Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)****Note 1. Basis of Presentation**

Our interim financial periods are based on a thirteen-week internal accounting calendar. In our opinion, the accompanying balance sheets, statements of operations, statements of cash flows and statements of comprehensive income (loss) include all adjustments, consisting mainly of normal recurring items, necessary for their fair presentation in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). The condensed consolidated financial statements include the accounts of Intermec and its subsidiaries. Intercompany transactions and balances have been eliminated. Preparing our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, expenses, and financial data included in the accompanying notes to the financial statements. Actual results and outcomes may differ from our estimates and assumptions.

Interim results are not necessarily indicative of results for a full year. The information included in this Form 10-Q should be read in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and the Consolidated Financial Statements and notes thereto included in our Annual Report on Form 10-K for the year ended December 31, 2011 (the 2011 Form 10-K).

Recently Adopted Accounting Pronouncements

Fair Value Measurement - In May 2011, the Financial Accounting Standards Board (FASB) issued guidance which generally provides a consistent definition of fair value and ensures that the fair value measurement and disclosure requirements are similar between U.S. GAAP and International Financial Reporting Standards. The guidance changes certain fair value measurement principles and enhances the disclosure requirements, particularly for Level 3 fair value measurements. This guidance was effective for interim and annual reporting periods beginning after December 15, 2011 and was applied on a prospective basis. The Company adopted the guidance on January 1, 2012, as required. There was no material impact on the Consolidated Financial Statements resulting from the adoption, see Note 3 Fair Value Measurements for additional disclosures related to this pronouncement.

Comprehensive Income - In June 2011, the FASB issued ASU No. 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, (ASU 2011-05). ASU 2011-05 eliminates the option to report other comprehensive income (loss) and its components in the statement of changes in equity and requires that all nonowner changes in stockholders' equity be presented in either a single continuous statement of comprehensive income or in two separate but consecutive statements. In December 2011, the FASB issued ASU 2011-12,

Comprehensive Income - Deferral of the Effective Date for Amendments to the Presentation of Reclassifications of Items Out of Accumulated Other Comprehensive Income in ASU 2011-05, to defer the effective date to present items that are reclassified out of accumulated other comprehensive income to net income alongside their respective components of net income and other comprehensive income. All other provisions of this update, which are to be applied retrospectively, are effective for fiscal years, and interim periods within those years, beginning after December 15, 2011. We adopted this guidance in the first quarter of 2012 and applied it retrospectively. To implement this standard we have added a separate statement labeled Condensed Consolidated Statement of Comprehensive Income (Loss).

Intangibles - Goodwill and Other - In September 2011, the FASB issued ASU No. 2011-08, *Intangibles - Goodwill and Other (Topic 350) (ASU 2011-08)*. The amendments in this update will allow an entity to first assess qualitative factors to determine whether it is necessary to perform the two-step quantitative goodwill impairment test. Under these amendments, an entity would not be required to calculate the fair value of a reporting unit unless the entity determines, based on a qualitative assessment, that it is more likely than not that its fair value is less than its carrying amount. The amendments include a number of events and circumstances for an entity to consider in conducting the qualitative assessment. This new guidance was adopted and applied in January 2012. The adoption of this accounting standard update did not have an impact on our financial position, results of operations, cash flows, or comprehensive income as it is intended to potentially simplify the assessment for goodwill impairment.

Reclassification

Certain reclassifications have been made to prior periods to conform to the present year presentation. Specifically, for the three and six months ended July 3, 2011 we have reclassified certain costs that were in cost of service revenues to cost of product revenues in the amount of \$0.8 and \$1.7 million, respectively. This reclassification has no impact on previously reported earnings from operations or net income. In addition, we have reclassified change in pension and other postretirement plans, net, previously reported in other operating activities into its own line item on the condensed consolidated statement of cash flows.

Offsetting of Financial Assets and Financial Liabilities

The Company has taken out policy loans from an insurance company on life insurance policies it owns and offsets these loans against the cash surrender values associated with the company owned life insurance policies. There is no intention to repay the loans prior to maturity or cancellation, and the company owned life insurance policies allow the right to offset the loan against the proceeds received on maturity or cancellation of the policies. The gross amount of the cash surrender values was \$22.9 and \$26.1 million at July 1, 2012 and December 31, 2011 respectively. The gross amount of the policy loans was \$21.4 million and \$16.0 million at July 1, 2012 and December 31, 2011 respectively. The net amounts of \$1.5 million and \$10.1 million at July 1, 2012 and December 31, 2011 respectively are included in our condensed consolidated balance sheets in Other assets, net.

Note 2: Revolving Credit Facility

Effective March 3, 2011, we amended our unsecured revolving credit facility with Wells Fargo Bank, National Association (the Bank) to convert the facility to a three-year, \$100 million, secured revolving credit facility, which originally matured on March 3, 2014 (the Revolving Facility). The unsecured revolving credit facility was initiated on September 27, 2007. On

Table of Contents**INTERMECC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

December 21, 2011, we amended the Revolving Facility to expand our borrowing capacity to \$150 million and extended the maturity date to December 31, 2014. On February 2, 2012, we amended the Revolving Facility to modify certain financial covenants relating to net income. Effective March 30, 2012, we amended the Revolving Facility to remove certain financial covenants, to add a new covenant related to minimum adjusted EBITDA and to add a new financial covenant for permitted acquisitions. We were in compliance with all financial and non-financial covenants of the Revolving Facility at July 1, 2012.

In addition to financing the acquisition of Voccollect in 2011, the Revolving Facility is used for general corporate purposes. The Revolving Facility includes financial covenants and is secured by pledges of equity in certain assets of our domestic subsidiaries and guaranties of payment obligations from certain of our domestic subsidiaries. At July 1, 2012, after considering the financial covenant requirements, we had borrowing capacity of \$7.3 million under the Revolving Facility with borrowings of \$85 million and \$1.5 million of letters of credit outstanding. The amount outstanding under the Revolving Facility bears interest at a variable rate equal to LIBOR plus a margin ranging from 1.25% to 1.75%. For the three and six months ended July 1, 2012, the weighted average interest rate on borrowed funds under the Revolving Facility was 2.23% and 2.26%, respectively.

At July 1, 2012, scheduled principal payments on long-term debt were as follows (in thousands):

	Total
2012-2013	\$
2014	85,000
Total principal payments	\$ 85,000

The key terms of the Revolving Facility are as follows following the most recent amendment:

Loans bear interest at a variable rate equal to (at our option) (i) LIBOR plus the applicable margin, which ranges from 1.25% to 1.75%, or (ii) the Bank's prime rate, less the applicable margin, which ranges from 0.25% to 1.00%. If an event of default occurs and is continuing, then the interest rate on all obligations under the Revolving Facility may be increased by 2.0% above the otherwise applicable rate, and the Bank may declare any outstanding obligations under the Revolving Facility to be immediately due and payable. In addition, the Bank may exercise its security interest in our equity interests in the assets of certain of our domestic subsidiaries, and it may call the guaranties of payment obligations made by certain of our domestic subsidiaries.

A fee ranging from 0.60% to 1.00% on the maximum amount available to be drawn under each letter of credit that is issued and outstanding under the Revolving Facility. The fee on the unused portion of the Revolving Facility ranges from 0.15% to 0.25%.

Certain of our domestic subsidiaries have guaranteed the Revolving Facility.

The Revolving Facility contains various restrictions and covenants, including restrictions on our ability and the ability of our subsidiaries to consolidate or merge, make acquisitions, create liens, incur additional indebtedness or dispose of assets.

The Revolving Facility includes covenants requiring us to meet certain minimum financial performance thresholds, including:

Edgar Filing: Intermecc, Inc. - Form 10-Q

A ratio of maximum funded debt to EBITDA allowed (as defined in the Revolving Facility) of not more than 2.5 to 1.

An Asset Coverage Ratio of not less than 1 to 1 for debt to margined assets. For this purpose, a certain percentage of our accounts receivable and inventory balances are included in margined assets.

The minimum adjusted EBITDA allowed (as defined in the Revolving Facility) for the trailing twelve months is \$25 million for the second quarter of 2012, \$35 million for the third quarter of 2012, and \$45 million for all subsequent quarters. We expect to be in compliance with our covenants for the next twelve months.

Table of Contents**INTERMECC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)****Note 3. Fair Value Measurements***Assets and Liabilities Measured at Fair Value on a Recurring Basis*

Our financial assets and liabilities subject to fair value measurement provisions as of July 1, 2012 comprised the following (in thousands):

	Level 1	Level 2	Level 3	Fair Value at July 1, 2012
Money market funds	\$ 39,561	\$	\$	\$ 39,561
Stock	181			181
Derivative instruments assets		1,317		1,317
Total assets at fair value	\$ 39,742	\$ 1,317	\$	\$ 41,059

	Level 1	Level 2	Level 3	Fair Value at July 1, 2012
Derivative instruments liabilities	\$	\$ (575)	\$	\$ (575)
Total liabilities at fair value	\$	\$ (575)	\$	\$ (575)

Our financial assets and liabilities subject to fair value measurement provisions as of December 31, 2011 comprised the following (in thousands):

	Level 1	Level 2	Level 3	Fair Value at December 31, 2011
Money market funds	\$ 15,275	\$	\$	\$ 15,275
Certificates of deposit		3,555		3,555
Stock	170			170
Derivative instruments assets		985		985
Total assets at fair value	\$ 15,445	\$ 4,540	\$	\$ 19,985

	Level 1	Level 2	Level 3	Fair Value at December 31, 2011
Derivative instruments liabilities	\$	\$ (1,801)	\$	\$ (1,801)
Total liabilities at fair value	\$	\$ (1,801)	\$	\$ (1,801)

Our Level 1 financial instrument values are based on quoted market prices for identical assets in active markets. Our Level 2 financial instrument values are based on quoted prices in active markets for similar assets, which we use to value our certificates of deposit, or comparable sales, such as quoted market rates for similar contracts. Specifically, we obtain current pricing from the issuing bank for identical

Edgar Filing: Intermecc, Inc. - Form 10-Q

items purchased on the last business day of our reporting period. Level 3 financial instrument values refer to fair values using unobservable inputs that are not corroborated by market data.

There were no transfers between Level 1 and Level 2 assets and liabilities in the three and six months ended July 1, 2012 and July 3, 2011.

Fair Value of Financial Instruments

The estimated fair values of cash and cash equivalents, accounts receivable, accounts payable, accrued expenses, and payroll and related expenses at July 1, 2012 and December 31, 2011, approximate their carrying values due to their short-term nature. The fair value of long-term debt at July 1, 2012 approximates its carrying value.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis

All other nonfinancial assets and liabilities measured at fair value in the financial statements on a nonrecurring basis are subject to fair value measurements and disclosures. Nonfinancial assets and liabilities included in our condensed consolidated balance sheets and measured on a nonrecurring basis consist of goodwill and long-lived assets, including other acquired intangibles. Goodwill and long-lived assets are measured at fair value to test for and measure impairment, if any, at least annually for goodwill or when necessary for both goodwill and long-lived assets. See Note 16 *Goodwill and other Long-Lived Assets* for details of our impairment analysis.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

The following fair value hierarchy table presents information about our goodwill assets that were measured at fair value on a non-recurring basis at July 1, 2012 (in thousands):

	Level 1	Level 2	Level 3	Fair Value at July 1, 2012
Goodwill				
Voice solutions supply chain reporting unit	\$	\$	\$ 89,993	\$ 89,993
Voice solutions healthcare reporting unit			8,655	8,655
Intermec global solutions reporting unit			3,348	3,348
Total goodwill at fair value	\$	\$	\$ 101,996	\$ 101,996

The following fair value hierarchy table presents information about our goodwill assets that were measured at fair value on a non-recurring basis at December 31, 2011(in thousands):

	Level 1	Level 2	Level 3	Fair Value at December 31, 2011
Goodwill				
Voice solutions supply chain reporting unit	\$	\$	\$ 130,682	\$ 130,682
Voice solutions healthcare reporting unit			9,480	9,480
Intermec global solutions reporting unit			3,348	3,348
Total goodwill at fair value	\$	\$	\$ 143,510	\$ 143,510

A goodwill impairment was recorded in the amount of \$26.6 and \$41.5 million for the three and six months ended July 1, 2012, respectively, against the Voice Solutions Supply Chain (VSC) and Voice Solutions Healthcare (VHS) reporting units.

