September 30, 2005, by a firm of independent valuers, on a depreciated replacement cost basis, and a further assessment performed as of December 31, 2008 by the directors, the carrying amount of property, plant and equipment as at December 31, 2008 did not differ materially from their fair value.

At December 31, 2008, the carrying amount of the revalued property, plant and equipment approximated their historical carrying value had they been stated at cost less accumulated depreciation and impairment losses.

(c) As at December 31, 2008, certain aircraft and land of the Group with an aggregate carrying value of approximately RMB29,321 million (2007: RMB32,976 million) were mortgaged under certain loan and lease agreements (Notes 30 and 32).

(d) The Group leased out investment properties and certain flight training facilities under operating leases. The leases typically run for an initial period of five to fifteen years, with an option to renew the leases after that date at which time all terms are renegotiated. None of the leases includes contingent rentals. In this connection, rental income totalling RMB54 million (2007: RMB49 million; 2006: RMB49 million) was received by the Group during the year in respect of the leases.

All properties held under operating leases that would otherwise meet the definition of investment property are classified as investment property.

The Group's total future minimum lease payments under non-cancellable operating leases are receivable as follows:

	2008 RMB million	2007 RMB million
Within 1 year	64	49
After 1 year but within 5 years	203	191
After 5 years	154	198
	421	438

As at December 31, 2008, the net book value of the aircraft and flight training facilities leased out by the Group under operating leases amounted to RMB63 (2007: RMB77 million).

(e) The investment properties are located in the PRC, where comparable market transactions are infrequent. In the absence of the current or recent prices in an active market and alternative reliable estimates of fair value (for example, discounted cash flow projection) are not available, the Group could not reliably determine the fair value of the investment properties.

F-46

(f) The Group entered into two separate arrangements (the "Arrangements") with certain independent third parties during each of 2002 and 2003. Under each of the Arrangements, the Group sold an aircraft and then immediately leased back the aircraft for an agreed period. The Group has an option to purchase the aircraft at a pre-determined date. In the event that the lease agreement is early terminated by the Group, the Group is liable to pay a pre-determined penalty to the lessor. Provided that the Group complies with the lease agreements, the Group is entitled to the continued possession and operation of the aircraft. Since the Group retains substantially all risks and rewards incidental to ownership of the aircraft and enjoys substantially the same rights to their use as before the Arrangements, no adjustment has been made to the property, plant and equipment.

(g) As at December 31, 2008 and up to the date of approval of these consolidated financial statements, the Group is in the process of applying for the land use right certificates and property title certificates in respect of the properties located in Guangzhou Baiyun International Airport, Xiamen, Heilongjiang, Hainan, Jilin, Dalian, Hunan and Xinjiang, in which the Group has interests and for which such certificates have not been granted. As at December 31, 2008, carrying value of such properties of the Group amounted to RMB2,331 million (2007: RMB2,471 million). The directors of the Company are of the opinion that the use of and the conduct of operating activities at the properties referred to above are not affected by the fact that the Group has not yet obtained the relevant land use right certificates and property title certificates.

(h) The impairment losses recognised in 2008 mainly comprise the following:

- During the year, in view of the age and operating efficiency of the Group's fleet of Boeing 777-200A aircraft, Airbus 300 aircraft and McDonnell Douglas 90 aircraft, the Group determined to dispose of these aircraft. The Group has commenced its process of seeking buyers for these aircraft. As a result, the Group assessed the recoverable amounts of these aircraft. Based on this assessment, the carrying amount of the aircraft and the related fleet assets was written down by RMB1,590 million. The estimates of recoverable amounts were based on the aircraft's fair value less costs to sell, determined by reference to the recent observable market prices for the respective model of aircraft.

- There has been a decrease in demand of cargo transportation services as a result of the current economic conditions. In addition, the operating efficiency of the Group's cargo freighters Boeing 747 is not satisfactory due to lack of economy of scale for the existing small fleet of cargo freighters. As such, the Group assessed the recoverable amounts of its cargo freighters and the related fleet assets. Based on this assessment, the carrying amount of the cargo freighters was written down by RMB291 million. The estimates of recoverable amounts were based on the aircraft's fair value less costs to sell, determined by reference to the recent observable market prices for the cargo freighters.

In 2007, in view of the age of the Group's fleet of MD82 aircraft, the Group disposed of 11 MD82 aircraft and assessed the recoverable amounts of the remaining 12 MD82 aircraft. Based on this assessment, the carrying amount of the aircraft was written down by RMB109 million and recognised as an impairment loss during the year ended December 31, 2007. The estimates of recoverable amount were based on the aircraft's fair value less costs to sell, determined by reference to observable market prices for MD82 aircraft.

19

Construction in progress

	2008 RMB million	2007 RMB million
At January 1	11,385	9,587
Additions	10,711	6,004
Transferred to property, plant and equipment (Note 18)	(511)	(1,284)
Transferred to other assets upon completion of development of computer software	(112)	(115)
Transferred out in respect of sales and lease back of aircraft	(4,135)	(2,790)
Other decrease	(17)	(17)
At December 31	17,321	11,385

The construction in progress as at December 31, 2008 mainly related to advance payments for acquisition of aircraft and flight equipment and progress payments for other construction projects at the Guangzhou, Hainan, Shenzhen and Fuzhou airports, Shanghai Pudong Base and Beijing Branch.

During the year, the Group entered into agreements with certain third party lessors to sell 14 (2007: 9) aircraft to the lessors prior to the deliveries of these aircraft and then lease back the aircraft from the lessors in the form of operating leases. Upon delivery of aircraft, the advance payments paid to aircraft manufacturers and the related interest costs capitalised in respect of the aircraft included in construction in progress were transferred out to calculate the gain or loss on sales and lease back.

As at December 31, 2008, advance payments for acquisition of aircraft of the Group of approximately RMB6,337 million (2007: Nil) were mortgaged under certain loan agreements (Note 30).

20

Interest in associates

	2008 RMB million	2007 RMB million
Share of net assets	235	219

The details of the Group's principal associates are set out in Note 55, all of which are unlisted corporate entities.

Summary of financial information on associates:

	100 Percent		Group's effective interest			
	2008 RMB million	2007 RMB million	2006 RMB million	2008 RMB million	2007 RMB million	2006 RMB million
Non-current assets	9,587	7,713		3,546	2,946	
Current assets	5,524	3,116		1,158	633	
Non-current liabilities	(6,314)	(4,597)		(2,460)	(1,789)	
Current liabilities	(8,213)	(5,366)		(2,135)	(1,571)	
Net assets	584	866		109	219	
Net liabilities not shared by the Group				126	-	
				235	219	
Revenue	5,761	5,635	4,485	2,234	2,184	1,727
Expenses	(6,071)	(5,471)	(4,487)	(2,312)	(2,127)	(1,722)
(Loss) / profit for the year	(310)	164	(2)	(78)	57	5
Net loss not shared by the Group				66	-	-
				(12)	57	5

During the year, an associate of the Group recorded significant losses and resulted in a net liability position. The Group only shared its losses up to the Group's investment cost in the associate.

21

Interest in jointly controlled entities

	2008 RMB million	2007 RMB million
Share of net assets	1,048	873

F-49

21

Interest in jointly controlled entities (continued)

The details of the Group's principal jointly controlled entities are set out in Note 55, all of which are unlisted corporate entities.

Summary of financial information on jointly controlled entities:

	Group's effective interest		
	2008 RMB million	2007 RMB million	2006 RMB million
Non-current assets	986	1,140	
Current assets	1,226	1,186	
Non-current liabilities	(291)	(1,185)	
Current liabilities	(873)	(268)	
Net assets	1,048	873	
Revenue	2,382	1,885	1,464
Expenses	(2,212)	(1,762)	(1,349)
Profit for the year	170	123	115

22

Other investments in equity securities

	2008 RMB million	2007 RMB million
Unlisted equity securities, at cost	166	168

Dividend income from unlisted securities of the Group amounted to RMB13 million during the year ended December 31, 2008 (2007: RMB10 million; 2006: RMB7 million).

