To the Shareholders

Dear Sir or Madam,

MAJOR TRANSACTION
ABSORPTION OF SHANGHAI AIRLINES

1. INTRODUCTION

Reference is made to the announcement of the Company dated 10 July 2009 (the "Announcement") in relation to, among other things, the proposed absorption of Shanghai Airlines.

LETTER FROM THE BOARD

On 10 July 2009, the Company entered into the Absorption Agreement with Shanghai Airlines in relation to the Absorption Proposal. The Absorption Proposal, if fully implemented, will involve the issue of a maximum of 1,694,838,860 A Shares by the Company to the SA Shareholders on a record date to be determined and announced by the Company and Shanghai Airlines, in exchange for all the existing issued shares of Shanghai Airlines.

The purposes of this circular are, among other things:

- (1) to provide you with further information in relation to the proposed absorption; and
- (2) to give you notices of the EGM and the H Shareholders Class Meeting to consider and, if thought fit, to approve resolutions in relation to, among other things, the Absorption Proposal.

2. THE ABSORPTION PROPOSAL

The Exchange Ratio

The Company will exchange in aggregate a maximum of 1,303,722,200 SA Shares in the issued share capital of Shanghai Airlines by an issue of a maximum of 1,694,838,860 A Shares, meaning that for every SA Share, 1.3 A Shares will be issued. The Exchange Ratio has been determined on the following basis:

- (1) the price per SA Share was determined at RMB5.50 based on the average trading price of SA Shares for a period of 20 trading days up to and including 5 June 2009, being the last trading day immediately before the suspension of trading of SA Shares on the Shanghai Stock Exchange pending release of an announcement of the Company in relation to the proposed negotiation on the terms of the Absorption Proposal;
- (2) the price per A Share was determined at RMB5.28 based on the average trading price per A Share for a period of 20 trading days up to and including 5 June 2009, being the last trading day immediately before the suspension of trading of A Shares on the Shanghai Stock Exchange pending release of an announcement of the Company in relation to the proposed negotiation on the terms of the Absorption Proposal; and
- (3) based on a risk premium of approximately 25%, for every SA Share, 1.3 A Shares will be issued, and for the avoidance of doubt, such risk premium is only available to those SA Shareholders who elect to exchange their SA Shares for A Shares.

In determining the level of the risk premium and the Exchange Ratio, the Company has taken into consideration factors including: (i) uncertainty in the fluctuation of the share prices of the Company that the SA Shareholders will have to face; (ii) the financial situation of Shanghai Airlines; (iii) the synergy effect that will be brought to bear on the business of the Company such as the ability to establish economies of scale, the increase in the market share of the Company in the air transportation market in Shanghai and the integrating of the flight route network and marketing network of the Company and Shanghai Airlines.

LETTER FROM THE BOARD

Rights of the Dissenting Shareholders

Subject to the Absorption Proposal becoming unconditional, the SA Dissenting Shareholders may elect to exercise the Cash Alternative to receive cash at the rate of RMB5.50 per SA Share. Such rate is determined based on the average trading price of SA Shares during the Price Fixing Period. The Cash Alternative will be provided by the Cash Alternative Provider. The SA Dissenting Shareholder who opts for the Cash Alternative should, within the Cash Alternative Declaring Period, declare altogether the Effective Dissenting Votes such SA Dissenting Shareholder owns.

Subject to the Absorption Proposal becoming unconditional, the CEA Dissenting Shareholders may elect to exercise the Buy-back Alternative to receive cash at the rates of RMB5.28 per A Share and HK\$1.56 per H Share. Such rates are determined by reference to the average trading prices of A Shares and average trading prices of H Shares respectively during the Price Fixing Period. The Buy-back Alternative will be provided by the Buy-back Alternative Provider. The CEA Dissenting Shareholder who opts for the Buy-back Alternative should, within the Buy-back Alternative Declaring Period, declare altogether the Effective Dissenting Votes such CEA Dissenting Shareholder owns.

The cash to be received by a CEA Dissenting Shareholder who opts for the Buy-back Alternative is determined at a rate by reference to the average trading prices of A Shares and the average trading prices of H Shares respectively during the Price Fixing Period. The Board considers the Buy-back Alternative fair and reasonable and in the interest of the Shareholders as a whole.

Please also refer to paragraph 14 “Investors whose H Shares held by nominee or trustee and holders of ADRs dissenting the Absorption Proposal” of Appendix V “General Information” of this circular for more information relating to the Buy-back Alternative.

Absorption of Assets and Assumption of Liabilities

Upon full implementation of the Absorption Proposal, all the assets, business, staff and rights of Shanghai Airlines will be absorbed into and all the liabilities of Shanghai Airlines will be assumed by the Company or a wholly owned subsidiary of the Company to be used to absorb all the assets and assume all the liabilities of Shanghai Airlines pursuant to the Absorption Proposal.

To facilitate the obtaining of consents to the proposed absorption by the creditors of Shanghai Airlines and subject to the Absorption Proposal becomes unconditional, the Company may, if so required by the creditors of Shanghai Airlines, provide guarantees to those creditors of Shanghai Airlines in relation to all the relevant liabilities and contingent liabilities of Shanghai Airlines arising out of its provision of guarantees to other companies, which will be assumed by the Company or its wholly owned subsidiary to be used to absorb all the assets and assume all the liabilities of Shanghai Airlines. As of 30 June 2009, the total liabilities of Shanghai Airlines (prepared in accordance with PRC accounting regulations) amounts to approximately RMB13.35 billion and the amount of guarantees provided by Shanghai Airlines to other companies amounts to approximately RMB126.50 million (details of which please refer to Appendix I of this circular). The total amount of guarantee that the Company is to provide is expected to be not more than RMB13,481,053,813.65. Further announcement(s) will be made by the Company if required by the Listing Rules when the details of such guarantee(s) become available.

LETTER FROM THE BOARD

Shanghai Airlines shall deliver all its assets and, with the assistance of the Company, handle all the relevant registration and filing procedures within 4 months after the coming into effect of the Absorption Agreement, including but not limited to the registration and filing procedures in relation to the title to real property, intellectual property, shares and aircraft.

3. THE ABSORPTION AGREEMENT

On 10 July 2009, the Company entered into the Absorption Agreement with Shanghai Airlines in relation to the Absorption Proposal. In addition to the terms set out in section 2 above, the major terms and conditions of the Absorption Agreement include:

Parties	The Company and Shanghai Airlines.
---------	------------------------------------

Consideration	The Company will exchange in aggregate a maximum of 1,303,722,200 SA Shares in the issued share capital of Shanghai Airlines by an issue of a maximum of 1,694,838,860 A Shares, meaning that for every SA Share, 1.3 A Shares will be issued.
---------------	--

Subject to the Absorption Proposal becoming unconditional, the SA Dissenting Shareholders may elect to exercise the Cash Alternative to receive cash at the rate of RMB5.50 per SA Share, such rate is determined based on the average trading price of SA Shares during the Price Fixing Period. The Cash Alternative will be provided by the Cash Alternative Provider.

Conditions Precedents	The Absorption Agreement and the transactions contemplated thereunder shall become effective upon satisfaction of the following conditions:
--------------------------	---

- (1) obtaining the approvals from (i) the Shareholders at the shareholders' meeting and the respective class meetings of the Company convened for such purpose; and (ii) the SA Shareholders at the shareholders' meeting of Shanghai Airlines convened for such purpose;
- (2) obtaining the requisite consents and approvals from the State-owned Assets Administration Commission, the relevant governing authorities of the civil aviation industry, the Ministry of Commerce and CSRC; and
- (3) obtaining the waiver from CSRC in relation to the requirement of a general offer by CEA Holding (if applicable).

LETTER FROM THE BOARD

Re-negotiation of the exchange ratio In the event that a notice for convening the shareholders' meetings of the Company for purpose of approving the Absorption Proposal cannot be despatched to the Shareholders within 6 months after 10 July 2009, the Company and Shanghai Airlines shall hold other meetings of their respective board of directors to further discuss and determine the absorption proposal.

Termination The Company and Shanghai Airlines shall use their best endeavors to procure the conditions precedents to be satisfied upon the later of: (i) 12 months after the shareholders' meetings of both the Company and Shanghai Airlines have approved the Absorption Agreement and the transactions contemplated thereunder; or (ii) otherwise agreed in writing by the parties (the "Prescribed Period").

If the conditions precedents cannot be fully satisfied or otherwise waived by the parties and the parties cannot reach an agreement on the extension of the Prescribed Period within 90 days after the expiration of the Prescribed Period, the Absorption Agreement shall be terminated automatically.

As at the Latest Practicable Date, except the approval from the State-owned Assets Administration Commission in relation to Absorption Proposal has been obtained, none of the other conditions precedents have been satisfied.

4. EFFECTS OF THE ABSORPTION PROPOSAL

The Absorption Proposal will involve the issue of A Shares at the Exchange Ratio by the Company to the SA Shareholders in exchange for SA Shares held by them. Subject to the approval of the CSRC and the Shanghai Stock Exchange, the A Shares to be issued for the purpose of the Absorption Proposal will be listed on the Shanghai Stock Exchange.

If the Absorption Proposal is implemented, a maximum total of 1,694,838,860 A Shares will be issued in exchange for SA Shares. Upon full implementation of the Absorption Proposal (assuming no other shares of the Company are to be issued between the Latest Practicable Date and implementation of the Absorption Proposal), the maximum total issued share capital of the Company will be 9,436,538,860 shares, comprising 3,004,325,000 H Shares and maximum 6,432,213,860 A Shares, representing approximately 31.84% and 68.16%, respectively, of the total issued share capital of the Company as enlarged by the issue of A Shares pursuant to the Absorption Proposal.

The A Shares issued to the SA Shareholders pursuant to the Absorption Proposal will be freely tradable and subject to certain lock-up arrangements applicable to certain substantial shareholders among the existing SA Shareholders. Details of such lock-up arrangements are currently not known. They are yet to be determined in due course through consultation with relevant PRC regulatory authorities. Further announcement(s) will be made by the Company when details of the lock-up arrangements have been determined.

LETTER FROM THE BOARD

5. REASONS FOR AND BENEFITS OF THE ABSORPTION PROPOSAL

The reasons for and benefits of the Absorption Proposal are:

The Company aims to optimize its airlines network, improve the operating efficiency of its resources, effectively reduce its operating costs, enhance its profitability and better serve the World Exposition to be held in Shanghai through the absorption of Shanghai Airlines. The absorption will expand the operations of the Company, improve its profitability, with a view to enhancing the interests of the Shareholders as a whole. Specifically, the absorption aims to achieve the following purposes:

(1) Strengthening the competitiveness of the Company

China has become one of the largest air transportation markets in the world. However, comparing to the leading international airlines in the world, the air transportation industry of China is still lacking in competitiveness due to its inability to establish economies of scale. The absorption will enable the Company to expand its market share in the air transportation market in Shanghai which is a transportation hub, increase the number of joint flights, expand its market coverage and facilitate the realization of the Company's strategic objective of positioning itself as an hub-networking air transportation company.

(2) Attaining synergy through integration of the resources

The Company and Shanghai Airlines are both airline carriers with Shanghai as their bases. There has been for a long time overlapping in the resources input into route operations and flights and aircraft services as the two companies run independently. With the absorption, the two companies can attain synergy in their use of aircraft fuel, purchases of aircraft, aircraft repair and maintenance, flight equipment, etc. In addition, they can realize the optimization of the route plans and flight schedules, enhancement of route network structure and improvement of transport efficiency. Accordingly, the operating costs and management fees can be reduced and the profitability can be improved.

(3) Promoting the evolution of Shanghai international air transportation centre

The implementation of the strategy of the Shanghai airport hub is vital for Shanghai to become an essential integral part of the international air transportation centre. The absorption will enable the Company to enhance its route network and number of aircraft. Meanwhile, a stronger based airline company can expedite the emergence of the Shanghai airport hub, which in turn will promote the evolution of Shanghai as an international air transportation centre.

Clearly, the above benefits more than outweigh the impact from the recent loss-making financial position of Shanghai Airlines. The Board believes that the terms of the Absorption Proposal are fair and reasonable and are in the interests of the Shareholders as a whole.

LETTER FROM THE BOARD

6. FINANCIAL IMPACT OF THE ABSORPTION

According to the Company's audited financial statements as at and for the year ended 31 December 2008 prepared in accordance with IFRS, the consolidated total assets of the Company amounted to RMB73.05 billion as at 31 December 2008, with a liabilities-to-assets ratio of 117.26%. According to the interim results announcement of the Company dated 10 August 2009, the unaudited consolidated total assets of the Company as at 30 June 2009 amounted to RMB72.84 billion, with a liabilities-to-assets ratio of 106.27%. Assuming the absorption of Shanghai Airlines were completed on 30 June 2009, the unaudited consolidated total assets of the Company on a pro forma basis would have increased to RMB97.63 billion, and the liabilities-to-assets ratio would have decreased to 95.46%. Upon completion of the absorption, the Company will become more financially secured and better shielded against risks, and its sustainable development in the future will be safeguarded.

Note: The financial data of Shanghai Airlines and the Company for the six months ended 30 June 2008 and the financial data of the Company for the six months ended 30 June 2009 are unaudited. Loss for the year ended 31 December 2006 attributable to the equity holders of the Company is restated according to the latest accounting policies adopted by the Company as further explained on page 104 of this circular. Other than the above, the remainders set out above represent audited data.

Upon completion of the absorption when all of the assets, liabilities, business operations and human resources of Shanghai Airlines will be consolidated to the Company, the scale of revenue of the Company will increase. In recent years, factors including the change in the overall economic landscape, the substantial fluctuation in international oil prices and the occurrence of natural disasters and unexpected circumstances in the PRC have contributed to a large fluctuation in the operating results of PRC domestic airlines including Shanghai Airlines and the Company. Upon completion of the absorption, the synergy in terms of sales and marketing, operating settlement, cost control and information infrastructure will provide positive impact to the future operating results of the Company.

7. IMPLICATIONS OF THE LISTING RULES

To the best knowledge, information and belief of the Directors having made all reasonable enquiry, Shanghai Airlines and its beneficial owners (Shanghai Alliance Investment Limited, Bank of China Group Investment Limited and Jin Jiang International) are parties independent of the Company and independent of the connected persons of the

Company. To the best knowledge, information and belief of the Directors having made all reasonable enquiry, the ultimate beneficial owners of Shanghai Alliance Investment Limited, Bank of China Group Investment Limited and Jin Jiang International are not connected persons of the Company. The transactions contemplated under the Absorption Proposal do not constitute connected transactions of the Company.

LETTER FROM THE BOARD

The highest “size tests” percentage ratio applicable to the relevant share exchange through the Absorption Proposal is more than 25% but less than 100%. As a result, the Absorption Proposal will constitute a major transaction of the Company under Rule 14.06(3) of the Listing Rules. Further, the issue of A Shares pursuant to the Absorption Proposal will constitute a variation of class rights of the holders of A Shares and the holders of H Shares under the Articles of Association.

Pursuant to Rule 14.06(3), Rule 19A.38 of the Listing Rules and the Articles of Association, the Absorption Proposal is required to be approved by the Shareholders at a general meeting and separate class meetings. No Shareholder will be required to abstain from voting at any shareholders’ meeting to approve the Absorption Proposal.

8. SHAREHOLDING STRUCTURE OF THE COMPANY

As at the date of Latest Practicable Date, the shareholding structure of the Company is as follows:

Note: The percentages shown are rounded to the nearest 2 decimal places.

LETTER FROM THE BOARD

Immediately after the full implementation of the Absorption Proposal (assuming that no other Shares has been issued after the Latest Practicable Date until the full implementation of the Absorption Proposal), it is anticipated that the shareholding structure of the Company will be as follows:

Note: The percentages shown are rounded to the nearest 2 decimal places.

The percentages shown are based on the assumption that none of the SA Shareholders or the Shareholders opts for the Cash Alternative or the Buy-back Alternative (as the case may be) pursuant to the Absorption Proposal.

As such, full implementation of the Absorption Proposal will not result in change of control of the Company.

9. RANKING OF NEW A SHARES TO BE ISSUED

The new A Shares to be issued pursuant to the Absorption Proposal will rank, upon issue, pari passu in all respects with the A Shares in issue at the time of issue and allotment of such new A Shares.

10. INFORMATION ABOUT THE PARTIES

The Company is an international airline company incorporated in the PRC whose H Shares, A Shares and ADRs are listed on the Stock Exchange, the Shanghai Stock Exchange and the New York Stock Exchange, Inc., respectively. The following is the text of a report received from the Company's reporting accountant, PricewaterhouseCoopers, Certified Public Accountants, Hong Kong for the purpose of incorporation into this circular.

The Directors
China Eastern Airlines Corporation Limited

Dear Sirs

We set out below our report on the financial information (the "Financial Information") of Shanghai Airlines Co., Ltd. (the "Target Company") and its subsidiaries (together, the "Target Group") set out in Sections I to III below, for inclusion in the circular of China Eastern Airlines Corporation Limited (the "Company") dated 25 August 2009 (the "Circular") in connection with the proposed acquisition of the Target Company by the Company (the "Proposed Acquisition"). The Financial Information comprises the consolidated balance sheets of the Target Group as at 31 December 2006, 2007 and 2008 and 30 June 2009, the balance sheets of the Target Company as at 31 December 2006, 2007 and 2008 and 30 June 2009, and the consolidated statements of comprehensive income, the consolidated statements of changes in equity and the consolidated cash flow statements of the Target Company for each of the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2008 and 2009 (the "Relevant Periods"), and a summary of significant accounting policies and other explanatory notes.

The Target Company was established in the People's Republic of China (the "PRC") as a limited liability company on 25 October 2000. As at the date of this report, the Target Company has direct and indirect interests in subsidiaries, associated companies and joint controlled entities as set out in Notes 20, 21 and 22 of Section II below. All of these companies are private companies. The consolidated financial statements of the Target Company prepared in accordance with the Accounting Standards for Business Enterprises and the Accounting System for Business Enterprises in the PRC for the year ended 31 December 2006 and the consolidated financial statements of the Target Company prepared in accordance with the Accounting Standards for Business Enterprises (2006) of the PRC for the each of the years ended 31 December 2007 and 2008 and six months ended 30 June 2009 were audited by Shulun Pan Certified Public Accountants Co., Ltd..

For the purpose of this report, the directors of the Company have prepared the consolidated financial statements of the Target Company for the Relevant Periods (the "Underlying Financial Statements") in accordance with International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board. We have audited the Underlying Financial Statements for each of the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009 in accordance with International Standards on Auditing. The Financial Information has been prepared based on the Underlying Financial Statements with no adjustment made thereon.

DIRECTORS' RESPONSIBILITY

The directors of the Target Company during the Relevant Periods are responsible for the preparation and the true and fair presentation of the consolidated financial statements of the Target Company in accordance with the Accounting Standards for Business Enterprises and the Accounting System for Business Enterprises in the PRC or the Accounting Standards for Business Enterprises (2006) of the PRC as appropriate. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of the consolidated financial statements of the Target Company that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

For the Financial Information for each of the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, the directors of the Company are responsible for the preparation and the true and fair presentation of the Financial Information in accordance with IFRS. This responsibility includes designing, implementing and maintaining internal control relevant to the preparation and the true and fair presentation of the Financial Information that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

For the Financial Information for the six months ended 30 June 2008, the directors of the Company are responsible for the preparation and the presentation of the Financial Information in accordance with the accounting policies set out in Note 2 of Section II below which are in conformity with IFRS.

REPORTING ACCOUNTANT'S RESPONSIBILITY

For the Financial Information for each of the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, our responsibility is to express an opinion on the Financial Information based on our examination and to report our opinion to you. We examined the Underlying Financial Statements used in preparing the Financial Information, and carried out such additional procedures as we considered necessary in accordance with the Auditing Guideline 3.340 "Prospectuses and the Reporting Accountant" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA").

For the Financial Information for the six months ended 30 June 2008, our responsibility is to express a conclusion on the Financial Information based on our review and to report our conclusion to you. We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of the Financial Information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI
AIRLINES

OPINION AND REVIEW CONCLUSION

In our opinion, the Financial Information for each of the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, for the purpose of this report, gives a true and fair view of the state of affairs of the Target Company and of the Target Group as at 31 December 2006, 2007 and 2008 and 30 June 2009 and of the Target Group's results and cash flows for the respective years and period then ended.

Based on our review, which does not constitute an audit, nothing has come to our attention that causes us to believe that the Financial Information for the six months ended 30 June 2008, for the purpose of this report, is not prepared, in all material respects, in accordance with the accounting policies set out in Note 2 of Section II below which are in conformity with IFRS.

