ST Ericsson reports second quarter 2011 financial results

Net sales \$385 million

Adjusted operating loss¹⁾ \$ 181 million

Revenue from new products grew sequentially
Geneva, Switzerland, July 20, 2011 - ST Ericsson, a joint venture of STMicroelectronics (NYSE:STM) and Ericsson (NASDAQ:ERIC), reported financial results for the second fiscal quarter ending July 2, 2011.

The lower second quarter revenue was substantially in line with our expectations, said Gilles Delfassy, president and CEO of ST Ericsson. In the quarter we saw legacy product sales decline again sequentially contributing to a wider operating loss; however, we saw revenue from new products grow over the prior quarter, reaching about 45 percent of total sales .

Our high speed Thor modem revenue grew more than 20 percent sequentially as new HSPA+ phones continued to ramp in the market. Also in the quarter we delivered first samples of our Thor M7400 LTE modem and conducted field trials on our NovaThor U8500 platform with several customers. We are very pleased with our increasing progress on the NovaThor U8500, although initial volumes will be somewhat lower due to reduced demand at certain customers.

We continue to be encouraged by the traction we have with industry leading customers on our new platforms; however, we are keenly aware of our current financial situation. As announced in June, we are taking additional actions aimed at reducing costs while not compromising the execution of our new products and delivery to customers.

While the present financial situation is very tough, we are on track to complete the transition to our new product portfolio in order to realize our aim of profitable leadership in this market.

Net Financial Position ²⁾	(427)	(195)	43

Additional financial information

The net financial position at the end of the second quarter was negative \$427 million. The sequential decrease was mainly due to the operating loss. During the second quarter the company sold trade receivables without recourse, of which \$179 million were outstanding at the end of the quarter, representing a sequential increase of \$31 million. Inventory decreased by \$3 million, reaching \$318 million at the end of the quarter.

Outlook

For the third quarter 2011, ST-Ericsson expects net sales to be about flat sequentially, reflecting increased revenue from new products offset by lower R&D services sales for advanced modem development and a continued decline in legacy product sales.
