UNITED STATES
SECURITIES AND EXCHANGE COMMISSION

WASHINGTON, D.C. 20549

FORM 10 - Q

x **QUARTERLY REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the quarterly period ended September 30, 2010

Or

.. **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from ____ to ____.

Commission File Number 001-34292

ORRSTOWN FINANCIAL SERVICES, INC.

(Exact name of registrant as specified in its charter)

Commonwealth of Pennsylvania
(State or other jurisdiction of

23-2530374
(I.R.S. Employer

incorporation or organization)

Identification No.)

77 East King Street, P.O. Box 250,

Shippensburg, Pennsylvania
(Address of principal executive offices)

17257
(Zip Code)

(717) 532-6114

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. YES NO

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). YES NO

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See definition of large accelerated filer, accelerated filer, and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Indicate by check mark whether the registrant is a shell Corporation (as defined in Rule 12b-2 of the Exchange Act). YES NO

As of November 4, 2010, 7,985,535 shares of common stock, no par value, of the registrant were outstanding.

ORRSTOWN FINANCIAL SERVICES, INC.

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

September 30, 2010

Note 1 - Summary of Condensed Consolidated Significant Accounting Policies

Basis of Presentation

The unaudited financial statements of Orrstown Financial Services, Inc. (the Company) and its subsidiary are presented at and for the three and nine months ended September 30, 2010 and 2009 and have been prepared in accordance with accounting principles generally accepted in the United States for interim financial information, the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States for complete financial statements. However, unaudited information reflects all adjustments (consisting solely of normal recurring adjustments) that are, in the opinion of management, considered necessary for a fair presentation of the financial position, results of operations and cash flows for the interim period. Information presented at December 31, 2009 is condensed from audited year-end financial statements. For further information, refer to the audited consolidated financial statements and footnotes thereto, included in the annual report on Form 10-K for the year ended December 31, 2009.

Orrstown Financial Services, Inc. is a financial holding company including its wholly-owned subsidiary, Orrstown Bank. All significant intercompany transactions and accounts have been eliminated. Operating results for the three and nine months ended September 30, 2010, are not necessarily indicative of the results that may be expected for the year ending December 31, 2010.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Material estimates that are particularly susceptible to significant change relate to the determination of the allowance for losses on loans and the valuation of real estate acquired in connection with foreclosures or in satisfaction of loans. In connection with the determination of the allowance for losses on loans and foreclosed real estate, management obtains independent appraisals for significant properties.

While management uses available information to recognize losses on loans and foreclosed real estate, future additions to the allowances may be necessary based on changes in local economic conditions. In addition, regulatory agencies, as an integral part of their examination process, periodically review the Company's allowance for losses on loans and foreclosed real estate. Such agencies may require the Company to recognize additions to the allowance based on their judgments concerning information available to them at the time of their examination. Because of these factors, management's estimate of credit losses inherent in the loan portfolio and the related allowance may change in the near term.

Cash Flows

For purposes of the Statements of Cash Flows, cash and cash equivalents include cash and due from banks and federal funds sold. The Company has elected to present the net increase or decrease in deposits with banks, loans and deposits in the Statement of Cash Flows.

Comprehensive Income

Comprehensive income consists of net income and other comprehensive income. Other comprehensive income includes unrealized gains and losses on securities available for sale, unrealized losses related to factors other than credit or debt securities, and unrealized gains and losses on cash flow hedges.

Investment Securities

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

Under generally accepted accounting principles, the Company may segregate their investment portfolio into three specific categories: securities held to maturity, trading securities and securities available for sale. Securities held to maturity are to be accounted for at their amortized cost; securities classified as trading securities are to be accounted for at their current market value with unrealized gains and losses on such securities included in current period earnings; and securities classified as available for sale are to be accounted for at their current market value with unrealized gains and losses on such securities to be excluded from earnings and reported as a net amount in other comprehensive income.

Management determines the appropriate classification of securities at the time of purchase. If management has the intent and the Company has the ability, at the time of purchase, to hold securities until maturity, they are classified as securities held to maturity and carried at amortized historical cost. Securities to be held for indefinite periods of time and not intended to be

Table of Contents

held to maturity are classified as available for sale and carried at fair value. Securities held for indefinite periods of time include securities that management intends to use as part of its asset and liability management strategy and that may be sold in response to changes in interest rates, resultant prepayment risk and other factors related to interest rate and resultant prepayment risk changes.

The Company has classified all of its investment securities as available for sale. Short-term investments consist of certificates of deposits with banks.

Realized gains and losses on dispositions are based on the net proceeds and the adjusted book value of the securities sold, using the specific identification method. Unrealized holding gains and losses, net of tax, on securities available for sale are reported as a net amount in a separate component (accumulated other comprehensive income) of shareholders' equity until realized. Other-than-temporary impairment (OTTI) loss is recognized in earnings through the income statement in the period in which OTTI loss is taken, except for the non-credit component of OTTI losses on debt securities, which are recognized in other comprehensive income. Purchase premiums and discounts are recognized in interest income over the terms of the securities using the interest method over the period to maturity.

The Company's investments are exposed to various risks, such as interest rate, market risk, currency and credit risks. Due to the level of risk associated with certain investments and the level of uncertainty related to changes in the value of investments, it is at least reasonably possible that changes in risks in the near term would materially affect investment assets reported in the financial statements.

Stock-Based Compensation

The Company maintains two stock-based compensation plans. These plans provide for the granting of stock options to the Company's directors and the Bank's employees. Generally accepted accounting principles, Share-Based Payment, requires financial statement recognition of compensation cost for stock options and other stock-based awards. Both of the Company's stock-based compensation plans are fully vested when granted and, therefore, are expensed on the date of grant using the Black-Scholes option-pricing model.

Earnings per Share

Basic earnings per share represent income available to common stockholders divided by the weighted-average number of common shares outstanding during the period. Diluted earnings per share reflect the additional common shares that would have been outstanding if dilutive potential common shares had been issued. Potential common shares that may be issued by the Company relate solely to outstanding stock options. Beginning in the third quarter of 2010, potential common shares that may be issued by the Company were determined using the treasury stock method for all periods presented. Prior to the third quarter of 2010, all outstanding stock options were considered fully dilutive by the Company in calculating diluted earnings per share.

Derivative Instruments

Generally accepted accounting principles require that all derivatives be recognized in the Consolidated Financial Statements at their fair values. On the dates that derivative contracts are entered into, the Company designates derivatives as (a) hedges of fair values of recognized assets or liabilities or of unrecognized firm commitments (fair-value hedges); (b) hedges of forecasted transactions or variable cash flows to be received or paid in conjunction with recognized assets or liabilities (cash-flow hedges) or (c) instruments that are held for trading or non-hedging purposes (trading or economic-hedging instruments). For a derivative treated as a fair-value hedge, the effective portion of a change in fair value is recorded as an adjustment to the hedged item. The ineffective portion of the fair-value hedge is recognized in current period earnings. Upon termination of a fair-value hedge of a debt instrument, the resulting gain or loss is amortized to earnings through the maturity date of the debt instrument. For a derivative treated as a cash flow hedge, the ineffective portion of changes in fair value is reported in current period earnings. The effective portion of the cash flow hedge is recorded as an adjustment to the hedged item through other comprehensive income. For a derivative treated as a trading or economic hedging instrument, changes in fair value are reported in current period earnings. Fair values are determined based upon quoted market prices and mathematical models using current and historical data.

The Company formally assesses, both at the hedges' inception, and on an on-going basis, whether derivatives used in hedging transactions have been highly effective in offsetting changes in fair values or cash flows of hedged items and whether those derivatives are expected to remain highly effective in subsequent periods. The Company discontinues hedge accounting when (a) it determines that a derivative is no longer effective in offsetting changes in fair value or cash flows of a hedged item; (b) the derivative expires or is sold, terminated or exercised; (c) probability exists that the forecasted transaction will no longer occur or (d) management determines that designating the derivative as a hedging instrument is no longer appropriate. In all cases in which hedge accounting is discontinued and a derivative remains outstanding, the Company will carry the derivative at fair value in the Consolidated Financial Statements, recognizing changes in fair value in current period income in the statement of income.

Table of Contents

The Company follows generally accepted accounting principles, *Disclosures about Derivative Instruments and Hedging Activities*, which includes the disclosure requirements for derivative instruments and hedging activities to provide enhanced disclosures about (a) how and why an entity uses derivative instruments, (b) how derivative instruments and related hedged items are accounted for and (c) how derivative instruments and related hedged items affect an entity's financial position, financial performance and cash flows.