II. NOTES TO THE FINANCIAL INFORMATION

1. GENERAL INFORMATION

The Target Company, a joint stock company limited by shares, was established in the PRC on 25 October 2000. The Target Company listed its A shares on The Shanghai Stock Exchange on 11 October 2002. The registered address of the Target Company is 100 Airport Street, Pudong International Airport, Shanghai, the PRC.

The Target Group is principally engaged in the operation of civil aviation, including the provision of passenger, cargo, and mail delivery, other extended transportation services, export and import trading, tour operations and the provision of freight forwarding services, etc.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of the Financial Information are set out below. These policies have been consistently applied to the Relevant Periods presented, unless otherwise stated.

(a) Basis of preparation

The Financial Information has been prepared in accordance with International Financial Reporting Standards (“IFRS”). It has been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of Financial Information in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Target Company’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the Financial Information are disclosed in Note 4.

In preparing the Financial Information, the Company’s directors have given careful consideration to the going concern status of the Target Group in the context of the Target Group’s current working capital requirements.

The Target Group’s accumulated losses were approximately RMB2,347 million as at 30 June 2009 and its current liabilities exceeded its current assets by approximately RMB7,059 million. Against this background, the Target Company’s management has taken active steps to seek additional sources of finance to improve the Target Group’s liquidity position. At 30 June 2009, the Target Group had total un-used contracted credit facilities of approximately RMB14.9 billion from banks.

Based on the Target Group’s history of obtaining finance and generating cash from operation, the Company’s directors believes that the Target Group will be able to generate/obtain sufficient operating funds/financing to enable it to operate and meet its liabilities as and when they fall due. Accordingly, the Company’s directors consider it is appropriate that the Financial Information should be prepared on a going concern basis and do not include any adjustments that would be required should the Target Company and the Target Group fail to continue as a going concern.

The following standards, interpretations and amendments to existing standards which are relevant to the Target Group’s operations but are not yet effective for the Relevant Periods and have not been early adopted by the Target

Group:

- IAS 27 (Revised) “Consolidated and Separate Financial Statements” (effective from annual period beginning on or after 1 July 2009). The amendment requires non-controlling interests (i.e. minority interests) to be presented in the consolidated statement of financial position within equity, separately from the equity of the owners of the parent. Total comprehensive income must be attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance. Changes in a parent’s ownership interest in a subsidiary that do not result in the loss of control are accounted for within equity. When control of a subsidiary is lost, the assets and liabilities and related equity components of the former subsidiary are derecognised. Any gain or loss is recognised in profit or loss. Any investment retained in the former subsidiary is measured at its fair value at the date when control is lost. The Target Group will apply IAS 27 (Revised) from 1 January 2010.

– 25 –

- IFRS 3 (Revised) “Business Combinations” (effective for business combinations with acquisition date on or after the beginning of the first annual reporting period beginning on or after 1 July 2009). The amendment may bring more transactions into acquisition accounting as combinations by contract alone and combinations of mutual entities are brought into the scope of the standard and the definition of a business has been amended slightly. It now states that the elements are “capable of being conducted” rather than “are conducted and managed”. It requires considerations (including contingent consideration), each identifiable asset and liability to be measured at its acquisition-date fair value, except leases and insurance contracts, reacquired right, indemnification assets as well as some assets and liabilities required to be measured in accordance with other IFRSs. They are income taxes, employee benefits, share-based payment and non current assets held for sale and discontinued operations. Any non-controlling interest in an acquiree is measured either at fair value or at the non-controlling interest’s proportionate share of the acquiree’s net identifiable assets. All acquisition related cost should be expensed. The Target Group will apply IFRS 3 (Revised) prospectively to all business combinations from 1 January 2010.
- Amendment to IFRS 8 “Operating segments”, effective for periods beginning on or after 1 January 2010. Disclosure of information about total assets and liabilities for each reportable segment is required only if such amounts are regularly provided to the CODM. The Target Group will apply IFRS 8 (amendment) from 1 January 2010.
- Amendment to IAS 7 “Statement of cash flows”, effective for periods beginning on or after 1 January 2010. Only expenditures that result in a recognised asset are eligible for classification as investing activities. The Target Group will apply IAS 7 (amendment) from 1 January 2010.
- Amendment to IAS 17 “Leases”, effective for periods beginning on or after 1 January 2010. The amendment removes the specific guidance on the classification of long-term leases of land as operating leases. When classifying land leases, the general principles applicable to the classification of leases should be applied. The classification of land leases has to be reassessed on adoption of the amendment on the basis of information existing at inception of the leases. The Target Group will apply IAS 17 (amendment) from 1 January 2010.
- Amendment to IAS 36 “Impairment of assets”, effective for periods beginning on or after 1 January 2010. This clarifies that the largest unit permitted for the goodwill impairment test is the lowest level of operating segment before any aggregation as defined in IFRS 8. The Target Group will apply IAS 36 (amendment) from 1 January 2010.
- Amendment to IAS 38 “Intangible assets”, effective for periods beginning on or after 1 July 2009. This clarifies the description of the valuation techniques commonly used to measure intangible assets acquired in a business combination when they are not traded in an active market. In addition, an intangible asset acquired in a business combination might be separable but only together with a related contract, identifiable asset or liability. In such cases, the intangible asset is recognised separately from goodwill but together with the related item. The Target Group will apply IAS 38 (amendment) from 1 January 2010.
- Amendment to IAS 39 “Financial instruments: recognition and measurement”, effective for periods beginning on or after 1 January 2010. Loan prepayment penalties are treated as closely related embedded derivatives, only if the penalties are payments that compensate the lender for loss of interest by reducing the economic loss from reinvestment risk. In addition, the scope exemption to business combination contracts only applies to forward contracts that are firmly committed to be completed between the acquirer and a selling shareholder to buy or sell an acquiree in a business combination at a future acquisition date. Therefore option contracts are not in this scope exemption. This amendment also clarifies that in a cash flow hedge of a forecast transaction that a reclassification of

the gains or losses on the hedged item from equity to profit or loss is made during the period the hedged forecast cash flows affect profit or loss. The Target Group will apply IAS 39 (amendment) from 1 January 2010.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

- Amendment to IFRIC 9 ‘‘Reassessment of embedded derivatives’’, effective for periods beginning on or after 1 July 2009. This amendment aligns the scope of IFRIC 9 to the scope of IFRS 3 (revised): the interpretation does not apply to embedded derivatives in contracts acquired in a business combination, a common control combination or the formation of a joint venture. The Target Group will apply IFRIC 9 (amendment) from 1 January 2010.

(b)

Consolidation

The Financial Information includes the financial statements of the Target Company and all of its subsidiaries made up in the Relevant Periods.

(i)

Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Target Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Target Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Target Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Target Group. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest.

The excess of the cost of acquisition over the fair value of the Target Group’s share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the profit and loss in the consolidated statement of comprehensive income.

Inter-company transactions, balances and unrealised gains on transactions between Target Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Target Group.

In the Target Company’s balance sheet, the investments in subsidiaries are stated at cost less provision for impairment losses (Note 2(m)). The results of subsidiaries are accounted for by the Target Company on the basis of dividend received and receivable.

(ii)

Associates

Associates are all entities over which the Target Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. The Target Group’s investments in associates includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The Target Group's share of its associates' post-acquisition profits or losses is recognised in the consolidated statement of comprehensive income, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Target Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Target Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

– 27 –

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

Unrealised gains on transactions between the Target Group and its associates are eliminated to the extent of the Target Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Target Group.

Dilution gains and losses in associates are recognised in the consolidated statement of comprehensive income.

In the Target Company's balance sheet, the investments in associates are stated at cost less provision for impairment losses (Note 2(m)). The results of associates are accounted for by the Target Company on the basis of dividend received and receivable.

(iii) Jointly controlled entities

A jointly controlled entity is an entity in which the Target Group has joint control over its economic activity established under a contractual arrangement. The Target Group's investments in jointly controlled entities include goodwill (net of any accumulated impairment loss) identified on acquisition.

The Target Group's interests in jointly controlled entities are accounted for using the equity method of accounting based on the audited financial statements or management accounts of the jointly controlled entities. The Target Group's share of its jointly controlled entities' post-acquisition profits or losses is recognised in the consolidated statement of comprehensive income, and its share of post-acquisition movements is adjusted against the carrying amount of the investment. When the Target Group's share of losses in a jointly controlled entity equals or exceeds its interest in that entity, including any other unsecured receivables, the Target Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the jointly controlled entity.

The Target Group recognises the portion of gains or losses on the sale of assets by the Target Group to the joint venture that it is attributable to the other venturers. The Target Group does not recognise its share of profits or losses from the joint venture that result from the Target Group's purchase of assets from the jointly controlled entity until it resells the assets to an independent party. However, a loss on the transaction is recognised immediately if the loss provides evidence of a reduction in the net realisable value of current assets, or an impairment loss.

In the Target Company's balance sheet, the investments in jointly controlled entities are stated at cost less provision for impairment losses (Note 2(m)). The results of jointly controlled entities are accounted for by the Target Company on the basis of dividends received and receivable.

(c) Segmental reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the steering committee that makes strategic decisions.

(d) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Target Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The Financial Information are presented in Chinese Renminbi ("RMB"), which is the Target Company's functional and presentation currency.

- 28 -

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the profit and loss in the statement of comprehensive income, except when deferred in equity as qualifying cash flow hedges or qualifying net investment hedges.

(e) Revenue recognition and sales in advance of carriage

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and the provision of services in the ordinary course of the Target Group's activities. Revenue is shown net of business and value-added taxes, returns, rebates and discounts and after eliminating sales within the Target Group.

The Target Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Target Group's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The Target Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(i) Traffic revenues

Passenger, cargo and mail revenues are recognised as traffic revenues when the transportation services are provided. The value of sold but unused tickets is recognised as sales in advance of carriage ("SIAC").

(ii) Tour operation revenues

Revenues from tour and travel services and other travel related services to recognised when the services are rendered.

(iii) Other revenue

Revenues from other operating businesses, including income derived from the provision of ground services, cargo handling services and freight forwarding are recognised when the services are rendered.

Revenue from the sale of goods in connection with the import and export business is recognised when the significant risks and rewards of ownership have been transferred to the customer and collectability of the related receivables is reasonably assured. This is usually taken as the time when the goods are delivered and the customer has accepted the goods.

(f) Government grants

Grants from the Government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Target Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in the profit and loss in the statement of comprehensive income over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property, plant and equipment are included in non-current liabilities as deferred government grants and are credited to the profit and loss in the statement of comprehensive income on a straight-line basis over the expected lives of the related assets.

– 29 –

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(g) Maintenance and overhaul costs

In respect of aircraft and engines under operating leases, the Target Group has the responsibility to fulfill certain return conditions under the leases. Provision for the estimated cost of these return condition checks is made on a straight line basis over the term of the leases. Costs incurred for periodic overhauls during the lease periods are charged to profit and loss in the statement of comprehensive income as and when incurred.

In respect of aircraft and engines owned by the Target Group or held under finance leases, overhaul costs are capitalised as a component of property, plant and equipment and are depreciated over the appropriate maintenance cycles (Note 2(1)).

All other repairs and maintenance costs are charged to profit and loss in the statement of comprehensive income as and when incurred.

(h) Interest income

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Target Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

(i) Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset, including the interest attributable to loans for advance payments used to finance the acquisition of aircraft, are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Other borrowing costs are expensed as incurred.

(j) Current and deferred income tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the jurisdictions where the Target Company and its subsidiaries, associates and jointly controlled entities operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Target Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(k)

Intangible assets

Intangible assets represent acquired computer software licenses which are capitalised on the basis of the costs incurred to acquire and being to use the specific software. These costs are amortised using the straight-line method over their estimated useful lives.

– 30 –

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(l) Property, plant and equipment

Property, plant and equipment is recognised initially at cost which comprises purchase price, and any directly attributable costs of bringing the assets to the condition for their intended use.

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately.

When each major aircraft overhaul is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment and is depreciated over the appropriate maintenance cycles. Components related to airframe overhaul cost, are depreciated on a straight-line basis over 5 to 7.5 years. Components related to engine overhaul costs, are depreciated between each overhaul period using the ratio of actual flying hours and estimated flying hours between overhauls. Upon completion of an overhaul, any remaining carrying amount of the cost of the previous overhaul is derecognised and charged to profit and loss in the statement of comprehensive income.

Except for components related to aircraft overhaul costs, the depreciation method of which has been described in the preceding paragraph, other depreciation of property, plant and equipment is calculated using the straight-line method to write down their costs to their residual values over their estimated useful lives, as follows:

Aircraft, engines and flight equipment	10 to 20 years
Buildings	40 to 45 years
Other property, plant and equipment	5 to 18 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the assets' carrying amount and are recognised in the profit and loss in the statement of comprehensive income.

Construction in progress represents buildings under construction and plant and equipment pending installation. This includes the costs of construction or acquisition and interest capitalised. No depreciation is provided on construction in progress until the asset is completed and ready for use.

(m) Impairment of investments in subsidiaries, associates, jointly controlled entities and non-financial assets

Assets that have an indefinite useful life or which are not yet available for use are not subject to amortisation and are tested for impairment at least annually or whenever there is indication of impairment. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that have suffered an impairment are reviewed for possible reversal of the impairment at each balance sheet date.

(n) Lease prepayments

Lease prepayments represent acquisition costs of land use rights less accumulated amortisation. Amortisation is provided over the lease period of the land use rights on a straight-line basis.

(o) Advanced payments on acquisition of aircraft

Advanced payments on acquisition of aircraft represent payments to aircraft manufacturers to secure deliveries of aircraft in future years, including attributable finance costs, and are included in non-current assets. The balance is transferred to property, plant and equipment upon delivery of the aircraft.

– 31 –

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(p) Flight equipment spare parts

Flight equipment spare parts are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of flight equipment spare parts comprises the purchase price (net of discounts), freight charges, duty and value added tax and other miscellaneous charges. Net realisable value is the estimated selling price of the flight equipment in the ordinary course of business, less applicable selling expenses.

(q) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Target Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the statement of comprehensive income. When a trade receivable is uncollectible, it is written off against the provision account for trade receivables. Subsequent recoveries of amounts previously written off are credited in the profit and loss in the statement of comprehensive income.

(r) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

(s) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any differences between the proceeds (net of transaction costs) and the redemption value is recognised in the profit and loss in the statement of comprehensive income over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Target Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(t) Provisions

Provisions are recognised when the Target Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(u)

Leases

Finance leases

The Target Group leases certain property, plant and equipment. Leases of property, plant and equipment, including aircraft, where the Target Group has acquired substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments.

Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in current portion and non-current portion of obligations under finance leases. The interest element of the finance cost is charged to profit and loss in the statement of comprehensive income over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Leased assets are depreciated using a straight-line basis over their expected useful lives to residual values.

For sale and leaseback transactions resulting in a finance lease, differences between sales proceeds and net book values are deferred and amortised over the minimum lease terms.

Operating leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to profit and loss in the statement of comprehensive income on a straight-line basis over the period of the lease.

For sale and leaseback transactions resulting in an operating lease, differences between sales proceeds and net book values are recognised immediately in the profit and loss in the statement of comprehensive income, except to the extent that any profit or loss is compensated by future lease payments at above or below market value.

(v)

Employee benefits

Employee benefits mainly include salaries, bonuses, allowances and subsidies, retirement benefit obligations, housing funds and other expenses related to the employees for their services. The Target Group recognizes employee benefits as liabilities during the accounting period when employees rendered services and allocates them to the related expenses based on different beneficiaries.

(i)

Retirement benefit obligations

The Target Group primarily pays contributions on a monthly basis to various defined contribution retirement benefit plans organized by relevant municipal and provincial governments in the PRC. The municipal and provincial governments undertake to assume the retirement benefit obligations of all existing and future retired employees payable under these plans. Except for the post retirement benefits that the Target Group provides to certain eligible employees as described in the following paragraph, the Target Group has no legal or constructive obligations for further contributions if the funds do not hold sufficient assets to pay all employees the benefit relating to their current and past services.

In addition to making contributions to the above defined contribution retirement benefit plans, the Target Group also provides certain post-retirement subsidies to certain employees. These post- retirement benefits constitute defined benefit obligation under IFRS. The liabilities recognised in the balance sheet in respect of these defined benefit obligations are the present value of the defined benefit obligations at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised past-service costs. The defined benefits obligation is calculated annually using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability. Actuarial gain and losses arising from experience adjustment and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation are charged or credited to the profit and loss in the statement of comprehensive income statement over the employees' expected average remaining working lives.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

Past-service cost are recognised immediately in the profit and loss in the statement of comprehensive income, unless the changes to the pension plan are conditional on the employees remaining in service for a specific period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

(ii) Housing funds

The Target Group provides housing funds based on certain percentages of salaries and at no more than the upper limits of the requirements. These benefits are paid to social security organisations and the amounts paid are expensed as incurred. The Target Group has no legal or constructive obligations for further contributions if the fund does not hold sufficient assets to pay all employees the benefit relating to their current and past services.

(w) Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item being hedged.

As described in the felling paragraph, derivative financial instruments that do not qualify for hedge accounting are accounted for as trading instruments and any unrealised gains or losses, being changes in fair value of the derivatives, are recognised in the profit and loss in the statement of comprehensive income immediately.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged items is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

(x) Available-for-sale financial assets

Investments in securities other than subsidiaries, associates and jointly controlled entities, being held for non-trading purposes, are classified as available-for-sale financial assets and are recognised on the trade-date, being the date on which the Target Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs. At each balance sheet date, the fair value is remeasured, with any resulting gain or loss being recognised directly in equity, except for impairment losses. When these investments are derecognised, the cumulative gain or loss previously recognised directly in equity is recognised in the profit and loss in the statement of comprehensive income.

The fair values of quoted investments are based on current bid prices. If the market for a financial asset is not active (and for unlisted securities), the Group establishes fair value by using valuation techniques. These include the use of recent arm's length transactions, reference to other instruments that are substantially the same, discounted cash flow analysis and option pricing models, making maximum use of market inputs and relying as little as possible on entity-specific inputs. Where fair value of unquoted investments cannot be measured reliably, the related investments are stated at cost less impairment losses.

The Target Group assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the securities below its cost is considered an indicator that the securities are impaired. If any such evidence

exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value less any impairment loss on that financial asset previously recognised in the profit and loss in the statement of comprehensive income, is removed from equity and recognised in the profit and loss in the statement of comprehensive income. Impairment losses recognised in the profit and loss in the statement of comprehensive income on equity instruments are not reversed through the statement of comprehensive income.

(y) Dividend distribution

Dividend distribution to the Target Company's shareholders is recognised as a liability in the Financial Information in the period in which the dividends are approved by the Target Company's shareholders.

3. FINANCIAL RISK MANAGEMENT

(a) Financial risk factors

The Target Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and fuel price risk), credit risk, and liquidity risk. The Target Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Target Group's financial performance. The Target Group uses derivative financial instruments to manage certain risk exposures.

(i) Foreign currency risk

Since 21 July 2005, the PRC government reformed the Renminbi exchange rate system and established a floating exchange rate system in which the exchange rate would be adjusted and managed based on market supply and demand with reference to a basket of foreign currencies. The fluctuation in the Renminbi exchange rate is affected by the domestic and international economy, the political situation and the currency supply and demand of the currency, and thus the Renminbi exchange rate in the future may therefore be very different from the current exchange rate.

The Target Group operates its business in several countries and territories. The Target Group generates its revenue in different currencies, and its foreign currency liabilities at the end of the period are much higher than its foreign currency assets. The Target Group's major liability item (purchases and leases of aircraft) is mainly priced and settled in US dollars. In addition, fluctuations in exchange rates will affect the Target Group's costs incurred from foreign purchases such as aircraft, flight equipment and aviation fuel, and take-off and landing charges at foreign airports.

The following table details the Target Group's and the Target Company's exposure at the balance sheet date to major currency risk which is primarily attributable to US dollars.

	Target Group			As at 30 June 2009 RMB'000

(ii)

Interest rate risk

The Target Group's interest-rate risk primarily arises from borrowings and obligations under finance leases. Borrowings issued at variable rates expose the Target Group to cash flow interest-rate risk. Borrowings issued at fixed rates expose the Target Group to fair value interest-rate risk. For the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, the Target Group's borrowings at variable rates were primarily denominated in US dollars. The interest rates and terms of repayment of borrowings made to the Target Group are disclosed in Notes 32 to the Financial Information. The Target Group's obligations under finance leases were principally at variable rates and denominated in US dollars as disclosed in Notes 31 to the Financial Information.