The following table presents qualitative information with respect to Level 3 fair value measurements for assets and liabilities measured at fair value on a non-recurring basis at July 1, 2012:

Reporting Unit	Fair Value	Valuation Technique(s)	Unobservable Input(s)
Voice Solutions Supply Chain			
Goodwill	\$ 89,993	Income Approach	Financial Forecast Terminal Growth Rate Weighted Average Cost of Capital Expected Cash Flow
		Market Approach	Public Company Multiples

Goodwill	\$ 8,655	Income Approach	Financial Forecast Terminal Growth Rate Weighted Average Cost of Capital
Intermec Global Solutions			
Goodwill	\$ 3,348	Income Approach	Financial Forecast Terminal Growth Rate Weighted Average Cost of Capital

Total Goodwill	\$ 101,996
----------------	------------

Note 4. Derivative Instruments

Due to our global operations, we are exposed to foreign currency exchange rate fluctuations in the normal course of our business. Our treasury policies provide for risk mitigation of the effects of certain foreign currency exposures through the purchase of foreign exchange forward contracts. Our policy prohibits speculation in financial instruments for profit on the exchange rate price fluctuation. We enter into foreign exchange forward contracts primarily to economically hedge the impact of fluctuations of foreign exchange arising from intercompany inventory sales made to our subsidiaries that are denominated primarily in

Table of Contents**INTERMECC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Euros or British Pounds, customer receivables of our foreign subsidiaries denominated primarily in U.S. Dollars and Euros and intercompany loans denominated in Euros, Swedish Krona, Norwegian Kroner, Danish Krone and Canadian Dollar. Our foreign exchange forward contracts are not designated as hedging instruments for accounting purposes; accordingly, we record these contracts at fair value on our consolidated balance sheets, with changes in fair value recognized in earnings in the period of the change. The aggregate notional amounts of the forward contracts we held for foreign currencies were \$129.0 million as of July 1, 2012. Principal currencies we economically hedged include the Euro, British Pound, Brazilian Real, Canadian Dollar, Mexican Peso, Singapore Dollar, Swedish Krona, Norwegian Kroner and Danish Krone. These contracts do not contain any credit-risk-related contingent features.

We attempt to manage the counterparty risk associated with these foreign exchange forward contracts by limiting transactions to counterparties with which we have an established banking relationship. In addition, these contracts generally settle in approximately 30 days. See Note 3, *Fair Value Measurements*, for information on the fair value of these contracts.

The net loss (gain) resulting from these contracts recorded in selling, general and administrative expense was approximately \$2.4 and \$1.5 million for the three and six months ended July 1, 2012, and \$0.5 and \$1.1 million for the three and six months ended July 3, 2011, respectively. We recorded a net (liability) asset of \$0.7 and \$(0.8) million in other current assets or accounts payable and accrued expenses as of ended July 1, 2012 and December 31, 2011, respectively.

Note 5. Accounts Receivable, Net

Accounts receivable, net, consisted of the following (in thousands):

	July 1, 2012	December 31, 2011
Accounts receivable, gross	\$ 138,132	\$ 146,682
Less:		
Allowance for sales returns	4,185	4,423
Allowance for doubtful accounts	1,775	2,522
Accounts receivable, net	\$ 132,172	\$ 139,737

Our allowance for sales returns includes estimated customer returns and other incentives that are recorded as a reduction of sales. Price exceptions globally are recorded directly to the customers' accounts instead of an allowance to gross receivables. One customer, ScanSource, our largest distributor, accounted for 26% and 19% of our accounts receivable as of July 1, 2012 and December 31, 2011, respectively.

One distributor, ScanSource Inc., accounted for more than 10% of our revenues. Total sales to this distributor were \$41.1 and \$71.9 million for the three months and six months ended July 1, 2012, respectively, and \$28.1 and \$68.7 million for the three and six months ended July 3, 2011, respectively.

Note 6. Inventories

Inventories consisted of the following (in thousands):

	July 1, 2012	December 31, 2011
Raw materials	\$ 27,739	\$ 30,485
Service parts	14,651	13,412
Work in process	550	316

Edgar Filing: Intermec, Inc. - Form 10-Q

Finished goods	55,004	59,409
Inventories	\$ 97,944	\$ 103,622

In addition to the inventories described above, we have service parts inventories totaling \$4.3 and \$4.3 million at July 1, 2012 and December 31, 2011, respectively, which are included in our condensed consolidated balance sheets in Other assets, net.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)****Note 7. Intangibles**

The following table presents the gross carrying amount and accumulated amortization of intangible assets as of July 1, 2012 (in thousands):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Useful Life
Developed technology	\$ 40,200	\$ 16,053	\$ 24,147	5 years
In-process research and development	1,900	138	1,762	7 years
Customer relationships	17,600	1,948	15,652	11 years
Trademarks	5,200	519	4,681	10 years
Lease agreements	2,600	463	2,137	8 years
Total acquired intangible assets from Vocollect acquisition:	67,500	19,121	48,379	
Other intangibles	14,459	10,228	4,231	5 years
Total	\$ 81,959	\$ 29,349	\$ 52,610	

The following table presents the gross carrying amount and accumulated amortization of intangible assets as of December 31, 2011 (in thousands):

	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount	Weighted Average Useful Life
Developed technology	\$ 40,200	\$ 9,416	\$ 30,784	5 years
In-process research and development	1,900		1,900	7 years
Customer relationships	17,600	623	16,977	11 years
Trademarks	5,200	303	4,897	10 years
Lease agreements	2,600	245	2,355	8 years
Total acquired intangible assets from Vocollect acquisition:	67,500	10,587	56,913	
Other intangibles	14,459	9,376	5,083	5 years
Total	\$ 81,959	\$ 19,963	\$ 61,996	

Total amortization expense on intangibles for the three and six months ended July 1, 2012 was \$4.7 and \$9.4 million, respectively, and \$3.3 and \$4.3 million, for the three and six months ended July 3, 2011, respectively. Estimated future amortization expense for intangible assets for the next five years is as follows (in thousands):

Year

Amount

Edgar Filing: Intermec, Inc. - Form 10-Q

2012	\$ 18,558
2013	16,367
2014	8,865
2015	6,005
2016	3,482

Note 8. Provision for Income Taxes

In the second quarter, we recorded a tax provision of \$1.7 million on foreign earnings and no tax benefit for earnings in the United States, Singapore and Japan due to losses in those jurisdictions. We also provided \$1.4 million for deferred taxes on projected future repatriation from certain foreign subsidiaries which are not permanently reinvested. The tax provision for the three months ended April 1, 2012 included a net \$206.9 million non-cash charge to record a valuation allowance against our U.S. deferred tax assets.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Currently, we record valuation allowances in the following jurisdictions: United States, Singapore and Japan. Under GAAP, a valuation allowance against our deferred tax assets is appropriate if based on the available evidence, it is more likely than not (defined as a likelihood of more than 50%) that the value of such assets will not be realized in the future. The valuation of deferred tax assets requires judgment in assessing a number of factors, including the likely future tax consequences of events we expect to recognize in our financial statements and tax returns, as well as our historical performance. Key factors we considered include our results for the quarter ended April 1, 2012; we recorded a pre-tax loss and significantly underperformed relative to our forecast. We also revised our forecast downward in the first quarter of 2012 for our U.S. and global operations for the remainder of 2012. We concluded that it was more likely than not that the value of such assets would not be realized, and we recorded a valuation allowance for our U.S. entities representing the full balance of these assets.

A sustained period of profitability in our U.S. operations is required before we would change our judgment regarding the need for a full valuation allowance against our U.S. deferred tax assets. In the event that we determine in the future that we expect to benefit from our deferred income tax assets in excess of the net balance at that time, we will make an adjustment to the deferred tax asset valuation allowance. This will reduce the provision for income taxes in that period. Until such time, we will offset U.S. profits against our deferred tax assets and will reduce the overall level of deferred tax assets subject to valuation allowance as a result.

For the jurisdictions where we did not record a valuation allowance, our tax provision includes an estimated annual effective tax rate from continuing operations of approximately 31%. Our effective tax rate from continuing operations in those jurisdictions is lower than the U.S. statutory rate of 35% due primarily to lower tax rates and tax incentives in those jurisdictions.

Note 9. Shares Used in Computing Earnings (Loss) per Share

Basic earnings (loss) per share are calculated using the weighted average number of common shares issued and outstanding for the applicable period. Diluted loss per share is computed using basic weighted average shares issued and outstanding plus the dilutive effect of unvested restricted stock and outstanding stock options using the treasury stock method.

	Three Months Ended		Six Months Ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Weighted average shares - basic	60,251,466	59,784,479	60,140,033	60,070,394
Dilutive effect of unvested restricted shares and stock options				
Weighted average shares - diluted	60,251,466	59,784,479	60,140,033	60,070,394

Our employees and directors held options to purchase 3,950,272 and 3,844,272 shares of our common stock for the three and six months ended July 1, 2012, respectively, and 3,451,713 and 3,078,769 shares of our common stock for the three and six months ended July 3, 2011, respectively, that were not included in weighted average shares diluted calculation because they were anti-dilutive to the diluted loss per share computation. These options would become dilutive in future periods if the average market price of our common stock exceeds the exercise price of the outstanding options and we report net earnings.

Note 10. Stock-Based Compensation

A summary of stock-based compensation expense related to director and employee stock options, Restricted Stock Units (RSU), Performance Stock Units (PSU), and Employee Stock Purchase Plan (ESPP) for the three and six months ended July 1, 2012 and July 3, 2011 is as follows (in thousands):

Three Months Ended

Six Months Ended

Edgar Filing: Intermecc, Inc. - Form 10-Q

	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Cost of revenue	\$ 63	\$ 63	\$ 126	\$ 126
Selling, general and administrative	421	2,152	2,999	4,299
Total	\$ 484	\$ 2,215	\$ 3,125	\$ 4,425

Stock compensation expense for the three and six months ended July 1, 2012 was reduced by \$1.9 million primarily due to forfeitures related to the departure of our former CEO.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

For the three and six months ended July 1, 2012, we granted 572,855 and 586,855 options, respectively, to employees with a weighted-average grant-date fair value of \$2.71 and \$2.72 per option, respectively, which will vest annually in substantially equal quantities over three years from the date of grant.

Note 11. Segment Reporting

Our chief operating decision maker is our Chief Executive Officer. Based on the evaluation of our financial information our reportable segments are comprised of Intermec-branded products, Intermec-branded services and Voice solutions. The Intermec-branded product segment generates revenue from the design, development, manufacture, sale and resale of mobile computing products, bar code scanners, wired and wireless bar code printers and label media products, and RFID products and license fees. Our Intermec-branded service segment generates revenue from managed services, customer support, product maintenance and professional services related to products and systems integration. The Voice solutions segment is comprised of voice data, collection terminals and professional services related to these products. Our statements of operations separately disclose revenues and costs related to our products and services on a consolidated basis.

