

NowAuto Group, Inc.
Form 10-Q
May 16, 2011

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
WASHINGTON, D.C. 20549

FORM 10-Q

QUARTER REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES
EXCHANGE ACT OF 1934

For the quarterly period ended March 31, 2011
Commission File Number 000-50709

NOWAUTO GROUP, INC.
(Exact name of registrant as specified in its charter)

Nevada
(State or other jurisdiction of
Incorporation or organization)

77-0594821
(I.R.S. Employer
Identification No.)

4240 East Elwood Street, Phoenix, Arizona 85040
(Address of principal executive offices) (Zip Code)
Registrant's Telephone Number: (480) 431-0015

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).
 Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act)
 Yes No

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date:

As of April 16, 2011 there were 9,383,046 shares, net of treasury shares, of common stock outstanding.

NowAuto Group, Inc.
Notes to the Condensed Consolidated Financial Statements (Unaudited)

Note 1. Nature of Operations and Significant Accounting Policies

Nature of Operations

NowAuto Group, Inc. primarily leases vehicles in the Buy Here, Pay Here industry through the use of sales-type leases. Our customers are individuals with sub-prime credit histories. We currently operate primarily in the Phoenix, Arizona Metropolitan area. The company was originally formed as a Nevada Corporation and has been operating for the past six years.

General

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and in accordance with the instructions to Form 10-Q. Accordingly, they do not include all of the information and footnotes required by the accounting principles generally accepted in the United States for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months and nine months ended March 31, 2011 are not necessarily indicative of the results that may be expected for the year ending June 30, 2011. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's annual report on Form 10-K for the year ended June 30, 2010.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amount of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. Material estimates that are susceptible to significant change in the near term include, but are not limited to, the determination of the allowance for doubtful accounts, the realization of deferred financing revenue, the residual value of leases, and the carrying value of inventory.

Concentration of Risk

We originate our contracts and provide financing in connection with the sale and/or lease of substantially all of our vehicles. Although we attempt to mitigate our exposure to credit risk through the use of employment checks, reference checks, proof of residence, and other procedures, failure of the customers to make scheduled payments under their lease contracts could have a material near term impact on our results of operations and financial condition. In addition, all of our financing is provided through our revolving credit agreement which is held by one privately controlled venture capital fund.

While we do have customers outside the Phoenix area, our customer base is concentrated in Phoenix. Therefore, economic factors influencing this area will also affect us.

Periodically, we maintain cash in financial institutions in excess of the amounts insured by the federal government.

Cash Equivalents

We consider all highly liquid instruments purchased with initial maturities of three months or less to be cash equivalents.

5

Inventory

Inventory consists of used vehicles and is valued at the lower of cost or market on a specific identification basis. Vehicles purchased at auction, or wholesale, are typically recorded at their purchase price. Repossessed vehicles are recorded at the lesser of their original cash value or their fair value, which is determined based upon the approximate wholesale value. Vehicle reconditioning costs are capitalized as a component of inventory. The cost of used vehicles sold is determined using the specific identification method.

Equipment

Property and equipment are stated at cost. Expenditures for additions, renewals and improvements are capitalized. Costs of repairs and maintenance are expensed as incurred. Leasehold improvements are amortized over the shorter of the estimated life of the improvement or the lease period. The lease period includes the primary lease term plus any extensions that are reasonably assured. Depreciation is computed principally using the straight-line method generally over the following estimated useful lives:

Furniture, Fixtures and Equipment	3 to 7 years
Computer Equipment	3 to 5 years
Leasehold Improvements	Length of the lease, typically 1 – 3 years

Property and equipment are reviewed for impairment whenever events or changes in circumstances indicate the carrying amount of an asset may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future undiscounted net cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying values of the impaired assets exceed the fair value of such assets. Assets to be disposed of are reported at the lower of the carrying amount or fair value less costs to sell.

Sales Tax

We pay sales taxes to local and state governmental agencies on vehicles sold and leased. For lease agreements, sales tax is paid when funds are received from the customer. Therefore, a liability is recorded for sales tax purposes in the period the lease payment is received from the customer. For sales contracts, calculations for sales taxes are made on an accrual basis. Vehicle repossessions are allowed as a deduction from taxable sales in the month of repossession. Customers often make their down payments in periodic increments over a period of four to six weeks. We do not report the sales for tax purposes until the down payments are fully paid. This is compliant with industry standards and with most state and local tax codes.