The Target Group currently does not have any interest hedging/swap contracts. To mitigate the impact of interest rate fluctuations, the Target Company's management closely monitors the Target Group's exposure to interest rate risk.

Decrease in profit after tax	(13,076)	(16,591)	(19,522)	(11,455)

(iii)

Fuel price risk

The Target Group's results of operations may be significantly affected by fluctuations in fuel prices which is a significant expense for the Target Group. For the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, aircraft fuel accounted for 28%, 30%, 34% and 24% of the Target Group's operating expenses respectively. The Target Group entered into fuel option contract in 2008 to hedge against fuel price risk although the fuel option contract does not qualify for hedge accounting. Details of the fuel option contract are disclosed in Note 8 to the Financial Information.

For the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, if the fuel price had been 5% higher/lower with all other variables held constant (excluding the impact of fuel option contracts), the Target Group's fuel cost would have been RMB139 million, RMB185 million, RMB248 million and RMB70 million higher/lower respectively.

(iv)

Credit risk

The Target Group's credit risk is primarily attributable to cash and cash equivalents, restricted cash, trade and other receivables and derivative financial instruments as well as credit exposures to sales agents. The Target Group has established different credit policies for customers in each of its core businesses. The average credit period granted to trade debtors was 60 days. The Target Group reviews the recoverable amount of each individual debt at each balance sheet date to ensure adequate impairment losses are made for irrevocable amounts.

The Target Group has policies in place to ensure that sales of blank tickets are only made available to sales agents with an appropriate credit history. A major portion of sales are conducted through sales agents and the majority of these agents are connected to various settlement plans and/or clearing systems which impose requirements on the credit standing.

A significant portion of the Target Group's air tickets are sold by agents participating in the Billing and Settlements Plan ("BSP"), a clearing system between airlines and sales agents organised by the International Air Transportation Association. As at 31 December 2006, 2007 and 2008 and 30 June 2009, the balance due from BSP agents amounted to approximately RMB113 million, RMB150 million, RMB75 million and RMB116 million respectively.

Except for the above, the Target Group has no significant concentration of credit risk, with the exposure spreading over a number of counterparties.

- 37 -

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

Further quantitative disclosures in respect of the Target Group's exposure to credit risk arising from trade receivables are set out in Note 25.

The Target Group's cash management policy is to deposit cash and cash equivalents mainly in state-owned banks and other banks, which are highly rated by an international credit rating company. The Target Company's management does not expect any loss to arise from non-performance by these banks.

(v)

Liquidity risk

The Target Group's primary cash requirements have been for additions of and upgrades to aircraft, engines and flight equipment and payments on related borrowings. The Target Group finances its working capital requirements through a combination of funds generated from operations and bank borrowings. The Target Group generally finances the acquisition of aircraft through long-term finance leases and bank loans.

The Target Group generally operates with a working capital deficit. As at 31 December 2006, 2007 and 2008 and 30 June 2009, the Target Group's net current liabilities amounted to RMB3,861 million, RMB5,258 million, RMB7,340 million and RMB7,059 million respectively. For each of the years ended 31 December 2006, 2007 and 2008 and six months ended 30 June 2009, the Target Group recorded a net cash inflow from operating activities of RMB1,519 million, RMB853 million, RMB405 million and RMB54 million respectively, a net cash outflow from investing activities and financing activities of RMB1,426 million, RMB494 million, RMB267 million and net cash inflow of RMB847 million respectively, and an increase in cash and cash equivalents of RMB64 million, RMB332 million, RMB116 million and RMB896 million respectively.

Due to the dynamic nature of the underlying businesses, the Target Group's treasury policy aims at maintaining flexibility in funding by keeping credit lines available. The Target Company's management monitors rolling forecasts of the Target Group's liquidity reserves on the basis of expected cash flows.

The directors of the Company believe that the Target Group has obtained sufficient general credit facilities from PRC banks and generated adequate cash from operations for financing future capital commitments and for working capital purposes (see Notes 2(a)).

The table below analyses the financial liabilities of the Target Group and the Target Company that will be settled into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows:

(b)

Capital risk management

The Target Group's objectives when managing capital are to safeguard the Target Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Target Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Target Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as equity, as shown in the consolidated balance sheet, plus net debt.

The gearing ratios at 31 December 2006, 2007 and 2008 and 30 June 2009 were as follows:

	As at 31 December			As at
	2006	2007	2008	30 June

Fair value estimation of financial assets and liabilities

The fair value of financial instruments traded in active markets is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Target Group is the current bid price; the quoted market price used for financial liabilities is the current asking price.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Target Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of fuel option contracts is determined by reference to mark-to-market values provided by counterparties applying appropriate option valuation models.

The fair values of other long-term receivables are based on cash flows discounted using a rate based on the borrowing rate. The fair value of long term financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Target Group for similar financial

instruments (Notes 31 and 32).

The carrying amounts of the Target Group and the Target Company's current financial assets (including trade and other receivables, amounts due from related companies, and cash equivalents) and short term financial liabilities (including trade payables and notes payable, amounts due to related companies, other payables and accrued expenses and short term borrowings) are assumed to approximate their fair values due to their short- term maturities.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgments used in preparing the Financial Information are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Target Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Estimated impairment of property, plant and equipment

The Target Group tests whether property, plant and equipment have been impaired in accordance with the accounting policy stated in Note 2(l) to the Financial Information. An impairment loss is recognized for the amount by which the recoverable amount of property, plant and equipment being lower than its carrying value. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. The calculation of value in use is based on cash flow projections approved by management in which various assumptions and estimations (including but not limited to ticket price, fuel price, load factor, aircraft daily utilisation and discount rate etc.) are involved. Different judgments and estimations could significantly affect the results of the calculation.

(b) Revenue recognition

The Target Group recognises passenger, cargo and mail revenues in accordance with the accounting policy stated in Note 2(e) to the Financial Information. Unused tickets are recognised in traffic revenues based on management's estimates. Management annually evaluates the balance in the SIAC and records any adjustments, which can be material, in the period the evaluation is completed.

These adjustments result from differences between the estimates of certain revenue transactions and the timing of recognising revenue for any unused air tickets and the related sales price, and are impacted by various factors, including a complex pricing structure and interline agreements throughout the industry, which affect the timing of revenue recognition.

(c) Frequent flyer programme

The Target Company operates a frequent flyer programme called "Crane Club" that provides travel awards to programme members based on accumulated miles. A portion of passengers revenue attributable to the award of frequent flyer benefits is deferred and recognised when the miles have been redeemed or have expired. The deferment of revenue is estimated based on historical trends of redemptions which are then used to project the expected utilisation of these benefits and the estimated fair value of the redeemable miles. Any remaining unutilised benefits are recognised as deferred revenue. Different judgments and estimates could significantly affect the estimated deferred revenue or impact the results of operations.

(d) Depreciation of components related to overhaul costs

Depreciation of components related to airframe and engine overhaul costs are based on the Target Group's historical experience with similar airframe and engine models and taking into account anticipated overhauls costs, the timeframe between each overhaul and the ratio of actual flying hours and estimated flying hours between overhauls. Different

judgments or estimates could significantly affect the estimated depreciation charge and materially impact the results of operations.

(e) Provision for costs of return condition checks for aircraft and engines under operating leases

Provision for the estimated costs of return condition checks of aircraft and engines under operating leases is made based on the estimated costs for such return condition checks and taking into account anticipated flying hours, flying cycles and the timeframe between each overhaul. These judgments or estimates are based on historical experience of returning similar airframe and engine models, actual costs incurred and aircraft and engine status. Different judgments or estimates could significantly affect the estimated provision for costs of return condition checks.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

(f) Post retirement benefits

The Target Group operates and maintains defined retirement benefit plans which provide certain retirees with various retirement subsidies. The cost of providing the benefits in the defined retirement benefit plans is actuarially determined and recognised over the eligible employees' service period by utilising various actuarial assumptions and using the projected unit credit method in accordance with the accounting policy stated in Note 2(v) to the Financial Information. These assumptions include, without limitation, the selection of discount rate, annual rate of increase of per capita benefit payment and employees' turnover rate etc. The discount rate is based on management's review of local high quality corporate bonds. The annual rate of increase of benefit payments is based on the general local economic conditions. The employees' turnover rate is based on historical trends of the Target Group. Additional information regarding the retirement benefit plans is disclosed in Note 36 to the Financial Information.

(g) Taxation

The Target Group is subject to various taxes in different areas. Significant judgement is required in determining the provision for various tax charges. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax provisions in the period in which such determination is made.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. In assessing the amount of deferred tax assets that need to be recognised, the Target Group considers future taxable income and ongoing prudent and feasible tax planning strategies. In the event that the Target Group's estimates of projected future taxable income and benefits from available tax strategies are changed, or changes in current tax regulations are enacted that would impact the timing or extent of the Target Group's ability to utilise the tax benefits of net operating loss carry forwards in the future, adjustments to the recorded amount of net deferred tax assets and taxation expense are made.

5. REVENUES

The Target Group is principally engaged in the operation of civil aviation (including the provision of passenger, cargo and mail delivery), other extended transportation services, export and import trading, tour operations and the provision of freight forwarding services.

Notes:

- (a) The government subsidies represent subsidies granted by the local governments to the Target Group. The amount for the period ended 30 June 2009 mainly represents the refunds of civil aviation infrastructure levies paid and payable by the Target Group for the period from 1 July 2008 to 30 June 2009 pursuant to the relevant notice issued by Ministry of Finance and China Aviation Administration of China (“CAAC”).
- (b) The losses on disposal of property, plant and equipment in 2007 represent the loss arising from the sales of certain passenger freighters which were leased back by the Target Group under operating leases.

7. SEGMENT INFORMATION

The Target Company’s management reviews the Target Group’s internal reporting in order to assess performance and allocate resources. The Target Company’s management has determined the operating segments based on these reports.

Management considers the business from both of service/product and geographic perspectives. From a service/product perspective, management assesses the performance of the following segments: (1) passenger (including cargo carried by passenger flights); (2) cargo; (3) tour operation; (4) import and export trading; and (5) freight forwarding. Performances of the other businesses carried out by the less material subsidiaries of the Target Group are assessed together by management as “all other segments”. In addition, management further evaluates the revenues by analyzing on a geographic basis (domestic, Hong Kong, United States, Japan and other countries).

The Target Company’s management assesses the performance of the operating segments based on operating profit. Other information provided to the Target Company’s management is measured in a manner consistent with that in the Financial Information.

Sales between segments are carried out at arm's length. The revenues from external parties reported to the Target Company's management are measured in a manner consistent with that in the consolidated statement of comprehensive income.

Revenues (net of business tax) of the Target Group from passenger and cargo segments are further analyzed by management on geographical basis.

Traffic revenue from services within the PRC (excluding the Hong Kong Special Administrative Region (“Hong Kong”)) is classified as domestic operations. Traffic revenue from inbound and outbound services between the PRC, Hong Kong or overseas markets is attributed to the segments based on the origin and destination of each flight segment.

Revenue of other business segments are primarily generated from the activities conducted in the PRC.

The major revenue-earning assets of the Target Group are its aircraft and related equipment, all of which are registered in the PRC. Since the Target Group's aircraft are deployed flexibly across its route network, there is no suitable basis of allocating such assets and the related liabilities on geographical basis. Other than the aircraft as described above, all assets of the Target Group are located in the PRC.

8. (LOSS)/GAIN ON FAIR VALUE MOVEMENTS OF FUEL OPTION CONTRACTS

In the year ended 31 December 2008, the Target Group entered into fuel option contracts to reduce the risk of changes in market oil/petroleum prices against aircraft fuel costs. The fuel option contracts used by the Target Group was structured to include a combination of both put and call options which allowed the Target Group to lock in fuel prices for specified volumes within a price range. In the contracts, the call option price at which the Target Group was effectively entitled to buy fuel would be higher than that at which the counterparty was effectively entitled to sell.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

No fuel hedging contract was entered into by the Target Group for the six months ended 30 June 2009, all the opened fuel hedging contracts as at 30 June 2009 are contracts entered into by the Target Group in 2008. None of the fuel hedging contracts entered into by the Target Group qualified for hedge accounting, the realised and unrealised mark to market gains/(losses) of the fuel hedging contracts during a period are recognised in the profit and loss in the consolidated statement of comprehensive income.

The fair value of the fuel option contract is determined by reference to mark-to-market values provided by the counterparty applying appropriate option valuation model (i.e. mean regression model using the Monte Carlo Simulation Process). Key parameters used in the valuation model include volatility, credit spread, long run mean and mean reverting ratio at date of valuation.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

For the years ended 31 December 2006 and 2007, the Target Company and certain of its subsidiaries (the “Pudong Subsidiaries”) located in Pudong District, Shanghai, were entitled to a reduced rate of 15% pursuant to the preferential tax policy in Pudong, Shanghai. Other subsidiaries of the Target Group were generally subject to the standard rate of 33%. Under the Corporate Income Tax Law of the People’s Republic of China (the “New CIT Law”) which was approved by the National People’s Congress on 16 March 2007 and became effective from 1 January 2008, the Target Company and the Pudong Subsidiaries are entitled to enjoy a transitional period to gradually increase the applicable corporate income tax rate to 25% in coming five years. For the year ended 31 December 2008 and six months ended 30 June 2009, the corporate income tax rate applicable to the Target Company and the Pudong Subsidiaries is 18% and 20% respectively. Other subsidiaries of the Target Group are generally subject to the PRC standard corporate tax rate of 25% under the New CIT Law for the year ended 31 December 2008 and six months ended 30 June 2009.

APPENDIX I

FINANCIAL INFORMATION OF SHANGHAI AIRLINES

In accordance with the PRC tax law, tax losses can be carried forward to offset against future taxable income for a period of five years. For the years ended 31 December 2006, 2007 and 2008 and six months ended 30 June 2009, the Target Group had tax losses carried forward of approximately RMB81 million, RMB627 million, RMB1,855 million and RMB2,131 million respectively (The Target Company: 2006 : Nil; 2007 : RMB369 million; 2008 : RMB1,292 million; 2009 : RMB1,292 million respectively) which will expire between 2011 and 2014, and which are available to set off against the Target Group and the Target Company's future taxable income.

As at 31 December 2006, 2007 and 2008, and 30 June 2009, the Target Group did not recognise deferred tax assets of RMB24 million, RMB132 million, RMB445 million, and RMB519 million respectively (The Target Company: 2006 : Nil; 2007 : RMB67 million; 2008 : RMB304 million; 2009 : RMB307 million respectively) that arise from tax losses available as management did not consider it probable that such tax losses would be realised before they expire.

36. POST-RETIREMENT BENEFIT OBLIGATIONS

The Target Group provides certain funded and unfunded post-retirement benefits to certain employees. The expected cost of providing these post-retirement benefits is actuarially determined and recognized by using projected unit credit method, which involves a number of assumptions and estimates, including inflation rate, discount rate and employee's turnover ratio.

The post-retirement benefit obligations recognized in the balance sheets are as follows:

Pursuant to the Target Company's Articles of Association, all shares of the Company are registered ordinary shares and rank pari passu to each other.

On 6 January 2006, the shareholders of the Target Company approved a share conversion scheme. Pursuant to the approved share conversion scheme, for every 10 circulating shares held in the Target Company, each holder of circulating shares received 3 circulating shares from the private holders of the non-circulating shares in exchange for their permission to transfer the non-circulating shares held by the private investors into circulating shares. In this connection, the private investors of the non-circulating shares granted 90 million shares in total to the holders of the circulating shares. In addition, the non-circulating shares held by the private investors were granted the status of listing with a lock-up periods ranging from 12 to 36 months starting from 14 February 2006.

In June 2009, as approved by the Target Company's shareholders and China Securities Regulatory Commission, the Target Company issued 222,222,200 new A shares at RMB4.5 per share through private placement to one of the Target Company's shareholders, Jin Jiang International Holdings Co., Ltd. ("Jin Jiang International") for cash of approximately RMB1 billion. After netting off the costs for the share issue, the net proceeds from the share issue was RMB980,440,000, of which RMB222,222,000 was recorded as share capital, with the remaining RMB758,218,000 recorded in share premium. The shares issued to Jin Jiang International are subject to a lock-up period of 36 months from 25 June 2009.

Note:

(a) Statutory and Discretionary Reserves

In accordance with the PRC regulations and the Articles of Association of the companies within the Target Group, before distributing the net profit of each year, each of the companies registered in the PRC is required to set aside 10% of its statutory net profit for the year after offsetting any prior year's losses as determined under Accounting Standards for Business Enterprises (2006) of the PRC ("PRC GAAP") to the statutory common reserve fund. When the balance of such reserve reaches 50% of each company's share capital, any further appropriation is optional. The statutory common reserve fund can be utilised to offset prior years' losses or to issue new shares to shareholders in proportion to their existing shareholdings or to increase the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

Each of the Target Group companies is permitted to transfer 5% of its profit for the year as determined under the PRC GAAP, to a discretionary common reserve fund. The transfer to this reserve is subject to approval at shareholders' meetings.

The Target Company made RMB 5,304,000 to discretionary common reserve fund in year ended 31 December 2006. No profit appropriation by the Target Company to the discretionary common reserve fund was made in the years ended 31 December 2007 and 2008 and the six months ended 30 June 2008 and 30 June 2009.

41. RELATED PARTY TRANSACTIONS

Shanghai Alliance Investment Limited (“Shanghai Alliance”) is the single largest shareholder of the Target Company and owns approximately 29.64% of the Target Company’s shares as at 30 June 2009. Shanghai Alliance had owned 35.75% of the Target Company’s shares throughout the Relevant Periods until the completion of the Target Company’s new share issued to Jin Jiang International in June 2009 (Note 37), thereafter which Shanghai Alliance’s share percentage in the Target Company has been diluted to 29.64%. The aviation industry in the PRC is administrated by CAAC. Shanghai Alliance and the Target Group is ultimately controlled by the PRC government, which also controls a significant portion of the productive assets and entities in the PRC (collectively referred as the “SOEs”).

(a) Related party transactions

The Target Group sells air tickets through sales agents and is therefore likely to have extensive transactions with other state-controlled enterprises, and the employees and their close family members of SOEs while such employees are on corporate business. These transactions are carried out on normal commercial terms that are consistently applied to all of the Target Group’s customers. Due to the large volume and the pervasiveness of these transactions, the Target Company’s management is unable to determine the aggregate amount of the transactions for disclosure. Therefore, retail transactions with these related parties are not disclosed herein. The directors of the Target Company believe that meaningful related party disclosures on these retail transactions have been adequately made.

During the Relevant Periods, the Target Group has entered the following major transactions with the related parties:

FINANCIAL INFORMATION ON THE
GROUP

Notes to the Condensed Consolidated Interim Financial Information

1. Corporate Information

China Eastern Airlines Corporation Limited (the “Company”), a joint stock company limited by shares was incorporated in the People’s Republic of China (the “PRC”) on 14 April 1995. The address of its registered office is 66 Airport Street, Pudong International Airport, Shanghai, the PRC. The Company and its subsidiaries (together, the “Group”) are principally engaged in the operation of civil aviation, including the provision of passenger, cargo, and mail delivery and other extended transportation services.

The Company is majority owned by China Eastern Air Holding Company (“CEA Holding”), a state-owned enterprise incorporated in the PRC.

The Company’s shares are traded on The Stock Exchange of Hong Kong Limited, The New York Stock Exchange and The Shanghai Stock Exchange.

This condensed consolidated interim financial information has not been audited.

2. Basis of preparation

This unaudited condensed consolidated interim financial information for the six months ended 30 June 2009 (the “Current Period”) has been prepared in accordance with International Accounting Standard (“IAS”) 34 “Interim Financial Reporting”. The unaudited condensed consolidated interim financial information should be read in conjunction with the annual financial statements for the year ended 31 December 2008, which have been prepared in accordance with IFRS.

In preparing the interim financial information, the Directors have given careful consideration to the going concern status of the Group in the context of the Group’s current working capital difficulties.

As at 30 June 2009, the Group’s accumulated losses were approximately RMB17.10 billion; its current liabilities exceeded its current assets by approximately RMB34.15 billion; and total liabilities exceeded total assets by approximately RMB4.57 billion.

Against this background, the Directors have taken active steps to seek additional sources of finance and improve the Group’s liquidity position. As at 30 June 2009, the unutilised banking facilities available to the Group amounted to RMB48.79 billion. On 31 July 2009, a banking credit facility of RMB30 billion obtained by CEA Holding was granted to the Company (see Note 24(c) — “Post balance sheet events” for details). In addition, on 10 July 2009, a resolution to issue new shares to certain strategic investors for a total amount of RMB7 billion was passed by the Board and will be submitted for shareholders’ approval in the coming extraordinary general meeting (see Note 24(a) — “Post balance sheet events” for details).