Recent Accounting Pronouncements

In June 2009, the Financial Accounting Standards Board (FASB) issued new guidance relating to the accounting for transfers of financial assets. The new guidance, which was issued as FASB Statement No. 166, *Accounting for Transfers of Financial Assets, an amendment to SFAS No. 140*, was adopted into Codification in December 2009 through the issuance of Accounting Standards Update (ASU) 2009-16. The new standard provides guidance to improve the relevance, representational faithfulness, and comparability of the information that an entity provides in its financial statements about a transfer of financial assets; the effects of a transfer on its financial position, financial performance, and cash flows; and a transferor's continuing involvement, if any, in transferred financial assets. ASU 2009-16 was effective for transfers on or after January 1, 2010. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In June 2009, the FASB issued new guidance relating to variable interest entities. The new guidance, which was issued as FASB Statement No. 167, *Amendments to FASB Interpretation No. 46(R)*, was adopted into Codification in December 2009. The objective of the guidance is to improve financial reporting by enterprises involved with variable interest entities and to provide more relevant and reliable information to users of financial statements. This guidance was effective as of January 1, 2010. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In January 2010, the FASB issued ASU 2010-04, *Accounting for Various Topics - Technical Corrections to SEC Paragraphs*. ASU 2010-04 makes technical corrections to existing SEC guidance including the following topics: accounting for subsequent investments, termination of an interest rate swap, issuance of financial statements - subsequent events, use of residential method to value acquired assets other than goodwill, adjustments in assets and liabilities for holding gains and losses, and selections of discount rate used for measuring defined benefit obligation. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In January 2010, the FASB issued ASU 2010-06, *Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements*. ASU 2010-06 amends Subtopic 820-10 to clarify existing disclosures, require new disclosures, and includes conforming amendments to guidance on employers' disclosures about postretirement benefit plan assets. ASU 2010-06 is effective for interim and annual periods beginning after December 15, 2009, except for disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010 and for interim periods within those fiscal years. The adoption of the new guidance did not have a material impact on the Company's consolidated financial statements.

In July 2010, the FASB issued ASU 2010-20, *Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses*. The new disclosure guidance will significantly expand the existing requirements and will lead to greater transparency into a company's exposure to credit losses from lending arrangements. The extensive new disclosures of information as of the end of a reporting period will become effective for both interim and annual reporting periods ending on or after December 15, 2010. Specific disclosures regarding activity that occurred before the issuance of the ASU, such as the allowance rollforward and modification disclosures, will be required for periods beginning on or after December 15, 2010. The Company is currently assessing the impact that ASU 2010-20 will have on its consolidated financial statements.

Note 2 - Securities Available for Sale

At September 30, 2010 and December 31, 2009, the investment securities portfolio was comprised of securities classified as *available for sale*, resulting in investment securities being carried at fair value. The amortized cost and fair values of investment securities available for sale at September 30, 2010 and December 31, 2009 were:

Table of Contents

	Amortized Cost	Unrealized Gains September 30, 2010	Unrealized Losses	Fair Value
(Dollars in thousands)				
Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies	\$ 127,936	\$ 4,987	\$ 42	\$ 132,881

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

Total temporarily impaired securities	\$ 117,657	\$ 1,870	\$ 1,462	\$ 458	\$ 119,119	\$ 2,328
---------------------------------------	------------	----------	----------	--------	------------	----------

The previous table represents sixty-four investment securities at September 30, 2010, and ninety-eight investment securities at December 31, 2009, where the current fair value is less than the related amortized cost. Management believes the impairments to be temporary in all cases for both periods disclosed. Consideration is given to the extent to which the fair value has been less than cost, the financial condition and near-term prospects of the issuer, and the intent of the Company to retain its investment in the issuer for a period of time sufficient to allow for any anticipated recovery in fair value and the likelihood of being required to sell the investments.

At September 30, 2010, the Company held one state and political subdivision issue with a fair value less than the related amortized cost for twelve months or more. This is a California issue that is carrying a low market value due to the state's economic issues. As management intends to hold and it is more likely than not that management will not be required to sell this

Table of Contents

security for the foreseeable future, the decline is not deemed to be other than temporary. Twenty-two marketable equity securities have unrealized losses for twelve months or more. Eight of these twenty-two equity securities are financial institution securities; our overall approach to the bank holdings was to consider those trading under their book value as temporarily impaired due to extreme market conditions within the financial sector. We also considered the ability to continue paying dividends as a factor in the long-term worth of these securities. Fourteen of the twenty-two equity securities are non-financials or industrial securities; we continue to view these companies as valuable long-term holdings in the diversified portfolio. Factors considered were earnings, the ability to pay a dividend and the outlook for recovery in the industrial sector long-term. Since these companies are considered viable and carry the possibility of price appreciation in the future, impairments are considered temporary.

At December 31, 2009, the Company held one state and political subdivision issue with a fair value less than the related amortized cost for twelve months or more. This is a California issue that is carrying a low market value due to the state's economic issues. As management intends to hold, and it is more likely, than not, that management will not be required to sell this security for the foreseeable future, the decline is not deemed to be other than temporary. Thirty-three marketable equity securities have unrealized losses for twelve months or more. Twelve of these thirty-three equity securities are financial institution securities; our overall approach to the bank holdings was to consider those trading under their book value as temporarily impaired due to extreme market conditions within the financial sector. We also considered the ability to continue paying dividends as a factor in the long-term worth of these securities. Twenty-one of the thirty-three equity securities are non-financials or industrial securities; we continue to view these companies as valuable long-term holdings in the diversified portfolio. Factors considered were earnings, the ability to pay a dividend and the outlook for recovery in the industrial sector long-term. Since these companies are considered viable and carry the possibility of price appreciation in the future, impairments are considered temporary. The Company recorded \$36,000 of equity securities impairment expense during the first quarter of 2009.

The amortized cost and fair values of investment securities available for sale at September 30, 2010, by contractual maturity are shown below. Contractual maturities will differ from expected maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

(Dollars in thousands)	Available for Sale	
	Amortized Cost	Fair Value
Due in one year or less	\$ 8,079	\$ 8,116
Due after one year through five years	37,343	37,665
Due after five years through ten years	102,207	106,934
Due after ten years	70,069	72,485
Government backed residential mortgage securities	200,807	201,605
Equity securities	2,487	2,351
	\$ 420,992	\$ 429,156

Proceeds from sales of securities available for sale for three months ended September 30, 2010 and 2009, were \$30,874,000, and \$23,007,000, respectively. Proceeds from sales of securities available for sale for nine months ended September 30, 2010, and 2009, were \$188,403,000 and \$36,165,000, respectively. Gross gains and losses on sales for the quarter ended September 30, 2010 were \$1,094,000 and \$20,000. Gross gains and losses on sales for the quarter ended September 30, 2009 were \$577,000 and \$239,000. Gross gains and losses on sales for nine months ended September 30, 2010 were \$3,316,000 and \$63,000. Gross gains and losses on sales for nine months ended September 30, 2009 were \$1,038,000 and \$242,000.

Securities with a market value of \$264,977,000 and \$143,984,000 at September 30, 2010, and December 31, 2009, respectively, were pledged to secure public funds and for other purposes as required or permitted by law.

Note 3 - Derivative Instruments and Hedging Activity

The Bank entered into three (3) rate swap agreements - two on November 24, 2008, and one on May 22, 2009 - related to fixed rate loans. The Bank uses interest rate swaps to reduce interest rate risks and to manage interest income. By entering into these agreements, the Bank converts floating rate assets into fixed rate assets, or alternatively, converts fixed rate assets into floating rate assets. Interest differentials paid or received under the swap agreements are reflected as adjustments to interest income. These interest rate swap agreements are considered cash flow hedge derivative instruments that qualify for hedge accounting. The notional amounts of the interest rate swaps are not exchanged and do not represent exposure to credit loss. In the event of default by a counter party, the risk in these transactions is the cost of replacing the agreements at current

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

market rates. During the second quarter, the Bank sold one of the rate swaps and received \$868,000 as total proceeds from the sale. The Bank recognized a \$778,000 gain on the sale of the rate swap in the second quarter of 2010.

Table of Contents

The effects of derivative instruments on the Financial Statements for September 30, 2010 and December 31, 2009, are as follows:

Asset Derivatives at dates shown:

(Dollars in thousands)

	Notional/ Contract Amount	Estimated Net Fair Value	September 30, 2010

	\$ 1,268	\$ (1,086)		\$ 29	\$ 88

Under the terms of the agreement, the Bank pays interest monthly at the rate equivalent to Wall Street Journal prime and receives interest income monthly at the fixed rate shown above.

