Cautionary Statement Regarding Forward-Looking Statements

The Company makes forward-looking statements in this Form 10-K that are subject to risks and uncertainties. These forward-looking statements include statements regarding profitability, liquidity, allowance for loan losses, interest rate sensitivity, market risk, growth strategy and financial and other goals. The words believes, expects, may, will, should, projects, contemplates, anticipates, forecasts, intends, or other similar terms are intended to identify forward-looking statements. These forward-looking statements are subject to significant uncertainties because they are based upon or are affected by factors including:

the Company may be adversely affected by economic conditions in the market area;

successful management of credit risk including certain concentrations in loans secured by real estate;

risks inherent in the loan portfolio such as repayment risks, fluctuating collateral values and concentrations;

the adequacy of the allowance for loan losses related to changes in general economic and business conditions in the market area;

the ability to successfully manage growth or implement growth strategies;

competition with other banks and financial institutions, and companies outside of the banking industry, including those companies that have substantially greater access to capital and other resources;

maintaining capital levels adequate to support growth;

the successful management of interest rate risk;

reliance on the management team, including the ability to attract and retain key personnel;

the limited trading market in the Company's common stock; and

other factors identified in Item 1A, Risk Factors, below.

Because of these uncertainties, actual future results may be materially different from the results indicated by these forward-looking statements. In addition, past results of operations do not necessarily indicate future results.

**Item 1. Business
General**

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

First National Corporation (the Company) is a financial holding company incorporated under the laws of the Commonwealth of Virginia on September 7, 1983. The Company owns all of the stock of its primary operating subsidiary, First Bank (the Bank), which is an independent commercial bank chartered under the laws of the Commonwealth of Virginia. The Company is also the parent company of First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities.

The Bank first opened for business on July 1, 1907 under the name The Peoples National Bank of Strasburg. On January 10, 1928, the Bank changed its name to The First National Bank of Strasburg. On April 12, 1994, the Bank received approval from the Federal Reserve Bank of Richmond (the Federal Reserve) and the Virginia State Corporation Commission's Bureau of Financial Institutions to convert to a state chartered bank with membership in the Federal Reserve System. On June 1, 1994, the Bank consummated such conversion and changed its name to First Bank.

The Bank has one wholly owned subsidiary, First Bank Financial Services, Inc., incorporated under the laws of the Commonwealth of Virginia, which invests in partnerships that provide title insurance and investment services.

Access to Filings

The Company's internet address is www.firstbank-va.com. The Company's Annual Reports on Form 10-K, Quarterly Reports on Form 10-Q and Current Reports on Form 8-K, and amendments to those reports, as filed with or furnished to the Securities and Exchange Commission (the SEC), are available free of charge at www.firstbank-va.com as soon as reasonably practicable after being filed with or furnished to the SEC. A copy of any of the Company's filings will be sent, without charge, to any shareholder upon written request to: M. Shane Bell, Chief Financial Officer, at 112 West King Street, Strasburg, Virginia 22657.

Table of Contents

Products and Services

The Bank provides loan, deposit, investment, trust and asset management and other products and services in the northern Shenandoah Valley region of Virginia. Loan products and services include personal loans (including automobile and property improvement loans), residential mortgages, home equity loans and commercial loans. Deposit products and services include checking, savings, NOW accounts, money market accounts, IRA accounts, certificates of deposit and direct deposit services. The Bank offers other services, including safe deposit rentals, travelers and gift cards, internet banking, wire transfer services and other traditional banking services.

The Bank's Trust and Asset Management Department offers a variety of trust and asset management services including estate planning, investment management of assets, trustee under an agreement, trustee under a will, individual retirement accounts, estate settlement and benefit plans. The Bank offers financial planning and brokerage services for its customers through its investment division, First Financial Advisors.

The Bank's primary market area is located within the northern Shenandoah Valley region of Virginia, including Shenandoah County, Warren County, Frederick County and the City of Winchester. Within the market area there are various types of industry including medical and professional services, manufacturing, retail and higher education. Customers include individuals, small and medium-sized businesses, local governmental entities and non-profit organizations.

The Bank's products and services are provided through 11 branch offices, 29 ATMs and its website, www.firstbank-va.com. The Bank operates six of its offices under the "Financial Center" concept. A Financial Center offers all of the Bank's financial services at one location. This concept allows loan, retail deposit, trust and investment management personnel to be readily available to serve customers throughout the Bank's market area. For the location of each of these Financial Centers, see Item 2 of this Form 10-K below.

Competition

The Company competes with large regional financial institutions, savings banks, consumer finance companies, insurance companies, credit unions, money market mutual funds and other community banks. Competition has been increasing from out-of-state banks through their acquisition of Virginia-based banks and branches and expansion of credit unions into the market.

The financial service business in Virginia, and specifically in the Company's market area, is highly competitive. Advantages the large regional financial institutions have over the Company include the ability to support wide-ranging advertising campaigns, larger amounts of capital and substantially higher lending limits. Credit unions have a competitive advantage because they have more favorable tax treatment than the Company and can pass those savings on to their customers through lower loan rates and higher deposit rates.

Factors affecting the competition for loans and deposits are interest rates offered, the number and location of branches and types of products offered, as well as the reputation of the institution. Advantages the Company has over the competition include long-term customer relationships, its commitment to excellent customer service, its dedicated and loyal employees, its local management and directors, and the support and involvement in the communities that the Company serves. The Company focuses on providing products and services to individuals, small to medium-sized businesses and local governmental entities within its communities. According to Federal Deposit Insurance Corporation (FDIC) deposit data as of June 30, 2007, the Bank was ranked first in Shenandoah County with \$198.5 million in deposits, representing 27% of the total deposit market. The Bank was ranked third in Warren County with \$77.3 million or 16% of the market, fourth in Frederick County with \$54.4 million or 11% of the market, and sixth in the City of Winchester with \$147.4 million or 8% of the market.

No material part of the business of the Company is dependent upon a single or a few customers, and the loss of any single customer would not have a materially adverse effect upon the business of the Company.

Employees

At December 31, 2007, the Company and the Bank employed a total of 172 full-time equivalent employees. The Company considers relations with its employees to be excellent.

Table of Contents

SUPERVISION AND REGULATION

General

As a financial holding company, the Company is subject to regulation under the Bank Holding Company Act of 1956, as amended, and the examination and reporting requirements of the Board of Governors of the Federal Reserve System. As a state-chartered commercial bank, the Bank is subject to regulation, supervision and examination by the Virginia State Corporation Commission's Bureau of Financial Institutions. It is also subject to regulation, supervision and examination by the Federal Reserve Board. Other federal and state laws, including various consumer and compliance laws, govern the activities of the Bank, the investments that it makes and the aggregate amount of loans that it may grant to one borrower. Laws and regulations administered by the regulatory agencies also affect corporate practices, including business practices related to payment and charging of interest, documentation and disclosures, and affect the ability to open and close offices or purchase other entities.

The following description summarizes the significant federal and state laws applicable to the Company's industry. To the extent that statutory or regulatory provisions are described, the description is qualified in its entirety by reference to that particular statutory or regulatory provision.

The Bank Holding Company Act

Under the Bank Holding Company Act, the Company is subject to periodic examination by the Federal Reserve and required to file periodic reports regarding its operations and any additional information that the Federal Reserve may require. Activities at the bank holding company are limited to:

banking, managing or controlling banks;

furnishing services to or performing services for its subsidiaries; and

engaging in other activities that the Federal Reserve has determined by regulation or order to be so closely related to banking as to be a proper incident to these activities.

Some of the activities that the Federal Reserve Board has determined by regulation to be closely related to the business of a bank holding company include making or servicing loans and specific types of leases, performing specific data processing services and acting in some circumstances as a fiduciary or investment or financial adviser.

With some limited exceptions, the Bank Holding Company Act requires every bank holding company to obtain the prior approval of the Federal Reserve before:

acquiring substantially all the assets of any bank;

acquiring direct or indirect ownership or control of any voting shares of any bank if after such acquisition it would own or control more than 5% of the voting shares of such bank (unless it already owns or controls the majority of such shares); or

merging or consolidating with another bank holding company.

In addition, and subject to some exceptions, the Bank Holding Company Act and the Change in Bank Control Act, together with their regulations, require Federal Reserve approval prior to any person or company acquiring control of a bank holding company. Control is conclusively presumed to exist if an individual or company acquires 25% or more of any class of voting securities of the bank holding company. Control is rebuttably presumed to exist if a person acquires 10% or more, but less than 25%, of any class of voting securities and either the company has registered securities under Section 12 of the Securities Exchange Act of 1934 or no other person owns a greater percentage of that class of voting securities immediately after the transaction. The regulations provide a procedure for challenging this rebuttable control

presumption.

In November 1999, Congress enacted the Gramm-Leach-Bliley Act (the GLBA), which made substantial revisions to the statutory restrictions separating banking activities from other financial activities. Under the GLBA, bank holding companies that are well-capitalized and well-managed and meet other conditions can elect to become financial holding companies. As financial holding companies, they and their subsidiaries are permitted to acquire or engage in previously impermissible activities such as insurance underwriting, securities underwriting and distribution, travel agency activities, insurance agency activities, merchant banking and other activities that the Federal Reserve determines to be financial in nature or complementary to these activities. Financial holding companies continue to be subject to the overall oversight and supervision of the Federal Reserve, but the GLBA applies the concept of functional regulation to the activities conducted by subsidiaries. For example, insurance activities would be subject to supervision and regulation by state insurance authorities.

Table of Contents

Capital Requirements

The Federal Reserve Board has issued risk-based and leverage capital guidelines applicable to banking organizations that it supervises. Under the risk-based capital requirements, the Company and the Bank are each generally required to maintain a minimum ratio of total capital to risk-weighted assets (including certain off-balance sheet activities, such as standby letters of credit) of 8%. At least half of the total capital must be composed of Tier 1 Capital, which is defined as common equity, retained earnings and qualifying perpetual preferred stock, less certain intangibles. The remainder may consist of Tier 2 Capital, which is defined as specific subordinated debt, some hybrid capital instruments and other qualifying preferred stock and a limited amount of the loan loss allowance. Trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. In addition, each of the federal banking regulatory agencies has established minimum leverage capital requirements for banking organizations. Under these requirements, banking organizations must maintain a minimum ratio of Tier 1 capital to adjusted average quarterly assets equal to 3% to 5%, subject to federal bank regulatory evaluation of an organization's overall safety and soundness.

The risk-based capital standards of the Federal Reserve Board explicitly identify concentrations of credit risk and the risk arising from non-traditional activities, as well as an institution's ability to manage these risks, as important factors to be taken into account by the agency in assessing an institution's overall capital adequacy. The capital guidelines also provide that an institution's exposure to a decline in the economic value of its capital due to changes in interest rates be considered by the agency as a factor in evaluating a banking organization's capital adequacy.

The FDIC may take various corrective actions against any undercapitalized bank and any bank that fails to submit an acceptable capital restoration plan or fails to implement a plan accepted by the FDIC. These powers include, but are not limited to, requiring the institution to be recapitalized, prohibiting asset growth, restricting interest rates paid, requiring prior approval of capital distributions by any bank holding company that controls the institution, requiring divestiture by the institution of its subsidiaries or by the holding company of the institution itself, requiring new election of directors, and requiring the dismissal of directors and officers. The Bank presently maintains sufficient capital to remain in compliance with these capital requirements.

Dividends

The Company is a legal entity separate and distinct from its banking and other subsidiaries. The majority of the Company's revenues are from dividends paid to the Company by the Bank. The Bank is subject to laws and regulations that limit the amount of dividends it can pay. In addition, both the Company and the Bank are subject to various regulatory restrictions relating to the payment of dividends, including requirements to maintain capital at or above regulatory minimums. Banking regulators have indicated that banking organizations should generally pay dividends only if the organization's net income available to common shareholders over the past year has been sufficient to fully fund the dividends and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition. The Company does not expect that any of these laws, regulations or policies will materially affect the ability of the Bank to pay dividends. During the year ended December 31, 2007, the Bank transferred \$2.2 million in dividends to the Company. As of December 31, 2007, the aggregate amount of unrestricted funds which could be transferred from the Bank to the Company, without prior regulatory approval, totaled \$12.8 million.

The FDIC has the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. The FDIC has indicated that paying dividends that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice.

Insurance of Accounts

The deposits of the Bank are insured by the FDIC up to the limits set forth under applicable law. The deposits of the Bank are subject to the deposit insurance assessments of the Deposit Insurance Fund (DIF) of the FDIC. The FDIC has implemented a risk-based deposit insurance assessment system for well-capitalized and well-managed banks under which the assessment rate for an insured institution may vary according to regulatory capital levels of the institution and other factors, including supervisory evaluations. In addition, the FDIC has authority to impose special assessments from time to time.

On February 8, 2006, the President signed The Federal Deposit Insurance Reform Act of 2005 (the Reform Act) into law. The Reform Act merged the Bank Insurance Fund and the Savings Association Insurance Fund into the Deposit Insurance Fund, increased the coverage limit for retirement accounts to \$250,000, indexed coverage limits for inflation and established a range for designated reserve ratios. The Reform Act also eliminated assessment restrictions on rates and granted the FDIC Board the discretion to price deposit insurance according to risk. The Bank was

granted a one-time initial assessment credit to recognize past contributions to the fund.

Table of Contents

The FDIC is authorized to prohibit any DIF-insured institution from engaging in any activity that the FDIC determines by regulation or order to pose a serious threat to the respective insurance fund. Also, the FDIC may initiate enforcement actions against banks, after first giving the institution's primary regulatory authority an opportunity to take such action. The FDIC may terminate the deposit insurance of any depository institution if it determines, after a hearing, that the institution has engaged or is engaging in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations, or has violated any applicable law, regulation, order or any condition imposed in writing by the FDIC. It also may suspend deposit insurance temporarily during the hearing process for the permanent termination of insurance, if the institution has no tangible capital. If deposit insurance is terminated, the deposits at the institution at the time of termination, less subsequent withdrawals, shall continue to be insured for a period from six months to two years, as determined by the FDIC. The Company is not aware of any existing circumstances that could result in termination of any of the Bank's deposit insurance.

USA Patriot Act

The USA Patriot Act became effective on October 26, 2001 and provides for the facilitation of information sharing among governmental entities and financial institutions for the purpose of combating terrorism and money laundering. Among other provisions, the USA Patriot Act permits financial institutions, upon providing notice to the United States Treasury, to share information with one another in order to better identify and report to the federal government concerning activities that may involve money laundering or terrorism. The USA Patriot Act is considered a significant banking law in terms of information disclosure regarding certain customer transactions. Although it does create a reporting obligation, the USA Patriot Act has not materially affected the Bank's products, services or other business activities.

Community Reinvestment Act

Under the Community Reinvestment Act and related regulations, depository institutions have an affirmative obligation to assist in meeting the credit needs of their market areas, including low and moderate-income areas, consistent with safe and sound banking practice. The Community Reinvestment Act requires the adoption by each institution of a Community Reinvestment Act statement for each of its market areas describing the depository institution's efforts to assist in its community's credit needs. Depository institutions are periodically examined for compliance with the Community Reinvestment Act and are periodically assigned ratings in this regard. Banking regulators consider a depository institution's Community Reinvestment Act rating when reviewing applications to establish new branches, undertake new lines of business, and/or acquire part or all of another depository institution. An unsatisfactory rating can significantly delay or even prohibit regulatory approval of a proposed transaction by a bank holding company or its depository institution subsidiaries.

