Enclosures: 1. Record date correction announcement made on 7 November 2002

November 7, 2002

Record date correction.

Edgar Filing: BT GROUP PLC - Form 6-K/A

The interim dividend record date should have read 31 December 2002 and not as stated. All other particulars in the announcement, an amended version of which is set out below, remain unchanged.

SECOND QUARTER AND HALF YEAR RESULTS TO SEPTEMBER 30, 2002

SECOND QUARTER AND HALF YEAR HIGHLIGHTS

- Group turnover* of GBP4,661 million, up 2 per cent
- Profit before taxation* of GBP496 million, up 55 per cent
- Earnings per share* of 3.7 pence, up 54 per cent
- Free cash flow of GBP552 million generated
- Net debt reduced by GBP285 million in the quarter
- Interim dividend of 2.25 pence per share
- Broadband end users of 451,000 at November 1
- Customer satisfaction well ahead of the competition

*from continuing activities before goodwill amortisation and exceptional items

Chairman's statement

Sir Christopher Bland, Chairman, commenting on the second quarter results, said:

"This is an excellent set of results. The operating performance of the business has been particularly strong in a difficult market. We generated over half a billion pounds in free cash flow in the quarter.

I am pleased to report that we will be paying an interim dividend of 2.25 pence per share.

The recently announced agreement to dispose of our stake in Cegetel will see net debt reduce by a further GBP2.5 billion on completion.

These results demonstrate our ability to reduce debt, reward our shareholders and invest for the future."

Chief Executive's statement

Ben Verwaayen, Chief Executive, commenting on the second quarter results said:

"We continue to make strong progress in achieving our key goals of improving cash flow, earnings per share and customer satisfaction. Free cash flow was GBP552 million and earnings per share* increased by 54 per cent over last year to 3.7 pence, well ahead of our targets. Customer

Edgar Filing: BT GROUP PLC - Form 6-K/A

satisfaction was also well ahead of the competition.

Our revenue growth in the quarter was 2 per cent. Although the three year revenue target of 6 to 8 per cent compound annual growth is unlikely to be achieved in the present market conditions, we expect total revenue growth for the second half to be in line with current market expectations. Future revenue growth will benefit from our focus on developing new wave initiatives, particularly in broadband and ICT."

*from continuing activities before goodwill amortisation and exceptional items

BT Group's results, excluding discontinued activities, exceptional items and goodwill amortisation, are summarised in the following table:

RESULTS FOR THE SECOND QUARTER AND HALF YEAR TO SEPTEMBER 30, 2002

BT Group's continuing activities before goodwill amortisation
and exceptional items

	Second quarter			2002 GBPm	Half
	2002 GBPm	2001 GBPm	Better (worse) %		
Group turnover	4,661	4,557	2	9,248	
EBITDA before leaver costs	1,515	1,403	8	2,974	
EBITDA after leaver costs	1,478	1,385	7	2,781	
Group operating profit	729	657	11	1,299	
Net interest charge	295	352	16	595	
Profit before taxation	496	321	55	818	
Profit after taxation	331	206	61	546	
Earnings per share	3.7p	2.4p	54	6.2p	
Capital expenditure	559	660	15	1,108	
Net debt				13,112	

GROUP RESULTS

Group turnover increased year on year by 2 per cent to GBP4,661 million in the second quarter. This was a good performance in a difficult market for telecoms operators and solutions businesses. Although the three year revenue target of 6 to 8 per cent compound annual growth is unlikely to be achieved in the present

Edgar Filing: BT GROUP PLC - Form 6-K/A

market conditions, we expect total revenue growth for the second half to be in line with current market expectations. Future revenue growth will benefit from our focus on developing new wave initiatives.

Group operating profit before goodwill amortisation and exceptional items at GBP729 million for the quarter was GBP72 million higher than the second quarter of last year, with improved gross margins in BT Retail, cost reductions across the lines of business and reduced losses in the overseas activities of BT Ignite. The strong operating performance is despite the negative operating profit effect of unwinding the Concert global venture, the Telereal property sale and leaseback and the impact of GBP37 million of leaver costs (GBP18 million last year). The operating improvement does however reflect the year on year effect of one off charges of GBP52 million, relating to certain regulatory decisions, made in the second quarter of last year.