Income Taxes

Income taxes are accounted for under the asset and liability method. Under this method, deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates expected to apply in the years in which these temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance when in the opinion of management; it is more likely than not that some portion or all of the deferred tax assets will not be realized.

The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Interest and penalties, if any, associated with unrecognized tax benefits, will be classified as additional income taxes in the statement of income.

We have adopted the provisions of Accounting Standards Codification 740-10. As of March 31, 2011, we had no liabilities, included on the consolidated balance sheets, associated with uncertain tax positions. We are still subject to examination of our financial statements, primarily for the last three years.

Sales-type leases

The Company's financing agreements are classified as sales-type leases pursuant to the provisions of Accounting Standards Codification - 840, Accounting for Leases. As such, revenues representing the sales price of the vehicles are recognized as income upon inception of the lease, with the resulting gross profit from the sales included in operations. Lease terms are typically for a period of 24 to 39 months with either monthly or bi-monthly payments.

The portion of revenues representing the difference between the gross investment in the lease (the sum of the minimum lease payments and the guaranteed residual value) and the sum of the present value of the two components is recorded as deferred revenue and amortized over the lease term. This deferred revenue represents the effective interest rate on the sales-type lease and ranges from approximately 18% to 29% per annum.

For the three months ended March 31, 2011 and 2010, amortization of deferred revenue totaled \$274,697 and \$295,761, respectively. For the six months ended March 31, 2011 and 2010, the total is 555,347 and 576,156 respectively.

Taxes assessed by governmental authorities that are directly imposed on revenue-producing transactions between the Company and its customers (which may include, but are not limited to, sales, use, value added and some excise taxes) are excluded from revenues.

Lessees are responsible for all taxes, insurance, and maintenance costs.

Purchased Contracts

To compensate for the reduction in sales, the Company has been purchasing contracts from other dealerships at discounted rates. They are recorded according to ASC 310.30 which means that revenue is recognized as interest earned in each period based on the percentage of payments received. No profit is recognized at the time of purchase and therefore there is no accrual for future losses. Instead, the net carrying value on the Balance Sheet is reduced. As a consequence, the potential future earnings are also reduced.

Repossessions

If the lessee ceases making payments pursuant to the lease terms and the decision is made by the Company to repossess the vehicle the lease is considered terminated. In such an event, the remaining balance of the lease is removed from the Investment in Sales-Type Leases, the repossessed vehicle is recorded as inventory at the lower of its original cost or its fair value at wholesale, and any resulting adjustment is charged to income during the period.

Advertising Costs

Advertising costs are expensed as incurred and consist principally internet and print media marketing costs. Advertising costs amounted to \$15,078 and \$16,885 for the quarters ended March 31, 2011 and 2010, respectively; \$51,631 and \$56,951 for the six months ended March 31, 2011 and 2010, respectively.

Loss per Share

The loss per share ("EPS") is presented in accordance with the provisions of Accounting Standards Codification - 260. Basic EPS is calculated by dividing the income or loss available to common shareholders by the weighted average number of common shares outstanding for the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock. Basic and diluted

EPS were the same for the periods ended March 31, 2011 and 2010, as the Company had losses from operations during both periods and therefore the effect of all potential common stock equivalents is antidilutive (reduces loss per share). There were no warrants or options outstanding as of March 31, 2011.

Stock Option Plans

At March 31, 2011 we had no employee stock ownership plan.

Allowance for Delinquent Leases

Provisions for losses on leases in default are charged to operations in amounts sufficient to maintain the allowance for delinquent leases at a level considered adequate to cover probable credit losses.

The Company established the allowance for delinquent leases based on the determination of the amount of probable credit losses inherent in the finance receivables as of the reporting date. The Company reviews charge-off experience factors, delinquency reports, historical collection rates, estimates of the value of the underlying collateral, economic trends, such as unemployment rates, industry standards and other information in order to make the necessary judgments as to probable credit losses. Assumptions regarding probable credit losses and loss confirmation periods are reviewed periodically and may be impacted by actual performance of finance receivables and changes in any of the factors discussed above.

Residual Value of Leases

The estimate of residual value is a percent of the market value of the vehicle at the time of the lease. The percentage is based on the terms and, therefore, is intended to project the value of the vehicle at the end of the lease.

Note 2. Non-Classified Balance Sheet

We are a finance company, originating and financing all of our own leasing contracts. These contracts are 24 to 39 months in length. Therefore, our balance sheet is presented on a non-classified basis.