Privacy Legislation

Several regulations issued by federal banking agencies also provide protections against the transfer and use of customer information by financial institutions. A financial institution must provide to its customers information regarding its policies and procedures with respect to the handling of customers' personal information. Each institution must conduct an internal risk assessment of its ability to protect customer information. These privacy provisions generally prohibit a financial institution from providing a customer's personal financial information to unaffiliated parties without prior notice and approval from the customer.

Item 1A. Risk Factors

An investment in the Company's common stock involves significant risks. The following risks and uncertainties should be read carefully and considered before deciding to invest in the Company's common stock. These risk factors may adversely affect the Company's financial condition and future earnings. In that event, the trading price of the Company's common stock could decline and you could lose all or a part of your investment. This section should be read together with the other information, including the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

The Company may be adversely affected by economic conditions in the market area.

The Company is headquartered in the northern Shenandoah Valley region of Virginia. Because lending is concentrated in this market, the Company will be affected by the general economic conditions in the region. Changes in the economy may influence the growth rate of loans and deposits, the quality of the loan portfolio and loan and deposit pricing. A significant decline in general economic conditions caused by inflation, recession, unemployment or other factors beyond the Company's control would impact these local economic conditions and the demand for banking products and services generally, which could negatively affect the Company's performance and financial condition.

Table of Contents

The Bank's concentration in loans secured by real estate may increase credit losses, which would negatively affect financial results.

The Bank offers a variety of secured loans, including commercial lines of credit, commercial term loans, real estate, construction, home equity, consumer and other loans. The majority of the loans are secured by real estate (both residential and commercial) in the market area. At December 31, 2007, these loans totaled \$374.3 million, or 84%, of loans, net of the allowance for loan losses. A major change in the real estate market, such as deterioration in the value of this collateral, or in the local or national economy, could adversely affect customers' ability to pay these loans, which in turn could impact the Bank. Risk of loan defaults and foreclosures are unavoidable in the banking industry, and the Bank tries to limit exposure to this risk by monitoring extensions of credit carefully. The Bank cannot fully eliminate credit risk, and as a result credit losses may occur in the future.

If the Bank's allowance for loan losses becomes inadequate, results of operations may be adversely affected.

The Bank maintains an allowance for loan losses that it believes is a reasonable estimate of known and inherent losses in the loan portfolio. Through a periodic review and consideration of the loan portfolio, management determines the amount of the allowance for loan losses by considering economic conditions, credit quality of the loan portfolio, collateral supporting the loans, performance of customers relative to their financial obligations and the quality of the Bank's loan administration. The amount of future losses is susceptible to changes in economic, operating and other conditions, including changes in interest rates that may be beyond the Bank's control, and these losses may exceed current estimates. Although the Company believes the allowance for loan losses is a reasonable estimate of known and inherent losses in the loan portfolio, such losses and the adequacy of the allowance for loan losses cannot be fully predicted. Excessive loan losses could have a material impact on financial performance. Earnings may also be negatively impacted by loan growth, which requires additions to the allowance for loan losses.

Federal and state regulators periodically review the allowance for loan losses and may require an increase to the provision for loan losses or recognition of further loan charge-offs, based on judgments different than those of management. Any increase in the amount of provision or loans charged-off as required by these regulatory agencies could have a negative effect on operating results.

The Company's business strategy calls for continued growth. The Company may not be able to successfully manage growth or implement growth strategies, which may adversely affect results of operations and financial condition.

During the last five years, the Company has experienced significant growth, and a key aspect of the business strategy is continued growth and expansion. The ability to continue to grow depends, in part, upon the ability to:

open new branch offices or acquire existing branches or other financial institutions;

attract deposits to those locations; and

identify attractive loan and investment opportunities.

The Company may not be able to successfully implement the growth strategy if it is unable to identify attractive markets, locations or opportunities to expand in the future. The ability to manage growth successfully will also depend on whether the Company can maintain capital levels adequate to support the growth, maintain cost controls and asset quality, and successfully integrate any businesses that may be acquired into the organization.

As the Company continues to implement its growth strategies by opening new branch offices or acquiring branches or other banks, increased personnel, occupancy and other operating expenses are expected. In the case of new branch offices, the Company must absorb higher expenses while attempting to generate new deposits. Further, there is a time lag involved in redeploying new deposits into attractively priced loans and other earning assets. Thus, plans to branch could depress earnings in the short term, even if the branching strategy is executed efficiently.

Future success is dependent on the ability to compete effectively in the highly competitive banking industry.

The Company faces vigorous competition from other banks and other financial institutions, including savings and loan associations, savings banks, finance companies and credit unions for deposits, loans and other financial services in its market area. A number of these banks and other

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

financial institutions are significantly larger than the Company and have substantially greater access to capital and other resources, as well as larger lending limits and branch systems, and offer a wider array of banking services. To a limited extent the Company also competes with other providers of financial services, such as money market mutual funds, brokerage firms, insurance companies and governmental organizations which may offer more favorable products and services than the Company. Many of the non-bank competitors are not subject to the same extensive regulations that govern the Company. As a result, the non-bank competitors have advantages over the Company in providing certain services. This competition may reduce or limit margins and market share and may adversely affect the results of operations and financial condition.

Table of Contents

If the Company needs additional capital in the future to continue growth, it may not be able to obtain it on terms that are favorable. This could negatively affect the Company's performance and the value of its common stock.

The Company anticipates that it will be able to support continued growth through the generation of additional deposits at new branch locations as well as investment opportunities. However, additional capital may be needed in the future to support continued growth and to maintain capital levels. The ability to raise capital through the sale of additional securities will depend primarily upon the Company's financial condition and the condition of financial markets at that time. The Company may not be able to obtain additional capital in the amounts or on terms that are satisfactory. The Company's growth may be constrained if it is unable to raise additional capital as needed.

The Company may incur losses if unable to successfully manage interest rate risk.

The Company's profitability will depend substantially upon the spread between the interest rates earned on investments and loans and interest rates paid on deposits and other interest-bearing liabilities. The Bank may pay above-market rates to attract deposits and charge below-market rates to attract loans. Changes in interest rates, including the shape of the treasury yield curve, will affect the Company's financial performance and condition through the pricing of securities, loans, deposits and borrowings. The Company attempts to minimize exposure to interest rate risk, but will be unable to eliminate it. Our net interest spread will depend on many factors that are partly or entirely outside of the Company's control, including competition, federal economic, monetary and fiscal policies and general economic conditions.

The Company relies heavily on its management team and the unexpected loss of any of those personnel could adversely affect operations; the Company depends on the ability to attract and retain key personnel.

The Company is a customer-focused and relationship-driven organization. We expect future growth to be driven in a large part by the relationships maintained with our customers by our senior officers. We have entered into employment agreements with Harry S. Smith, Dennis A. Dysart, J. Andrew Hershey, M. Shane Bell, Marshall J. Beverley, Jr. and W. Blakeley Curtis. These employees are key officers who oversee major functional areas of the Company. The existence of such agreements, however, does not necessarily assure that we will be able to continue to retain their services. The unexpected loss of key officers could have a material adverse effect on our business and possibly result in reduced revenues and earnings.

The implementation of the Company's business strategy will also require continued attraction, hiring, motivation and retention of skilled personnel to develop new customer relationships as well as new financial products and services. Many experienced banking professionals employed by the Company's competitors are covered by agreements not to compete or solicit existing customers if they were to leave their current employment. These agreements make the recruitment of these professionals difficult. The market for these people is competitive, and the Company cannot guarantee that it will be successful in attracting, hiring, motivating or retaining them. The Company has a management succession plan that has identified employees that are capable of succeeding key officers in certain roles.

There is a limited trading market for the Company's common stock; it may be difficult to sell shares after they have been purchased.

Shares of the Company's common stock are traded on the over-the-counter (OTC) market and quoted in the OTC Bulletin Board under the symbol FXNC. The volume of trading activity in the stock is relatively limited. Even if a more active market develops, there can be no assurance that such market will continue, or that shares will be able to be sold at or above the investment price. The lack of liquidity of the investment in the common shares should be carefully considered when making an investment decision.

Item 1B. Unresolved Staff Comments

Not applicable.

Item 2. Properties

The following describes the location and general character of the principal offices of the Company.

The Company owns the headquarters building located at 112 West King Street, in Strasburg, Virginia. This location also serves as the Bank's Strasburg Financial Center, which primarily serves the banking needs of northern Shenandoah County customers. This three-story building also houses the majority of the administrative employees, including human resources, marketing, financial accounting and loan operations. Deposit

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

operations is housed in the Winchester Financial Center. Financial centers provide full service banking, including loan, deposit, investment, trust and asset management services, while the bank branches primarily focus on depository and consumer lending functions. The following table provides the name, location, year opened and type of the Company's locations:

Table of Contents

Name	Location	Year Opened	Type	Owned/ Leased
Strasburg Financial Center	112 West King Street Strasburg, Virginia	1927	Financial Center	Owned

Rental expense for the leased locations totaled \$37 thousand for the year ended December 31, 2007. The lease for the Front Royal Express property expires on April 30, 2008. The lease for the North Woodstock property expires on May 31, 2016, without a renewal option.

All of the Company's properties are in good operating condition and are adequate for the Company's present and future needs.

Item 3. Legal Proceedings

There are no material pending legal proceedings to which the Company is a party or to which the property of the Company is subject.

Item 4. Submission of Matters to a Vote of Security Holders

No matters were submitted to a vote of security holders of the Company during the fourth quarter of the fiscal year covered by this report through a solicitation of proxies or otherwise.

Table of Contents**Part II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities
Market Prices and Dividends**

Shares of the common stock of the Company are traded on the over-the-counter (OTC) market and quoted in the OTC Bulletin Board under the symbol FXNC. As of March 21, 2008, the Company had approximately 675 shareholders of record and at least 478 additional beneficial owners of shares of common stock.

Following are the high and low prices of sales of common stock known to the Company, along with the dividends that were paid quarterly in 2007 and 2006.

	Market Prices and Dividends		
	Sales Price (\$)		Dividends (\$) (1)
	High	Low	
2007:			
1 st quarter	28.00	25.87	0.13
2 nd quarter	28.50	24.00	0.13
3 rd quarter	24.25	21.50	0.13
4 th quarter	25.00	21.50	0.14
2006:			
1 st quarter	28.00	25.00	0.12
2 nd quarter	28.00	26.60	0.12
3 rd quarter	28.75	26.50	0.12
4 th quarter	28.00	26.25	0.13

- (1) The Company increased its dividend to \$0.53 per share in 2007, which represented a dividend payout ratio of 26.79%. The dividend per share and dividend payout ratio in 2006 was \$0.49 and 24.65%, respectively. The dividend payout ratio is computed by dividing aggregate cash dividends by net income.

Dividend Policy

The Company's future dividend policy is subject to the discretion of its Board of Directors and will depend upon a number of factors, including future earnings, financial condition, liquidity and capital requirements of both the Company and the Bank, applicable governmental regulations and policies and other factors deemed relevant by its Board of Directors.

The Company is organized under the Virginia Stock Corporation Act, which prohibits the payment of a dividend if, after giving it effect, the corporation would not be able to pay its debts as they become due in the usual course of business or if the corporation's total assets would be less than the sum of its total liabilities plus the amount that would be needed, if the corporation were to be dissolved, to satisfy the preferential rights upon dissolution of any preferred shareholders.

The Company is a legal entity separate and distinct from its subsidiaries. Its ability to distribute cash dividends will depend primarily on the ability of the Bank to pay dividends to it, and the Bank is subject to laws and regulations that limit the amount of dividends that it can pay. As a state member bank, the Bank is subject to certain restrictions imposed by the reserve and capital requirements of federal and Virginia banking statutes and regulations. Under Virginia law, a bank may not declare a dividend in excess of its undivided profits. Additionally, the Bank may not declare a dividend if the total amount of all dividends, including the proposed dividend, declared by it in any calendar year exceeds the total of its retained net income of that year to date, combined with its retained net income of the two preceding years, unless the dividend is approved by the Federal Reserve.

The Federal Reserve and the Commonwealth of Virginia have the general authority to limit the dividends paid by insured banks if the payment is deemed an unsafe and unsound practice. Both the Commonwealth of Virginia and the Federal Reserve have indicated that paying dividends

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

that deplete a bank's capital base to an inadequate level would be an unsound and unsafe banking practice. Under the Federal Reserve's regulations, the Bank may not declare or pay any dividend in excess of its net income for the current year plus any retained net income from the prior two calendar years. The Bank may also not declare or pay a dividend without the approval of its board and two-thirds of its shareholders if the dividend would exceed its undivided profits, as reported to the Federal Reserve.

Table of Contents

In addition, the Company is subject to certain regulatory requirements to maintain capital at or above regulatory minimums. These regulatory requirements regarding capital affect its dividend policies. The Federal Reserve has indicated that a bank holding company should generally pay dividends only if its net income available to common shareholders over the past year has been sufficient to fully fund the dividends, and the prospective rate of earnings retention appears consistent with the organization's capital needs, asset quality and overall financial condition.

Stock Repurchases

The Company did not repurchase any shares of its common stock during the fourth quarter of 2007.

Stock Performance Graph

The following graph compares the cumulative total return to the shareholders of the Company for the last five fiscal years with the total return on the S&P 500, NASDAQ-Total U.S. and the SNL Bank Index > \$500M, assuming an investment of \$100 in shares of Common Stock on December 31, 2002, and the reinvestment of dividends.

(1) The efficiency ratio is computed by dividing non-interest expense by the sum of net interest income on a tax equivalent basis and non-interest income excluding securities gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Net interest income on a tax equivalent basis was \$18,391, \$17,824, \$16,529, \$13,572 and \$11,201 for 2007, 2006, 2005, 2004 and 2003, respectively. Non-interest income excluding securities gains and losses was \$6,175, \$5,167, \$4,511, \$4,431 and \$3,556 for 2007, 2006, 2005, 2004 and 2003, respectively. Management believes such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under generally accepted accounting principles, or GAAP. See Non-GAAP Financial Measures included in Item 7 of this Form 10-K.

(2) Amounts have been restated to reflect a two-for-one stock split that was declared on March 16, 2005 and payable on April 29, 2005 to shareholders of record as of March 30, 2005 and a two-for-one stock split that was declared on April 16, 2003 and payable on May 30,

2003 to shareholders of record as of April 30, 2003.

Table of Contents

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operation

The following discussion and analysis of the financial condition and results of operations of the Company for the years ended December 31, 2007, 2006 and 2005 should be read in conjunction with the consolidated financial statements and related notes to the consolidated financial statements included in Item 8 of this Form 10-K.

Executive Overview

The Company

First National Corporation (the Company) is the financial holding company of First Bank (the Bank), First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. The Bank owns First Bank Financial Services, Inc., which invests in partnerships that provide title insurance and investment services.

Products, Services, Customers and Locations

The Bank offers loan, deposit, trust and investment products and services through 11 offices, 29 ATMs and its website, www.firstbank-va.com, for both individuals and businesses. Customers include individuals, small and medium-sized businesses and governmental entities in the northern Shenandoah Valley region of Virginia.