Note 4 - Shareholders Equity

On February 9, 2010, Orrstown Financial Services, Inc., filed a shelf registration statement on Form S-3 with the Securities and Exchange Commission that provided the Company the ability to raise capital from time to time up to an aggregate of \$80 million, through the sale of the Company's stock, preferred stock, debt securities, warrants and other securities. During March 2010 the Company completed a public offering of 1,481,481 shares of common stock at a price of \$27.00 per share for gross proceeds of approximately \$40,000,000. Net proceeds of \$37,550,000, after deducting underwriting commissions and expenses, were received on March 29, 2010.

Table of Contents**Note 5 - Earnings Per Share**

Earnings per share for the three and nine months ended September 30, 2010 have been computed as follows:

(In Thousands, except per share data)	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Net income	\$ 4,896	\$ 3,880	\$ 12,206	\$ 10,359
Weighted average shares outstanding (basic)	7,974	6,407	7,483	6,395
Impact of common stock equivalents	16	72	27	50
Weighted average shares outstanding (diluted)	7,990	6,479	7,510	6,445
Per share information:				
Basic earnings per share	\$ 0.61	\$ 0.61	\$ 1.62	\$ 1.62
Diluted earnings per share	0.61	0.60	1.62	1.61

Stock options for 256,259 and 52,131 shares of common stock were not considered in computing diluted earnings per share for the three months ended September 30, 2010 and 2009, as they were not dilutive. Stock options for 208,245 and 176,872 shares of common stock were not considered in computing diluted earnings per share for the nine months ended September 30, 2010 and 2009, as they were not dilutive.

Note 6 - Comprehensive Income

The Company's other comprehensive income (loss) items are limited to unrealized gains (losses) on securities available for sale and unrealized gains (losses) on derivatives used for cash flow hedges. The components of other comprehensive income (loss) for the three and nine months ended September 30, 2010 and 2009 were as follows:

(Dollars in thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Unrealized holding gains on securities available for sale arising during the period	\$ 4,477	\$ 1,659	\$ 12,185	\$ 2,347
Reclassification adjustment for gains realized in net income	(1,074)	(338)	(3,253)	(760)
Net unrealized gains	3,403	1,321	8,932	1,587
Tax effect	(1,191)	(462)	(3,126)	(558)
	2,212	859	5,806	1,029
Unrealized holding gains (losses) in fair value of derivatives used for cash flow hedges	290	585	2,046	(1,086)
Reclassification adjustment for gains realized in net income	0	0	(778)	0
Net unrealized gains (losses)	290	585	1,268	(1,086)
Tax effect	(101)	(205)	(444)	380
	189	380	824	(706)

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

Total other comprehensive income, net of tax and reclassification adjustments	\$ 2,401	\$ 1,239	\$ 6,630	\$ 323
---	----------	----------	----------	--------

The components of accumulated other comprehensive income, net of taxes, are as follows:

(Dollars in thousands)	September 30, 2010	December 31, 2009
Unrealized gains (losses) on securities available for sale	\$ 5,307	\$ (499)
Unrealized gains (losses) on derivatives used for cash flow hedges	822	(2)
	\$ 6,129	\$ (501)

Table of Contents

Note 7 - Other Commitments

In the normal course of business, the Bank makes various commitments and incurs certain contingent liabilities which are not reflected in the accompanying financial statements. These commitments include various guarantees and commitments to extend credit. Commitments to extend credit are agreements to lend to a customer as long as there is no violation of any condition established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. The Company's subsidiary bank evaluates each customer's credit-worthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary upon extension of credit, is based on management's credit evaluation of the customer. Standby letters of credit and financial guarantees written are conditional commitments to guarantee the performance of a customer to a third party. Those guarantees are primarily issued to support public and private borrowing arrangements. The credit risk involved in issuing letters of credit is essentially the same as that involved in extending loans to customers. The Bank holds collateral supporting those commitments when deemed necessary by management. At September 30, 2010, \$34,128,000 of performance standby letters of credit have been issued. The Company does not anticipate any losses as a result of these transactions.

Note 8 - Fair Value Measurements

Fair Value Measurements under generally accepted accounting principles defines fair value, describes a framework for measuring fair value and requires disclosures about fair value measurements by establishing a three-level hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). If the inputs used to measure the assets or liabilities fall within different levels of the hierarchy, the classification is based on the lowest level input that is significant to the fair value measurement of the asset or liability. Classification of assets and liabilities within the hierarchy considers the markets in which the assets and liabilities are traded and the reliability and transparency of the assumptions used to determine fair value.

The three levels are defined as follows: Level 1 inputs to the valuation methodology are quoted prices (unadjusted) for identical assets or liabilities in active markets. Level 2 inputs to the valuation methodology include quoted prices for similar assets and liabilities in active markets, quoted prices for identical or similar instruments in markets that are not active or by model-based techniques in which all significant inputs are observable in the market for the asset or liability, for substantially the full term of the financial instrument. Level 3 the valuation methodology is derived from model-based techniques in which at least one significant input is unobservable to the fair value measurement and based on the Company's own assumptions about market participants' assumptions.

Following is a description of the valuation methodologies used for instruments measured on a recurring basis at estimated fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy:

Securities

Where quoted prices are available in an active market, securities are classified within Level 1 of the valuation hierarchy. Level 1 securities would include highly liquid government bonds, mortgage products and exchange traded equities. If quoted market prices are not available, securities are classified within Level 2 and fair values are estimated by using pricing models, quoted prices of securities with similar characteristics or discounted cash flow. Level 2 securities would include U.S. agency securities, mortgage-backed agency securities, obligations of states and political subdivisions and certain corporate, asset backed and other securities. In certain cases where there is limited activity or less transparency around inputs to the valuation, securities are classified within Level 3 of the valuation hierarchy. All of the Company's securities are classified as available for sale.

Interest Rate Swaps

Cash flow interest rate swaps are classified within Level 2 with fair values determined by quoted market prices and mathematical models using current and historical data.

The Company had no fair value liabilities at September 30, 2010 or December 31, 2009. A summary of assets at September 30, 2010 and December 31, 2009, measured at estimated fair value on a recurring basis were as follows:

Table of Contents**September 30, 2010**

(Dollars in Thousands)	Level 1	Level 2	Level 3	Total Fair Value Measurements

Interest rate swaps	0	118	0	118
---------------------	---	-----	---	-----

Certain financial assets are measured at fair value on a nonrecurring basis in accordance with accounting principles generally accepted in the United States. Adjustments to the fair value of these assets usually result from the application of lower-of-cost-or-market accounting or write-downs of individual assets.

The following describes the valuation techniques used by the Company to measure certain financial assets recorded at fair value on a nonrecurring basis in the financial statements:

Impaired Loans

Loans are designated as impaired when, in the judgment of management based on current information and events, it is probable that all amounts due, according to the contractual terms of the loan agreement, will not be collected. The measurement of loss associated with impaired loans can be based on either the observable market price of the loan or the fair value of the collateral. Fair value is measured based on the value of the collateral securing the loan, less estimated costs to sell. Collateral may be in the form of real estate or business assets including equipment, inventory, and accounts receivable. The value of the real estate collateral is determined utilizing an income or market valuation approach based on an appraisal conducted by an independent, licensed appraiser outside of the Company using observable market data (Level 2). However, if the collateral is a house or building in the process of construction or if an appraisal of the real estate property is older than two years, then the fair value is considered Level 3. The value of business equipment is

Table of Contents

based upon an outside appraisal, if deemed significant, or the net book value on the applicable business financial statements if not considered significant using observable market data. Likewise, values for inventory and accounts receivables collateral are based on financial statement balances or aging reports (Level 3). Impaired loans with an allocation to the allowance for loan losses are measured at fair value on a nonrecurring basis. Any fair value adjustments are recorded in the period incurred as provision for loan losses on the consolidated statement of income. Specific allocations to the allowance for loan losses were \$5,315,000 and \$4,801,000 at September 30, 2010 and December 31, 2009, respectively.

Other Real Estate Owned

Other real estate property acquired through foreclosure is initially recorded at fair value of the property at the transfer date less estimated selling cost. Subsequently, other real estate owned is carried at the lower of its carrying value or the fair value less estimated selling cost. Fair value is usually determined based upon an independent third-party appraisal of the property or occasionally upon a recent sales offer. There were two other real estate owned properties with write-downs totaling \$64,000 for the quarter ended September 30, 2010.