With the additional credit facilities and proposed new share issue described in the preceding paragraph, and based on history of obtaining necessary financing and its relationships with its bankers and creditors, the Board considers that the Group will be able to obtain sufficient financing to enable it to operate and meet its liabilities as and when they fall

due. Accordingly, it is appropriate that the financial information be prepared on a going concern basis and do not include any adjustments that would be required should the Company and the Group fail to continue as a going concern.

3. Accounting policies

Except as described in note 3(a) below, the accounting policies adopted are consistent with those of the annual financial statements for the year ended 31 December 2008, as described therein.

APPENDIX II

FINANCIAL INFORMATION ON THE
GROUP

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings.

(a) Standards, amendment and interpretations effective in 2009

The Group has adopted the following new standards and amendments to standards which are relevant to the Group's operations and are mandatory for the financial year beginning 1 January 2009.

- IAS 1 (revised), "Presentation of financial statements". The revised standard prohibits the presentation of items of income and expenses (that is "non-owner changes in equity") in the statement of changes in equity, requiring "non-owner changes in equity" to be presented separately from owner changes in equity. All "non-owner changes in equity" are required to be shown in a performance statement.

Entities can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the income statement and statement of comprehensive income).

The Group has elected to present one performance statement: the statement of comprehensive income. The interim financial information has been prepared in accordance with the revised disclosure requirements.

- IFRS 8, "Operating segments". IFRS 8 replaces IAS 14, "Segment reporting". It requires a "management approach" under which segment information is presented on the same basis as that used for internal reporting purposes.

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker has been identified as the Board that makes strategic decisions. The interim financial information has been prepared in accordance with the revised disclosure requirements.

- Amendment to IFRS 7, "Financial instruments: disclosures". The amendment increases the disclosure requirements about fair value measurement and reinforces existing principles for disclosure about liquidity risk. The amendment introduces a three-level hierarchy for fair value measurement disclosures and requires some specific quantitative disclosures for financial instruments in the lowest level in the hierarchy. It also requires entities to provide additional disclosures about the relative reliability of fair value measurements. These disclosures will help to improve comparability between entities about the effects of fair value measurements. In addition, the amendment clarifies and enhances the existing requirements for the disclosure of liquidity risk primarily requiring a separate liquidity risk analysis for derivative and non-derivative financial liabilities. Adoption of the amended standard does not have impact on the disclosure of this interim financial information but the Group will make the relevant additional disclosures, where appropriate, in its financial statements for the year ending 31 December 2009.

The Group has not early adopted new standards, amendments to standards and interpretations which have been issued but are not effective for 2009. The Group is assessing the impact of these new standards, amendments to standards and interpretations but is not yet in a position to state whether any substantial changes to the Group's accounting policies or to the presentation of the financial statements will be required.

FINANCIAL INFORMATION ON THE
GROUP

(b)

Comparatives

- (i) Changes of accounting policy in second half year of 2008 which were not reflected in the interim financial information for the six months ended 30 June 2008

In preparing the financial statements for the year ended 31 December 2008, the Group has made the following changes of accounting policy which were not reflected in the interim financial information for the six months ended 30 June 2008.

- (1) IFRIC 13, "Customer loyalty programmes" was early adopted by the Group in 2008. IFRIC 13 clarifies that where goods or services are sold together with a customer loyalty incentive (for example, loyalty points or free products), the arrangement is a multiple-element arrangement and the consideration receivable from the customer is allocated between the components of the arrangement using fair values. The Company operates a frequent-flyer programme called "Eastern Miles" (the "programme"). Historically, the incremental cost of providing awards in exchange for redemption of miles earned by members was accrued as an operating cost and a liability in the balance sheet. After the adoption of IFRIC 13, revenue is allocated between the ticket sold and miles earned by members. The portion allocated to miles earned is deferred and recognised when the miles have been redeemed or have expired.
- (2) Under IFRS, the Company has the option to use the revaluation model or historical cost model to account for its property, plant and equipment ("PP&E"). Prior to 2008, the Company adopted the revaluation model in accordance with IAS 16 as a result of Chinese regulatory requirements to revalue PP&E in connection with its listing in 1997. In 2008, the Company changed its IFRS accounting policy in respect of PP&E from the revaluation model to the historical cost model. The purposes of the change are set out in the notes to the financial statements for the year ended 31 December 2008.

The effect of the adoption of IFRIC 13 and change of accounting policy for PP&E on the consolidated interim financial information for the six months ended 30 June 2008 is set out below:

	2008 as previously presented RMB'000	Effect of adoption of IFRIC 13 RMB'000	Effect of change of accounting policy for PP&E RMB'000	2008 as restated RMB'000

Note: The Group's traffic revenues, commission income, ground service income, cargo handling income and other revenues are subject to PRC business tax levied at rates ranging from 3% to 5%, pursuant to the PRC tax rules and regulations.

(b) Segment information

The chief operating decision-maker has been identified as the Board. The Board reviews the Group's internal reporting in order to assess performance and allocate resources. Management has determined the operating segments based on these reports.

The Group has two business segments, namely passenger and cargo and logistics, which are structured and managed separately, according to the nature of their operations and the services they provide.

- (1) Passenger business segment includes cargo carried by passenger flights.

(2) Inter-segment transfers or transactions are entered into under normal commercial terms and conditions that would also be available to unrelated third parties.

The Group's two business segments operate in four main geographical areas, even though they are managed on a worldwide basis.

The Group's revenues (net of business tax) by geographical segment are analysed based on the following criteria:

- (1) Traffic revenue from services within the PRC (excluding the Hong Kong Special Administrative Region ("Hong Kong")) is classified as domestic operations. Traffic revenue from inbound and outbound

services between the PRC, Hong Kong or overseas markets is attributed to the segments based on the origin and destination of each flight segment.

Note:

(a) Pursuant to Cai Jian (2009) No. 4, the civil aviation infrastructure levies collected from PRC domestic airlines for the period from 1 July 2008 to 30 June 2009 would be refunded. The amount for the Current Period represents the refunds of civil aviation infrastructure levies received and receivable by the Group.

(b) Other government subsidies represent (i) subsidies granted by the local government to the Group; and (ii) other subsidies granted by various local municipalities to encourage the Group to operate certain routes to cities where these municipalities are located.

6. Gain on fair value movements of fuel option contracts

In 2008, the Group entered into fuel hedging contracts to reduce the risk of changes in market oil/petroleum prices as a hedge against aircraft fuel costs. The fuel hedging contracts used by the Group are normally structured to include a combination of both put and call options which allow the Group to lock in fuel prices for specified volumes within a price range. In each hedging contract, the call options price at which the Group is effectively entitled to buy fuel will be higher than that at which the counterparty is effectively entitled to sell.

No fuel hedging contract was entered into by the Group for the Current Period, all the opened fuel hedging contracts as at 30 June 2009 are contracts entered into by the Group prior to 2009. None of the fuel hedging contracts entered into by the Group qualified for hedge accounting, the realised and unrealised mark to market gains/(losses) of the fuel hedging contracts during a period are recognised in the profit and loss accounts.

Prior to 2008, the Company and certain of its subsidiaries (the “Pudong Subsidiaries”) located in Pudong District, Shanghai, were entitled to a reduced rate of 15% pursuant to the preferential tax policy in Pudong, Shanghai. Under the Corporate Income Tax Law of the People’s Republic of China (the “New CIT Law”) which was approved by the National People’s Congress on 16 March 2007 and became effective from 1 January 2008, the Company and the Pudong Subsidiaries are entitled to enjoy a transitional period to gradually increase the applicable corporate income tax rate to 25% in coming five years. For the year ending 31 December 2009, the corporate income tax rate applicable to the Company and the Pudong Subsidiaries is 20% (2008: 18%). Other subsidiaries of the Company, except for those incorporated in Hong Kong and being subject to the Hong Kong corporate income tax rate of 16.5% (2008: 16.5%), are generally subject to the PRC standard corporate tax rate of 25% (2008: 25%) under the New CIT Law.

APPENDIX II

FINANCIAL INFORMATION ON THE
GROUP

The Group operates international flights to overseas destinations. There was no material overseas taxation for the six months ended 30 June 2009, as there are double tax treaties between the PRC and the corresponding jurisdictions (including Hong Kong) relating to aviation businesses.

10. Earnings/(loss) per share

The calculation of basic earnings/(loss) per share is based on the unaudited consolidated profit attributable to equity holders of the Company of RMB984,654,000 (2008: loss of RMB175,318,000) and the weighted average number of shares of 4,954,304,000 (2008: 4,866,950,000) in issue during the period.

The Company has no potentially dilutive option or other instruments relating to ordinary shares.

21. Related party transactions

The Group is controlled by CEA Holding, which owns approximately 74.64% of the Company's shares as at 30 June 2009 (2008 : 59.67%). The aviation industry in the PRC is administrated by the CAAC. CEA Holding and accordingly

the Group are ultimately controlled by the PRC government, which also controls a significant portion of the productive assets and entities in the PRC (collectively referred as the “SOEs”).

(a) Related party transactions

The Group sells air tickets through sales agents and is therefore likely to have extensive transactions with other state-controlled enterprises, and the employees and their close family members of SOEs while such employees are on corporate business. These transactions are carried out on normal commercial terms that are consistently applied to all of the Group’s customers. Due to the large volume and the pervasiveness of these transactions, management is unable to determine the aggregate amount of the transactions for disclosure. Therefore, retail transactions with these related parties are not disclosed herein. The Directors of the Company believe that meaningful related party disclosures on these retail transactions have been adequately made.

(c) Guarantees by holding company

Certain unsecured bank borrowings of the Group totaling of RMB457 million (2008 : RMB357 million) were guaranteed by CEA Holding (Note 18). No bank borrowing of the Company was guaranteed by CEA Holding as at 30 June 2009 (2008 : Nil).

Notes:

*EAGF is a 25% associate of the Group. SDATC is a 27.16% associate of the Group, CAASC and EAIEC are both 45% associates of the Group.

** Wheels & Brakes and STA are 40% and 51% jointly controlled entities of the Group respectively.

*** These companies are related companies of the Group as they are either, directly or indirectly, controlled by, under the joint control or significant influence of CEA Holding.

22. Seasonality

The civil aviation industry is subject to seasonal fluctuations, with peak demand during the holiday season in the second half of the year. As such, the revenues and results of the Group in the first half of the year are generally lower than those in the second half of the year.

23. Contingent liabilities

In 2005, the family members of certain victims in the aircraft (the aircraft was then owned and operated by China Eastern Air Yunnan Company) accident, which occurred in Baotou on 21 November 2004, sued the Company in a U.S. court for compensation. On 5 July 2007, pursuant to several conditions with which the Company has complied, the Superior Court of the State of California ordered the action stayed on the grounds of forum non convenience for the purpose of permitting proceedings in the PRC. On 20 February 2008, the plaintiffs filed a motion with the Superior Court of the State of California to lift the stay, but the motion was rejected by the court on 6 May 2008. The plaintiffs filed a second motion to lift the stay on 10 July 2008. On 27 August 2008, the Superior Court of the State of

California rejected the motion of the plaintiffs again. After the case entered the procedures on appeal in the California Court of Appeal, the Court of Appeal of California issued an opinion on 26 February 2009, dismissing the appeal of the plaintiffs and affirming the original order. On 16 March 2009, the Chinese counsel of the plaintiff sued the Company on behalf of the family members of victims in the Beijing No. 2 Intermediate People's Court. The case is under the filing procedure and no official summons from the court has been received by the Company. The management of the Group believes that even if there would be a negative outcome for this case, it will not have an adverse effect on the financial condition and results of operations of the Company.

24. Post balance sheet events

(a) Specific mandates in relation to issuance of new A Shares and new H Shares

On 10 July 2009, the Board resolved to convene an extraordinary shareholders' meeting and the class meetings of the holders of A Shares of the Company ("A Shares") and H Shares of the Company ("H Shares") respectively on 7 September 2009 for the grant of (i) an A Share Specific Mandate to the Board to issue not more than 1,350,000,000 new A Shares to not more than 10 specific investors (subject to the maximum number as permitted by PRC laws and regulations at the time of the issuance) including CEA Holding, at the subscription price of not less than RMB4.75 per A Share; and (ii) a H Share Specific Mandate to the Board to issue not more than 490,000,000 new H Shares to CES Global, at the subscription price of not less than HK\$1.40 per H Share.

(b) Proposed absorption of Shanghai Airlines through exchange of shares

On 10 July 2009, the Company entered into an agreement with Shanghai Airlines Co., Ltd ("Shanghai Airlines") in relation to a proposed absorption of Shanghai Airlines through share exchanges at the rate of 1.3 A Shares in exchange of 1 share of Shanghai Airlines (i.e. in aggregate a maximum of 1,694,838,860 A Shares in exchange of 1,303,722,200 shares of Shanghai Airlines). A separate extraordinary shareholders' meeting and respective class meetings will be convened to approve the proposed absorption (the "Absorption Proposal").

Upon full implementation of the terms of the Absorption Proposal, after the approvals by the shareholders of the Company and Shanghai Airlines, together with the requisite consents and approvals from the relevant government authorities has been obtained, all the assets, business, staff and rights of Shanghai Airlines, including but not limited to all operating licence, registration and filing and route operating rights, will be absorbed into and all the liabilities of Shanghai Airlines will be assumed by the Company or a wholly owned subsidiary of the Company to be used to absorb all the assets and assume all the liabilities of Shanghai Airlines.

(c) Additional credit facilities

On 31 July 2009, the Company was granted by CEA Holding to use a four year credit facility of RMB30 billion that CEA Holding obtained from China Development Bank.

Notes to the Financial Statements

(Prepared in accordance with International Financial Reporting Standards)

For the year ended 31 December 2008

1. CORPORATE INFORMATION

China Eastern Airlines Corporation Limited (the “Company”), a joint stock company limited by shares was incorporated in the People’s Republic of China (the “PRC”) on 14 April 1995. The address of its registered office is 66 Airport Street, Pudong International Airport, Shanghai, the PRC. The Company and its subsidiaries (together, the “Group”) are principally engaged in the operation of civil aviation, including the provision of passenger, cargo, and mail delivery and other extended transportation services.

The Company is majority owned by China Eastern Air Holding Company (“CEA Holding”), a state-owned enterprise incorporated in the PRC.

The Company’s shares are traded on The Stock Exchange of Hong Kong Limited, The New York Stock Exchange and The Shanghai Stock Exchange.

These financial statements have been approved for issue by the Board of Directors on 15 April 2009.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these financial statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

(a) Basis of preparation

The financial statements of the Group have been prepared in accordance with International Financial Reporting Standards (“IFRS”) and the disclosure requirements of the Hong Kong Companies Ordinance. The financial statements have been prepared under the historical cost convention, as modified by the revaluation of available-for-sale financial assets, financial assets and financial liabilities (including derivative instruments) at fair value through profit or loss.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the Group’s accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 4.

In preparing the financial statements, the directors have given careful consideration to the going concern status of the Group in the context of the Group’s current working capital difficulties.

The Group’s accumulated losses were approximately RMB18.08 billion as at 31 December 2008; its current liabilities exceeded its current assets by approximately RMB43.46 billion; and total liabilities exceeded total assets by approximately RMB12.64 billion.

Against this background, the directors have taken active steps to seek additional sources of finance and improve the Group’s liquidity position. At 31 December 2008, the Group had total credit facilities of RMB13.5 billion from certain

banks. Since 31 December 2008, the Company has successfully obtained additional credit facilities in an aggregate amount of RMB36 billion from certain banks and financial institutions (see Note 47 — “Post balance sheet events” for details). The directors believe that, based on experience to date, it is likely that these facilities will be rolled over in future years if required. In addition, a resolution to issue additional shares to China Eastern Air Holding Company (“CEA Holding”), the Company’s shareholder, and CES Global Holding (Hong Kong) Limited (“CES Global”), a wholly-owned subsidiary of CEA Holding, for a total amount of RMB7 billion was approved in the extraordinary general meetings held on 26 February 2009 (see Note 47 — “Post balance sheet events” for details).

– 127 –

With the additional credit facilities and approved capital injection described in the preceding paragraph, and based on the Group's history of obtaining finance and its relationships with its bankers and creditors, the Board of Directors considers that the Group will be able to obtain sufficient financing to enable it to operate and meet its liabilities as and when they fall due. Accordingly, it is appropriate that these financial statements should be prepared on a going concern basis and do not include any adjustments that would be required should the Company and the Group fail to continue as a going concern.

(i) Standards, amendment and interpretations effective in 2008

- IFRIC 14, 'IAS 19 — The limit on a defined benefit asset, minimum funding requirements and their interaction', provides guidance on assessing the limit in IAS 19 on the amount of the surplus that can be recognised as an asset. It also explains how the pension asset or liability may be affected by a statutory or contractual minimum funding requirement. This interpretation does not have any impact on the Group's financial statements, as the Group has a pension deficit and is not subject to any minimum funding requirements.
- IFRIC 11, 'IFRS 2 — Group and treasury share transactions', provides guidance on whether share-based transactions involving treasury shares or involving group entities (for example, options over a parent's shares) should be accounted for as equity-settled or cash-settled share-based payment transactions in the stand-alone accounts of the parent and group companies. This interpretation does not have an impact on the Group's financial statements.

(ii) Standards, amendments and interpretations to existing standards that are not yet effective and which are relevant for the Group's operations

The following standards, amendments and interpretations to existing standards have been published and are mandatory for the Group's accounting periods beginning on or after 1 January 2009 or later periods, but the Group has not early adopted them:

- IAS 1 (Revised), 'Presentation of financial statements' (effective from 1 January 2009). The revised standard will prohibit the presentation of items of income and expenses (that is, 'non-owner changes in equity') in the statement of changes in equity, requiring 'non-owner changes in equity' to be presented separately from owner changes in equity. All non-owner changes in equity will be required to be shown in a performance statement, but entities can choose whether to present one performance statement (the statement of comprehensive income) or two statements (the consolidated income statement and statement of comprehensive income). Where entities restate or reclassify comparative information, they will be required to present a restated balance sheet as at the beginning comparative period in addition to the current requirement to present balance sheets at the end of the current period and comparative period. The Group will apply IAS (Revised) from 1 January 2009. It is likely that both the consolidated income statement and statement of comprehensive income will be presented as performance statements.
- IFRS 8, 'Operating segments' (effective from 1 January 2009). IFRS replaces IAS 14 and aligns segment reporting with the requirements of the US standard SFAS 131, 'Disclosures about segments of an enterprise and related information'. The new standard requires a 'management approach', under which segment information is presented on the same basis as that used for internal reporting purposes. The Group will apply IFRS 8 from 1 January 2009, The expected impact is still being assessed in detail by management.
- IAS 27 (Revised) 'Consolidated and Separate Financial Statements' (effective from annual period beginning on or after 1 July 2009). The amendment requires non-controlling interests (i.e. minority interests) to be presented in the

consolidated statement of financial position within equity, separately from the equity of the owners of the parent. Total comprehensive income must be attributed to the owners of the parent and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance. Changes in a parent's ownership interest in a subsidiary that do not result in the loss of control are accounted for within equity. When control of a subsidiary is lost, the assets and liabilities and related equity components of the former subsidiary are derecognised. Any gain or loss is recognised in profit or loss. Any investment retained in the former subsidiary is measured at its fair value at the date when control is lost. The Group will apply IAS 27 (Revised) from 1 January 2010.