Our chief operating decision maker evaluates revenue performance of product lines, both domestically and internationally. However, operating, strategic and resource allocation decisions are based primarily on the overall performance of our operating segments. The accounting policies of our three reportable segments are the same as those used to prepare our consolidated financial statements. Performance and resource allocation are primarily measured by sales and standard gross profit. All other earnings, costs and expenses are aggregated and reported on a consolidated basis. It is not practicable to segregate total assets by segment. Total assets at July 1, 2012 and December 31, 2011 were \$566.6 and \$869.3 million, respectively.

The following table sets forth our revenues and gross profit by reportable segment (in thousands):

	Three Months Ended		Six Months Ended	
	July 1, 2012	July 3, 2011	July 1, 2012	July 3, 2011
Revenues:				
Intermec-branded products	\$ 135,618	\$ 153,329	\$ 252,951	\$ 287,183
Intermec-branded services	34,747	37,301	69,696	72,162
Voice solutions	30,586	30,452	57,982	40,255
Total	\$ 200,951	\$ 221,082	380,629	\$ 399,600
Gross profit:

Additional provision	3,060	7,217
Ending balance	\$ 5,268	\$ 4,853

Note 13. Commitments and Contingencies

We have entered into a variety of agreements with third parties that include indemnification clauses, both in the ordinary course of business and in connection with our divestitures of certain product lines. These clauses require us to compensate these third parties for certain liabilities and damages that may be incurred by them. Fair value of guarantees is required to be recorded as a liability. We do not believe that we have any significant exposure related to such guarantees and therefore have not recorded a liability as of July 1, 2012 or December 31, 2011. We have not made any significant indemnification payments as a result of these clauses.

In the three and six months ended July 1, 2012, we recorded \$0.5 and \$1.9 million in engineering fees related to take or pay purchase commitment agreements. We expect to make these payments by the end of 2012.

We currently, and from time to time, are subject to disputes, claims and lawsuits arising in the ordinary course of business. With the exception of certain cases involving intellectual property described below, the external legal costs incurred in these matters are expensed. These matters include claims by third parties against us for amounts allegedly owed to them as well as counterclaims against us in cases where we have made claims against third parties. Resolution of these disputes could result in the write down or write off of accounts receivable or the payment of damages. The ultimate resolution of such matters is inherently subject to uncertainty. An adverse outcome in certain of these matters could result in a material charge in the period in which the matter is resolved. However, we currently do not expect the ultimate resolution of pending proceedings and disputes to have a material effect on our business, financial condition, results of operations or liquidity. In the second quarter of 2012, we settled a pending lawsuit against us in the amount of \$1.2 million. This amount is recorded in Selling, general and administrative expenses on our condensed consolidated statement of operations.

One of our pending lawsuits involves the defense of our patents; the external legal costs incurred in this matter are capitalized. We capitalize external legal costs incurred in the defense of our patents when we believe that there is an evident increase in the value of the patent and that the successful outcome of the legal action is probable. During the course of any legal action, the court where the case is pending makes decisions and issues rulings of various kinds, which may be favorable or unfavorable. We monitor developments in the legal action, the legal costs incurred and the anticipated outcome of the legal action, and assess the likelihood of a successful outcome based on the entire action. If changes in the anticipated outcome occur that reduce the likelihood of a successful outcome to less than probable, the capitalized costs would be charged to expense in the period in which the change is determined. As of July 1, 2012 and December 31, 2011, \$7.5 and \$7.4 million of legal patent costs have been capitalized, respectively. All of these amounts relate to the case Alien Technologies Corporation v. Intermecc, Inc., et al., Civil Action No. 3:06-cv-0051, United States District Court for the District of North Dakota, Southeastern Division (the Alien Case). The capitalized legal patent costs are recorded in other assets on our condensed consolidated balance sheets.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)****Note 14. Pension and Other Postretirement Benefits Liabilities**

The components of net pension and postretirement periodic benefit cost (income) for the three and six months ended July 1, 2012 and July 3, 2011, were as follows (in thousands):

	U.S. Defined Benefit Plans		Non U.S. Defined Benefit Plans		Other Postretirement Benefit Plans	
	2012	2011	2012	2011	2012	2011
Three Months Ended July 1, 2012, and July 3, 2011:						
Interest cost	\$ 2,983	\$ 3,029	\$ 495	\$ 528	\$ 34	\$ 40
Expected return on plan assets	(2,592)	(2,689)	(532)	(517)		
Amortization and deferrals:						
Transition asset			(34)	(33)		
Actuarial loss	888	563	163	163		
Prior service cost					(41)	(40)
Net pension and postretirement periodic benefit cost (income)	\$ 1,279	\$ 903	\$ 92	\$ 141	\$ (7)	\$

	U.S. Defined Benefit Plans		Non U.S. Defined Benefit Plans		Other Postretirement Benefit Plans	
	2012	2011	2012	2011	2012	2011
Six Months Ended July 1, 2012, and July 3, 2011:						
Interest cost	\$ 5,965	\$ 6,059	\$ 994	\$ 1,057	\$ 69	\$ 80
Expected return on plan assets	(5,183)	(5,377)	(1,069)	(1,035)		
Amortization and deferrals:						
Transition asset			(68)	(66)		
Actuarial loss	1,776	1,126	328	326		
Prior service cost					(83)	(79)
Net pension and postretirement periodic benefit cost (income)	\$ 2,558	\$ 1,808	\$ 185	\$ 282	\$ (14)	\$ 1

Our pension and other postretirement benefit plan contributions for the three and six months ended July 1, 2012, were as follows (in thousands):

	Three Months Ended July 1, 2012	Six Months Ended July 1, 2012
U.S. defined benefit postretirement benefit plans	\$ 2,122	3,117
Matching contributions to 401(k) plan	1,087	2,322
Foreign pension plans	956	1,770
Total	\$ 4,165	7,209

Benefits paid pertaining to our other postretirement benefit plans were not material for the three and six months ended July 1, 2012.

Edgar Filing: Intermecc, Inc. - Form 10-Q

We expect to contribute an additional \$10.7 million to these plans during the remainder of 2012, including \$4.8 million of contributions to our U.S. pension plan, \$2.3 million of benefit payments for our unfunded U.S. defined benefit plans, \$1.9 million in matching contributions to our 401(k) plan, and \$1.7 million in contributions to our foreign pension plans.

Note 15. Acquisitions

On March 3, 2011, we completed our acquisition of Vocollect Inc. by acquiring all of the outstanding shares of capital stock of Vocollect and all in-the-money options to purchase shares of common stock of Vocollect for an aggregate purchase price of approximately \$197 million in cash, net of cash acquired. Vocollect provides voice-centric solutions for mobile workers in distribution, warehouse and healthcare environments worldwide through design, manufacture and sale of voice data collection terminals and related software. This acquisition is part of our strategy to expand our warehouse and mobility solutions.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

We have included the financial results of Vocollect in our condensed consolidated financial statements from the date of acquisition. Vocollect acquisition and related costs of approximately \$0.3 and \$5.2 million were recorded as an expense for the three and six months ended July 3, 2011, respectively, and are included in the total acquisition costs of \$5.2 million in our condensed consolidated statement of operations. Acquisition related costs include direct integration costs, transaction fees and professional services.

The allocation of the purchase price to Vocollect's assets acquired and liabilities assumed, net of cash acquired, is as follows (in thousands):

	At Acquisition March 3, 2011 (Adjusted)
Accounts receivable (gross contractual receivables total of \$21,461)	\$ 20,569
Inventories	7,520
Net deferred tax assets	7,880
Other current assets	7,353
Goodwill (including \$7.9 million for assembled workforce)	140,162
Intangible assets	67,500
Property, plant and equipment	9,123
Other assets	137
Accounts payable	(6,818)
Payroll and related expenses	(8,812)
Deferred revenue	(10,936)
Accrued expenses	(8,739)
Deferred tax liabilities	(22,570)
Long-term deferred revenue	(4,282)
Other long-term liabilities	(1,370)
Total net assets acquired	\$ 196,717

Goodwill recognized is attributable primarily to the expected synergies and the assembled workforce of Vocollect and is not deductible for income tax purposes. Goodwill associated with the Vocollect acquisition has been allocated to the Voice solutions reportable segment.

Unaudited Pro Forma Financial Information

The unaudited pro forma financial information in the table below summarizes the combined results of operations for Intermecc and Vocollect as though the acquisition occurred at the beginning of fiscal 2011. The pro forma financial information presented below is for informational purposes only and is not indicative of the results of operations that would have been achieved if the acquisitions and any borrowings undertaken to finance the acquisition had taken place at the beginning of fiscal 2011.

(in thousands)	Three Months Ended July 3, 2011	Six Months Ended July 3, 2011
Total revenues	\$ 221,082	\$ 417,911
Net loss	(3,796)	(7,006)

Note 16. Goodwill and Other Long-Lived Assets*Goodwill*

Edgar Filing: Intermec, Inc. - Form 10-Q

We assign goodwill to our reporting units based on the expected benefit from the growth and synergies arising from each acquisition. We have three reportable segments: Intermec-branded products, Intermec-branded services and Voice solutions.

Table of Contents**INTERMEC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

Intermec-branded services and Voice solutions each comprise two reporting units. Intermec-branded services are divided into: Core Service and Intermec Global Solutions (IGS). Voice solutions contains the Supply Chain (VSC) and Healthcare (VHS) reporting units.

The following table represents changes in goodwill (amounts in thousands):

Reportable Segment	Reporting Unit	Goodwill balance at 12/31/2011	Goodwill impairment	Goodwill balance at 7/1/2012
Intermec-branded services:	Intermec Global Solutions	\$ 3,348	\$	\$ 3,348
Voice solutions:	Supply chain	130,682	(40,689)	89,993
	Healthcare	9,480	(825)	8,655
	Total:	\$ 143,510	\$ (41,514)	\$ 101,996

Goodwill impairment charges of \$26.6 and \$41.5 million were recognized during the three and six months ended July 1, 2012, respectively. There were no goodwill impairment charges for the similar periods in 2011.

Q1 2012 goodwill impairment analysis

During the first quarter of 2012, two events occurred that triggered an analysis of the carrying value of goodwill and resulted in the estimated write down of goodwill of \$14.9 million. Specifically, operating income was less than our forecast, primarily due to an \$19 million loss on operations in the first quarter principally in the Intermec-branded products and services segments. In addition, our financial results negatively impacted the price per share of Intermec stock, causing the market capitalization of the Company to be significantly below its net book value. These triggering events were indicators that it was more likely than not the fair value of the Company's goodwill was less than its book value.

We prepared a Step 1 goodwill impairment analysis to determine the fair values of all three reporting units with goodwill (Intermec Global Solutions, Healthcare, and Supply Chain). To calculate the fair values we used the discounted cash flow method and market approach. We made significant assumptions and estimates about the extent and timing of future cash flows, growth rates, and discount rates that represent unobservable inputs into our valuation methodologies used to calculate fair value. The cash flows were estimated over a significant future period of time, which made those estimates and assumptions subject to a high degree of uncertainty. Where available and as appropriate, comparative market multiples and the quoted market price of our common stock were used to corroborate the results of the discounted cash flow method and market approach. Assumptions used in our analysis that have the most significant effect on the estimated fair values of our reporting units include:

Our estimated weighted-average cost of capital (WACC); and

Our estimated long-term growth

Market multiples

Once we had determined our assumptions, we calculated the fair value of each reporting unit and compared it to the carrying value of the reporting unit. After performing our Step 1 analysis for the reporting units, we determined that the carrying value of the Supply Chain reporting unit exceeded its fair value by \$14.9 million and recognized an estimated impairment charge in the first quarter. Due to the timing and complexity of this analysis, Step 2 of the impairment test was substantially completed in the second quarter of 2012. After performing that test

Edgar Filing: Intermecc, Inc. - Form 10-Q

we determined we had an additional goodwill impairment of \$25.8 million associated with our Supply Chain reporting unit. The additional impairment was the result of an increase in the fair value of developed and in process technology intangible assets within the Supply Chain reporting unit. The increase in the intangible assets reduced the implied fair value of the goodwill, and we recognized a \$40.7 million cumulative impairment of the Supply Chain reporting unit goodwill for the six months ended July 1, 2012.