Revenue Sources and Expense Factors

The Company's primary source of revenue is from net interest income earned by the Bank. Net interest income is the difference between interest income and interest expense and represents approximately 75% of the Company's total revenue. Interest income is determined by the amount of interest-earning assets, principally loans and securities, outstanding during the period and the interest rates earned on those assets. The Bank's interest expense is a function of the amount of interest-bearing liabilities outstanding, principally deposits, during the period and the interest rates paid. In addition to net interest income, noninterest income is another important source of revenue for the Company. Noninterest income is derived primarily from service charges on loans and deposits and fees earned from other services. The Bank generates fee income from other services that include trust services and investment advisory services and through the origination and sale of residential mortgages.

The provision for loan losses and noninterest expense are the two expense categories. The factors management considers when determining the provision for loan losses are loan growth, net charge-offs and other factors. Other factors include, but are not limited to, loss experience over a three-year period, general economic conditions, asset quality and collateral value. Changes in inflation, economic growth, unemployment and other general economic factors beyond the Company's control have a direct correlation with asset quality, net charge-offs and ultimately the required provision for loan losses. The material components of noninterest expense are salaries and employee benefits, which comprise 55% of noninterest expense, and occupancy and equipment expense, comprising 15% of noninterest expense.

Financial Performance

For the year ended December 31, 2007, net income was \$5.7 million, a decrease of \$51 thousand or 1% compared to \$5.8 million in 2006. The decrease in earnings was a result of noninterest expense growth of 11% that outpaced revenue growth of 6%. The growth in noninterest expense during 2007 was primarily attributable to two new branch offices that opened during the second and third quarters of 2006. Noninterest income increased 17% for 2007 compared to 2006 due to increases in fee income from trust and investment advisory services, ATM and check card fees and service charges on deposit accounts. Net gains on sale of premises and equipment totaled \$363 thousand for 2007 compared to no gains or losses in 2006. This resulted from selling a potential branch site during the fourth quarter of 2007. Net interest income increased 3% as a result of 4% growth in average interest-earning assets during the year.

Net income per share, basic and diluted, decreased \$0.01 to \$1.98 for the year ended December 31, 2007 from \$1.99 for 2006. The return on average assets was 1.09% for 2007, compared to 1.15% for 2006, and the return on average equity was 16.52% for 2007 compared to 18.49% for 2006.

During 2007, total assets increased 3%, or \$13.6 million, to \$541.6 million at December 31, 2007 from \$527.9 million at December 31, 2006. Asset growth occurred primarily in the loan portfolio where loans, net of the allowance for loan losses, increased 5%, or \$22.2 million, to \$445.4 million at December 31, 2007 from \$423.2 million at December 31, 2006. Asset growth was funded primarily by deposits that increased \$10.1 million or 2% to \$445.1 million at December 31, 2007 from \$435.0 million at December 31, 2006.

Table of Contents

Asset quality weakened during 2007 when compared to 2006. Nonperforming assets were \$2.3 million and \$721 thousand at December 31, 2007 and 2006, representing 0.50% and 0.17% of loans, respectively. Net charge-offs were \$169 thousand for 2007, compared to net recoveries of \$72 thousand in 2006. The provision for loan losses was \$398 thousand and \$378 thousand for the years ended December 31, 2007 and 2006, respectively. The allowance for loan losses increased to 0.94% of total loans at December 31, 2007, up from 0.93% of total loans at December 31, 2006.

Management Outlook

In 2008, the Company is planning for similar earning asset growth that was experienced during 2007. Deposit growth opportunities and loan demand began slowing in the second half of 2006 and continued to slow during 2007. The Company does not expect this to change during 2008, anticipating no improvement in economic conditions. The net interest margin is expected to remain stable as the spread between the yield on earning assets and funding costs is not anticipated to significantly change. Increases in net interest income will primarily be determined by the ability to grow earning assets at acceptable margins.

The rate of growth in noninterest income is expected to decrease in future periods as the trust department is no longer experiencing rapid growth. The department began operations in 2005 and experienced higher growth during 2005 and 2006 from initial market demand. Noninterest expense growth is also expected to slow. Although the Company does not plan to expand the branch network in the near term, an operations center is under construction and is scheduled to be placed in service during the second quarter of 2008. The new operations center is expected to support loan and deposit growth as economic conditions become more favorable. The center is also expected to facilitate long-term operational efficiencies and is not anticipated to increase expenses at the same level as adding a new branch office. The Company plans to transfer existing employees to the facility instead of hiring new employees.

Non-GAAP Financial Measures

This report refers to the efficiency ratio, which is computed by dividing noninterest expense by the sum of net interest income on a tax-equivalent basis and noninterest income excluding securities gains and losses. This is a non-GAAP financial measure that the Company believes provides investors with important information regarding operational efficiency. Such information is not prepared in accordance with U.S. generally accepted accounting principles (GAAP) and should not be construed as such. Management believes, however, such financial information is meaningful to the reader in understanding operating performance, but cautions that such information not be viewed as a substitute for GAAP. The Company, in referring to its net income, is referring to income under GAAP. The components of the efficiency ratio calculation are summarized in the table below.

	Efficiency Ratio <i>(in thousands)</i>	
	2007	2006
Noninterest expense	\$ 15,286	\$ 13,783
Tax-equivalent net interest income	\$ 18,391	\$ 17,824
Noninterest income	6,072	5,170
Less: securities gains (losses)	(103)	3
	\$ 24,566	\$ 22,991
Efficiency ratio	62.22%	59.95%

This report also refers to net interest margin, which is calculated by dividing tax equivalent net interest income by total average earning assets. Because a portion of interest income earned by the Company is nontaxable, the tax equivalent net interest income is considered in the calculation of this ratio. Tax equivalent net interest income is calculated by adding the tax benefit realized from interest income that is nontaxable to total interest income then subtracting total interest expense. The tax rate utilized in calculating the tax benefit for each of 2007 and 2006 is 34%. The reconciliation of tax equivalent net interest income, which is not a measurement under GAAP, to net interest income, is reflected in the table below.

Table of Contents**Reconciliation of Net Interest Income to**

	Tax-Equivalent Net Interest Income	
	<i>(in thousands)</i>	
	2007	2006
GAAP measures:		
Interest income loans	\$ 32,538	\$ 29,678
Interest income investments and other	2,963	3,269
Interest expense deposits	14,049	11,638
Interest expense other borrowings	2,226	2,744
Interest expense other	1,126	1,010
Total net interest income	\$ 18,100	\$ 17,555
Non-GAAP measures:		
Tax benefit realized on non-taxable interest income loans	\$ 48	\$ 54
Tax benefit realized on non-taxable interest income municipal securities	243	215
Total tax benefit realized on non-taxable interest income	\$ 291	\$ 269
Total tax-equivalent net interest income	\$ 18,391	\$ 17,824

Critical Accounting PoliciesGeneral

The Company's consolidated financial statements and related notes are prepared in accordance with GAAP. The financial information contained within the statements is, to a significant extent, financial information that is based on measures of the financial effects of transactions and events that have already occurred. A variety of factors could affect the ultimate value that is obtained either when earning income, recognizing an expense, recovering an asset or relieving a liability. The Bank uses historical loss factors as one factor in determining the inherent loss that may be present in the loan portfolio. Actual losses could differ significantly from the historical factors used. In addition, GAAP itself may change from one previously acceptable method to another. Although the economics of transactions would be the same, the timing of events that would impact transactions could change. For further information about the Bank's loans and the allowance for loan losses, see Notes 3 and 4 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Presented below is a discussion of those accounting policies that management believes are the most important (Critical Accounting Policies) to the portrayal and understanding of the Bank's financial condition and results of operations. The Critical Accounting Policies require management's most difficult, subjective and complex judgments about matters that are inherently uncertain. In the event that different assumptions or conditions were to prevail, and depending upon the severity of such changes, the possibility of materially different financial condition or results of operations is a reasonable likelihood.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the losses that may be sustained in the loan portfolio. The allowance is based on three basic principles of accounting: (1) Statement of Financial Accounting Standards (SFAS) No. 5, Accounting for Contingencies, which requires that losses be accrued when they are probable of occurring and estimable, (2) SFAS No. 114, Accounting by Creditors for Impairment of a Loan, which requires that losses be accrued based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance and (3) U.S. Securities and Exchange Commission Staff Accounting Bulletin (SAB) No. 102, Selected Loan Loss Allowance Methodology and Documentation Issues, which requires adequate documentation to support the allowance for loan losses estimate.

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

The Bank's allowance for loan losses has two basic components: the specific allowance and the general allowance. Both of these components are determined based upon estimates that can and do change when the actual events occur. The allowance for loan losses is comprised of the sum of the specific allowance and the general allowance.

Table of Contents

The specific allowance is typically used to individually allocate an allowance for larger balance, commercial, non-homogeneous loans. The specific allowance uses various techniques to arrive at an estimate of loss. First, analysis of the borrower's overall financial condition, resources and payment record; the prospects for support from financial guarantors; and the fair market value of collateral, net of selling costs, are used to estimate the probability and severity of inherent losses. Second, historical default rates and loss severities, internal risk ratings, industry and market conditions and trends, and other environmental factors are considered. The use of these values is inherently subjective and actual losses could differ from the estimates.

The general allowance is used for estimating the loss on pools of smaller-balance, homogeneous loans; including residential mortgage loans, installment loans, other consumer loans, and outstanding loan commitments. This formula is also used for the remaining pool of larger balance, non-homogeneous loans, which were not allocated a specific allowance upon impairment review. The general allowance begins with estimates of probable losses inherent in the homogeneous portfolio. This includes, but is not limited to, analysis of loss experience over a three-year period, economic conditions, asset quality and collateral value. The general allowance uses a historical loss view as an indicator of future losses. As a result, even though this history is regularly updated with the most recent loss information, it could differ from the loss incurred in the future.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral, net of selling costs, if the loan repayment is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Lending Policies

General

The principal risk associated with each of the categories of loans in the Bank's portfolio is the creditworthiness of its borrowers. Within each category, such risk is increased or decreased, depending on prevailing economic conditions. The risk associated with real estate mortgage loans, commercial and consumer loans varies, based on economic conditions, fluctuations in the value of real estate and other conditions that affect the ability of borrowers to repay indebtedness. The risk associated with real estate construction loans varies, based on the supply and demand for the type of real estate under construction.

In an effort to manage the risk, the Bank's loan policy gives loan amount approval limits to individual loan officers based on their position within the Bank and level of experience. The Bank's Board of Directors and its Loan Committee approves all loan relationships greater than \$1.5 million. The President and CEO and the Executive Vice President Loan Administration can combine their lending limits to approve loan relationships up to \$1.5 million. All loan relationships greater than \$750 thousand are reported to the Board or its Loan Committee. The Loan Committee consists of five non-management directors and the President and CEO. The Committee approves the Bank's Loan Policy and reviews loans that have been charged-off. It also reviews the allowance for loan loss adequacy calculation as well as the loan watch list and other management reports. The Committee meets on a monthly basis and the Chairman of the Committee then reports to the Board of Directors.

Residential loan originations are primarily generated by Bank loan officer solicitations, referrals by real estate professionals and customers. Commercial real estate loan originations are obtained through broker referrals, direct solicitation of developers and continued business from customers. All completed loan applications are reviewed by the Bank's loan officers. As part of the application process, information is obtained concerning the income, financial condition, employment and credit history of the applicant. If commercial real estate is involved, information is also obtained concerning cash flow available for debt service. Loan quality is analyzed based on the Bank's experience and credit underwriting guidelines as well as the guidelines issued by the purchasers of loans, depending on the type of loan involved. Real estate collateral is appraised by independent fee appraisers who have been pre-approved by the Executive Vice President Loan Administration.

In the normal course of business, the Bank makes various commitments and incurs certain contingent liabilities which are disclosed but not reflected in its financial statements, including commitments to extend credit. At December 31, 2007, commitments to extend credit, stand-by letters of credit and rate lock commitments totaled \$78.1 million.

Table of Contents

Commercial Business Lending

Commercial business loans generally have a higher degree of risk than loans secured by real estate, but typically have higher yields. Commercial business loans typically are made on the basis of the borrower's ability to make repayment from cash flow from its business and are secured by business assets, such as accounts receivable, equipment and inventory. As a result, the availability of funds for the repayment of commercial business loans is substantially dependent on the success of the business itself. Furthermore, the collateral for commercial business loans may depreciate over time and generally cannot be appraised with as much precision as residential real estate. To manage these risks, the Bank generally obtains appropriate collateral and personal guarantees from the borrower's principal owners and monitors the financial condition of its business borrowers. At December 31, 2007, commercial loans not secured by real estate totaled \$53.0 million, or 12% of the total loan portfolio, as compared to \$50.9 million, or 12% at December 31, 2006.

Commercial Real Estate Lending

Commercial real estate loans are secured by various types of commercial real estate typically in the Bank's market area, including multi-family residential buildings, commercial buildings and offices, hotels, small shopping centers, farms and churches. At December 31, 2007, commercial real estate loans aggregated \$194.4 million, or 43% of the Bank's gross loans, as compared to \$171.3 million, or 40% at December 31, 2006. In its underwriting of commercial real estate, the Bank may lend, under federal regulation, up to 85% of the secured property's appraised value, although the Bank's loan to original appraised value ratio on such properties is typically 80% or less. Commercial real estate lending entails significant additional risk, compared with residential mortgage lending. Commercial real estate loans typically involve larger loan balances concentrated with single borrowers or groups of related borrowers. Additionally, the payment experience on loans secured by income producing properties is typically dependent on the successful operation of a business or a real estate project and thus may be subject, to a greater extent, to adverse conditions in the real estate market or in the economy, in general. The Bank's commercial real estate loan underwriting criteria require an examination of debt service coverage ratios, the borrower's creditworthiness, prior credit history and reputation. The Bank typically requires personal guarantees of the borrower's principal owners and carefully evaluates the location and environmental condition of the real estate collateral.

Construction Lending

The Bank makes local construction loans, including residential and land acquisition and development loans. These loans are secured by the property under construction and the underlying land for which the loan was obtained. Construction and land development loans outstanding at December 31, 2007 and 2006 were \$73.5 million, or 16% of gross loans, and \$60.9 million, or 14% of gross loans, respectively. The majority of these loans have an average life of approximately one year and reprice monthly as key rates change. Construction lending entails significant additional risks, compared with residential mortgage lending. Construction loans often involve larger loan balances concentrated with single borrowers or groups of related borrowers. Another risk involved in construction lending is attributable to the fact that loan funds are advanced upon the security of the land or property under construction, which value is estimated prior to the completion of construction. Thus, it is more difficult to evaluate accurately the total loan funds required to complete a project and related loan-to-value ratios. To mitigate the risks associated with construction lending, the Bank generally limits loan amounts to 80% of appraised value, in addition to analyzing the creditworthiness of its borrowers. The Bank typically obtains a first lien on the property as security for its construction loans, typically requires personal guarantees from the borrower's principal owners, and monitors the progress of the construction project during the draw period.

Residential Real Estate Lending

Residential lending activity may be generated by Bank loan officer solicitations, referrals by real estate professionals and existing or new bank customers. Loan applications are taken by a Bank loan officer. As part of the application process, information is gathered concerning income, employment and credit history of the applicant. Residential mortgage loans generally are made on the basis of the borrower's ability to make repayment from employment and other income and are secured by real estate whose value tends to be readily ascertainable. In addition to the Bank's underwriting standards, loan quality may be analyzed based on guidelines issued by a secondary market investor. The valuation of residential collateral is provided by independent fee appraisers who have been approved by the Bank's Executive Vice President-Loan Administration.