BT's share of associates and joint ventures operating profits before goodwill amortisation was GBP66 million (GBP9 million last year) in the quarter, benefiting from the unwind of Concert and improved results from Cegetel.

Net interest payable was GBP295 million for the quarter, an improvement of GBP57 million against last year as a result of the significant reduction in the level of net debt.

Profit before taxation of GBP496 million in the quarter increased by 55 per cent reflecting the underlying operating performance of the group and lower net interest costs.

The taxation charge for the quarter was GBP165 million; this represents an effective rate of 33.3 per cent (35.8 per cent last year) on the profit before exceptional items and goodwill amortisation.

Earnings per share before goodwill amortisation and exceptional items were 3.7 pence for the quarter (2.4 pence last year), an increase of 54 per cent.

Goodwill amortisation at GBP3 million for the quarter was GBP38 million lower than last year. This reduction reflects the disposals and goodwill impairment write downs made last year. Earnings per share after goodwill amortisation and exceptional items were 3.7 pence compared to a loss of 15.0 pence last year. An interim dividend of 2.25 pence per share will be paid on February 10, 2003 to shareholders on the register on December 31, 2002. We expect this year's final dividend to be slightly more than the historical level of one and a half times the interim dividend. Our progressive dividend policy remains unchanged.

Underlying performance and intra-group trading

In the line of business commentaries that follow, references to "underlying performance" are to trading performance after adjusting for the estimated impact of the Concert unwind and business acquisitions and disposals on the line of business results. Trends in the results of the lines of business are described by reference to the underlying performance.

The group results have not been adjusted for the pro forma impact of the Concert unwind.

There is extensive trading between the lines of business, the effect of which is eliminated in arriving at the group results. The intra-group turnover and intra-group costs of BT Retail for comparative periods and the first quarter ended June 30, 2002 have been restated to reflect changes to the intra-group trading arrangements.

Edgar Filing: BT GROUP PLC - Form 6-K/A

(a) Internal turnover restated to reflect changes in intra-group trading arrangements

(b) Adjusting for the effect of the Concert unwind

Compared to the second quarter of last year, BT Retail increased turnover by GBP46 million (1 per cent). Operating profits increased by GBP119 million (44 per cent) due to margin improvements and cost reductions.

The estimated impact on BT Retail of integrating the returning Concert multinational customers and associated sales staff on the reported results for the second quarter of last year would have been to increase turnover by GBP58 million (in the product areas of fixed network calls, exchange line connections and private circuits) and increase gross margin by GBP34 million. There would have been no impact on EBITDA and operating profit.

Turnover for the quarter is summarised as follows:

Second quarter ended September 30

BT Retail turnover	2002	2001	Better (worse)	
			Actual	Underlying

 Sales to other BT businesses incl. above	 458	 515	 (11)	 (2)

(a) Internal turnover restated to reflect changes in intra-group trading arrangements

(b) Adjusting for the effect of the Concert unwind

Turnover from voice services was unchanged from the second quarter of last year, with growth in the consumer market being offset by a decline in the business market. Within this, turnover from fixed network calls including outbound international calls, calls to mobile phones and calls to the internet decreased by 2 per cent to GBP1,200 million reflecting a reduction in call volumes. The effect was partly offset by an increase in revenue from packages such as BT Together and from analogue line rentals and connections.

The continued success of BT Together and BT Answer 1571 has held the rate of decline in geographic call volumes in BT Retail to 4 per cent, consistent with the last quarter. In the second quarter of last year the rate of decline was 5 per cent. The growth in fixed to mobile call minutes of 7 per cent (5 per cent in the last quarter), compares to 13 per cent in the second quarter of last year. Internet related and other non-geographic call minutes declined by 8 per cent compared to the second quarter of last year mainly due to customers continuing to switch to either FRIACO (Flat Rate Internet Access Call Origination) based internet products or, increasingly, broadband.

Within the residential voice market BT Retail has maintained market share at around 73 per cent as it has done since June 2000. In the business voice market, excluding the returned Concert businesses, estimates show BT Retail's market share to be down around 0.5 percentage points since the first quarter to 45 per cent.

Turnover from analogue exchange lines of GBP772 million increased by 4 per cent compared to the second quarter of last year as a result of rebalancing tariff charges. The number of residential voice lines has remained stable.

