The interim Consolidated Financial Statements furnished herein have been prepared in accordance with Accounting Principles Generally Accepted in the United States of America (U.S. GAAP) applicable to interim financial information, the instructions to Form 10-Q, and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by U.S. GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months ended December 31, 2014 are not necessarily indicative of the results that may be expected for the year ending September 30, 2015. For further information, refer to the Consolidated Financial Statements and footnotes thereto included in the Company's annual report on Form 10-K for the fiscal year ended September 30, 2014.

Use of Estimates

In preparing the financial statements in accordance with U.S. GAAP, management is required to make certain estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting periods and related disclosure of contingent assets and liabilities. Actual results could differ from these estimates and assumptions.

Reclassification

Certain prior period amounts in the accompanying Consolidated Financial Statements have been reclassified to conform to the current period's presentation.

Lease Termination Income

Lease Termination Income is recognized in operating revenues when there is a signed termination agreement, all of the conditions of the agreement have been met, the tenant is no longer occupying the property and the termination consideration is probable of collection. Lease termination amounts are paid by tenants who want to terminate their lease obligations before the end of the contractual term of the lease by agreement with the Company.

Table of Contents

During the three months ended December 31, 2014, the Company entered into a lease termination agreement with its tenant, Norton McNaughton of Squire, Inc. (Norton), whereby the Company received a lease termination fee of \$238,625, terminating the lease effective January 31, 2015. Prior to the lease termination, Norton was leasing the Company's 302,400 square foot building located in its Hanahan, SC location through April 29, 2015 at an annualized rent of approximately \$1,389,000 or \$4.54 per square foot. Prior to the lease termination, Norton sub-leased the Company's space to Science Applications International Corporation (SAIC). In conjunction with the lease termination, the Company simultaneously entered into a lease agreement for four years and three months with SAIC from February 1, 2015 through April 30, 2019 at an initial annualized rent of approximately \$1,406,000 or \$4.65 per square foot, with 2% increases each year.

The Company's lease with its tenant, Graybar Electric Company (Graybar), at its 26,340 square foot building located in Ridgeland (Jackson), MS has an early termination option which may be exercised at any time on the condition that the Company is provided with six months of notice. The Company has not received notice nor does the Company anticipate that this tenant will exercise its early termination option. The rent per annum for this location is \$109,275 or \$4.15 per square foot and the lease expires in July 2019.

The Company's lease with its tenant, CHEP USA, Inc. (CHEP), at its 83,000 square foot building located in Roanoke, VA has an early termination option which may be exercised after August 2021, on the condition that the Company is provided with six months of notice and CHEP pays the Company a \$500,000 termination fee. The U.S. GAAP straight-line rent per annum for this location is \$468,364 or \$5.64 per square foot and the lease expires in January 2025.

Other than the Company's leases with Graybar and CHEP, the Company does not have any other leases that contain an early termination option.

Stock Compensation Plan

The Company has a Stock Option and Stock Award Plan, adopted in 2007 and amended and restated in 2010 (the 2007 Plan), authorizing the grant to officers and key employees of options to purchase up to 1,500,000 shares of common stock including up to 100,000 shares of restricted stock awarded to any one participant in any one fiscal year.

The Company accounts for awards of stock options and restricted stock in accordance with ASC 718-10, Compensation-Stock Compensation. ASC 718-10 requires that compensation cost for all stock awards be calculated and amortized over the service period (generally equal to the vesting period). The compensation cost for stock option grants is determined using option pricing models, intended to estimate the fair value of the awards at the grant date less estimated forfeitures. The compensation expense for restricted stock is recognized based on the fair value of the restricted stock awards less estimated forfeitures. The fair value of restricted stock awards is equal to the fair value of the Company's stock on the grant date. The amortization of compensation costs for stock options grants and restricted

stock are included in General and Administrative Expenses in the accompanying Consolidated Statements of Income and amounted to \$90,232 and \$86,497 for the three months ended December 31, 2014 and 2013, respectively.

During the three months ended December 31, 2014, no shares of restricted stock were granted under the Company's 2007 Plan. Recent Accounting Pronouncements

In May 2014, the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers" as a new Topic, Accounting Standards Codification ("ASC") Topic 606. The objective of ASU 2014-09 is to establish a single comprehensive model for entities to use in accounting for revenue arising from contracts with customers and will supersede most of the existing revenue recognition guidance, including industry-specific guidance. The core principle is that a company should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. In applying the new standard, companies will perform a five-step analysis of transactions to determine when and how revenue is recognized. ASU 2014-09 applies to all contracts with customers except those that are within the scope of other topics in the FASB ASC. This ASU is effective for annual reporting periods (including interim periods within those periods) beginning after December 15, 2016 and shall be applied using either a full retrospective or modified retrospective approach. Early adoption is not permitted. The Company is currently evaluating the impact this standard may have on the consolidated financial statements and the method of adoption.