– 128 –

- IFRS 3 (Revised) “Business Combinations” (effective for business combinations with acquisition date on or after the beginning of the first annual reporting period beginning on or after 1 July 2009). The amendment may bring more transactions into acquisition accounting as combinations by contract alone and combinations of mutual entities are brought into the scope of the standard and the definition of a business has been amended slightly. It now states that the elements are ‘capable of being conducted’ rather than ‘are conducted and managed’. It requires considerations (including contingent consideration), each identifiable asset and liability to be measured at its acquisition-date fair value, except leases and insurance contracts, reacquired right, indemnification assets as well as some assets and liabilities required to be measured in accordance with other IFRSs. They are income taxes, employee benefits, share-based payment and non current assets held for sale and discontinued operations. Any non-controlling interest in an acquiree is measured either at fair value or at the non-controlling interest’s proportionate share of the acquiree’s net identifiable assets. All acquisition related cost should be expensed. The Group will apply IFRS 3 (Revised) prospectively to all business combinations from 1 January 2010.
- IAS 36 (Amendment), ‘Impairment of assets’ (effective from 1 January 2009). The amendment is part of the IASB’s annual improvements project published in May 2008. Where fair value less costs to sell is calculated on the basis of discounted cash flows, disclosures equivalent to those for value-in-use calculation should be made. The Group will apply the IAS 36 (Amendment) and provide the required disclosure where applicable for impairment tests from 1 January 2009.
- IAS 38 (Amendment), ‘Intangible assets’ (effective from 1 January 2009). The amendment is part of the IASB’s annual improvements project published in May 2008. A prepayment may only be recognised in the event that payment has been made in advance of obtaining right of access to goods or receipt of services. The Group will apply the IAS 38 (Amendment) from 1 January 2009, but it is not expected to have any impact on the Group’s financial statements.
- IAS 19 (Amendment), ‘Employee benefits’ (effective from 1 January 2009). The amendment is part of the IASB’s annual improvements project published in May 2008. The amendment clarifies that a plan amendment that results in a change in the extent to which benefit promises are affected by future salary increases is a curtailment, while an amendment that changes benefits attributable to past service gives rise to a negative past service cost if it results in a reduction in the present value of the defined benefit obligation. The definition of return on plan assets has been amended to state that plan administration costs are deducted in the calculation of return on plan assets only to the extent that such costs have been excluded from measurement of the defined benefit obligation. The distinction between short term and long term employee benefits will be based on whether benefits are due to be settled within or after 12 months of employee service being rendered. IAS 37, ‘Provisions, contingent liabilities and contingent assets’, requires contingent liabilities to be disclosed, not recognised. IAS 19 has been amended to be consistent. The Group will apply the IAS 19 (Amendment) from 1 January 2009. The expected impact is still being assessed in detail by management.
- IFRS 7 (Amendment), ‘Financial instruments: Disclosure’ (effective from 1 January 2009). The amendment forms part of the IASB’s response to the financial crisis aims at improving transparency and enhance accounting guidance. The amendment increases the disclosure requirements about fair value measurement and reinforces existing principles for disclosure about liquidity risk. The amendment introduces a three-level hierarchy for fair value measurement disclosure and requires some specific quantitative disclosures for financial instruments in the lowest level in the hierarchy. In addition, the amendment clarifies and enhances existing requirements for the disclosure of liquidity risk primarily requiring a separate liquidity risk analysis for derivative and non-derivative financial liabilities. The Group will apply the IFRS 7 (Amendment) and provide the required disclosure, where applicable, prospectively from 1 January 2009.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

(b) Changes of accounting policy

(i) Early adoption of IFRIC 13, 'Customer loyalty programmes'

IFRIC 13, 'Customer loyalty programmes' was early adopted by the Group in 2008. IFRIC 13 clarifies that where goods or services are sold together with a customer loyalty incentive (for example, loyalty points or free products), the arrangement is a multiple-element arrangement and the consideration receivable from the customer is allocated between the components of the arrangement using fair values. The Company operates a frequent-flyer programme called 'Eastern Miles' (the 'programme'). Historically, the incremental cost of providing awards in exchange for redemption of miles earned by members was accrued as an operating cost and a liability in the balance sheet. After the adoption of IFRIC 13, revenue is allocated between the ticket sold and miles earned by members. The portion allocated to miles earned is deferred and recognised when the miles have been redeemed or have expired.

This change in accounting policy has been accounted for retrospectively, and the comparative financial statements have also been restated. The effect of the change is set out in Note 2(b)(iii).

The Group's consolidated loss for the year ended 31 December 2008 and consolidated net liabilities at 31 December 2008 would have decreased by RMB25 million and RMB320 million respectively if the previous policies had still been applied in 2008.

(ii) Change of accounting policy for property, plant and equipment

Under IFRS, the Company has the option to use the revaluation model or historical cost model to account for its property, plant and equipment ('PP&E'). Previously, the Company adopted the revaluation model in accordance with IAS 16 as a result of Chinese regulatory requirements to revalue PP&E in connection with its listing in 1997. Under PRC Accounting Standards, the one time revaluation for listing purposes was treated as deemed cost and the historical cost model was adopted subsequent to the initial revaluation. In 2008, the Company changed its IFRS accounting policy in respect of PP&E from the revaluation model to the historical cost model. Whilst this change was made primarily to increase the relevance of financial data to the users of the financial statements and for the reasons set out below, management also made reference to Interpretation 2 of Chinese Accounting Standards ('CAS') issued by the Ministry of Finance in August 2008 which aims to drive the elimination of differences between IFRS and CAS. The change was made after taking into consideration the following factors:

- the alignment of the Group's accounting policy with industry peers — management considers that the historical cost model will improve comparability of certain financial performance data and results of operations of the Group with other airlines. Very few of the leading global airlines currently use the valuation model and valuation data is not generally used in airline industry analysis that is made available to stakeholders or internally by management.
- increased comparability between finance and operating leased aircraft — depreciation cost of a finance leased aircraft is based on revalued amount whereas operating lease payments are based on cost and aircraft held under operating leases are not recognised as assets subject to valuation. Management therefore consider that the change to the cost model increases the level of consistency in accounting for aircraft which are not distinguished from an operational perspective.
- the high degree of subjectivity and risk of cyclical volatility associated with external valuation and second hand aircraft fair values — the market value of second hand aircraft can be volatile and is influenced by transactions in

global markets that may have little relevance to the operating environment in China. When purchasing or financing aircraft under finance leases, management intend to use these aircraft in the business for the remainder of their useful lives. Management do not believe that financial statements that reflect, often subjective, movements in second hand values provide meaningful information to investors.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

This change in accounting policy has been accounted for retrospectively, and the comparative financial statements have also been restated. The effect of the change is not considered material to the financial statements but is set out in Note 2(b)(iii).

The Group's consolidated loss for the year ended 31 December 2008 and consolidated net liabilities at 31 December 2008 would have increased by RMB216 million and decreased by RMB119 million respectively if the previous policies had still been applied in 2008.

(iii)	Impact on prior year balances			
	2007 as previously presented RMB'000	Effect of adoption of IFRIC 13 RMB'000	Effect of change of accounting policy for PP&E RMB'000	2007 as restated RMB'000
Impact on consolidated income statements

Impact on consolidated balance sheet				
Consolidated net assets	3,612,729	(345,115)	(335,058)	2,932,556
Capital and reserves attributable to the equity holders of the Company	3,027,763	(345,115)	(322,077)	2,360,571
Minority interests	584,966	—	(12,981)	571,985
(c)	Consolidation			

The Group's consolidated financial statements include the financial statements of the Company and all of its subsidiaries made up to 31 December.

(i) Subsidiaries

Subsidiaries are all entities (including special purpose entities) over which the Group has the power to govern the financial and operating policies, generally accompanying a shareholding of more than one half of the voting rights. The existence and effect of potential voting rights that are currently exercisable or convertible are considered when assessing whether the Group controls another entity.

Subsidiaries are fully consolidated from the date on which control is transferred to the Group. They are de-consolidated from the date that control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by the Group, including those acquired from holding companies. The cost of an acquisition is measured as the fair value of the assets given, equity

instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest.

The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the net assets of the subsidiary acquired, the difference is recognised directly in the consolidated income statement.

– 131 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

Inter-company transactions, balances and unrealised gains on transactions between Group companies are eliminated. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of subsidiaries have been changed where necessary to ensure consistency with the policies adopted by the Group.

In the Company's balance sheet, the investments in subsidiaries are stated at cost less provision for impairment losses. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

(ii) Transactions with minority interests

The Group applies a policy of treating transactions with minority interests as transactions with parties external to the Group. Disposals to minority interests result in gains and losses for the Group that are recorded in the consolidated income statement. Purchases from minority interests result in goodwill, being the difference between any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary.

(iii) Associates

Associates are all entities over which the Group has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for using the equity method of accounting and are initially recognised at cost. The Group's investments in associates includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The Group's share of its associates' post-acquisition profits or losses is recognised in the consolidated income statement, and its share of post-acquisition movements in reserves is recognised in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the associate.

Unrealised gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealised losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

Dilution gains and losses in associates are recognised in the consolidated income statement.

In the Company's balance sheet, the investments in associates are stated at cost less provision for impairment losses (Note 2(n)). The results of associates are accounted for by the Company on the basis of dividend received and receivable.

(iv) Jointly controlled entities

A jointly controlled entity is an entity in which the Group has joint control over its economic activity established under a contractual arrangement. The Group's investments in jointly controlled entities includes goodwill (net of any accumulated impairment loss) identified on acquisition.

The Group's interests in jointly controlled entities are accounted for by the equity method of accounting based on the audited financial statements or management accounts of the jointly controlled entities. The Group's share of its jointly controlled entities' post-acquisition profits or losses is recognised in the consolidated income statement, and its share of post-acquisition movements is adjusted against the carrying amount of the investment. When the Group's share of losses in a jointly controlled entity equals or exceeds its interest in that entity, including any other unsecured receivables, the Group does not recognise further losses, unless it has incurred obligations or made payments on behalf of the jointly controlled entity.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

The Group recognises the portion of gains or losses on the sale of assets by the Group to the joint venture that it is attributable to the other venturers. The Group does not recognise its share of profits or losses from the joint venture that result from the Group's purchase of assets from the joint venture until it resells the assets to an independent party. However, a loss on the transaction is recognised immediately if the loss provides evidence of a reduction in the net realisable value of current assets, or an impairment loss.

In the Company's balance sheet, the investments in jointly controlled entities are stated at cost less provision for impairment losses. The results of jointly controlled entities are accounted for by the Company on the basis of dividends received and receivable.

(d) Segmental reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments. A geographical segment is engaged in providing products or services within a particular economic environment that are subject to risks and returns that are different from those of segments operating in other economic environments.

(e) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The financial statements are presented in Chinese Renminbi ("RMB"), which is the Company's functional and presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement, except when deferred in equity as qualifying cash flow hedges or qualifying net investment hedges.

(f) Revenue recognition and sales in advance of carriage

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and the provision of services in the ordinary course of the Group's activities. Revenue is shown net of business and value-added taxes, returns, rebates and discounts and after eliminating sales within the Group.

The Group recognises revenue when the amount of revenue can be reliably measured, it is probable that future economic benefits will flow to the entity and specific criteria have been met for each of the Group's activities as described below. The amount of revenue is not considered to be reliably measurable until all contingencies relating to the sale have been resolved. The Group bases its estimates on historical results, taking into consideration the type of customer, the type of transaction and the specifics of each arrangement.

(i) Traffic revenue

Passenger, cargo and mail revenues are recognised as traffic revenues when the transportation services are provided. The value of sold but unused tickets is recognised as sales in advance of carriage (“SIAC”).

(ii)

Commission income

Commission income represents amounts earned from other carriers in respect of sales made by the Group on their behalf, and is recognised in the income statement upon ticket sales.

– 133 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

(iii)

Other revenue

Revenues from other operating businesses, including income derived from the provision of ground services and cargo handling services, are recognised when the services are rendered.

Rental income from subleases of aircraft is recognised on a straight-line basis over the terms of the respective leases. Rental income from leasing office premises and cargo warehouses is recognised on a straight-line basis over the lease term.

(g)

Government grants

Grants from the Government are recognised at their fair value where there is a reasonable assurance that the grant will be received and the Group will comply with all attached conditions.

Government grants relating to costs are deferred and recognised in the income statement over the period necessary to match them with the costs that they are intended to compensate.

Government grants relating to property, plant and equipment are included in non-current liabilities as deferred government grants and are credited to the income statement on a straight-line basis over the expected lives of the related assets.

(h)

Maintenance and overhaul costs

In respect of aircraft and engines under operating leases, the Group has the responsibility to fulfill certain return conditions under the leases. Provision for the estimated cost of these return condition checks is made on a straight line basis over the term of the leases.

In respect of aircraft and engines owned by the Group or held under finance leases, overhaul costs are capitalised as a component of property, plant and equipment and are depreciated over the appropriate maintenance cycles (Note 2(m)).

All other repairs and maintenance costs are charged to the income statement as and when incurred.

(i)

Interest income

Interest income is recognised on a time-proportion basis using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at the original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired loans is recognised using the original effective interest rate.

(j)

Borrowing costs

Borrowing costs incurred for the construction of any qualifying asset, including the interest attributable to loans for advance payments used to finance the acquisition of aircraft, are capitalised during the period of time that is required to complete and prepare the asset for its intended use. Other borrowing costs are expensed.

(k)

Current and deferred tax

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the jurisdictions where the Company and its subsidiaries, associates and jointly controlled entities operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation and establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

– 134 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax is provided on temporary differences arising on investments in subsidiaries, associates and jointly controlled entities, except where the timing of the reversal of the temporary difference is controlled by the Group and it is probable that the temporary difference will not reverse in the foreseeable future.

(l) Intangible assets

(i) Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary, associate or jointly controlled entity at the date of acquisition. Goodwill on acquisition of subsidiaries is included in "intangible assets". Goodwill on acquisition of associates and jointly controlled entities is included in "investments in associates" and "investments in jointly controlled entities" and is tested for impairment as part of the overall balances. Separately recognised goodwill is tested for impairment at least annually or whenever there is an indication of impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Gains and losses on the disposal of an entity include the carrying amount of goodwill relating to the entity sold.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. The allocation is made to those cash-generating units or groups of cash-generating units that are expected to benefit from the business combination in which the goodwill arose.

(ii) Sponsorship fees

Sponsorship fees paid and payable in relation to the 2010 Shanghai Expo have been capitalised and are being amortised on a straight-line basis over the period of the sponsorship program. The cost of the intangible asset is calculated based on the expected cash payment and the fair value of the services to be provided.

(iii) Computer software costs

Acquired computer software licenses are capitalised on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortised using the straight-line method over their estimated useful lives of 5 to 6 years. Costs associated with developing or maintaining computer software programmes are recognised as expense when incurred.

(m) Property, plant and equipment

Property, plant and equipment is recognised initially at cost which comprises purchase price, and any directly attributable costs of bringing the assets to the condition for their intended use.

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately.

When each major aircraft overhaul is performed, its cost is recognised in the carrying amount of the item of property, plant and equipment and is depreciated over the appropriate maintenance cycles. Components related to airframe overhaul cost, are depreciated on a straight-line basis over 5 to 7.5 years. Components related to engine overhaul costs, are depreciated between each overhaul period using the ratio of actual flying hours and estimated flying hours between overhauls. Upon completion of an overhaul, any remaining carrying amount of the cost of the previous overhaul is derecognised and charged to the income statement.

– 135 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

Except for components related to overhaul costs, the depreciation method of which has been described in the preceding paragraph, other depreciation of property, plant and equipment is calculated using the straight-line method to write down their costs or revalued amounts to their residual values over their estimated useful lives, as follows:

Aircraft, engines and flight equipment	10 to 20 years
Buildings	15 to 35 years
Other property, plant and equipment	5 to 20 years

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are determined by comparing the proceeds with the assets' carrying amount and are recognised in the income statement.

Construction in progress represents buildings under construction and plant and equipment, being mainly flight simulators, pending installation. This includes the costs of construction or acquisition and interest capitalised. No depreciation is provided on construction in progress until the asset is completed and ready for use.

(n) Impairment of investments in subsidiaries, associates, jointly controlled entities and non-financial assets

Assets that have an indefinite useful life or which are not yet available for use are not subject to amortisation and are tested for impairment at least annually or whenever there is indication of impairment. Other assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that have suffered an impairment are reviewed for possible reversal of the impairment at each balance sheet date.

(o) Lease prepayments

Lease prepayments represent acquisition costs of land use rights less accumulated amortisation. Amortisation is provided over the lease period of the land use rights on a straight-line basis.

(p) Advanced payments on acquisition of aircraft

Advanced payments on acquisition of aircraft represent payments to aircraft manufacturers to secure deliveries of aircraft in future years, including attributable finance costs, and are included in non-current assets. The balance is transferred to property, plant and equipment upon delivery of the aircraft.

(q) Flight equipment spare parts

Flight equipment spare parts are stated at the lower of cost and net realisable value. Cost is determined using the weighted average method. The cost of flight equipment spare parts comprises the purchase price (net of discounts), freight charges, duty and value added tax and other miscellaneous charges. Net realisable value is the estimated selling

price of the flight equipment in the ordinary course of business, less applicable selling expenses.

- 136 -

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

(r) Trade receivables

Trade receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment. A provision for impairment of trade receivables is established when there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments are considered indicators that the trade receivable is impaired. The amount of the provision is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. The carrying amount of the assets is reduced through the use of an allowance account, and the amount of the loss is recognised in the income statement. When a trade receivable is uncollectible, it is written off against the provision account for trade receivables. Subsequent recoveries of amounts previously written off are credited in the income statement.

(s) Cash and cash equivalents

Cash and cash equivalents includes cash in hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months or less.

(t) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently stated at amortised cost; any differences between the proceeds (net of transaction costs) and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the balance sheet date.

(u) Provisions

Provisions are recognised when the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resources will be required to settle the obligation; and the amount can be reliably estimated.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

(v) Leases

(i) A Group company is the lessee

Finance leases

The Group leases certain property, plant and equipment. Leases of property, plant and equipment where the Group has acquired substantially all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalised at the lease's commencement at the lower of the fair value of the leased property and the present value of the minimum lease payments.

Each lease payment is allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in other short-term and other long-term payables. The interest element of the finance cost is charged to the income statement over the lease period so as to produce a constant periodic rate of interest on the remaining balance of the liability for each period. Leased assets are depreciated using a straight-line basis over their expected useful lives to residual values.

– 137 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

For sale and leaseback transactions resulting in a finance lease, differences between sales proceeds and net book values are deferred and amortised over the minimum lease terms.

Operating leases

Leases in which a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

For sale and leaseback transactions resulting in an operating lease, differences between sales proceeds and net book values are recognised immediately in the income statement, except to the extent that any profit or loss is compensated for by future lease payments at above or below market value.

(ii) A Group company is the lessor

Assets leased out under operating leases are included in property, plant and equipment in the balance sheet. They are depreciated over their expected useful lives on a basis consistent with similar property, plant and equipment. Rental income is recognised on a straight-line basis over the lease term.

(w) Retirement benefits

The Group participates in defined contribution retirement schemes regarding pension and medical benefits for employees organised by the municipal governments of the relevant provinces. The contributions to the schemes are charged to the income statement as and when incurred.

In addition, the Group provides retirees with post-retirement benefits including retirement subsidies, transportation subsidies, social function activity subsidies as well as other welfare. The liability recognised in the balance sheet in respect of defined benefit pension plans is the present value of the defined benefit obligation at the balance sheet date less the fair value of plan assets, together with adjustments for unrecognised actuarial gains or losses and past service costs. The defined benefit obligation is calculated annually using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of government bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension liability. Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions in excess of the greater of 10% of the value of plan assets or 10% of the defined benefit obligation are charged or credited to the income statement over the employees' expected average remaining working lives.

Past-service costs are recognised immediately in the income statement, unless the changes to the pension plan are conditional on the employees remaining in service for a specified period of time (the vesting period). In this case, the past-service costs are amortised on a straight-line basis over the vesting period.

(x) Derivative financial instruments

Derivative financial instruments are initially recognised in the balance sheet at fair value on the date a derivative contract is entered into and are subsequently remeasured at their fair value. The accounting for subsequent changes in fair value depends on whether the derivative is designated as a hedging instrument, and if so, the nature of the item

being hedged.

- 138 -

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

The Group documents, at the inception of the transaction, the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions. The Group also documents its assessment, both at hedge inception and on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

Derivative financial instruments that do not qualify for hedge accounting are accounted for as trading instruments and any unrealised gains or losses, being changes in fair value of the derivatives, are recognised in the income statement immediately.

Changes in the fair value of derivatives that are designated and qualify as fair value hedges and that are highly effective, are recorded in the income statement, along with any changes in the fair value of the hedged assets or liabilities that are attributable to the hedged risk.

Derivative financial instruments that qualify for hedge accounting and which are designated as a specific hedge of the variability in cashflows of a highly probable forecast transaction, are accounted for as follows:

- (i) the effective portion of any change in fair value of the derivative financial instrument is recognised directly in equity. Where the forecast transaction or firm commitment results in the recognition of an asset or a liability, the gains and losses previously deferred in equity are included in the initial measurement of the cost of the asset or liability. Otherwise, the cumulative gain or loss on the derivative financial instrument is removed from equity and recognised in the income statement in the same period during which the hedged forecast transaction affects net profit or loss.
- (ii) the ineffective portion of any change in fair value is recognised in the income statement immediately.