Determining the fair value of goodwill for the Supply Chain reporting unit for Step 2 was judgmental in nature and involved the use of significant estimates and assumptions to calculate a hypothetical fair value of the assets and liabilities within the reporting unit. Our analysis utilized the income approach to calculate the implied fair value of goodwill of the Supply Chain reporting unit. The key inputs we used in the income approach included our forecast of revenue and expenses, a migration curve of developed and in-process technology, tax rate, discount rates, customer retention rates, useful lives, and contributory charge rates. These key inputs, for the income approach, are classified as Level 3 within the fair value hierarchy; see Note 3 *Fair Value Measurements*.

Table of Contents**INTERMECC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)***Q2 2012 goodwill impairment analysis*

During the three months ended July 1, 2012, we changed the composition of key senior management at the reporting units and also changed our Chief Executive Officer. Additionally, we evaluated certain market trends and specific changes in our marketplace including, macro and micro economic conditions, expected government spending and industry data. As a result of the changes and evaluations, a review was performed over all areas in which we engage in business. Upon conclusion of the review, key operational and investment decisions were made which resulted in changes in the amount and timing of receipts and expenditures. Specifically, forecasts of revenue, research and development costs, capital expenditures, and other inputs to operations were revised, and the result was reduced cash flow forecasts across the three reporting units with goodwill. Consequently, a triggering event occurred to evaluate impairment of goodwill, specific to facts and circumstances during the three months ended July 1, 2012.

We prepared a Step 1 goodwill impairment analysis to determine the fair values of all three reporting units with goodwill (Intermecc Global Solutions, Healthcare, and Supply Chain). To calculate the fair values we used the discounted cash flow method and market approach. We utilized the same methods listed above in *Q1 2012 goodwill impairment analysis* to perform our Step 1 analysis for the three months ended July 1, 2012. Once we had determined our assumptions we calculated the fair value of each reporting unit and compared it to the carrying value of the reporting unit.

After performing our Step 1 analysis, for the reporting units, we determined that the carrying value of the Healthcare reporting unit exceeded its fair value, so we then performed a Step 2 analysis. Based on our preliminary Step 2 analysis we determined we had an estimated goodwill impairment of \$0.8 million associated with our Healthcare reporting unit. This impairment was primarily the result of a reduction in our long term business forecast specifically related to expected government spending in the skilled nursing area, the likely impact on capital investments in that market and the timing of the launch of new products for our Healthcare reporting unit. Due to the timing and complexity of this Step 2 analysis, we will finalize it in the third quarter of 2012 and the impairment amount may change at that time.

Determining the fair value of goodwill for the Healthcare reporting unit for Step 2 is judgmental in nature and involves the use of significant estimates and assumptions to perform a hypothetical fair value of the assets and liabilities within the reporting unit. Our analysis utilized the income approach to calculate the implied fair value of goodwill of the Healthcare reporting unit. The key inputs we used in the income approach included our forecast of revenue and expenses, a migration curve of developed and new technology, tax rate, discount rates, customer retention rates, useful lives, and contributory charge rates. These key inputs, for the income approach, are classified as Level 3 within the fair value hierarchy. See Note 3 Fair Value Measurements to our Condensed Consolidated Financial Statements for further detail.

Future goodwill impairments that may be material could be recognized should the recent economic uncertainty continue, our equity price declines on a sustained basis, global economies enter in another recession, or industry growth stagnates further. Our fair value estimates for event-driven impairment tests assume the achievement of future financial results contemplated in our forecasted cash flows and there can be no assurance that we will realize that value. The estimates and assumptions used are subject to significant uncertainties, many of which are beyond our control, and there is no assurance that anticipated financial results will be achieved.

Valuation of Long-Lived Assets

Long-lived assets, such as property, plant, and equipment, and intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Recoverability of asset groups to be held and used is measured by a comparison of the carrying amount of an asset group to estimated undiscounted future cash flows expected to be generated by the asset group. If the carrying amount of an asset group exceeds its estimated future cash flows, an impairment charge is recognized in our statement of operations and as a reduction to the asset group to the extent that the fair market value of the asset group is less than its carrying value. Due to the same circumstances that required the interim goodwill impairment test above, we evaluated our long lived assets for impairment for the quarters ended April 1, 2012 and July 1, 2012. We determined that the carrying amount of our long-lived assets did not exceed their estimated undiscounted future cash flows, and thus our long-lived assets are not impaired as of April 1, 2012 and July 1, 2012.

Note 17. Restructuring

Edgar Filing: Intermec, Inc. - Form 10-Q

After revising our 2012 business forecast to reflect current economic and other expectations, we committed to a business restructuring plan on June 12, 2012 that was intended to better align our cost structure with our current and anticipated needs by lowering costs primarily in North America and Europe. These reductions were primarily intended to lower our service and supply chain overhead and general and administrative support costs, with lesser impacts to Research and Development and Sales and Marketing. Under the business restructuring plan, we are reducing our work force primarily in the United States and Europe by approximately 160 employees, which represent approximately 7% of our current total global work force. We implemented this restructuring plan beginning in June of 2012 and expect to complete it over the remainder of fiscal year 2012.

Table of Contents**INTERMECC, INC.****NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (unaudited)**

The total restructuring costs for this plan are expected to be \$6.4 million, including employee termination costs of \$5.9 million and \$0.5 million of other associated costs. We recorded \$5.9 million of these charges in the second quarter of 2012. We expect to record the majority of the remaining charge throughout 2012. We anticipate that substantially all of the severance-related and periodic other associated costs will be cash expenditures. These costs are recorded on our condensed consolidated statement of operations in restructuring charges.

The reconciliation of accrued restructuring charges as of July 1, 2012 is summarized in the table below (in millions):

	Accrued Employee Termination Costs per Contract	Accrued Other Costs	Total Accrued Restructuring Charges
Balance at December 31, 2011	\$ 1.0	\$ 1.2	\$ 2.2
Restructuring charges for 2012 plan	5.9		5.9
Utilization of restructuring plans	(1.1)	(0.2)	(1.3)
Reversal of prior year restructuring charges	(0.3)		(0.3)
Balance at July 1, 2012	\$ 5.5	\$ 1.0	\$ 6.5

Note 18. Accumulated Other Comprehensive Loss

At July 1, 2012 and December 31, 2011, accumulated other comprehensive income comprised the following (in thousands):

	July 1, 2012	December 31, 2011
Foreign currency translation adjustment	\$ (6,563)	\$ (4,546)
Unamortized benefit plan costs	(78,861)	(74,623)
Unrealized loss on investments	(317)	(308)
Accumulated other comprehensive loss	\$ (85,741)	\$ (79,477)

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****FORWARD-LOOKING STATEMENTS AND RISK FACTORS; SAFE HARBOR**

Statements made in this filing and any related statements that express Intermec's or our management's intentions, hopes, indications, beliefs, expectations, guidance, estimates, forecasts or predictions of the future constitute forward-looking statements, as defined by the Private Securities Litigation Reform Act of 1995, and relate to matters that are not historical facts. They include, without limitation statements about: our view of general economic and market conditions; our revenue, expense, earnings, tax attributes or financial outlook for the current or any other period; our compliance with covenants under our secured credit facility; our analysis of deferred tax valuation allowances, impairment analysis, and cost reduction plans; our ability to develop, produce, market or sell our products, either directly or through third parties, to reduce or control expenses, to improve efficiency, to realign resources, to successfully integrate acquired companies, or to continue operational improvement and year-over-year or sequential growth; our management succession; and the applicability of accounting policies used in our financial reporting. When used in this document and in documents it refers to, the words anticipate, believe, will, intend, project and expect or similar expressions as they relate to us or our management are intended to identify such forward-looking statements. These statements represent beliefs and expectations only as of the date they were made. We may elect to update forward-looking statements but we expressly disclaim any obligation to do so, even if our beliefs and expectations change.

Actual results may differ from those expressed or implied in our forward-looking statements. Such forward-looking statements involve and are subject to certain risks and uncertainties, which may cause our actual results to differ materially from those discussed in a forward-looking statement. These include, but are not limited to, risks and uncertainties described more fully in our reports filed or to be filed with the Securities and Exchange Commission including, but not limited to, our 2011 Form 10-K, current reports on Form 8-K, and quarterly reports on Form 10-Q, which are available on our website at www.intermec.com.

You are encouraged to review the Risk Factors portion of Item 1A of Part II of this filing which discusses the risk factors associated with our business.

Overview

Intermec is a global business that designs, develops, integrates, sells and resells wired and wireless automated identification and data collection (AIDC) products and related services. Our products and services are used by businesses of all sizes, throughout the world, and are particularly suited for challenging or harsh environments where mobility, reliability and durability are important. Our products include mobile computers, barcode scanners, printers, label media, radio frequency identification (RFID) products and related software. With our acquisition of Vocollect in March 2011, our products now include wearable voice data collection devices and related software. We also offer a variety of services related to our product offerings. Refer to Item 1 *Business*, in our 2011 Form 10-K, for detail about our products and services. Most of our revenue is currently generated through sales of mobile computers, wearable voice data capture devices and related software, printers and repair services.

Our strategy is to provide mobile business solutions that help our customers improve workflow performance, increase revenues, lower costs and improve customer satisfaction and loyalty. As part of that strategy, we seek to strengthen our position as a Solutions Company in the AIDC industry through vertical market expertise, a solutions orientation and customer and partner intimacy. We also seek to grow our business by targeting vertical markets, increasing our marketing activities, expanding our channel, adding more software and managed services to our offerings and introducing innovative new products.

Total revenue declined on a year-over-year basis predominantly from the segments of our business that are most comparable to our business as it existed prior to the acquisitions in March 2011. This decline was more pronounced in our Intermec-branded products segment, predominately in Europe, Middle East and Africa (EMEA) and to a lesser extent in North America, Asia Pacific (ASIAPAC) and Latin America (LATAM) geographic regions. We believe that our revenue decline reflects a decrease in enterprise spending globally and competitive pressure, particularly in Europe. We believe that many of our end customers completed projects in 2011 that had previously been started, but have taken a more cautious approach in 2012. These declines were partially offset by businesses that we acquired last year, specifically, the inclusion of a full six months of results from the Vocollect acquisition, compared to the inclusion of approximately four months results in the first six months of 2011 following the acquisition date of March 3, 2011, and the inclusion of a full six months of Enterprise Mobile results, compared to three and one half months of results included in the first six months of the prior year following the acquisition date of March 15, 2011.