Note 3. Investment in Sales-Type Leases, net

The Company's leasing operations consist principally of leasing vehicles under sales-type leases expiring in various years to 2013. Following is a summary of the components of the Company's net investment in sales-type leases:

	March 31, 2011 (Unaudited)	June 30, 2010
Total Minimum Lease Payments to be Received	\$6,055,766	\$6,584,183
Residual Value	728,254	530,220
Lease Carrying Value	6,784,020	7,114,403
Less: Allowance for Uncollectible Amounts	(1,409,621)	(1,441,678)
Less: Unearned Income	(1,291,800)	(1,587,589)
Net Investment in Sales-Type Lease	\$4,082,599	\$4,085,136

A schedule of future minimum lease payments for each of the next three years is estimated as follows:

Years Ending	
2012	\$3,144,737
2013	2,106,682
2014	737,651
2015	66,696

\$6,055,766

8

During the quarter ending December 31, 2011, the Company began purchasing contracts from other local dealers. These contracts appear as Investment in Purchased Contracts and are recorded as loans in accordance with ASC 310-30.

	March 31, 2011 (Unaudited)	June 30, 2010
Total Minimum Lease Payments to be Received	\$997,948	\$0
Less: Unearned Income	(282,442)	0
Net Investment in Sales-Type Lease	\$715,506	\$0

During the quarter ending December 31, 2011, the Company began purchasing contracts from other local dealers. These contracts appear as Investment in Purchased Contracts and are recorded as loans in accordance with ASC 310-30.

Note 4. Income Taxes

The significant components of the Company's deferred tax assets are as follows:

	March 31, 2011 (Unaudited)	June 30, 2010
Deferred tax assets		
Net operating loss carryforward	\$4,640,522	\$4,014,700
Less: valuation allowance	(4,640,522)	(4,014,700)
Deferred tax assets	\$-	\$-

At March 31, 2011, the Company has incurred accumulated net operating losses totaling approximately 11,335,000, which are available to reduce federal and state taxable income in future years through approximately 2030 for federal income.

Note 5. Line of Credit

As of March 31, 2011 the Company had a revolving credit agreement with a private equity fund. The credit agreement is secured by the lease contracts it agrees to fund, as well as the underlying vehicle. The monies advanced under the line of credit are based upon the contract price and vary per contract, at the discretion of the lender. Substantially all the sales-type lease contracts financed require our customers to make their monthly payments directly to the finance company via ACH (automatic account withdrawal). The Company retains ownership of the contracts and is active in the collection of delinquent accounts from the contracts. The line of credit matures and renews annually on February 6th. At inception, March 31, 2006, our credit limit was \$3,000,000. This limit has been expanded by the lender to its current \$15,000,000 limit. The interest rate is at the prime lending rate plus 6% (9.25% at March 31, 2011).

The revolving credit agreement has two debt covenants. The Company must maintain a tangible net worth of at least \$2,000,000 and a leverage ratio that total liabilities cannot exceed four times the tangible net worth. As of March 31, 2011 we are not in compliance with either of these covenants. However we believe that we have a strong relationship with our lender and do not anticipate, without any assurance, that any collection actions are imminent.

Note 6. The Effect of Recently Issued Accounting Standards

The company does not expect the adoption of any accounting pronouncements issued since those disclosed in the company's annual report on Form 10-K for the year ended June 30, 2010 to have a significant impact on the company's results of operations, financial position or cash flow.

Note 7. Statement of Cash Flows

Non-Cash Investing and Financing Activities

The Company recognized investing and financing activities that affected assets and liabilities, but did not result in cash receipts or payments. These non-cash activities are as follows: during the six months ended December 31, 2010, the Company transferred two vehicles with a net book value of \$8,485

Note 7. Going Concern

The accompanying financial statements have been prepared assuming that we will continue as a going concern. We sustained a material loss in the year ended June 30, 2005 and continued to sustain material losses through March 31, 2011. This raises substantial doubt about our ability to continue as a going concern. The financial statements do not include any adjustments that might result from this uncertainty.

Since that initial loss, great efforts have been made to improve our profitability. Margins on cars sold have increased. Costs, especially overhead, have been reduced. Head count is kept to a minimum. Accountability has been greatly enhanced by development of qualified Accounting staff and the implementation of an enterprise-wide and fully integrated software system. The Company has been and continues to develop the financing function whose focus includes, but is not limited to, improved stability scoring and credit approval process, improvement of the total portfolio aging, and reduction of account losses. In addition, the corporate office and Service Department relocated to the same facility. This new facility greatly enhances the Service Department's efficiency and capacity and gives upper management closer oversight of operations.

