CAMELOT CORPORATION

Current Report on Form 8-K

July 26, 2010

ITEM 1.01 ENTRY INTO A MATERIAL DEFINITIVE AGREEMENT

On June 11, 2010, Camelot Corporation (the "Company") entered into a Mineral

## Edgar Filing: CAMELOT CORP - Form 8-K

Lease Agreement (the "Lease") with Timberwolf Minerals, Ltd. ("Timberwolf") to lease certain unpatented lode mining claims (the "Property") owned by Timberwolf located in Section 2, Township 2 North, Range 38 East and Section 35, Township 3 North, Range 38 East, Mt. Diablo Meridian in Esmeralda County, Nevada subject to the terms of the Lease. The Property consists of Claims BJ 101, 103, 105, 107, 109, 110, 112, 114, 116 and 118 with BLM Serial No. NMC# Lead File 1017556 (the "Claims").

The Lease grants the Company the exclusive right to explore, develop and mine the Property for gold, silver and other minerals. Under the Lease, the Company is obligated to pay all Federal, State and County annual mining claim maintenance or rental fees and execute, record or file proof of payment of same and of Timberwolf's intention to hold the Claims.

Upon execution of the Lease, the Company paid \$11,456.50 inclusive of \$1,456.50 for 2010 maintenance fees. The Company is obligated to pay to Timberwolf minimum annual rental payments beginning on the first anniversary of the Lease as follows: \$15,000 on or before the first anniversary of the Lease, \$20,000 on or before the second anniversary of the Lease, \$25,000 on or before the third anniversary of the Lease, \$50,000 on or before the fourth anniversary of the Lease and \$50,000 on or before the fifth anniversary of the Lease. The Company has the right to purchase all of Timberwolf's unpatented Claims covered by the Lease and within the boundaries of the area of interest for \$5,000,000 on or before the sixth anniversary of the Lease, failure of which will terminate the Lease.

The Company's plan of operations is to conduct mineral exploration activities on the Property in order to assess whether the Claims possess commercially exploitable mineral deposits. (Commercially exploitable mineral deposits are deposits which are suitably adequate or prepared for productive use of a natural accumulation of minerals or ores). This exploration program is designed to explore for commercially viable deposits of gold, silver or other valuable minerals. (Commercially viable deposits are deposits which are suitably adequate or prepared for productive use of an economically workable natural accumulation of minerals or ores). The Company has not, nor has any predecessor, identified any commercially exploitable reserves of these minerals on our Claims. (A reserve is an estimate within specified accuracy limits of the valuable metal or mineral content of known deposits that may be produced under current economic conditions and with present technology). The Company is an exploration stage company and there is no assurance that a commercially viable mineral deposit exists on its Claims.

2

Upon acquiring a lease on the Property, David A. Wolfe, Professional Geologist, prepared a geologic report for the Company on the mineral exploration potential of the Claims. Mr. Wolfe is the President of Timberwolf Minerals LTD, the company from whom the Property is leased. Included in Mr. Wolfe's report is a recommended exploration program which consists of mapping, sampling, staking additional claims and drilling.

At this time the Company is uncertain of the extent of mineral exploration it will conduct before concluding that there are, or are not, commercially viable minerals on the Claims. Further phases beyond the current exploration program will be dependent upon numerous factors such as Mr. Wolfe's recommendations based upon ongoing exploration program results and the Company's available funds.

Since 1998, the Company has not engaged in any operations and has been dormant. The Company has no revenues and has incurred losses since inception. The notes to the Company's financial statements include a statement raising substantial doubt about the Company's ability to continue as a going concern. The Company

Edgar Filing: CAMELOT CORP - Form 8-K

will not generate revenues even if its exploration program indicates that a mineral deposit may exist on its Claims. Accordingly, the Company will be dependent on future additional financing in order to maintain operations and continue exploration activities.

ITEM 901 FINANCIAL STATEMENTS AND EXHIBITS

Exhibits required by Item 601 of Regulation S-K:

Exhibit Number	Description of Exhibit
3.1	Articles of Incorporation*
3.2	Certificate of Amendment of Articles of Incorporation dated December 16, 1988*