23

Available-for-sale equity securities

	2008 RMB million	2007 RMB million
Available-for-sale securities -Listed in the PRC	114	362
Market value of listed securities	114	362

During the year, a loss on remeasurement of the fair value, net of tax, of the Group's available-for-sale equity securities was recognised directly in equity amounted to RMB192 million (2007: gain of RMB218 million; 2006: Nil).

Dividend income from listed securities of the Group amounted to RMB1 million during the year ended December 31, 2008 (2007: RMB2 million; 2006: RMB1 million).

F-50

24

Deferred tax assets / (liabilities)

Movements of net deferred tax assets / (liabilities) are as follows:

	2008 RMB million	2007 RMB million (restated, note 3)
At January 1	(607)	(158)
(Charged) / credited to consolidated statements of operations	(43)	(497)
Credited / (charged) to equity	56	(64)
Transfer to income tax payable	-	112
At December 31	(594)	(607)

(a) The components of deferred tax assets / (liabilities) recognised are analysed as follows:

	2008 RMB million	2007 RMB million (restated, note 3)
Deferred tax assets:		
Accrued expenses	574	504
Deferred revenue	136	132
Others	53	46
Total deferred tax assets	763	682
Deferred tax liabilities:		
Accrued expenses	(278)	(177)
Depreciation allowances in excess of the related depreciation	(1,071)	(1,048)
Change in fair value of available-for-sale equity securities	(8)	(64)
Total deferred tax liabilities	(1,357)	(1,289)
Net deferred tax assets / (liabilities)	(594)	(607)
	2008 RMB million	2007 RMB million (restated, note 3)
Net deferred tax asset recognised on the consolidated balance sheet	167	84
Net deferred tax liability recognised on the consolidated balance sheet	(761)	(691)
	(594)	(607)

F-51

24

Deferred tax assets / (liabilities) (continued)

(b) Deferred tax assets not recognised

At December 31, 2008, deferred tax assets have not been recognised in relation to certain unused tax losses and other deductible temporary differences. The unrecognised unused tax losses and deductible temporary differences and their corresponding unrecognised deferred tax assets are analysed as follows:

	2008		2007	
	Unrecognised unused tax losses and temporary differences RMB million	Unrecognised deferred tax assets RMB million	Unrecognised unused tax losses and temporary differences RMB million	Unrecognised deferred tax assets RMB million
Tax losses	3,251	658	401	92
Other deductible temporary differences:				
- Accrued expenses	637	145	-	-
- Provision for impairment losses	1,990	432	-	-
	2,627	577	-	-
	5,878	1,235	401	92

At December 31, 2008, the Group's deductible temporary differences relating to the accrued expenses and provision for impairment losses amounting to RMB2,627 million (2007: Nil) have not been recognised as deferred tax assets as it was determined by management that it is not probable that future taxable profits will be available for these deductible temporary differences to reverse in the foreseeable future.

Tax losses in the PRC are available for carry forward to set off future PRC assessable income for a maximum period of five years. The Group has not recognised deferred tax assets of RMB658 million (2007: RMB92 million) in respect of their corresponding unused tax losses of RMB3,251 million (2007: RMB401 million), as it was determined by management that it is not probable that future taxable profits against which the losses can be utilised will be available before they expire. The expiry dates of unrecognised unused tax losses are analysed as follows:

	2008 RMB million	2007 RMB million
Expiring in:		
2011	309	309
2012	92	92
2013	2,850	-
	3,251	401

F-52

25

Other assets

Other assets of the Group mainly include lump sum housing benefits (Note 43), computer software used for airline operation and prepayment for exclusive use right of an airport terminal.

Movements of lump sum housing benefits, computer software and prepayment for exclusive use right of an airport terminal are as follows:

	Lump sum Housing Benefits RMB million	Computer software RMB million	Prepayment for exclusive use right of an airport terminal RMB million
At January 1, 2007	145	67	-
Additions	-	101	150
Amortisation	(26)	(19)	-
At December 31, 2007	119	149	150
At January 1, 2008	119	149	150
Additions	-	1	-
Amortisation	(26)	(41)	-
At December 31, 2008	93	109	150

26

Financial assets / liabilities

(a) Financial assets

	2008 RMB million	2007 RMB million
Fuel option	-	2

(b) Financial liabilities

	2008 RMB million	2007 RMB million
Foreign exchange forward option	116	5

(c) Further disclosure of the financial derivative instruments are set out in Note 46(c), (d) and (f).

F-53

27

Inventories

	2008 RMB million	2007 RMB million
Expendable spare parts and maintenance materials	1,094	1,087
Other supplies	135	126
	1,229	1,213

The analysis of the amount of inventories recognised as an expense is as follows:

	2008 RMB million	2007 RMB million	2006 RMB million
Consumption	828	836	694
Write-down of inventories	189	101	161
	1,017	937	855

Inventories have been written down as a result of fleet adjustments during the current and prior years.

28

Trade receivables

	2008 RMB million	2007 RMB million
Trade receivables	1,348	1,999
Allowance for doubtful debts	(31)	(33)
	1,317	1,966

(a) Ageing analysis

Credit terms granted by the Group to sales agents and other customers generally range from one to three months. An ageing analysis of trade receivables, net of allowance for doubtful debts, is set out below:

	2008 RMB million	2007 RMB million
Within 1 month	1,123	1,803
More than 1 month but less than 3 months	182	144
More than 3 months but less than 12 months	11	18
More than 12 months	1	1
	1,317	1,966

All of the trade receivables are expected to be recovered within one year.

28 Trade receivables (continued)

(b) Impairment of trade receivables

Impairment loss in respect of trade receivables is recorded using an allowance account unless the Group is satisfied that recovery of the amount is remote, in which case the impairment loss is written off against trade receivables directly.

The movements in the allowance for doubtful debts during the year are as follows:

	2008 RMB million	2007 RMB million
At January 1	33	40
Impairment loss recognised	-	2
Uncollectible amounts written off	(2)	(9)
At December 31	31	33

(c) Trade receivables that are not impaired

The ageing analysis of trade receivables that is neither individually nor collectively considered to be impaired is as follows:

	2008 RMB million	2007 RMB million
Neither past due nor impaired	1,305	1,947

Trade receivables that were neither past due nor impaired relate to customers for whom there was no recent history of default.

29 Cash and cash equivalents

	2008 RMB million	2007 RMB million
Deposits with banks	1,998	1,111
Cash at bank and in hand	2,651	2,713
Cash and cash equivalents	4,649	3,824

Southern Airlines Group Finance Company Limited (“SA Finance”) is a PRC authorised financial institution controlled by CSAHC and is an associate of the Group. In accordance with the financial agreement dated May 22, 1997, as revised subsequently on December 31, 2004 and November 15, 2007 between the Company and SA Finance, all of the Group’s deposits accepted by SA Finance would be simultaneously placed with several designated major PRC banks by SA Finance. As at December 31, 2008, the Group’s deposits with SA Finance amounted to RMB1,139 million (2007: RMB906 million) (Note 42(d)).

30

Bank and other loans

(a) At December 31, 2008, bank and other loans were repayable as follows:

	2008 RMB million	2007 RMB million
Within 1 year or on demand	22,178	24,948
After 1 year but within 2 years	6,104	2,740
After 2 years but within 5 years	10,343	4,289
After 5 years	982	2,045
	17,429	9,074
	39,607	34,022

(b) At December 31, 2008, bank and other loans are analysed as follows:

	2008 RMB million	2007 RMB million
Short-term bank loans	18,232	21,313
Long-term bank and other loans due within one year (classified as current liabilities)	3,946	3,635
	22,178	24,948
Long-term bank and other loans due after one year (classified as non-current liabilities)	17,429	9,074
	39,607	34,022
Representing:		
Bank loans	39,604	34,019
Other loans	3	3
	39,607	34,022

(c) As at December 31, 2008, the Group's weighted average interest rates on short-term borrowings were 4.48% per annum (2007: 5.14% per annum).