The full fair value of a hedging derivative is classified as a non-current asset or liability when the remaining maturity of the hedged items is more than 12 months, and as a current asset or liability when the remaining maturity of the hedged item is less than 12 months. Trading derivatives are classified as a current asset or liability.

When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in equity at that time remains in equity and is recognised in the income statement when the committed or forecast transaction ultimately occurs. When a committed or forecast transaction is no longer expected to occur, the cumulative gain or loss that was recorded in equity is immediately transferred to the income statement.

(y) Available-for-sale financial assets

Investments in securities other than subsidiaries, associates and jointly controlled entities, being held for non-trading purposes, are classified as available-for-sale financial assets and are recognised on the trade-date — the date on which the Group commits to purchase or sell the asset. Investments are initially recognised at fair value plus transaction costs. At each balance sheet date, the fair value is remeasured, with any resulting gain or loss being recognised directly in equity, except for impairment losses. When these investments are derecognised, the cumulative gain or loss previously recognised directly in equity is recognised in the income statement.

The Group assesses at each balance sheet date whether there is objective evidence that a financial asset is impaired. In the case of equity securities classified as available for sale, a significant or prolonged decline in the fair value of the

securities below its cost is considered an indicator that the securities are impaired. If any such evidence exists for available-for-sale financial assets, the cumulative loss, measured as the difference between the acquisition cost and the current fair value less any impairment loss on that financial asset previously recognised in the income statement, is removed from equity and recognised in the income statement. Impairment losses recognised in the income statement on equity instruments are not reversed through the income statement.

FINANCIAL INFORMATION ON THE GROUP

(z)

Dividend distribution

Dividend distribution to the Company's shareholders is recognised as a liability in the financial statements in the period in which the dividends are approved by the Company's shareholders.

(aa)

Comparatives

Where necessary, prior year amounts have been reclassified to conform with changes in presentation in the current year. The major reclassifications for the 2007 comparative figures include reclassification of certain items in the consolidated cash flow statement between "financing activities" and "operating activities".

3.

FINANCIAL RISK MANAGEMENT

(a)

Financial risk factors

The Group's activities expose it to a variety of financial risks: market risk (including currency risk, fair value interest rate risk, cash flow interest rate risk and fuel price risk), credit risk, and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to manage certain risk exposures.

Risk management is carried out by a central treasury department (the "Group Treasury") under policies approved by the Board of Directors. The Group Treasury identifies, evaluates and hedges financial risks in close co-operation with the Group's operating units. The Board provides written principles for overall risk management, as well as written policies covering specific areas, such as foreign exchange risk, interest-rate risk, credit risk, use of derivative financial instruments and non-derivative financial instruments.

(i)

Foreign currency risk

Since 21 July 2005, the PRC government reformed the Renminbi exchange rate system and established a floating exchange rate system in which the exchange rate would be adjusted and managed based on market supply and demand with reference to a basket of foreign currencies. The fluctuation in Renminbi exchange rate is affected by the domestic and international economy, the political situation and the currency supply and demand of the currency, and thus the Renminbi exchange rate in the future may therefore be very different from the current exchange rate.

The Group operates its business in many countries and territories. The Group generates its revenue in different currencies, and its foreign currency liabilities at the end of the period are much higher than its foreign currency assets. The Group's major liability item (purchases and leases of aircraft) is mainly priced and settled in currencies such as US dollars. In addition, fluctuations in exchange rates will affect the Group's costs incurred from foreign purchases such as aircraft, flight equipment and aviation fuel, and take-off and landing charges in foreign airports.

The Group also has exposure to foreign currency risk in respect of net cash inflow denominated in Japanese Yen from ticket sales in overseas branch office after payment of expenses. The Group entered into certain foreign exchange forward option contracts to manage this foreign currency risk. Details of foreign currency forward contracts are disclosed in Note 38(b) to the financial statements.

(ii)

Interest rate risk

The Group's interest-rate risk primarily arises from borrowings. Borrowings issued at variable rates expose the Group to cash flow interest-rate risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate risk. During 2008 and 2007, the Group's borrowings at variable rates were primarily denominated in US dollars. The interest rates and terms of repayment of borrowings made to the Group and interest rate swaps are disclosed in Notes 32 and 38(a) to the financial statements.

To hedge against the variability in the cash flows arising from a change in market interest rates, the Group has entered into certain interest rate swaps to swap variable rates into fixed rates. The Group also entered certain interest rate swaps to swap fixed assets into variable rates.

The following table details the Group's and the Company's interest rate profile of the interest-bearing financial instruments at the balance sheet date.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

The following table indicates the approximate change in the Group's and the Company's profit and loss and other components of equity if interest rate had been 0.25% higher with all other variables held constant.

	2008		2007	
	Effect on profit and loss RMB'000	Effect on other components of equity RMB'000	Effect on profit and loss RMB'000	Effect on other components of equity RMB'000
Floating rate instruments	(77,592)	10,299	(57,681)	27,872

(iii) Fuel price risk

The Group's results of operations may be significantly affected by fluctuations in fuel prices which is a significant expense for the Group. Aircraft fuel accounts for 33% of the Group's operating expenses (2007 : 35%). The Group has entered into certain financial derivatives to hedge against fuel price risk. Details of fuel option contracts are disclosed in Note 38(c) to the financial statements.

For the year 2008, if fuel price had been 5% higher/lower with all other variables held constant (excluding the impact of fuel option contracts), the Group's fuel cost would have been RMB900 million higher/lower.

For the years ended, if fuel price had been 5% higher/lower with all other variables held constant, the impact on financial derivatives is shown below.

	2008		2007	
	Effect on profit and loss RMB'000	Effect on other components of equity RMB'000	Effect on profit and loss RMB'000	Effect on other components of equity RMB'000
Net increase in fuel price	497,879	—	8,766	—
Net decrease in fuel price	(500,690)	—	(17,531)	—

(iv) Credit risk

The Group's credit risk is primarily attributable to cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to sales agents. The Group has a credit policy in place to monitor the exposures to these credit risks on an on-going basis.

The Group has policies in place to ensure that sales of blank tickets are only made available to sales agents with an appropriate credit history. A major portion of sales are conducted through sales agents and the majority of these agents are connected to various settlement plans and/or clearing systems which impose requirements on the credit standing.

A significant portion of the Group's air tickets are sold by agents participating in the Billing and Settlements Plan ("BSP"), a clearing system between airlines and sales agents organised by the International Air Transportation

Association. The balance due from BSP agents amounted to approximately RMB515 million as at 31 December 2008 (2007 : RMB896 million).

Except for the above, the Group has no significant concentration of credit risk, with the exposure spreading over a number of counterparties.

- 143 -

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

Further quantitative disclosures in respect of the Group's exposure to credit risk arising from trade receivables are set out in Note 26.

The Group's cash management policy is to deposit cash and cash equivalents mainly in state-owned banks and other banks, which are highly rated by an international credit rating company. The Group also deposits cash and cash equivalents in an associate financial institution owned by its holding company (Note 44(b)(iii)). The management does not expect any loss to arise from non-performance by these banks and the financial institution.

Transactions in relation to derivative financial instruments are only carried out with financial institutions of high reputation. The Group has policies that limit the amount of credit exposure to any one financial institution. Management does not expect any losses from non-performance by these banks.

(v)

Liquidity risk

The Group's primary cash requirements have been for additions of and upgrades to aircraft, engines and flight equipment and payments on related borrowings. The Group finances its working capital requirements through a combination of funds generated from operations and both short and long term bank loans. The Group generally finances the acquisition of aircraft through long-term finance leases and bank loans.

The Group operates with a working capital deficit. As at 31 December 2008, the Group's net current liabilities amounted to RMB43,458 million (2007 : RMB26,098 million). For the year ended 31 December 2008, the Group recorded a net cash inflow from operating activities of RMB2,856 million (2007 : inflow RMB3,080 million), a net cash outflow from investing activities and financing activities of RMB1,017 million (2007 : outflow RMB3,396 million), and an increase in cash and cash equivalents of RMB1,796 million (2007 : decrease RMB332 million).

The Directors of Company believe that cash from operations and short and long term bank borrowings will be sufficient to meet the Group's operating cashflow. Due to the dynamic nature of the underlying businesses, the Group's treasury policy aims at maintaining flexibility in funding by keeping credit lines available. The Directors of the Company believe that the Group has obtained sufficient general credit facilities from PRC banks for financing future capital commitments and for working capital purposes (see Notes 2(a) and 47).

FINANCIAL INFORMATION ON THE GROUP

Management monitors rolling forecasts of the Group's liquidity reserves on the basis of expected cash flows:

The table below analysis the Group's financial liabilities that will be settled into relevant maturity groupings based on the remaining period at the balance sheet to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows. Balances due within 12 months equal their carrying balances, as the impact of discounting is not significant.

(b) Capital risk management

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

– 145 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debt.

Consistent with others in the industry, the Group monitors capital on the basis of the gearing ratio. This ratio is calculated as net debt divided by total capital. Net debt is calculated as total borrowings less cash and cash equivalents. Total capital is calculated as equity, as shown in the consolidated balance sheet, plus net debt.

The gearing ratios at 31 December 2008 and 2007 were as follows:

	2008 RMB'000	2007 RMB'000
Total borrowings	35,101,372	29,863,828
Less: Cash and cash equivalents	(3,451,010)	(1,655,244)
Net debt	31,650,362	28,208,584
Total equity	(12,639,509)	2,932,556
Total capital	19,010,853	31,141,140
Gearing ratio	1.66	0.91

(c) Fair value estimation of financial assets and liabilities

The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the balance sheet date. The quoted market price used for financial assets held by the Group is the current bid price; the quoted market price used for financial liabilities is the current asking price.

The fair value of financial instruments that are not traded in an active market is determined by using valuation techniques. The Group uses a variety of methods and makes assumptions that are based on market conditions existing at each balance sheet date. Quoted market prices or dealer quotes for similar instruments are used for long-term debt. Other techniques, such as estimated discounted cash flows, are used to determine fair value for the remaining financial instruments. The fair value of interest-rate swaps is calculated as the present value of the estimated future cash flows. The fair value of forward foreign exchange contracts is determined using forward exchange market rates at the balance sheet date. The fair value of fuel option contracts is determined by reference to mark-to-market values provided by counterparties and independent third parties applying appropriate option valuation models.

The fair values of other long-term receivables are based on cash flows discounted using a rate based on the borrowing rate. The fair value of financial liabilities for disclosure purposes is estimated by discounting the future contractual cash flows at the current market interest rate that is available to the Group for similar financial instruments (Notes 31 and 32).

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

Estimates and judgments used in preparing the financial statements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Estimated impairment of property, plant and equipment and intangible assets

The Group tests whether property, plant and equipment and intangible assets have been impaired in accordance with the accounting policy stated in Note 2(n) to the financial statements. The recoverable amounts of cash generating units have been determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management and the key assumption which are disclosed in Note 18(a).

(b) Revenue recognition

The Group recognises passenger, cargo and mail revenues in accordance with the accounting policy stated in Note 2(f) to the financial statements. Unused tickets are recognised in traffic revenues based on current estimates. Management annually evaluates the balance in the Sales in advance of carriage account (“SIAC”) and records any adjustments, which can be material, in the period the evaluation is completed.

These adjustments result from differences between the estimates of certain revenue transactions and the timing of recognising revenue for any unused air tickets and the related sales price, and are impacted by various factors, including a complex pricing structure and interline agreements throughout the industry, which affect the timing of revenue recognition.

(c) Frequent flyer programme

The Company operates a frequent flyer programme called “Eastern Miles” that provides travel awards to programme members based on accumulated miles. A portion of passengers revenue attributable to the award of frequent flyer benefits is deferred and recognised when the miles have been redeemed or have expired. The deferment of revenue is estimated based on historical trends of redemptions, which is then used to project the expected utilisation of these benefits. Any remaining unutilised benefits are recognised as deferred revenue.

(d) Depreciation of components related to overhaul costs

Depreciation of components related to airframe and engine overhaul costs are based on the Group’s historical experience with similar airframe and engine models and taking into account anticipated overhauls costs, timeframe between each overhaul, ratio of actual flying hours and estimated flying hours between overhauls. Different judgments or estimates could significantly affect the estimated depreciation charge and materially impact the results of operations.

(e) Provision for costs of return condition checks for aircraft and engines under operating leases

Provision for the estimated costs of return condition checks for aircraft and engines under operating leases is made based on the estimated costs for such return condition checks and taking into account anticipated flying hours, flying cycle and timeframe between each overhaul. These judgments or estimates are based on historical experience on returning similar airframe and engine models, actual costs incurred and aircraft and engines status. Different judgments or estimates could significantly affect the estimated provision for costs of return condition checks.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

(f) Retirement benefits

The Group operates and maintains defined retirement benefit plans which provide retirees with benefits including transportation subsidies, social activity subsidies as well as other welfare. The cost of providing the aforementioned benefits in the defined retirement benefit plan is actuarially determined and recognised over the employees' service period by utilising various actuarial assumptions and using the projected unit credit method in accordance with the accounting policy stated in Note 2(w) to the financial statements. These assumptions include, without limitation, the selection of discount rate, annual rate of increase of per capita benefit payment and employees' turnover rate. The discount rate is based on management's review of local high quality corporate bonds. The annual rate of increase of benefit payments is based on the general local economic conditions. The employees' turnover rate is based on historical trends of the Group. Additional information regarding the retirement benefit plans is disclosed in Note 36 to the financial statements.

(g) Deferred income tax

In assessing the amount of deferred tax assets that need to be recognised in accordance with the accounting policy stated in Note 2(k) to the financial statements, the Group considers future taxable income and ongoing prudent and feasible tax planning strategies. In the event that the Group's estimates of projected future taxable income and benefits from available tax strategies are changed, or changes in current tax regulations are enacted that would impact the timing or extent of the Group's ability to utilise the tax benefits of net operating loss carry forwards in the future, adjustments to the recorded amount of net deferred tax assets and taxation expense would be made.

5. REVENUES

The Group is principally engaged in the operation of civil aviation, including the provision of passenger, cargo, mail delivery and other extended transportation services.

- (a) The government subsidies represent (i) subsidies granted by the Central Government and local government to the Group; and (ii) other subsidies granted by various local municipalities to encourage the Group to operate certain routes to cities where these municipalities are located.
- (b) The gains on disposal of property, plant and equipment represent (i) the gain arising from the sales of certain cargo freighters and engines which were leased back under operating lease and (ii) the disposal of certain aircraft recorded in “non-current assets held for sale” in 2007.

7. SEGMENT INFORMATION

In accordance with the Group’s internal financial reporting, the Group has determined that business segments be presented as the primary reporting format and geographical as the secondary reporting format.

(a) Primary reporting format by business segment

The Group has two business segments, namely passenger and cargo and logistics, which are structured and managed separately, according to the nature of their operations and the services they provide.

(1) Passenger business segment includes cargo carried by passenger flights.

- (2) Inter-segment transfers are transactions that are entered into under normal commercial terms and conditions that would also be available to unrelated third parties.

(b) Secondary reporting format by geographical segment

The Group's two business segments operate in four main geographical areas, even though they are managed on a worldwide basis.

– 151 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

The Group's revenues (net of business tax) by geographical segment are analyzed based on the following criteria:

- (1) Traffic revenue from services within the PRC (excluding the Hong Kong Special Administrative Region ("Hong Kong")) is classified as domestic operations. Traffic revenue from inbound and outbound services between the PRC, Hong Kong or overseas markets is attributed to the segments based on the origin and destination of each flight segment.
- (2) Revenue from ticket handling services, airport ground services and other miscellaneous services are classified on the basis of where the services are performed.

	Group	
	2008	2007
	RMB'000	RMB'000
Domestic (the PRC, excluding Hong Kong)	24,333,387	24,133,540
Hong Kong	2,474,088	2,694,857
Japan	3,512,222	3,643,244
Other countries	10,752,860	12,062,252
Total	41,072,557	42,533,893

The major revenue-earning assets of the Group are its aircraft, all of which are registered in the PRC. Since the Group's aircraft are deployed flexibly across its route network, there is no suitable basis of allocating such assets and the related liabilities to geographical segments and hence segment assets and capital expenditure by geographic segment have not been presented.

*Certain directors of the Company received emoluments from CEA Holding, the parent company, part of which were in respect of their services to the Company and its subsidiaries. No apportionment has been made as it is impracticable to apportion this amount between their services to the Group and their services to CEA Holding.

During the year ended 31 December 2008, no Directors and supervisors waived their emoluments (2007 : Nil).

(b) Five highest paid individuals

One of the vice executive Directors, whose emoluments are reflected in the above analysis was among the five highest paid individuals in the Group for 2008. The emoluments payable to the remaining four (2007 : four) highest paid individuals are as follows:

	Group	
	2008 RMB'000	2007 RMB'000

Wages, salaries, bonus and allowances	2,505	2,430

Other impairment charge	306,358	96,535
	2,976,678	227,456

Note:

- (a) For the year ended 31 December 2008, the Group recognised an impairment charge of RMB993 million against goodwill which had previously been recognised in connection with the Group's acquisition of Yunnan Airline, Xibei Airline and Wuhan Airline (Note 18).
- (b) In view of the decline in demand on the air transportation market under the current economic environment, the Group performed an impairment test on property, plant and equipment ("PP&E") as at 31 December 2008, based on which an impairment provision of RMB1,442 million was made against certain aircraft model and the related equipment which reflects their relatively lower operation efficiency and which management intend to retire in the near future. In determining the recoverable amounts of the related assets, management has compared the value in use and the fair value less costs to sell of the related assets, primarily determined by reference to estimated market values (Note 19).
- (c) After assessing the fair value less costs to sell as at the balance sheet date which was primarily determined by reference to estimated market value, an additional impairment loss of RMB235 million was made against certain aircraft and related flight equipment which have been classified as "non-current assets held for sale" (Note 41).

Prior to 2008, the Company and certain of its subsidiaries (the ‘‘Pudong Subsidiaries’’) located in Pudong District, Shanghai, were entitled to a reduced rate of 15% pursuant to the preferential tax policy in Pudong, Shanghai. Under the Corporate Income Tax Law of the People’s Republic of China (the ‘‘New CIT Law’’) which was approved by the National People’s Congress on 16 March 2007 and became effective from 1 January 2008, the Company and the Pudong Subsidiaries are entitled to enjoy a transitional period to gradually increase the applicable corporate income tax rate to 25% in coming five years. For the year ended 31 December 2008, the corporate income tax rate applicable to the Company and the Pudong Subsidiaries is 18%. Other subsidiaries of the Company, except for those incorporated in Hong Kong and being subject to the Hong Kong corporate income tax rate of 16.5%, are generally subject to the PRC standard corporate tax rate of 25% under the New CIT Law.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

Tax on the Group's consolidated income statement differs from the theoretical amount that would arise using the taxation rate of the home country of the Company as follows:

The Group operates international flights to overseas destinations. There was no material overseas taxation for the years ended 31 December 2008, as there are double tax treaties between the PRC and the corresponding jurisdictions (including Hong Kong) relating to aviation businesses.

15. DIVIDEND

No dividend was paid during both 2008 and 2007.

The Board of Directors of the Company has not recommended any dividend in respect of the year ended 31 December 2008.

16. (LOSS)/PROFIT ATTRIBUTABLE TO SHAREHOLDERS

The loss attributable to equity holders of the Company is dealt with in the financial statements of the Company to the extent of RMB13,877 million (2007 : profit of RMB505 million).

17. (LOSS)/EARNINGS PER SHARE

The calculation of basic loss per share is based on the loss attributable to equity holders of the Company of RMB15,269 million (2007 : a profit of RMB379 million) and the weighted average number of shares of 4,866,950,000 (2007 : 4,866,950,000) in issue during the year.

The Company has no potentially dilutive option or other instruments relating to ordinary shares.

Notes:

(a) Impairment tests for goodwill

The Group operates in two cash-generating units (“CGU”) which are passenger (including cargo carried by passenger flights) and cargo and logistics.

For the year ended 31 December 2008, the Group and the Company recognised impairment charge of RMB993 million and RMB688 million respectively, against goodwill which had previously been recognised in connection with the acquisition of Yunnan Airline, Xibei Airline and Wuhan Airline within the passenger CGU. The impairment charge recognised represents the amount by which the CGU’s carrying amount exceeds its recoverable amount.

– 159 –

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

The recoverable amount of a CGU is determined based on value-in-use calculations. These calculations use cash flow projections based on financial budgets approved by management.

Key assumptions used for cash flow projections are as following:

— Passenger yield growth rate	0% to 4.5%
— Passenger load factor	63% to 80%
— Aircraft daily utilization (hours per day)	5.4 to 11.4
— Discount rate	10%

Management determined budgeted passenger yield increase rate, load factor and aircraft daily utilization based on past performance and its expectations for market development. The discount rate used is pre-tax and reflects specific risks relating to the Group's business.