For the three months ended July 1, 2012, worldwide revenues decreased 9% over the prior-year quarter. International revenues declined 12% over the prior-year quarter reflecting the negative impact of foreign currency exchange rates, significantly lower sales in EMEA, partially offset by growth in ASIAPAC and LATAM. Revenues in North America decreased 6% due primarily to declines in Intermec-branded product sales and a reduction in sales to the U.S. government. Within our Intermec-branded product categories, Systems and solutions revenues declined 11%,

Edgar Filing: Intermec, Inc. - Form 10-Q

and Printer and media revenue declined 14%, partially mitigated by a smaller decline in our Intermec-branded services and a small increase in our Voice solutions businesses.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

For the six months ended July 1, 2012, worldwide revenues decreased 5% over the prior-year quarter and decreased 11% when revenue from businesses acquired during the first quarter of 2011 are excluded. International revenues declined 12% over the prior-year quarter reflecting the negative impact of foreign currency exchange rates, significantly lower sales in EMEA, partially offset by the benefit of acquired revenues in those geographies. Revenues in North America increased due to the positive effects of revenue from Vocollect and Enterprise Mobile, partially offset by declines in Intermec-branded product sales. Within our Intermec-branded product categories, Systems and solutions revenues declined 10%, and Printer and media revenue declined 16%. Intermec-branded service revenue decreased 4% as compared with the prior-year period, largely due to the related lower product sales, and was down 9% when revenues from acquired businesses are excluded.

Total gross profit margin for the three months ended July 1, 2012 were 39.4%, as compared to 41.3% in the prior-year quarter, reflecting increased discounts on Intermec-branded products, reduced sales leverage on fixed costs, negative foreign currency exchange impacts and certain engineering fee payments.

Total gross profit margins for the six months ended July 1, 2012 were 38.1%, as compared to 39.9% in the prior year quarter, reflecting increased discounts on Intermec-branded products, negative foreign currency exchange impacts and reduced sales, partially offset by higher margins on our Voice-solutions segment which included a full six months of results, and a full six months results for Enterprise Mobile which was included in the Intermec-branded services segment. Additionally, in the first six months of 2012 we had several unusual charges and expenses that we do not anticipate will recur, including a \$1.9 million charge for non-recurring engineering fees for volume buy pay outs on minimum purchase commitments and a \$0.9 million charge for royalties based on the outcome of a software vendor audit.

Our financial reporting currency is the U.S. dollar, and changes in exchange rates can significantly affect our financial trends and reported results. Overall, as compared to the first six months of 2011, currency exchange rates negatively affected revenues by \$8.5 million and \$11.4 million in the first three and six months of 2012, respectively. Our consolidated revenues and operating expenses are subject to the fluctuations of foreign exchange rates; however, our cost of revenue is primarily denominated in U.S. dollars, and therefore, is less affected by changes in foreign exchange rates. If the U.S. dollar weakens year-over-year relative to currencies in our international locations, our consolidated revenues, costs of revenues and operating expenses will be higher than if currencies had remained constant. A weaker U.S. dollar typically results in improved gross margin yields as the increase in revenue would normally exceed the corresponding increase in costs. If the U.S. dollar strengthens year-over-year relative to currencies in our international locations, our consolidated revenues, operating expenses and to a certain extent cost of revenues will be lower than if currencies had remained constant. A stronger U.S. dollar typically results in diminished gross margin yields as the decreased revenue would normally outpace the corresponding reduction in costs. We believe it is important to evaluate our growth rates before and after the effect of foreign currency changes.

On June 12, 2012, we committed to a business restructuring plan intended to better align our cost structure with our current and anticipated needs by lowering costs in North America and Europe. These reductions are intended to lower our general and administrative support costs. Under the business restructuring plan, we will reduce our work force primarily in the United States and Europe by approximately 160 employees, which represent approximately 7% of our current total global workforce. We implemented this restructuring plan beginning later in the second quarter of 2012 and expect to complete it over the remainder of fiscal year 2012.

The total restructuring costs for this plan are expected to be approximately \$6.4 million, including employee termination costs of \$5.9 million and \$0.5 million of other associated costs. We recorded \$5.9 million of these charges in both the three and six months ended July 1, 2012. We expect to record the majority of the remaining charge throughout 2012. We anticipate that substantially all of the severance-related and periodic other associated costs will be cash expenditures. These costs are recorded on our condensed consolidated statement of operations in restructuring costs.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS****Results of Operations**

The following compares our results of operations and percentages of revenues for the three and six months ended July 1, 2012 and July 3, 2011 (in millions, except for per share data):

	Three Months Ended		Six Months Ended	
	July 1, 2012 Amounts	July 3, 2011 Amounts	July 1, 2012 Amounts	July 3, 2011 Amounts
Revenues	\$ 201.0	\$ 221.1	\$ 380.6	\$ 399.6
Costs and expenses:				
Cost of revenues	121.8	129.8	235.6	240.0

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS***Revenues (in millions)*

Revenues by category and geographic region and as a percentage of total revenues for the three months ended July 1, 2012, and July 3, 2011, as well as the same three months revenue changes were as follows (in millions):

	July 1, 2012	Three Months Ended Percent of Revenues	July 3, 2011	Percent of Revenues	Change	Percentage Change
Revenues by category:						
Intermec-branded:						
Systems and solutions	\$ 96.9	48.2%	\$ 108.6	49.1%	\$ (11.7)	(10.8)%
Printer and media	38.7	19.3	44.7	20.2	(6.0)	(13.4)
Services	34.8	17.3	37.3	16.9	(2.5)	(6.7)
Voice solutions	30.6	15.2	30.5	13.8	0.1	0.3
Total revenues	\$ 201.0	100.0%	\$ 221.1	100.0%	\$ (20.1)	(9.1)%

	July 1, 2012	Three Months Ended Percent of Revenues	July 3, 2011	Percent of Revenues	Change	Percentage Change
Revenues by geographic region:						
North America	\$ 101.2	50.3%	\$ 107.2	48.5%	\$ (6.0)	(5.6)%
Europe, Middle East and Africa (EMEA)	55.9	27.8	70.0	31.7	(14.1)	(20.1)
Latin America and Mexico (LATAM)	26.7	13.3	26.4	11.9	0.3	1.1
Asia Pacific (ASIAPAC)	17.2	8.6	17.5	7.9	(0.3)	(1.7)
Total revenues	\$ 201.0	100.0%	\$ 221.1	100.0%	\$ (20.1)	(9.1)%

Revenue for the three months ended July 1, 2012, decreased \$20.1 million, or 9.1%, compared to the prior year period. This decrease is substantially due to declines in sales in our Systems and solutions and Printer and media segments in our EMEA region primarily due to economic uncertainty in the region, increased competitive pressure and an \$8.5 million unfavorable change in foreign currencies as compared to the prior year currency rates across all regions. The majority of the unfavorable change in foreign currencies is due to currency rates of the Euro, Peso and Real.

Within the Intermec-branded product segment, Systems and solutions and Printer and media revenue for the three months ended July 1, 2012 decreased \$17.7 million from the prior year comparable period primarily due to declines in sales in EMEA which reflect economic uncertainty in the region and competitive pressure and, to a lesser extent, a decline in sales of our Printer and media product line in North America.

Intermec-branded service revenues of \$34.8 million for the quarter ended July 1, 2012, declined compared to the corresponding prior-year period. Service revenue declined in the three months ended July 1, 2012 as compared to the prior-year period. This decline is primarily attributable to reduced product sales that drive service revenues and a lower average price per unit under contract due to mix of lower cost product sales and competitive pricing.

Voice solutions revenue of \$30.6 million for the three months ended July 1, 2012 increased \$0.1 million, or 0.3%, compared to the corresponding prior-year period. Sales were lower than expected primarily due to delays in closing business as a result of turnover in our voice sales team in North America. We also anticipate reduced government program reimbursements related to customers of our Voice solution Healthcare (VHS) reporting unit of Voice Solutions, which may impact revenues going forward.

Edgar Filing: Intermec, Inc. - Form 10-Q

Revenues varied across the geographic regions for the quarter ended July 1, 2012. North America revenues decreased \$6.0 million, or 5.6%. The decrease in North America revenues was attributable primarily to a decline in Intermec-branded printer and media sales. EMEA revenues decreased \$14.1 million, or 20.1%, over the corresponding prior-year period. The decrease in EMEA revenues was mainly attributable to lower sales in our Intermec-branded product revenues driven by a slowing of large deals compared to the prior-year period, competitive pressure and economic conditions in that region. Foreign currency conversion rates unfavorably impacted EMEA revenue by \$4.7 million, or 6.7%. LATAM revenues grew slightly, up \$0.3 million from the prior year quarter. ASIAPAC revenues decreased \$0.3 million, or 1.7% primarily due to a strong comparable quarter in 2011. Across all regions the impact of foreign currency rates as compared to the foreign currency rates in the prior-year period was \$8.5 million, or 3.9%, unfavorable to revenue.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Revenues by category and geographic region and as a percentage of total revenues for the six months ended July 1, 2012, and July 3, 2011, as well as the same six months revenue changes were as follows (in millions):

	Six Months Ended		Six Months Ended		Change	Percentage Change
	July 1, 2012	Percent of Revenues	July 3, 2011	Percent of Revenues		
Revenues by category:						
Intermec-branded:						
Systems and solutions	\$ 178.7	47.0%	\$ 199.0	49.8%	\$ (20.3)	(10.2)%
Printer and media	74.2	19.5	88.1	22.0	(13.9)	(15.8)
Services	69.7	18.3	72.2	18.1	(2.5)	(3.5)
Voice solutions	58.0	15.2	40.3	10.1	17.7	43.9
Total revenues	\$ 380.6	100.0%	\$ 399.6	100.0%	\$ (19.0)	(4.8)%

	Six Months Ended		Six Months Ended		Change	Percentage Change
	July 1, 2012	Percent of Revenues	July 3, 2011	Percent of Revenues		
Revenues by geographic region:						
North America	\$ 192.8	50.7%	\$ 185.6	46.4%	\$ 7.2	3.9%
Europe, Middle East and Africa (EMEA)	110.5	29.0	135.9	34.0	(25.4)	(18.7)
Latin America and Mexico (LATAM)	46.5	12.2	46.3	11.6	0.2	0.4
Asia Pacific (ASIAPAC)	30.8	8.1	31.8	8.0	(1.0)	(3.1)
Total revenues	\$ 380.6	100.0%	\$ 399.6	100.0%	\$ (19.0)	(4.8)%

Revenue for the six months ended July 1, 2012, decreased \$19.0 million, or 4.8%, due largely to an \$11.4 million unfavorable change in foreign currencies as compared to the prior year currency rates across all regions. The decline in sales in our Systems and solutions and Printer and media segments in our EMEA region were primarily due to a slowing of large deals, competitive pressure and economic uncertainty in the region. These declines were partially offset by modest growth in and the inclusion of a full six months of the operations of Vocollect and Enterprise Mobile. These operations increased revenues by \$21.7 million over the prior year.

Within the Intermec-branded product segment, Systems and solutions and Printer and media revenue for the six months ended July 1, 2012 decreased \$34.2 million from the prior year comparable period primarily due to the declines in sales in EMEA which we believe reflects a slowing of large deals, competitive pressure and uncertainty in the economy and, to a lesser extent, a decline in sales of our Printer and media product line in North America.

Intermec-branded service revenues of \$69.7 million for the six months ended July 1, 2012, declined compared to the corresponding prior-year period. Intermec-branded service revenues for the six months ended July 1, 2012, includes \$7.1 million of revenue from Enterprise Mobile, acquired in 2011, which represents growth of \$4.0 million from the \$3.1 million of comparable revenues for the first six months of 2011. The decline is primarily attributable to reduced product sales and a lower average price per unit under contract due to mix of lower cost product sales and competitive pricing.