F-56

30

Bank and other loans (continued)

(d) Details of bank and other loans with original maturity over one year are as follows:

	2008 RMB million	2007 RMB million
Renminbi denominated loans		
Non-interest bearing loan from a municipal government authority	3	3
Floating interest rates ranging from 90% of benchmark interest rate (stipulated by PBOC) to benchmark interest rate as at December 31, 2008, with maturities through 2013	7,647	383
United States Dollars denominated loans		
Fixed interest rates ranging from 4.43% to 7.48% per annum as at December 31, 2008, with maturities through 2015	994	1,337
Floating interest rates ranging from 3-month LIBOR + 0.45% to 1.40% per annum as at December 31, 2008, with maturities through 2010	1,343	1,527
Floating interest rates ranging from 6-month LIBOR + 0.28% to 3.20% per annum as at December 31, 2008, with maturities through 2018	11,388	9,459
	21,375	12,709
Less: loans due within one year classified as current liabilities	(3,946)	(3,635)
	17,429	9,074

(e) The remaining contractual maturities at the balance sheet date of the Group's bank and other loans, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates, or if floating, based on rates current at the balance sheet date) and the earliest date the Group can be required to pay, are as follows:

	2008 RMB million	2007 RMB million
Within 1 year	23,478	26,233
After 1 year but within 2 years	6,752	3,157
After 2 years but within 5 years	10,792	4,899
After 5 years	1,035	2,215
	42,057	36,504

F-57

30

Bank and other loans (continued)

(f) As at December 31, 2008, bank and other loans of the Group totalling RMB9,188 million (2007: RMB8,583 million) were secured by mortgages over certain of the Group's aircraft, advance payments for aircraft, lease prepayments of land use right and investment properties with carrying amount of RMB17,652 million (2007: RMB11,703 million).

(g) As at December 31, 2008, certain bank and other loans were guaranteed by the following parties:

	2008 RMB million	2007 RMB million
Guarantors		
Industrial Commercial Bank of China	15	46
Export-Import Bank of the United States	304	516
CSAHC	783	1,176
Shenzhen Yingshun Investment Development Co., Ltd.	22	22
SA Finance	1	3
Bank of Communications	438	-
China Minsheng Banking Corp., Ltd.	629	-
Huaxia Bank Co., Ltd.	-	657
	2,192	2,420

(h) As at December 31, 2008, loans to the Group from SA Finance amounted to RMB2,539 million (2007: RMB329 million) (Note 42(d)).

(i) The Group has significant bank and other loans balances as well as obligations under finance leases (Note 32) which are denominated in US dollars. The net exchange gain of RMB2,592 million (2007: RMB2,832 million; 2006: RMB1,492 million) recorded by the Group was mainly attributable to the exchange gain arising from retranslating bank and other loans balances and finance lease obligations denominated in US dollars. The foreign currency risk is further discussed in Note 46(c).

(j) As at December 31, 2008, short-term bank loans of the Group amounting to RMB37 million (2007: Nil) were secured by pledged bank deposits of RMB51 million (2007: Nil).

(k) As at December 31, 2008, a long-term loan of RMB10 million (2007: Nil) was granted by SA Finance to a subsidiary of the Company. The loan was secured by the trade receivables of the subsidiary during the loan period. As at December 31, 2008, the balance of the trade receivables of the subsidiary amounted to RMB8 million.

32

Obligations under finance leases (continued)

Details of obligations under finance leases are as follows:

	2008 RMB million	2007 RMB million
United States Dollars denominated obligations		
Fixed interest rates ranging from 4.24% to 7.53% per annum as at December 31, 2008	7,949	6,587
Floating interest rates ranging 6 month LIBOR + 0.03% to 1.50% per annum as at December 31, 2008	4,515	7,626
Japanese Yen denominated obligations		
Fixed interest rates ranging from 2.20% to 3.51% per annum as at December 31, 2008	474	1,522
	12,938	15,735

Under the terms of the leases, the Group has an option to purchase, at or near the end of the lease term, certain aircraft and related equipment at either fair market value or a percentage of the respective lessor's defined cost.

Security, including charges over the assets concerned and relevant insurance policies, is provided to the lessors. As at December 31, 2008, certain of the Group's aircraft with carrying amount of RMB18,054 million (2007: RMB21,273 million) were mortgaged to secure finance lease obligations totalling RMB12,938 million (2007: RMB15,735 million).

33

Trade and bills payables

	2008 RMB million	2007 RMB million
Bills payable	148	-
Trade payables	1,205	1,844
	1,353	1,844

F-60

33

Trade and bills payables (continued)

The following is the ageing analysis of trade and bills payables:

	2008 RMB million	2007 RMB million
Within 1 month	809	1,180
More than 1 month but less than 3 months	302	347
More than 3 months but less than 6 months	239	317
More than 6 months but less than 1 year	3	-
	1,353	1,844

All of the trade and bills payables are expected to be settled within one year.

34

Deferred revenue

Deferred revenue represents the unredeemed frequent flyer revenue.

35

Amounts due from / to related companies

(a)

Amounts due from related companies

	2008 RMB million	2007 RMB million
CSAHC and its affiliates	1	6
An associate	1	1
Jointly controlled entities	9	111
	11	118

The amounts due from related companies are unsecured, interest free and have no fixed terms of repayment. They are expected to be recovered within one year.

(b)

Amounts due to related companies

	2008 RMB million	2007 RMB million
CSAHC and its affiliates	64	76
Jointly controlled entities	38	118
	102	194

The amounts due to related companies are unsecured, interest free and have no fixed terms of repayment. They are expected to be settled within one year.

F-61

36

Accrued expenses

	2008 RMB million	2007 RMB million (restated, note 3)
Jet fuel costs	1,320	1,210
Air catering expenses	161	161
Salaries and welfare	1,452	1,517
Repairs and maintenance	1,853	1,642
Provision for major overhauls (Note 38)	409	450
Provision for early retirement benefits (Note 39)	68	77
Landing and navigation fees	2,097	1,209
Computer reservation services	539	398
Interest expense	339	483
Others	182	143
	8,420	7,290

37

Other liabilities

	2008 RMB million	2007 RMB million
CAAC Infrastructure Development Fund, airport construction surcharge and airport tax payable	899	767
Construction cost payable	106	110
Advance payments on chartered flights	58	63
Sales agent deposits	222	239
Other taxes payable	591	827
Others	1,087	988
	2,963	2,994

38

Provision for major overhauls

Details of provision for major overhauls in respect of aircraft held under operating leases are as follows:

	2008 RMB million	2007 RMB million
At January 1	1,133	1,060
Provision for the year	462	376
Provision utilised during the year	(241)	(303)
At December 31	1,354	1,133
Less: current portion included in accrued expenses (Note 36)	(409)	(450)
	945	683

F-62

39

Provision for early retirement benefits

Details of provision for early retirement benefits in respect of obligations to early retired employees are as follows:

	2008	2007
	RMB million	RMB million
At January 1	307	392
Provision for the year (Note 11)	10	12
Financial cost (Note 12)	19	15
Payments made during the year	(108)	(98)
Effect of changes in discount rate	19	(14)
At December 31	247	307
Less: current portion included in accrued expenses (Note 36)	(68)	(77)
	179	230

The Group has implemented an early retirement plan for certain employees. The benefits of the early retirement plan are calculated based on factors including the remaining number of years of services from the date of early retirement to the normal retirement date and the salary amount on the date of early retirement of the employees. The present value of the future cash flows expected to be required to settle the obligations is recognised as provision for early retirement benefits.

Share capital and capital management

(a)

Share capital

	2008	2007
	RMB million	RMB million
Registered, issued and paid up capital:		
3,300,000,000 domestic state-owned shares with selling restrictions of RMB1.00 each (2007: 2,200,000,000 shares of RMB1.00 each)	3,300	2,200
1,761,267,000 H shares of RMB1.00 each (2007: 1,174,178,000 shares of RMB1.00 each)	1,761	1,174
1,500,000,000 A shares of RMB1.00 each (2007: 1,000,000,000 shares of RMB1.00 each)	1,500	1,000
	6,561	4,374

In a meeting of holders of A shares held on May 17, 2007, it was approved that the domestic state-owned shares would become listed and tradeable on June 18, 2010.