(b) Sponsorship fees

In March 2006, the Company entered into an agreement (the "Sponsorship Agreement") with the Bureau of 2010 Expo Shanghai (the "Bureau") which designated the Group as the exclusive airline passenger carrier in the PRC to sponsor the 2010 Shanghai Expo. The Company will be entitled to a number of rights, including but not limited to the use of the Expo logo in the Group's products, priority to purchase advertising space at the Expo site etc. In return, the Company is required to pay a total sponsorship fee of RMB320 million, RMB160 million of which would be paid in cash by instalments, the remaining RMB160 million would be settled by value-in-kind services ("VIK") (in the form of goods or services) to support the 2010 Shanghai Expo. Accordingly, an intangible asset has been recognised and amortised on straight-line basis over the period from the effective date of the Sponsorship Agreement to the completion of the Expo. The outstanding sponsorship fee of RMB178 million (2007 : 233 million) has been recognised as other long-term liabilities (Note 34) in the Group's balance sheet.

Notes:

- (a) In view of the decline in demand on the air transportation market under the current economic environment, the Group performed an impairment test on property, plant and equipment (“PP&E”) as at 31 December 2008, based on which an impairment provision of RMB1,442 million was made against certain aircraft model and the related equipment which reflects their relatively lower operation efficiency and which management intend to retire in the near future (Note 10). In determining the recoverable amounts of the related assets, management has compared the value in use and the fair value less costs to sell of the related assets, primarily determined by reference to estimated market values.

APPENDIX II

FINANCIAL INFORMATION ON THE GROUP

(b) Prepaid flight training expenses represent the training expenses prepaid for pilot undergraduates and pilots in service of the Group and are amortised over the relevant training periods for which the prepayments cover on a straight-line basis.

(c) Prepaid staff benefits represent subsidies to certain employees as an encouragement to purchase motor vehicles. The employees are required to continue serving the Group for six years from the date of receipt of the subsidies. If the employee leaves before the end of the six-year period, a refund by the employee is required to be calculated on a pro-rata basis. These subsidies are amortised over six years on the straight-line basis.

26. TRADE RECEIVABLES AND NOTES RECEIVABLE

The credit terms given to trade customers are determined on an individual basis, with the credit periods generally ranging from half a month to two months.

The aging analysis of trade receivables is as follows:

	Group		Company	
	2008 RMB'000	2007 RMB'000	2008 RMB'000	2007 RMB'000
Within 90 days	1,088,951	1,761,799	733,498	1,098,281

In accordance with the PRC tax law, tax losses can be carried forward to offset against future taxable income for a period of five years. As at 31 December 2008, the Group and the Company had tax losses carried forward of approximately RMB11,465 million and RMB8,778 million respectively (2007 : RMB5,380 million and RMB4,119 million respectively) which will expire between 2009 and 2013, and which are available to set off against the Group

and the Company's future taxable income. As at 31 December 2008, the Group and the Company did not recognise RMB2,864 million and RMB2,195 million respectively (2007 : RMB1,035 million and RMB718 million respectively) of deferred tax assets arising from tax losses available as management did not consider it probable that such tax losses would be realised before they expire.

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

36. RETIREMENT BENEFIT PLANS AND POST-RETIREMENT BENEFITS

(a) Defined contribution retirement schemes

(i) Pension

The Group companies participate in defined contribution retirement schemes organised by municipal governments of the various provinces in which the Group companies operate, and substantially all of the Group's PRC employees are eligible to participate in the Group companies' retirement schemes. The Group companies are required to make annual contributions to the schemes at rates ranging from 20% to 22% on the employees' prior year salary and allowances. Employees are required to contribute to the schemes at rates ranging from 7% to 8% of their basic salaries. The Group has no other material obligation for the payment of retirement benefits beyond the annual contributions under these schemes. For the year ended 31 December 2008, the Group's pension cost charged to the consolidated income statement amounted to RMB360 million (2007 : RMB296 million).

(ii) Medical insurance

The majority of the Group's PRC employees participate in the medical insurance schemes organised by the municipal governments, under which the Group and its employees are required to contribute to the scheme approximately 12% and 2%, respectively, of the employee's basic salaries. For those employees who participate in these schemes, the Group has no other obligation for the payment of medical expense beyond the annual contributions. For the year ended 31 December 2008, the Group's medical insurance contributions charged to the income statement amounted to RMB93 million (2007 : RMB77 million).

(b) Post-retirement benefits

In addition to the above retirement schemes, the Group provides retirees with other post-retirement benefits including transportation subsidies, social function activities subsidies and others. The expected cost of providing these post-retirement benefits is actuarially determined and recognised by using the projected unit credit method, which involves a number of assumptions and estimates, including inflation rate, discount rate and employees' turnover ratio.

The post-retirement benefit obligations recognised in the balance sheets are as follows:

	Group		Company	
	2008	2007	2008	2007
	RMB'000	RMB'000	RMB'000	RMB'000
Present value of unfunded post-retirement benefit obligations	4,481,420	2,155,393	3,941,724	1,861,036

Medical inflation rate	5%	2.5%–5%

37.

STAFF HOUSING BENEFITS

(a)

Staff housing fund

In accordance with the PRC housing reform regulations, the Group is required to contribute to the State-sponsored housing fund at rates ranging from 7% to 15% (2007 : 7% to 15%) of the specified salary amount of its PRC employees. At the same time, the employees are required to contribute an amount equal to the Group's contribution. The employees are entitled to claim the entire sum of the fund contributed under certain specified withdrawal circumstances. For the year ended 31 December 2008, the Group's contributions to the housing funds amounted to

RMB282 million (2007 : RMB285 million) which has been charged to the consolidated income statement. The staff housing fund payable as at 31 December 2008 is RMB25 million (2007 : RMB17 million). The Group has no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employees the benefits relating to employee service in the current and prior periods.

(b) Staff housing allowances

The Group also provides cash staff housing allowances to eligible employees who have not been allocated with any housing quarters or who have not been allocated with a quarter above the minimum as set out in the Group's staff housing allowance policy introduced in October 2003 (the "Policy") based on the area of quarter to which they are entitled and the unit price as set out in the Policy.

- 183 -

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

The total entitlement of an eligible employee is principally vested over a period of 20 years. Upon an eligible employee's resignation, his or her entitlement will cease and any unpaid entitlement related to past service up to the date of resignation will be paid. As at 31 December 2008, the present obligation of the provision for employee's staff housing entitlement is RMB386 million (2007 : RMB363 million).

For the year ended 31 December 2008, the staff housing benefit provided under the Staff Housing Allowance Policy amounted to RMB123 million (2007 : RMB53 million) which has been charged to the consolidated income statement.

The maximum exposure to credit risk at the reporting date is the fair value of the derivative assets in the balance sheet.

Notes:

(a) Interest rate swaps

The Group uses interest rate swaps to reduce the risk of changes in market interest rates (Note 3(a)(ii)). The Group's interest rate swaps qualify for hedge accounting. The interest rate swaps entered into by the Group are generally for swapping variable rates, usually referenced to LIBOR, into fixed rates and are accounted for as cashflow hedges. Other interest rate swaps are for swapping fixed rates into variable rates and are accounted for as fair value hedges. As at 31 December 2008, the notional amount of the outstanding interest rate swap agreements was approximately US\$471 million (2007 : US\$624 million). These agreements will expire between 2009 and 2016.

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

Realised and unrealised gains and losses arising from the valuation of these interest rate swaps have been dealt with in the income statements as follows:

	Group	
	2008	2007
	RMB'000	RMB'000
Realised (losses)/gain (recorded in finance costs)	10,083	59,862
Unrealised mark to market (losses)/gains

— fair value hedges (recognised in the income statement)	(49,535)	(8,824)
	(165,590)	(28,745)

(b) Forward foreign exchange contracts

The Group uses forward foreign exchange contracts to reduce the risk of changes in currency exchange rates in respect of ticket sales and expenses denominated in foreign currencies (Note 3(a)(i)). The Group's forward foreign exchange contracts qualify for hedge accounting. These contracts are generally for selling Japanese Yen and purchasing U.S. dollars at fixed exchange rates and are accounted for as cash flow hedges. Other forward foreign exchange contracts are for selling Japanese Yen and purchasing U.S. dollars at variable exchange rates and are accounted for as fair value hedges. As at 31 December 2008, the notional amount of the outstanding currency forward contracts was approximately US\$121 million (2007 : US\$33 million), which will expire between 2009 and 2017.

Realised and unrealised gains and losses arising from the valuation of these contracts have been dealt with in the income statements as follows:

	Group	
	2008	2007
	RMB'000	RMB'000
Realised (losses)/gain (recorded in finance income)	14,759	17,932
Unrealised mark to market (losses)/gains		
— cash flow hedges (recognised in equity)	(44,222)	1,586
— fair value hedges (recognised in the income statement)	(95,666)	(3,787)
	(125,129)	15,731

(c) Fuel option contracts

The Group enters into fuel hedging contracts to reduce the risk of changes in market oil/petroleum prices as a hedge against aircraft fuel costs. The fuel hedging contracts used by the Group are normally structured to include a combination of both put and call options which allow the Group to lock in fuel prices for specified volumes within a price range. In each hedging contract, the call options price at which the Group is effectively entitled to buy fuel will be higher than that at which the counterparty is effectively entitled to sell.

None of the fuel hedging contracts entered into by the Group in 2008 or which remained open at 31 December 2008 qualified for hedge accounting. The Group is required to account for the fair value of the difference between the spot price of fuel and the price at which the counterparties are effectively entitled to sell in future periods as unrealised mark to market losses and recognised these losses in the income statements immediately.

– 185 –

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

Realised and unrealised gains and losses arising from the valuation of these contracts have been dealt with in the income statements.

	Group	
	2008	2007
	RMB'000	RMB'000
Realised (losses)/gains (recorded in aircraft fuel)	(8,577)	120,171

	(6,264,368)	216,747

The fair value of fuel option contracts is determined by reference to mark-to-market values provided by counterparties and independent third parties applying appropriate option valuation models (i.e. mean regression model using the Monte Carlo Simulation Process). Key parameters used in the valuation models include volatility, credit spread, long run mean and mean reverting ratio at date of valuation.

Notes:

(a) Statutory and Discretionary Reserves

Pursuant to the PRC regulations and the Companies' Articles of Association, each of the Group companies is required to transfer 10% of its profit for the year, as determined under the PRC Accounting Regulations, to a statutory common reserve fund until the fund balance exceeds 50% of the Group company's registered capital. The statutory common reserve fund can be used to make good previous years' losses, if any, and to issue new shares to shareholders in

proportion to their existing shareholdings or to increase the par value of the shares currently held by them, provided that the balance after such issue is not less than 25% of the registered capital.

Each of the Group companies is permitted to transfer 5% of its profit for the year as determined under the PRC Accounting Regulations, to a discretionary common reserve fund. The transfer to this reserve is subject to approval at shareholders' meetings.

No profit appropriation by the Company to the discretionary common reserve fund was made for the year ended 31 December 2008 (2007 : nil).

(b) Capital reserve

Capital reserve represents the difference between the fair value of the net assets injected and the nominal amount of the Company's share capital issued in respect of a group restructuring carried out in June 1996 for the purpose of the Company's listing.

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

41. NON-CURRENT ASSETS HELD FOR SALE

In December 2006, the Board of Directors passed a resolution to dispose of certain older aircrafts and related flight equipments in the forthcoming 12-months. Accordingly, these aircrafts together with related flight equipments and spare parts were classified as non-current assets held for sale as at 31 December 2006. Despite of the Company's continuing effort to locate and negotiate with potential buyers, no agreement to dispose these assets has been reached. It is management's intention to dispose these assets in the forthcoming 12-months and management is continuing to take active step to locate potential buyers of these assets. They have therefore been still classified as non-current assets held for sale as of 31 December 2008. An impairment loss of RMB235 million has been recognised in the income statement in relation to these assets with reference to the estimated market values as at the balance sheet date (Note 10(c)).

APPENDIX II

FINANCIAL INFORMATION OF THE GROUP

44. RELATED PARTY TRANSACTIONS

The Group is controlled by CEA Holding, which owns approximately 59.67% of the Company's shares as at 31 December 2008. The aviation industry in the PRC is administrated by the CAAC. CEA Holding and the Group is ultimately controlled by the PRC government, which also controls a significant portion of the productive assets and entities in the PRC (collectively referred as the "SOEs").

(a) Related party transactions

The Group sells air tickets through sales agents and is therefore likely to have extensive transactions with other state-controlled enterprises, and the employees and their close family members of SOEs while such employees are on corporate business. These transactions are carried out on normal commercial terms that are consistently applied to all of the Group's customers. Due to the large volume and the pervasiveness of these transactions, management is unable to determine the aggregate amount of the transactions for disclosure. Therefore, retail transactions with these related parties are not disclosed herein. The Directors of the Company believe that meaningful related party disclosures on these retail transactions have been adequately made.

The other related party transactions are:

ULTIMATE HOLDING COMPANY

The Directors regard CEA Holding, a state-owned enterprise established in the PRC, as being the ultimate holding company.

46.

CONTINGENT LIABILITIES

In 2005, the family members of certain victims in the aircraft accident (the aircraft was then owned and operated by China Eastern Air Yunnan Company), which occurred in Baotou on 21 November 2004, sued the Company in a U.S. court for compensation. On 5 July 2007, pursuant to several conditions with which the Company has complied, the Superior Court of the State of California ordered the action stayed on the grounds of forum non conveniens for the purpose of permitting proceedings in the PRC. On 20 February 2008, the plaintiffs filed a motion with the Superior Court of the State of California to lift the stay, but the motion was rejected by the court on 6 May 2008. The plaintiffs filed a second motion to lift the stay on 10 July 2008. On 27 August 2008, the Superior Court of the State of California rejected the motion of the plaintiffs again. After the case entered the procedures on appeal in the California Court of Appeal, the Court of Appeal of California issued an opinion on 26 February 2009, dismissing the appeal of the plaintiffs and affirming the original order. On 16 March 2009, the Chinese counsel of the plaintiff sued the Company on behalf of the family members of victims in the Beijing No. 2 Intermediate People's Court. The case is under the filing procedure and no official summons from the court has been received by the Company. The management of the Group believe that a negative outcome of the case will not have an adverse effect on the financial condition and results of operations of the Company. The Group intends to provide updates to the shareholders regarding the progress of the litigation. As at 31 December 2008, the Group was not involved in any other litigation, arbitration or claim of material importance.

APPENDIX III UNAUDITED PRO FORMA FINANCIAL
INFORMATION OF THE ENLARGED GROUP

Notes:

1. The balances are extracted from the unaudited condensed consolidated balance sheet of the Group as at 30 June 2009 as set out in the interim result announcement dated 10 August 2009, which is set out in Appendix II to this circular.
2. The adjustment represents the inclusion of the statement of assets and liabilities of the Target Group as at 30 June 2009 as extracted from the accountant's report of the Target Group as set out in Appendix I to this circular.
3. The adjustments reflect the allocation of the cost of the acquisition to the identifiable assets and liabilities of the Target Group, which represents:

- (a) fair value adjustment of the identifiable assets and liabilities of the Target Group

Upon completion of the Proposed Acquisition, the identifiable assets and liabilities of the Target Group will be accounted for in the consolidated financial statements of the Enlarged Group at fair value under the purchase method of accounting in accordance with International Financial Reporting Standard No. 3 "Business Combinations" ("IFRS 3"). The identifiable assets and liabilities of the Target Group are recorded in the unaudited pro forma consolidated statement of assets and liabilities of the Enlarged Group at their fair values estimated by the Directors with reference to a valuation report issued by an independent valuer. The pro forma adjustments represent the fair value adjustments on property, plant and equipment, intangible assets and lease prepayments of the Target Group amounting to RMB1,700,625,000 in negative, RMB379,355,000 and RMB368,351,000 respectively.

- (b) recognition of goodwill

Goodwill represents the excess of the cost of the acquisition over the estimated fair value of the identifiable net assets of the Target Group. The cost of acquisition is calculated based on the Company's 1,694,838,860 A Shares to be issued in connection with the Proposed Acquisition and the average trading price of A Share at RMB5.28 for a period of 20 trading days up to and including 5 June 2009, being the last trading day immediately before the suspension of trading of A Shares on the Shanghai Stock Exchange prior to 30 June 2009. The estimated fair value of the identified net assets of the Target Group as at 30 June 2009 is determined based on the Target Group's net asset value attributable to the equity holders of the Target Company amounting to RMB350,870,000 and the fair value adjustments on property, plant and equipment, intangible assets and lease prepayments as set out in Note 3(a) above.

Since the closing share price of A share on the date of Completion and the fair value of the identifiable assets and liabilities of the Target Group at the date of Completion may be substantially different from their respective values used in the Unaudited Pro Forma Financial Information, the final amount of goodwill may be different from the amount presented above.

4. No other adjustment has been made to reflect any trading result or other transaction of the Group and the Target Group entered into subsequent to 30 June 2009.

APPENDIX III UNAUDITED PRO FORMA FINANCIAL
INFORMATION OF THE ENLARGED GROUP

(III) REPORT ON UNAUDITED PRO FORMA FINANCIAL INFORMATION OF THE ENLARGED GROUP

The following is the text of a report received from PricewaterhouseCoopers, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this circular.

ACCOUNTANT'S REPORT ON UNAUDITED PRO FORMA FINANCIAL INFORMATION TO THE
DIRECTORS OF CHINA EASTERN AIRLINES CORPORATION LIMITED

We report on the unaudited pro forma financial information set out on pages 197 to 200 under the heading of "Unaudited Pro Forma Financial Information of the Enlarged Group" (the "Unaudited Pro Forma Financial Information") in Appendix III of the circular dated 25 August 2009 (the "Circular") of China Eastern Airlines Corporation (the "Company"), in connection with the proposed acquisition of Shanghai Airlines Co., Ltd. (the "Proposed Acquisition") by the Company. The Unaudited Pro Forma Financial Information has been prepared by the directors of the Company, for illustrative purposes only, to provide information about how the Proposed Acquisition might have affected the relevant financial information of the Company and its subsidiaries (hereinafter collectively referred to as the "Group"). The basis of preparation of the Unaudited Pro Forma Financial Information is set out on pages 197 to 200 of the Circular.

Respective Responsibilities of Directors of the Company and the Reporting Accountant

It is the responsibility solely of the directors of the Company to prepare the Unaudited Pro Forma Financial Information in accordance with rule 4.29 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "Listing Rules") and Accounting Guideline 7 "Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars" issued by the Hong Kong Institute of Certified Public Accountants (the "HKICPA").

It is our responsibility to form an opinion, as required by rule 4.29(7) of the Listing Rules, on the Unaudited Pro Forma Financial Information and to report our opinion to you. We do not accept any responsibility for any reports previously given by us on any financial information used in the compilation of the Unaudited Pro Forma Financial Information beyond that owed to those to whom those reports were addressed by us at the dates of their issue.

APPENDIX III UNAUDITED PRO FORMA FINANCIAL
 INFORMATION OF THE ENLARGED GROUP

Basis of Opinion

We conducted our engagement in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 300 “Accountants’ Reports on Pro Forma Financial Information in Investment Circulars” issued by the HKICPA. Our work, which involved no independent examination of any of the underlying financial information, consisted primarily of comparing the unaudited consolidated statement of assets and liabilities of the Group as at 30 June 2009 with the unaudited condensed consolidated financial statements of the Group as at 30 June 2009, considering the evidence supporting the adjustments and discussing the Unaudited Pro Forma Financial Information with the directors of the Company.

We planned and performed our work so as to obtain the information and explanations we considered necessary in order to provide us with sufficient evidence to give reasonable assurance that the Unaudited Pro Forma Financial Information has been properly compiled by the directors of the Company on the basis stated, that such basis is consistent with the accounting policies of the Group and that the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to rule 4.29(1) of the Listing Rules.

Our work has not been carried out in accordance with auditing standards or other standards and practices generally accepted in the United States of America or auditing standards of the Public Company Accounting Oversight Board (United States) and accordingly should not be relied upon as if it had been carried out in accordance with those standards and practices.

The Unaudited Pro Forma Financial Information is for illustrative purposes only, based on the judgements and assumptions of the directors of the Company, and, because of its hypothetical nature, does not provide any assurance or indication that any event will take place in the future and may not be indicative of the financial position of the Group as at 30 June 2009 or any future date.