Typically, the Bank originates fixed rate mortgage loans with the intent to sell to correspondent lenders. Depending on the financial goals of the Company, the Bank occasionally originates and retains these loans. At December 31, 2007, \$106.4 million, or 24% of the Bank's loan portfolio consisted of one-to-four family loans secured by residential real estate, as compared to \$112.3 million, or 26%, at December 31, 2006.

Table of Contents

In connection with residential real estate loans, the Bank requires title insurance, hazard insurance and, if required, flood insurance. Flood determination letters with life of loan tracking are obtained on all federally related transactions with improvements serving as security for the transaction. The Bank does not require escrows for real estate taxes and insurance for secondary market loans.

The Company does not participate in sub-prime lending practices so issues recently arising in the residential mortgage market from sub-prime lending are not expected to have a direct impact on earnings. Nevertheless, the Company is subject to risks associated with general economic and business conditions in its market area, as well as the condition of the regional residential mortgage market, each of which may be impacted by sub-prime lending and related issues.

Consumer Lending

The Bank offers various secured and unsecured consumer loans, including unsecured personal loans and lines of credit, automobile loans, deposit account loans and installment and demand loans. At December 31, 2007, consumer loans, including deposit overdraft balances, were \$18.8 million, or 4% of gross loans, as compared to \$24.7 million, or 6%, at December 31, 2006.

Consumer loans may entail greater risk than residential mortgage loans, particularly in the case of consumer loans which are unsecured, such as lines of credit, or secured by rapidly depreciable assets such as automobiles. In such cases, any repossessed collateral for a defaulted consumer loan may not provide an adequate source of repayment of the outstanding loan balance as a result of the greater likelihood of damage, loss or depreciation. Consumer loan collections are dependent on the borrower's continuing financial stability, and thus are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Furthermore, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans.

The underwriting standards employed by the Bank for consumer loans include a determination of the applicant's payment history on other debts and an assessment of ability to meet existing obligations and payments on a proposed loan. The stability of the applicant's monthly income may be determined by verification of gross monthly income from primary employment, and additionally from any verifiable secondary income. Although creditworthiness of the applicant is of primary consideration, the underwriting process also includes an analysis of the value of the collateral in relation to the proposed loan amount.

Results of Operations

General

Net interest income represents the primary source of earnings for the Company. Net interest income equals the amount by which interest income on interest-earning assets, predominately loans and securities, exceeds interest expense on interest-bearing liabilities, including deposits, other borrowings and trust preferred securities. Changes in the volume and mix of interest-earning assets and interest-bearing liabilities, as well as their respective yields and rates, are the components that impact the level of net interest income. The net interest margin is calculated by dividing tax-equivalent net interest income by average earning assets. The provision for loan losses, noninterest income and noninterest expense are the other components that determine net income. Noninterest income and expense primarily consists of income from service charges on deposit accounts; fees charged for other customer services, including trust, asset management and brokerage fee income; gains and losses from the sale of assets, including loans held for sale, securities and premises and equipment; general and administrative expenses; and income tax expense.

For the year ended December 31, 2007, net income was \$5.7 million or \$1.98 per basic and diluted share. This is a 1% decrease compared to net income of \$5.8 million or \$1.99 per basic and diluted shares for 2006. This decrease in earnings was a result of expense growth of 11% that outpaced revenue growth of 6%. The increase in noninterest expense was almost entirely offset by a 17% increase in noninterest income and a 3% increase in net interest income. For the year ended December 31, 2006, net income increased 8% from \$5.4 million in 2005. The increase in earnings was attributable to an 8% increase in net interest income, a 55% decrease in the provision for loan losses and an 18% increase in noninterest income, offset by a 17% increase in noninterest expense when comparing the periods.

Net Interest Income

Net interest income was \$18.1 million for the year ended December 31, 2007, which is an increase of \$545 thousand or 3% over \$17.6 million reported for the same period in 2006. Growth in average interest-earning assets, predominantly in the loan portfolio, was partially offset by a slight decline in the net interest margin. Average interest-earning assets increased 4%, or \$19.1 million, when comparing the periods. The net interest margin for 2007 was 3.71% compared to 3.74% for 2006. The slight decline in the net interest margin was attributable to increased funding costs from interest-bearing deposits. In 2006, net interest income increased \$1.4 million, or 8%, from \$16.2 million in 2005.

Table of Contents

The net interest margin was 3.71% in 2007, 3.74% in 2006, and 3.96% in 2005. Interest income as a percent of average earning assets was 7.21% in 2007, 6.96% in 2006 and 6.31% in 2005. Interest expense as a percent of average interest-bearing liabilities was 4.25% in 2007, 3.94% in 2006 and 2.94% in 2005. The interest rate spread was 2.96% in 2007, 3.02% in 2006 and 3.37% in 2005. Based on the interest rate sensitivity analysis included in Item 7A (Quantitative and Qualitative Disclosures About Market Risk) below, the Company does not anticipate market rate changes to have a significant impact on net interest income during the next 12 months. The Company does not expect significant changes in the margin during 2008. Therefore, increases in net interest income will be primarily determined by the Company's ability to grow interest-earning assets at acceptable margins.

The following table provides information on average interest-earning assets and interest-bearing liabilities for the years ended December 31, 2007, 2006 and 2005, as well as amounts and rates of tax equivalent interest earned and interest paid. The volume and rate analysis table analyzes the changes in net interest income for the periods broken down by their rate and volume components.

Noninterest Income

Noninterest income increased \$902 thousand, or 17%, in 2007 compared to an increase of \$799 thousand or 18% in 2006. Trust and investment advisory fee income increased \$270 thousand, or 29%, in 2007, compared to an increase of \$408 thousand, or 80% in 2006. These increases were the result of higher average assets under management during 2007 when compared to 2006 and during 2006 when compared to 2005. ATM and check card fees increased \$184 thousand, or 23%, in 2007, compared to \$201 thousand, or 33%, in 2006. Service charges increased \$262 thousand, or 10%, in 2007, compared to an increase of \$120 thousand, or 5%, in 2006. This increase was related to higher fee income from overdrafts. Net gains on sale of premises and equipment were \$363 thousand in 2007, compared to no net gains or losses in 2006 and net losses of \$10 thousand in 2005. Net gains in 2007 resulted primarily from the sale of a potential branch site in the fourth quarter of 2007.

The Company expects the rate of growth in noninterest income to decrease in future periods as the trust department is no longer experiencing rapid growth. The department began operations in 2005 and experienced high growth during 2005 and 2006 from initial market demand. Total assets under management grew \$11.8 million in 2007 and \$41.4 million in 2006.

Noninterest Expense

In 2007, noninterest expenses increased \$1.5 million, or 11%, over 2006. In 2006, noninterest expenses increased \$1.9 million, or 17%, over 2005. Salaries and employee benefits increased 12% for 2007 over 2006, compared to 17% for 2006 over 2005. Occupancy and equipment costs increased 12% for 2007 over 2006, compared to 19% for 2006 over 2005. The increase in expenses was primarily attributable to the addition of two branch locations during the second and third quarters of 2006. During 2006, the Bank constructed and opened two new financial centers in Frederick County, the Sherando Financial Center, located in Stephens City, and the Winchester West Financial Center, located near Winchester. The growth rate of noninterest expense is expected to decrease slightly in future periods. Although the Company is focused on leveraging existing branch capacity and does not plan to expand the

Table of Contents

branch network in the near term, an operations center is under construction and is scheduled to be placed in service during the second quarter of 2008. The new operations center will support future growth and facilitate long-term operational efficiencies.

Income Taxes

The Company has adopted FASB Statement No. 109, Accounting for Income Taxes. For a more detailed discussion of the Company's tax calculation, see Note 9 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Financial Condition**General**

Total assets increased 3% to \$541.6 million at December 31, 2007 from \$527.9 million at December 31, 2006. Loans, net of the allowance for loan losses, increased 5% or \$22.2 million to \$445.4 million at December 31, 2007 from \$423.2 million at December 31, 2006. Deposits increased 2% or \$10.1 million to \$445.1 million at December 31, 2007 from \$435.0 million at December 31, 2006. Deposit growth and loan demand have recently slowed due to general and local economic conditions. The Company is planning for similar balance sheet growth in 2008 that was experienced during 2007.

Loans

The Bank is an active lender with a loan portfolio that includes commercial and residential real estate loans, commercial loans, consumer loans, real estate construction loans and home equity loans. The Bank's lending activity is concentrated on individuals, small and medium-sized businesses and local governmental entities in its market area. As a provider of community-oriented financial services, the Bank does not attempt to geographically diversify its loan portfolio by undertaking significant lending activity outside its market area. The Bank's loan portfolio is summarized in the table below for the periods indicated.

	Loan Portfolio <i>(in thousands)</i>				
	At December 31,				
	2007	2006	2005	2004	2003
Commercial, financial, and agricultural	\$ 55,172	\$ 53,004	\$ 42,942	\$ 37,508	\$ 31,745
Real estate construction	73,478	60,913	49,748	42,538	23,586
Real estate - mortgage:					
Residential (1-4 family)	106,378	112,323	99,442	94,960	71,657
Secured by farmland	1,789	2,507	2,195	2,298	2,602
Other real estate loans	192,616	168,754	148,805	111,506	85,509
Consumer	18,778	24,655	29,640	31,413	32,116
All other loans	1,376	4,973	5,078	2,851	923
Total loans	\$ 449,587	\$ 427,129	\$ 377,850	\$ 323,074	\$ 248,138
Less: allowance for loan losses	4,207	3,978	3,528	2,877	2,547
Loans, net of unearned income and allowance for loan losses	\$ 445,380	\$ 423,151	\$ 374,322	\$ 320,197	\$ 245,591

As shown in the table above, other real estate loans, which include commercial loans secured by real estate, represented the largest growth in the loan portfolio of \$23.9 million, followed by real estate construction growth of \$12.6 million. Residential real estate loans and consumer loans each decreased \$5.9 million. These changes are reflective of the Bank's growth efforts and the loan demand in the market during the year.

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$374.3 million, or 84% of loans, net of the allowance for loan losses, and \$344.5 million, or 81% of loans, net of the allowance for loan losses, at December 31, 2007 and 2006, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations could be impacted by local economic conditions. Construction loans totaled \$73.5 million and \$60.9 million, or 17% and 14% of loans, net of the allowance for loan losses, at December 31, 2007 and 2006, respectively.

Table of Contents

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$43.4 million at December 31, 2007, representing 115% of total shareholders' equity and 10% of loans, net of the allowance for loan losses. At December 31, 2006, this concentration totaled \$28.9 million, representing 89% of total shareholders' equity and 7% of loans, net of the allowance for loan losses. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ending December 31, 2007, 2006 and 2005.

There was no category of loans that exceeded 10% of outstanding loans at December 31, 2007 that were not disclosed in the above table. The following table sets forth the maturities of the loan portfolio at December 31, 2007:

	Remaining Maturities of Selected Loans			
	<i>(in thousands)</i>			
	At December 31, 2007			
	Less than One Year	One to Five Years	Greater than Five Years	Total
Commercial, financial, and agricultural	\$ 36,099	\$ 17,321	\$ 1,752	\$ 55,172
Real estate construction	52,064	21,369	45	73,478
Real estate - mortgage:				
Residential (1-4 family)	21,009	39,787	45,582	106,378
Secured by farmland	1,020	497	272	1,789

All other loans	717	492	167	1,376
Total loans	\$ 155,138	\$ 231,421	\$ 63,028	\$ 449,587
For maturities over one year:				
Fixed rates	\$ 235,217			
Variable rates	59,232			
	\$ 294,449			

Asset Quality

Management classifies as nonperforming assets both loans on which payment has been delinquent 90 days or more and for which there is a risk of loss to either principal or interest, and other real estate owned (OREO). OREO represents real property taken by the Bank either through foreclosure or through a deed in lieu thereof from the borrower. OREO is recorded at the lower of cost or market, less estimated selling costs, and is actively marketed by the Bank through brokerage channels. The Bank had \$377 thousand in foreclosed real estate at December 31, 2007 and no foreclosed real estate at December 31, 2006.

Nonperforming assets were \$2.3 million and \$721 thousand at December 31, 2007 and 2006, representing 0.50% and 0.17% of loans, respectively. Net charge-offs were \$169 thousand for 2007, compared to net recoveries of \$72 thousand in 2006 and net charge-offs of \$187 thousand in 2005. The provision for loan losses was \$398 thousand and \$378 thousand for the years ended December 31, 2007 and 2006, respectively. The allowance for loan losses increased to 0.94% of total loans at December 31, 2007, up from 0.93% of total loans at December 31, 2006. Nonperforming assets could increase due to other potential problem loans identified by management totaling \$10.6 million at December 31, 2007. Potential problem loans at December 31, 2006 totaled \$3.5 million. The increase in potential problem loans during 2007 was attributable to an increase in classified loans related to two large commercial real estate relationships.

Certain risks, including the borrower's ability to pay and the collateral value securing the loan, have been identified that may result in these potential problem loans not being repaid in accordance with their terms. However, these loans are currently performing and \$10.3 million of the identified loans are considered well-secured.

The provision for loan losses represents management's analysis of the existing loan portfolio and related credit risks. The provision for loan losses is based upon management's estimate of the amount required to maintain an adequate allowance for loan losses reflective of the risks in the loan portfolio. The allowance for loan losses totaled \$4.2 million and \$4.0 million at December 31, 2007 and 2006, representing 0.94% and

0.93% of total loans, respectively.

Table of Contents

Impaired loans of \$3.3 million and \$49 thousand at December 31, 2007 and 2006 have been recognized in conformity with SFAS No. 114. The related allowance for loan losses provided for these loans totaled \$12 thousand and \$25 thousand at December 31, 2007 and 2006. The average recorded investment in impaired loans during 2007 and 2006 was \$952 thousand and \$59 thousand, respectively.

Nonaccrual loans excluded from impaired loan disclosure under SFAS No. 114 amounted to \$78 thousand, \$161 thousand and \$153 thousand at December 31, 2007, 2006 and 2005, respectively. If interest on these loans had been accrued, such income would have approximated \$6 thousand, \$22 thousand and \$19 thousand for 2007, 2006 and 2005, respectively. Loan payments received on nonaccrual loans are applied to principal. When a loan is placed on non-accrual status there are several negative implications. First, all interest accrued but unpaid at the time of the classification is deducted from the interest income totals for the Bank. Second, accruals of interest are discontinued until it becomes certain that both principal and interest can be repaid. Third, there may be actual losses that necessitate additional provisions for credit losses charged against earnings. These loans were included in the nonperforming loan totals listed below.

Management believes, based upon its review and analysis, that the Bank has sufficient reserves to cover losses inherent within the loan portfolio. For each period presented, the provision for loan losses charged to expense was based on management's judgment after taking into consideration all factors connected with the collectability of the existing portfolio. Management considers loss experience over a three-year period, economic conditions, asset quality, collateral value and other relevant factors when evaluating the loan portfolio. There can be no assurance, however, that additional provisions for loan losses will not be required in the future, including as a result of changes in the economic assumptions underlying management's estimates and judgments, adverse developments in the economy, on a national basis or in the Company's market area, or changes in the circumstances of particular borrowers. For further discussion regarding the allowance for loan losses, see Critical Accounting Policies above. The following table shows a detail of loans charged-off, recovered and the changes in the allowance for loan losses.