A detailed discussion of management's plans for dealing with this issue is in the Company's annual report on Form 10-K for the year ended June 30, 2010.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with the Company's condensed consolidated financial statements and notes thereto appearing elsewhere in this report.

Forward-looking Information

The Private Securities Litigation Reform Act of 1995 provides a "safe harbor" for certain forward-looking statements. Certain information included in this Quarterly Report on Form 10-Q contains, and other materials filed or to be filed by the Company with the Securities and Exchange Commission (as well as information included in oral statements or other written statements made or to be made by the Company or its management) contain or will contain, forward-looking statements within the meaning of Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. The words "believe," "expect," "anticipate," "estimate," "project" and similar expressions identify forward-looking statements, which speak only as of the date the statement was made. The Company undertakes no obligation to publicly update or revise any forward-looking statements. Such forward-looking statements are based upon management's current plans or expectations and are subject to a number of uncertainties and risks that could significantly affect current plans, anticipated actions and the Company's future financial conditions and results. As a consequence, actual results may differ materially from those expressed in any forward-looking statements made by or on behalf of the Company as a result of various factors. Any forward-looking statements are made pursuant to the Private Securities Litigation Reform Act of 1995 and, as such, speak only as of the date made.

Overview

Since 2004, NowAuto Group, Inc., a Nevada corporation (the "Company") has been a publicly held retailer focused on the "Buy Here/Pay Here" segment of the used vehicle market. The Company generally sells used vehicles less than 10 years old and provides financing for substantially all of its customers. Many of the Company's customers have limited financial resources and would not qualify for conventional financing as a result of limited credit histories or past credit problems. As of March 31, 2011 the Company had one retail location, which is located in the State of Arizona.

The market for used vehicle sales in the United States is significant. Used vehicle retail sales typically occur through franchised new vehicle dealerships that sell used vehicles, or independently owned used vehicle dealerships. The Company operates in the "Buy Here/Pay Here" segment of the independent used vehicle sales and finance market. Buy Here/Pay Here dealers sell and finance used vehicles to individuals with limited credit histories or past credit problems. Buy Here/Pay Here dealers typically offer their customers certain advantages over more traditional financing sources, such as broader and more flexible credit terms, attractive payment terms, including scheduling payments on a weekly or bi-weekly basis to coincide with a customer's payday, and the ability to make payments in person, an important feature to individuals who may not have checking accounts. In turn, interest rates on vehicle loans provided by the Company are generally higher than those offered to individuals who purchase from other new or used vehicle dealers or who have better credit histories.

Our primary focus is on sales and collections. We are responsible for our own collections through our internal collection department, with the supervisory involvement of the corporate office. In the past six months we have implemented new contract terms including lower interest rates and shorter payback periods. While in the short term these measures contributed to lower total sales, we believe that our loan portfolio will result in lower credit losses in the future. In addition, credit losses are impacted, to some degree, by economic conditions in the market in which we operate. In recent years, significant contractions in the local economy, particularly the construction industry, combined with the resulting increase in unemployment have had a negative effect on our market and business. While we believe that the most significant factor affecting credit losses is the proper execution of our business practices, we

also believe that current economic conditions have had a negative impact on both sales and collection results.

As a supplement to in-house sales, we are also purchasing contracts from other BH/PH dealerships. Some are new contracts and some are aged, but all are required to meet our credit requirements before a decision to purchase is made. Most purchases have a recourse clause of up to 60 days or up to 2 payments to reduce losses. We believe that these accounts will improve the overall performance of our loan portfolio.

Hiring, training and retaining qualified personnel are critical to the Company's success. The number of trained managers the Company has at its disposal will limit the rate at which the Company adds new stores. Excessive turnover, particularly at the store manager level, could impact the Company's ability to add new stores. The Company expects to continue to invest in the development of its workforce.

Three and Nine Months Ended March 31, 2011 vs. Three and Nine Months Ended December 31, 2010

Total revenue for the quarter ended March 31, 2011 was \$998,055 versus revenue of \$1,261,214 for the quarter ended December 31, 2010 and \$3,139,420 for the nine months ended March 31, 2011 versus \$4,169,382 for the previous year. The average sales price per unit increased from approximately \$9,200 to \$9,585 for the same periods; however, the increase in the unit price was offset by a decrease in unit sales of nearly 50%. The increase to the unit price and the decline in the unit volume were primarily caused by the current economy in the Phoenix area. The supply of vehicles available for purchase has constricted, increasing our cost and resulting in higher sales prices which has negatively affected sales. Sales volume has also been negatively affected by the poor general economic conditions in the greater Phoenix area.

