Edgar Filing: GILAT SATELLITE NETWORKS LTD - Form 6-K

Gilat further expands VSAT deployment for Mexico's public-school communications program with more than 4000 additional sites

Gilat's SkyEdge selected by an additional integrator to provide the Enciclomedia project with broadband satellite connectivity

Petah Tikva, Israel, December 11, 2006 Gilat Satellite Networks Ltd. (Nasdaq: GILT) today announced it has been selected by an additional integrator, Integradores de Tecnología to provide a 4,382-site SkyEdge VSAT network serving more than 9,600 Mexican public-school classrooms, to support the middle-school phase of the Mexican Ministry of Education's (SEP) Enciclomedia program. The deployment of the network hub and terminals has already begun.

This deal is in addition to the announcement by Gilat earlier this month that it had also been selected by a consortium of Mexican technology firms to provide a network of 4,400 SkyEdge VSATs. When combined with today's announcement and with previous announcements from earlier this year, this brings the total number of Mexican classrooms to be connected via SkyEdge to approximately 50,000 comprised of 33,500 primary-school classrooms and 17,400 middle-school classrooms.

Gilat will provide Integradores with the SkyEdge VSATs for monitoring, broadband Internet access and VoIP services to support the latest phase of Enciclomedia program, which focuses on middle schools and provides continuity to the program's previous phases. The Internet access will be used for email, discussion forums and web browsing.

Integradores' General Manager Oscar Perez Martinez said, "Our positive experience with the initial project phase demonstrates that Gilat's high-performance SkyEdge VSAT platform is well suited to handle multiple applications as required by the Enciclomedia project. The VSAT network can be implemented quickly and scales efficiently, which is critical for a network of this size.

Enciclomedia (www.enciclomedia.edu.mx) is a computer-based program that integrates federal education resources such as textbooks, digital content and virtual activities to enrich the student's classroom experience encourage student participation and enhance learning outcomes. The program also includes a portal to assist teachers with their daily activities. The Mexican government considers Enciclomedia to be an important education project and expects it to eventually reach more than 140,000 primary-school classrooms and more than 42,000 middle-school classrooms.

The SkyEdge platform is available in various configurations to support a wide range of networks, from small to large. SkyEdge efficiently supports periodic transmission such as that required by the monitoring needs of the SEP project broadband Internet connectivity and video services.

Erez Antebi, CEO of Gilat Network Systems, said, "Our strong local team in Mexico has successfully applied its engineering, logistics and technical-support knowledge to serve Integradores throughout each phase of this program. Our SkyEdge platform will continue to ensure excellent performance for this very large VSAT network."

About Integradores de Tecnología

Integradores de Tecnología (www.integradores.com.mx), founded in 1997, is a systems integrator providing a wide range of computing and telecommunications solutions to Mexican government agencies and multinational corporations.

About Gilat Satellite Networks Ltd.

Gilat Satellite Networks Ltd. (Nasdaq: GILT) is a leading provider of products and services for satellite-based communications networks. The Company operates under three business units: (i) Gilat Network Systems (GNS), which is a provider of network systems and associated professional services to service providers and operators worldwide; (ii) Spacenet Inc., which provides managed services in North America for businesses and governments through its Connexstar service brand and for consumers through its StarBand service brand; (iii) Spacenet Rural Communications, which offers rural telephone and Internet access solutions to remote areas primarily in Latin America.

Gilat was founded in 1987 and has shipped over 650,000 Very Small Aperture Terminals (VSATs) to more than 85 countries across six continents. Gilat's headquarters is located in Petah Tikva, Israel. The Company has 16 sales and services offices worldwide. Gilat markets the SkyEdge Product Family which includes the SkyEdge Pro, SkyEdge IP, SkyEdge Call, SkyEdge DVB-RCS and SkyEdge Gateway. In addition, the Company markets numerous other legacy products.