	Allowance for Loan Losses

Securities

Securities at December 31, 2007 were \$57.5 million, a decrease of \$2.8 million, or 5%, from \$60.3 million at the end of 2006. The Company plans to maintain its current level of securities in relation to total assets in order to maintain minimum liquidity ratios that are required by Company policy. Investment securities are comprised of U.S. agency and mortgage-backed securities, obligations of state and political subdivisions, corporate equity securities and certain restricted securities. As of December 31, 2007, neither the Company nor the Bank held any derivative financial instruments in their respective investment security portfolios.

Table of Contents

The following table summarizes the fair value of the Company's securities portfolio on the dates indicated.

	Securities Portfolio <i>(in thousands)</i>		
	At December 31,		
	2007	2006	2005
Securities, available for sale			
U.S. agency and mortgage-backed securities	\$ 40,457	\$ 46,429	\$ 57,591
Obligations of state and political subdivisions	13,423	10,366	9,875
Other securities	3,623	3,545	3,612
Total securities	\$ 57,503	\$ 60,340	\$ 71,078

The following table shows the maturities of available for sale debt and equity securities at amortized cost and market value at December 31, 2007 and approximate weighted average yields of such securities. Yields on state and political subdivision securities are shown on a tax equivalent basis, assuming a 34% federal income tax rate. The Company attempts to maintain diversity in its portfolio and maintain credit quality and repricing terms that are consistent with its asset/liability management and investment practices and policies. For further information on securities available for sale, see Note 2 to the consolidated financial statements, included in Item 8 of this Form 10-K.

Total portfolio					
Amortized cost	\$	\$ 6,517	\$ 12,208	\$ 38,356	\$ 57,081
Market value	\$	\$ 6,600	\$ 12,294	\$ 38,609	\$ 57,503
Weighted average yield ⁽¹⁾	0.00%	5.62%	5.27%	5.39%	

(1) Yields on tax-exempt securities have been calculated on a tax-equivalent basis.

The above table was prepared using the contractual maturities for all securities with the exception of mortgage-backed securities (MBS) and collateralized mortgage obligations (CMO). Both MBS and CMO securities were recorded using the Espiel prepayment model that considers many factors including rate and spread projections, housing turnover and borrower characteristics to create anticipated speeds.

Table of Contents**Deposits**

Deposits at December 31, 2007 were \$445.1 million, an increase of \$10.1 million, or 2%, from \$435.0 million at December 31, 2006, providing the majority of funding needed to support asset growth during the year ended December 31, 2007. Non-interest bearing demand deposits decreased \$4.9 million, or 6%, to \$78.5 million for 2007 compared to \$83.4 million for 2006. Savings and interest-bearing demand deposits increased \$10.3 million, or 6%, to \$177.7 million compared to \$167.4 million for 2006. Time deposits increased \$4.8 million, or 3%, during 2007 to \$189.0 million compared to \$184.2 million for 2006. Although the Company plans to fund future asset growth with deposits, increasing competition could make this challenging. Based on FDIC data, deposit growth in the Company's market was 4% in 2007 compared to 10% in 2006.

The following tables include a summary of average deposits and average rates paid and maturities of CDs greater than \$100,000.

	Average Deposits and Rates Paid					
	<i>(dollars in thousands)</i>					
	Year Ended December 31,

	Maturities of CDs Greater than \$100,000				
	<i>(in thousands)</i>				
	Less than Three Months	Three to Six Months	Six to Twelve Months	Greater than One Year	Total
At December 31, 2007	\$ 27,640	\$ 20,072	\$ 16,979	\$ 12,860	\$ 77,551

Liquidity

Liquidity represents the ability to meet present and future financial obligations through either the sale or maturity of existing assets or with borrowings from correspondent banks or other deposit markets. Liquid assets include cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, investment securities and loans maturing within one year. As a result of the Bank's management of liquid assets and the ability to generate liquidity through liability funding, management believes that the Bank maintains overall liquidity sufficient to satisfy its depositors' requirements and to meet its customers' borrowing needs.

At December 31, 2007, cash, interest-bearing and noninterest-bearing deposits with banks, federal funds sold, securities and loans maturing within one year were \$167.7 million. At the end of 2007, approximately 46% or \$207.4 million of the loan portfolio would mature or reprice within a one-year period. At December 31, 2007, non-deposit sources of available funds totaled \$80.8 million, which included \$62.7 million available from the Federal Home Loan Bank (FHLB). During 2007, other borrowing activity included repayment of an adjustable rate credit (ARC) advance in the amount of \$30.0 million, repayment of a fixed rate credit (FRC) advance in the amount of \$5.0 million and three new FRC advances totaling \$30.0 million. The Bank also borrowed and repaid daily rate credit (DRC) advances during 2007 as an alternative to purchasing federal funds.

Table of Contents**Company Obligated Mandatorily Redeemable Capital Securities**

See Note 8 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of company obligated mandatorily redeemable capital securities.

Contractual Obligations

The impact that contractual obligations as of December 31, 2007 are expected to have on liquidity and cash flow in future periods is as follows:

	Total	Contractual Obligations (in thousands)			
		Less than one year	1-3 years	3-5 years	More than 5 years
Long-term debt	\$ 40,564	\$ 20,127	\$ 20,282	\$ 79	\$ 76
Operating leases	151	47	39	29	36
Total	\$ 40,715	\$ 20,174	\$ 20,321	\$ 108	\$ 112

The Company does not have any capital lease obligations, as classified under applicable FASB statements, or other purchase or long-term obligations.

Off-Balance Sheet Arrangements

The Company, through the Bank, is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets. The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2007 and 2006, the following financial instruments were outstanding whose contract amounts represent credit risk:

	(in thousands)	
	2007	2006
Commitments to extend credit and unfunded commitments under lines of credit	\$ 70,233	\$ 68,712
Stand-by letters of credit	7,150	6,959
Rate lock commitments	673	2,240

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Table of Contents

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

At December 31, 2007, the Bank had entered into locked-rate commitments to originate mortgage loans amounting to \$673 thousand and had loans held for sale of \$270 thousand. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

Capital Resources

The adequacy of the Company's capital is reviewed by management on an ongoing basis with reference to the size, composition, and quality of the Company's asset and liability levels and consistent with regulatory requirements and industry standards. Management seeks to maintain a capital structure that will assure an adequate level of capital to support anticipated asset growth and absorb potential losses.

The Board of Governors of the Federal Reserve System has adopted capital guidelines to supplement the existing definitions of capital for regulatory purposes and to establish minimum capital standards. Specifically, the guidelines categorize assets and off-balance sheet items into four risk-weighted categories. The minimum ratio of qualifying total capital to risk-weighted assets is 8.00%, of which at least 4.00% must be Tier 1 capital, composed of common equity, retained earnings and a limited amount of perpetual preferred stock, less certain intangible items. Under present regulations, trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. The Company had a ratio of risk-weighted assets to total capital of 11.80% at December 31, 2007 and a ratio of risk-weighted assets to Tier 1 capital of 10.89%. Both of these exceed both the minimum capital requirement and the minimum to be well capitalized under prompt corrective action provisions adopted by the federal regulatory agencies.

The following table summarizes the Company's Tier 1 capital, Tier 2 capital, risk-weighted assets and capital ratios at December 31, 2007, 2006 and 2005.

	Analysis of Capital <i>(dollars in thousands)</i>		
	At December 31,		
	2007	2006	2005
Tier 1 capital:			
Common stock	\$ 3,653	\$ 3,653	\$ 3,653
Surplus	1,453	1,465	1,465
Retained earnings	33,311	29,104	24,735
Trust preferred securities	12,372	11,628	8,000
Intangible assets	(74)	(81)	(87)
Total Tier 1 Capital	\$ 50,715	\$ 45,769	\$ 37,766

Capital ratios:			
Tier 1 Risk-Based Capital Ratio	10.89%	10.43%	9.68%
Total Risk-Based Capital Ratio	11.80%	11.34%	10.59%
Tier 1 Capital to Average Assets	9.53%	8.76%	8.20%

Table of Contents

Repurchase of Common Stock and Stock Splits

On March 16, 2005, the Board of Directors of the Company declared a two-for-one stock split of the Company's common stock, including authorized and unissued shares. The stock split was payable on April 29, 2005 to shareholders of record as of March 30, 2005. As a result of the stock split, the Company had 8,000,000 shares of common stock authorized, at a par value of \$1.25 per share, and 2,924,124 shares outstanding at April 29, 2005. Subsequent to the stock split, the Company purchased and retired 1,264 shares of its common stock, resulting in 2,922,860 shares outstanding at December 31, 2007.

Prior period financial information has been restated to reflect the stock split.

Recent Accounting Pronouncements

See Note 1 to the consolidated financial statements, included in Item 8 of this Form 10-K, for discussion of recent accounting pronouncements.

Table of Contents**Quarterly Results**

The table below lists the Company's quarterly performance for the years ended December 31, 2007, 2006 and 2005.

	2007 <i>(in thousands, except per share data)</i>

MANAGEMENT'S REPORT REGARDING THE EFFECTIVENESS OF INTERNAL CONTROLS

OVER FINANCIAL REPORTING

The management of First National Corporation (the Corporation) is responsible for the preparation, integrity and fair presentation of the financial statements included in the annual report as of December 31, 2007. The financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America and reflect management's judgments and estimates concerning the effects of events and transactions that are accounted for or disclosed.

Management is also responsible for establishing and maintaining an effective internal control structure over financial reporting. The Corporation's internal control over financial reporting includes those policies and procedures that pertain to the Corporation's ability to record, process, summarize and report reliable financial data. The internal control system contains monitoring mechanisms, and appropriate actions are taken to correct identified deficiencies. Management believes that internal controls over financial reporting, which are subject to scrutiny by management and the Corporation's internal auditors, support the integrity and reliability of the financial statements. Management recognizes that there are inherent limitations in the effectiveness of any internal control system, including the possibility of human error and the circumvention or overriding of internal controls. Accordingly, even effective internal control over financial reporting can provide only reasonable assurance with respect to financial statement preparation. In addition, because of changes in conditions and circumstances, the effectiveness of internal control over financial reporting may vary over time.

In order to insure that the Corporation's internal control structure over financial reporting is effective, management assessed these controls as they conformed to accounting principles generally accepted in the United States of America and related call report instructions as of December 31, 2007. This assessment was based on criteria for effective internal control over financial reporting as described in "Internal Control - Integrated Framework" issued by the Committee of Sponsoring Organizations (COSO) of the Treadway Commission. Based on this assessment, management believes that the Corporation maintained effective internal controls over financial reporting as of December 31, 2007. Management's assessment did not determine any material weakness within the Corporation's internal control structure. The Corporation's annual report does not include an attestation report of the Corporation's registered public accounting firm, Yount, Hyde & Barbour, P.C. (YHB), regarding internal control over financial reporting. Management's report was not subject to attestation by YHB pursuant to temporary rules of the Securities and Exchange Commission that permit the Corporation to provide only management's report in its annual report.

The 2007 end of year financial statements have been audited by YHB, the Corporation's independent accounting firm. Personnel from YHB were given unrestricted access to all financial records and related data, including minutes of all meetings of the Board of Directors and Committees thereof.

Management believes that all representations made to the independent auditors were valid and appropriate. The resulting report from YHB accompanies the financial statements.

The Board of Directors of the Corporation, acting through its Audit and Compliance Committee (the Committee), is responsible for the oversight of the Corporation's accounting policies, financial reporting and internal control. The Audit and Compliance Committee of the Board of Directors is comprised entirely of outside directors who are independent of management. The Audit and Compliance Committee is responsible for the appointment and compensation of the independent auditors and approves decisions regarding the appointment or removal of members of the internal audit function. The Committee meets periodically with management, the independent auditors, and the internal auditor to insure that they are carrying out their responsibilities. The Committee is also responsible for performing an oversight role by reviewing and monitoring the financial, accounting, and auditing procedures of the Corporation in addition to reviewing the Corporation's financial reports. The independent auditors and the internal auditor have full and unlimited access to the Audit and Compliance Committee, with or without the presence of the management of the Corporation, to discuss the adequacy of internal control over financial reporting, and any other matters which they believe should be brought to the attention of the Audit and Compliance Committee.

First National Corporation

Strasburg, VA

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

We have audited the accompanying consolidated balance sheets of First National Corporation and subsidiaries as of December 31, 2007 and 2006, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for the years ended December 31, 2007, 2006 and 2005. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of First National Corporation and subsidiaries as of December 31, 2007 and 2006, and the results of their operations and their cash flows for the years ended December 31, 2007, 2006 and 2005, in conformity with U.S. generally accepted accounting principles.

We were not engaged to examine management's assertion about the effectiveness of First National Corporation and subsidiaries' internal control over financial reporting as of December 31, 2007 included in the accompanying *Management's Report Regarding the Effectiveness of Internal Controls over Financial Reporting* and, accordingly, we do not express an opinion thereon.

FIRST NATIONAL CORPORATION

Notes to Consolidated Financial Statements

Note 1. Nature of Banking Activities and Significant Accounting Policies

First National Corporation (the Company) is the financial holding company of First Bank (the Bank), First National (VA) Statutory Trust I (Trust I), First National (VA) Statutory Trust II (Trust II) and First National (VA) Statutory Trust III (Trust III). The Trusts were formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. The Bank owns First Bank Financial Services, Inc., which invests in partnerships that provide title insurance and investment services. The Bank provides commercial and personal loans, residential mortgages, credit cards, a variety of deposit products and personal trust and investment services to its customers in the northern Shenandoah Valley region of Virginia.

The accounting and reporting policies of the Company conform to accounting principles generally accepted in the United States of America and to accepted practices within the banking industry.

Principles of Consolidation

The consolidated financial statements of First National Corporation include the accounts of all six companies. All material intercompany balances and transactions have been eliminated in consolidation, except for balances and transactions related to the Trusts. FASB Interpretation No. 46(R) requires that the Company no longer consolidate the Trusts. The subordinated debt of these Trusts is reflected as a liability of the Company.

Use of Estimates

In preparing consolidated financial statements in conformity with accounting principles generally accepted in the United States of America, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to significant change in the near term relate to the determination of the allowance for loan losses.

Significant Group Concentrations of Credit Risk

Most of the Company's activities are with customers located within the northern Shenandoah Valley region of Virginia. Note 3 discusses the types of lending that the Company engages in. The Company has identified a concentration of credit risk in the hotel industry and mortgage loans on real estate. See Note 3 for further information on this concentration of credit risk. The Company does not have a significant concentration to any one customer.

Cash and Cash Equivalents

For purposes of the consolidated statements of cash flows, the Company has defined cash equivalents as those amounts included in the balance sheet captions "Cash and due from banks" and "interest-bearing deposits in banks."

Securities

Securities not classified as held to maturity, including equity securities with readily determinable fair values, are classified as "available for sale" and recorded at fair value, with unrealized gains and losses excluded from earnings and reported in other comprehensive income. At December 31, 2007 and 2006, all of the Company's securities were classified as available for sale.