Voice solutions revenue of \$58.0 million for the six months ended July 1, 2012, increased \$17.7 million, or 43.9%, compared to the corresponding prior-year period, due to the inclusion of a full six months results from the Vocollect acquisition, compared to the inclusion of the results from acquisition date, March 3, 2011, in the first six months of 2011.

Edgar Filing: Intermec, Inc. - Form 10-Q

Revenues varied across the geographic regions for the six months ended July 1, 2012. North America revenues increased \$7.2 million or 3.9%. The increase in North America revenues was attributable to \$16.4 million for the inclusion of a full six months results of entities acquired in March, 2011, offset by a decline in Intermec-branded printer and media sales. EMEA revenues decreased \$25.4 million, or 18.7%, over the corresponding prior-year period. The decrease in EMEA revenues was mainly attributable to lower sales in our Intermec-branded product revenues driven by a slowing of large deals compared to the prior-year period and economic conditions in that region. Foreign currency conversion rates unfavorably impacted EMEA revenue by \$6.7 million, or 4.9%. These decreases in EMEA were partially offset by the inclusion of a full six months of Vocollect results, which increased \$4.6 million over the prior year. LATAM revenues remained fairly steady from the prior year's period. ASIAPAC revenues decreased \$1.0 million, or 3.1% primarily due to a particularly strong first six months in 2011. Across all regions the impact of foreign currency rates as compared to the foreign currency rates in the prior-year period

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

was \$11.4 million, or 2.9%, unfavorable to revenue. Operations of acquired entities positively contributed \$16.4, \$4.6 and \$0.4 million of the total change in revenues in North America, EMEA, and LATAM, respectively, for the six months ended July 1, 2012.

Gross Profit and Gross Margin

Gross profit and gross margin by revenue category for the three and months ended July 1, 2012 and July 3, 2011, were as follows (in millions):

	Three Months Ended				Six Months Ended			
	July 1, 2012		July 3, 2011		July 1, 2012		July 3, 2011	
	Gross Profit	Gross Margin	Gross Profit	Gross Margin	Gross Profit	Gross Margin	Gross Profit	Gross Margin
Intermec-branded products	\$ 47.3	34.9%	\$ 61.0	39.8%	\$ 84.2	33.3%	\$ 112.5	39.2%
Intermec-branded service	14.2	41.0%	13.2	35.5%	28.0	40.2%	25.8	35.8%
Voice solutions	17.6	57.6%	17.1	56.1%	32.9	56.8%	21.3	52.9%
Total	\$ 79.1	39.4%	\$ 91.3	41.3%	\$ 145.1	38.1%	\$ 159.6	39.9%

Total gross profit for the three months and six months ended July 1, 2012, decreased by \$12.2 and \$14.5 million, respectively, as compared to the corresponding prior-year period. These decreases in total gross profit were primarily attributable to increases pricing discounts on Intermec-branded products, reduced sales, negative foreign currency exchange impacts and engineering fees related to Intermec branded products and services. The gross profit decline for the six months ended July 1, 2012 was partially offset by the inclusion of a full six months of the Voice solutions segment.

Intermec-branded product gross profit decreased \$13.7 and \$28.3 million for the three and six months ended July 1, 2012, respectively, compared to the corresponding prior-year period primarily due to certain pricing discounts, reduced sales and the impact of foreign currency conversion rates.

The increase in Intermec-branded service gross profit for the three and six months ended July 1, 2012, from the corresponding prior-year periods was attributable to the inclusion of results for a full period from the Enterprise Mobile acquisition and reduced costs, partially offset by reduced sales in our traditional services business, largely in EMEA.

The increase in Voice solutions gross profit for the three and six months ended July 1, 2012, from the corresponding prior-year periods was attributable to a favorable sales mix. The increase for the six months ended July 1, 2012 was also attributable to the inclusion of a full six months of the Voice solutions results.

Operating Expenses and Interest Expense (in millions)

	Three Months Ended		
	July 1, 2012	July 3, 2011	Change
Research and development expense	\$ 20.4	\$ 22.9	\$ (2.5)
Selling, general and administrative expense	61.4	66.1	(4.7)
Impairment of goodwill	26.6		26.6
Gain on sale of assets	(1.3)		(1.3)
Acquisition costs		0.4	(0.4)
Restructuring costs	5.6	5.1	0.5
Interest, net	(0.8)	(0.6)	(0.2)

Edgar Filing: Intermecc, Inc. - Form 10-Q

	July 1, 2012	Six Months Ended July 3, 2011	Change
Research and development expense	\$ 40.4	\$ 40.7	\$ (0.3)
Selling, general and administrative expense	127.4	120.3	7.1
Impairment of goodwill	41.5		41.5

Interest, net	(1.5)	(1.0)	(0.5)

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

Research and Development Expenses - The total research and development (R&D) expenses were \$20.4 and \$40.4 for the three and six months ended July 1, 2012, respectively, compared to R&D expenses of \$22.9 and \$40.7 million for the corresponding prior-year periods. The decrease for the three months ended July 1, 2012 was primarily due to decreases in bonus and salary expense. The decrease for the six months ended July 1, 2012 was due to decreases in bonus expense partially offset by the inclusion of a full six months of Vocollect financial results compared to four months in 2011.

Selling, General and Administrative Expenses - Total selling, general and administrative (SG&A) expenses were \$61.4 and \$127.4 million for the three and six months ended July 1, 2012, compared to SG&A expenses of \$66.1 and \$120.3 million, respectively, for the corresponding prior-year period. The decrease in SG&A expenses for the three months ended July 1, 2012 as compared to the three months ended July 3, 2011, was primarily attributable to decreases in bonus expense, lower commissions on reduced sales, and stock compensation forfeitures related primarily to the departure of the former CEO. This decrease was partially offset by severance pay for our former CEO and a lawsuit settlement and payment. The increase in SG&A expenses for the six months ended July 1, 2012 was due to the inclusion of a full six months of expenses related to businesses acquired in March 2011 and severance pay for our former CEO, partially offset by a decrease in bonus expense, lower commissions on reduced sales, stock compensation forfeitures related primarily to the departure of the former CEO, and a gain on the sale of a small business entity.

Impairment of Goodwill - Impairment of goodwill during the three and six months of 2012 totaled \$26.6 and \$41.5 million, respectively, representing a partial write-off of previously acquired goodwill. The impairment was a result of a number of factors that existed during the first six months of 2012, and primarily reflects our business performance versus our prior forecast and the Company's current and recent lower market capitalization. See Note 16 to the Condensed Consolidated Financial Statements Goodwill and Other Long-Lived Assets for further discussion. We had no similar expense related to impairment of goodwill or other long-lived assets in the first three and six months ended July 3, 2011.

Gain on sale of assets - The gain on the sale of assets for the three and six months ended July 1, 2012 represents a \$1.3 million gain on the sale of a small European based reseller business. The six months ended July 1, 2012 included an additional \$1.4 million net gain from the sale of certain patents. There were no similar transactions for the comparable periods in 2011.

Acquisition Costs - The acquisition costs of \$0.4 and \$5.2 million for the three and six months ended July 3, 2011 relate to the acquisitions made in the first quarter of 2011.

Restructuring Costs. The increase in restructuring costs of \$0.5 and \$0.5 million for the three and six months ended July 1, 2012, respectively, as compared to the corresponding prior-year periods, was mainly due to the restructuring program announced in June 2012 to lower general and administrative support costs as compared to the restructuring program announced in May 2011 to restructure our non-US service group. Details of these programs are as follows:

The total pre-tax restructuring costs for the restructuring plan announced in June 2012 are expected to be approximately \$6.4 million, including employee termination costs of approximately \$5.9 million, and \$0.5 million of other transitional costs. We recorded \$5.9 million of the restructuring costs in the second quarter of 2012, and expect to record the remainder in the balance of the year. Substantially all of the severance-related and periodic transitional costs were cash expenditures. The net expense of \$5.6 million in the quarter includes a small reduction of the estimates recorded for the 2011 restructuring plan.

The total pre-tax restructuring costs for the restructuring plan announced in May 2011 were expected to be approximately \$5.9 million, including employee termination costs of approximately \$5.1 million, and \$0.8 million of other transitional costs. We recorded \$5.1 million of the restructuring costs in the second quarter of 2011, and recorded the remainder over the balance of the year. Substantially all of the severance-related and periodic transitional costs were cash expenditures. A small reduction to these costs was recorded in the second quarter of 2012 as noted in the paragraph immediately above.

Interest, Net - Net interest (income) expense was \$0.8 and \$1.5 million for the three and six months ended July 1, 2012, compared to net interest expense of \$0.6 and \$1.0 million for the corresponding prior-year periods. The increase in net interest expense was mainly due to the addition of interest paid on a full three months of borrowings under our Revolving Credit Facility, which was used to finance a portion of the Vocollect acquisition in March, 2011.

Income tax (benefit) expense (in millions)

Edgar Filing: Intermecc, Inc. - Form 10-Q

	Three Months Ended			Six Months Ended		
	July 1, 2012	July 3, 2011	Change from prior year	July 1, 2012	July 3, 2011	Change from prior year
Income tax (benefit) expense	\$ 3.1	\$ 0.1	\$ 3.0	\$ 211.0	\$ (2.8)	\$ 213.8

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

In the second quarter, we recorded a tax provision of \$1.7 million on foreign earnings and no tax benefit for earnings in the United States, Singapore and Japan due to losses in those jurisdictions. We also provided \$1.4 million for deferred taxes on projected future repatriation from certain foreign subsidiaries which are not permanently reinvested. The tax provision for the three months ending April 1, 2012 includes a net \$206.9 million non-cash charge to record a valuation allowance against our U.S. deferred tax assets.

Currently, we record valuation allowances in the following jurisdictions: United States, Singapore and Japan. Under GAAP, a valuation allowance against our deferred tax assets is appropriate if based on the available evidence, it is more likely than not (defined as a likelihood of more than 50%) that the value of such assets will not be realized in the future. The valuation of deferred tax assets requires judgment in assessing a number of factors, including the likely future tax consequences of events we expect to recognize in our financial statements and tax returns, as well as our historical performance.

Key factors we considered include our results for the quarter ended April 1, 2012; we recorded a pre-tax loss and significantly underperformed relative to our forecast. We also revised our forecast downward in the first quarter of 2012 for our U.S. and global operations for the remainder of 2012. We concluded that it was more likely than not that the value of such assets would not be realized and we recorded a valuation allowance for our U.S. entities representing the full balance of these assets. A sustained period of profitability in our U.S. operations is required before we would change our judgment regarding the need for a full valuation allowance against our U.S. deferred tax assets. In the event that we determine in the future that we expect to benefit from our deferred income tax assets in excess of the net balance at that time, we will make an adjustment to the deferred tax asset valuation allowance. This will reduce the provision for income taxes in that period. Until such time, we will offset U.S. profits against our deferred tax assets and will reduce the overall level of deferred tax assets subject to valuation allowance as a result.

For the jurisdictions where we did not record a valuation allowance, our tax provision includes an estimated annual effective tax rate from continuing operations of approximately 31%. Our effective tax rate from continuing operations in those jurisdictions is lower than the U.S. statutory rate of 35% due primarily to lower tax rates and tax incentives in those jurisdictions.