A bonus share issue of 1,100,000,000 domestic state-owned shares, 587,089,000 H shares and 500,000,000 A shares, totalling 2,187,089,000 shares, by the conversion of share premium in the amount of RMB2,187,089,000 to share capital of the same amount, was approved by shareholders and relevant government authorities and took effect in November 2008.

All the domestic state-owned, H and A shares rank pari passu in all material respects.

F-63

40

Share capital and capital management (continued)

(b)

Capital management

The Group's primary objectives in managing capital are to safeguard its ability to continue as a going concern, and to generate sufficient profit to maintain growth and provide returns to its shareholders, by securing access to finance at a reasonable cost.

The Group manages the amount of capital in proportion to risk and managing its debt portfolio in conjunction with projected financing requirements. The Group monitors capital on the basis of the debt to equity ratio, which is calculated on net debt as a percentage of the total equity where net debt is represented by the aggregate of bank and other loans, short-term financing bills, obligations under finance leases, trade and bills payables, sales in advance of carriage, amounts due to related companies, accrued expenses and other liabilities less cash and cash equivalents.

There was no change in the Group's approach to capital management during 2008 as compared with previous years. Neither the Company nor any of its subsidiaries are subject to externally imposed capital requirements. The Group's debt to equity ratio remains high at 685% at December 31, 2008 (2007: 420%) because of the acquisitions of aircraft during the current and prior years.

(a) According to the PRC Company Law and the Articles of Association of the Company and certain of its subsidiaries, the Company and the relevant subsidiaries are required to transfer 10% of their annual net profits after taxation, as determined under the PRC accounting rules and regulations, to a statutory surplus reserve until the reserve balance reaches 50% of the registered capital. The transfer to this reserve must be made before distribution of a dividend to shareholders and when there are retained earnings at the financial year end.

Statutory surplus reserve can be used to offset prior years' losses, if any, and may be converted into share capital by the issue of new shares to shareholders in proportion to their existing shareholding or by increasing the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

(b) Dividend distributions may be proposed at the discretion of the Company' board of directors, after consideration of the transfers referred to above and making up cumulative prior years' losses. Pursuant to the Articles of Association of the Company, the net profit of the Company for the purpose of profit distribution is deemed to be the lesser of (i) the net profit determined in accordance with the PRC accounting rules and regulations, and (ii) the net profit determined in accordance with IFRSs. As at December 31, 2008, the Company did not have any distributable reserves (2007: Nil).

(c) The Company acquired certain equity interest in a subsidiary from CSAHC (Note 42(c)(xvii)). The balance represents the difference of the consideration paid and the share of net assets of the subsidiary.

(d) Pursuant to the "Notice of approval for funds to be used specifically for the reconstruction after the snowstorm disaster" issued by the Civil Aviation Administration of China, national funds amounting to RMB121 million were contributed during the year by the PRC government to the Company and its two subsidiaries through CSAHC. Such funds are to be used specifically for the reconstruction after the snowstorm disaster occurred in January 2008 in the PRC.

In addition, national funds amounting to RMB35 million were contributed during the year by the PRC government to the Company through CSAHC, which are to be used specifically for the reconstruction of Urumqi airport parking apron and other projects.

Pursuant to the requirements of the relevant notice, the national funds were designated as capital contribution and vested solely by the PRC government. They can be converted to share capital of the entities receiving the funds upon approval by their shareholders and completion of other procedures.

42

Material related party transactions

(a) Key management personnel remuneration

Remuneration for key management personnel of the Group, including amounts paid to the Company's directors and supervisors as disclosed in Note 14, is as follows:

	2008 RMB'000	2007 RMB'000	2006 RMB'000
Short-term employees benefits	14,117	12,226	6,638
Post-employment benefits	1,268	275	220
	15,385	12,501	6,858
	2008 RMB'000	2007 RMB'000	2006 RMB'000
Directors and supervisors (Note 14)	8,578	6,790	4,334
Senior management	6,807	5,711	2,524
	15,385	12,501	6,858

Total remuneration is included in "staff costs" (Note 11).

(b) Contributions to post-employment benefit plans

The Group participates in various defined contribution retirement plans organised by municipal and provincial governments for its staff. Details of the Group's employee benefits plan are disclosed in Note 43.

F-67

(c) Transactions with CSAHC and its affiliates (the “CSAHC Group”), and the associates and jointly controlled entities of the Group

The Group obtained various operational services provided by the CSAHC Group and the associates and jointly controlled entities of the Group during the normal course of its business.

Details of the significant transactions carried out by the Group are as follows:

	Note	2008 RMB million	2007 RMB million	2006 RMB million
Expenses paid to the CSAHC Group

F-68

- (c) Transactions with CSAHC and its affiliates (the “CSAHC Group”), and the associates and jointly controlled entities of the Group (continued)
- (i) The Group acquires aircraft, flight equipment and other airline-related facilities through Southern Airlines (Group) Import and Export Trading Company (“SAIETC”), a wholly-owned subsidiary of CSAHC and pays handling charges to SAIETC.
- (ii) The Group purchases certain inflight meals and related services from Shenzhen Air Catering Company Limited and Southern Airlines (Group) Catering Co., Ltd (“Air Catering”), which are an associate and a wholly-owned subsidiary of CSAHC respectively. Air Catering was acquired by the Company on August 14, 2007 (Note 42(c)(xiv)).
- (iii) Commission is earned by certain subsidiaries of CSAHC in connection with the air tickets sold by them on behalf of the Group. Commission is calculated based on the rates stipulated by the CAAC and International Air Transportation Association.
- (iv) Certain sundry aviation supplies are purchased from Southern Airlines (Group) Economic Development Company (“SAGEDC”), a subsidiary of CSAHC. No sundry aviation supplies were purchased from SAGEDC during the year.
- (v) The Group leased an aircraft from CSAHC Hainan Co., Ltd. (“CSAHC Hainan”), a wholly-owned subsidiary of CSAHC. The lease was terminated on April 30, 2006.
- (vi) The Group leases certain land and buildings in the PRC from CSAHC. Rental payments for land and buildings were paid or payable to CSAHC.
- (vii) Guangzhou China Southern Airlines Property Management Co., Ltd., a subsidiary of CSAHC, provides property management services to the Group.
- (viii) Beijing Ground Service Co., Ltd., a jointly controlled entity of the Group, provides airport ground service to the Group.
- (ix) Guangzhou Aircraft Maintenance Engineering Company Limited and MTU Maintenance Zhuhai Co., Ltd., both are jointly controlled entities of the Group, provide comprehensive maintenance services to the Group.
- (x) Zhuhai Xiang Yi Aviation Technology Company Limited (“Zhuhai Xiang Yi”), a jointly controlled entity of the Group, provides flight simulation services to the Group. In addition, the Group entered into operating lease agreements to lease certain flight training facilities and buildings to Zhuhai Xiang Yi.
- (xi) China Southern Airlines Culture and Media Co., a jointly controlled entity of the Group and CSAHC, provides advertising service to the Group.
- (xii) On April 30, 2006, the Company acquired certain assets of CSAHC Hainan at a total consideration of RMB294 million, which was partly satisfied by assumption of debts and liabilities of CSAHC Hainan totalling RMB289 million outstanding as at that date. The remaining balance of RMB5 million had been settled in cash during the year ended December 31, 2007 (Note 45(d)).
- (xiii)

On December 28, 2006, the Company disposed of certain properties to CSAHC at a consideration of RMB23 million.

F-69

(c) Transactions with CSAHC and its affiliates (the “CSAHC Group”), and the associates and jointly controlled entities of the Group (continued)

(xiv) On August 14, 2007, the Company signed an agreement to acquire (1) the entire equity interest in Air Catering; (2) certain assets of Guangzhou Bi Hua Yuan Training Centre including certain properties and office facilities; and (3) certain assets of Nan Lung Travel & Express (Hong Kong) Limited, including certain properties and office facilities and the 51% equity interest in Nan Lung International Freight Limited (“Nan Lung Freight”), from CSAHC for a total consideration of RMB270 million (Note 45(b)).

