Enbridge announces \$500 million common equity offering

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES

OR FOR DISSEMINATION IN THE U.S.

CALGARY, Alberta, April 4, 2013 Enbridge Inc. (TSX:ENB) (NYSE:ENB) today announced that it has entered into an agreement with RBC Capital Markets and Scotiabank (the Underwriters) to sell 10,850,000 million treasury common shares, on a bought deal basis, at \$46.11 per common share for distribution to the public. Closing of the offering is expected on or about April 16, 2013.

Enbridge has granted the Underwriters an option, exercisable at any time up to 48 hours prior to closing of the offering, to purchase up to an additional 2,170,000 million treasury common shares at \$46.11 per common share.

Since the long-term funding plan discussed at our investor conference last fall we have achieved greater than expected progress in the development of attractive new growth opportunities, including those already announced and those yet to be said J. Richard Bird, Enbridge Executive Vice President, Chief Financial Officer & Corporate Development. An update to our funding plan now indicates an incremental equity requirement over the 2012-2016 period. The common share offering today continues our practice of maintaining a very manageable forward funding requirement. After the common share offering, and our recent preferred share issue, our net forward equity requirement stands at \$1.9 billion through 2016, which we expect to accommodate through additional preferred share issues and asset monetizations. The additional growth investments will contribute to sustaining Enbridge's industry-leading EPS growth rate through 2016 and well beyond.

Enbridge's updated funding plan is available on our website.

The offering is being made only in Canada by means of a prospectus. Proceeds will be used to fund our recently announced regional oilsands, renewable energy, and natural gas pipelines and processing projects, reduce outstanding indebtedness, to make investments in subsidiaries and for general corporate purposes.

This news release does not constitute an offer to sell or a solicitation of an offer to buy the common shares in any jurisdiction. The common shares offered have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.

About Enbridge Inc.

Enbridge Inc. is a North American leader in delivering energy and one of the Global 100 Most Sustainable Corporations. As a transporter of energy, Enbridge operates, in Canada and the U.S., the world's longest crude oil and liquids transportation system. The Company also has a significant and growing involvement in natural gas gathering, transmission and midstream

businesses, and an increasing involvement in power transmission. As a distributor of energy, Enbridge owns and operates Canada's largest natural gas distribution company, and provides distribution services in Ontario, Quebec, New Brunswick and New York State. As a generator of energy, Enbridge has interests in close to 1,000 megawatts of renewable and alternative energy generating capacity and is expanding its interests in wind and solar energy, geothermal and hybrid fuel cells. Enbridge employs 10,000 people, primarily in Canada and the U.S. and is ranked as one of Canada's Greenest Employers, and one of the Top 100 Companies to Work for in Canada. Enbridge's common shares trade on the Toronto and New York stock exchanges under the symbol ENB. For more information, visit www.enbridge.com.

Certain information provided in this news release constitutes forward-looking statements. The words anticipate, expect, project, estimate, forecast and similar expressions are intended to identify such forward-looking statements. Although Enbridge believes that these statements are based on information and assumptions which are current, reasonable and complete, these statements are necessarily subject to a variety of risks and uncertainties pertaining to operating performance, regulatory parameters, weather, economic conditions and commodity prices. You can find a discussion of those risks and uncertainties in our Canadian securities filings and American SEC filings. While Enbridge makes these forward-looking statements in good faith, should one or more of these risks or uncertainties materialize, or should underlying assumptions prove incorrect, actual results may vary significantly from those expected. Except as may be required by applicable securities laws, Enbridge assumes no obligation to publicly update or revise any forward-looking statements made herein or otherwise, whether as a result of new information, future events or otherwise.

PRESS RELEASE

EDF EN Canada Inc. and Enbridge

Acquire 300 MW Blackspring Ridge Wind Project

Largest wind project development in Western Canada

TORONTO, Ontario and CALGARY, Alberta April 8, 2013: EDF EN Canada Inc., a subsidiary of EDF Energies Nouvelles, and Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today they have jointly signed a purchase agreement with Greengate Power Corporation to acquire the 300 megawatt (MW) Blackspring Ridge Wind Project. Located in Vulcan County, Alberta (50 km north of Lethbridge), Blackspring Ridge will be the largest wind project in Western Canada when operational. EDF EN Canada and Enbridge will each own 50 percent of the project. The project represents the largest investment in wind energy in the province at approximately \$0.6 billion.