The Company's gross profit as a percentage of sales during the quarter ending March 31, 2011 was 60.6% versus 62.1% for the quarter ended December 31, 2010 and 62.2% for the nine months ended March 31, 2011 versus 55.6% for the prior year. The increase in our gross margin was primarily caused by the Company's ongoing efforts to capture the true costs of our vehicles through an improved tracking process. Further, we have been able to offset the increase in the cost of our vehicles discussed above through corresponding increases to the sales price of the vehicles.

Total operating expenses were 73.4% of total revenues for the quarter ended March 31, 2011 versus 72.3% for the quarter ended March 31, 2010 which includes both selling and financing costs as well as general and administrative expenses. Operating expenses for the nine months ended March 31, 2011 was 83.4% versus 69.6% for the prior year.

Selling and financing costs, which primarily consist of sales and financing salaries and bad debt expense, were 37.4% of total revenues for the quarter ended March 31, 2011 versus 40.5% for the quarter ended March 31, 2010. It is 48.6% for the nine months ended March 31, 2011 versus 39.2% for the prior year. Salary expense for sales and financing staff decreased by 3.7% in the current quarter when compared to the prior year quarter from approximately \$145,000 in 2010 to approximately \$140,000 in 2011. This was accomplished through the reduced commissions and bonuses as related to sales and reduction in staff. However, the decrease was not at a level commensurate with the decline in revenues. Bad debt expense decreased in the current quarter by 42.6% from approximately \$302,400 in 2010 to approximately \$173,400 in 2011. Bad debt expense is an accrual based on revenue which explains the decrease. While the Company believes that proper execution (or lack thereof) of its business practices is the most significant factor affecting credit losses, we also believe that general economic conditions, including but not limited to rising unemployment and troubled credit markets adversely affect collection efforts and have resulted in higher than normal account losses.

General and administrative expenses, which primarily consist of administrative and executive salaries, rent and other general corporate expenses, have decreased from approximately \$400,400 to approximately \$359,000. However, this decrease was not at a level commensurate with the decline in sales as G&A expenses were 36.0% of total revenues for the quarter ended March 31, 2011 versus 31.8% for the quarter ended March 31, 2010 and 34.8% for the nine months ended March 31, 2011 versus 30.4% for the prior year. The overall decrease in the expense was primarily from decreases in general corporate expenditures due in part to closing a low profit lot. However, these decreases were partially offset by the improvement in vehicle cost identification process (discussed above) which has led to more allocation of costs to general and administrative expenses versus cost of sales.

Liquidity and Capital Resources

The Company's liabilities exceeded its assets by approximately \$10,000,000 and \$8,400,000 as of March 31, 2011 and June 30, 2010, respectively. The deterioration in our financial condition was primarily the result of our net loss during the current operating period which resulted in additional draws on our line of credit to fund operations.

Cash and cash equivalents at March 31, 2011 were approximately \$30,000 versus approximately \$55,000 at June 30, 2010.

Cash used by operating activities was approximately \$364,000 for the year ended March 31, 2011 which was a \$257,000 increase from cash used by operating activities of approximately \$107,000 for the year ended March 31, 2010. With the decline in sales the Company has not had significant increases to its Investment in Sales-Type Lease balance to offset the current period collection of prior period sales.

The Company did not have cash used in or provided by investing activities during the quarter ended March 31, 2011. In the quarter ended March 31, 2010 cash used in investing activities was approximately \$5,000. The current period decrease was primarily due to a reduction in the purchase of office equipment.

Net cash provided by financing activities during the nine months ended March 31, 2011 was approximately \$1,176,000 versus approximately \$1,272,000 for the nine months ended March 31, 2010. This activity for both periods is a result of additional draws on the Company's line of credit.

At March 31, 2011, the Company had approximately a \$14.4 million line of credit balance under a \$15 million line of credit agreement with a privately held, independent finance company. Interest rate on the line of credit agreement is at prime plus 6% (9.25% at March 31, 2011). The line of credit agreement has two covenants (see Note 5 to the accompanying condensed consolidated financial statements), neither of which the Company is in compliance with as of March 31, 2011. However, management believes they have a positive relationship with the independent finance company and does not expect, although no assurance can be made, that any collection activity is imminent as a result of these defaults. The original line of credit with the lender at its inception in 2006 was \$3,000,000 and the lender has periodically and consistently increased the limit as the need arose.