Other voice services include operator services, directory enquiries, payphones and chargecards. Turnover from these services decreased by 2 per cent to GBP454 million compared to the second quarter of last year.

Turnover from intermediate products of GBP669 million increased by 1 per cent compared to the second quarter of last year, despite the continued migration of customers from retail private circuits to partial private circuits, the effect of which is estimated at GBP41 million for the quarter. Narrowband (ISDN) lines continue to grow and at 3.7 million are 11 per cent higher than last year. Total business lines grew by 1 per cent reflecting the growth in ISDN lines. Other services comprise hardware, conferencing and other data services.

New Wave revenue grew by 32 per cent in the quarter as a result of the continued focus on the information, communications and technology ("ICT"), broadband and mobility products. The benefit of product launches during the quarter should contribute to further revenue growth in the second half of the year.

During the quarter BT Retail announced the next strand of its ICT strategy, namely the provision of applications management, hosting, mobility and web services which together with the IP infrastructure portfolio products helped BT achieve some notable wins: Unilever, Dixons Group and Leisure Link.

Edgar Filing: BT GROUP PLC - Form 6-K/A

BT Retail fully launched its direct broadband product on September 22, 2002. Volumes are being stimulated by an extensive marketing campaign.

September also saw the launch of the BT click&buy micropayments service which offers customers a secure means of buying digital content on the internet. At launch, twenty content partners were on-line with a further twenty-five signed up.

The increase in gross margin of GBP68 million (1.7 percentage points to 28.8 per cent) compared to the second quarter of last year continues to benefit from a more favourable traffic mix, value added offers and lower wholesale prices. The prior year effect of one-off charges relating to regulatory decisions, totalling GBP30 million, in the second quarter of last year has also improved the year on year gross margin.

Cost transformation programmes have generated a 10 per cent saving in sales, general and administration costs of GBP56 million against the second quarter of last year. These savings have been driven by the implementation of the call centre rationalisation programme, the reduction in business expenses, lower service payments resulting from improvements in service quality and other similar cost transformation programmes. On a full year basis these programmes are expected to deliver GBP200 million savings in the voice services and intermediate products.

EBITDA in the second quarter was GBP124 million (39 per cent) higher than the prior year which enabled BT Retail to contribute an operating free cash flow (EBITDA less capital expenditure) of GBP413 million in the quarter; GBP116 million better than the second quarter of last year.

The second quarter saw continued success in achieving our objective of establishing "clear blue water" against the competition for customer satisfaction. Customer satisfaction was well ahead in all areas of the business with Consumer achieving 80 per cent satisfaction (9 per cent ahead of the competition), Business achieving 67 per cent (3 per cent ahead) and Major Business achieving 66 per cent (10 per cent ahead).

Edgar Filing: BT GROUP PLC - Form 6-K/A

*Adjusting for the effect of the Concert unwind and transfer of a major account from BT Ignite

BT Wholesale's turnover for the quarter at GBP2,833 million was flat and operating profit was 2 per cent lower than the second quarter of last year at GBP512 million. Operating free cash flow has continued to improve, showing growth of 10 per cent, mainly as a result of tight control of capital expenditure.

Second quarter ended September 30

BT Wholesale turnover	2002 GBPm	2001 GBPm	Better (worse)	
			Actual %	Underlying* %
Internal turnover	1,968	2,097	(6)	(3)

UK fixed operators	515	480	7	4
UK mobile operators	350	302	16	16
Total	2,833	3,027	(6)	-

*Adjusting for the effect of the Concert unwind and transfer of a major account from BT Ignite

Turnover was flat due to the adverse market conditions in the telecommunications sector and a reduction in prices.

External turnover in the quarter of GBP865 million showed an increase of GBP66 million (8 per cent) over the second quarter of last year. This partly reflects the year on year effect of regulatory provisions, made in the second quarter of last year, for the retrospective effect of the Oftel Number Translation Services (NTS) determination. This reduced prior year revenues by GBP22 million.

New business external revenues, including broadband and solutions, at GBP45 million were 55 per cent higher than the second quarter of last year reflecting, in part, the significant growth of wholesale ADSL lines of which there were 451,000 as at November 1, 2002.