A summary of assets at September 30, 2010 and December 31, 2009 measured at fair value on a nonrecurring basis is as follows:

September 30, 2010

(Dollars in Thousands)	Level 1	Level 2	Level 3	Total Fair Value Measurements
Impaired loans, net	\$ 0	\$ 0	\$ 10,327	\$ 10,327
Other real estate owned	0	0	72	72

December 31, 2009

(Dollars in Thousands)	Level 1	Level 2	Level 3	Total Fair Value Measurements
Impaired loans, net	\$ 0	\$ 0	\$ 10,702	\$ 10,702
Other real estate owned	0	1,065	0	1,065

Fair values of financial instruments

The Company meets the requirements for disclosure of fair value information about financial instruments, whether or not recognized in the balance sheet. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. In that regard, the derived fair value estimates cannot be substantiated by comparison to independent markets and, in many cases, could not be realized in immediate settlement of the instruments. Certain financial instruments and all non-financial instruments are excluded from disclosure requirements. Accordingly, the aggregate fair value amounts presented do not represent the underlying value of the Company.

In addition to those disclosed above, the following methods and assumptions were used by the Company in estimating fair values of financial instruments as disclosed herein:

Cash, Due from Banks, Short-Term Investments, Interest Bearing Deposits with Banks and Federal Funds Sold

The carrying amounts of cash, due from banks, short-term investments, interest bearing deposits with banks and federal funds sold approximate their fair value.

Loans Held for Sale

Loans held for sale are carried at the lower of cost or fair value. These loans typically consist of one-to-four family residential loans originated for sale in the secondary market. Fair value is based on the price secondary markets are currently offering for similar loans using observable market data which is not materially different than cost due to the short duration between origination and sale.

Loans Receivable

For variable-rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. Fair values for fixed rate loans are estimated using discounted cash flow analyses, using interest rates currently being offered in the market for loans with similar terms to borrowers of similar credit quality.

Table of Contents**Restricted Bank Stock**

These investments are carried at cost. The Company is required to maintain minimum investment balances in these stocks, which are not actively traded and therefore have no readily determinable market value.

Deposit Liabilities

The fair values disclosed for demand deposits are, by definition, equal to the amount payable on demand at the reporting date (that is, their carrying amounts). The carrying amounts of variable-rate, fixed-term money market accounts and certificates of deposit approximate their fair values at the reporting date. Fair values for fixed-rate certificates of deposits and IRAs are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market to a schedule of aggregated expected maturities on time deposits.

Short-Term Borrowings

The carrying amounts of federal funds purchased, borrowings under repurchase agreements, and other short-term borrowings maturing within 90 days approximate their fair values. Fair values of other short-term borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements.

Long-Term Borrowings

The fair value of the Company's fixed rate long-term borrowings is estimated using a discounted cash flow analysis based on the Company's current incremental borrowing rate for similar types of borrowing arrangements. The carrying amounts of variable-rate long-term borrowings approximate their fair values at the reporting date.

Accrued Interest

The carrying amounts of accrued interest approximate their fair values.

Off-Balance-Sheet Instruments

The Company generally does not charge commitment fees. Fees for standby letters of credit and other off-balance-sheet instruments are not significant.

The estimated fair values of the Company's financial statements were as follows at September 30, 2010 and December 31, 2009:

(Dollars in thousands)	September 30, 2010		December 31, 2009	
	Carrying Amount	Fair Value	Carrying Amount	Fair Value
Financial Assets				
Cash, due from banks, interest bearing deposits with banks and short-term investments	\$ 18,281	\$ 18,281	\$ 20,929	\$ 20,929
Federal funds sold	18,645	18,645	8,000	8,000

PART I - FINANCIAL INFORMATION

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

OVERVIEW

Orrstown Financial Services, Inc. (the Company) is a financial holding Company with a wholly-owned bank subsidiary, Orrstown Bank. The following is a discussion of our consolidated financial condition at September 30, 2010 and results of operations for the three and nine months ended September 30, 2010 and September 30, 2009. Throughout this discussion, the yield on earning assets is stated on a fully taxable-equivalent basis and balances represent average daily balances unless otherwise stated. The discussion and analysis should be read in conjunction with our Condensed Consolidated Financial Statements (Unaudited) and Notes thereto presented in this report. Certain prior period amounts, presented in this discussion and analysis, have been reclassified to conform to current period classifications.

Certain statements appearing herein which are not historical in nature are forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements refer to a future period or periods, reflecting management's current views as to likely future developments, and use words like may, will, expect, estimate, anticipate or similar terms. Because forward-looking statements involve certain risks, uncertainties and other factors over which the Company has no direct control, actual results could differ materially from those contemplated in such statements. These factors include (but are not limited to) the following: general economic conditions, changes in interest rates, changes in the Company's cost of funds, changes in government monetary policy, changes in government regulation and taxation of financial institutions, including changes resulting from the Dodd-Frank Wall Street Reform and Consumer Protection Act and related regulations, changes in the rate of inflation, changes in technology, the intensification of competition within the Company's market area and other similar factors. For a discussion of these forward-looking statements and important factors that could cause results to differ materially from the forward-looking statements contained in this Report, see Important Factors Relating to Forward Looking Statements contained in our Annual Report on Form 10-K for the year ended December 31, 2009.

Critical Accounting Policies

The Bank policy related to the allowance for loan losses is considered to be a critical accounting policy because the allowance for loan losses represents a particularly sensitive accounting estimate. The amount of the allowance is based on management's evaluation of the collectability of the loan portfolio, including the nature of the loan portfolio, credit concentrations, trends in historical loss experience, specific impaired loans and economic conditions.

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that the collectability of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb possible losses on existing loans that may become uncollectible, based on evaluations of the collectability of loans and prior loan loss experience. The evaluations take into consideration such factors as changes in the nature and volume of the loan portfolio, overall portfolio quality, grouping of like loans, grading of individual loan quality, review of specific problem loans, the examination of underlying collateral and current economic conditions that may affect the borrowers' ability to pay.

SUMMARY OF FINANCIAL RESULTS

Orrstown Financial Services, Inc. recorded net income of \$4,896,000 for the third quarter of 2010 compared to \$3,880,000 for the same period in 2009, representing an increase of \$1,016,000 or 26.2%. Basic earnings per share (EPS) for the third quarter of 2010 were \$0.61, consistent with the third quarter of 2009. Diluted earnings per share for the third quarter of 2010 were \$0.61 versus \$0.60 last year.

Included below are ratios for the return on average tangible assets (ROTA) and return on average tangible equity (ROTE) which exclude intangibles from the balance sheet and related amortization and tax expense from net income due to the associated goodwill and intangibles from the acquisition of companies and purchased deposits.

The following statistics compare the third quarter performance of 2010 to that of 2009:

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Return on average assets	1.36%	1.36%	1.23%	1.26%
Return on average tangible assets	1.39%	1.40%	1.26%	1.30%
Return on average equity	12.18%	14.33%	11.47%	13.13%
Return on average tangible equity	14.03%	18.01%	13.57%	16.60%
Average equity / average assets	11.20%	9.50%	10.70%	9.59%

Table of Contents**Supplemental Reporting of Non-GAAP-based Financial Measures**

Return on average tangible assets and return on average tangible equity are non-GAAP-based financial measures calculated using non-GAAP-based amounts. The most directly comparable GAAP-based measures are return on average assets and return on average equity, which are calculated using GAAP-based amounts. The Company calculates the return on average tangible assets and equity by excluding the balance of intangible assets and their related amortization expense, net of tax, from the calculation of return on average assets and equity. Management uses the return on average tangible assets and equity to assess the Company's core operating results and believes that this is a better measure of our operating performance. In addition, this is consistent with the treatment by bank regulatory agencies, which exclude goodwill and other intangible assets from the calculation of risk-based capital ratios. However, these non-GAAP financial measures are supplemental and are not a substitute for an analysis based on GAAP measures. A reconciliation of return on average assets and equity to the return on average tangible assets and equity, respectively, is set forth below.

