Company Press Release

**Nova Measuring Instruments
Announces 2004 First Quarter Results.**

Rehovoth, Israel, May 13, 2004 Nova Measuring Instruments, Ltd. (Nasdaq: NVMI), the market leader in integrated measurement and process control for the semiconductor industry, today reported results for the first quarter of 2004.

2004 First Quarter Results

Total revenues for the first quarter of 2004 were \$9.2 million, a 92% increase over revenues of \$4.8 million reported for the first quarter of 2003 and a 13% sequential increase over revenues of \$8.1 million for the fourth quarter of 2004.

The Company reported gross profit of \$4.1 million (44% of revenues) compared with gross profit of \$1.5 million (32% of sales) for the first quarter of 2003 and gross profit of \$3.1 million (39% of revenues) in the fourth quarter of 2003. Net income for the quarter was \$70,000 or \$0.005 per share, compared with a loss of \$2.6 million, or \$0.17 per share, in the first quarter of 2003 and profit of \$0.6 million, or \$0.04 per share, in the fourth quarter of 2003. Fourth quarter 2003 results included other income of \$2.2 million due to the reversal of provisions made in previous years for the repayment of the Chief Scientist grants. First quarter 2004 results include stock-based compensation expenses of \$0.1 million.

Research and development expenses were \$2.1 million (23% of revenues) compared with \$2.2 million (44% of revenues), in the first quarter of 2003 and \$3.0 million (37% of revenues) in the fourth quarter of 2003. The quarter-on-quarter decrease in R&D expenses is related to the one time expense of \$750,000 in the previous quarter for the initiation of a new program as discussed in the previous quarter reports. Sales and marketing expenses were \$1.5 million (16% of revenues) as compared with \$1.5 million (31% of revenues) in the first quarter of 2003 and \$1.5 million (19% of revenues) in the fourth quarter of 2003. The cash and bank deposits position at the end of the quarter was \$30.5 million.

Dr. Giora Dishon, President & CEO of Nova commented, "The first quarter results reflect the continuous growth of our company and is the second sequential quarter with net income. Our growth is a result of the continuing penetration of our new products for CMP, copper CMP and Etch in the recovering semiconductor equipment industry after two and a half years of slowdown. The recovery is also evident in the increase of demand for retrofits and upgrades of 200mm equipment alongside the expansion of 300mm lines. It resulted with a 92% increase in revenues for the first quarter of this year compared with last year, and with improved gross margins. We are very encouraged with our growth and the growth we see in the industry, our strong cash and bank deposits position now standing at \$30.5 million, and the significant improvements of our operations breaking-even for the second quarter in a row. In line with the outlook we provided at the start of April, for the second quarter of 2004 we continue to expect strong growth in revenue at anywhere between 4-14% sequentially with growth in our profitability levels.

Dr. Dishon added, "We continued our efforts in penetration with the new process control systems, which are based on our pioneering Integrated Process Control concept. We have seen significant sales of our NovaScan CD systems, Stand-alone and Integrated, of the Integrated systems for copper CMP applications and the very significant demand for 200mm systems. As all market researches forecast significant growth for 2004 (Dataquest from April, 2004 forecasts growth of 48% over 2003), we expect to see continuous growth in our activities in all process control areas, as well as continuing expansion in the Asia Pacific including China and Japan regions. We will maintain monitoring of all our activities, leverage the upturn and work hard to improve our performance. We look forward to continued momentum and expansion throughout the year .

The Company will host a conference call today, May 13, 2004, at 10:00 EST. To participate please dial in the US 1-866-500-4953 or 1-866-500-4964 or international +972-3-9255910 at least 5 minutes before the start of the call. A conference call presentation will be available for download on the company's website www.nova.co.il, before and during the call.

About Nova

Nova Measuring Instruments Ltd. develops, designs and produces integrated process control systems in the semiconductor manufacturing industry. Nova provides a broad range of integrated process control solutions that link between different semiconductor processes and process equipment. The Company's website is www.nova.co.il.

This press release may contain forward-looking statements, including statements related to anticipated growth rates, manufacturing capacity and tax rate. Actual results may differ materially from those projected due to a number of risks, including changes in customer demands for our products, new product offerings from our competitors, changes in or an inability to execute our business strategy, unanticipated manufacturing or supply problems, or changes in tax requirements. Nova cannot guarantee future results, levels of activity, performance or achievements. The matters discussed in this press release also involve risks and uncertainties summarized under the heading "Risk Factors" in Nova's Form F-1 filed with the Securities and Exchange Commission on April 9, 2000. These factors are updated from time to time through the filing of reports and registration statements with the Securities and Exchange Commission. Nova Measuring Instruments Ltd. does not assume any obligation to update the forward-looking information contained in this press release.