(xv) On August 14, 2007, the Company signed an agreement to dispose of its equity interest in GZ Aviation Hotel Co., Ltd. to CSAHC at a consideration of RMB75 million.

(xvi) On November 11, 2008, the Company signed an agreement to transfer the exclusive right to use certain advertising space on the aircraft fleet for a period of 18 years to China Southern Airlines Culture and Media Co., a jointly controlled entity of the Group and CSAHC, for a total consideration of RMB35 million.

(xvii) On December 30, 2008, the Company signed an agreement to acquire 26% equity interest in China Southern West Australian Flying College Pty Limited from CSAHC at a consideration of RMB5 million.

(xviii) On November 11, 2008, the Company signed an agreement to transfer certain buildings to China Southern Airlines Culture and Media Co., a jointly controlled entity of the Group and CSAHC at a consideration of RMB2 million.

In addition to the above, certain subsidiaries of CSAHC also provided hotel and other services to the Group during the year. The total amount involved is not material to the results of the Group for the current and prior years.

Details of amounts due from/to the CSAHC Group, and the associates and jointly controlled entities of the Group:

	2008 RMB million	2007 RMB million
Receivables:		
The CSAHC Group	1	6
An associate	1	1
Jointly controlled entities	9	111
	11	118
Payables:		
The CSAHC Group	64	76
Jointly controlled entities	38	118
	102	194

The amounts due from/to the CSAHC Group, the associate and jointly controlled entities of the Group are unsecured, interest free and have no fixed terms of repayment.

42 Material related party transactions (continued)

(d) Loans from and deposits placed with SA Finance

(i) Loans from SA Finance

At December 31, 2008, loans from SA Finance to the Group amounted to RMB2,539 million (2007: RMB329 million).

The loans were repayable and secured as follows:

	2008 RMB million	2007 RMB million
Within 1 year	2,100	329
After 2 years but within 5 years	439	-
	2,539	329
Secured (Note 30(k))	10	-
Unsecured	2,529	329
	2,539	329

Interest expense paid on such loans amounted to RMB38 million (2007: RMB17 million; 2006: RMB16 million) and the interest rates ranged from 4.75% to 7.56% per annum during the year ended December 31, 2008 (2007: 5.10% to 6.16% per annum; 2006: 5.02% to 5.26% per annum).

(ii) Deposits placed with SA Finance

At December 31, 2008, the Group's deposits with SA Finance amounted to RMB1,139 million (2007: RMB906 million). The applicable interest rates are determined in accordance with the rates published by the PBOC.

Interest income received on such deposits amounted to RMB22 million (2007: RMB20 million; 2006: RMB5 million) during the year ended December 31, 2008.

(e) Guarantees from CSAHC and SA Finance

Certain bank loans of the Group were guaranteed by the following related parties:

	2008 RMB million	2007 RMB million
CSAHC	783	1,176
SA Finance	1	3
	784	1,179

42 Material related party transactions (continued)

(f) Transactions with other state-controlled entities

The Company is a state-controlled entity and operates in an economic regime currently dominated by entities directly or indirectly controlled by the PRC government (“state-controlled entities”) through its government authorities, agencies, affiliations and other organisations.

Other than those transactions with the CSAHC Group, and the associates and jointly controlled entities of the Group as disclosed in Notes 42(c), (d) and (e) above, the Group conducts transactions with other state-controlled entities which include but are not limited to the following:

-	Transportation services;
-	Leasing arrangements;
-	Purchase of equipment;
-	Purchase of ancillary materials and spare parts;
-	Ancillary and social services; and
-	Financial services arrangement.

These transactions are conducted in the ordinary course of the Group’s business on terms comparable to those with other entities that are not state-controlled. The Group has established its buying, pricing strategy and approval process for purchases and sales of products and services. Such buying, pricing strategy and approval processes do not depend on whether the counterparties are state-controlled entities or not.

Having considered the potential for transactions to be impacted by related party relationships, the Group’s pricing strategy, buying and approval processes, and what information would be necessary for an understanding of the potential effect of the relationship on the financial statements, the directors are of the opinion that the following transactions with other state-controlled entities require disclosure:

(i) The Group’s transactions with other state-controlled entities, including state-controlled banks in the PRC

	2008 RMB million	2007 RMB million	2006 RMB million
Jet fuel cost	21,042	14,814	13,054
Interest income	77	47	33
Interest expense	1,719	1,751	1,405

(ii) The Group’s balances with other state-controlled entities, including state-controlled banks in the PRC

	2008 RMB million	2007 RMB million
Cash and deposits at bank	3,354	2,624
Short-term bank loans and current portion of long-term bank loans	18,675	23,004
Long-term bank loans, less current portion	14,773	6,772

42 Material related party transactions (continued)

(f) Transactions with other state-controlled entities (continued)

(iii) Guarantees from other state-controlled entities, including state-controlled banks in the PRC

	2008	2007
	RMB million	RMB million

Guarantees on certain bank loans of the Group	1,082	703
---	-------	-----

(iv) During the year, the issuance of the short-term financing bills of RMB2,000 million was underwritten by certain state-controlled banks in the PRC.

43 Retirement and housing benefits

(a) Retirement benefits

Employees of the Group participate in several defined contribution retirement schemes organised separately by the PRC municipal governments in regions where the major operations of the Group are located. The Group is required to contribute to these schemes at the rates ranging from 9% to 24% (2007: 9% to 24%; 2006: 10% to 23%) of salary costs including certain allowances. A member of the retirement schemes is entitled to pension benefits from the Local Labour and Social Security Bureau upon his/her retirement. The retirement benefit obligations of all retired staff of the Group are assumed by these schemes.

In addition, the Group has established a supplementary defined contribution retirement scheme for the benefit of employees in accordance with relevant regulations in the PRC. In this connection, employees of the Group participate in a supplementary defined contribution retirement scheme whereby the Group is required to make contributions not exceeding one-twelfth of the prior year's total salaries.

(b) Housing benefits

The Group contributes on a monthly basis to housing funds organised by municipal and provincial governments based on certain percentages of the salaries of employees. The Group's liability in respect of these funds is limited to the contributions payable in each year.

In addition to the housing funds, certain employees of the Group are eligible to one of the following housing benefit schemes:

(i) Pursuant to the comprehensive services agreement (the "Service Agreement") dated May 22, 1997 between the Company and CSAHC, CSAHC provided quarters to eligible employees of the Group. In return, the Group paid a fixed annual fee of RMB85 million to CSAHC for a ten-year period from 1995 to 2004. The agreement expired by December 31, 2004.

(ii) Pursuant to a staff housing benefit scheme effective September 2002, the Group agreed to pay lump sum housing allowances to certain employees who have not received quarters from CSAHC or the Group according to the relevant PRC housing reform policy, for subsidising their purchases of houses. An employee who quits prior to the end of the vesting benefit period is required to pay back a portion of the lump sum housing benefits determined on a pro-rata basis of the vesting benefit period. The Group has the right to effect a charge on the employee's house

and to enforce repayment through selling the house in the event of default in repayment. Any shortfall in repayment would be charged against income.

F-73

43 Retirement and housing benefits (continued)

(b) Housing benefits (continued)

(iii) The Group also pays cash housing subsidies on a monthly basis to eligible employees. The monthly cash housing subsidies are charged to the consolidated statements of operations as incurred.

44 Segmental information

The Group operates principally as a single business segment for the provision of air transportation services. The analysis of turnover and operating profit/(loss) by geographical segment is based on the following criteria:

(i) Traffic revenue from domestic services within the PRC (excluding Hong Kong, Macau and Taiwan) is attributed to the domestic operation. Traffic revenue from inbound / outbound services between the PRC and Hong Kong / Macau / Taiwan, and the PRC and overseas destinations is attributed to the Hong Kong, Macau and Taiwan operation and international operation respectively.

(ii) Other revenue from ticket selling, general aviation services, ground services, air catering and other miscellaneous services is attributed on the basis of where the services are performed.

