PetroChina Company Limited (the "Registrant") is furnishing, under the cover of Form 6-K, the Registrant's announcement relating to its operating results for the third quarter of 2004.

(PETROCHINA COMPANY LIMITED LOGO)

PETROCHINA ACHIEVES SATISFACTORY PERFORMANCE
IN THIRD QUARTER 2004
BETTER RESULTS THAN SAME PERIOD IN 2003

Edgar Filing: PETROCHINA CO LTD - Form 6-K

15 OCTOBER 2004, BEIJING - PetroChina Company Limited ("PetroChina" or the "Company", SEHK: 0857; NYSE: PTR) announced today that it has achieved encouraging results and has met all production and operational targets in the third quarter of 2004. By leveraging the opportunities presented by high oil prices and strong market demand, the Company continued to optimize and enhance its production and operations. All benchmarks recorded are better than the same period in 2003.

In the third quarter, the Company further accelerated the crude oil and natural gas production, with total oil and gas output amounted to 229 million barrels of oil equivalent, up 3.6% yoy (year-on-year). The oil and gas output in the first three quarters of 2004 amounted to 686 million barrels of oil equivalent, up 20.5 million barrels or 3.1% over the same period last year. During the first three quarters in 2004, the Company produced 585 million barrels of crude oil, up 0.8% yoy, and 605.3 billion cubic feet of marketable natural gas, up 18.9% yoy.

The Company's refining business continued to record remarkable growth. The Company processed 171 million barrels of crude oil in the third quarter, up 6.2% from last year's third quarter. 4.676 million tons of gasoline, 9.468 million tons of diesel and 471,000 tons of kerosene were produced during the quarter, up 4%, 8.6% and 2.6% yoy respectively. During the first three quarters this year, 519 million barrels of crude oil was processed, a growth of 13.2% yoy.

The Company continued to speed up the construction of its marketing network. The total number of service stations reached 17,159 by the end of September, 2004, an increase of 2,690 or 18.5% from the same period last year.

1

The Company's output of all major chemical products saw growth in the third quarter. The Company produced 446,000 tons of ethylene, 587,000 tons of synthetic resin, 76,000 tons of synthetic rubber and 829,000 tons of urea.

In the third quarter of 2004, the construction of the West-East Pipeline project was completed and is now in operation. Joint supply of natural gas from Tarim and Changqing gasfields to the downstream was achieved on 1 October, 2004. This lays the foundation for the formal commercial gas supply to downstream users for the whole pipeline by the end of the year. The West-East Pipeline's daily gas supply has increased quickly since the beginning of the third quarter.

Other key pipeline projects are progressing well in the third quarter. The construction of Zhongxian-Wuhan Pipeline and the Second Shaanxi-Beijing Pipeline projects are well underway as scheduled.

Looking forward to the fourth quarter of 2004, PetroChina will actively respond to market changes both at home and abroad, spending unremitting effort to enhance operations and profitability. It is the Company's goal to meet the operational targets for the whole year with excellent performance, and that will lay the groundwork for the Company's development next year.