Purchase premiums and discounts are recognized in interest income using the interest method over the terms of the securities. Declines in the fair value of securities below their cost that are deemed to be other than temporary are reflected in earnings as realized losses. In estimating other-than-temporary impairment losses, management considers (1) the length of time and the extent to which the fair value has been less than cost, (2) the financial condition and near-term prospects of the issuer and (3) the intent and ability of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value. At December 31, 2007, there were no other than temporary declines in fair value. Gains and losses on the sale of securities are recorded on the settlement date and are determined using the specific identification method.

Table of Contents

Loans Held for Sale

Loans originated and intended for sale in the secondary market are carried at the lower of aggregate cost or estimated fair value. The Company, through its banking subsidiary, requires a firm purchase commitment from a permanent investor before a loan can be closed, thus limiting interest rate risk. Net unrealized losses, if any, are recognized through a valuation allowance by charges to income.

The Bank enters into commitments to originate mortgage loans whereby the interest rate on the loan is determined prior to funding (rate lock commitments). Rate lock commitments on mortgage loans that are intended to be sold are considered to be derivatives. The period of time between issuance of a loan commitment and closing and sale of the loan generally ranges from 30 to 60 days. The Bank protects itself from changes in interest rates through the use of best efforts forward delivery commitments, whereby the Bank commits to sell a loan at the time the borrower commits to an interest rate with the intent that the buyer has assumed interest rate risk on the loan. As a result, the Bank is not exposed to losses nor will it realize significant gains related to its rate lock commitments due to changes in interest rates. The correlation between the rate lock commitments and the best efforts contracts is very high due to their similarity.

The market value of rate lock commitments and best efforts contracts is not readily ascertainable with precision because rate lock commitments and best efforts contracts are not actively traded in stand-alone markets. The Bank determines the fair value of rate lock commitments and best efforts contracts by measuring the change in the value of the underlying asset while taking into consideration the probability that the rate lock commitments will close. Because of the high correlation between rate lock commitments and best efforts contracts, no gain or loss occurs on the rate lock commitments.

Loans

The Company, through its banking subsidiary, grants mortgage, commercial and consumer loans to customers. A substantial portion of the loan portfolio is represented by residential and commercial loans secured by real estate throughout the northern Shenandoah Valley region of Virginia. The ability of the Bank's debtors to honor their contracts is subject to the real estate and general economic conditions in this area.

Loans that management has the intent and ability to hold for the foreseeable future or until maturity or pay-off generally are reported at their outstanding unpaid principal balances less the allowance for loan losses and any deferred fees or costs on originated loans. Interest income is accrued and credited to income based on the unpaid principal balance. Loan origination fees, net of certain origination costs, are deferred and recognized as an adjustment of the related loan yield using the interest method.

The accrual of interest on mortgage and commercial loans is discontinued at the time the loan is 90 days delinquent unless the credit is well-secured and in process of collection. Personal loans are typically charged off no later than 180 days past due. In all cases, loans are placed on nonaccrual or charged-off at an earlier date if collection of principal or interest is considered doubtful.

All interest accrued but not collected for loans that are placed on nonaccrual or charged off is reversed against interest income. The interest on these loans is accounted for on the cost-recovery method, until qualifying for return to accrual. Loans are returned to accrual status when all the principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Allowance for Loan Losses

The allowance for loan losses is an estimate of the losses that may be sustained in the loan portfolio. The allowance is based on three basic principles of accounting: (1) Statement of Financial Accounting Standards (SFAS) No. 5 Accounting for Contingencies, which requires that losses be accrued when they are probable of occurring and estimable, (2) SFAS No. 114, Accounting by Creditors for Impairment of a Loan, which requires that losses be accrued based on the differences between the value of collateral, present value of future cash flows or values that are observable in the secondary market and the loan balance and (3) U.S. Securities and Exchange Commission Staff Accounting Bulletin (SAB) No. 102 Selected Loan Loss Allowance Methodology and Documentation Issues, which requires adequate documentation to support the allowance for loan losses estimate. For further information about the Company's loans and the allowance for loan losses, see Notes 3 and 4.

The allowance for loan losses is established as losses are estimated to have occurred through a provision for loan losses charged to earnings. Loan losses are charged against the allowance when management believes the uncollectibility of a loan balance is confirmed. Subsequent recoveries, if any, are credited to the allowance.

Table of Contents

The allowance for loan losses has two basic components: the specific allowance and the general allowance. Both of these components are determined based upon estimates that can and do change when the actual events occur. The allowance for loan losses is comprised of the sum of the specific allowance and the general allowance.

The specific allowance is used to individually allocate an allowance for larger balance, commercial, non-homogeneous loans. The specific allowance uses various techniques to arrive at an estimate of loss. First, analysis of the borrower's overall financial condition, resources and payment record; the prospects for support from financial guarantors; and the fair market value of collateral, net of selling costs, are used to estimate the probability and severity of inherent losses. Second, historical default rates and loss severities, internal risk ratings, industry and market conditions and trends, and other environmental factors are considered. The use of these values is inherently subjective and actual losses could differ from the estimates.

The general allowance is used for estimating the loss on pools of smaller-balance, homogeneous loans including residential mortgage loans, installment loans, other consumer loans and outstanding loan commitments. This formula is also used for the remaining pool of larger balance, non-homogeneous loans, which were not allocated a specific allowance upon impairment review. The general allowance begins with estimates of probable losses inherent in the loan portfolio. This includes, but is not limited to, analysis of loss experience over a three-year period, economic conditions, asset quality and collateral value. The general allowance uses a historical loss view as an indicator of future losses. As a result, even though this history is regularly updated with the most recent information, it could differ from the loss incurred in the future.

A loan is considered impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value (net of selling costs), and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan by loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair market value of the collateral, net of selling costs, if the loan is collateral dependent. The Company does not separately identify individual consumer and residential loans for impairment disclosures.

Premises and Equipment

Land is carried at cost. Premises and equipment are stated at cost, less accumulated depreciation and amortization. Premises and equipment are depreciated over their estimated useful lives ranging from three years to forty years; leasehold improvements are amortized over the lives of the respective leases or the estimated useful life of the leasehold improvement, whichever is less. Software is amortized over its estimated useful life ranging from three to seven years. Depreciation and amortization are recorded on the straight-line method.

Costs of maintenance and repairs are charged to expense as incurred. Costs of replacing structural parts of major units are considered individually and are expensed or capitalized as the facts dictate. Gains and losses on routine dispositions are reflected in current operations.

Foreclosed Assets

Assets acquired through, or in lieu of, loan foreclosure are held for sale and are initially recorded at fair value less cost to sell at the date of foreclosure, establishing a new cost basis. Subsequent to foreclosure, valuations are periodically performed by management and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and changes in the valuation allowance are included in net expenses from foreclosed assets. The Company had \$377 thousand in foreclosed real estate at December 31, 2007 and none at December 31, 2006.

Transfers of Financial Assets

Transfers of financial assets, including loan participations, are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from the Company, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) the Company does not maintain effective control over the transferred assets through an agreement to repurchase them before maturity.

Table of Contents

Income Taxes

Deferred income tax assets and liabilities are determined using the liability method. Under this method, the net deferred tax asset or liability is determined based on the tax effects of the temporary differences between the book and tax bases of the various balance sheet assets and liabilities and gives current recognition to changes in tax rates and laws.

When tax returns are filed, it is highly certain that some positions taken would be sustained upon examination by the taxing authorities, while others are subject to uncertainty about the merits of the position taken or the amount of the position that would be ultimately sustained. The benefit of a tax position is recognized in the financial statements in the period during which, based on all available evidence, management believes it is more likely than not that the position will be sustained upon examination, including the resolution of appeals or litigation processes, if any. Tax positions taken are not offset or aggregated with other positions. Tax positions that meet the more-likely-than-not recognition threshold are measured as the largest amount of tax benefit that is more than 50 percent likely of being realized upon settlement with the applicable taxing authority. The portion of the benefits associated with tax positions taken that exceeds the amount measured as described above is reflected as a liability for unrecognized tax benefits in the accompanying balance sheet along with any associated interest and penalties that would be payable to the taxing authorities upon examination.

Interest and penalties associated with unrecognized tax benefits are classified as additional income taxes in the statement of income.

Trust and Asset Management Department

Securities and other property held by the Trust and Asset Management Department in a fiduciary or agency capacity are not assets of the Company and are not included in the accompanying consolidated financial statements.

Earnings Per Share

Basic earnings per share represents income available to common shareholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflects additional common shares that would have been outstanding if dilutive potential common shares had been issued, as well as any adjustment to income that would result from the assumed issuance. There are no potential common shares that would have a dilutive effect. Earnings per share for prior periods has been restated to give retroactive effect of the Company's two-for-one stock split declared March 16, 2005. The stock split was payable on April 29, 2005 to shareholders of record as of March 30, 2005. Shares not committed to be released under the Company's leveraged Employee Stock Ownership Plan (ESOP) are not considered to be outstanding. See Note 11 for further information on the Company's ESOP. The average number of common shares outstanding used to calculate basic and diluted earnings per share were 2,906,431, 2,916,958 and 2,923,404 at December 31, 2007, 2006 and 2005, respectively.

Advertising Costs

The Company follows the policy of charging the production costs of advertising to expense as incurred. Total advertising expense incurred for 2007, 2006 and 2005 was \$344 thousand, \$339 thousand and \$290 thousand, respectively.

Reclassifications

Certain reclassifications have been made to prior period balances to conform to the current year presentation.

Recent Accounting Pronouncements

In September 2006, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards No. 157, Fair Value Measurements (SFAS 157). SFAS 157 defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements, but rather, provides enhanced guidance to other pronouncements that require or permit assets or liabilities to be measured at fair value. This Statement is effective for financial statements issued for fiscal years beginning after November 15, 2007 and interim periods within those years. The FASB has approved a one-year deferral for the implementation of the Statement for nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. The Company does not expect the implementation of SFAS 157 to have a material impact on its consolidated financial statements.

Table of Contents

In September 2006, the FASB issued Statement of Financial Accounting Standards No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*—an amendment of FASB Statements No. 87, 88, 106, and 132(R) (SFAS 158). This Statement requires that employers measure plan assets and obligations as of the balance sheet date. This requirement is effective for fiscal years ending after December 15, 2008. The other provisions of SFAS 158 were implemented by the Company as of December 31, 2006. The Company does not expect the implementation of the measurement date provisions of SFAS 158 to have a material impact on its consolidated financial statements.

In February 2007, the FASB issued Statement of Financial Accounting Standards No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* (SFAS 159). This Statement permits entities to choose to measure many financial instruments and certain other items at fair value. The objective of this Statement is to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. The fair value option established by this Statement permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity shall report unrealized gains and losses on items for which the fair value option has been elected in earnings at each subsequent reporting date. The fair value option may be applied instrument by instrument and is irrevocable. SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007, with early adoption available in certain circumstances. The Company does not expect the implementation of SFAS 159 to have a material impact on its consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 141(R), *Business Combinations* (SFAS 141(R)). The Standard will significantly change the financial accounting and reporting of business combination transactions. SFAS 141(R) establishes principles for how an acquirer recognizes and measures the identifiable assets acquired, liabilities assumed, and any noncontrolling interest in the acquiree; recognizes and measures the goodwill acquired in the business combination or a gain from a bargain purchase; and determines what information to disclose to enable users of the financial statements to evaluate the nature and financial effects of the business combination. SFAS 141(R) is effective for acquisition dates on or after the beginning of an entity's first year that begins after December 15, 2008. The Company does not expect the implementation of SFAS 141(R) to have a material impact on its consolidated financial statements.

In December 2007, the FASB issued Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements—An Amendment of ARB No. 51* (SFAS 160). The Standard will significantly change the financial accounting and reporting of noncontrolling (or minority) interests in consolidated financial statements. SFAS 160 is effective as of the beginning of an entity's first fiscal year that begins after December 15, 2008, with early adoption prohibited. The Company does not expect the implementation of SFAS 160 to have a material impact on its consolidated financial statements.

In September 2006, the Emerging Issues Task Force (EITF) issued EITF 06-4, *Accounting for Deferred Compensation and Postretirement Benefit Aspects of Endorsement Split-Dollar Life Insurance Arrangements*. This consensus concludes that for a split-dollar life insurance arrangement within the scope of this Issue, an employer should recognize a liability for future benefits in accordance with SFAS 106 (if, in substance, a postretirement benefit plan exists) or APB Opinion No. 12 (if the arrangement is, in substance, an individual deferred compensation contract) based on the substantive agreement with the employee. The consensus is effective for fiscal years beginning after December 15, 2007, with early application permitted. The Company is evaluating the effect that EITF 06-4 will have on its consolidated financial statements when implemented.

In November 2006, the EITF issued *Accounting for Collateral Assignment Split-Dollar Life Insurance Arrangements* (EITF 06-10). In this Issue, a consensus was reached that an employer should recognize a liability for the postretirement benefit related to a collateral assignment split-dollar life insurance arrangement in accordance with either SFAS 106 or APB Opinion No. 12, as appropriate, if the employer has agreed to maintain a life insurance policy during the employee's retirement or provide the employee with a death benefit based on the substantive agreement with the employee. A consensus also was reached that an employer should recognize and measure an asset based on the nature and substance of the collateral assignment split-dollar life insurance arrangement. The consensus is effective for fiscal years beginning after December 15, 2007, including interim periods within those fiscal years, with early application permitted. The Company does not expect the implementation of EITF 06-10 to have a material impact on its consolidated financial statements.

In February 2007, the FASB issued FSP No. FAS 158-1, *Conforming Amendments to the Illustrations in FASB Statements No. 87, No. 88 and No. 106 and to the Related Staff Implementation Guides*. This FSP provides conforming amendments to the illustrations in SFAS 87, 88, and 106 and to related staff implementation guides as a result of the issuance of SFAS 158. The conforming amendments made by this FSP are effective as of the effective dates of SFAS 158. The unaffected guidance that this FSP codifies into SFAS 87, 88, and 106 does not contain new requirements and therefore does not require a separate effective date or transition method. The Company does not expect the implementation of FSP No. FAS 158-1 to have a material impact on its consolidated financial statements.

Table of Contents

In November 2007, the Securities and Exchange Commission (SEC) issued Staff Accounting Bulletin No. 109, "Written Loan Commitments Recorded at Fair Value Through Earnings" (SAB 109). SAB 109 expresses the current view of the staff that the expected net future cash flows related to the associated servicing of the loan should be included in the measurement of all written loan commitments that are accounted for at fair value through earnings. SEC registrants are expected to apply the views in Question 1 of SAB 109 on a prospective basis to derivative loan commitments issued or modified in fiscal quarters beginning after December 15, 2007. The Company does not expect the implementation of SAB 109 to have a material impact on its consolidated financial statements.