For Quarter Ended:	September 30, 2010	September 30, 2009
Return on Average Assets (GAAP basis)	1.36%	1.36%
Effect of excluding average intangible assets and related amortization, net of tax	0.03%	0.04%
Return on Average Tangible Assets	1.39%	1.40%
Return on Average Equity (GAAP basis)	12.18%	14.33%
Effect of excluding average intangible assets and related amortization, net of tax	1.85%	3.68%
Return on Average Tangible Equity	14.03%	18.01%
For Nine Months Ended:	September 30, 2010	September 30, 2009
Return on Average Assets (GAAP basis)	1.23%	1.26%
Effect of excluding average intangible assets and related amortization, net of tax	0.03%	0.04%
Return on Average Tangible Assets	1.26%	1.30%
Return on Average Equity (GAAP basis)	11.47%	13.13%
Effect of excluding average intangible assets and related amortization, net of tax	2.10%	3.47%
Return on Average Tangible Equity	13.57%	16.60%

Tangible book value per share is a non-GAAP-based financial measure calculated using non-GAAP-based amounts. The most directly comparable GAAP-based measure is book value per share of common stock. In order to calculate tangible book value per share, the Company's management divides tangible common equity (a non-GAAP based financial measure calculated by subtracting intangible assets from common equity) by the number of shares of common stock outstanding. In contrast, book value per common share is calculated by dividing total shareholders' equity by the number of shares of common stock outstanding. Management uses tangible book value per share because it believes

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

such ratio is useful in understanding the Company's capital position and ratios. A reconciliation of book value per share to tangible book value per share is set forth below.

(Dollars in thousands, except per share data)	September 30, 2010	December 31, 2009
Common shareholder's equity	\$ 163,933	\$ 110,886
Less: intangible assets	20,751	20,938
Tangible common equity	\$ 143,182	\$ 89,948
Book value per share	\$ 20.55	\$ 17.21
Less: intangible assets per share	2.60	3.25
Tangible book value per share	\$ 17.95	\$ 13.96

Table of Contents

RESULTS OF OPERATIONS

Quarter ended September 30, 2010 compared to Quarter ended September 30, 2009

Net interest income for the third quarter of 2010 was \$11,668,000 representing a growth of \$2,189,000, or 23.1% over the \$9,479,000 realized during the third quarter last year. On a fully taxable equivalent basis (FTE), net interest income for the third quarter of 2010 and 2009 was \$12,200,000 and \$9,800,000. Net interest margin decreased slightly from 3.63% for the third quarter of 2009 to 3.62% in 2010. This was achieved by lowering the rates paid on interest bearing liabilities to match the lower yield earned on interest earning assets. Funds provided from the capital raise and deposit gathering were principally invested in investment securities, which carry lower yields than loans.

The table that follows shows average balances and interest yields on a fully taxable equivalent basis (FTE):

	September 30, 2010			September 30, 2009		
	Average Balance	Tax Equivalent Interest	Tax Equivalent Rate	Average Balance	Tax Equivalent Interest	Tax Equivalent Rate
(Dollars in thousands)						
Interest Earning Assets:						
Interest from short-term investments	\$ 26,666	\$ 31	0.46%	\$ 12,827	\$ 6	0.19%
Investment securities	394,927	2,956	2.99%	169,786	1,568	3.70%
Loans	907,026	12,325	5.33%	859,597	12,285	5.55%
Total interest-earning assets	1,328,619	15,312	4.54%	1,042,210	13,859	5.17%
Interest Bearing Liabilities:						
Interest bearing demand deposits	\$ 424,375	\$ 594	0.56%	\$ 309,444	\$ 802	1.03%
Savings deposits	64,574	37	0.23%	60,338	47	0.31%
Time deposits	534,457	2,014	1.45%	358,930	2,174	2.40%
Short-term borrowings	63,818	95	0.59%	88,766	128	0.57%
Long-term debt	59,047	372	2.45%	101,549	908	3.50%
Total interest bearing liabilities	1,146,271	3,112	1.06%	919,027	4,059	1.75%
Overall cost of funds			0.92%			1.54%
Net interest income / net interest spread		\$ 12,200	3.48%	\$ 9,800		3.42%
Net interest margin			3.62%			3.63%
Net Interest Income						

FTE interest income totaled \$15,312,000 for the third quarter of 2010 versus \$13,859,000 for the same period last year, an increase of \$1,453,000. This increase was achieved through a combination of rate and volume factors as our interest earning assets have increased by \$286,000,000 compared to the third quarter of 2009. The net interest spread increased primarily as a result of lower overall cost of funds. While our yields on interest earning assets have declined by 63 basis points versus third quarter of 2009, we have seen a more rapid decrease in the cost of interest bearing liabilities over this time frame, which declined 69 basis points. The overall cost of funds declined for twenty one consecutive months, to 0.92% for the third quarter of 2010 from 1.54% for the prior year. This was a result of lower interest rate environment, additional funding from new sources and the decision to maintain a shorter duration in funding versus third quarter 2009.

Other Income

Noninterest income increased to \$6,207,000 for the three months ended September 30, 2010, as compared to \$4,362,000 in the same prior year period. Excluding the increase in securities gains of \$736,000 in 2010 compared to 2009, noninterest income increased \$1,109,000. Noninterest

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

income generation increased across all business lines including Orrstown Financial Advisors, mortgage originations and retail fees generated from deposit accounts. These business lines have been able to capitalize on favorable market conditions, which include:

An increase in trust department and brokerage income of \$329,000 in the third quarter of 2010 compared to 2009, the result of increases in trust and brokerage activity as the stock market has started to show signs of recovery, and additional trust assets under management.

The continued decline in mortgage interest rates has led to an increase in new mortgage loan applications as well as refinancing activities. Given these low interest rates, the Company generally sells its 30-year conforming loans to investors. The increase in activity has resulted in gains on sales of loans increasing to \$383,000 for the three months ended September 30, 2010 compared to \$161,000 in 2009.

Table of Contents

The Company continues to see an increase in its deposit accounts and other customer related services, which has resulted in an increase in service charges. Total service charges totaled \$3,114,000 for the quarter ended September 30, 2010, an increase of \$575,000, or 22.6% over 2009.

Other Expenses

As a result of the growth the Company has experienced, other expenses rose from \$7,984,000 during the third quarter of 2009 to \$9,703,000 for the same period in 2010, an increase of \$1,719,000, or 21.5%. The following contributed to the increase in other expenses.

The largest increase was in salaries and employee benefits, which was \$5,296,000 for the three months ended September 30, 2010, an increase of \$1,003,000 over 2009's results. The increase was attributable to the growth in the number of staff, which grew from 255 full-time equivalents at September 30, 2009 to 277 at September 30, 2010. Thirteen of these new staff were business development officers, mortgage originators or financial advisors. The addition of these employees directly contributed to the revenue growth the Company experienced. Additional support staff was also required to handle the additional business. As a result of the Company's success in 2010 and in particular the third quarter of 2010, incentive compensation has increased to reward the Bank's revenue producers.

Additional increases in employee benefits were noted, particularly health and welfare costs, consistent with the national trends. Further, the Company recorded expense related to its share-based compensation of \$351,000 for the three months ended September 30, 2010, compared to \$110,000 in 2009. Stock option awards to employees were granted in July 2010 and 2009, and due to their immediate vesting are fully expensed in the third quarter.

FDIC insurance, included in other operating expenses, totaled \$305,000 for the quarter ended September 30, 2010, an increase of 17%, or \$45,000 over 2009. The increase is the result of additional deposits that the Bank has been able to generate in 2010, combined with an increase in the fee schedule.

Fees associated with the Bank's Mastermoney Card totaled \$192,000 for the quarter ended September 30, 2010, an increase of \$67,000 over 2009's expense. The increase in expense is consistent with an increase in Mastermoney fee income of \$94,000. These expenses are included in other operating expenses.

Mortgage servicing expense totaled \$145,000 for the three months ended September 30, 2010 compared to \$76,000 for the three months ended June 30, 2010 and \$64,000 for 2009. The increases in expense are a direct result of a significant increase in re-finance activity experienced in 2010, particularly the third quarter.

Contributions, included in other operating expenses, for the three months ended September 30, 2010 totaled \$176,000, or \$128,000 higher than in 2009, and \$136,000 higher than the three months ended June 30, 2010. The increase in expense is a result of commitments to the communities that the Bank serves as we continue to build relationships and expand our presence in these market areas, and partially due to the timing of when contributions are made.

Collection and real estate owned expenses, included in other operating expenses, increased approximately \$154,000 from \$74,000 for the three months ended September 30, 2009 to \$228,000 for the same period in 2010. These expenses increased \$93,000 from the second quarter of 2010 principally due to the foreclosures that occurred in the third quarter 2010, and an evaluation of the existing properties in light of market conditions, resulting in a third quarter write-down of \$63,000 to their fair values. Overall, the increase is commensurate with the increase in risk assets discussed in the provision and allowance for loan losses section.