The project, currently in late stage development, will be comprised of 166 Vestas V100-1.8 MW wind turbines. EDF EN Canada will build the project under a fixed price engineering, procurement and construction contract with construction expected to start in the second quarter of 2013 and reach commissioning in mid-summer 2014.

The Canadian renewable energy market is a strong focus for EDF EN, having a significant presence in Ontario and Quebec since 2007. The Blackspring Ridge project presents a unique opportunity to establish EDF EN Canada in Western Canada and specifically in Alberta a province with a promising electricity market, said Cory Basil, Vice President, Development at EDF EN Canada. Securing this project builds upon our relationship with Vestas and Enbridge and adds to our existing portfolio of over 1,000 MW of renewable energy projects in Canada. It further demonstrates the benefit of geographic diversification and illustrates our business objectives to balance and optimize assets to preserve our market leadership position across North America. And as important, the firm order is positive news for Vestas US based manufacturing plants.

Blackspring Ridge is an important addition to Enbridge's fleet of renewable projects as it significantly expands our wind energy portfolio in the Alberta market, which we first entered nearly a decade ago with our Magrath and Chin Chute windfarms, said Don Thompson, Vice President, Green Energy, Enbridge Inc. Alberta is an attractive environment for wind investments due to its high wind capacity factor and access to transmission. Enbridge's investment represents a further addition to its large suite of attractive commercially secured growth projects, reinforcing the continuation of its industry leading growth rate through 2016 and well beyond. We welcome this opportunity to continue expanding our renewable energy assets into Western Canada.

Edgar Filing: ENBRIDGE INC - Form 6-K

The project also allows Enbridge to maintain its position as the second largest wind energy generator in Canada, Mr. Thompson added. We're pleased to continue our relationship with EDF EN Canada and Vestas.

Renewable Energy Credits (RECs) generated from the project are contracted to Pacific Gas and Electric under 20-year purchase agreements. The electricity will be sold into the Alberta power pool with pricing substantially fixed through mid- and long-term contracts.

The project is expected to provide substantial economic benefits to rural Alberta in the form of jobs both during construction and long-term operations, increased tax revenues and lease payments to landowners. In addition, the project is expected to have a positive impact on Alberta's environment by supplying enough clean energy to serve approximately 140,000 homes.

The project will also contribute to helping Enbridge meet its Neutral Footprint commitment to generate a kilowatt of renewable energy for every kilowatt of conventional electricity that the company's operations consume.

Blackspring Ridge Wind Project At-A-Glance:

Location	Southern Alberta; north of Lethbridge
Installed Capacity	300 MW
Annual Yield	1,021 GWh
Turbines	166 Vestas V100-1.8 MW turbines
Equivalent Homes Served	About 140,000
Construction Company	Mortenson Construction
Construction Start Date	Second Quarter 2013
REC Purchaser	Pacific Gas and Electric
Interconnection Provider	AltaLink
Peak Work Force	More than 250 jobs during peak construction

Enbridge Announces Full Exercise of Underwriters' Option

NOT FOR DISTRIBUTION TO U.S. NEWSWIRE SERVICES

OR FOR DISSEMINATION IN THE U.S.

CALGARY, Alberta, April 10, 2013 Enbridge Inc. (TSX:ENB) (NYSE:ENB) announced today that further to the public offering of 10,850,000 common shares previously announced on April 4, 2013 (the Offering), RBC Capital Markets and Scotiabank have exercised the underwriters' option granted to them to purchase an additional 2,170,000 common shares. Gross proceeds from the Offering, inclusive of the underwriters' option, are expected to be approximately \$600 million. Closing of the Offering is expected on or about April 16, 2013.

The Offering is being made only in Canada by means of a prospectus. Proceeds will be used to fund our recently announced regional oilsands, renewable energy, and natural gas pipelines and processing projects, reduce outstanding indebtedness, to make investments in subsidiaries and for general corporate purposes.

This news release does not constitute an offer to sell or a solicitation of an offer to buy the common shares in any jurisdiction. The common shares offered have not been registered under the United States Securities Act of 1933, as amended, and may not be offered or sold within the United States unless registered under the U.S. Securities Act and applicable state securities laws or an exemption from such registration is available.