Note 2. Securities

The Company invests in U.S. agency and mortgage-backed securities, obligations of state and political subdivisions, corporate equity securities and restricted securities. Restricted securities include required equity investments in certain correspondent banks which have no readily determinable market value. Amortized costs and fair values of securities available for sale at December 31, 2007 and 2006, were as follows:

	2007 (in thousands)			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. agency and mortgage-backed securities	\$ 40,348	\$ 277	\$ (168)	\$ 40,457
Obligations of states and political subdivisions	13,334	125	(36)	13,423
Corporate equity securities	13	224		237
Restricted securities	3,386			3,386
	\$ 57,081	\$ 626	\$ (204)	\$ 57,503

	2006 (in thousands)			
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized (Losses)	Fair Value
U.S. agency and mortgage-backed securities	\$ 47,076	\$ 6	\$ (653)	\$ 46,429
Obligations of states and political subdivisions	10,273	123	(30)	10,366
Corporate equity securities	10	143		153
Restricted securities	3,392			3,392
	\$ 60,751	\$ 272	\$ (683)	\$ 60,340

At December 31, 2007 and 2006, investments in an unrealized loss position that are temporarily impaired were as follows:

	2007 (in thousands)					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)
U.S. agency and mortgage-backed securities	\$	\$	\$ 12,206	\$ (168)	\$ 12,206	\$ (168)
Obligations of states and political subdivisions	1,575	(21)	1,544	(15)	3,119	(36)
	\$ 1,575	\$ (21)	\$ 13,750	\$ (183)	\$ 15,325	\$ (204)

Table of Contents

	2006 (in thousands)					
	Less than 12 months		12 months or more		Total	
	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)	Fair Value	Unrealized (Loss)
U.S. agency and mortgage-backed securities	\$ 15,340	\$ (48)	\$ 29,488	\$ (605)	\$ 44,828	\$ (653)
Obligations of states and political subdivisions	1,142	(5)	1,618	(25)	2,760	(30)
	\$ 16,482	\$ (53)	\$ 31,106	\$ (630)	\$ 47,588	\$ (683)

The tables above provide information about securities that have been in an unrealized loss position for less than twelve consecutive months and securities that have been in an unrealized loss position for twelve consecutive months or more. All of the securities with unrealized losses are considered temporarily impaired and are a result of interest rate factors. These securities have not suffered credit deterioration and the Company has the ability to hold these issues until maturity. At December 31, 2007, there were twelve agency and mortgage-backed securities and nine obligations of state and political subdivisions in an unrealized loss position. Ninety-seven percent of the Company's investment portfolio had AAA credit ratings with a weighted-average repricing term of 4.0 years at December 31, 2007.

The amortized cost and fair value of securities available for sale at December 31, 2007 by contractual maturity are shown below. Expected maturities of mortgage-backed securities will differ from contractual maturities because borrowers may have the right to prepay obligations with or without call or prepayment penalties. Corporate equity securities and restricted securities are not included in the maturity categories in the following maturity summary because they do not have a stated maturity date.

	(in thousands)	
	Amortized Cost	Fair Value
Due within one year	\$	\$
Due after one year through five years	6,517	6,600
Due after five years through ten years	12,208	12,294
Due after ten years	34,957	34,986
Corporate equity securities	13	237
Restricted securities	3,386	3,386
	\$ 57,081	\$ 57,503

Proceeds from sales of securities available for sale during 2007, 2006 and 2005 were \$11.7 million, \$4.4 million and \$13.8 million, respectively. Gross gains of \$4 thousand and \$3 thousand were realized on those sales during 2007 and 2006, respectively. Gross losses of \$107 thousand and \$140 thousand were realized on those sales during 2007 and 2005, respectively.

Securities having a book value of \$47.3 million and \$52.6 million at December 31, 2007 and 2006 were pledged to secure public deposits and for other purposes required by law.

Note 3. Loans

Loans at December 31, 2007 and 2006 are summarized as follows:

	(in thousands)	
	2007	2006
Mortgage loans on real estate:		
Construction	\$ 73,478	\$ 60,913
Secured by farm land	1,789	2,507
Secured by 1-4 family residential	106,378	112,323
Other real estate loans	192,616	168,754

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Loans to farmers (except those secured by real estate)	2,144	2,150
Commercial and industrial loans (except those secured by real estate)	53,028	50,854
Consumer loans	18,363	24,423
Deposit overdrafts	415	232
All other loans	1,376	4,973
Total loans	\$ 449,587	\$ 427,129
Allowance for loan losses	4,207	3,978
Loans, net	\$ 445,380	\$ 423,151

Table of Contents

The Company has a credit concentration in mortgage loans on real estate. These loans totaled \$374.3 million, or 84.0% of loans, net of the allowance for loan losses, and \$344.5 million, or 81.4% of loans, net of the allowance for loan losses, at December 31, 2007 and 2006, respectively. Although the Company believes that its underwriting standards are generally conservative, the ability of its borrowers to meet their mortgage obligations is dependent upon local economic conditions. Construction loans totaled \$73.5 million and \$60.9 million, or 16.5% and 14.4% of loans, net of the allowance for loan losses, at December 31, 2007 and 2006, respectively.

The Company has a concentration of credit risk within the loan portfolio involving loans secured by hotels. This concentration totaled \$43.4 million at December 31, 2007, representing 114.7% of total equity and 9.7% of loans, net of the allowance for loan losses. At December 31, 2006, this concentration totaled \$28.9 million representing 88.6% of total equity and 6.8% of loans, net of the allowance for loan losses. These loans are included in other real estate loans in the above table. The Company experienced no loan losses related to this identified risk during the years ended December 31, 2007, 2006 and 2005.

Note 4. Allowance for Loan Losses

Transactions in the allowance for loan losses for the years ended December 31, 2007, 2006 and 2005 were as follows:

	<i>(in thousands)</i>		
	2007	2006	2005
Balance at beginning of year	\$ 3,978	\$ 3,528	\$ 2,877
Provision charged to operating expense	398	378	838
Loan recoveries	213	320	234
Loan charge-offs	(382)	(248)	(421)
Balance at end of year	\$ 4,207	\$ 3,978	\$ 3,528

Information about impaired loans as of and for the years ended December 31, 2007, 2006 and 2005 is as follows:

	<i>(in thousands)</i>	
	2007	2006
Impaired loans for which an allowance has been provided	\$ 120	\$ 49
Impaired loans for which no allowance has been provided	3,229	
Total impaired loans	\$ 3,349	\$ 49
Allowance provided for impaired loans included in the allowance for loan losses	\$ 12	\$ 25
Average balance in impaired loans	\$ 952	\$ 59

Nonaccrual loans excluded from impaired loan disclosure under SFAS 114 amounted to \$78 thousand, \$161 thousand and \$153 thousand at December 31, 2007, 2006 and 2005, respectively. If interest on these loans had been accrued, such income would have approximated \$6 thousand, \$22 thousand and \$19 thousand for 2007, 2006 and 2005, respectively. Loans past due greater than ninety days and still accruing interest at December 31, 2007, 2006 and 2005 totaled \$1.5 million, \$511 thousand and \$487 thousand, respectively.

Note 5. Premises and Equipment

Premises and equipment are summarized as follows at December 31, 2007 and 2006:

(in thousands)

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

	2007	2006
Land	\$ 4,329	\$ 4,001
Buildings and leasehold improvements	11,730	10,995
Furniture and equipment	8,121	7,444
Construction in process	2,398	1,236
	\$ 26,578	\$ 23,676
Less accumulated depreciation	7,173	6,073
	\$ 19,405	\$ 17,603

Depreciation expense included in operating expenses for 2007, 2006 and 2005 was \$1.1 million, \$1.0 million and \$798 thousand, respectively.

Table of Contents**Note 6. Deposits**

The aggregate amount of time deposits, in denominations of \$100 thousand or more, was \$77.6 million and \$85.7 million at December 31, 2007 and 2006, respectively. At December 31, 2007, the Bank had one deposit relationship that exceeded 5% of total deposits. This relationship is for a public depositor which required the Bank to pledge collateral.

At December 31, 2007, the scheduled maturities of time deposits were as follows:

	<i>(in thousands)</i>
2008	\$ 155,711
2009	14,147
2010	10,120
2011	4,907
2012	4,107
	\$ 188,992

Note 7. Other Borrowings

The Bank had unused lines of credit totaling \$80.8 million and \$76.6 million available with non-affiliated banks at December 31, 2007 and 2006, respectively. These amounts primarily consist of a blanket floating lien agreement with the Federal Home Loan Bank of Atlanta in which the Bank can borrow up to 19% of its assets.

At December 31, 2007 and 2006, the Bank had borrowings from the Federal Home Loan Bank system totaling \$40.0 million and \$45.0 million, respectively, which mature through March 29, 2010. The interest rate on these borrowings ranged from 4.88% to 5.52% and the weighted average rate was 5.25% at December 31, 2007. The Bank had collateral pledged on these borrowings at December 31, 2007 including real estate loans totaling \$36.5 million and Federal Home Loan Bank stock with a book value of \$2.8 million.

At December 31, 2007, the Bank had a \$185 thousand note payable, secured by a deed of trust, for land purchased to construct a banking office, which requires monthly payments of \$2 thousand, and matures January 3, 2016. The fixed interest rate on this loan is 4.00%.

At December 31, 2007, the Company had a \$379 thousand unsecured note payable, which requires monthly payments of \$11 thousand and matures September 12, 2011. The fixed interest rate on this loan is 7.35%.

The contractual maturities of other borrowings at December 31, 2007 were as follows:

	<i>(in thousands)</i>
2008	\$ 20,127
2009	10,136
2010	10,146
2011	56
2012	23
Later years	76
	\$ 40,564

Note 8. Company Obligated Mandatorily Redeemable Capital Securities

On March 11, 2003, First National (VA) Statutory Trust I (Trust I), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities, commonly known as trust preferred securities. On March 26, 2003, \$3.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest. The interest rate at

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

December 31, 2007 was 8.01%. The securities have a mandatory redemption date of March 26, 2033, and are subject to varying call provisions beginning March 26, 2008. The principal asset of Trust I is \$3.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company. On January 28, 2008, the Company notified the Trustee of Trust I that they intended to redeem the securities in whole on March 26, 2008. The Company anticipates remaining well-capitalized on the redemption date and for the remainder of 2008.

Table of Contents

On June 8, 2004, First National (VA) Statutory Trust II (Trust II), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On June 17, 2004, \$5.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a LIBOR-indexed floating rate of interest. The interest rate at December 31, 2007 was 7.59%. The securities have a mandatory redemption date of June 17, 2034, and are subject to varying call provisions beginning June 17, 2009. The principal asset of Trust II is \$5.2 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

On July 24, 2006, First National (VA) Statutory Trust III (Trust III), a wholly-owned subsidiary of the Company, was formed for the purpose of issuing redeemable capital securities. On July 31, 2006, \$4.0 million of trust preferred securities were issued through a pooled underwriting. The securities have a fixed rate of interest of 7.26% until July 31, 2011. The securities then have a LIBOR-indexed floating rate of interest. The securities have a mandatory redemption date of October 1, 2036, and are subject to varying call provisions beginning October 1, 2011. The principal asset of Trust III is \$4.1 million of the Company's junior subordinated debt securities with maturities and interest rates comparable to the trust preferred securities. The Trust's obligations under the trust preferred securities are fully and unconditionally guaranteed by the Company.

While these securities are debt obligations of the Company, they are included in capital for regulatory capital ratio calculations. Under present regulations, the trust preferred securities may be included in Tier 1 capital for regulatory capital adequacy purposes as long as their amount does not exceed 25% of Tier 1 capital, including total trust preferred securities. The portion of the trust preferred securities not considered as Tier 1 capital, if any, may be included in Tier 2 capital. At December 31, 2007, the total amount of trust preferred securities issued by the Trusts was included in the Company's Tier 1 capital.

Note 9. Income Taxes

The Company files income tax returns in the U.S. federal jurisdiction and the state of Virginia. With few exceptions, the Company is no longer subject to U.S. federal, state and local income tax examinations by tax authorities for years prior to 2004.

The Company adopted the provisions of FIN 48, Accounting for Uncertainty in Income Taxes, on January 1, 2007 with no impact on the financial statements.

Net deferred tax assets consisted of the following components at December 31, 2007 and 2006:

	<i>(in thousands)</i>	
	2007	2006
Deferred Tax Assets		
Allowance for loan losses	\$ 1,326	\$ 1,219
Interest on nonaccrual loans	11	13
Securities available for sale		139
Unfunded pension liability	235	437
Accrued bonus	111	
Other	6	
	\$ 1,689	\$ 1,808
Deferred Tax Liabilities		
Depreciation	585	549
Prepaid pension	208	254
Securities available for sale	144	
Discount accretion	9	8
Loan origination costs, net	56	59
Other	50	77
	\$ 1,052	\$ 947
Net deferred tax assets	\$ 637	\$ 861

Table of Contents

The provision for income taxes for the years ended December 31, 2007, 2006 and 2005 consisted of the following:

	<i>(in thousands)</i>		
	2007	2006	2005
Current tax expense	\$ 3,002	\$ 2,725	\$ 2,775
Deferred tax expense (benefit)	(261)	41	(238)
	\$ 2,741	\$ 2,766	\$ 2,537

The income tax provision differs from the amount of income tax determined by applying the U.S. federal income tax rate to pretax income for the years ended December 31, 2007, 2006 and 2005, due to the following:

	<i>(in thousands)</i>		
	2007	2006	2005
Computed tax expense at statutory federal rate	\$ 2,886	\$ 2,912	\$ 2,695
Increase (decrease) in income taxes resulting from:			
Tax-exempt interest and dividend income	(161)	(153)	(169)
Other	16	7	11
	\$ 2,741	\$ 2,766	\$ 2,537

Note 10. Funds Restrictions and Reserve Balance

Transfers of funds from the banking subsidiary to the parent company in the form of loans, advances and cash dividends are restricted by federal and state regulatory authorities. At December 31, 2007, the aggregate amount of unrestricted funds which could be transferred from the banking subsidiary to the parent Company, without prior regulatory approval, totaled \$12.8 million.

The Bank must maintain a reserve against its deposits in accordance with Regulation D of the Federal Reserve Act. For the final weekly reporting period in the years ended December 31, 2007 and 2006, the aggregate amounts of daily average required balances were approximately \$2.1 million and \$1.2 million, respectively.

Note 11. Benefit Plans

Pension Plan

The Bank has a noncontributory, defined benefit pension plan for all full-time employees over 21 years of age with at least one year of credited service. Benefits are generally based upon years of service and average compensation for the five highest-paid consecutive years of service. The Bank's funding practice has been to make at least the minimum required annual contribution permitted by the Employee Retirement Income Security Act of 1974, as amended, and the Internal Revenue Code of 1986, as amended. The following table provides a reconciliation of the changes in the plan benefit obligation and the fair value of assets for the periods ended December 31, 2007 and 2006, computed as of October 1 of each respective year.

	<i>(in thousands)</i>	
	2007	2006
Change in Benefit Obligation		
Benefit obligation, beginning of year	\$ 4,424	\$ 4,172

Table of Contents

The plan sponsor selects the expected long-term rate of return on assets assumption in consultation with their investment advisors and actuary. This rate is intended to reflect the average rate of earnings expected to be earned on the funds invested or to be invested to provide plan benefits. Historical performance is reviewed, especially with respect to real rates of return (net of inflation), for the major asset classes held or anticipated to be held by the trust, and for the trust itself. Undue weight is not given to recent experience, which may not continue over the measurement period, with higher significance placed on current forecasts of future long-term economic conditions.

