Contents

**Exhibit 1:**

October 23, 2014, Honda will strengthen both the quality assurance structure during the development process at R&D centers and the system and capability to check potential quality issues through the collaboration of experts from each of the production, quality management and customer service divisions.

Moreover, Honda will create a new position of executive officer in charge of this quality reform for Automobile Operations, as the person responsible for the implementation of measures to prevent a recurrence of quality issues and lead Honda's company-wide reform of the quality assurance structure in a cross-functional manner. Furthermore, the same officer will concurrently serve as a vice president of Honda R&D Co., Ltd. and lead the effort to strengthen the quality assurance structure within the technology/product development process at Honda R&D.

**Exhibit 2:**

October 23, 2014, Honda Motor Co., Ltd. announced the Notice Concerning Operating Officer Change in Responsibilities effective November 1, 2014.

**Concerning the Strengthening of the Quality Assurance Structure**

October 23, 2014

Honda Motor Co., Ltd.

October 23, 2014 - Honda Motor Co., Ltd. has always placed the highest priority on the safety and sense of security of our customers. Based on this priority, Honda has been improving the quality of our products throughout the processes of development, production and customer service and taking prompt action at the earliest possible timing to remedy quality issues found in the market.

However, since the all-new Fit Hybrid and Vezel Hybrid went on sale in 2013, Honda has caused considerable inconvenience to our customers with multiple recalls.

Taking these recalls seriously, Honda will revisit its existing quality assurance structure and undertake a reform in the effort to eliminate quality issues.

The defect in question was caused due to the fact that the system which controls the motor and engine in combination was not adequately verified during the system development processes, in which verification is conducted assuming use in a certain variety of possible conditions. Giving due consideration to this fact, Honda will further strengthen its verification during the technology/product development process and during the transition to mass production by assuming use in a wider range of possible conditions.

To this end, Honda will strengthen both the quality assurance structure during the development process at R&D centers and the system and capability to check potential quality issues through the collaboration of experts from each of the production, quality management and customer service divisions.

Moreover, Honda will create a new position of executive officer in charge of this quality reform for Automobile Operations, as the person responsible for the implementation of measures to prevent a recurrence of quality issues and lead Honda's company-wide reform of the quality assurance structure in a cross-functional manner. Furthermore, the same officer will concurrently serve as a vice president of Honda R&D Co., Ltd. and lead the effort to strengthen the quality assurance structure within the technology/product development process at Honda R&D.

Finally, sincerely accepting responsibility for the fact that these quality issues caused considerable inconvenience to our customers and society, the executive officers in charge of relevant areas, including the president and CEO, will voluntarily forfeit part of their salaries.

Honda deeply regrets the significant inconvenience experienced by our customers. With the determination to pursue the prevention of a recurrence, the improvement of product quality and the delivery of products that satisfy our customers, Honda asks for your continuous understanding and cooperation.