	2008			
	Domestic	Hong Kong Macau and Taiwan	International*	Total
	RMB million	RMB million	RMB million	RMB million
Traffic revenue	43,616	1,015	9,282	53,913
Other operating revenue	1,357	18	-	1,375
Total operating revenue	44,973	1,033	9,282	55,288
Operating loss	(4,741)	(111)	(1,686)	(6,538)

44

Segmental information (continued)

(ii)

	2007			Total RMB million (restated, note 3)
	Domestic RMB million (restated, note 3)	Hong Kong Macau and Taiwan RMB million	International* RMB million	
Traffic revenue	42,425	1,140	9,631	53,196
Other operating revenue	1,188	17	-	1,205
Total operating revenue	43,613	1,157	9,631	54,401
Operating profit / (loss)	2,391	58	(874)	1,575

	2006			Total RMB million (restated, note 3)
	Domestic RMB million (restated, note 3)	Hong Kong Macau and Taiwan RMB million	International* RMB million	
Traffic revenue	35,569	1,329	8,051	44,949
Other operating revenue	1,132	-	-	1,132
Total operating revenue	36,701	1,329	8,051	46,081
Operating profit / (loss)	1,128	(4)	(617)	515

* Asian market accounted for approximately 72% (2007: 68%; 2006: 64%) of the Group's total international traffic revenue for the year ended December 31, 2008. The remaining portion was mainly derived from the Group's flights to / from European, North American and Australian regions.

The major revenue-earning assets of the Group are its aircraft fleet, all are registered in the PRC. Since the Group's aircraft fleet is employed flexibly across its route network, there is no suitable basis of allocating such assets to geographic segments. Most of the Group's non-aircraft assets are located in the PRC.

F-75

45 Supplementary information to the consolidated cash flow statements

(a) Non cash transactions - acquisition of aircraft

During the year ended December 31, 2008, aircraft acquired under finance leases amounted to RMB281 million (2007: RMB4,330 million; 2006: RMB3,402 million).

(b) Effect of the acquisition of Nan Lung Freight and Air Catering

The Group acquired a 51% equity interest in Nan Lung Freight and a 100% equity interest in Air Catering on August 31, 2007. Details are as follows:

	RMB million
Assets acquired:	
Property, plant and equipment, net	77
Inventories	6
Trade receivables	106
Other receivables	7
Cash and cash equivalents	54
	250

46 Financial risk management and fair values

Exposure to liquidity, interest rate, currency, jet fuel price risk and credit risks arises in the normal course of the Group's business. The Group's exposure to these risks and the financial risk management policies and practices used by the Group to manage these risks are described below.

(a) Liquidity risk

As at December 31, 2008, the Group's current liabilities exceeded its current assets by RMB32,290 million. For the year ended December 31, 2008, the Group recorded a net cash inflow from operating activities of RMB1,155 million, a net cash outflow from investing activities of RMB7,790 million and a net cash inflow from financing activities of RMB7,460 million, and resulted in a net increase in cash and cash equivalents of RMB825 million.

(a) Liquidity risk (continued)

In 2009 and thereafter, the liquidity of the Group is primarily dependent on its ability to maintain adequate cash inflow from operations to meet its debt obligations as they fall due, and its ability to obtain adequate external financing to meet its committed future capital expenditures. As at December 31, 2008, the Group had banking facilities with several PRC commercial banks for providing loan finance up to approximately RMB125,265 million (2007: RMB50,262 million), of which approximately RMB47,125 million (2007: RMB29,338 million) was utilised. The directors of the Company believe that sufficient financing will be available to the Group. The directors of the Company believe that the liquidity status of the Group will be further enhanced upon completion of the share subscriptions as mentioned in Note 49(a).

The directors of the Company have carried out a detailed review of the cash flow forecast of the Group for the twelve months ending December 31, 2009. Based on such forecast, the directors have determined that adequate liquidity exists to finance the working capital and capital expenditure requirements of the Group during that period. In preparing the cash flow forecast, the directors have considered historical cash requirements of the Group as well as other key factors, including the availability of the above-mentioned loan finance which may impact the operations of the Group during the next twelve-month period. The directors are of the opinion that the assumptions and sensitivities which are included in the cash flow forecast are reasonable. However, as with all assumptions in regard to future events, these are subject to inherent limitations and uncertainties and some or all of these assumptions may not be realised.

As at December 31, 2008, the Group's recognised financial liabilities, bank and other loans, short-term financing bills, finance lease obligations, trade and bills payables and amounts due to related companies as disclosed in Notes 26, 30, 31, 32, 33 and 35 respectively, are not materially different from the amount determined based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the balance sheet date). During the year ended December 31, 2008, the Group had derivatives settled gross in respect of the forward foreign exchange contracts, of which the outflow amounted to RMB79 million (2007: Nil) and inflow amounted to RMB25 million (2007: RMB4 million).

(b) Interest rate risk

The interest rates and maturity information of the Group's bank and other loans, short-term financing bills and finance lease obligations are disclosed in Notes 30, 31 and 32 respectively.

At December 31, 2008, it is estimated that a general increase / decrease of 100 basis points in interest rates, with all other variables held constant, would increase / decrease the Group's loss after tax and accumulated losses by approximately RMB186 million (2007: would decrease / increase the Group's profit after tax and retained earnings by approximately RMB279 million).

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the balance sheet date. The 100 basis point increase or decrease represents management's assessment of a reasonably possible change in interest rates over the period until the next annual balance sheet date. The analysis is performed on the same basis for 2007.

(c) Foreign currency risk

The Renminbi is not freely convertible into foreign currencies. All foreign exchange transactions involving Renminbi must take place either through the PBOC or other institutions authorised to buy and sell foreign exchange or at a swap centre.

The Group has significant exposure to foreign currency risk as substantially all of the Group's obligations under finance leases (Note 32) and bank and other loans (Note 30) are denominated in foreign currencies, principally US dollars and Japanese Yen. Depreciation or appreciation of the Renminbi against foreign currencies affects the Group's results significantly because the Group's foreign currency payments generally exceed its foreign currency receipts. The Group is not able to hedge its foreign currency exposure effectively other than by retaining its foreign currency denominated earnings and receipts to the extent permitted by the State Administration of Foreign Exchange, or subject to certain restrictive conditions, entering into forward foreign exchange contracts with authorised banks.

The Group also has exposure to foreign currency risk in respect of net cash inflow denominated in Japanese Yen from ticket sales in overseas branch office after payment of expenses. As at December 31, 2008, the Group had two outstanding forward option contracts of notional amount ranging from USD64 million to USD128 million (2007: USD35 million to USD70 million). The contracts are to buy USD1 million and USD1.5 million respectively (or USD2 million and USD3 million respectively if the spot exchange rate at settlement date is below certain specified strike rates) by selling Japanese Yen at certain specified rates on monthly settlement dates until the maturity of the contracts in 2011. Both contracts have a knock-out clause where the contracts early terminate upon the exchange rate of Japanese Yen to US dollar reaching a certain knock-out level. For the year ended December 31, 2008, a net loss of approximately RMB111 million (2007: a loss of RMB5 million) arising from changes in the fair value of these foreign exchange forward option contracts has been recognised in profit or loss. At December 31, 2008, the fair value of these currency forward option contracts was financial liabilities of approximately RMB116 million (2007: RMB5 million).

As at December 31, 2008, it is estimated that if an appreciation / depreciation of 7.5% in exchange rate of US dollar against Japanese Yen, with all other variables held constant, would decrease / increase the Group's loss after tax and accumulated losses by approximately RMB63 million.

46

Financial risk management and fair values (continued)

(c) Foreign currency risk (continued)

The exchange rate of Renminbi to US dollar was set by the PBOC and had fluctuated within a narrow band prior to July 21, 2005. Since then, a managed floating exchange rate regime based on market supply and demand with reference to a basket of foreign currencies has been used and the US dollar exchange rate has gradually declined against the Renminbi.

The following table indicates the approximate change in Group's loss after tax in response to reasonably possible changes in the foreign exchange rates to which the Group has significant exposure at the balance sheet date.