Management does not believe that any other recently issued, but not yet effective accounting pronouncements, if adopted, would have a material effect on the accompanying Consolidated Financial Statements.

NOTE 2 – NET INCOME PER SHARE

Basic Net Income per Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding during the period. Diluted Net Income per Common Share is calculated by dividing Net Income Attributable to Common Shareholders by the weighted-average number of common shares outstanding plus the weighted-average number of net shares that would be issued upon exercise of stock options pursuant to the treasury stock method.

In addition, common stock equivalents of 156,401 and 88,171 shares are included in the diluted weighted average shares outstanding for the three months ended December 31, 2014 and 2013, respectively. As of December 31, 2014 and 2013, -0- and 130,000 options to purchase shares of common stock were antidilutive.

Pro forma information

The following unaudited pro forma condensed financial information has been prepared utilizing the historical financial statements of the Company and the effect of additional revenue and expenses from the properties acquired during fiscal 2015 and 2014 assuming that the acquisitions had occurred as of October 1, 2013, after giving effect to certain adjustments including (a) Rental Revenue adjustments resulting from the straight-lining of scheduled rent increases, (b) Interest Expense resulting from the assumed increase in Mortgage Notes Payable and Loans Payable related to the new acquisitions, and (c) Depreciation Expense related to the new acquisitions. In addition, a portion of the proceeds received from the May 28, 2014 public offering of 8,050,000 shares of the Company's common stock were used to fund property acquisitions and therefore, the weighted average shares outstanding used in calculating the Basic and Diluted Net Income per Share Attributable to Common Shareholders has been adjusted to account for the portion of the offering proceeds used to fund acquisitions as if the offering had occurred as of October 1, 2013. Table of Contents

In addition to the Company's investments in Securities Available for Sale at Fair Value, the Company is required to disclose certain information about fair values of its other financial instruments. Estimates of fair value are made at a specific point in time based upon, where available, relevant market prices and information about the financial instrument. Such estimates do not include any premium or discount that could result from offering for sale at one time the Company's entire holdings of a particular financial instrument. For a portion of the Company's other financial instruments, no quoted market value exists. Therefore, estimates of fair value are necessarily based on a number of significant assumptions (many of which involve events outside the control of management). Such assumptions include assessments of current economic conditions, perceived risks associated with these financial instruments and their counterparties; future expected loss experience and other factors. Given the uncertainties surrounding these assumptions, the reported fair values represent estimates only, and therefore cannot be compared to the historical accounting model. Use of different assumptions or methodologies is likely to result in significantly different fair value estimates.

The fair value of Cash and Cash Equivalents approximates their current carrying amounts since all such items are short-term in nature. The fair value of variable rate Loans Payable approximates their current carrying amounts since such amounts payable are at approximately a weighted-average current market rate of interest. The estimated fair value of fixed rate mortgage notes payable is based on discounting the future cash flows at a year-end risk adjusted borrowing rate currently available to the Company for issuance of debt with similar terms and remaining maturities. These fair value measurements fall within level 2 of the fair value hierarchy. At December 31, 2014, the fixed rate Mortgage Notes Payable fair value (estimated based upon expected cash outflows discounted at current market rates) amounted to \$334,727,000 and the carrying value amounted to \$324,458,410. When the Company acquires a property, it is required to fair value all of the assets and liabilities, including intangible assets and liabilities, relating to the properties acquired lease (See Note 3). Those fair value measurements fall within level 3 of the fair value hierarchy.

NOTE 8 - SUPPLEMENTAL CASH FLOW INFORMATION

The Company may make additional acquisitions in fiscal 2015 and in fiscal 2016 and the funds for these acquisitions may come from mortgages, draws on our unsecured line of credit, cash on hand, sale of marketable securities, other bank borrowings, proceeds from the DRIP, private placements or public offerings of additional common or preferred stock or other securities. To the extent that funds or appropriate properties are not available, fewer acquisitions will be made.