Considering the Company's current working capital position management estimates that the current cash position will not be adequate to meet cash requirements for the next twelve months and that additional draws will need to be made against the line of credit to fund operations. Subsequent to March 31, 2011, the Company has been allowed to take additional draws under the revolving credit agreement. We anticipate that we will be able to continue to draw on this credit facility as the need arises until such time as we are able to generate sufficient cash flow from operations to be self sufficient and commence repaying the debt. However, we cannot be certain that this financing will be available.

Although management cannot assure that future operations will be profitable, or that additional debt and/or equity financing will be available, we believe our current cash balance, together with additional debt financing, may provide adequate capital resources to maintain operations for the next year. If additional working capital is required during fiscal 2011 and not obtained through additional debt, equity capital or operations, it could adversely affect future operations. As a result, the Company's independent registered public accountants issued a going concern opinion on the consolidated financial statements of the Company for the year ended June 30, 2010. However, management has historically been successful in obtaining financing and has demonstrated the ability to implement a number of cost-cutting initiatives to reduce working capital needs. Accordingly, the condensed consolidated financial statements contained in Item 1 of this Form 10-Q have been prepared assuming the Company will continue to operate and do not include any adjustments that might be necessary if the Company is unable to continue as a going concern.

Critical Accounting Policies

Significant accounting policies are described in the audited consolidated financial statements and notes thereto included in our Report on Form 10-K for the year ended June 30, 2010. We believe our most critical accounting policies and estimates relate to the determination of the allowance for doubtful accounts, the realization of deferred financing revenue, the residual value of leases, and the carrying value of inventory. Due to the uncertainties inherent in the estimation process and the significance of these items, it is at least reasonably possible that the estimates in connection with these items could be materially revised within the next year.\

Off-Balance Sheet Arrangements

As of March 31, 2011, we did not have any relationship with unconsolidated entities or financial partnerships, which other companies have been established for the purpose of facilitating off-balance sheet arrangements. Therefore, we are not materially exposed to any financing, liquidity, market or credit risk that could arise if we had engaged in such relationships.

Recent Accounting Pronouncements

Recent accounting pronouncements are more fully addressed in Note 6 to the accompanying financial statements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Not applicable, as the Company is a smaller reporting company.

Item 4. Controls and Procedures

(a) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES

The Company carried out, under the supervision and with the participation of the Company's management, including the Company's Chief Executive Officer and the Company's Chief Financial Officer, an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities and Exchange Act of 1934, as amended). Based on their evaluation, the Company's Chief Executive Officer and its Chief Financial Officer concluded that, the Company's disclosure controls and procedures were not effective as of the end of the period covered by this report, because of the material weaknesses identified as of June 30, 2010. Notwithstanding the existence of the material weaknesses identified as of June 30, 2010, management has concluded that the condensed consolidated financial statements in this Form 10-Q fairly present, in all material respects, the Company's financial position, results of operations and cash flows for the periods and dates presented.

(b) CHANGES IN INTERNAL CONTROL OVER FINANCIAL REPORTING

There were no changes in our internal control over financial reporting that occurred during our last fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

The Company is continuing the process of developing and implementing a remediation plan to address the material weaknesses as described above, as more fully discussed in the Form 10-K filing for the year ended June 30, 2010.

PART II – OTHER INFORMATION

Item 1. Legal Proceedings

As of March 31, 2011 the Company is not involved in any legal proceedings other than standard collection activities deemed to be in the normal course of business.

Item 1a. Risk Factors

No additional significant risk factors have been identified beyond those discussed in the Form 10-K filing for the year ended June 30, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

None.

Item 3. Defaults Upon Senior Securities

The Company's revolving credit agreement has two debt covenants. The Company must maintain a tangible net worth of at least \$2,000,000 and a leverage ratio that total liabilities cannot exceed four times the tangible net worth. As of March 31, 2011 we are not in compliance with either of these covenants. However we believe that we have a strong relationship with our lender and do not anticipate, without any assurance, that any collection actions are imminent.

Item 4. [Removed and Reserved]

Item 5. Other Information

None.

Item 6. Exhibits

3.1. Consent of Independent Registered Public Accounting Firm

31.1. Rule 13a-14(a) certification

31.2. Rule 13a-14(a) certification

32.1. Rule Section 1350 certification