	2008		2007	
	Appreciation / (depreciation) of Renminbi against foreign currency	Increase/(decrease) on loss after tax and accumulated losses RMB million	Appreciation/ (depreciation) of Renminbi against foreign currency	Increase/(decrease) on profit after tax and retained earnings RMB million
United States Dollars	2%	(606)	5%	1,815
	(2)%	606	(5)%	(1,815)
Japanese Yen	5%	(17)	2%	24
	(5)%	17	(2)%	(24)

The sensitivity analysis has been determined assuming that the change in foreign exchange rates had occurred at the balance sheet date and had been applied to each of the Group entities' exposure to currency risk for both derivative and non-derivative financial instruments in existence at that date, and that all other variables, in particular interest rates, remain constant.

The stated changes represent management's assessment of reasonably possible changes in foreign exchange rates over the period until the next annual balance sheet date. The analysis is performed on the same basis for 2007.

(d) Jet fuel price risk

The Group uses approved derivative instruments such as swaps and options with approved counter-parties and within approved limits to manage the risk of fluctuations of jet fuel price. In addition, counter-party credit risk is generally restricted to any gains on changes in fair value at any time, and not the principal amount of the instrument. Therefore, the possibility of material loss arising in the event of non-performance by counter-party is considered to be unlikely.

The fair values of derivative financial instruments of the Group at the balance sheet date are as follows:

	2008		2007	
	Assets RMB million	Liabilities RMB million	Assets RMB million	Liabilities RMB million
Fuel option contracts	-	-	2	-

46 Financial risk management and fair values (continued)

(d) Jet fuel price risk (continued)

At December 31, 2007, the Group had outstanding fuel options to buy approximately 3,300,000 barrels of crude oil at prices ranging from US\$42 to US\$64 per barrel. On the other hand, the Group sold fuel put options to approved counter-party and had outstanding options at December 31, 2007 of approximately 7,800,000 barrels of crude oil at prices ranging from US\$40 to US\$54 per barrel. All the fuel option contracts expired in 2008.

(e) Credit risk

The Group's credit risk is primarily attributable to cash and cash equivalents and trade receivables.

Substantially all of the Group's cash and cash equivalents are deposited with PRC financial institutions, which management believes are of high credit quality.

A significant portion of the Group's air tickets are sold by agents participating in the Billing and Settlement Plan ("BSP"), a clearing scheme between airlines and sales agents organised by International Air Transportation Association which has insignificant credit risk to the Group. As at December 31, 2008, the balance due from BSP agents amounted to RMB641 million (2007: RMB1,238 million). The credit risk exposure to BSP and the remaining trade receivables balance are monitored by the Group on an ongoing basis and the allowance for impairment of doubtful debts is within management's expectations. Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade receivables is set out in Note 28.

(f) Fair value

(i) All financial instruments are carried at amounts not materially different from their fair values as at December 31, 2008 and 2007.

The following methods and assumptions were used to estimate the fair value for each class of financial instruments:

-Cash and cash equivalents, trade receivables, other receivables and other current assets, trade and bills payables, taxes payable and other liabilities

The carrying values approximate their fair values because of the short maturities of these instruments.

- Financial assets / liabilities

The fair values of fuel option contracts and foreign exchange forward option contracts are determined by reference to quoted market values.

- Available-for-sale equity securities

The fair value is determined based on quoted market prices without any deduction for transaction costs.

- Bank and other loans and short-term financing bills

The fair value has been estimated by applying a discounted cash flow approach using interest rates available to the Group for similar indebtedness.

Fair value estimates are made at a specific point in time and are based on relevant market information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgement and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

F-82

46 Financial risk management and fair values (continued)

(f) Fair value (continued)

(ii) The economic characteristics of the Group's finance leases vary from lease to lease. It is impractical to compare such leases with those prevailing in the market within the constraints of timeliness and cost for the purpose of estimating the fair value of such leases.

(iii) Other non-current investments represent unlisted equity securities of companies established in the PRC. There is no quoted market price for such equity securities and accordingly a reasonable estimate of the fair value could not be measured reliably.

(iv) Amounts due from / to related companies are unsecured, interest-free and have no fixed terms of repayment. Given these terms, it is not meaningful to disclose fair values of these balances.

47 Commitments

(a) Capital commitments

As at December 31, 2008, the Group had capital commitments as follows:

	2008 RMB million	2007 RMB million
Commitments in respect of aircraft and flight equipment		
- authorised and contracted for	75,639	88,742
Other commitments		
- authorised and contracted for	884	772
- authorised but not contracted for	1,958	1,686
	2,842	2,458
	78,481	91,200

As at December 31, 2008, the Group had on order 217 aircraft and certain flight equipment, scheduled for deliveries in 2009 to 2015, and deposits of RMB13,441 million have been made towards the purchase of these aircraft and related equipment. As at December 31, 2008, the approximate total future payments, including estimated amounts for price escalation through anticipated delivery dates for these aircraft and flight equipment are as follows:

	2008 RMB million	2007 RMB million
2008	-	19,125
2009	15,777	20,767
2010	19,167	20,065
2011	15,142	12,747
2012	13,893	16,038
2013 and afterwards	11,660	-
	75,639	88,742

F-83

47 Commitments (continued)

(a) Capital commitments (continued)

As at December 31, 2008, the Group's attributable share of the capital commitments of jointly controlled entities was as follows:

	2008 RMB million	2007 RMB million
Authorised and contracted for	1	1
Authorised but not contracted for	26	32
	27	33

(b) Operating lease commitments

As at December 31, 2008, the total future minimum lease payments under non-cancellable operating leases in respect of properties, aircraft and flight equipment were payable as follows:

	2008 RMB million	2007 RMB million
Payments due		
Within 1 year	4,357	3,512
After 1 year but within 5 years	15,828	13,836
After 5 years	13,632	10,831
	33,817	28,179

(c) Investing commitments

As at December 31, 2008, the Group committed to make capital contributions in respect of:

	2008 RMB million	2007 RMB million
A subsidiary	-	133

48 Contingent liabilities

(a) The Group leases from CSAHC certain land in Guangzhou and certain land and buildings in Wuhan, Haikou and Zhengzhou cities. The Group has a significant investment in buildings and other leasehold improvements located on such land. However, such land in Guangzhou and such land and buildings in Wuhan, Haikou and Zhengzhou lack adequate documentation evidencing CSAHC's rights thereto.

Pursuant to an indemnification agreement dated May 22, 1997, CSAHC has agreed to indemnify the Group against any loss or damage caused by any challenge or interference with the Group's use of these land and buildings.

48

Contingent liabilities (continued)

(b) A writ of summons was issued on May 30, 2007 by the High People's Court of Guangdong Province relating to a claim that certain sales agents in Taiwan (the "plaintiffs") against the Company for the alleged breach of certain terms and conditions of a cooperative agreement (the "cooperative agreement"). The plaintiffs have made a claim against the Company for a total sum of approximately HKD107 million and an unspecified compensation for early termination of the cooperative agreement.

In May 2008, The High People's Court of Guangdong Province rejected the claims made by the plaintiffs, and the plaintiffs were ordered to bear all litigation expenses in respect of the first trial. The plaintiffs submitted an appeal to The Supreme People's Court of the People's Republic of China.

The directors considered that the claim was without merit and had no material adverse effect on the financial position of the Group, and accordingly no provision in respect of the claims was made in the financial statements.

In May 2009, the Company received the civil judgement from The Supreme People's Court of the People's Republic of China that the plaintiffs withdrew their appeal. Accordingly, the verdict of the first trial has become final and conclusive.

(c) The Company entered into agreements with its pilot trainees and certain banks to provide guarantees on personal bank loans amounting to RMB90,858,000 (2007: RMB90,858,000) to be granted to its pilot trainees to finance their respective flight training expenses. As at December 31, 2008, an aggregate of personal bank loans of RMB13 million (2007: Nil), under these guarantees, were drawn down from the banks.