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

In the third quarter of 2010, the Bank incurred additional expenses associated with its investments in low-income housing projects. Total expenses for the three months ended September 30, 2010 were \$249,000, an increase of \$170,000 over the same period in 2009. It is anticipated that expenses associated with these projects, including the amortization, will return to normal levels. These charges are included in other operating expenses.

The remainder of the increase in other expenses is primarily the result of the growth experienced by the Company. In order to better understand how other expenses increased in relation to related increases in revenue, operating expense levels are often measured in the financial services industry by the efficiency ratio, which expresses non-interest expense, as a percentage of tax-equivalent net interest income and noninterest income. Despite an increase in other expenses primarily related to the growth experienced in all business lines, including Orrstown Financial Advisors, mortgage origination, and retail, the Company was able to improve on its efficiency ratio, which was 55.3% for the three months ended September 30, 2010, compared to 57.2% in 2009.

Nine months ended September 30, 2010 compared to Nine months ended September 30, 2009

Net Interest Income

Net interest income for the first nine months of 2010 was \$33,465,000, representing a growth of \$7,152,000 over the \$26,313,000 realized during the same period last year. On a fully taxable equivalent basis (FTE), net interest income for the first nine months of 2010 and 2009 was \$34,780,000 and \$27,249,000, respectively. The increase in net interest income was a combination of an increase in volume and rate. Interest-earning assets increased for the nine months ended September 30, 2010 by \$224,681,000, or 22.2%, over the same period in the prior year. The bank has been able to experience growth in

Table of Contents

both core and time deposits, combined with the stock offering in the first quarter, have provided the Company with funds to invest in securities and loans. Net interest margin increased 19 basis points, from 3.53% for the nine months ended September 30, 2009 to 3.72% for the same period in 2010. The increase in the margin is the result of declines in the cost of interest bearing liabilities, principally time deposits and long-term debt, exceeding the declines in yields on interest-earning assets. Further, the deposit growth mentioned above has allowed the Company to not replace its maturing long-term borrowings.

The table that follows shows average balances and interest yields on a fully taxable equivalent basis (FTE):

(Dollars in thousands)	September 30, 2010		September 30, 2009		September 30, 2009	
	Average Balance	Tax Equivalent Interest	Tax Equivalent Rate	Average Balance	Tax Equivalent Interest	Tax Equivalent Rate
Interest Earning Assets:						
Interest from short-term investments	\$ 27,571	\$ 94	0.46%	\$ 21,891	\$ 39	0.24%
Investment securities	308,200	7,586	3.29%	149,695	4,356	3.89%
Loans	899,697	36,734	5.40%	839,201	35,798	5.62%
Total interest-earning assets	1,235,468	44,414	4.76%	1,010,787	40,193	5.25%
Interest Bearing Liabilities:						
Interest bearing demand deposits	\$ 392,799	\$ 2,005	0.68%	\$ 297,407	\$ 2,466	1.11%
Savings deposits	62,919	127	0.27%	60,742	159	0.35%
Time deposits	486,809	5,940	1.60%	353,385	7,054	2.67%
Short-term borrowings	84,196	340	0.53%	76,551	309	0.53%
Long-term debt	54,342	1,222	3.00%	108,742	2,956	3.58%
Total interest bearing liabilities	1,081,065	9,634	1.18%	896,827	12,944	1.93%
Overall cost of funds			1.04%			1.72%
Net interest income / net interest spread		\$ 34,780	3.58%		\$ 27,249	3.32%
Net interest margin			3.72%			3.53%

Other Income

Noninterest income increased to \$18,257,000 for the nine months ended September 30, 2010, as compared to \$12,599,000 in the same prior year period. Excluding the increase in securities gains of \$2,457,000 in 2010 compared to 2009, noninterest income increased \$3,201,000, or 27.1%. Noninterest income generation increased across all business lines including Orrstown Financial Advisors, mortgage originations and retail fees generated from deposit accounts. These business lines have been able to capitalize on favorable market conditions, which include:

An increase in trust department and brokerage income of \$815,000, or 28.0% for the nine months ended September 30, 2010 compared to 2009, the result of increases in trust and brokerage activity as the stock market has started to show signs of recovery, and additional trust assets under management, which increased from \$407,350,000 at September 30, 2009 to \$545,480,000 at September 30, 2010.

The continued decline in mortgage interest rates has led to an increase in new mortgage loan applications as well as refinancing activities. Given these low interest rates, the Company generally sells its 30-year conforming loans to investors. The increase in activity has resulted in gains on sales of loans increasing to \$782,000 for the nine months ended September 30, 2010 compared to \$629,000 in 2009.

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

The Company continues to see an increase in its deposit accounts and other customer related services, which has resulted in an increase in service charges. Total service charges totaled \$8,472,000 for the nine months ended September 30, 2010, an increase of \$1,045,000, or 14.1% over 2009. An increase in customer's use of the Mastermoney debit card program contributed \$305,000 of the favorable increase.

Included in other income for the nine months ended September 30, 2010 was the gain on the sale of a fixed for prime floating rate swap that was recorded in the second quarter totaling \$778,000. In connection with the Company's asset liability management, it was determined this swap would be settled in order to protect earnings in the event interest rates would rise. In addition, life insurance death benefits of \$240,000 were recognized upon the death of a former director in 2010. No similar gains on settlement of swaps or death benefit earnings were noted in 2009.

The Company continues to advertise and market itself in order for consumers to recognize the broad range of financial services and products the Company has to offer, and to increase its brand recognition. Through the use of enhanced

Table of Contents

technology, the Company expects it will be able to reach a broader market which will allow it to continue to grow its customer base. In the fourth quarter of 2010, the Company began offering its mortgage product through on-line applications.

Other Expenses

As a result of the growth the Company has experienced, other expenses rose from \$23,923,000 during the first nine months of 2009 to \$27,102,000 for the same period in 2010, an increase of \$3,179,000, or 13.3%. The following contributed to the increase in other expenses.

The largest increase was in salaries and employee benefits, which was \$14,844,000 for the nine months ended September 30, 2010, an increase of \$2,012,000 over 2009's results. The increase was attributable to the growth in the number of staff, which grew from 255 full-time equivalents at September 30, 2009 to 277 at September 30, 2010. Thirteen of these new staff were business development officers, mortgage originators or financial advisors. The addition of these employees directly contributed to the revenue growth the Company experienced. Additional support staff were also required to handle the additional business. Additional increases in employee benefits were noted, particularly health and welfare costs, which increased consistent with national trends. Further, the Company recorded expense related to its share-based compensation of \$351,000 for the nine months ended September 30, 2010, compared to \$133,000 in 2009.

FDIC insurance, included in other operating expenses, totaled \$1,139,000 for the nine months ended September 30, 2010, an increase of 13%, or \$135,000 over 2009. The increase is the result of additional deposits that the Bank has been able to generate in 2010, combined with an increase in the fee schedule.

Fees associated with the Bank's Mastermoney Card totaled \$458,000 for the quarter ended September 30, 2010, an increase of \$105,000 over 2009's expense. The increase in expense is consistent with an increase in Mastermoney fee income of \$305,000. These expenses are included in other operating expenses.

Contributions, included in other operating expenses, for the three months ended September 30, 2010 totaled \$241,000, or \$104,000 higher than in 2009. The increase in expense is a result of commitments to the communities that the Bank serves as we continue to build relationships and expand our presence in these market areas.

Collection and real estate owned expenses, included in other operating expenses, increased approximately \$256,000 from \$181,000 for the nine months ended September 30, 2009 to \$437,000 for the same period in 2010. The increase is commensurate with the increase in risk assets discussed in the provision and allowance for loan losses section.

In the third quarter of 2010, the Bank incurred additional expenses associated with its investments in low-income housing projects. This resulted in incremental expense of \$170,000 recorded in the nine months ended September 30, 2010 over the same period in 2009. These charges are included in other operating expenses.

The remainder of the increase in other expenses is primarily the result of the growth experienced by the Company. Despite an increase in the other expenses, the Company was able to improve on its efficiency ratio, which was 54.0% for the nine months ended September 30, 2010, compared to 60.7% in 2009.

Income Tax Expense

Income tax expense totaled \$4,864,000 for the nine months ended September 30, 2010, an increase of \$1,499,000 over 2009. A meaningful comparison of income tax expense to levels of pre-tax income is the effective tax rate. For first nine months of 2010, the effective tax rate was 28.5% versus 24.5% in 2009. The increase in the effective tax rate was a result of higher level of pre-tax earnings in 2010, which were taxed at

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

the incremental 35% statutory federal tax rate, and a historic tax credit that benefited 2009's income tax expense, with no similar benefit in 2010.