Within traditional products, the impact of price reductions - due to flat rate price packages, new Network Charge Control (NCC) pricing formulae and Oftel determinations - coupled with unfavourable market conditions have continued to slow turnover growth. Mobile operator originated transit continues to grow although the effect is partly offset by the decline in fixed operator originated transit. FRIACO revenues continue to grow but are partly offset by the slow down in the conveyance revenues they substitute. Also, revenues from retail private circuits are down, due to migration of customers to lower priced partial private circuits.

Internal turnover in the quarter at GBP1,968 million showed a decrease of GBP65 million (3 per cent) due to a reduction in both volumes and prices charged to BT Retail, partly offset by an increase in sales (including ADSL) to other BT lines of business.

Edgar Filing: BT GROUP PLC - Form 6-K/A

Despite network volume increases, BT Wholesale's operating costs, excluding depreciation, of GBP1,872 million were broadly flat against the second quarter of last year. Full time equivalent staff numbers have reduced by 8 per cent since the second quarter of last year, the benefit of which is recognised in lower capital investment and improved operating efficiencies. Leaver costs were GBP6 million in the second quarter, GBP5 million higher than last year.

Depreciation at GBP478 million increased by GBP10 million (2 per cent) reflecting the move towards shorter asset lives partly offset by reduced capital expenditure.

Operating profit decreased by GBP11 million (2 per cent) whilst operating profit margins remained stable at 18 per cent.

Capital expenditure at GBP385 million decreased by GBP54 million (12 per cent) reflecting the continued tight control over capital investment.

BT Wholesale has maintained its focus on managed cash costs (operating costs excluding payments to other network operators and depreciation, plus capital expenditure). Managed cash costs at GBP1,436 million decreased by 3 per cent despite an increase in network volumes. Managed cash cost savings are GBP133 million, year to date, and BT Wholesale remains on track to achieve the full year target savings of GBP200 million after allowing for price and volume effects.

BT Ignite

Second quarter ended September 30

	2002 GBPm	2001 GBPm	Better (worse)	
			Actual %	Underlying* %
Group turnover	1,267	1,131	12	1
EBITDA	34	34	-	n/m
Group operating loss	(115)	(87)	(32)	25
Capital expenditure	93	104	11	48
Operating free cash flow	(59)	(70)	16	70

*Adjusting for the effect of the Concert unwind, acquisitions and disposals and the transfer of a major account to BT Wholesale

BT Ignite made good progress in the quarter with a significant improvement in underlying profitability and cash flow despite experiencing difficult trading conditions in the corporate sector and reduced carrier revenues. Underlying operating losses for the quarter were reduced by 25 per cent on last year.

Underlying turnover for the quarter grew at 1 per cent to GBP1,267 million. This includes the impact of a 16 per cent fall in Global Carrier turnover primarily due to the decline in trade with AT&T and Worldcom following the unwind of the Concert global venture. Excluding Global Carrier, BT Ignite's turnover grew by 6 per cent. Global Products grew by 10 per cent and Solutions by 9 per cent. Syntegra has outperformed the declining systems integration market, holding turnover at around last year's level. European Connectivity turnover fell by 2 per cent to GBP243 million due mainly to the decline of non-core revenues as BT Ignite has exited non profitable elements of the SME and consumer markets in Europe. Growth in core European Connectivity revenues was 5 per cent compared to

Edgar Filing: BT GROUP PLC - Form 6-K/A

the second quarter of last year.

Costs have been managed carefully to compensate for the lower revenue growth with EBITDA improving by GBP49 million over the second quarter of last year. As part of the cost reduction programme approximately 350 people left under early leaver terms at a cost of GBP14 million (GBP5 million last year). Excluding leaver costs EBITDA was GBP58 million ahead. All businesses generated an improvement in EBITDA compared to the second quarter of last year.

European operations have made excellent progress towards their targeted EBITDA break even run rate by March 31, 2003 with their combined EBITDA improving by GBP25 million to a loss of GBP4 million. The results benefited from one off credits in the quarter of GBP3 million. During the second quarter Spain became the second operation to generate positive EBITDA, following Ireland in the first quarter.

The operating loss was GBP101 million in the quarter before early leaver costs, a GBP48 million improvement from the second quarter of last year.