49

Non-adjusting post balance sheet events

(a) On December 10, 2008, the Company entered into the A shares subscription agreement with CSAHC, pursuant to which CSAHC conditionally agreed to subscribe and the Company conditionally agreed to allot and issue 721,150,000 new A shares at RMB3.16 each, for a total consideration of RMB2,278,834,000. On the same date, the Company and Nan Lung Holding Limited ("Nan Lung"), a wholly owned subsidiary of CSAHC entered into the H shares subscription agreement, pursuant to which Nan Lung conditionally agreed to subscribe and the Company conditionally agreed to allot and issue 721,150,000 new H shares at HK\$ equivalent of RMB1.00 each, for a total consideration of RMB721,150,000.

The subscription agreements were approved in the Extraordinary General Meeting and the respective Class Meetings of shareholders of A and H shares on February 26, 2009. On June 3, 2009, the China Securities Regulatory Commission approved the above non-public issue of H Shares. Up to the date of approval of these consolidated financial statements, the Company has not yet received an approval from the China Securities Regulatory Commission in respect of the above non-public issue of A Shares.

(b) Pursuant to a document issued jointly by the Ministry of Finance of the PRC and CAAC on January 22, 2009, "Notice of CAAC Infrastructure Development Fund contributions refund", the Group is entitled to a refund of the CAAC Infrastructure Development Fund contributions in respect of the period from July 1, 2008 to June 30, 2009. The CAAC Infrastructure Development Fund payable for the period from July 1, 2008 to December 31, 2008 of the Group amounted to approximately RMB663 million.

F-85

50

Immediate and ultimate controlling party

As at December 31, 2008, the directors of the Company consider the immediate parent and ultimate controlling party of the Group to be CSAHC, a state-owned enterprise established in the PRC. CSAHC does not produce financial statements available for public use.

51

Accounting estimates and judgements

The Groups' financial position and results of operations are sensitive to accounting methods, assumptions and estimates that underlie the preparation of the consolidated financial statements. The Group bases the assumptions and estimates on historical experience and on various other assumptions that the Group believes to be reasonable and which form the basis for making judgements about matters that are not readily apparent from other sources. On an on-going basis, management evaluates its estimates. Actual results may differ from those estimates as facts, circumstances and conditions change.

The selection of critical accounting policies, the judgements and other uncertainties affecting application of those policies and the sensitivity of reported results to changes in condition and assumptions are factors to be considered when reviewing the financial statements. The principal accounting policies are set forth in Note 2. The Group believes the following critical accounting policies involve the most significant judgements and estimates used in the preparation of the consolidated financial statements.

(a)

Impairment of long-lived assets

If circumstances indicate that the net book value of a long-lived asset may not be recoverable, this asset may be considered "impaired", and an impairment loss may be recognised in accordance with IAS 36, Impairment of Assets. The carrying amounts of long-lived assets are reviewed periodically in order to assess whether the recoverable amounts have declined below the carrying amounts. These assets are tested for impairment whenever events or changes in circumstances indicate that their recorded carrying amounts may not be recoverable. When such a decline has occurred, the carrying amount is reduced to the recoverable amount. The recoverable amount is the greater of the net selling price and the value in use. In determining the value in use, expected cash flows generated by the asset are discounted to their present value, which requires significant judgement relating to the level of traffic revenue and the amount of operating costs. The Group uses all readily available information in determining an amount that is a reasonable approximation of recoverable amount, including estimates based on reasonable and supportable assumptions for projections of traffic revenue and amount of operating costs.

(b)

Depreciation

Property, plant and equipment are depreciated on a straight-line basis over the estimated useful lives, after taking into account the estimated residual value. The Group reviews the estimated useful lives of assets regularly in order to determine the amount of depreciation expense to be recorded during any reporting period. The useful lives are based on the Group's historical experience with similar assets and taking into account anticipated technological changes. The depreciation expense for future periods is adjusted if there are significant changes from previous estimates.

F-86

The comparative figures represent figures at December 31, 2007 and for the years ended December 31, 2007 and 2006. Certain comparative figures have been adjusted as a result of adopting IFRIC 13, Customer Loyalty Programmes (Note 3). In addition, certain comparative figures have been reclassified to conform with current year's presentation.

53 Possible impact of amendments, new standards and interpretations issued but not yet effective for the year ended December 31, 2008

Up to the date of issue of these consolidated financial statements, the IASB has issued a number of amendments, new standards and interpretations which are not yet effective for the year ended December 31, 2008 and which have not been adopted in these consolidated financial statements, except for the early adoption of IFRIC 13 as disclosed in Note 3.

The Group is in the process of making an assessment of what the impact of these amendments, new standards and new interpretations is expected to be in the period of initial application.

So far it has concluded that the adoption of them (except for IFRIC 13, as disclosed in Note 3) is unlikely to have a significant impact on the Group's results of operations and financial position.

In addition, the following developments are expected to result in amended disclosures in the financial statements, including restatement of comparative amounts in the first period of adoption:

	Effective for accounting period beginning on or after
IFRS 8, Operating Segments	January 1, 2009
IAS 1 (Revised), Presentation of Financial Statements	January 1, 2009
Amendments to IFRS 7, Financial instruments:	January 1, 2009
Disclosures – improving disclosures about financial Instruments	

The particulars of the Group's principal subsidiaries as of December 31, 2008 are as follows:

Name of company	Place of establishment / operation	Registered capital	Proportion of ownership interest held by the Company	Principal activities
Shantou Airlines Company Limited (a)	PRC	RMB280,000,000	60%	Airline
Chongqing Airlines Company Limited (a)	PRC	RMB1,200,000,000	60%	Airline
Zhuhai Airlines Company Limited (a)	PRC	RMB250,000,000	60%	Airline
Xiamen Airlines Company Limited (a)	PRC	RMB1,200,000,000	60%	Airline
Guizhou Airlines Company Limited (a)	PRC	RMB80,000,000	60%	Airline
Nan Lung International Freight Limited	HK	HKD3,270,000	51%	Freight services
Guangzhou Air Cargo Company Limited (a)	PRC	RMB238,000,000	70%	Cargo services
Guangzhou Baiyun International Logistic Company Limited (a)	PRC	RMB50,000,000	61%	Logistics operations
China Southern Airlines Group Air Catering Company Limited (a)	PRC	RMB10,200,000	100%	Air catering
Guangzhou Nanland Air Catering Company Limited ("Nanland") (b)	PRC	RMB120,000,000	55%	Air catering
China Southern West Australian Flying College Pty Limited	Australia	AUD100,000	91%	Pilot training services
Xinjiang Civil Aviation Property Management Limited (a)	PRC	RMB251,332,832	51.8%	Property management

(a) These subsidiaries are PRC limited liability companies.

(b) This subsidiary is Sino-foreign equity joint venture company established in the PRC.

(c) Certain of the Group's subsidiaries are PRC joint ventures which have limited lives pursuant to the PRC law.

Associates and jointly controlled entities

The particulars of the Group's principal associates and jointly controlled entities as of December 31, 2008 are as follows:

Name of company	Place of establishment/ operation	Group's effective interest	Proportion of ownership interest held by		Principal activities
			The Company	Subsidiaries	
Guangzhou Aircraft Maintenance Engineering Company Limited (a)	PRC	50%	50%	-	Provision of aircraft repair and maintenance services
China Southern Airlines Group Finance Company Limited	PRC	34%	21.1%	12.9%	Provision of financial services
Sichuan Airlines Corporation Limited	PRC	39%	39%	-	Airline
MTU Maintenance Zhuhai Co., Limited (a)	PRC	50%	50%	-	Provision of engine repair and maintenance services
Zhuhai Xiang Yi Aviation Technology Company Limited (a)	PRC	51%	51%	-	Provision of flight simulation services
Beijing Southern Airlines Ground Services Company Limited (a)	PRC	50%	50%	-	Provision of airport ground services
Guangzhou China Southern Zhongmian Dutyfree Store Co., Limited (a)	PRC	50%	50%	-	Sales of duty free goods in flight

(a) These are jointly controlled entities.

(b) Certain of the Group's jointly controlled entities are PRC joint ventures which have limited lives pursuant to the PRC law.