The Company's effective tax rate is less than the 35% federal statutory rate, primarily due to tax-exempt loan and security income, life insurance earnings and tax credits associated with low-income housing and historic projects, offset by certain non-deductible expenses and state income taxes.

PROVISION AND ALLOWANCE FOR LOAN LOSSES

The allowance for loan losses is established through a provision for loan losses charged to expense. Loans are charged against the allowance for loan losses when management believes that collectability of the principal is unlikely. The allowance is an amount that management believes will be adequate to absorb possible losses on existing loans that may become uncollectible based on evaluations of the collectability of loans and prior loan loss experience. The evaluations take into consideration factors such as changes in the nature and volume of the loan portfolio, overall portfolio quality, review of specific problem loans, and current economic conditions that may affect the borrowers' ability to pay. Through this review and evaluation process, an amount deemed adequate to meet current growth and future loss expectations is charged to operations. An unallocated portion of the reserve ensures that any additional unforeseen losses that are not otherwise identifiable will be able to be absorbed. It is intended to provide for imprecise estimates in assessing projected losses,

Table of Contents

uncertainties in economic conditions and allocating pool reserves. Management deems the total of the allocated and unallocated portions of the allowance for loan losses to be adequate to absorb any losses at this time.

The provision for loan losses amounted to \$7,550,000 and \$1,265,000 for the first nine months of 2010 and 2009. The allowance for loan losses to loans ratio for the Company was 1.67% at September 30, 2010, compared to 1.26% at December 31, 2009 and 0.92% on September 30, 2009. The provision for loan losses compared to net charge-offs of \$3,231,000 during the first three quarters of 2010 and \$442,000 during the same period last year. An unallocated amount of \$2,058,000, or 13.4%, was included in the September 30, 2010 allowance for loan losses versus \$1,262,000, or 11.4%, at December 31, 2009.

The provision for loan losses and the net charge-offs to the allowance for loan losses are shown below:

(Dollars in Thousands)	Three Months Ended		Nine Months Ended	
	September 30, 2010	September 30, 2009	September 30, 2010	September 30, 2009
Balance at beginning of period	\$ 14,582	\$ 7,413	\$ 11,067	\$ 7,140
Provision for loan losses	1,130	750	7,550	1,265
Recoveries	6	3	91	15
Loans charged-off	(332)	(203)	(3,322)	(457)
Balance at end of period	\$ 15,386	\$ 7,963	\$ 15,386	\$ 7,963
Net charge-offs to average loans outstanding (annualized)	0.15%	0.09%	0.48%	0.07%

NONPERFORMING ASSETS / RISK ELEMENTS

Nonperforming assets for the periods indicated are as follows:

(Dollars in Thousands)	September 30, 2010	June 30, 2010	March 31, 2010	December 31, 2009
Loans on nonaccrual (cash) basis	\$ 14,427	\$ 14,496	\$ 23,020	\$ 4,267
Loans whose terms have been renegotiated	0	0	0	0
Total nonperforming loans	14,427	14,496	23,020	4,267
Other real estate owned	2,528	1,264	873	1,065
Total nonperforming assets	16,955	15,760	23,893	5,332
Loans past due 90 or more days and still accruing	3,526	7,255	8,929	6,155
Total nonperforming and other risk assets	\$ 20,481	\$ 23,015	\$ 32,822	\$ 11,487
Ratio of total nonperforming loans to loans	1.57%	1.61%	2.56%	0.48%
Ratio of total nonperforming assets to assets	1.15%	1.16%	1.82%	0.45%
Ratio of total risk assets to total loans and OREO	2.22%	2.56%	3.65%	1.30%
Ratio of total risk assets to total assets	1.39%	1.69%	2.49%	0.96%
Allowance for loan losses to nonperforming loans	107%	101%	52%	259%

The Company's non-accrual loans totaled \$14,427,000 at September 30, 2010, down \$8,593,000, or 37%, from the high of \$23,020,000 at March 31, 2010. Improvement was made through the reduction in the level of non-accrual loans, loans past due 90 or more days and still accruing, and total delinquency. The Company continues to be diligent in its handling of nonperforming and other risk assets and has been able

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

to reduce the level of risk assets from a high of \$32,822,000 at March 31, 2010 to \$20,481,000 at September 30, 2010. Two large credits, totaling \$7.6 million, have been worked off the books since March 2010, which resulted in a \$2.0 million charge-off in the second quarter of 2010. The Company has experienced an increase in its ratio of total risk assets to total assets from 0.96% at December 31, 2009 to 1.39% at September 30, 2010. Increases in risk assets have been experienced by financial institutions both at a national and local level and the Company has seen increases as well. However, the ratio of total risk assets to total assets reached its high of 2.49% at March 31, 2010, and the Company has been able to continue to work through these problem assets.

Table of Contents

As of September 30, 2010, the Bank has 11 commercial relationships that are included in the nonaccrual loan balance of \$14,427,000. The largest of these relationships has total outstanding loan balances of \$8,598,000, consisting of advances under a line of credit to a company that finances interim construction financing for mortgages, residential manufactured, modular and site-built homes. As a result of the downturn in the housing market, the company experienced financial difficulties and declared bankruptcy in the first quarter of 2010. The Bank is in the process of pursuing a recovery of the amounts owed to it in the Bankruptcy Court proceedings as well as through other avenues of recovery that may be available to it including, without limitation, the guarantees provided by the principals and other potential claims against third parties.

A second relationship in nonaccrual status at September 30, 2010, with an outstanding loan balance of \$1,558,000, is to a professional service firm that provides services in the construction industry. Again, as result of the downturn in the economy, this firm has experienced financial difficulties and has not been able to meet their debt service requirements, resulting in the loan being placed in nonaccrual status. The Bank is in process of working out this relationship with the borrower, and will pursue recovery methods. The loan is secured by commercial real estate, the personal residence of a guarantor and the Company's assets.

A third relationship involves the financing of a commercial office building that has had difficulties in securing leases from tenants that will enable it to meet its debt service requirements. The Bank is working with the borrower through the lease up period, in order to allow sufficient time to increase the building's occupancy. This loan is secured by the commercial office building.

No additional relationships in nonaccrual status have balances in excess of \$1,000,000.

The Company believes through the combination of the collateral securing the loans, including personal guarantees and the reserves allocated for on these other nonaccrual loans totaling \$4,618,000, it has adequately provided for the potential losses incurred on these relationships as of September 30, 2010. However, as additional time passes on these relationships, additional information may become known that could result in additional reserve allocations, or, alternatively, it may be deemed that the reserve allocations exceed what is needed.

The increase in other real estate owned at September 30, 2010 compared to June 30, 2010 and December 31, 2009 is principally the result of the Bank taking title to two commercial properties in August 2010 with a cost basis of \$1,445,000. The first property, with a basis of \$647,000, was subsequently sold in October 2010 at a small gain. The second property, with a basis of \$798,000, is expected to be sold by December 31, 2010 with no loss anticipated.

At September 30, 2010, the total recorded investment in impaired loans was \$22,564,000, of which \$15,687,000 had specific allowances determined in accordance with generally accepted accounting principles and \$6,877,000 did not have specific allowances. The allowance for loan losses on these impaired loans amounted to \$5,360,000 at September 30, 2010. At December 31, 2009, the total recorded investment in impaired loans was \$31,700,000, of which \$15,503,000 had allowances determined in accordance with generally accepted accounting principles and \$16,197,000 had no specific allocations. The allowance for loan losses on these impaired loans amounted to \$4,801,000 at December 31, 2009.

Loans 30 to 89 days past due declined 16.3% from \$19.0 million at December 31, 2009, to \$15.9 million at September 30, 2010.

CAPITAL

The Company (on a consolidated basis) and the Bank are subject to various regulatory capital requirements administered by the federal banking agencies. Failure to meet minimum capital requirements can initiate certain mandatory and possibly additional discretionary actions by regulators that, if undertaken, could have a direct material effect on the Company's and Bank's financial statements. Under capital adequacy guidelines and the regulatory framework for prompt corrective action, the Company and the Bank must meet specific guidelines that involve quantitative measures of assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. Prompt corrective action provisions are not applicable to financial holding companies.

As of September 30, 2010, the most recent notification from the Federal Deposit Insurance Corporation categorized the Bank as well capitalized under the regulatory framework for prompt corrective action. To be categorized as well capitalized, an institution must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table. There are no conditions or events since the notification that management believes have changed the Bank's category. The Company and the Bank's actual capital ratios as of September 30, 2010 and December 31, 2009 are presented below.