Upon completion of the three expansions, annual rent will be increased by

approximately \$1,050,000. The two building expansions will provide additional rental space of approximately 86,500 square feet and will result in a new ten year lease extension from the date of completion for each building being expanded.

Table of Contents**Funds From Operations and Core Funds From Operations**

We assess and measure our overall operating results based upon an industry performance measure referred to as Funds From Operations (FFO), which management believes is a useful indicator of our operating performance. FFO is used by industry analysts and investors as a supplemental operating performance measure of a REIT. FFO, as defined by The National Association of Real Estate Investment Trusts (NAREIT), represents net income (loss) attributable to common shareholders, as defined by accounting principles generally accepted in the United States of America (U.S. GAAP), excluding extraordinary items, as defined under U.S. GAAP, gains or losses from sales of previously depreciated real estate assets, impairment charges related to depreciable real estate assets, plus certain non-cash items such as real estate asset depreciation and amortization. NAREIT created FFO as a non-U.S. GAAP supplemental measure of REIT operating performance. We define Core Funds From Operations (Core FFO) as FFO plus acquisition costs. We believe that, as widely recognized measures of performance used by other REIT's, FFO and Core FFO may be considered by investors as supplemental measures to compare our operating performance to those of other REITs. FFO and Core FFO exclude historical cost depreciation as an expense and may facilitate the comparison of REITs which have a different cost basis. The items excluded from FFO and Core FFO are significant components in understanding the Company's financial performance.

FFO and Core FFO (i) do not represent Cash Flow from Operations as defined by U.S. GAAP; (ii) should not be considered as an alternative to Net Income as a measure of operating performance or to Cash Flows from Operating, Investing and Financing Activities; and (iii) are not an alternative to cash flow as a measure of liquidity. FFO and Core FFO, as calculated by the Company, may not be comparable to similarly titled measures reported by other REITs.

The Company's FFO and Core FFO for the three months ended December 31, 2014 and 2013 are calculated as follows:

	Three Months Ended

Forward-Looking Statements

This quarterly report on Form 10-Q includes forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide the Company’s current expectations or forecasts of future events. Forward-looking statements include statements about the Company’s expectations, beliefs, intentions, plans, objectives, goals, strategies, future events, performance and underlying assumptions and other statements that are not historical facts. Forward-looking statements can be identified by their use of forward-looking words, such as “may,” “will,” “anticipate,” “expect,” “believe,” “intend,” “plan,” “should,” “seek” or comparable terms, or the negative use of words, but the absence of these words does not necessarily mean that a statement is not forward-looking.

The forward-looking statements are based on the Company’s beliefs, assumptions and expectations of its future performance, taking into account all information currently available to the Company. Forward-looking statements are not predictions of future events. These beliefs, assumptions and expectations can change as a result of many possible events or factors, not all of which are known to the Company. Some of these factors are described below and under the headings “Business”, “Risk Factors” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” included in the Company’s Annual Report on form 10-K for the fiscal year ended September 30, 2014. These and other risks, uncertainties and factors could cause the Company’s actual results to differ materially from those included in any forward-looking statements the Company makes. Any forward-looking statement speaks only as of the date on which it is made. New risks and uncertainties arise over time, and it is not possible for the Company to predict those events or how they may affect the Company. Except as required by law, the Company is not obligated to, and does not intend to, update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. Important factors that could cause actual results to differ materially from the Company’s expectations include, among others:

- the ability of the Company’s tenants to make payments under their respective leases, the Company’s reliance on certain major tenants and the Company’s ability to re-lease properties that are currently vacant or that become vacant;
- the Company’s ability to obtain suitable tenants for its properties;
- changes in real estate market conditions, economic conditions in the industrial sector and the market in which the Company’s properties are located and general economic conditions;
- the inherent risks associated with owning real estate, including local real estate market conditions, governing laws and regulations and illiquidity of real estate investments;
- the Company’s ability to acquire, finance and sell properties on attractive terms;
- the Company’s ability to repay debt financing obligations;

- the Company's ability to refinance amounts outstanding under its credit facilities at maturity on terms favorable to the Company;
- the loss of any member of the Company's management team;
- the Company's ability to comply with debt covenants;
- the Company's ability to integrate acquired properties and operations into existing operations;
- continued availability of proceeds from issuances of the Company's debt or equity securities;
- the availability of other debt and equity financing alternatives;
- market conditions affecting the Company's debt and equity securities;
- changes in interest rates under the Company's current credit facility and under any additional variable rate debt arrangements that the Company may enter into in the future;