Liquidity and Capital Resources

Our principal sources of liquidity are our cash, cash equivalents and short-term investments, as well as cash flow that we expect to generate from our operations. In addition, we have a secured Revolving Credit Facility as described in the Capital Resources section below (in millions). Our cash flows are summarized in the following table:

(in millions)	Six Months Ended	
	July 1, 2012	July 3, 2011
Net cash used in operating activities	\$ (26,799)	\$ (7,165)
Net cash provided by (used in) investing activities	6,424	(213,043)
Net cash provided by financing activities	1,034	68,083

Cash Flow Summary

At July 1, 2012, cash, cash equivalents and short-term investments totaled \$74.9 million, a decrease of \$20.4 million compared to the December 31, 2011 balance of \$95.3 million. The decrease in cash is primarily due to cash used in operations described below, offset by proceeds from our company owned life insurance policies.

Cash used in operating activities of \$26.8 million in the first six months of 2012 was primarily due to a net loss of \$279.6 million, adjusted for a non-cash deferred tax valuation allowance and goodwill impairment charges of \$254.4 million and decreases in accounts payable and payroll partially offset by a reduction in accounts receivable. Cash used in operating activities of \$7.2 million in the first half of 2011 was primarily due to a net loss of \$9.9 million offset by an increase in amortization and deferred tax related to acquisitions.

For the six months ended July 1, 2012, investing activities provided \$6.4 million of cash primarily due to proceeds from loans against and the cash surrender of certain executive life insurance programs of \$9.0 million and the sale of intellectual property of \$1.4 million, offset by capital

Edgar Filing: Intermed, Inc. - Form 10-Q

expenditures of \$4.6 million. For the six months ended July 3, 2011, investing activities used \$213.0 million of cash primarily due to the acquisition of Vocollect and Enterprise Mobile and capital expenditures of \$11.5 million.

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Financing activities for the six months ended July 1, 2012, provided cash of \$1.0 million primarily related to the vesting of restricted stock units. Financing activities for the six months ended July 3, 2011, provided cash of \$68.1 million primarily related to incurring debt of \$97.0 million, offset by a \$20.0 million repayment of this debt and \$10.0 million of stock repurchased.

Capital Resources

Our principal capital resources include cash, cash equivalents and short-term investments. In addition, we have a secured Revolving Credit Facility (the "Revolving Facility"). Effective March 3, 2011, we amended our unsecured revolving credit facility with Wells Fargo Bank, National Association (the "Bank") to convert the facility to a three-year, \$100 million, secured revolving credit facility, which matures on March 3, 2014 (the "Revolving Facility"). The unsecured revolving credit facility was initiated on September 27, 2007. On December 21, 2011, we amended the Revolving Facility to expand our borrowing capacity to \$150 million and extended the maturity date to December 31, 2014. On February 2, 2012, we amended the Revolving Facility to modify certain financial covenants relating to net income. Effective March 30, 2012, we amended the Revolving Facility to remove certain financial covenants, to add a new covenant related to minimum adjusted EBITDA and to add a new financial covenant for permitted acquisitions. We were in compliance with all financial and non-financial covenants of the Revolving Facility at July 1, 2012.

During the three and six months ended July 1, 2012, our average borrowings outstanding were \$86.5 and \$85.7 million, respectively. At July 1, 2012, after considering the financial covenant requirements, we had borrowing capacity of \$7.3 million under the Revolving Facility, borrowings of \$85.0 million and \$1.5 million of letters of credit outstanding under the Revolving Facility. After giving effect to the February 2, 2012 and March 30, 2012 amendments, we were in compliance with the financial covenants of the Revolving Facility at July 1 2012. The key terms of the Revolving Facility are as follows following the amendments:

Loans bear interest at a variable rate equal to (at our option) (i) LIBOR plus the applicable margin, which ranges from 1.25% to 1.75%, or (ii) the Bank's prime rate, less the applicable margin, which ranges from 0.25% to 1.00%. If an event of default occurs and is continuing, then the interest rate on all obligations under the Revolving Facility may be increased by 2.0% above the otherwise applicable rate, and the Bank may declare any outstanding obligations under the Revolving Facility to be immediately due and payable. In addition, the Bank may exercise its security interest in our equity interests in the assets of certain of our domestic subsidiaries, and it may call the guaranties of payment obligations made by certain of our domestic subsidiaries.

A fee ranging from 0.60% to 1.00% on the maximum amount available to be drawn under each letter of credit that is issued and outstanding under the Revolving Facility. The fee on the unused portion of the Revolving Facility ranges from 0.15% to 0.25%.

Certain of our domestic subsidiaries have guaranteed the Revolving Facility.

The Revolving Facility contains various restrictions and covenants, including restrictions on our ability and the ability of our subsidiaries to consolidate or merge, make acquisitions, create liens, incur additional indebtedness or dispose of assets.

The Revolving Facility includes covenants requiring us to meet certain minimum financial performance thresholds, including:

A ratio of maximum funded debt to EBITDA allowed (as defined in the Revolving Facility) of not more than 2.5 to 1.

Edgar Filing: Intermecc, Inc. - Form 10-Q

An Asset Coverage Ratio of not less than 1 to 1 for debt to margined assets. For this purpose, a certain percentage of our accounts receivable and inventory balances are included in margined assets.

The minimum adjusted EBITDA allowed(as defined in the Revolving Facility) for the trailing twelve months is \$25 million for the second quarter of 2012, \$35 million for the third quarter of 2012, and \$45 million for all subsequent quarters.

We expect to be in compliance with our covenants for the next twelve months. A number of factors, including (without limitation) general macroeconomic and competitive conditions, increase the risk and uncertainty relating to achieving the levels of financial performance we expect and that would be required to remain in compliance with the financial covenants in the Revolving Facility, particularly the EBITDA-related covenants. If our financial performance does not meet our expectations we could fail to be in compliance with the financial covenants in the Revolving Facility. For example, with regard to the EBITDA-related covenants, a decline in revenue from expected levels would negatively affect our ability to comply with these covenants.

If we were to determine that we are or expect to be out of compliance with the financial covenants of the Revolving Facility, we believe that we could take steps available to us to avoid, mitigate or cure the breach, which may include, without limitation, steps such as: (i) seeking a waiver of compliance from the Bank and modifying the Revolving Facility in a manner satisfactory to the Bank, as we have done in the past, (ii) reducing the borrowings under the Revolving Facility using our existing cash to make payments to the Bank, or (iii) seeking other amendments or a restructuring or replacement of our Revolving Facility. We believe we can fund our ongoing working capital needs from operating cash flows and cash on hand.

For more information about risk factors related to the Revolving Facility and compliance with its covenants, and about risks related to our business performance, refer to our Risk Factors set forth in Part II, Item 1A. Risk Factors, of this Quarterly Report on Form 10-Q.

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

From time to time, we may look for potential acquisition targets for growth opportunities within our market, or to expand into new markets, which we believe can be funded with a combination of cash on hand, projected cash flows from operations and additional financing.

Depending on our assessment of the economic environment from time-to-time, we may decide to hold more cash than may be required to fund our future investment in working capital, capital expenditures and research and development and to implement changes in our cost structure. Projected cash flows from operations are largely based on our revenue estimates, cost estimates, and the related timing of cash receipts and cash disbursements. If actual performance differs from estimated performance, cash flows from operations could be positively or negatively impacted.

Contractual Obligations

Except for the Revolving Facility outlined in Capital Resources above, our contractual commitments as of July 1, 2012 have not changed materially from those disclosed in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations of our 2011 Form 10-K.

Critical Accounting Policies and Estimates

Our condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities, and the reported amounts of revenues and expenses. Actual amounts could differ from those estimates under different assumptions or conditions. Our critical accounting policies and estimates are discussed in Item 7, Management's Discussion and Analysis of Financial Condition and Results of Operations of our 2011 Form 10-K.

Goodwill. The accounting for goodwill requires that we test the goodwill of our reporting units for impairment on an annual basis, or when an event occurs or circumstances change such that it is more likely than not that impairment may exist. Our annual testing date is in the fourth quarter. In assessing the existence of impairment, our considerations include the impact of significant adverse changes in market and economic conditions; the results of our operational performance and strategic plans; unanticipated changes in competition; market share; and the potential for the sale or disposal of all or a significant portion of our business or a reporting unit. Goodwill impairment is deemed to exist if the net book value of a reporting unit exceeds its fair value. Accounting rules require a two-step goodwill impairment test whereby the first step, used to identify potential impairment, compares the fair value of a reporting unit with its carrying amount, including goodwill. If the estimated fair value of a reporting unit is less than its carrying amount, goodwill of the reporting unit is potentially impaired, thus the second step of the goodwill impairment test is used to quantify the amount of any impairment that exists.

We assign goodwill to our reporting units based on the expected benefit from the synergies arising from each business combination. We have three reportable segments: Intermecc-branded products, Intermecc-branded services and Voice solutions. Intermecc-branded services and Voice solutions each comprise two reporting units. Intermecc-branded services are divided into: Core Service and Intermecc Global Solutions (IGS). Voice solutions contains the Vocollect Supply Chain (VSC) and Vocollect Healthcare reporting units (VHS).

Q1 2012 goodwill impairment analysis

During the first quarter of 2012, two events occurred that triggered an analysis of the carrying value of goodwill and resulted in the estimated write down of goodwill of \$14.9 million. Specifically, operating income was less than our forecast, primarily due to an \$19 million loss on operations in the first quarter principally in the Intermecc-branded products and services segments. In addition, our financial results negatively impacted the price per share of Intermecc stock, causing the market capitalization of the Company to be significantly below its net book value. These triggering events were indicators that it was more likely than not the fair value of the Company's goodwill was less than its book value.

We prepared a Step 1 goodwill impairment analysis to determine the fair values of all three reporting units with goodwill (Intermecc Global Solutions, Healthcare, and Supply Chain). To calculate the fair values we used the discounted cash flow method and market approach. We made significant assumptions and estimates about the extent and timing of future cash flows, growth rates, and discount rates that represent unobservable inputs into our valuation methodologies used to calculate fair value. The cash flows were estimated over a significant future period of time, which made those estimates and assumptions subject to

Table of Contents**ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

a high degree of uncertainty. Where available and as appropriate, comparative market multiples and the quoted market price of our common stock were used to corroborate the results of the discounted cash flow method and market approach. Assumptions used in our analysis that have the most significant effect on the estimated fair values of our reporting units include:

Our estimated weighted-average cost of capital (WACC); and

Our estimated long-term growth

Market multiples

Once we had determined our assumptions, we calculated the fair value of each reporting unit and compared it to the carrying value of the reporting unit. After performing our Step 1 analysis for the reporting units, we determined that the carrying value of the Supply Chain reporting unit exceeded its fair value by \$14.9 million and recognized an estimated impairment charge in the first quarter. Due to the timing and complexity of this analysis, Step 2 of the impairment test was substantially completed in the second quarter of 2012. After performing that test, we determined we had an additional goodwill impairment of \$25.8 million associated with our Supply Chain reporting unit. The additional impairment was the result of an increase in the fair value of developed and in-process technology intangible assets within the Supply Chain reporting unit. The increase in the intangible assets reduced the implied fair value of the goodwill, and we recognized a \$40.7 million cumulative impairment of the Supply Chain reporting unit goodwill for the six months ended July 1, 2012.

Determining the fair value of goodwill for the Supply Chain reporting unit for Step 2 was judgmental in nature and involved the use of significant estimates and assumptions to calculate a hypothetical fair value of the assets and liabilities within the reporting unit. Our analysis utilized the income approach to calculate the implied fair value of goodwill of the Supply Chain reporting unit. The key inputs we used in the income approach included our forecast of revenue and expenses, a migration curve of developed and in-process technology, tax rate, discount rates, customer retention rates, useful lives, and contributory charge rates. These key inputs, for the income approach, are classified as Level 3 within the fair value hierarchy, see Note 3 *Fair Value Measurements*.