Table of Contents

	Actual Ratio	Minimum Capital Ratio Requirement	Minimum to Be Well Capitalized Under Prompt Corrective Action Provisions
September 30, 2010			
Total capital to risk weighted assets			
Orrstown Financial Services, Inc.	14.9%	8.0%	n/a
Orrstown Bank	13.1%	8.0%	10%
Tier 1 capital to risk weighted assets			
Orrstown Financial Services, Inc.	13.7%	4.0%	n/a
Orrstown Bank	11.8%	4.0%	6%

Total capital to risk weighted assets			
Orrstown Financial Services, Inc.	11.4%	8.0%	n/a
Orrstown Bank	11.1%	8.0%	10%
Tier 1 capital to risk weighted assets			
Orrstown Financial Services, Inc.	10.1%	4.0%	n/a
Orrstown Bank	9.8%	4.0%	6%
Tier 1 capital to average assets			
Orrstown Financial Services, Inc.	7.6%	4.0%	n/a
Orrstown Bank	7.4%	4.0%	5%

On February 9, 2010, the Company filed a shelf registration statement on Form S-3, with the Securities and Exchange Commission, that provided the Company the ability to raise capital, from time to time, up to an aggregate of \$80 million, through the sale of stock, preferred stock, debt securities, warrants and other securities. The Company completed a public stock offering of 1,481,481 shares of common stock at a price of \$27.00 per share, for gross proceeds of approximately \$40,000,000 during the first quarter of 2010. Net proceeds after underwriting commissions and expenses were \$37,550,000. Although the Company recognized this offering would initially dilute earnings per share and reduce return on equity and tangible equity performance measurements, management felt it was necessary in order to support the continued growth of the Company. The additional capital allowed the Company to bolster its regulatory capital ratios during a time of an uncertain economy and the potential for increased government oversight and perhaps higher regulatory capital requirements. As noted above, the Company's capital ratios have increased significantly as a result of the stock offering. The Company feels with this additional capital, it positions itself well to weather the economy and take advantage of future opportunities that may arise. The Company has no current plans to issue additional shares of common stock.

In addition to the increase in shareholders' equity that resulted from the stock offering, total shareholders' equity increased by an additional \$15,462,000. This growth was principally the result of 2010 retained earnings of \$7,245,000, appreciation on the Company's securities available for sale and derivatives used for hedging of \$6,630,000, and issuance of shares in connection with share based compensation and dividend reinvestment plans totaling \$1,413,000. Offsetting these increases was the purchase of treasury shares totaling \$195,000.

LIQUIDITY

The primary function of asset/liability management is to assure adequate liquidity while minimizing interest rate risk. Liquidity management involves the ability to meet the cash flow requirements of customers who may be either depositors

Table of Contents

wanting to withdraw funds or borrowers needing assurance that sufficient funds will be available to meet their credit needs. Sources of liquidity include investment securities, loan and lease income and payments and increases in customer's deposit accounts. Additionally, Orrstown Bank is a Federal Home Loan Bank (FHLB) member and standard credit arrangements available to FHLB members provide increased liquidity. Recognizing the need for varied funding sources, we have established modest relationships using other nontraditional sources, as provided for in our contingency funding plan. We have tested those facilities and are comfortable with our relationships. Liquidity was primarily provided by operating activities and the sale and maturities of available for sale securities.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Market risk is defined as the exposure to interest rate risk, foreign currency exchange rate risk, commodity price risk, and other relevant market rate or price risks. For domestic banks, the majority of market risk is related to interest rate risk.

Interest rate sensitivity management requires the maintenance of an appropriate balance between interest sensitive assets and liabilities. Interest bearing assets and liabilities that are maturing or repricing should be adequately balanced to avoid fluctuating net interest margins and to enhance consistent growth of net interest income through periods of changing interest rates. The Company has consistently followed a strategy of pricing assets and liabilities according to prevailing market rates while largely matching maturities, within the guidelines of sound marketing and competitive practices. Rate sensitivity is measured by monthly gap analysis, quarterly rate shocks, and periodic simulation. The cumulative gap position at 12 months is negative at \$240 million at September 30, 2010 and the RSA/RSL cumulative ratio is 0.64%, versus 0.88% reported at December 31, 2009. The Company enjoys a closely balanced position that does not place it at undue risk under any interest rate scenario. Many of the deposit dollars in transaction accounts are discretionarily priced so management maintains significant pricing flexibility.

Item 4. Controls and Procedures

(a) Evaluation of disclosure controls and procedures:

The Company's Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the Company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) under the Securities Exchange Act of 1934, as amended) as of September 30, 2010. Based on such evaluation, such officers have concluded that, as of September 30, 2010, the Company's disclosure controls and procedures are effective in alerting them on a timely basis to material information relating to the Company (including its consolidated subsidiary) required to be included in the Company's periodic filings under the Exchange Act.

(b) Changes in internal controls:

The Company regularly assesses the adequacy of its internal control over financial reporting and enhances its controls in response to internal control assessments and internal and external audit and regulatory recommendations. There have not been any significant changes in the Company's internal control over financial reporting or in other factors that have materially affected, or are reasonably likely to materially affect, such controls during the quarter ended September 30, 2010.

PART II - OTHER INFORMATION

Item 1 - Legal Proceedings

The nature of Orrstown Financial Services, Inc.'s business generates a certain amount of litigation involving matters arising out of the ordinary course of business. In the opinion of management, there are no legal proceedings that might have a material effect on the results of operations, liquidity, or the financial position of the Company at this time.

Item 1A - Risk Factors

Except as disclosed herein, there have been no material changes from the risk factors as disclosed in the Annual Report on Form 10-K for the year ended December 31, 2009.

The Dodd-Frank Wall Street Reform and Consumer Protection Act may affect our financial condition, results of operations, liquidity and stock price.

Edgar Filing: ORRSTOWN FINANCIAL SERVICES INC - Form 10-Q

On July 21, 2010, the Dodd-Frank Wall Street Reform and Consumer Protection Act, or the Dodd-Frank Act, was signed into law. The Dodd-Frank Act includes provisions affecting large and small financial institutions, including several provisions that will profoundly affect how community banks and bank holding companies will be regulated in the future. Among other things, these provisions relax rules regarding interstate branching, allow financial institutions to pay interest on business checking accounts, change the scope of federal deposit insurance coverage and impose new

Table of Contents

capital requirements on bank holding companies. In addition, there is significant uncertainty about the full impact of the Dodd-Frank Act because many of its provisions require subsequent regulatory rule making.

The Dodd-Frank Act establishes the Bureau of Consumer Financial Protection as an independent entity within the Federal Reserve, which will be given authority to promulgate consumer protection regulations applicable to all entities offering financial services or products, including banks. Additionally, the Dodd-Frank Act includes a series of provisions covering mortgage loan origination standards affecting, among other things, originator compensation, minimum repayment standards and pre-payments.

The Dodd-Frank Act contains numerous other provisions affecting financial institutions of all types, many of which may have an impact on Orrstown's operating environment in substantial and unpredictable ways. Consequently, the Dodd-Frank Act is likely to affect our cost of doing business, it may limit or expand the activities in which Orrstown permissibly may engage and it may affect the competitive balance within Orrstown's industry and market areas.

The Dodd-Frank Act and the regulations to be adopted thereunder are expected to subject Orrstown and other financial institutions to additional restrictions, oversight and costs that may have an adverse impact on its business, financial condition, results of operations or the price of Orrstown common stock and Orrstown's ability to continue to conduct business consistent with historical practices.

Item 2 - Unregistered Sales of Equity Securities and Use of Proceeds

The table below summarizes the Company's repurchase of common equity securities during the quarter ended September 30, 2010:

	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Maximum Number of Shares that may Yet be Purchased Under the Plans or Programs (1)
7/1/10 through 7/31/10	0	0	0	52,110
8/1/10 through 8/31/10	8,209	21.17	8,209	43,901
9/1/10 through 9/30/10	900	22.91	900	193,001
Total	9,109	21.34	9,109	

(1) On April 27, 2006, Orrstown Financial Services, Inc. announced a Stock Repurchase Plan approving the purchase of up to 150,000 shares as conditions allow. The plan may be suspended at any time without prior notice and has no prescribed time limit in which to fill the authorized repurchase amount. On September 27, 2010, the Company announced the extension of the Stock Repurchase Plan, which allows it to purchase an additional 150,000 shares, as conditions allow. As of September 30, 2010, 106,999 shares have been purchased under the program.

The Company did not sell any unregistered securities during the quarter ended September 30, 2010.