Capital expenditure was GBP93 million in the quarter, GBP87 million lower than the second quarter of last year. As a result, the operating free cash outflow (EBITDA less capital expenditure) of GBP59 million was 70 per cent better than the second quarter of last year.

BT Openworld

	Second quarter ended September 30		Better %	Half
	2002 GBPm	2001 GBPm		
Group turnover	67	56	20	
EBITDA	(16)	(25)	36	
Group operating loss	(22)	(36)	39	
Capital expenditure	1	3	67	
Operating free cash flow	(17)	(28)	39	

BT Openworld made further good improvements in turnover, profitability and cash flow. Turnover for the second quarter was GBP67 million, an increase of GBP11 million (20 per cent) on the second quarter of last year. The improvement is mainly due to growth in new broadband products and continued growth in the core narrowband product range.

EBITDA loss for the second quarter was GBP16 million, GBP9 million (36 per cent) less than the second quarter of last year and GBP6 million less than the previous quarter. Operating losses fell by 39 per cent to GBP22 million. The reduced losses reflect economies of scale from increased volumes, in particular in the narrowband business, which is now EBITDA positive. This is well ahead of the target date of March 31, 2003.

As at September 30, 2002, BT Openworld had 213,000 broadband customers, representing approximately 20 per cent of the total UK broadband market.

CASH FLOW AND NET DEBT

Cash inflow from operating activities amounted to GBP1,423 million in the quarter. This represents a strong conversion of profits into cash with EBITDA of

Edgar Filing: BT GROUP PLC - Form 6-K/A

GBP1,478 million in the quarter. The reported cash inflow last year of GBP1,433 million in the quarter was generated from both the continuing and discontinued activities of the Group.

The cash outflow on fixed asset purchases was GBP602 million in the quarter which compares to GBP804 million from the continuing activities last year. This reflects the continued management focus and control over capital expenditure. Full year capital expenditure is expected to be around GBP2.8 billion.

Free cash flow (before acquisitions and disposals, dividends and financing) was GBP552 million in the quarter.

Net debt at September 30, 2002 was GBP13.1 billion, a reduction of GBP285 million in the quarter. BT repaid GBP381 million of gross borrowings during the quarter, principally bonds held by Esat, the group's Irish subsidiary.

The group's gross borrowings at September 30, 2002 totalled GBP16,978 million, compared with GBP18,440 million at March 31, 2002. After deducting short term investments and cash of GBP3,866 million (GBP4,739 million at March 31, 2002), net debt was GBP13,112 million at September 30, 2002 (GBP13,701 million at March 31, 2002).

In the third quarter the previously announced annual deficiency funding and special contribution for early leavers' pension costs, totalling approximately GBP340 million, will be paid to the BT Pension Scheme. In addition, bond interest payments of approximately GBP370 million will be made.

POST BALANCE SHEET EVENTS

On October 16, 2002, BT agreed to sell its 26 per cent stake in Cegetel for EUR4.0 billion (GBP2.5 billion) in cash representing a return of around two and a half times on the total investment in Cegetel. BT will recognise a profit of approximately GBP1.4 billion after taking account of goodwill of GBP0.9 billion that had previously been written off directly to reserves. The transaction is conditional upon relevant regulatory approvals and is expected to complete during the second half of the year.

A review has been undertaken of the group's London office strategy with a view to reducing the number of office based staff and the number of office locations in the London and M25 area. It is anticipated this will require an exceptional property rationalisation charge of between GBP150 and GBP200 million to be recognised in the third quarter.

On October 8, 2002 the shareholders of Blu SpA agreed to the sale of their shares to Telecom Italia Mobile. As a result BT expects to write back approximately GBP150 million of exceptional charges when the transaction completes.

The half year report, which contains the independent review report of the auditors, will be advertised in the Financial Times on November 8, 2002.

The third quarter results of BT Group are expected to be announced on February 13, 2003.

NOTES

1 Basis of preparation

The unaudited interim results of BT Group, which are not statutory accounts, have been prepared on the basis of the accounting policies as set out in the report and accounts of BT Group plc for the year ended March 31, 2002. Figures

Edgar Filing: BT GROUP PLC - Form 6-K/A

for the year ended March 31, 2002 are extracts from the group accounts for that year.