Opinion

In our opinion:

- a) the Unaudited Pro Forma Financial Information has been properly compiled by the directors of the Company on the basis stated;
- b) such basis is consistent with the accounting policies of the Group; and
- c) the adjustments are appropriate for the purposes of the Unaudited Pro Forma Financial Information as disclosed pursuant to rule 4.29(1) of the Listing Rules.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

In 2007, the rapid growth of demand in the aviation market contributed to a substantial growth of the revenue of the Target Group. In the year of 2008 there was a slowdown of the growth rate of the Target Group's revenue, followed by a decrease of revenue for the period from January to June 2009, with the following primary reasons: (1) the quick decrease of demand in the aviation market under the overall economic adjustments on a global basis against the backdrop of the financial crisis; (2) the significant impact in terms of international passenger and cargo transportation in Shanghai, which has its economy more outward-oriented as a leading city in Yangtze River Delta; (3) the occurrence of natural disasters and the unexpected circumstances in 2008 as well as the spread of H1N1 flu in 2009 also had, to a certain extent, adverse impact on the demand for aviation.

Other Income

For 2006, 2007, 2008 and the period from January to June 2009, other operating income generated by the Target Group amounted to RMB4 million, RMB45 million, RMB82 million and RMB315 million respectively. The larger amount of other operating income for the period from January to June 2009 was mainly a result of the return of civil aviation infrastructure levies paid.

Operating Expenses

Operating expenses incurred by the Target Group in 2006, 2007, 2008 and the period from January to June 2009 amounted to RMB9,724 million, RMB12,444 million, RMB14,451 million and RMB5,725 million respectively, mainly comprising aircraft fuel expenses, take-off and landing charges, depreciation and amortization, wages, salaries and benefits expenses, aircraft maintenance expenses, aircraft operating lease rentals, transportation and accommodation expenses and loss/gain on fair value movements of derivative financial instrument.

(1) Aircraft fuel

For 2006, 2007, 2008 and the period from January to June 2009, the aircraft fuel expenses of the Target Group amounted to RMB2,770 million, RMB3,704 million, RMB4,958 million and RMB1,400 million, accounting for 28.49%, 29.76%, 34.31% and 24.46% respectively of its operating expenses. The continual upsurge of aircraft fuel cost in 2007 and 2008 was mainly due to the fact that international oil prices sustained at a high level. The decrease in international oil prices in the first half of 2009 pulled down the cost of the Target Group's aircraft fuel.

(2) Take-off and landing charges

For 2006, 2007, 2008 and the period from January to June 2009, the take-off and landing charges of the Target Group amounted to RMB855 million, RMB1,046 million, RMB1,128 million and RMB588 million respectively, accounting for 8.79%, 8.40%, 7.80% and 10.26% respectively of the Target Group's operating expenses. The growth of the take-off and landing charges was mainly due to the increase in the number of take-offs and landings of aircraft as a result of the expansion of its scale of operations. Since 1 March 2008, there was a certain degree of increase in the unit price of aircraft take-off and landing, under the adjustment of the fee-charging policy applicable to civil airports in the PRC. This was also an important reason for the growth of take-off and landing charges incurred by the Target Group in 2008 and the first half of 2009.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

(3) Depreciation and amortization

For 2006, 2007, 2008 and the period from January to June 2009, the depreciation and amortization of the Target Group amounted to RMB654 million, RMB747 million, RMB726 million and RMB415 million respectively. The persistent increase was mainly due to the increase in the number of aircraft.

(4) Wages, salaries and benefits

For 2006, 2007, 2008 and the period from January to June 2009, the wages, salaries and benefits of the Target Group amounted to RMB902 million, RMB1,192 million, RMB1,412 million and RMB778 million respectively. For the period from the end of 2006 to the first half of 2009, the Target Group had its headcount increasing from 4,542 to 5,754. The expansion in the size of its staff and the increase in wages and salaries contributed to the growth of the Target Group's wages, salaries and benefits expenses.

(5) Aircraft maintenance

For 2006, 2007, 2008 and the period from January to June 2009, the aircraft maintenance expenses incurred by the Target Group amounted to RMB493 million, RMB726 million, RMB963 million and RMB386 million. The growth was primarily attributable to the expansion of the scale of its fleet.

(6) Aircraft operating lease rentals

For 2006, 2007, 2008 and the period from January to June 2009, the Target Group's aircraft operating lease rentals amounted to RMB798 million, RMB1,103 million, RMB1,195 million and RMB590 million respectively. The growth was primarily due to the increase in the number of aircraft under operating lease which in turn was a result of the expansion of the scale of its fleet.

(7) Transportation and accommodation

For 2006, 2007, 2008 and the period from January to June 2009, the Target Group's transportation and accommodation expenses amounted to RMB1,034 million, RMB1,223 million, RMB1,244 million and RMB458 million respectively. The growth was primarily attributable to the expansion of the scale of its tour operations.

(8) Loss/gain on fair value movements of derivative financial instrument

The use of hedging contract against the risk of oil price upsurge adopted by the Target Group was implemented since 2008 and there was no loss/gain on fair value movements of derivative financial instrument in 2006 and 2007. In 2008, it was a loss on fair movement of derivative financial instrument amounting to RMB182 million, whereas for the period from January to June 2009 it was a gain amounting to RMB52 million. The primary reason was the substantial drop in international oil prices in the second half of 2008, contributing to a loss on the fair value of the Target Group's 2-year WTI hedging contracts. In the first half of 2009 when international oil prices picked up, there was a reversal of the loss in relation to that part of the fair value.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

Finance income

For 2006, 2007, 2008 and the period from January to June 2009, the finance income of the Target Group amounted to RMB143 million, RMB283 million, RMB297 million and RMB12 million respectively. Finance income comprises primarily net foreign exchange gain. From 2006 to 2008, the persistent increase in the exchange rate of RMB contributed to the continual increase in net foreign exchange gain, and resulting in an increase in finance income. In the first half of 2009 when the appreciation of RMB slowed down, net foreign exchange gain substantially dropped and so was finance income.

Finance costs

For 2006, 2007, 2008 and the period from January to June 2009, the finance costs of the Target Group amounted to RMB274 million, RMB375 million, RMB397 million and RMB182 million respectively, among which interest on loans from banks amounted to RMB303 million, RMB399 million, RMB424 million and RMB209 million respectively. The increase in finance costs was primarily due to the persistent expansion of the scale of borrowing.

Profit/(Loss)

As a result of the foregoing, the profit/(loss) attributable to equity holders of the Target Group amounted to RMB8 million, –RMB532 million, –RMB1,199 million and –RMB271 million respectively for 2006, 2007, 2008 and the period from January to June 2009.

LIQUIDITY AND CAPITAL STRUCTURE

Cash and cash equivalents

As at 31 December 2006, 31 December 2007, 31 December 2008 and 30 June 2009, the Target Group had cash and cash equivalents of RMB622 million, RMB944 million, RMB1,056 million and RMB1,952 million. In June 2009, the Target Group has raised RMB1,000 million through non public offering and its cash and cash equivalents increased correspondingly.

For 2006, 2007, 2008 and the period from January to June 2009, net cash inflow from the Target Group's operating activities was RMB1,491 million, RMB826 million, RMB385 million and RMB49 million respectively. The decrease in net cash inflow from operating activities in 2007 and 2008 was primarily due to the persistent upsurge of international oil prices which contributed to continual increase in cash expenditure on aircraft fuel costs. The relatively lower net cash inflow from operating activities in 2009 was mainly due to the decrease in revenue from its principal business.

For 2006, 2007, 2008 and the period from January to June 2009, the Target Group's net cash outflow from its investing activities amounted to RMB1,993 million, RMB1,172 million, RMB1,292 million and RMB907 million respectively. The net cash outflow generated from investing activities was mainly attributable to the purchase of aircraft and equipment and the payment schedules.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

For 2006, 2007, 2008 and the period from January to June 2009, the Target Group's net cash inflow from financing activities amounted to RMB566 million, RMB678 million, RMB1,023 million and RMB1,754 million. The persistent increase was primarily attributable to the continual expansion of the scale of bank borrowing. In June 2009, the Target Group has raised RMB1,000 million through non public offering and its cash inflow from financing activities for the period from January to June 2009 increased correspondingly.

Net current liabilities

As at 31 December 2006, 31 December 2007, 31 December 2008 and 30 June 2009, the net current liabilities of the Target Group amounted to RMB3,861 million, RMB5,258 million, RMB7,340 million and RMB7,059 million respectively.

Financial liabilities

As at 31 December 2006, 31 December 2007, 31 December 2008 and 30 June 2009, the Target Group had a debt structure which mainly comprised short-term debts with a maturity within one year. The breakdown of the Target Group's debt profile is set out below:

Gearing Ratio

As at 31 December 2006, 31 December 2007, 31 December 2008 and 30 June 2009, the gearing ratio of the Target Group was 0.79, 0.87, 1.04 and 0.95 respectively.

CAPITAL EXPENDITURES

Up to 2015, it is estimated that the Target Group's capital expenditure on aircraft and aviation equipment, including deposit payment, will be approximately RMB8,130 million in aggregate, among which it is expected that RMB934 million will be expended in 2009 and RMB1,573 million in 2010. The aforesaid amounts are subject to upward adjustment to take into account stipulations under contracts, or changes in price indices. The Target Group intends to satisfy the aforesaid other capital requirements with its revenue from operations, existing credit facilities granted by banks, bank borrowings, leasing arrangements and other means of external financing.

RISK PROFILE

Liquidity risk

The Target Group's primary cash requirements have been for additions of and upgrades to aircraft, engines and flight equipment and payments on related borrowings. It finances its working capital requirements through a combination of funds generated from operations and bank borrowings. It generally finances the acquisition of aircraft through long-term finance leases and bank loans.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

Due to the dynamic nature of the underlying businesses, the Target Group's treasury policy aims at maintaining flexibility in funding by keeping credit lines available. At 30 June 2009, the Target Group had total un-used credit facilities of approximately RMB14.9 billion from certain banks.

Interest rate at risk

The Target Group's interest-rate risk primarily arises from borrowings and obligations under finance leases borrowings issued at variable rates expose it to cash flow interest-rate risk.

The following table indicates the approximate change in the Target Group's profit and loss if interest rate had been 25 bases points higher with all other variables held constant.

	The Target Group			
	As at 31 December			As at
	2006	2007	2008	30 June

				RMB'000
Decrease in profit after tax	(13,358)	(17,272)	(20,642)	(11,949)

Foreign currency risk

The Target Group operates its business in several countries and territories. It generates its revenue in different currencies, and its foreign currency liabilities at the end of the period are much higher than its foreign currency assets. Its major liability item (purchases and leases of aircraft) is mainly priced and settled in US dollars. In addition, fluctuations in exchange rates will affect the Target Group's costs incurred from foreign purchases such as aircraft, flight equipment and aviation fuel, and take-off and landing charges at foreign airports.

The following table details the Target Group's exposure at the balance sheet date to major currency risk which is primarily attributable to US dollars.

	The Target Group

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

Fuel price risk

The Target Group's results of operations may be significantly affected by fluctuations in fuel prices.

For the years ended 31 December 2006, 2007 and 2008 and the six months ended 30 June 2009, if the fuel price had been 5% higher or lower with all other variables held constant (excluding the impact of fuel option contracts), the Target Group's fuel cost would have been RMB139 million, RMB185 million, RMB248 million and RMB70 million higher or lower respectively.

EMPLOYEES AND REMUNERATION POLICY

As at 31 December 2006, 31 December 2007, 31 December 2008 and 30 June 2009, the Target Group had a headcount of 4,542, 5,256, 5,769 and 5,754 respectively. For 2006, 2007, 2008 and the period from January to June 2009, the Target Group's expenses on wages, salaries and other benefits totaled RMB902 million, RMB1,192 million, RMB1,412 million and RMB778 million respectively. Remuneration for employees of the Target Group basically comprises basic salaries and performance-based bonuses.

CHARGES ON THE ASSETS OF THE TARGET GROUP

As at 31 December 2006, 2007 and 2008 and 30 June 2009, certain aircraft and buildings owned by the Target Group with an aggregate net book amount of approximately RMB4,547 million, RMB4,306 million, RMB4,035 million and RMB4,241 million respectively were pledged as collateral under certain loan arrangements.

PRINCIPAL ACCOUNTING POLICIES

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties and potentially result in materially different results under different assumptions and conditions. The Target Group's principal accounting policies are set forth in Note 2 to Appendix I "Financial Information of Shanghai Airlines" ("Financial Information") of this circular. The Target Group adopts the accounting policies and makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

(a) Estimated impairment of property, plant and equipment

The Target Group tests whether property, plant and equipment have been impaired in accordance with the accounting policy stated in Note 2(1) to the Financial Information as set out in Appendix I of this circular. An impairment loss is recognized for the amount by which the recoverable amount of property, plant and equipment being lower than its carrying value. The recoverable amount is the higher of an asset's fair value less cost to sell and value in use. The calculation of value in use is based on cash flow projections approved by management in which various assumptions and estimations (including but not limited to ticket price, fuel price, load factor, aircraft daily utilisation, fuel cost and discount rate etc.) are involved. Different judgments and estimations could significantly affect the results of the calculation.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

(b) Revenue recognition

The Target Group recognises passenger, cargo and mail revenues in accordance with the accounting policy stated in Note 2(e) to the Financial Information as set out in Appendix I of this circular. Unused tickets are recognised in traffic revenues based on management's estimates. Management annually evaluates the balance in the SIAC and records any adjustments, which can be material, in the period the evaluation is completed.

These adjustments result from differences between the estimates of certain revenue transactions and the timing of recognising revenue for any unused air tickets and the related sales price, and are impacted by various factors, including a complex pricing structure and interline agreements throughout the industry, which affect the timing of revenue recognition.

(c) Frequent flyer programme

The Target Company operates a frequent flyer programme called "Crane Club" that provides travel awards to programme members based on accumulated miles. A portion of passengers revenue attributable to the award of frequent flyer benefits is deferred and recognised when the miles have been redeemed or have expired. The deferment of revenue is estimated based on historical trends of redemptions which are then used to project the expected utilisation of these benefits and the estimated fair value of the redeemable miles. Any remaining unutilised benefits are recognised as deferred revenue. Different judgments and estimates could significantly affect the estimated deferred revenue or impact the results of operations.

(d) Depreciation of components related to overhaul costs

Depreciation of components related to airframe and engine overhaul costs are based on the Target Group's historical experience with similar airframe and engine models and taking into account anticipated overhauls costs, the timeframe between each overhaul and the ratio of actual flying hours and estimated flying hours between overhauls. Different judgments or estimates could significantly affect the estimated depreciation charge and materially impact the results of operations.

(e) Provision for costs of return condition checks for aircraft and engines under operating leases

Provision for the estimated costs of return condition checks of aircraft and engines under operating leases is made based on the estimated costs for such return condition checks and taking into account anticipated flying hours, flying cycles and the timeframe between each overhaul. These judgments or estimates are based on historical experience of returning similar airframe and engine models, actual costs incurred and aircraft and engine status. Different judgments or estimates could significantly affect the estimated provision for costs of return condition checks.

APPENDIX IV

MANAGEMENT DISCUSSION AND ANALYSIS
OF THE RESULTS OF THE TARGET GROUP

(f) Post retirement benefits

The Target Group operates and maintains defined retirement benefit plans which provide certain retirees with various retirement subsidies. The cost of providing the benefits in the defined retirement benefit plans is actuarially determined and recognised over the eligible employees' service period by utilising various actuarial assumptions and using the projected unit credit method in accordance with the accounting policy stated in Note 2(v) to the Financial Information as set out in Appendix I of this circular. These assumptions include, without limitation, the selection of discount rate, annual rate of increase of per capita benefit payment and employees' turnover rate etc. The discount rate is based on management's review of local high quality corporate bonds. The annual rate of increase of benefit payments is based on the general local economic conditions. The employees' turnover rate is based on historical trends of the Target Group. Additional information regarding the retirement benefit plans is disclosed in Note 36 to the Financial Information.

(g) Taxation

The Target Group is subject to various taxes in different areas. Significant judgement is required in determining the provision for various tax charges. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax provisions in the period in which such determination is made.

Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilized. In assessing the amount of deferred tax assets that need to be recognised in accordance with the accounting policy stated in Note 2(j) to the Financial Information as set out in Appendix I of this circular, the Target Group considers future taxable income and ongoing prudent and feasible tax planning strategies. In the event that the Target Group's estimates of projected future taxable income and benefits from available tax strategies are changed, or changes in current tax regulations are enacted that would impact the timing or extent of the Target Group's ability to utilise the tax benefits of net operating loss carry forwards in the future, adjustments to the recorded amount of net deferred tax assets and taxation expense are made.

APPENDIX V

GENERAL INFORMATION

8. LITIGATION

In 2005, the family members of certain victims in the aircraft accident (the aircraft was then owned and operated by China Eastern Air Yunnan Company), which occurred in Baotou on 21 November 2004, sued the Company in a U.S. court for compensation. On 5 July 2007, pursuant to several conditions with which the Company has complied, the Superior Court of the State of California ordered the action stayed on the grounds of forum non-conveniens for the purpose of permitting proceedings in the PRC. On 20 February 2008, the plaintiffs filed a motion with the Superior Court of the State of California to lift the stay, but the motion was rejected by the court on 6 May 2008. The plaintiffs filed a second motion to lift the stay on 10 July 2008. On 27 August 2008, the Superior Court of the State of California rejected the motion of the plaintiffs again. After the case entered the procedures on appeal in the California Court of Appeal, the Court of Appeal of California issued an opinion on 26 February 2009, dismissing the appeal of the plaintiffs and affirming the original order. On 18 August 2009, the Company received the complaint of the family members of certain victims from the Beijing No. 2 Intermediate People's Court.

Save as disclosed above, as at the Latest Practicable Date, the Directors were not aware of any litigation or claim of material importance pending or threatened against any member of the Enlarged Group.

9. TRADING AND FINANCIAL PROSPECTS OF THE ENLARGED GROUP

Trading prospects

As an aviation enterprise which performs public service functions, the operation of the Enlarged Group is linked closely to political and economic situations, both internationally and locally. As such, the operation of the Enlarged Group and of the whole sector is, to a substantial extent, subject to the risks associated with geopolitics and the outbreaks of unexpected events.

The Company is of the view that the global economy can be expected to grow in 2009, but the rate may falter. The economic growth in East Asia continues. Factors such as international oil price, imbalance in global trading and investment and the swine flu become uncertainties in the global economic environment. China's economy is at a stage of growth, and with further system reform and opening up, the inherent impetus of economic growth and agility, spending increases gradually. In industrialized cities and town, the progress is faster, which continues to lead a faster economic growth, hence the effects of the macro-economic regulation. As such, growth in air transport demand is maintained.

The Company will seize upon the opportunity and make timely adjustments to its capacity, thereby pushing up the turnover volume in every aspect, and hence its revenue in air transport.

Financial outlook

The Directors believe that the growth of China's air passenger and cargo traffic will recover in 2009 and beyond, reflecting a positive outlook for China's economic and trade growth, rising domestic consumption and growth of business and leisure travel. At the same time, industry consolidation as evidenced by the restructuring undertaken by the three major airline groups in China, i.e. Air China, China Southern Airlines and the Group, will be beneficial to the establishment of a healthy and orderly market competition situation. As a result of immense market demand, the Company expects that, Chinese carriers, including the Enlarged Group, may experience positive revenue growth in 2009 subject to the impact of high aviation fuel price.

Contingent Liabilities

In 2005, the family members of certain victims in the aircraft accident (the aircraft was then owned and operated by China Eastern Air Yunnan Company), which occurred in Baotou on 21 November 2004, sued the Company in a U.S. court for compensation. On 5 July 2007, pursuant to several conditions with which the Company has complied, the Superior Court of the State of California ordered the action stayed on the grounds of forum non conveniens for the purpose of permitting proceedings in the PRC. On 20 February 2008, the plaintiffs filed a motion with the Superior Court of the State of California to lift the stay, but the motion was rejected by the court on 6 May 2008. The plaintiffs filed a second motion to lift the stay on 10 July 2008. On 27 August 2008, the Superior Court of the State of California rejected the motion of the plaintiffs again. After the case entered the procedures on appeal in the California Court of Appeal, the Court of Appeal of California issued an opinion on 26 February 2009, dismissing the appeal of the plaintiffs and affirming the original order. On 18 August 2009, the Company received the complaint of the family members of certain victims from the Beijing No. 2 Intermediate People's Court. The management of the Group believe that a negative outcome of the case will not have an adverse effect on the financial condition and results of operations of the Company.

APPENDIX V
