**Item 2.02 Results of Operations and Financial Condition.**

On February 25, 2010, The Blackstone Group L.P. issued a press release announcing financial results for its fourth quarter and year ended December 31, 2009.

A copy of the press release is attached hereto as Exhibit 99.1. All information in the press release is furnished but not filed.

**Non-GAAP Financial Information**

Blackstone discloses the following financial measures that are calculated and presented on the basis of methodologies other than in accordance with generally accepted accounting principles in the United States of America ( non-GAAP ) in the attached press release:

Blackstone uses Economic Net Income, or ENI , as a key measure of value creation and as a benchmark of its performance. ENI represents segment net income excluding the impact of income taxes and initial public offering ( IPO ) and acquisition-related items, including charges associated with equity-based compensation, the amortization of intangibles and corporate actions including acquisitions. For segment reporting purposes, revenues and expenses are presented on a basis that deconsolidates the investment funds we manage.

The aggregate of ENI for all reportable segments equals Total Segment ENI. ENI is used by management primarily in making resource deployment and compensation decisions across Blackstone 's four segments.

Economic Net Income After Taxes represents ENI adjusted to reflect the implied provision (benefit) for income taxes calculated using a similar methodology as applied in calculating the tax provision (benefit) for The Blackstone Group L.P. but consistent with the ENI concepts as represented above.

Blackstone uses Net Fee Related Earnings from Operations, which is a component of Adjusted Cash Flows from Operations, as a key measure to highlight earnings from operations excluding the income related to performance fees and allocations and related carry plan costs and income earned from Blackstone 's investments in the Blackstone Funds and realized and unrealized gains (losses) from other investments. Management uses Net Fee Related Earnings from Operations as a measure to assess whether recurring revenue from our businesses more than adequately covers all of our operating expenses and generates profitability. Net Fee Related Earnings from Operations equals (i) contractual revenues and interest income, (ii) less compensation expenses, which include amortization of non-IPO and acquisition-related equity-based awards, but exclude amortization of IPO and acquisition-based equity awards, carried interest and incentive fee compensation, (iii) less other operating expenses and (iv) less cash taxes due on earnings from operations as calculated using a similar methodology as applied in calculating the tax provision (benefit) for The Blackstone Group L.P.

Blackstone uses Earnings Before Interest, Taxes and Depreciation and Amortization from Net Fee Related Earnings from Operations ( EBITDA-NFRE ) as a measure of segment performance and a useful indicator of our ability to cover our recurring operating expenses. EBITDA-NFRE equals Net Fee Related Earnings from Operations before segment interest expense, segment depreciation and amortization and the cash taxes included in Net Fee Related Earnings from Operations.

Blackstone has managed its historical liquidity and capital requirements by focusing on its cash flows before consolidation of the Blackstone Funds and the effect of normal changes in assets and liabilities which it anticipates will be settled for cash within one year. Normal movements in Blackstone 's short-term assets and liabilities do not affect its distribution decisions given its current and historical balance sheet liquidity, including available cash, marketable securities and available borrowing capability. Adjusted Cash Flows from Operations, which is derived from our segment reported results, is a supplemental measure to assess liquidity and amounts available for distributions to Blackstone unitholders, including Blackstone personnel.

Adjusted Cash Flows from Operations represents net cash flows used in or provided by operating activities adjusted for (a) IPO and acquisition-related corporate actions, (b) cash flows relating to changes in operating assets and liabilities, (c) Blackstone Funds-related investment activity, (d) net realized gains (losses) on illiquid investments, (e) differences in the timing of realized gains by The Blackstone Group L.P. versus the Blackstone Funds, (f) non-controlling interests related to departed employees, (g) GAAP taxes versus cash income taxes due on realized income as calculated using a similar methodology as applied in calculating the tax provision (benefit) for The Blackstone Group L.P., (h) non-controlling interests in income of consolidated entities, and (i) other adjustments.

Adjusted Cash Flow from Operations will be retired with the end of the distribution preference to public unitholders. Going forward, Blackstone will disclose Distributable Earnings, which is a non-GAAP measure intended to show the amount of net realized earnings without the effects of the consolidation of the Blackstone Funds. Distributable Earnings, which is a component of Economic Net Income, is the sum across all Total Reportable Segments of (a) Total Management and Advisory Fees, (b) Interest and Dividend Revenue, (c) Other Revenue, (d) Realized Performance Fees and Allocations, and (e) Realized Investment Income (Loss) less (a) Base Compensation, (b) Realized Performance Fee Related Compensation, (c) Other Operating Expenses and (e) Cash Taxes. Distributable Earnings will be reconciled to Blackstone's Consolidated Statement of Operations. It is Blackstone's current intention that on an annual basis it will distribute to unitholders all of its Distributable Earnings in excess of amounts determined by its general partner to be necessary or appropriate to provide for the conduct of its business, to make appropriate investments in its business and funds, to comply with applicable law, any of its debt instruments or other agreements, or to provide for future distributions to its unitholders for any ensuing quarter.

Reconciliations of these non-GAAP financial measures to the most directly comparable financial measures calculated and presented in accordance with GAAP are included in the attached press release. These non-GAAP financial measures should be considered in addition to and not as a substitute for, or superior to, financial measures presented in accordance with GAAP.