Q2 2012 goodwill impairment analysis

During the three months ended July 1, 2012, we significantly changed the composition of key senior management at the reporting units and also changed our Chief Executive Officer. Additionally, we evaluated certain market trends and specific changes in our marketplace including, macro and micro economic conditions, expected government spending and industry data. As a result of the changes and evaluations, a review was performed over all areas in which we engage in business. Upon conclusion of the review, key operational and investment decisions were made which resulted in changes in the amount and timing of receipts and expenditures. Specifically, forecasts of revenue, research and development costs, capital expenditures, and other inputs to operations were revised, and the result was reduced cash flow forecasts across the three reporting units with goodwill. Consequently, a triggering event occurred to evaluate impairment of goodwill, specific to facts and circumstances during the three months ended July 1, 2012.

We prepared a Step 1 goodwill impairment analysis to determine the fair values of all three reporting units with goodwill (Intermec Global Solutions, Healthcare, and Supply Chain). To calculate the fair values we used the discounted cash flow method and market approach. We utilized the same methods listed above in *Q1 2012 goodwill impairment analysis* to perform our Step 1 analysis for the three months ended July 1, 2012. Once we had determined our assumptions, we calculated the fair value of each reporting unit and compared it to the carrying value of the reporting unit.

After performing our Step 1 analysis for the reporting units we determined that the carrying value of the Healthcare reporting unit exceeded its fair value, so we then performed a Step 2 analysis. Based on a preliminary Step 2 analysis we determined we had a estimated goodwill impairment of \$0.8 million associated with our Healthcare reporting unit. This impairment was primarily the result of a reduction in our long

Edgar Filing: Intermedec, Inc. - Form 10-Q

term business forecast specifically related to expected government spending in the skilled nursing are, the likely impact on capital investments in that market and the timing of the launch of new products for our Healthcare reporting unit. Due to the complexity and timing of this Step 2 analysis we will finalize it in the third quarter of 2012 and the impairment amount may change at that time.

Determining the fair value of goodwill for the Healthcare reporting unit for Step 2 is judgmental in nature and involves the use of significant estimates and assumptions to perform a hypothetical fair value of the assets and liabilities within the reporting unit. Our analysis utilized the income approach to calculate the implied fair value of goodwill of the Healthcare reporting unit. The key inputs we used in the income approach included our forecast of revenue and expenses, a migration curve of developed and new technology, tax rate, discount rates, customer retention rates, useful lives, and contributory charge rates. These key inputs, for the income approach, are classified as Level 3 within the fair value hierarchy. See Note 3 Fair Value Measurements to our Condensed Consolidated Financial Statements for further detail.

Future goodwill impairments that may be material could be recognized should the recent economic uncertainty continue, our equity price declines on a sustained basis, global economies enter in another recession, or industry growth stagnates further. Our

Table of Contents

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

fair value estimates for event-driven impairment tests assume the achievement of future financial results contemplated in our forecasted cash flows and there can be no assurance that we will realize that value. The estimates and assumptions used are subject to significant uncertainties, many of which are beyond our control, and there is no assurance that anticipated financial results will be achieved.

The fair value for the Intermecc Global Services reporting unit and the Supply Chain reporting unit exceeded their carrying value by 8.5% and 8.2%, respectively and therefore are not impaired. Performance of our business operations could lag behind our forecast, which in turn could impact the fair value of our reporting units. In addition, based upon the results of our Step 1 test the margin between the fair value of the Intermecc Global Services, Supply Chain and Healthcare reporting units and their carrying amounts are sensitive to changes in discount rate and forward operating results. An 100 bps increase in our discount rate may trigger an impairment when coupled with declining results of operations. In addition, a 5% decrease in the cash flows from operations may also yield recognition of impairment. Based upon the best information available, it does not appear more likely than not that either of these scenarios will occur.

Valuation of Long-Lived Assets. Long-lived assets, such as property, plant, and equipment, and intangible assets subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset group may not be recoverable. Recoverability of asset groups to be held and used is measured by a comparison of the carrying amount of an asset group to estimated undiscounted future cash flows expected to be generated by the asset group. If the carrying amount of an asset group exceeds its estimated future cash flows, an impairment charge is recognized on our statement of operations and as a reduction to the asset group to the extent that the fair market value of the asset group is less than its carrying value. Assets to be disposed of would be separately presented in the balance sheet and reported at the lower of the carrying amount or fair value less costs to sell, and are no longer depreciated. The assets and liabilities of a disposal group classified as held for sale would be presented separately in the appropriate asset and liability sections of the balance sheet. Due to the same circumstances that required the interim goodwill impairment test above, we evaluated our long-lived assets for impairment for the quarters ended April 1, 2012 and July 1, 2012. We determined that the carrying amount of our long-lived assets does not exceed their estimated undiscounted future cash flow and therefore our long-lived assets are not impaired as of April 1, 2012 or July 1, 2012.

Table of Contents

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of July 1, 2012, there have been no material changes in the information provided in Item 7A of our 2011 Form 10-K, which contains a complete discussion of our material exposures to foreign currency exchange rate risk.

ITEM 4. CONTROLS AND PROCEDURES

Under the supervision and with the participation of management, including the Interim Chief Executive Officer, or CEO, and Chief Financial Officer, or CFO, we have evaluated the effectiveness of the design and operation of our disclosure controls and procedures as required by Exchange Act Rule 13a-15(e) as of the end of the period covered by this quarterly report. Based on that evaluation, management, including the CEO and CFO, has concluded that our disclosure controls and procedures as defined in Rule 13a-15(e) were effective as of July 1, 2012. There were no changes in our internal control over financial reporting during the quarter ended July 1, 2012, that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents**PART II. OTHER INFORMATION****ITEM 1. LEGAL PROCEEDINGS**

We currently, and from time to time, are involved in claims, lawsuits and other proceedings, including, but not limited to, intellectual property, commercial, and employment matters, which arise in the ordinary course of business. We currently do not expect the ultimate resolution of pending matters (including the matters described below) to be material to Intermec in relation to our business, financial condition, results of operations or liquidity. With the exception of one of our cases, which involves the defense of our patents, the external legal costs incurred in these matters are expensed.

In the case Intermec Technologies Corporation v. Palm, Inc., Civil Action No. 1:05-cv-00147-SLR, United States District Court for the District of Delaware (the Palm Case), the parties entered into a confidential settlement agreement that ended the case before trial.

In the case Intermec, Inc. v. International Business Machines Corporation, Civil Action No. 2:11-cv-00165, United States District Court for the Western District of Washington (the IBM Case), there have been no material changes in the case during the second quarter of 2012 since those described in our Report on Form 10-Q for the period ended April 1, 2012. The trial in the IBM Case concluded on March 29, 2012, with a jury verdict in Intermec's favor of \$1.05 million, which was \$0.7 million less than the receivable carried on our balance sheet. This \$0.7 million was expensed in the first quarter of 2012. In the second quarter of 2012, IBM filed a Motion for Judgment Not Withstanding the Verdict and indicated that it intends to appeal the decision in the District Court, and Intermec asked the Court for a new trial or order on the issue whether pre-trial interest is owed to Intermec on the amount awarded by the jury.

In the case Alien Technologies Corporation v. Intermec, Inc., et al., Civil Action No. 3:06-cv-0051, United States District Court for the District of North Dakota, Southeastern Division (the Alien Case), Alien Technologies Corporation (Alien) sued Intermec in June 2006 for a declaratory judgment that Alien does not infringe certain Intermec patents relating to radio frequency identification technology (RFID) and that certain Intermec RFID patents are invalid; Alien's case against Intermec does not assert any counterclaimed damages or loss against Intermec. Intermec counterclaimed against Alien for infringement related to certain of those patents. In the suit, Intermec is seeking a decision that its patents are valid and infringed by Alien. Both parties have requested reimbursement of legal fees. The Intermec patent remaining in the Alien Case after the District Court's summary judgment decisions has been the subject of proceedings in the U.S. Patent and Trademark Office (USPTO), which upheld the validity of most of the original claims as well as found new claims patentable upon reexamination. The reexamination decision was appealed by Alien to the Board of Patent Appeals and Interferences (BPAI) of the USPTO. On July 19, 2012, the BPAI issued a decision finding that the examiner erred in not considering certain grounds of rejection previously proposed by Alien. Intermec intends to continue reexamination proceedings for the patent claims at issue, including the submission of further evidence demonstrating that the possible new grounds of rejection should not be adopted by the examiner. The BPAI did not find error with the examiner's decision not to adopt any other grounds of rejection originally proposed by Alien. The legal fees related to the defense of this case have been capitalized and reported on our Condensed Consolidated Balance Sheets as Other assets.

Refer to *Commitments and Contingencies* in Note 13 of the Notes to Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q, and to *Capitalized Legal Patent Costs* in Significant Accounting Policies in Note 1 and to *Commitments and Contingencies* in Note 13 of the Notes to Condensed Consolidated Financial Statements in our 2011 Form 10-K.

ITEM 1A. RISK FACTORS

You are encouraged to review the discussion of Forward Looking Statements and Risk Factors appearing in this report at Part I, Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

In addition to the other information set forth in this Report, you should carefully consider the factors discussed in Part I, Item 1A. Risk Factors in our 2011 Form 10-K, and the factors discussed in this Part II, Item 1A, Risk Factors of this Quarterly Report on Form 10-Q for the quarter ended July 1, 2012 (the Second Quarter Form 10-Q) and in the First Quarter Form 10-Q, which could materially affect our business, financial condition, operating results, earnings or stock price, in various ways. The risks described in our 2011 Form 10-K and in the Second Quarter Form 10-Q are not the only risks facing our Company. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially adversely affect our business, financial condition or operating results.

The risk factor included in the 2011 Form 10-K under the caption *We have entered into a senior secured credit facility agreement that includes covenants, financial tests and ratios, which, if not met, may have an adverse effect on our business, financial condition, results of operations and cash flows* is restated in its entirety as follows:

We have entered into a senior secured credit facility agreement that includes covenants, financial tests and ratios, which, if not met, may have an adverse effect on our business, financial condition, results of operations and cash flows. We maintain a senior secured credit facility that contains certain customary covenants to the Bank providing the credit facility, including financial covenants that require us to comply with specified financial ratios and tests. The credit facility is secured by pledges of equity in and assets of certain of our domestic subsidiaries, which have also guaranteed our payment obligations under the credit facility. We must take into account the requirements of these covenants in the conduct of our business. Depending on the circumstances under which we could fail to satisfy one or more of these covenants, we may need to make choices that limit some of our business or financing activities in order to comply with them. These choices may have an adverse effect on our results of operations and cash flows. Furthermore, we were not in compliance with certain of our debt covenants effective as of each of December 31, 2011, and April 1, 2012, but in each case the Bank agreed to amend the credit facility agreement to bring us back into compliance. However, if we fail to comply with the requirements of the credit facility in the future, we would be in default, and we may not be able to obtain the necessary amendments or waivers of an event of default. In that event, the Bank could declare all amounts outstanding, together with accrued interest, to be immediately due and payable. The Bank could also move to enforce its rights under its security interests in our assets and those of our subsidiaries. If at that time we were not able to repay any amounts borrowed under the credit facility using our existing cash, or to obtain sufficient financing from alternative sources to make the repayment, or if alternative financing is not available on favorable terms, or at all, our business and financial condition would be materially adversely affected. Such alternative financing, if available, may include increased costs or other terms affecting our business or assets. We could also incur substantial costs in pursuing such alternative financing arrangements. Financing arrangements that include the issuances of equity or other securities convertible into equity could cause our existing stockholders' interests to be diluted.