The group accounts for the year ended March 31, 2002, on which the auditors issued an unqualified report which did not contain a statement under Section 237 (2) or (3) of the Companies Act 1985, have been delivered to the Registrar of Companies.

The activities of mm02, Japan Telecom, J-Phone Communications, Airtel and Yell were disposed of in the year ended March 31, 2002, and are shown as discontinued operations in the profit and loss account for the comparative periods. The eliminations are intra-group eliminations.

2 Results of businesses

The tables below show the results of BT's lines of business. There is extensive trading between many of the business units and profitability is dependent on the transfer price levels. These intra-group trading arrangements are subject to review and have changed in certain instances. Comparative figures were restated for these changes during the first quarter.

During the second quarter, the intra-group turnover and intra-group costs of BT Retail for comparative periods and the first quarter ended June 30, 2002 have been further restated to reflect refinements to the intra-group trading arrangements. This has no impact on the group results.

2 Results of businesses continued

(a) Operating results

	Group turnover	EBITDA before exceptional items
	GBPm	GBPm
Second quarter ended September 30, 2002

8 Dividends

	Half year ended September 30 2002 pence per share	2001
Interim dividend	2.25	-

9 Earnings per share

The basic earnings per share are calculated by dividing the profit attributable to shareholders by the average number of shares in issue after deducting the company's shares held by employee share ownership trusts. In calculating the diluted earnings per share, share options outstanding and other potential ordinary shares have been taken into account.

The average number of shares in the periods were:

	Second quarter ended September 30		ende

15 United States Generally Accepted Accounting Principles

The results set out above have been prepared in accordance with accounting principles generally accepted in the United Kingdom. The table below sets out the results calculated in accordance with United States Generally Accepted Accounting Principles.

	Second quarter ended September 30 2002	2001
Net income (loss) attributable to shareholders (GBP million) including discontinued activities and exceptional items	514	(1,046)
Earnings (loss) per ADS (GBP)		
- basic	0.60	(1.23)
- diluted	0.59	(1.23)

Each American Depositary Share (ADS) represents 10 ordinary shares of BT Group plc.

Shareholders' equity, calculated in accordance with United States Generally Accepted Accounting Principles, is GBP3,798m deficiency at September 30, 2002 (September 30, 2001 - GBP18,538m surplus, March 31, 2002 - GBP4,247m deficiency).

Forward-looking statements - caution advised

Certain statements in this results release are forward-looking and are made in reliance on the safe harbour provisions of the US Private Securities Litigation Reform Act of 1995. These statements include, without limitation, those concerning: expectations regarding broadband growth and the benefits of other new wave initiatives; the possible or assumed future results of operations of BT and/or its lines of business; dividend cover and the group's cash position; expectations regarding revenue growth, capital expenditure, investment plans, cost reductions, return on capital employed and pension funding; the sale of Blu SpA; the disposal of Cegetel and net debt.

Although BT Group believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurance that these expectations will prove to have been correct. Because these statements involve risks and uncertainties, actual results may differ materially from those expressed or implied by these forward-looking statements.

Edgar Filing: BT GROUP PLC - Form 6-K/A

Factors that could cause differences between actual results and those implied by the forward-looking statements include, but are not limited to: material adverse changes in economic conditions in the markets served by BT and its lines of business; future regulatory actions and conditions in BT's operating areas, including competition from others in the UK and other international communications markets; selection by BT and its lines of business of the appropriate trading and marketing models for its products and services; fluctuations in foreign currency exchange rates and interest rates; technological innovations, including the cost of developing new products and the need to increase expenditures for improving the quality of service; prolonged adverse weather conditions resulting in a material increase in overtime, staff or other costs; developments in the convergence of technologies; the anticipated benefits and advantages of new technologies, products and services, including broadband and other new wave initiatives, not being realised; the timing of entry and profitability of BT and its lines of business in certain communication markets; significant changes in market shares for BT and its principal products and services; to the extent that BT chooses to sell assets or minority interests in its subsidiaries, prevailing market levels for such sales; general financial market conditions affecting BT's performance; the reintegration of Concert; and the outcome of the actuarial funding valuation as at December 31, 2002. BT Group undertakes no obligation to update any forward-looking statements whether as a result of new information, future events or otherwise.