Because assets are held in a qualified trust, anticipated returns are not reduced for taxes. Further, solely for this purpose, the plan is assumed to continue in force and not terminate during the period during which assets are invested. However, consideration is given to the potential impact of current and future investment policy, cash flow into and out of the trust, and expenses (both investment and non-investment) typically paid from plan assets (to the extent such expenses are not explicitly estimated within periodic cost).

The pension plan's weighted-average asset allocations at the end of the plan year for 2007 and 2006, by asset category were as follows:

Asset Category	2007	2006
Mutual funds - fixed income	34%	40%
Mutual funds - equity	61%	47%
Other	5%	13%
Total	100%	100%

The trust fund is sufficiently diversified to maintain a reasonable level of risk without imprudently sacrificing return, with a targeted asset allocation of 40% fixed income and 60% equities. The Investment Manager selects investment fund managers with demonstrated experience and expertise, and funds with demonstrated historical performance for the implementation of the plan's investment strategy. The investment manager will consider both actively and passively managed investment strategies and will allocate funds across the asset classes to develop an efficient investment structure.

It is the responsibility of the trustee to administer the investments of the trust within reasonable costs, being careful to avoid sacrificing quality. These costs include, but are not limited to, management and custodial fees, consulting fees, transaction costs and other administrative costs chargeable to the trust.

The Company made cash contributions of \$195 thousand and \$876 thousand for the 2007 and 2006 plan years, respectively, and expects to contribute \$228 thousand for the 2008 plan year. The accumulated benefit obligation for the defined benefit pension plan was \$2.3 million at December 31, 2007 and 2006.

Estimated future benefit payments, which reflect expected future service, as appropriate, were as follows at December 31, 2007:

	<i>(in thousands)</i>
2008	\$ 19
2009	26
2010	25
2011	25
2012	30
Years 2013-2017	385

401(k) Plan

The Company maintains a 401(k) plan for all eligible employees. Participating employees may elect to contribute up to the maximum percentage allowed by the Internal Revenue Service, as defined in the plan. The Company makes matching contributions up to the first three percent of an employee's compensation contributed to the Plan. The amount that the Company matches is contributed for the benefit of the respective employee to the employee stock ownership plan (ESOP). All employees who work at least one thousand hours per year and are age nineteen or older are eligible. Employee contributions vest immediately. Employer matching contributions vest after three plan service years with the Company. The Company has the discretion to make a profit sharing contribution to the Plan each year based on overall performance,

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

profitability, and other economic factors. For the years ended December 31, 2007, 2006 and 2005, expense attributable to the Plan amounted to \$164 thousand, \$162 thousand and \$98 thousand, respectively.

Table of Contents*Employee Stock Ownership Plan*

On January 1, 2000, the Company established an employee stock ownership plan. The ESOP provides an opportunity for the Company to award shares of First National Corporation stock to employees at its discretion. Employees are eligible to participate in the ESOP effective immediately upon beginning service with the Company. Participants become 100% vested after three years of credited service. In addition to the 401(k) matching contributions made by the Company to the ESOP, the Board of Directors may make discretionary contributions, within certain limitations prescribed by federal tax regulations.

The ESOP operates as a leveraged ESOP. The ESOP's debt was incurred when the Company loaned the ESOP \$570 thousand from the proceeds the Company received from its bank note payable. The ESOP shares initially were pledged as collateral for its debt. As the debt is repaid, shares are released from collateral and allocated to employees, based on the proportion of debt service paid in the year. The shares are deducted from shareholders' equity as unearned ESOP shares in the accompanying balance sheets. As shares are released from collateral, the Company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for EPS computations. Dividends on allocated ESOP shares are recorded as a reduction of retained earnings; dividends on unallocated ESOP shares are recorded as a reduction of debt and accrued interest.

There was no compensation expense for the ESOP for the years ended December 31, 2007 and 2005. Compensation expense for the ESOP was \$3 thousand for the year ended December 31, 2006.

Shares of the Company held by the ESOP at December 31, 2007, 2006 and 2005, are as follows:

	2007	2006	2005
Allocated shares	31,536	25,730	24,654
Unreleased shares	14,093	20,309	
Total ESOP shares	45,629	46,039	24,654
Fair value of unreleased shares (in thousands)	\$ 317	\$ 548	\$

Split Dollar Life Insurance Plan

On January 6, 1999, the Bank adopted a Director Split Dollar Life Insurance Plan. This Plan provides life insurance coverage to insurable directors of the Bank. The Bank owns the policies and is entitled to all values and proceeds. The Plan provides retirement benefits and the payment of benefits at the death of the insured director. The amount of benefits will be determined by the performance of the policies over the director's life.

Note 12. Commitments and Unfunded Credits

The Company, through its banking subsidiary is a party to credit related financial instruments with risk not reflected in the consolidated financial statements in the normal course of business to meet the financing needs of its customers. These financial instruments include commitments to extend credit, standby letters of credit and commercial letters of credit. Such commitments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheets.

The Bank's exposure to credit loss is represented by the contractual amount of these commitments. The Bank follows the same credit policies in making commitments as it does for on-balance-sheet instruments.

At December 31, 2007 and 2006, the following financial instruments were outstanding whose contract amounts represent credit risk:

	<i>(in thousands)</i>	
	2007	2006
Commitments to extend credit and unfunded commitments under lines of credit	\$ 70,233	\$ 68,712

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

Stand-by letters of credit	7,150	6,959
Rate lock commitments	673	2,240

Table of Contents

Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The commitments for lines of credit may expire without being drawn upon. Therefore, the total commitment amounts do not necessarily represent future cash requirements. The amount of collateral obtained, if it is deemed necessary by the Bank, is based on management's credit evaluation of the customer.

Unfunded commitments under commercial lines of credit, revolving credit lines and overdraft protection agreements are commitments for possible future extensions of credit to existing customers. These lines of credit are collateralized as deemed necessary and usually do not contain a specified maturity date and may not be drawn upon to the total extent to which the Bank is committed.

Commercial and standby letters of credit are conditional commitments issued by the Bank to guarantee the performance of a customer to a third party. Those letters of credit are primarily issued to support public and private borrowing arrangements. Essentially all letters of credit issued have expiration dates within one year. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loan facilities to customers. The Bank generally holds collateral supporting those commitments if deemed necessary.

At December 31, 2007, the Bank had entered into locked-rate commitments to originate mortgage loans amounting to \$673 thousand and had loans held for sale of \$270 thousand. Risks arise from the possible inability of counterparties to meet the terms of their contracts. The Bank does not expect any counterparty to fail to meet its obligations.

The Bank has cash accounts in other commercial banks. The amount on deposit at these banks at December 31, 2007 exceeded the insurance limits of the Federal Deposit Insurance Corporation by \$51 thousand.

Note 13. Stock Split

On March 16, 2005, the Board of Directors of the Company declared a two-for-one stock split of the Company's common stock, including authorized and unissued shares. The stock split was payable on April 29, 2005 to shareholders of record as of March 30, 2005. As a result of the stock split, the Company had 8,000,000 shares of common stock authorized, at a par value of \$1.25 per share, and 2,924,124 shares outstanding at April 29, 2005. Subsequent to the stock split, the Company purchased and retired 1,264 shares of its common stock, resulting in 2,922,860 shares outstanding at December 31, 2005. Prior period financial information has been restated to reflect the stock split, as appropriate.

Note 14. Transactions with Related Parties

During the year, executive officers and directors (and companies controlled by them) were customers of and had transactions with the Company in the normal course of business. These transactions were made on substantially the same terms as those prevailing for other customers.

At December 31, 2007 and 2006, these loans totaled \$8.4 million and \$10.9 million, respectively. During 2007, total principal additions were \$5.4 million and total principal payments were \$4.3 million.

Deposits from related parties held by the Bank at December 31, 2007 and 2006 amounted to \$3.1 million and \$3.0 million, respectively.

Note 15. Lease Commitments

The Company was obligated under noncancelable leases for banking premises. Total rental expense for operating leases for 2007, 2006 and 2005 was \$74 thousand, \$71 thousand and \$76 thousand, respectively. Minimum rental commitments under noncancelable leases with terms in excess of one year as of December 31, 2007 were as follows:

	<i>(in thousands)</i>
	Operating Leases
2008	\$ 47
2009	24
2010	15
2011	15
2012	15

Edgar Filing: FIRST NATIONAL CORP /VA/ - Form 10-K

2013 and thereafter	35
Total minimum payments	\$ 151

Table of Contents

Note 16. Dividend Reinvestment Plan

The Company has in effect a Dividend Reinvestment Plan (DRIP) which provides an automatic conversion of dividends into common stock for enrolled shareholders. Stock is purchased on the open market on each dividend payable date.

Shares of common stock can be issued by the Company or purchased in the open market for the additional shares required for the DRIP. The Company purchased 7,885, 6,471 and 6,051 shares on the open market for the years ended December 31, 2007, 2006 and 2005, respectively.

Note 17. Fair Value of Financial Instruments and Interest Rate Risk

The fair value of a financial instrument is the current amount that would be exchanged between willing parties, other than in a forced liquidation. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Accordingly, the fair value estimates may not be realized in an immediate settlement of the instrument. SFAS 107 excludes certain financial instruments and all nonfinancial instruments from its disclosure requirements. Accordingly, the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

The following methods and assumptions were used by the Company in estimating fair value disclosures for financial instruments:

Cash and Cash Equivalents

The carrying amounts of cash and short-term instruments approximate fair values.

Securities

For securities available for sale and held for investment purposes, fair values are based on quoted market prices or dealer quotes.

Loans Held for Sale

Fair values of mortgage loans held for sale are based on commitments on hand from investors or prevailing market prices.

Loans

For variable-rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values. Fair values for certain mortgage loans (e.g., one-to-four family residential), credit card loans, and other consumer loans are based on quoted market prices of similar loans sold in conjunction with securitization transactions, adjusted for differences in loan characteristics. Fair values for other loans (e.g., commercial real estate and investment property mortgage loans, commercial and industrial loans) are estimated using discounted cash flow analyses, using interest rates currently being offered for loans with similar terms to borrowers of similar credit quality. Fair values for nonperforming loans are estimated using discounted cash flow analyses or underlying collateral values, where applicable.

Deposit Liabilities

The fair value of demand deposits, savings accounts, and certain money market deposits is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated using the rates currently offered for deposits of similar remaining maturities.

Accrued Interest

The carrying amounts of accrued interest approximate fair value.

Table of Contents**Borrowings**

The carrying amounts of federal funds purchased and other short-term borrowings maturing within ninety days approximate their fair values. Fair values of all other borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Commitments and Unfunded Credits

The fair value of commitments to extend credit is estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counterparties. For fixed-rate loan commitments, fair value also considers the difference between current levels of interest rates and the committed rates.

The fair value of stand-by letters of credit is based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counterparties at the reporting date. At December 31, 2007 and 2006, fair value of loan commitments and standby letters of credit was immaterial.

The estimated fair values of the Company's financial instruments at December 31, 2007 and 2006 were as follows:

	(in thousands)			
	2007		2006	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets				
Cash and short-term investments	\$ 12,909	\$ 12,909	\$ 12,127	\$ 12,127
Federal funds sold			8,430	8,430
Securities	57,503	57,503	60,340	60,340
Loans, net	445,380	437,738	423,151	415,567
Loans held for sale	270	265	105	105
Accrued interest receivable	2,227	2,227	2,038	2,038
Financial Liabilities				
Deposits	\$ 445,142	\$ 445,232	\$ 435,044	\$ 436,401
Federal funds purchased	3,409	3,409		
Other borrowings	40,564	40,634	45,750	45,785
Company obligated mandatorily redeemable capital securities	12,372	12,378	12,372	12,811
Accrued interest payable	1,212	1,212	1,134	1,134

The Company assumes interest rate risk (the risk that general interest rate levels will change) as a result of its normal operations. As a result, the fair values of the Company's financial instruments will change when interest rate levels change and that change may be either favorable or unfavorable to the Company. Management attempts to match maturities of assets and liabilities to the extent believed necessary to minimize interest rate risk. However, borrowers with fixed rate obligations are less likely to prepay in a rising rate environment and more likely to prepay in a falling rate environment. Conversely, depositors who are receiving fixed rates are more likely to withdraw funds before maturity in a rising rate environment and less likely to do so in a falling rate environment. Management monitors rates and maturities of assets and liabilities and attempts to minimize interest rate risk by adjusting terms of new loans and deposits and by investing in securities with terms that mitigate the Company's overall interest rate risk.

Note 18. Regulatory Matters

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and the Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific capital guidelines that involve quantitative measures of their assets, liabilities, and certain off-balance-sheet items as calculated under regulatory accounting practices. The capital amounts and classification are also subject to qualitative judgments by the regulators about components, risk weightings and other factors. Prompt corrective action provisions are not applicable to bank holding companies.

Table of Contents

Quantitative measures established by regulation to ensure capital adequacy require the Company and the Bank to maintain minimum amounts and ratios (set forth in the following table) of total (as defined in the regulations) and Tier 1 capital (as defined) to risk-weighted assets (as defined), and of Tier 1 capital to average assets. Management believes, as of December 31, 2007 and 2006, that the Company and the Bank met all capital adequacy requirements to which they are subject.

As of December 31, 2007, the most recent notification from the Federal Reserve Bank categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, the Bank must maintain minimum total risk-based, Tier 1 risk-based, and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since that notification that management believes have changed the institution's category.

The Company's and the Bank's actual capital amounts and ratios are also presented in the following table.

(amounts in thousands)

	Actual		Minimum Capital Requirement		Minimum To Be Well Capitalized Under Prompt Corrective Action Provisions	
	Amount	Ratio	Amount	Ratio	Amount	Ratio

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosure

None.

Item 9A. Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Chief Executive Officer and Chief Financial Officer, the effectiveness of disclosure controls and procedures as of December 31, 2007 pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that, as of December 31, 2007, the disclosure controls and procedures are effective in ensuring that the information required to be disclosed in Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner and (2) accumulated and communicated to the Company's management, including the Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. Refer to Item 8 of this report for the Management's Report on the Effectiveness of Internal Controls over Financial Reporting.

There were no changes in the Company's internal control over financial reporting identified in connection with the evaluation of it that occurred during the Company's last fiscal quarter that materially affected, or is reasonably likely to materially affect, internal control over financial reporting.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Information required by this Item is set forth under the headings Election of Directors Nominees, Executive Officers Who Are Not Directors, Section 16(a) Beneficial Ownership Reporting Compliance, Code of Conduct and Ethics, Committees and Director Selection Process in the Company's Proxy Statement for the 2008 Annual Meeting of Shareholders (the Proxy Statement), which information is incorporated herein by reference.

Item 11. Executive Compensation

Information required by this Item is set forth under the headings Executive Compensation and Director Compensation in the Proxy Statement, which information is incorporated herein by reference.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Information required by this Item is set forth under the heading Stock Ownership of Directors and Executive Officers and Stock Ownership of Certain Beneficial Owners in the Proxy Statement, which information is incorporated herein by reference.

The Company does not have any compensation plans or other arrangements under which equity securities are authorized for issuance.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Information required by this Item is set forth under the headings Certain Relationships and Related Party Transactions and Director Independence in the Proxy Statement, which information is incorporated herein by reference.

Item 14. Principal Accounting Fees and Services

Information required by this Item is set forth under the headings Auditor Fees and Services and Policy for Approval of Audit and Permitted Non-Audit Services in the Proxy Statement, which information is incorporated herein by reference.
